Whatever the arguments offered by the Indian Government that it must maintain public order, it should be obvious to all that strong arm tactics will ultimately prove to be futile or even counterproductive. Events over the last year in Eastern Europe, Central America, South Africa, and even the Soviet Union have shown how potent a force is the idea of freedom. India itself, after showing the power of nonviolent protest in achieving its own independence from Britain, must surely understand the aspirations of Kashmir's people. The Indian presence in Kashmir, which day-by-day looks more like a military occupation, is a blot on the proud record of the world's largest democracy.

As a member of the United Nations Security Council, the United States has consistently supported a plebiscite to allow the people of Kashmir the opportunity to determine their own future. Unfortunately, the Soviet Union has used its veto to block any further action on a plebiscite. We can only hope that changes in the Soviet Union will result in a fresh look at this issue by the Kremlin leadership.

In the meantime, we must call on India to reassess its position on Kashmir and adhere to its original commitment to settle the Kashmir problem through the ballot box. The peace within Kashmir and the region as a whole depend on India's answer.●

TRIBUTE TO LAKE CITY BASKETBALL TEAM

● Mr. BOSCHWITZ. Mr. President, I rise today to salute an extraordinary group of young men, and their coaches, who recently were crowned class A basketball champions of the Great State of Minnesota.

The Lake City Tigers recently won their third Minnesota State basketball championship, and I want to take a moment to congratulate them on their achievement, and to say a few words about the coach who has directed Lake City to these championships, Jerry Snyder.

Jerry has been coaching young men for nearly 30 years in Minnesota, and has amassed more than 400 wins during a distinguished career, winning nearly 70 percent of his games in that span. He teaches a very disciplined style of basketball, emphasizing defense, and anyone who has watched his teams play will tell you that he finds a way to get the most out of his available talent. More important, however, is the fact that his sense of honor and sportsmanship are evident in his teams and in his manner.

Lake City is one of Minnesota's more beautiful towns, Mr. President, sitting alongside Lake Pepin, protected by the bluffs of the Mississippi River. They take great pride in their basketball teams, and indeed they have had a great deal of success in both their boys' and girls' programs over the years. This latest championship is a tribute to the entire town, and to its support of its educational and athletic programs.

Finally, I should add that in honor of his work this year, and indeed in recognition of 28 years of coaching, Jerry Snyder's fellow coaches voted him the honor of Minnesota Coach of the Year. To that honor I add my congratulations, and to his team and the entire of town of Lake City I say congratulations on a job well done, and I ask that the list of team members and coaches be printed in the RECORD.

MINNESOTA CLASS A CHAMPION LAKE CITY TIGERS

Coaches: Jerry Snyder, Leo Fausch, and Henry Dison.

Players: Erik Brunkow, Gary Brown, Brock Lortscher, Tony Wise, Troy Diepenbrock, Paul Schad, Erik Sievers, Tony Heise, Brett Stolzenberg, Jason Oeltjen, Brent Meincke, Duren Moses, Chris Sommerfield, Cris Gastner, and Trent Sanders.

Student managers: Keith Zanto and Terry Walker.

Athletic director: Jim Baker.●

BUDGET SCOREKEEPING REPORT

● Mr. SASSER. Mr. President, I hereby submit to the Senate the latest budget scorekeeping report for fiscal year 1990, prepared by the Congressional Budget Office in response to section 308(b) of the Congressional Budget Act of 1974, as amended. This report was prepared consistent with standard scorekeeping conventions. This report also serves as the scorekeeping report for the purposes of section 311 of the Budget Act.

This report shows that current level spending is under the budget resolution by $3.5 billion in budget authority, and over the budget resolution by $4 billion in outlays. Current level is under the revenue floor by $5.2 billion.

The current estimate of the deficit for purposes of calculating the maximum deficit amount under section 311(a) of the Budget Act is $114.6 billion, $14.6 billion above the maximum deficit amount for 1990 of $100 billion.

The report follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, April 2, 1990.

Hon. JIM SASSER,
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of Congressional action on the budget for fiscal year 1990 and is current through March 30, 1990. The estimates of budget authority, outlays, and revenues are consistent with the technical and economic assumptions of the 1990 Concurrent Resolution on the Budget (H. Con. Res. 106). This report is submitted under Section 308(b) and in aid of Section 311 of the Congressional Budget Act, as amended, and meets the requirements for Senate scorekeeping of Section 5 of S. Con. Res. 32, the 1986 First Concurrent Resolution on the Budget.

Since my last report, dated March 26, 1990, there has been no action that affects the current level of spending or revenues.

Sincerely,

ROBERT D. REISCHAUER,
Director.

CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE, 101ST CONG., 2D SESS. AS OF MAR. 30, 1990

[In billions of dollars]

	Current level [1]	Budget resolution H. Con. Res. 106	Current level +/− resolution
Budget authority	1,325.9	1,329.4	−3.5
Outlays	1,169.2	1,165.2	4.0
Revenues	1,060.3	1,065.5	−5.2
Debt subject to limit	2,989.6	3,122.7	−133.1
Direct loan obligations	19.1	19.3	−.2
Guaranteed loan commitments	114.7	107.3	7.4
Deficit	114.6	[2] 100.0	[3] 14.6

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval and is consistent with the technical and economic assumptions of H. Con. Res. 268. In addition, estimates are included of the direct spending effects for all entitlement or other mandatory programs requiring annual appropriations under current law even though the appropriations have not been made. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions. In accordance with Sec. 102(a) of the Balanced Budget and Emergency Deficit Control Reaffirmation Act (101 Stat. 762) the current level deficit amount compared to the maximum deficit amount does not include asset sales.

[2] Maximum deficit amount [MDA] in accordance with section 3(7)(E) of the Congressional Budget Act, as amended.

[3] Current level plus or minus MDA.

PARLIAMENTARIAN STATUS REPORT, 101ST CONG., 2D SESS., SENATE SUPPORTING DETAIL, FISCAL YEAR 1990 AS OF CLOSE OF BUSINESS MARCH 30, 1990

[In millions of dollars]

	Budget authority	Outlays	Revenues
I. Enacted in previous sessions:			
Revenues			1,068,600
Permanent appropriations and trust funds	954,917	791,226	
Other legislation	639,255	638,374	566
Offsetting receipts	−237,825	−233,738

Under budget resolution	3,495		5,234

[1] Less than $500,000.

Notes.—Numbers may not add due to rounding. Amounts shown in parenthesis are interfund transactions that do not add to totals.●

PUBLIC HOUSING MANAGEMENT IMPROVEMENT ACT OF 1990

● Mr. D'AMATO. Mr. President, I rise today as a cosponsor of S. 2301, the Public Housing Management Improvement Act of 1990. Our Nation's current public housing system needs to be restructured to provide the proper incentives for public housing authorities to provide families with the greatest quality of life possible. Senator BOND's legislation begins to tackle this problem.

This Nation currently spends over $4 billion annually to sustain our public housing system. Some of this housing is adequate, safe, and well managed—providing a comfortable living environment for families and children. However, other public housing projects do not meet these standards. They are traps in which our citizens fight crime and drugs, constantly battling the downward spiral out of which only the strongest can climb.

It has not always been this way. Over the years we have turned a low and moderate income, up-and-out housing system into an intergenerational welfare net. We have made public housing a place for only those families on the Federal rolls. And we have forced the housing authorities to become dependent on Federal handouts/transfer payments as well.

Currently, no positive incentives exist to promote efficient, result-oriented administration of our $4 billion Federal investment in public housing. Additionally, heavily centralized accounting and management systems make it virtually impossible for HUD to hold local housing agencies accountable for their administration of specific public housing projects. No one knows what it costs to run a specific project. Nor is it easy for a resident to get a centralized maintenance department to come and fix a broken window.

Because of the lack of positive incentives within the system, a poorly run housing authority receives just as much funding as a well-managed one. And, in some circumstances, the worse a housing authority has performed, the more Federal funding it has received. The simple concept of encouraging and rewarding good performance is absent from this system. And so is any mechanism to crack down on consistently poor performance.

S. 2301, the Public Housing Management Improvement Act of 1990, will improve the current situation by giving HUD the tools to: First, establish management standards for PHA's; second, evaluate how PHA's comply with these standards; third, provide incentives for good management and performance; and fourth, crackdown on PHA's that are not in compliance with national standards.

Under this legislation, HUD will devise objective performance standards to measure how well PHA's are doing. Once these standards have been established, HUD is to designate both high performing and troubled housing agencies and is given a series of powers to reward and punish PHA's accordingly.

These changes will give greater flexibility to and accountability for the Nation's public housing system. Currently, PHA's that would like to perform well have their hands tied behind their backs by stringent rules and regulations that prevent them from making necessary changes. On the other hand, PHA's that are not performing up to par continue to receive a steady stream of funding and are not given any reason to change the way they perform. The current regulations that allow these two extremes to occur must be altered.

Additionally, such legislation diminishes the complexity that has developed within the public housing system. S. 2301 takes much of the power out of the hands of the Federal Government, which does not have the capacity to understand the inner workings of each local PHA, and puts more power into the hands of State and local governments. This will allow programs that have become too complex at the Federal level to be more accountable for their actions, and to better serve the taxpayer who provides for such programs.

The complexity and lack of accountability that has come to define the American public housing system is not a new phenomenon but rather the result of decades of unforeseen changes in America's cities coupled with misguided Federal and local housing policy. The taxpayer and, more importantly, the families living in this housing, deserve better. It is time to reexamine this Federal approach to housing families in need. I am pleased to support my friend from Missouri [Mr. BOND] in his effort to provide flexibility within our public housing system and place accountability where it functions best—at the local level.●

UNANIMOUS-CONSENT AGREEMENT

Mr. BAUCUS. Mr. President, as in executive session I ask unanimous consent that at such time as the Senate considers the nomination of Robert W. Sweet, Jr., there be 20 minutes of debate equally divided between Senator BIDEN and Senator THURMOND or their designees; that at the conclusion of yielding back of time the Senate vote on the nomination, without any intervening action, that the motion to

reconsider be tabled, that the President be notified, and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR COMMITTEES TO REPORT DURING RECESS OF SENATE

Mr. BAUCUS. Mr. President, I ask unanimous consent that during the recess of the Senate, committees may file reported Legislative and Executive Calendar business on Wednesday, April 11, from 12 noon to 3 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF ENERGY AND METAL CASTING COMPETITIVENESS RESEARCH ACT

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Senate proceed to immediate consideration of Calendar Order No. 493, H.R. 1243, the metal casting competitiveness research bill.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 1243) to require the Secretary of Energy to establish three Centers for Metal Casting Competitiveness Research.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Department of Energy Metal Casting Competitiveness Research Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) metal casting is an important process for manufacturing many items imported into or exported from the United States.

(2) the encouragement and maintenance of a technologically advanced United States metal casting industry is essential to the competitiveness of many American industries;

(3) maintaining a viable metal casting industry is vital to the national security and economic well-being of the United States;

(4) the promotion of technology competitiveness and energy efficiency in the United States metal casting industry by the Federal Government is necessary to maintain a viable metal casting industry;

(5) many metal casting companies lack the resources to conduct metal casting research alone, placing them at a serious competitive disadvantage;

(6) the support of university-based research in metal casting is important in promoting technology development and providing industy with qualified engineers; and

(7) by combining the resources of the Federal Government, universities, industry, and private organizations, to conduct research and development activities, substantial technological benefits will result to the metal casting industry.

SEC. 3. DEFINITIONS.

As used in this Act, the term—

(1) "applicant" means:

(A) an educational institution;

(B) a consortium of educational institutions;

(C) a consortium of an educational institution or educational institutions with one or more of the following: Government-owned laboratories, private research organizations, nonprofit institutions or private firms;

that is located in a region where the metal casting industry is concentrated;

(2) "census region" means one of the four census regions (Northeast, South, Midwest, and West) that are designated as census regions by the Bureau of the Census;

(3) "Department" means the Department of Energy;

(4) "educational institution" means a degree granting institution;

(5) "non-Federal source" means the United States metal casting industry, related industries, industry-related associations, individuals, organizations, universities, State agencies, or other entities supporting the metal casting industry;

(6) "metal casting industry" or "industry" means the industries identified by codes numbered 3321, 3322, 3324, 3325, 3363, 3364, 3365, 3366, and 3369, in the Standard Industrial Classification manual published by the Office of Management and Budget in 1987;

(7) "Secretary" means the Secretary of Energy.

SEC. 4. ESTABLISHMENT OF PROGRAM.

The Secretary, acting in accordance with authority provided in the Federal Non-Nuclear Research and Development Act of 1974 (42 U.S.C. 5901 et seq.), shall establish a Metal Casting Competitiveness Research Program (hereafter in this Act referred to as the "Program") for the purpose of performing and promoting the performance of research and development on issues related to the technology competitiveness and energy efficiency of the United States metal casting industry.

SEC. 5. OPERATION OF PROGRAM.

(a) SOLICITATION OF PROPOSALS.—Within one year after the date of enactment of this Act, the Secretary shall solicit and select proposals on a competitive basis from applicants to carry out the program under section 4. In order for a proposal to be considered by the Secretary, the applicant shall have in existence at the time the proposal is submitted the following qualifications:

(1) the available space, support services, and technical capability to carry out research under the program;

(2) a multidisciplinary research staff experienced in metal casting or other directly related technologies; and

(3) the facilities and equipment capable of conducting testing or demonstration of metal casting or related processes.

(b) PROPOSAL CRITERIA.—Each proposal shall—

(1) demonstrate the support of the metal casting industry by describing—

(A) how industry has participated in deciding what research activities will be undertaken;

(B) how industry will participate in the evaluation of the applicant's progress in research and development activities; and

(C) the extent to which industry funds are committed to the applicant's proposal.

(2) demonstrate a commitment from non-Federal sources of a financial share not less than 35 per centum but no more than 50 per centum of the proposal's cost. For purposes of determining the non-Federal financial share, the fair market value of equipment, services, materials, technology transfer activities, and other assets directly related to the proposal's cost shall be included;

(3) include a single or multiyear management plan that outlines how the research and development activities will be administered and carried out;

(4) state the annual cost of the proposal and a breakdown of those costs; and

(5) describe the technology transfer mechanisms the applicant will use to make available research results to industry and to other researchers.

(c) CONTENT OF MANAGEMENT PLAN.—The management plan set forth in subsection 5(b)(3) shall—

(1) outline the basic research and development activities expected to be performed;

(2) outline who will conduct those research activities;

(3) establish the time frame over which the research activities will take place; and

(4) define the overall program management and direction by—

(A) identifying managerial, organizational and administrative procedures and responsibilities;

(B) outlining how the coordination of research and development between the individuals and organizations involved will be achieved;

(C) providing how implementation and monitoring of the progress of research projects after receipt of funding from the Secretary will be achieved;

(D) providing how recommendations and implementations on modifications to the plan will be achieved; and

(E) providing sufficient rationale to support the plan's costs.

(d) SELECTION OF PROPOSALS.—From the proposals submitted, the Secretary shall select proposals for funding. The Secretary shall attempt to select at least four proposals. The Secretary shall select the proposals that—

(1) will best result in carrying out needed research and development in one or more of the following general areas—

(A) Environmental Technologies;

(B) Computer Modeling;

(C) Substitute Alloy Development;

(D) Net-Shape Casting;

(E) Gating Systems Design;

(F) Treatment, disposal and recycling technology of waste streams;

(G) Techniques and processes to improve energy efficiency in melting technology;

(H) Increased Yield Improvement;

(I) Melting and Pouring Research

(J) Molding Processes Modernization;

(K) Die Cast and Foundry-Associated Metals Processing Technologies; and

(L) Other areas of research, which in the judgment of the Secretary after consulting with the Board established in section 7, further the purposes of this Act;

(2) represent research and development in specific areas identified in the "Metal Casting Research Priorities" developed annually by the Board pursuant to subsection 7(b)(1);

(3) to the greatest extent possible and subject to available appropriations, ensure that at least one applicant is selected from each of the four census regions of the country where the metal casting industry is concentrated;

(4) demonstrate strong industry support;

(5) ensure the timely transfer of technology to industry; and

(6) otherwise best carry out the purposes of this Act.

(e) FUNDING OF PROGRAM.—From amounts made available in separate appropriation Act, the Secretary shall provide to each applicant selected the financial and technical assistance and other incentives that are necessary and appropriate to carry out the purposes of this Act.

(f) NATIONAL METAL CASTING RESEARCH INSTITUTE.—Each recipient of financial assistance under subsection (d) shall be known as a "National Metal Casting Research Institute".

SEC. 6. REVIEW.

(a) EVALUATION OF RESEARCH ACTIVITIES.—The Secretary shall regularly monitor and evaluate the research activities of the applicants selected. After considering the reports of the Board provided for in subsection 7(b)(2), the Secretary shall determine whether each applicant selected has complied with the management plan submitted in the original proposal and any modifications made since.

(b) ANNUAL REPORT.—Each selected applicant in the program shall provide an annual report to the Secretary that explains the progress made, compliance with the management plan, whether changes are needed and are being made to the management plan, and what new research is planned.

(c) DISCONTINUATION OF FUNDING.—In the event a selected applicant has substantially failed in the implementation of the management plan and research activities, the Secretary shall discontinue funding.

(d) SOLICITATION OF NEW PROPOSALS.—Upon completion or discontinuance of any research activity authorized in section 5, the Secretary shall, using available funds appropriated pursuant to this Act, solicit new research proposals as set forth under the terms of this Act.

SEC. 7. INDUSTRIAL ADVISORY BOARD.

(a) ESTABLISHMENT OF BOARD.—Within sixty days after the date of the enactment of this Act the Secretary after consulting with representatives of trade and technical associations of the metal casting industry shall establish an Industrial Advisory Board (hereafter in this Act referred as the "Board") to provide guidance and oversight in implementing the selection criteria and operation of the program. The Board shall be composed of nine members who are selected by the Secretary and who shall be individuals from the metal casting industry or individuals affiliated with industry contributors. At least one member of the Board shall be chosen from each of the four census regions of the country. Each Board member shall serve for a term not to exceed five years, but may be reappointed for successive terms.

(b) REVIEW AND RECOMMENDATIONS.—(1) Within one hundred and eighty days after the date of the enactment of this Act and annually thereafter, the Board shall develop from the general research areas identified in section 5(d) and submit to the Secretary a list of Metal Casting Research Priorities. Such list shall, to the greatest extent possible, identify specific areas of research that would be considered of a priority nature to the United States metal casting industry.

(2) On an annual basis the Board shall—

(A) review the Secretary's solicitation and selection of research proposals and make recommendations as to how each such activity can be altered so as to better achieve the purposes of this Act; and

(B) review the research activities of each selected applicant, and the selected applicant's management plan, and report its findings and recommendations to the Secretary.

(c) DURATION OF THE BOARD.—The Board shall exist for the life of the Act.

SEC. 8. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary for carrying out this Act $20,000,000 for each of the fiscal years 1991, 1992, 1993, 1994, and 1995.

SEC. 9. PROTECTION OF PROPRIETARY RIGHTS.

Activities under this Act shall be subject to section 5 of the Steel and Aluminum Energy Conservation and Technology Competitiveness Act of 1988 (102 Stat. 4075).

SEC. 10 REPORTING.

The Secretary shall in each year's Departmental budget request to Congress provide a detailed review of the progress of the research and development activities authorized under this Act.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the committee substitute be agreed to, that the bill be advanced to third reading and passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 1243), as amended, was passed.

Mr. BAUCUS. I move to reconsider the vote.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIVE AMERICAN LANGUAGE ACT

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Order No. 476, S. 1781, regarding the preservation of Native American languages.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1781) to establish as the policy of the United States the preservation, protection, and promotion of the rights of Native Americans to use, practice, and develop Native American languages, to take steps to foster such use, practice, and development, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs, with an amendment to strike all after the enacting clause, and insert in lieu thereof the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Native American Language Act".

FINDINGS

SEC. 2. The Congress finds that—

(1) the status of the cultures and languages of Native Americans is unique and the United States has the responsibility to act together with Native Americans to ensure the survival of these unique cultures and languages;

(2) special status is accorded Native Americans in the United States, a status that recognizes distinct cultural and political rights, including the right to continue separate identities;

(3) the traditional languages of Native Americans are an integral part of their cultures and identities and form the basic medium for the transmission, and thus survival, of Native American cultures, literatures, histories, religions, political institutions, and values;

(4) there is a widespread practice of treating Native Americans languages as if they were anachronisms;

(5) there is a lack of clear, comprehensive, and consistent Federal policy on treatment of Native American languages which has often resulted in acts of suppression and extermination of Native American Languages and cultures;

(6) there is convincing evidence that student achievement and performance, community and school pride, and educational opportunity is clearly and directly tied to respect for, and support of, the first language of the child or student;

(7) it is clearly in the interests of the United States, individual States, and territories to encourage the full academic and human potential achievements of all students and citizens and to take steps to realize these ends;

(8) acts of suppression and extermination directed against Native American languages and cultures are in conflict with the United States policy of self-determination for Native Americans;

(9) languages are the means of communication for the full range of human experiences and are critical to the survival of cultural and political integrity of any people; and

(10) language provides a direct and powerful means of promoting international communication by people who share languages.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) The term "Native American" means an Indian, Native Hawaiian, or Native American Pacific Islander.

(2) The term "Indian" has the meaning given to such term under section 5351(4) of the Indian Education Act of 1988 (25 U.S.C. 2651(4)).

(3) The term "Native Hawaiian" has the meaning given to such term by section 4009 of Public Law 100-297 (20 U.S.C. 4909).

(4) The term "Native American Pacific Islander" means any descendent of the aboriginal people of any island in the Pacific Ocean that is a territory or possession of the United States.

(5) The terms "Indian tribe" and "tribal organization" have the respective meaning given to each of such terms under section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

(6) The term "Native American language" means the historical, traditional languages spoken by Native Americans.

(7) the term "traditional leaders" includes Native Americans who have special expertise in Native American culture and Native American languages.

(8) The term "Indian reservation" has the same meaning given the term "reservation" under section 3 of the Indian Financing Act of 1974 (25 U.S.C. 1452).

DECLARATION OF POLICY

SEC. 4. It is the policy of the United States to—

(1) preserve, protect, and promote the rights and freedom of Native Americans to use, practice, and develop Native American languages;

(2) allow exceptions to teacher certification requirements for Federal programs, and programs funded in whole or in part by the Federal Government, for instruction in Native American languages when such teacher certification requirements hinder the employment of qualified teachers who teach in Native American languages, and to encourage State and territorial governments to make similar exceptions;

(3) encourage and support the use of Native American languages as a medium of instruction in order to encourage and support—

(A) Native Americans language survival,

(B) educational opportunity,

(C) increased student success and performance,

(D) increased student awareness and knowledge of their culture and history, and

(E) increased student and community pride;

(4) encourage State and local education programs to work with Native American parents, educators, Indian tribes, and other Native American governing bodies in the implementation of programs to put this policy into effect;

(5) recognize the right of Indian tribes and other Native American governing bodies to use the Native American languages as a medium of instruction in all schools funded by the Secretary of the Interior;

(6) fully recognize the inherent right of Indian tribes and other Native American governing bodies, States, territories, and possessions of the United States to take action on, and give official status to, their Native American languages for the purpose of conducting their own business;

(7) support the granting of comparable proficiency achieved through course work in a Native American language the same academic credit as comparable proficiency achieved through course work in a foreign language, with recognition of such Native American language proficiency by institutions of higher education as fulfilling foreign language entrance or degree requirements; and

(8) encourage all institutions of elementary, secondary and higher education, where appropriate, to include Native American languages in the curriculum in the same manner as foreign languages and to grant proficiency in Native American languages the same full academic credit as proficiency in foreign languages.

NO RESTRICTIONS

SEC. 5. The right of Native Americans to express themselves through the use of Native American languages shall not be restricted in any public proceeding, including publicly supported education programs.

EVALUATIONS

SEC. 6. (a) The President shall direct the heads of the various Federal departments, agencies, and instrumentalities to—

(1) evaluate their policies and procedures in consultation with Indian tribes and other Native American governing bodies as well as traditional leaders and educators in order to determine and implement changes needed to bring the policies and procedures into compliance with the provisions of this Act;

(2) give the greatest effect possible in making such evaluations, absent a clear specific Federal statutory requirement to the contrary, to the policies and procedures which will give the broadest effect to the provisions of this Act; and

(3) evaluate the laws which they administer and make recommendations to the President on amendments needed to bring such laws into compliance with the provisions of this Act.

(b) By no later than the date that is 1 year after the date of enactment of this Act, the President shall submit to the Congress a report containing recommendations for amendments to Federal laws that are needed to bring such laws into compliance with the provisions of this Act.

USE OF ENGLISH

SEC. 7. Nothing in this Act shall be construed as precluding the use of Federal funds to teach English to Native Americans.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on agreeing to the committee amendment in the nature of substitute.

The committee amendment in the nature of a substitute was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BAUCUS. Mr. President, I move to reconsider the vote.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR WEDNESDAY

RECESS UNTIL 10 A.M. MORNING BUSINESS

Mr. BAUCUS. Mr. President, on behalf of the majority leader I ask unanimous consent that when the Senate completes its business today it stand in recess until 10 a.m. Wednesday, April 4; that following the time for the two leaders there be a period for morning business not to extend beyond 11 a.m., with Senators permitted to speak therein for up to 5 minutes each.

I further ask unanimous consent that, at 11 a.m., the Senate go into executive session to consider the nomination of Timothy Ryan, to be the Director of the Office of Thrift Supervision.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAUCUS. Mr. President, if the distinguished acting Republican leader has no further business, and if no other Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess, under the previous order, until 10 a.m., Wednesday, April 4.

There being no objection, the Senate, at 10:14 p.m., recessed until Wednesday, April 4, 1990, at 10 a.m.

EXTENSIONS OF REMARKS

TRIBUTES TO POLISH PRIME MINISTER MAZOWIECKI

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. ROSTENKOWSKI. Mr. Speaker, we were recently given the high privilege of receiving the Honorable Tadeusz Mazowiecki, the remarkable Prime Minister of the Republic of Poland, on his first state visit to the United States.

Over the course of his visit, Prime Minister Mazowiecki held many important meetings, including two with the President, and made numerous public appearances in Washington, Chicago, and New York. I was personally honored to be present for many of those events.

Prime Minister Mazowiecki is a man of great intellect and thoughtfulness. Unlike many politicians who feel that the merit of a particular position increases in direct relationship to the volume with which it is pronounced, Mr. Mazowiecki puts great stock in an understated demeanor noted for its dignity and depth.

It is entirely fitting, of course, that the Prime Minister of Poland conduct that nation's affairs of state with great dignity. As the Prime Minister reminded us in Chicago, it has been the rightful claim to live in dignity which has again inspired a wave of political reform in Poland and around the world.

And despite his quiet delivery, I think all Members will agree that we heard the Prime Minister.

We heard him when he delivered Poland's unassailable claim to the right of secure and inviolable borders.

We heard him when he stressed the need for an all-Europe structure in which Poland will play its rightful—and prominent—role.

We heard him when he called for a renewed and strengthened partnership between the United States and Poland—a relationship needed now more than ever, by both nations.

I urge all my colleagues to heed what we have heard, and to join me in rededicating ourselves to the support of programs designed to make real the aspirations of the freedom-loving people of Poland.

As a further matter, Mr. Speaker, I wish to bring to the attention of my colleagues one of the more stirring moments of the Prime Minister's visit. The occasion was a ceremony, held in New York City at the Cathedral of St. John the Divine, on March 26, to celebrate the awarding of the first Cathedral Peace Prize to Prime Minister Mazowiecki.

Notable among the moving statements made at that ceremony were two in particular; one by our colleague, the gentleman from New York [Mr. SOLARZ], the other by Mr. Jan Nowak, the Polish patriot and trusted adviser on Poland to both the administration and the Congress.

In both statements, the authors, each in his own way, offers an eloquent tribute to the courage, vision, and leadership of Prime Minister Mazowiecki, and to the great movement for political democracy and economic reform which he symbolizes.

I hope my colleagues will agree with me that these statements should be made a part of the permanent record of this body. Accordingly, I include the statements in their entirety at this point in the CONGRESSIONAL RECORD.

ADDRESS BY REPRESENTATIVE STEPHEN J. SOLARZ

This is an extraordinary moment in the history not only of our country but of the world. Nineteen ninety, like 1848, 1914, and 1945, is likely to be remembered as marking the end of one epoch and the beginning of another.

From Stettin in the Baltic to Trieste in the Adriatic, the iron curtain has ascended all across Europe. In one Central and Eastern European country after another, crypto-Stalinist dictatorships are being transformed into genuine parliamentary democracies.

This past weekend the first free and fair elections in over forty years were held in Hungary. Last week they took place in East Germany. And before the year is over, Czechoslovakia, Roumania, and Bulgaria will be holding truly free and fair elections as well.

In the Soviet Union itself we are witnessing the gradual emergence of a multi-party system and the ineluctable dissolution of the last of the great empires.

And if anyone doubts the truly profound character of these remarkable political transformations, I have in my hand a card which should lay those doubts to rest. It is the business card of the Washington correspondent for Poland's communist newspaper. And printed on this card is the phrase: "Number One Opposition Paper of Poland."

I chose my example carefully, because the truth is that the winds of democracy which are now sweeping away the political debris of discredited dictatorships all across Central and Eastern Europe first began to blow in Poland. And if it hadn't been for the triumph of political pluarlism in Poland in 1989, democracy never would have come to the other great countries of Eastern and Central Europe in 1990.

It started with the election of a Polish pope in 1978.

It gained momentum when the Holy Father made his first pastoral visit to the land of his birth in 1979, and the millions of Poles who came out to see him got a sense of their own strength and solidarity, while simultaneously providing the definitive answer to Stalin's cynical question "How many divisions does the Pope have?"

It received a boost when an anonymous electrician climbed the fence at the Lenin shipyard in Gdansk a year later and lent his political genius and tactical skills to the establishment of Solidarnosc.

It was kept alive during the years of martial law by Zbigniew Bujak and the other leaders of underground Solidarnosc, who proved the truth of Stalin's aphorism that "establishing communism in Poland is like trying to put a saddle on a cow."

And it was finally and fully resurrected by the roundtable agreement and the elections last year, in which the people of Poland, given the first opportunity in fifty years to freely and fairly determine their own destiny, threw out the communists and made possible the establishment of the government led by the good and decent man we honor by our presence here today—Prime Minister Tadeusz Mazowiecki.

So it seems to me that we have a very special obligation to Prime Minister Mazowiecki, and to the Polish people, whose personal courage and political creativity made it all possible.

History is filled with the stories of Poles who have come to the aid of others. Sobieski's lifting of the siege of Vienna in 1683, Kosciusko's contribution to our own revolution in 1776, and the brave Polish soldiers, sailors, and airmen who fought alongside the Allies to liberate Europe from the Nazis in the 1940s, all made a critical contribution to the cause of freedom in other lands.

In view of what Poland has done for America and Europe, it is time for America and Europe to start doing something for Poland.

This is not just a question of sentiment. It is very much a matter of our own self-interest. If democracy in Poland should fail, if economic reform should make things worse rather than better, it would inevitably jeopardize the experiments in political pluralism and market economics elsewhere in Central and Eastern Europe—not to mention the Soviet Union itself.

So we have an enormous stake in the survival and success of democracy and free enterprise in Poland, which is why I believe that if we could spend literally trillions of dollars over the last forty years to defend Western Europe from the threat of Soviet military aggression, we can surely afford billions of dollars in investments, credits, and debt relief to consolidate democracy in Eastern Europe.

George Bernard Shaw once wrote: "Some men see things as they are and ask why. Other men dream things that never were and ask why not." Prime Minister Mazowiecki and the people of Poland are dreaming of things that, at least in their part of the world, never were, and it is up to us to help him turn those dreams—the dreams of peace, pluralism, and prosperity—into an enduring reality.

ADDRESS BY JAN NOWAK

Mr. Prime Minister, distinguished guests. It is more than a privilege to address this distinguished gathering. In my 45 years of life in exile, I never lost hope that one day Poland would be free again. But with each passing year, I had less and less hope that I would live long enough to see Poland's resurrection.

And here the dream comes true.

We gather here to welcome a man who is leading his nation back into the family of free and democratic peoples.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

I feel deeply moved by the ecumenical character of this event and grateful to our hosts. Ecumenism—the brotherhood of people of different creeds, race, nationalities and political outlook—can be summed up in one word: Solidarity.

The Solidarity movement represents the best of Poland's historical heritage, and admitted openly what was wrong.

Solidarity has rejected violence.

In 1981, the movement was crushed by the police and the military. People were kidnapped, beaten and killed. Others were fired from their jobs and thrown into jail. But years of this brutal persecution failed to provoke Solidarity into violence.

Solidarity won its astounding victory because of the strength of its spirit and the unity of the Polish people—their courage, their determination, their collective will and their fierce perseverance.

Solidarity seeks reconciliation and dialogue with its enemies.

Solidarity seeks reconciliation and dialogue with its enemies. There was no hanging or lynching in Poland. No vengeance. No revenge. Tadeusz Mazowiecki was jailed for two years by General Jaruszelski. He was villified by the media under the general's control. Yet today we witness an unusual spectacle. The former victim joins hands with his oppressor to assure a peaceful transition from a totalitarian regime to democracy, from a monopolistic state economy to a free market.

Solidarity rejects collective responsibility and negative stereotypes applied to any people.

Solidarity does not seek to stir bitter memories. It seeks friendship and reconciliation with its neighbors. Even while still an underground movement, Solidarity was reaching out to its neighbors in Czechoslovakia and Hungary, Lithuania, the Ukraine and East Germany. Friendly contacts and cooperation were established with the reform movements in all these countries.

As a result of Potsdam and Yalta, one third of Poland's lands were annexed by the Soviet Union. Even today, two million Poles remain behind the Soviet border. But the Poland of Mazowiecki does not raise territorial claims against its neighbors. It wants to live in peace and friendship with all its neighbors within the existing borders.

At the present moment, Poland is seeking reconciliation with her German neighbors on the same basis—respect for Poland's territorial integrity and acceptance of the existing borders as final and inviolable. Mr. Mazowiecki's recent efforts to remove any ambiguity on this issue are important for the future peace and security of Europe. The experience of recent history tells us that any potential source of conflict is better eliminated while it is still only a spark—before that spark turns into a fire.

With all its strengths, Solidarity may well have lost its long struggle without the strong support and protection of the Catholic Church. Under the leadership of those two great men, the late primate of Poland, Cardinal Stefan Wyszinski, and the former Archbishop of Krakow, Cardinal Karol Wojtyla, the Polish Church underwent a remarkable evolution. It became the champion and defender of the freedom of conscience. . . . not just of its faithful, but of all people, regardless of religious allegiance, believers and non-believers alike. The Church became a fortress. Every man and every woman persecuted for their convictions found safety and protection behind its walls. The defense of human rights for all—of every religion, race and nationality—has been a principal theme of the pontificate of John Paul II. It was this Polish Pope who made the pilgrimage to the synagogue to embrace his Jewish brothers and put an end to 2,000 years of discord between Christianity and Judaism.

Europe and the world still have much at stake in the ultimate success of the ideals represented by Solidarity. Their success in Poland will provide a shining example to other nations of East Central Europe. Their failure would be a severe blow to the emerging democracies throughout this vital region. Failure could mean a return to despotic regimes of various brands and colors and to disruptive nationalistic conflicts.

I met Prime Minister Mazowiecki in Warsaw in the early days of last September when he was forming his Cabinet. The problems and dangers he was facing seemed insurmountable. He was taking over a terrible legacy of communist rule:

An economy in shambles;

Enormous foreign debts;

Runaway inflation;

Labor unrest;

An ecological disaster area;

And the hostility of an entrenched bureaucracy, still clinging to its power and privileges.

It called for tremendous courage to accept responsibility in the face of this almost certain defeat.

I asked myself the question: How can this self-effacing man, whose health is so fragile, handle this kind of superhuman task?

Will he not be swept away in two or three months by a wave of unrest and riots by a people in despair over their growing poverty?

Today, six months later, desperate efforts to stop the inflation have reduced real wages by 40 percent. Unemployment is soaring and people are struggling to put bread on the table for their children.

But Poland is a country of miracles.

At the very height of these new hardships, the popularity and approval ratings of Prime Minister Mazowiecki have reached an unprecedented 87 percent! In their collective wisdom, the Polish people have placed their trust and their hopes for a better future in the integrity and dedication of Tadeusz Mazowiecki.

Last Thursday, I was waiting at the Arlington National Cemetery as the Prime Minister placed a wreath on the coffin of Ignacy Paderewski. The crypt was open. The coffin moved forward. Two prime ministers of Poland were meeting on American soil.

Paderewski had taken over the reins of government in Poland as it was emerging again as a nation after 123 years of being partitioned. The country was devastated by war. Poland had no boundaries, no administration, no army. It was fighting for survival on all these fronts. But against overwhelming odds it did survive and enjoyed two decades of relative peace and prosperity as a sovereign and independent nation.

Paderewski 70 years ago and Mazowiecki today are the embodiment of the same ideals and values.

Last Thursday in Arlington, I thought to myself: Paderewski would be proud of this man who succeeded him after another long era of darkness.

I felt I could hear him whisper: God help you, Tadeusz Mazowiecki. You will prevail. Poland will win.

PENNSYLVANIA SENDS WINNERS FROM HAMPTON HIGH SCHOOL TO NATIONAL FINALS OF HISTORICAL PICTORIAL MAP CONTEST

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. WALGREN. Mr. Speaker, I would like to honor three high school students from the 18th Congressional District whose "Discover Early America" map entry will be representing the State of Pennsylvania at the national finals of the "Discover Early America: The National Historical Pictorial Map Contest" scheduled for May in Washington, DC. Michelle Lamory, Sarah Schneider, and Anne Marie Pollack submitted their entry at the high school level and will compete against other high schools across the country.

After winning the congressional district level competition in February, these Hampton students went on to win at the State level round of the contest on March 30 at Dickinson College, Carlisle, PA, and received the distinguished honor of representing the Commonwealth of Pennsylvania at the national finals.

Now in its second year, the "National Historical Pictorial Map Contest" is designed to encourage students to study geography in relation to historic events in early America. As noted in a Washington Post editorial after the first year of the program, "This graceful linking of visual skills, class teamwork, and the bicentennial theme offers an easy-to-replicate approach to the otherwise large and slippery idea of putting where in context with when and what."

Using an outline map, contestants depict historical events and geographical locations—such as a quill in Pennsylvania to represent the signing of the Constitution in Philadelphia or a teapot in Massachusetts to represent the Boston Tea Party. Key elements of the competition are historical accuracy, artistic creativity, and imagination.

The students completed a special outlined map of the original 13 colonies by illustrating significant events, persons, and places that shaped the Colonial and Founding eras of our country. As stated by Mr. Paul Hoffman, teacher at Hampton High School, "Nothing helps instill an understanding of geography better than a map, especially a map the student has created."

As winners of the State level competition, Hampton High School will receive a cash award of $500, and will enter the national level of competition to compete for a trip to Washington, DC, and a prize of $5,000. Second and third place winning schools will receive $3,000 and $1,000 respectively for the purchase of educational materials. In addition, first place winners and their teachers will be honored at a reception at the Supreme Court, hosted by Chief Justice Warren E. Burger and will have their entry displayed at the National Museum of American History.

I would like to thank all of those schools and teachers who participated in this fine pro-

gram designed to encourage students to study the early development of the United States.

I salute Hampton High School for their outstanding achievement, hard work, and dedication.

FUEL EFFICIENCY DECLINES FOR THE SECOND STRAIGHT YEAR

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. STARK. Mr. Speaker, I would like to include in the RECORD a small article that appeared in the Wall Street Journal on March 20, 1990. The article discusses the fact that new car fuel efficiency has dropped for the second year in a row.

If domestic automobile manufacturers simply employed fuel economy technology currently in existence, their cars could average 39 miles per gallon by the year 2001. And, according to the Energy Conservation Coalition, if we raised the fuel economy standards from the current level of 27.5 miles per gallon to a level of 40 miles per gallon for cars and 30 miles per gallon for light trucks by the year 2000, we could save 2.4 million barrels of oil per day by the year 2005.

[From the Wall Street Journal, Mar. 20, 1990

NEW-CAR FUEL EFFICIENCY DROPS SECOND YEAR IN ROW

WASHINGTON.—New-car fuel efficiency declined for the second consecutive year, according to reports by the Environmental Protection Agency and the Transportation Department.

The EPA said an increase in heavier, more powerful cars was responsible for the drop in efficiency of domestic and imported passenger cars to 28.2 miles per gallon for 1990 model cars from 28.3 mpg the year before.

The fuel efficiency of passenger cars peaked in 1988 at 28.7 mpg after a decade of gradual increase from 19.9 mpg in 1978. The 1990 level of 28.2 mpg rolls back the fuel efficiency to the 1986 level.

Imported cars continued to be considerably less gas-thirsty than American cars, with an average of 29.9 mpg compared with 26.9 mpg for domestic cars. But the EPA pointed out that the gap is closing fast, as the efficiency of foreign makes drops precipitously. For 1989, imports had average fuel efficiency of 30.6 mpg, while American cars had an average of 27.1 mpg.

The biggest drops in efficiency from 1988 through 1990, the EPA report said, were at Isuzu, Toyota and Subaru. Fuel efficiency for each of those makers' cars dropped 9% over the two-year span.

A SALUTE TO MARIA ELENA TORAÑO

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I rise today to recognize the accomplishments of Maria Elena Toraño. Maria Elena was sworn in by Vice-President QUAYLE on March 22, 1990, as a member of the newly created Commission on Minority Business Development. The Commission was later received in the Oval Office by President Bush.

The Commission on Minority Business Development was established to explore and evaluate the effectiveness of the Federal Government's existing minority business assistance programs. It is a bipartisan Commission and is headed by Mr. Joshua I. Smith who is the owner of the ninth largest black firm in the country. The Commission plans to conduct a series of hearings and dialog sessions where minority business owners will be able to communicate their concerns regarding these programs. Upon completion of the 2-year study, the Commission will report its findings as well as its recommendations to President Bush.

Maria Elena is a member of the board of directors of the Latin American Manufacturers Association and was appointed to represent the interests of this national trade organization as well as those of Hispanic-owned businesses in general. She has long been at the forefront of advocating innovative reform programs which directly affect the Nation's minority businesses. In 1980, Maria Elena founded META, Inc., and serves as its CEO and president. META is a management consulting firm with headquarters in Miami and offices in Fort Lauderdale and Washington, DC.

During the past few months Maria Elena has been honored with several important awards. She has received the Governor's Small Business Award and a ranking in the Hispanic Business 500. More recently, Maria Elena was selected as 1 of 3 honorees to receive the Anti-Defamation League's Women of Achievement award at a luncheon to be held April 4 in Miami. The National Association of Women Business Owners and the Beacon Council, in association with SCORE and the Community Coalition for Women's History, selected Maria Elena as one of Miami's top eight outstanding women business owners. This first-time award is given to pioneering women who own successful businesses in the community and who are active in encouraging other potential female entrepreneurs to follow in their example. Maria Elena was also among the women recognized by Metro-Dade County for their outstanding achievement and contributions to the community.

Mr. Speaker, it is an honor and a pleasure to congratulate Maria Elena Toraño on her recent achievements. She will surely contribute her insight and expertise to the Commission on Minority Business Development, helping to lead the way and fulfill President Bush's mandate. Her dedication and tenacity are an inspiration to our community, and will now be a part of this national Presidential Commission.

MARILYN COHEN HAS ENRICHED THE GLENS FALLS AREA

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. SOLOMON. Mr. Speaker, many times I have risen to pay tribute to outstanding people in the 24th District of New York. In every case it has been to honor someone who has given an extraordinary amount of time to enriching the community, and to making it better than it was before.

Even by those standards, the individual I speak of today is truly special.

Marilyn Cohen of Glens Falls is retiring after 35 years of service with the United Cerebral Palsy Association of the Tri-Counties. Let me tell you a little about her.

She worked her way through Cornell University and Columbia University's physical therapy program. After graduation she helped organize a physical therapy at Glens Falls Hospital, where she later helped start a cerebral palsy clinic.

Marilyn Cohen later realized that she had a special gift for helping severely disabled children, and in 1965 she accepted the position of executive director with UCP. Since 1965, when UCP consisted of little more than small classes in area schools and churches, it has grown to the extent that Mrs. Cohen now works with a $3 million annual budget and supervises 91 employees ranging from social workers and psychologists to teachers and therapists.

In 1989 alone, UCP has served 735 people. Characteristically, Mrs. Cohen is quick to credit others for her accomplishments. But those of us familiar with her work know that she has been the guiding spirit and an inspiration to the entire community.

Her ability and compassion have earned her many friends. Those friends are honoring with a retirement party this Friday.

Mr. Speaker, let us add our own tribute today to Marilyn Cohen, a great friend, and a great American.

LEGISLATION CONCERNING THE TAXATION OF LIFE INSURANCE COMPANIES

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. DOWNEY. Mr. Speaker, today I am introducing legislation to reform the manner in which life insurance companies are taxed by the Federal Government. This legislation is intended to make the taxation of the life insurance industry more rational. It builds on reports concerning life insurance company taxation provided to the Congress by the General Accounting Office and the Department of the Treasury. Significantly, it is also designed to increase the amount of Federal income taxes paid by the life insurance industry.

First and foremost, the legislation would repeal section 809 of the Internal Revenue Code. The add-on tax of section 809 was enacted in 1984 on the assumption that the economic income of a mutual life insurance company could not be accurately measured. This special tax was in large part designed to meet certain predetermined segment shares of taxes. At the time that the add-on tax became law, it was believed that it was impossible to identify separately payments to owners, which are not normally deductible, and payments to customers, which are deductible. However, since 1984, this assumption has been widely criticized.

Mutual life insurance companies are not the mysterious corporate phenomena some would make them out to be. It is possible to measure the economic income of both stock life insurance and mutual life insurance companies. Both the Department of Treasury and the General Accounting Office reached this conclusion in separate recent reports to the Congress. Under the so-called prepayment analysis, the economic income of mutual companies is accurately measured for tax purposes if the full amount of premiums, including any capital contributions, is included in income even though policyholder payments are deducted. Thus, the imputation of income to mutual life companies under the add-on tax of section 809 is unnecessary. As the Treasury Department noted:

A tax on paid-in capital combined with a full deduction of dividends to policyholders (the situation of mutual companies without the additional tax under section 809) is equivalent in present value terms to the exclusion of capital contributions combined with no deduction for dividends to shareholders (the situation of stock companies issuing only nonparticipating policies).

By imputing income to mutual life companies in lieu of imposing a tax on economic income, these companies pay tax not on what they make, but on what other companies earn. This is absurd. Since when does the Internal Revenue Code tax people based on their neighbor's income? Life insurance companies, like other corporations, should be taxed on their own economic income.

My legislation would replace the add-on tax of section 809 with a tax on the equity returns life companies make to participating policyholders by paying policyholder dividends. Policyholders today may avoid tax on any equity returns that they receive in the form of policyholders, which would be difficult to measure, the legislation would impose a proxy tax on companies issuing dividend-paying business.

The legislation would also require life insurance companies to amortize a portion of so-called deferred acquisition costs. These expenses, primarily the commissions paid by companies to sales agents, are immediately deductible under the regular corporate income tax. Because generally accepted acounting principles reflect the view that the expenses incurred in issuing insurance policies result in the creation of an intangible aset which has an income producing value beyond the year in which it is created, amortizing acquisition costs is sound tax accounting policy. Under the 1986 Tax Reform Act, other industries were required to match the expenses of creating an asset with the income received as a result of the asset's creation. There is no reason why the life insurance industry should not be required to abide by the same principles. In addition, this provision will insure that notwithstanding the replacement of section 809, the life insurance industry will pay its fair share of taxes.

While I am confident that this legislation will increase tax revenues from the life insurance industry, I have not received a final estimate for my legislation from the Joint Committee on Taxation. A brief summary of the legislation follows:

DOWNEY LIFE INSURANCE BILL

(1) Repeal Section 809, effective January 1, 1991. True-up for 1990 not affected.

(2) Impose a proxy tax on stock life and mutual life insurance companies, including the life insurance subsidiaries of non-life insurance companies, effective January 1, 1991.

The proxy tax will operate as a surtax on the amount of equity allocable to a life company's participating business.

The following are the rates of the proxy tax:

Small life companies: 0.167 percent of the company's applicable equity base.

Mid-size life companies: 0.34 percent of the company's applicable equity base.

Large life companies: 0.667 percent of the company's applicable equity base.

(3) Amortize 50 percent of the costs of commissions paid by life insurance companies over 7 years.

Repeal amortization of acquisition expenses under alternative minimum tax.

Small life insurance companies would be permitted to expense up to $10 million in commissions.

The amortization of agent's commissions would be phased-in over four years generally.

MIMI SILBERT AND DELANCEY STREET

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. LEVINE of California. Mr. Speaker, I would like to share with my colleagues an article from the San Francisco Chronicle about my good friend Mimi Silbert and the Delancey Street Foundation. As the article explains in further detail, Delancey Street recently completed the construction of an impressive $14 million building which will serve as their headquarters and residence in the coming years.

Delancey Street is a phenomenally successful organization. Residents come into the program ready to turn their lives around, but lacking the necessary skills and self-confidence to do so. At Delancey Street, residents teach each other, and help each other to succeed.

Mimi Silbert is the driving force behind the organization, and the Embarcadero project in particular. Her persistence in seeking financing, donations of materials, and other support made the apparently impossible happen. I encourage my colleagues to read the following article, and to join me congratulating Mimi Silbert and everyone at Delancey Street in their most recent success.

MIMI SILBERT STAYS TOUGH FOR DELANCEY

(By Ruthe Stein)

Mimi Silbert, president of Delancey Street Foundation, was showing the foundation's new $14 million headquarters on the Embarcadero—soon to be home to 350 one-time drug addicts, felons, prostitutes and derelicts—to a coalition of homeless people.

Silbert shepherded the group through the Mediterranean-style complex of apartments, each with its own balcony or flower box, and shops, pointing out the movie theater, health club, Jacuzzi and heated outdoor pool.

The list of amenities made her laugh.

"Our whole pitcher is how tough life is at Delancey Street, how you have to start at the bottom," she told the group. "Now that we have this building, how are we going to make that convincing? It is difficult to explain that (residents) are still struggling—damn it."

The struggle is admittedly different now than it was in 1971 when the organization was founded by the late John Maher on the premise that nobody was too down and out to be rehabilitated. Then the struggle was for recognition.

Now Delancey Street has become almost too well known. Since "20/20" aired a segment in December on the lavish new headquarters, built almost entirely by the residents, Hollywood producers have been after Silbert, 47, to let them make a movie about this incredible success story.

Representatives for Jon Peters and Peter Guber of "Batman" fame were so delighted when Silbert finally returned their call that they sent flowers to her three secretaries. Freddie Fields, who produced "Glory," has flown to San Francisco twice to see her.

Silbert's response to being wooed by Hollywood exemplifies how unswayed she is by celebrity, as well as her know-how in making the most of every opportunity.

She has been through this before and learned that financing for a film about a rehabilitation program is hard to come by. Jane Fonda—"Janie," as Silbert calls her—had the rights to the Delancey Street story for four years. She wanted to play Silbert but was unable to get the project off the ground.

So Silbert listened to what these Hollywood hotshots had to say and then sweetly asked them whether they would consider screening some of their upcoming movies for distributors at the Delancey Street facility.

Her idea in creating a state-of-the-art screening room was to make money from renting it out. She also hopes to be able to hold onto the films for a few more days to show them at benefits for Delancey Street.

The second time Fields came courting, Silbert convinced him to talk to Delancey Street residents, many of whom are minorities, about the making of "Glory," which deals with the heroics of black soldiers during the Civil War.

SHE HOLDS IT TOGETHER

Much of the success of Delancey Street, which brings in $6 million a year through its homegrown moving company and catering, printing and wholesale marketing businesses, derives from its president's creative finagling.

Silbert, who has doctorates in criminology and psychology from the University of California at Berkeley and who studied philosophy in Paris with Jean-Paul Sartre, became involved with Delancey Street in the early '70s after falling in love with its mercurial

founder, Maher. They lived together for 10 years, and he helped raise her twin sons from an early marriage.

In the mid-'80s, Maher, a child alcoholic, began drinking again and resigned from the organization. He died of a heart attack in 1988 at 48.

Delancey Street did not fall apart when Maher did, largely because of Silbert, who was Maher's co-president for years. It was her drive that got the new headquarters built against all odds.

BUILD IT YOURSELF

Almost all the actual building was done by residents, saving an estimated $16 million. At most, 10 of the residents had done construction work before, and the most experienced among them learned what he knew pouring concrete for the handball court at San Quentin.

Silbert convinced the Bank of America to give the foundation a $10 million unsecured loan, and also talked local unions into training her people, who then train others at Delancey Street.

"The only way to do this building was to talk it into existence," she said. "I was very chesty. I would have meetings with people and they'd say things like, 'How can your bozos really do this? This takes skill.' And I would get outraged and say, 'Absolutely. We'll be able to learn.' But secretly I was in terror.

"We have a saying at Delancey Street about everything, which is to 'act as if.' We say to our people, we know you don't know how to speak, but just walk around saying 'please' and 'thank you' and if you act it long enough, you will become a person who talks that way.

"So we were all marching around this absurd site, you know, with buildings and stuff on it, saying, 'Oh, yeah, we'll put this down and then we'll drop those piles.' Every one of us was acting as if, and every one of us knew that the others were acting as if we knew what we were doing, and then eventually we convinced ourselves."

Silbert, who is 5 feet tall and weighs 95 pounds, got behind the bulldozer and pulled the last building down herself.

"Whatever the people at Delancey Street do, I try to do. These people have never seen what a boss is. When you're on the bottom, you have this distorted view that the people at the top don't do anything."

She says that the design of the headquarters—only the retail space is visible from the street, and the apartments are hidden—was inspired by places she had seen in Europe.

"They are lovely from the outside with the flowers and flower boxes, and then you look inside the courtyard, and there is a mother shrieking with frying pans and kids. That's exactly it. Inside, I'm going to be shrieking to the residents, but it will be all peaceful and beautiful to the street."

Now that her sons are away at college, her Delancey Street family gets all the attention. Silbert, who often works 15 or more hours a day, acknowledges that she doesn't have much of what other people would call a personal life.

"But I don't think of Delancey Street as a job, so to me that is a personal life. I do go to plays and to the museum and to restaurants, but when I do those things, I bring with me a few Delancey Street people. Then I have the terrific opportunity of not only seeing the play, but seeing someone see a live play to eat Chinese food for the first time in their lives.

"I don't date. I had probably the best relationship I can think of in which we shared a life and a dream. Since John died, I have been just completely consumed with getting our new complex done."

That has almost been accomplished. Delancey Street residents are putting the final touches on the building and hope to move in at the end of this month. Silbert will live there as well.

ROOM FOR GROWTH

The primary reason for the move is to allow for growth. The new complex will house 700 residents, twice the number the organization can now accommodate. More than 90 percent of the applicants have had to be turned away from the foundation's three other buildings in San Francisco, Silbert says. Two of them have been sold, and the Divisadero building will house administrative offices.

"When you see yourself saying no to almost everybody, it is horrible. It would have been the death of us, absolutely. Without the space, we couldn't have kept going, because the biggest problem we fight in Delancey Street is hopelessness—the feeling that everything is bull—and nothing is ever going to work out.

"It is our people who have to turn people away. We don't have a staff. It isn't like social workers saying no to clients. So our people say to themselves, 'Somebody gave me a chance, and I'm not giving someone else a chance,' and that leads to despair and despair is our biggest enemy."

The space will finally show Silbert to do something that has been on her agenda for years: teach people outside Delancey Street ths skills that have made the foundation so successful (it boasts a success rate of close to 90 percent). She has already started. The coalition of homeless people hopes to put San Francisco's street people to work building homes for themselves.

The new headquarters are tangible proof of Delancey Street Foundation's mission, Silbert says.

"That people who have never done anything, people who always thought they couldn't do anything, people who have been destructive their whole lives can actually build something physical and see it. We have guys that just break down crying, saying things like, 'For the rest of time these walls are going to be here, and I put them up.'

"It is just extraordinary. I mean, we can't get over it ourselves."

PATIENT SELF-DETERMINATION ACT OF 1990

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. LEVIN of Michigan. Mr. Speaker, today I am introducing legislation, along with Mr. SWIFT, Mr. MOODY, Mr. MCDERMOTT, and Mr. FAUNTROY, with the purpose of ensuring that a person's right to determine their own health care future is respected. This bill, the Patient Self-Determination Act, addresses those situations in which competent individuals specify, in advance, what kind of treatment they do or do not want—or who should make those decisions—should they become unable to do so. The bill will help individuals to establish these advance directives by educating them and their health care providers about their rights.

SELF-DETERMINATION

By any measure, health care decisions are among the most important and personal decisions people make. Medicine has recognized this, and has moved toward encouraging patients to be active participants in their health care planning. It is widely agreed that more active involvement in planning and treatment by patients facilitates good outcomes and demonstrates respect for patients' dignity and autonomy.

The principle of patient self-determination is manifested most clearly in the fundamental right of patients to accept or refuse medical treatment. Many of the most difficult and troubling decisions to refuse treatment occur at the end of life. It was not so long ago that these decisions were the exclusive province of individuals and their families. However, as health care technology has produced more ways to prolong life—and prolong the process of dying—more and more people are dying in institutions, rather than at home. In 1939, only 37 percent of the population died in institutions; now, between 80 and 85 percent do so. More technology means more choices to make. About 80 percent of the deaths in institutions involve some decisions to apply, withhold, or withdraw some medical procedure.

Last December, the case of Nancy Cruzan sparked national debate when it was argued before the Supreme Court. In that case, the family of a young accident victim in a persistent vegetable state asked to have her surgically implanted feeding tube removed. A lower court ruled that the tube could be removed. The Missouri Supreme Court overturned that ruling, saying that Nancy Cruzan's wishes were not known. Although cases like this gain much attention, they represent only a small fraction of the estimated 10,000 people in this country in states of permanent unconsciousness, who are being kept alive by technology that didn't exist a few years ago. We find it especially tragic and lamentable when such personal issues are dealt with in the impersonal arena of a courtroom.

Although technological advances provide more alternatives, technology itself gives us no guidance concerning which of the alternatives should be chosen. As one ethicist has noted, we can provide artificial hearts or kidneys, but not artificial judgment. Judgments about life-sustaining treatment, as with all treatments, should be made by those who are primarily affected by them: Patients in consultation with their families and physicians. Such decisions are a matter of personal beliefs and values.

Over the last 15 years, courts have consistently upheld the right of competent patients to refuse medical treatment, even when such a decision may mean that death comes earlier than it otherwise would have. These court decisions have been based on rights of informed consent, liberty, and privacy, which state that people should be free of unwanted and uninvited bodily invasion. These rights, in turn, are based on the ethical principle of autonomy, which holds that the choices persons make for themselves should be respected.

WHAT ARE ADVANCE DIRECTIVES?

Unfortunately, many people lose their capacity to decide about treatment. It has been increasingly accepted that these people can retain and exercise their autonomy making decisions in advance. The vast majority of State legislatures have acted to preserve the right of self-determination for those patients who lose their decisionmaking, capacity. Forty-four States have passed some form of advance directive legislation, which maintains the freedom of patients to determine their medical future. Advance directives include living wills, in which competent people make their wishes known about how they would like to be treated in the event they become incompetent. Another form is the durable power of attorney for health care, in which the patient designates a person to make such decisions, and can also specify what some of those decisions should be.

Support for advance directives is widespread. Polls show that over 80 percent of people questioned favored giving people the choice to withhold extraordinary medical treatments. Almost 80 percent of physicians in a recent survey expressed favorable attitudes toward advance directives, and fewer than 2 percent expressed negative attitudes. The President's Commission for the Study of Ethical Problems in Medicine has endorsed the use of surrogate decisionmakers, and has encouraged institutions to adopt clear and publicly available policies. The American Medical Association and the American Bar Association have endorsed the use of advance directives, as have groups including the National Council of Churches, the Catholic Health Association, the American Jewish Committee, and the American Association of Retired Persons.

Last year the Joint Economic Committee issued a report summarizing a series of hearings held on "The Future of Health Care in America." One of those hearings concerned ethical issues in health care, and testimony was obtained from several prominent practitioners and medical ethicists. The summary of these hearings reported a broad consensus among the experts that "recognizes the right of patients to accept, refuse, or withdraw from medical treatment, even if this action is likely to result in the patient's death. * * * In addition, this consensus supports the use of advance directives, that is, living wills or power of attorney on health care, by individuals to specify their wishes regarding medical treatment in the case they become unable to make health care decisions."

In spite of this high level of support, recent surveys show that only 9 to 15 percent of the population have executed advance directives. We believe this low number is due, in part, to a lack of knowledge. State laws vary in terms of what advance directives they recognize, and in the exclusion of some populations or treatments, such as artificial nutrition and hydration. Although the news media typically cover prominent cases such as those of Karen Quinlan and Nancy Cruzan, information provided about specific options granted or denied in State laws is exceedingly rare. Lack of knowledge about rights may inhibit discussion of, and advance planning for, medical care needs.

The fact is that health care providers themselves are unclear about the laws in their States. A survey in Colorado found that 23 percent of doctors are not familiar with living wills, and 74 percent are not familiar with durable powers of attorney. In a similar survey in Arkansas, only 38.4 percent of doctors reported being familiar with State advance directive laws. There is no reason to believe that these numbers would be any different in other parts of the country. One possible result of this ignorance is that physicians may make treatment decisions basd on fears of malpractice liability, rather than on sound medical judgment and discussion with patients and families. In fact, there has never been a successful malpractice case against a health service professional for withdrawing or withholding treatment from a patient who had requested it, either at the time or in advance.

WHAT THIS BILL DOES

The major provision of the Patient Self-Determination Act requires health care providers, as a condition of Medicare and Medicaid participation, to maintain policies concerning advance directives. Specifically, it requires providers to inform patients of their rights—under State law—to make decisions concerning medical care, including the right to accept or refuse medical or surgical treatment, and the right to formulate advance directives. Providers would be required to inquire whether the individual has an advance directive, to document this, along with any treatment wishes the patients may have, and to implement these directives to the extent permissible under State law. Providers would be required to provide—individually or in assocation with other providers—for educational programs for staff, patients, and the community on self-determination issues.

Other provisions of the bill would require a study of the implementation of the act, and an education campaign to inform the public of the option to execute advance directives and of a patient's right to participate and direct health care decisions.

BENEFITS OF THE BILL

This legislation is designed to remove several of the barriers to full patient self-determination that were reported by the Joint Economic Committee in their 1989 report, including "physicians' ignorance of the law and fear of medical malpractice liability; patients' lack of information on their options, especially on advance directives," and a "lack of institutional policies on ethical issues."

Perhaps the major benefit to be derived from these policies is more humane and effective medical treatment. This act will increase communication among patients, families, and health care providers. Not only will this make a difference in specific cases, but it could improve doctor-patient relationships. It is generally agreed that better doctor-patient relationships are associated with shorter hospital stays and other benefits. Empowering individuals to make decisions—and families to be actively involved in consultations—will increase the understanding of all parties concerned. Under these conditions, doctors may be less likely to overprescribe procedures for "defensive medicine" purposes.

The trend toward greater family and patient involvement, as mentioned before, is not a new one. Our culture places a high value on health planning and prevention. Establishing guidelines for decisions to be made in the event that we become incapacitated is just one part, an important part, of taking care of the full range of plans about our well-being. In this regard, the Joint Committee for the Accreditation of Health Care Organizations requires hospitals to have policies regarding patient rights and responsibilities, including "Do Not Resuscitate" policies, under which patients can choose to have cardiopulmonary resuscitative services withheld. According to a recent survey, about two-thirds of all hospitals already have policies covering advance directives, although virtually all of these policies leave it up to the patient to introduce the discussion, without being informed. This bill supports and encourages these trends.

WHAT THIS BILL DOES NOT DO

It is important to emphasize what this bill does not do. First, it does not create any new rights. The right to accept and refuse treatment, and to make these decisions in advance, has been upheld by courts across the country, even in States with no advance directive law. This bill simply empowers patients, via better information and communication, to avail themselves of options they already have. Second, this bill takes no stand on what particular decisions people should make. We recognize the intensely personal nature of these decisions; thus the importance of having the locus of the decision be the individual. Finally, this bill does not require people to execute advance directives. For a variety of reasons, patients may wish to waive their right to execute advance directives. This bill ensures that that decision itself is based on information rather then ignorance.

It is ironic that many people lose the capacity to make health care decisions just at times when the most important decisions need to be made. We want to prevent some of the cumbersome and tragic situations that can arise from this by empowering individuals at all points during their lives. The Patient Self-Determination Act continues the trend to have patients, doctors, and families communicate and develop decisions that preserve the well-being and dignity of the person, the integrity of the medical profession, and the laws of the State.

KTRH RADIO BEGINS ITS SEVENTH DECADE OF SERVICE TO HOUSTON

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. FIELDS. Mr. Speaker, 60 years ago, Houstonians lucky enough to own radio receivers were probably shocked and surprised to hear the following words: "Testing, testing. This is KTRH . . . making equipment tests. We'd appreciate hearing from anyone who might be receiving this signal."

I don't know how many Houstonians responded to that request back in March 1930, but I can say that from that during the last 60

years, radio station KTRH has grown to become an institution in Houston. Indeed, on March 25, KTRH entered its seventh decade of service to Houston and the entire gulf coast of Texas. The station has undergone tremendous change during the 60 years it has been on the air—but than again, so has Houston. And KTRH radio has been a full partner in the progress that has seen Houston grow to become the Nation's fourth largest city—a cosmopolitan city with a diverse population, and with an increasingly diversified economy affected by developments across the Nation and around the world.

Since the station aired its first official broadcast, on March 25, 1930, KTRH radio has been an integal part of Houston, TX. In good times and bad times, during boom and bust, KTRH radio has provided Houstonians with music, entertainment and news.

Today, Houstonians and men and women all along the Texas gulf coast, tune to KTRH more than any other radio station to stay abreast of news developments that affect them and their city. Perhaps most important, KTRH's all-news format has kept Houstonians and Texas gulf coast residents informed of threats to their safety during the unpredictable hurricane season and during other periods of threatening weather.

Houstonians know that be tuning their radios to 740 AM, they will be given the most accurate and most up-to-the-minute information available on weather, world and national news developments, local happenings, sports scores, business news and traffic tieups. The highly dedicated and professional news staff at KTRH serves the needs of Houstonians 24 hours a day—and we Houstonians appreciate their hard work, their dedication and their commitment to serving their community.

That appreciation is reflected in the ratings success enjoyed by KTRH. In the fall 1989 Arbitron ratings, KTRH is currently in eighth place in the seven-county Houston-Galveston market. It is the only AM radio station in the top 10, and tops the second highest-rated AM station by almost 2 to 1.

Back in the 1930's, before accurate audience listener ratings were available, KTRH was known more for its innovative programming and illustrative staff than for its high ratings.

The station's first programs included such live performers as Paul Berge's Rice Hotel Orchestra, whistler Tex Lynn and blind pianist Floyd Tilton. The station also tapped into the CBS radio network's theater production, Mr. and Mrs.

In 1934, KTRH contributed two programs to the CBS radio network, the more influential being Vox Populi, or Voice of the People, which was the Nation's first man-on-the-street interview show. The program was hosted by Harry Greer, who conducted his interviews on the corner of Texas and Main streets, just below the Rice Hotel, in which KTRH was headquartered. The corner was as far as the microphone wires would allow. Since then, KTRH has changed and grown, and its microphone wires now span the globe.

During the 1940's and 1950's—before the advent of television—KTRH provided Houstonians with a mix of music and entertainment, which included reading the Sunday newspaper funnies to young people.

By the 1960's, television had replaced radio as the source of entertainment for most Americans, and FM radio stations threatened the very existence of traditional AM radio stations. KTRH began the 1960's playing middle-of-the-road music, but switched to a news-talk format in the mid-1960's. It retained its news-talk format until the mid-1980's, when it adopted its present all-news format.

Among the personnel who have worked at KTRH over the years are Walter Cronkite, Dan Rather, Jim Nance, Velma Cato and John Breen. While other men and women who have worked, or who currently work, at the station may not be as well known, they display the same high level of professionalism and dedication to their station, to their city and to their neighbors—the men and women who live in Houston and along the Texas Gulf Coast.

Mr. Speaker, I hope you will join with me in taking this opportunity to salute and thank the employees and officials of KTRH radio on the occasion of the station's 60th anniversary of serving Houston. Houston, and even possibly KTRH itself, will face many challenges in the years ahead. But if the past is a guide, both our city and KTRH radio will overcome those challenges and grow bigger and stronger—and they will do so a full partners in progress.

A TRIBUTE TO HAMPTON HIGH SCHOOL STUDENTS

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. WALGREN. Mr. Speaker, Today I pay tribute to a very special group of high school students from the 18th Congressional District who will be representing the State of Pennsylvania at the National Competition on the Bicentennial of the Constitution and the Bill of Rights. These students from Hampton High School recently competed in the Pennsylvania State Mock Congressional Hearing Competition sponsored by the National Bicentennial Commission and Center for Civil Education in California. The team placed first overall at the State level.

I would like to acknowledge the members of the Hampton team who accepted the challenge to study and defend the Constitution as a living document: David Ablauf, Jennifer Allison, Craig Anderson, Brian Baker, Bob Bauman, Michael Best, Aimee Brick, Steve Byrne, Brett Caruso, Bryan Engle, Tara Enie, David Evans, Niema Jones, Ben Martin, Oliver Mihm, Laurie Mink, John Pasquaretle, Wayne Reed, Doug Rowland, Amy Jo Seamen, Michael Stewart, Bonnie Weimer, Jim Wisniewski, Jenna Yendell, Candace Zaiden, Justin Zang, Joerg Zeppenfeld, and Paul Ziegler.

These outstanding political science students were fortunate to have Mrs. Sally Durrant as their adviser and teacher. Mrs. Durrant has been the initiating force in bringing the National Bicentennial Competition curriculum to the Hampton students for the past 3 years. In the first year of competition, her political science class won second place at the State level. I commend Mrs. Durrant for fostering in this next generation of American citizens an understanding of the background and history of the unique system of government created by our Constitution.

Several other individuals deserve recognition for their part in the students' success: Mr. Paul Hoffman and Mr. Ron Poister, teachers at Hampton High School who served as judges for their local competition as well as the law firm of Meyer Darragh who provided their expertise; Mr. David Dunton, Mr. Dennis Fisher, Ms. Michelle Soergel, Ms. Deirdre Krymski, Mr. Scott Zawitz and Mr. Jim Bromley for their special assistance to Mrs. Durrant. In addition, Hampton High School Board and especially Dr. Charles Erdeljac, principal, for their ongoing support of this fine program.

The National Bicentennial Competition provides an excellent opportunity for students to understand the principles and ideals that underly and give meaning to the writing, ratification, and implementation of the basic documents of American democracy—the American Constitution and Bill of Rights. I am very proud of the Hampton High School students and faculty for grasping the importance of this challenge to Americans to gain a deep appreciation of the significance of our Constitution, its place in our history and in our lives today.

Best of luck at the National Competition in Washington, DC in May.

THE PRICE OF THE DEBT

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. STARK. Mr. Speaker, the General Accounting Office has just released its 1989 annual report entitled, "Facing Facts."

I thought the chapter entitled "The Price of the Debt," was particularly powerful in explaining to all Americans why during a period of relatively full employment, we have to do more to get this 800-pound gorilla of yearly deficits off our backs.

The essay follows:

THE PRICE OF THE DEBT

In 1975, interest payments on the public debt amounted to 13 percent of the general fund budget of the United States. In 1980, they totaled 17 percent. In 1989, they totaled 27 percent, or $241 billion. What this means, in other words, is that a quarter of the budget of the United States now buys nothing. It does not go to fight the war on drugs, or broaden educational opportunities for the young, or enhance the nation's security, or expand access to health care. It simply pays interest on a $3 trillion debt.

THE ENORMITY OF THE DEBT BURDEN

Just a decade and a half ago, the public debt stood at about $500 billion, one-sixth of what it is today. At the present rate of increase, it will soar by another $1 trillion—to $4 trillion—in just the next 4 years. Should we undergo a recession during this period, the loss of federal revenues will cause the debt to rise even faster.

This trend must not be allowed to continue. It drains us of resources we cannot

afford to waste. It deprives our leaders of the flexibility to meet new challenges—in their response, for instance, to the emerging events in Eastern Europe. It inhibits their ability to initiate or expand needed programs, provide resources in times of emergency, or even maintain the level of investment in government necessary to provide the public with basic services. It affects our competitive position in the world, inhibiting, for example, investment in research and development. It forces the United States to borrow more from foreign lenders, which means that interest rates must be high to attract their capital. This, in turn, hinders the flexibility of policymakers to hold the value of the dollar at a low enough level to keep imports relatively expensive, make our export goods more attractive, and reduce our record trade deficits. In addition, Treasury securities sold to finance the debt soak up trillions in private savings that otherwise might be invested in American business and industry—in plant modernization and other activities that would lead to higher productivity and economic growth.

In one way or another, our growing public debt affects all of us. The lack of flexibility it imposes on the government affects the education of our children, our response to environmental challenges, and our ability to deal with such corrosive problems as drugs in our cities and housing for the poor and homeless. It hinders the ability of American industry to compete in world markets. In short, it costs us more than dollars. It costs us opportunities.

THE FACTS ABOUT THE DEBT

Public concern with the condition of our government's finances is more widespread than it once was, but still not what it should be. Perhaps this is because, by the government's own figures, the budget crisis has already begun to come under control. The deficit, $212 billion in 1985, was officially reported at $152 billion in 1989 and is supposed to shrink to $100 billion in fiscal year 1990 (the year that began Oct. 1, 1989). Under the Gramm-Rudman-Hollings (GRH) deficit reduction program, we are supposed to be on a course toward a balanced budget by 1993. In reality, however, we are not.

The official figures conceal the fact that the imbalance on the nontrust-fund side of the budget is actually larger today than in 1985, the year in which GRH was enacted. In 1985, the nontrust-fund deficit was $266 billion. In 1989, it was $276 billion.

How have the facts about the government's finances been concealed? By several means, including deficit projections that are based on overly optimistic economic forecasts and accounting gimmicks—such as moving paydays from one fiscal year to another—that are an embarrassment to all involved. But what most distorts the deficit picture is the merging of the operations of federal trust funds with expenditures for the rest of the government.

The Social Security trust fund now operates at a surplus of $53 billion a year, soon to exceed $100 billion a year. When the Congress decided in 1983 to raise payroll taxes, its intent was to build a trust fund to finance investments to support the retirement of the baby boomers in the next century. Instead, the Social Security trust fund—along with other federal trust funds whose surpluses amount to $71 billion a year—is being spent right now to run the government. For purposes of meeting GRH deficit reduction targets, the trust fund surpluses are counted against the federal operating deficit. The bottom line of this "unified" budget shows a shrinking overall deficit. But if we exclude the trust funds, it is apparent that the government is operating at a loss at least $124 billion greater than the official figures indicate.

We are supposed to be making progress on the deficit. We are not. It is time to face this fact, and to act upon it.

A RESPONSIBILITY TO THOSE WHO FOLLOW US

The deficit problem can be solved. But the first step is to acknowledge, at long last, that without major changes in our spending and taxing policies, the problem will continue to grow. When we rely on optimistic forecasts and budgetary chicanery to create the appearance of a lower deficit, we only fool ourselves. And when we use the growing surpluses in the Social Security and other trust funds to offset the government's operating deficit, we only obscure the fact that the operating deficit is growing, too.

This year, GAO once again recommended against the use of trickery in budget making, and set forth an extensive proposal for restructuring the unified budget to reveal what's really going on—that is, to include separate subtotals for Social Security and other trust activities. Further, it would provide sections and subtotals for the government's business-type activities and investment activities.

GAO has also reiterated the need for a comprehensive, bipartisan budget strategy. Consensus and tough decisions are required if we are to straighten out our troubled finances and free ourselves to meet the enormous opportunities the times present us. Coming generations should not be deprived of these opportunities due to our negligence. They should not have to pay the price for our inability to get our financial house in order. For their sake as well as our own, we must begin to spend and tax more wisely. Doing so is our only means of returning the nation to fiscal health.

A SALUTE TO THE MIAMI LATIN KIWANIS

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I rise today to congratulate the Miami Latin Kiwanis and its officers for the wonderful labor they have been doing since they received their charter on February 6, 1975.

The Miami Latin Kiwanis have continually served as a charitable organization, especially aware of the needs of underprivileged children in Miami. In addition to scholarships for needy Latin children, the organization also provides the opportunity for needy children to attend summer camp, visit Disney World, and participate in other events sponsored by the Miami Latin Kiwanis.

The Miami Latin Kiwanis are expertly led by: President Roberto Ibarra; First Vice President Carlos M. Trueba; Second Vice President and Secretary Oscar Mormeneo; Treasurer Nestor Javech; and past President Orlando G. Martinez. Their dedication and enthusiasm is an example of their love for our community in Miami. The Miami Latin Kiwanis have worked to help our young people. Mr. Speaker, I applaud the example they have set for all the citizens of Miami and wish them much success in all their endeavors.

CHARLES A. DEVITTO WILL LEAVE LASTING LEGACY IN WARRENSBURG

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. SOLOMON. Mr. Speaker, we all have special places in our hearts for those quiet heroes in our district, men and women who rarely capture headlines but who nevertheless enrich their communities and reflect honor on their professions.

Today it is my privilege to single out one such individual in the 24th District of New York, Charles A. DeVitto of Warrensburg.

Mr. DeVitto is retiring after 32 years of service as an elementary school teacher and principal. In that capacity he has had a positive influence on countless young people.

He holds a bachelor of science degree in elementary education and a master of science degree in administration from SUNY Plattsburgh. He began his teaching career in Mineville, in 1958, and also taught in the Moriah and South Glens Falls systems before being appointed elementary principal of Warrensburg Central School in 1965.

During his years at Warrensburg, Mr. DeVitto distinguished himself as a firm disciplinarian, a farsighted planner, and a creative innovator. Even more important was his reputation with everyone who dealt with him as an honest man.

He is married to the former Constance Nolan. They have raised three daughters, Kelly, Kristen, and Kim, all three of whom are presently attending colleges in the State university system.

Mr. Speaker, my admiration for Mr. DeVitto also is based on his contribution to the Warrensburg Kiwanis. As a fellow Kiwanian, I reserve special respect for professional people who also give of themselves to enhance the life of the entire community. Mr. DeVitto is just such a civic-minded man, and the entire community of Warrensburg is proud of him.

He will be honored at a special June 2 dinner. Mr. Speaker, I ask you and all Members to join me and his many other friends in saluting him today with a heartfelt "well done."

HONORING THE ASSOCIATION OF JEWISH PROFESSIONALS

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. ENGEL. Mr. Speaker, this month, an important new organization in New York City, the Association of Jewish Professionals, is celebrating its first year of activity. In a short period of time, the AJP has established itself as a major force in the New York metropolitan area. By bringing together community leaders

from many professions, the AJP has been able to create innovative programs and address a wide range of important issues.

One of the first goals the AJP met was to establish a scholarship fund to help needy students. Many of the founding members of the AJP are concerned educators who have recognized the need to improve our educational system. They have been joined by public servants, lawyers, judges, and other businessmen who also seek to improve education and other professional areas.

The AJP has also planned conferences, seminars, and workshops designed to counsel, professionals and assist in career advancement. Its members have also reached out to other groups that share their goals and ethics. The result is a network of community organizations dedicated to improving the lives of New Yorkers.

I wish to congratulate the founding members of the Association of Jewish Professionals on all the accomplishments they have made in just 1 year's time. I know that they will continue their fine work in the years ahead.

DELTA DAYS IN THE NATION'S CAPITAL

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. FAUNTROY. Mr. Speaker, Delta Sigma Theta Sorority, Inc., which was incorporated in 1930, has demonstrated a vital concern for social welfare, academic excellence, and cultural enrichment through its 5-point program which includes educational development, economic development, international awareness and involvement, physical and mental health, and political awareness and involvement; and

There are over 175,000 members and more than 825 chapters of Delta Sigma Theta Sorority, Inc., in the United States, West Germany, Korea, and the Caribbean; and

Delta Sigma Theta Sorority, Inc., is sponsoring Delta Days in the Nation's Capital in Washington, DC, on April 3–4, 1990. Delta Days in the Nation's Capital is designed to emphasize the sorority's responsibility to communicate with, and to organize its members and the public in an effort to impact congressional legislation in preparation for issue-related challenges that lie ahead. As part of its national social agenda, the sorority frequently implements programs which educate and mobilize members to form networks toward affecting national, State, and local issues and policies.

I, therefore, urge all Members to join me in commending Delta Sigma Theta Sorority, Inc., for its 77 years of public service and political action, and convey to the sorority best wishes for continued success in future endeavors.

SIERRA CLUB CALLS FOR U.S. RETURN TO UNESCO

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. TORRES. Mr. Speaker, I rise today to inform my colleagues that the Sierra Club has endorsed a U.S. return to UNESCO, the United Nations Educational, Scientific, and Cultural Organization.

The following letter to President Bush from the director of the Sierra Club outlines why U.S. membership in UNESCO is important to organizations in this country and around the world who are working on global environmental problems:

SIERRA CLUB,
San Francisco, CA, March 15, 1990.

Hon. GEORGE BUSH,
President of the United States, the White House, 1600 Pennsylvania Avenue NW., Washington, DC.

DEAR MR. PRESIDENT: The Sierra Club is deeply concerned about United States leadership and cooperation in protection of Earth's environment worldwide. It is essential that the U.S. be an active participant in all global forums relevant to the environment.

For that reason, the Sierra Club believes that the United States must now rejoin UNESCO, the United Nations Educational, Scientific and Cultural Organization. UNESCO's science program had spearheaded international cooperation in environmental science over 30 years ago, before the term was even in use, with its research programs in oceanographic and water resources. It sponsored creation of the World Conservation Union. Its Man and the Biosphere program, now two decades old, is specifically dedicated to ecological research and management and to the preservation of biological diversity.

Today, one of our most urgent problems is building an environmental awareness among peoples everywhere, including in the economically hard-pressed developing countries. Because of its unique access to education ministries, especially in developing countries, UNESCO's new mandate for introducing environmental education into school curricula around the world is an especially pressing priority. Similarly, UNESCO is now spearheading inquiries by international social science into the social and human dimensions of global change, including the environmental sustainability of development.

The United States withdrew from UNESCO in 1984 because of political controversies and management problems. These issues seem largely resolved under the agency's new leadership. Global environmental problems loom so large that it is inconceivable that the United States should any longer stay outside a major U.N. agency that has significant environmental responsibilities.

We urge you to move quickly to bring the United States back into full membership.

Sincerely,

MICHELE PERRAULT,
Director and International Vice President.

ONE OF THE BEST WORKING NEWSPAPERMEN

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. EDWARDS of California. Mr. Speaker, on March 17, Walter T. Ridder passed away at his home in McLean, VA, after a long illness. Walter's death was received with great sadness by me and my family and by his many friends and admirers in Congress.

The Miami Herald on March 18 had this to say about the loss of Walter-Ridder:

Known for his charm, wit and kindness, the lean, aristocratic Ridder was a third-generation newspaperman, who once proposed his own epitaph: "His heart was in the newsroom, not in the counting-house."

His first paying job was as an $18-a-week reporter for The Hartford Times; his last was as a member of the board of directors of Knight-Ridder, from which he retired in 1989. Knight-Ridder is the parent company of The Miami Herald.

In between he worked at Ridder newspapers in Duluth, Minn., St. Paul, Minn., and Gary, Ind.; served as a war correspondent in Europe during World War II; ran the information service for the Marshall Plan in Paris; and for many years headed the Ridder papers' Washington bureau.

He was decorated with the War Department's Award of Merit, St. Olav's Medal from King Haakon of Norway and the West German Order of Merit for his services to that country after the war.

Ridder was born on April 1, 1917, in New York City, the son of Victor Frank Ridder and his wife, Marie. His grandfather, Hermann Ridder, came to the United States from Germany shortly before the end of the last century and bought an interest in a German language paper in New York, The Staats-Zeitung.

That was the root of the Ridder publishing empire, which grew to include 19 newspapers, radio and television stations, mostly in the Midwest and West, at the time of the merger with Knight Newspapers in 1974.

"Walker-Ridder, was one of the principal architects of Knight-Ridder, an outstanding correspondent and editor, Washington bureau chief, publisher and director," said James K. Batten, chairman and chief executive officer of Knight-Ridder.

"All of us who knew him and shared the joys of newspapering with him are saddened by his passing. He was much beloved by his friends on the Knight-Ridder board of directors and all around our company."

Ridder received his bachelor's degree in American history and literature from Harvard University in 1939. After short stints at The Trenton Times, without pay, and The Hartfold Times, he went to work for his family's pattern Duluth.

Starting in the circulation department, he soon asked to be transferred to the editorial side. He later wrote that while "the other departments of a newspaper are indisputably necessary, the heart and soul of journalism rested in the reporters, copy desk men, rewrite men and editors."

In 1941, he came to Washington as correspondent for The St. Paul Pioneer Press-Dispatch, another Ridder paper. He joined the U.S. Army in 1942 and rose to the rank

of technical sergeant before being discharged in 1943 because of poor hearing.

He then became a war correspondent in the European theater representing the St. Paul and Duluth newspapers as well as the North American Newspaper Alliance. He covered the liberation of the Nazi death camp at Dachau in 1945, using his fluent German to translate the gruesome scene for an American general. He also covered the liberation of Norway, Sweden and Finland.

Ridder returned to the Ridder Washington bureau after the war. But in 1947, he was asked to head the information department of the Marshall Plan during the rebuilding of Europe. He was the originator of a radio station that beamed programs into East Germany, an early predecessor of Radio Free Europe. He also developed a text-book on the Marshall plan, along with Ambassador John McCloy, that was used in the West German school system.

Ridder returned to Washington in 1952, where he remained except for six years as publisher of The Gary (Ind.) Post-Tribune from 1967 to 1972.

I was particularly touched in reading the letter to the Washington Post on March 20, written by veteran newspaperman and TV commentator Tom Braden in his tribute to Walter Ridder. I reprint it below:

ONE OF THE BEST WORKING NEWSPAPERMEN

In a lifetime that ended last Saturday, Walter Ridder successfully defined one of the shibboleths of the reporter's trade. The shibboleth is that he who owns a newspaper or is a member of a family that owns newspapers is not really a working newspaperman, doesn't belong on the bus or is on the bus only by virtue of his pocketbook.

I was set straight about the shibboleth on a day in 1964. An outlander from California, I had joined Stewart. Alsop and Rowland Evans for lunch, and they were discussing Hubert Humphrey's vice presidential hopes. Midway through the conversation, Alsop produced a pile of clippings from the St. Paul Pioneer Dispatch. Each had to do with Humphrey, and each bore the byline of that paper's Washington bureau chief, Walter T. Ridder.

Before Alsop could pass the clippings on to Evans and begin a recitation of what he had learned from them, I came out with the shibboleth. After all, Walter Ridder belonged to a family of publishers. What would he know that was news?

At which point both Evans and Alsop jumped all over me. "Look, Braden, every working newspaperman in this town is reading the St. Paul Pioneer Dispatch because Walter Ridder is covering Humphrey and covering Humphrey better than anybody else. So shut up and listen."

So much for shibboleths. Walter Ridder fought this particular shibboleth all of his working life. Dutifully he took his turn as a publisher—the Gary, Ind., Post Tribune. But it was after relinquishing this job that he made the remark that must have caused angry snorts from cousins and uncles in every office of the publisher at every Ridder newspaper across the country: "My heart," he said, "was always in the newsroom, not the countinghouse."

For the last several years, Walter Ridder was almost deaf, almost blind, almost wholly crippled, obviously trying courageously. Which is why it is important to point out for the benefit of outlanders who have come along since that time not so long ago, he was known by his contemporaries as "one of the best working newspapermen in this town."

On March 23, a memorial service was held for Walter. Following is an accounting of that service as reported by the Washington Post.

RIDDER EULOGIZED

(By Martha Sherrill)

His family, old-guard friends and newspaper cronies were shuffled together at the Sheraton-Carlton Hotel yesterday afternoon to remember Walter Ridder, the Washington newsman who died last weekend at 72.

The memorial service began somberly—hymns sung by Wendy Morgan—and ended with all 400 gathered joining in "The Battle Hymn of the Republic." There was a nostalgic performance by members of the Gridiron Club, who sang bits Ridder had written for club skits as far back as 1962. There were reminiscences, mostly funny anecdotes that gave a sense of Ridder, beloved for his enthusiasm for newspapering, and for his wit and good nature despite illnesses that for many years had disabled him.

"I would describe him as a *blithe spirit,*" said eulogist Clark Clifford, "the greatest blithe spirit—or perhaps more correctly, the *blithest blithe spirit.*" For 21 years, Clifford and Ridder served on the boards of Ridder News, and then Knight-Ridder News. "I was excited and challenged by the reach of his mind. It was always searching and expanding. His horizons were broadening at all times. And I always looked forward, with great anticipation, to our visits."

Robert Ridder delivered several sweet stories about "the best older brother anybody's ever had," and their childhoods—charmed by nurses, tennis lessons, boarding schools and ocean liner trips to Europe (when their parents took a separate liner).

And their camaraderie. "Once when I was with Walter we were driving in the automobile on a country road, and a policeman stopped the car. There was nothing really unusual about that except that Walter was 11 and I was 9."

Rick Ridder read a letter written by his father that showed his wry wit. Daughter Cary Ridder Alberswerth read the poem "Sea Fever" by John Masefield: "I must go down to the sea again, to the lonely sea and sky . . ." as a tribute to her father's boating.

Afterward there was a reception in a sundrenched tent abutting the hotel. Ridder's widow, Marie, greeted everyone—the former columnists and columnists Rowland Evans, Robert Novak, David Broder, Tom Braden, Clayton Fritchey, Philip Geyelin, Hodding Carter; Washington Post Co. Chairman Katharine Graham; Washington socialites Evangeline Bruce and Jayne Ikard; United Press International White House correspondent Helen Thomas. Former senator Eugene McCarthy came, and former ambassador from Sweden Count Wilhelm Wachtmeister with Countess Ulla.

Walter Ridder is survived by his wife, Marie, whom he married in May 1948; four children: Cary—Mrs. David Alberswerth of Washington, DC; Stephanie—Mrs. John Beardsely of Bethesda, MD.; Victor F. "Rick" Ridder of Denver, CO; and Pamela Ridder of New York City; and seven grandchildren.

There are three sisters, Joan—Mrs. David Challinor of Washington, DC; Gretchen—Mrs. Peter Nicholas of New York City; Esther Ridder of New York City; and a brother, Robert Ridder of St. Paul.

Mr. Speaker, I know that many of my colleagues were distressed to learn of Walter's death. My wife, Edith Wilkie, and I were particularly saddened because we knew personally Walter and his dear wife, Marie, and we had spent in the past many happy hours with them and their children.

WHY I AM PROUD OF AMERICA

HON. CRAIG THOMAS

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. THOMAS of Wyoming. Mr. Speaker, I would like to take this opportunity to congratulate a fine young Wyomingite, Sara Love Lauer.

Ms. Lauer is a 17-year-old senior at Powell High School, interested in pursuing a career in law. This young woman participated in the Voice of Democracy broadcast script writing contest. Her script "Why I am Proud of America" which discussed the freedom of choice, won first place in the Wyoming statewide competition.

The Voice of Democracy scholarship program started 43 years ago with the endorsement of U.S. Office of Education and the National Association of Broadcasters, Electronic Industries Association, and State Association of Broadcasters. In its fifth year the Veterans of Foreign Wars assumed sole sponsorship responsibility.

This past year more than 137,000 students participated from over 8,000 schools. Over 4,800 VFW posts and 4,000 ladies auxiliaries sponsored the program and over 2,300 radio and TV stations cooperated.

It is obvious that the participation in this program was extremely high and the competition for the scholarships rigorous. It is therefore an honor to have a student from Wyoming receive such an award. The people of Wyoming are very proud of Sarah and her academic accomplishments.

A copy of Sarah's script is attached, and I commend it to my colleagues.

WHY I AM PROUD OF AMERICA

(By Sara Love Lauer)

When I was a little girl I had already decided what I was going to be when I grew up. I was going to be a famous actress, the kind that everyone followed around desperately seeking my autograph. When I got a little older, I knew that that dream was just immature and shallow; I was going to be a doctor. I would find the cure to cancer and serve all mankind, that was my destiny. A few years later I realized I hated science and could never become a doctor. My dream was clear. I was going to represent America in basketball, in the Olympics. I practiced every day at noon and evening after school, and I was good too, but soon I noticed that everyone was getting taller and I wasn't. I then reluctantly admitted that I was too short to play basketball, but it was OK. I know now where my true talents were. I loved to argue, and I rarely lost. I joined debate my sophomore year in high school and then decided once and for all I would go to law school and become a lawyer.

Now I'm a senior in high school, and I have my whole life ahead of me to become

anything I want. I live in America. If I work hard, I can accomplish anything. It's my choice. I can choose to be rich or to be poor. I can choose my future. That's what America is all about. That's why I'm proud of America. The freedom of choice.

Choice is a simple word with so much meaning. It is the essential component of America.

As a teenager I see the freedom of choice being tested everyday. In my senior class there are three pregnant girls. Each of them are faced with similar situations, but each will choose a different solution. One might get married, one might put her baby up for adoption, and one might have the baby alone and quit school.

As seniors we are all being asked to choose a college. All of us are being faced with the same dilemma, yet all of our decisions will be radically different. Some might go to Harvard, some might go to the junior college in town, and some might not go at all.

Many of us are eighteen or will be in a matter of months. We will have the opportunity to vote in the next election. Some of us will register, learn about the candidates and vote accordingly, many will register and not vote, and many will not register.

Many of my classmates as young adults are exploring their religion and new religions. Many love and admire the religion of their parents and will never change. Many will look at new religions and convert, and some will simply not be religious.

In my school and schools across America all teenagers are being faced with the choice about drugs. Thousands and thousands of teens will try drugs and become addicted. Thousands will try them once and never touch them again, and thousands will never try drugs.

As an American I look at the choices our country has had to make. Settlers made the difficult choice to come to America. Scared of the unknown, many left their families behind hoping for a better life in a strange land.

Our forefathers made the choice to fight for America's independence. Battling against many odds and losing many men. America won. The Constitution was formed along with the choice of a democratic government. Our nation was dividing; the North chose to fight against brothers and friends in the South, wanting desperately to reunite America.

The blacks were treated badly, finally we chose to free them from their slavery, yet for many more years we still treated them cruel and inhumane. Women were slowly gaining more rights and respect. World War II was chosen to be fought with pride. Each vet was welcomed home with parades after conquering the evil Hitler. A choice was made to send a man to the Moon, helping us to make great progress in space, and start an era of technology.

Each individual person in America, and America as a country is constantly faced with choices. Many times we make the right decisions, and all too often we make the wrong decisions, but good or bad we take the consequences. We rejoice in our victories and learn from our defeats. We as humans have been given the ability to reason and to understand, but our country has made it possible to use those abilities to their fullest. That's why I'm proud of America.

HOPE COLLEGE WOMEN'S BASKETBALL TEAM WINS NCAA DIVISION III CHAMPIONSHIP

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. VANDER JAGT. Mr. Speaker, It is with admiration and heartfelt congratulations that I rise today to pay tribute to the Hope College Women's Basketball Team, who on March 17, won the NCAA Division III Women's Basketball Championship. The Hope College "Flying Dutch," headed by Sue Wise, the National Division III Basketball Coach of the Year, won in the closing seconds of the championship game on clutch free throw shooting. The final score against St. John Fisher College of Rochester, NY, was 65–63.

I know that their fellow students and indeed many young people throughout the country will benefit from the marvelous example the members of this outstanding team have provided us all. This is a team who gave its all through strength, determination, and dedication. I am proud to be an alumnus of Hope College and a big fan of the Flying Dutch. This team's accomplishments serve as a model I know we all hope others follow both on and off the court.

I am pleased to bring the Flying Dutch to the attention of my colleagues, whom I know will join me in saluting them for a job exceedingly well done. I am sure you will also enjoy the following article that appeared in the Holland Sentinel, chronicling the victory of the Flying Dutch.

HOPE: NO. 1 IN DIV. III

(By Leo Martonosi)

The impossible dream. But 10 years later.

Hope College women's basketball team's 65–63 NCAA Division III victory over St. John Fisher of New York Saturday night in the Civic Center compared to USA's stunning hockey gold medal of 1980.

The Flying Dutch (24–2) rallied from a 20-point second half deficit to stun the No. 1 ranked Lady Cardinals (31–2) to win the school's first national team championship.

Two free throws with 0:00 reading on the clock by Dina Disney enabled Hope to pull out the victory.

"I do believe in miracles and we had no doubt that Dina would make the free throws," said a drained Hope Coach Sue Wise. "Dina is such a pressure person (sank her last 37 free throws over a 16-game period). There was never a doubt on her face that she wouldn't make them."

"We said a little prayer after they (St. John Fisher) called a time out trying to psych Dina," Wise continued.

Wise became the second straight NCAA coach to take a team to a national title in her first year as coach. Last year it was Michigan's Steve Fisher who accomplished the same feat.

"I'm truly thankful and have been blessed by God," said Wise.

What was Disney, who was fouled thinking about when she stepped to the free throw line after the officials ruled the time clock buzzer had not gone off?

"I kept saying a Bible verse Philippians 4:13 ("I can do all things in Him who strengthens me.") said Disney.

Phillip Kahler, the coach of the Lady Cardinals, showed a lot of class in the loss, which was more difficult for his two assistant coaches and his players to accept.

"Just being here is great," said Kahler, who compiled a 5–1 record in his days as the coach of the Aquinas College men's teams against Coach Russ DeVette and his Hope College Flying Dutchmen.

"This was a great game between two great teams," Kahler said. "Someone had to win and someone had to lose.

"We aren't going to cry over spilled milk. We didn't lose the game with the controversial foul at the end," insisted Kahler. "We lost it four minutes earlier. Hope just played better defense and nobody has put that kind of pressure (full-court zone press) on us all year like they did."

Disney, who tied the score with an NBA 3-point bomb with 13 seconds left, finished with a team-high 20 counters. Holly VandenBerg and Michele Sterk followed with 14 and 13 points in that order for the NCAA champion Flying Dutch.

Susan Heidt, who nailed 15 straight free throws the night before against Heidelberg, made 9 of 11 this time around plus 8 field goals for 25 points for the Lady Cardinals.

Chipping in with 14 and 10 markers for St. John Fisher were Michelle Skovrinski and Michelle Winship.

The never-say-die attitude of the Flying Dutch paid off, according to VandenBerg, who returned from a journey to Bloomington Indiana, five hours earlier.

"This team never quits," said VandenBerg, who drove to Bloomington, Ind., for a successful grad school interview at Indiana University after Friday night's semifinal win over Centre, Ky.

Hope was twice down by 20 points. The first at 52-32 with 12:13 to play and the second at 56-36 three minutes later. But with the nearly capacity crowd which was made up primarily of Hope people yelling their lungs out, the Flying Dutch drew closer. Hope was still down 60–47 with 4:13 remaining when the Flying Dutch outscored St. John Fisher 18–3 the rest of the contest.

"Incredible," said Disney of the comeback. "Just incredible."

Wise said it wasn't one thing that turned the game around but three.

"We had nothing to lose when we put on the press," Wise noted. "But I believe they had three straight turnovers with the last one being picked off in the corner that really seemed to inspire us."

St. John Fisher still had a chance to win after Disney's 3 point bomb, but one of the Lady Cardinals committed an offensive foul with five seconds remaining. After Hope's inbounds pass was intercepted by Heidt, Lissa Nienhuis knocked the ball loose and Dina Disney was fouled trying to get her hands on the loose ball just before the horn sounded.

The officials gathered at midcourt with the official timer and came away with their hands pointing one-and-one.

"It was the officials who ruled time had not gone off and not the timer." said Tom Renner, director of college relations for Hope.

Also helping Hope to the national title beside Disney, VandenBerg and Sterk were Nienhuis (8 points, and game-high 9 assists), Heidi Carigon (4 points), Robin Schout (2 points), Anna Marie Postmus (3 rebounds, 1 block) and Melinda Maurits (4 points, 1 block, 1 rebound).

"Schout's second half basket really gave us a spark." insisted Wise.

The two-pointer by Schout ended a 20-point Hope dry spell Her basket cut Fisher's lead to 52-34.

Hope scored many first half baskets with the crowd helping them by counting down the shot clock 6, 5, 4, 3, 2, 1.

"I can't say enough about our fans," said Wise. "They're the best and they made a difference again tonight."

The first half was action-packed with neither team calling a time out or putting in a substitute for the first 10:54. And that only came about when Wise inserted Maurits for Postmus, who was charged with her second foul.

St. John Fisher managed to hold a 30-28 halftime margin, which turned out to be the point difference but vise versa for the game.

Two Hope players—Disney and VandenBerg—were named to the all-tournament first-team.

Joining Disney and VandenBerg on the all-tourney team from St. John Fisher were Heidt and Roxanne Chupp. Also named to the Squad was Heidelberg's Dortha Ford.

GREEK INDEPENDENCE DAY

SPEECH OF

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 21, 1990

Mr. WALGREN. Mr. Speaker, the United States has a rich ethnic diversity and every nationality contributes to the unity of our country. Through the recognition of significant contributions of each individual group, our Nation gains greater strength and harmony. I am pleased to cosponsor House Joint Resolution 473, a resolution designating March 25, 1990 as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy."

Our Founding Fathers based our system of government on the principles of democracy defined in Ancient Greece. In an address made in Greece over 2,000 years ago, Pericles stated:

Our Constitution is called a democracy because power is in the hands not of a minority but of the whole people. When it is a question of settling private disputes, everyone is equal before the law; when it is a question of putting one person before another in positions of public responsibility, what counts is not membership of a particular class, but the actual ability which the man possesses.

These basic principles define American society today.

As the Greeks struggled for independence from the Ottoman Empire during the early 1800's, Greek citizens looked to the United States as an example of the freedom for which they fought. Greek intellectuals translated the Declaration of Independence of the United States and used it as the basis for their own declaration. The United States became the role model for a new democracy emerging in Greece just as it serves as a role model for the emerging democracies in Eastern Europe today.

It is with pleasure that I join with my colleagues in honoring the spirit of democracy born in Ancient Greece and kept alive in the continued struggle for freedom throughout the world.

CANADA'S SENSIBLE APPROACH

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. STARK. Mr. Speaker, the American health care insurance system is in a free fall, with employers, unions, and insurance companies daily finding new reasons not to insure people or honor the commitments made in the past.

Changes clearly are coming. We have a lot we could learn from our neighbor to the north. The following is an excellent op ed from the Los Angeles Times of March 26, 1990:

[From the Los Angeles Times, Mar. 26, 1990]

CANADA'S SENSIBLE APPROACH

(By Ernest Conine)

Forty-eight percent of the American people fear that they could not afford good medical care if they became critically ill, according to one poll. Nine out of 10 believe that the health-care system needs fundamental change. Two-thirds tend to favor a national health-insurance system of the sort enjoyed by Canadians.

The politicians, however, are not impressed. As a key California congressman observed, "It's hopeless to get a comprehensive [health] plan passed in the United States, politics being what it is."

Although Congress uses the budget squeeze to justify inaction, the problem basically isn't money. It's the failure of the American health-care system to give us our money's worth.

Americans spend more for medical care than any people on Earth—more than $600 billion a year, which figures out to $2,500 per person, or more than 11% of the gross national product. Relative to population, we spend 40% more than the Canadians, 61% more than the Swedes, with their supposedly bloated welfare state, 85% more than the French and 130% more than the Japanese.

Yet, whereas these countries provide medical care for all their citizens, 37 million Americans have no health insurance at all. And our enormous outlay notwithstanding, life expectancy in this country is lower than in many other modern societies. In infant mortality we rank 22nd in the world, behind Canada, Japan, Western Europe and even some Third World countries.

Meanwhile, medical costs—and health-insurance premiums for both employers and employees—continue to soar.

The existing system, with its emphasis on health insurance provided through employers, supplemented by government-supported programs for the poor, has unfortunate side effects.

Welfare recipients have a disincentive to seek work because they will lose Medicaid coverage.

Job mobility is discouraged because employers are reluctant to take on new workers with ailments or disabilities that would trigger increases in company-paid insurance premiums.

Wages are depressed as employers try to offset rising health-insurance premiums.

Employers' enormous medical insurance costs act as a tax on exports, reducing the ability of U.S. companies to compete with producers in countries where health care is financed through national insurance.

It is little wonder that the Canadian system is attracking interest. That system isn't perfect. But Canadians spend much less than we do on medical care, live longer and score better in such indicators as infant mortality and heart-disease fatalities.

The Canadian plan guarantees comprehensive medical and hospital coverage to everybody in the country. People choose their own doctors. There are no deductibles and no extra charges beyond the prescribed rates and fees, which are set in negotiations between the medical profession and provincial governments.

Canadian doctors might prefer the free-wheeling U.S. system. But their incomes compare well with other professionals in Canada—and there has been no big flight of physicians to the United States.

U.S. politicans, however, recoil from national health insurance because they fear it would cost more—and are convinced that the voters share President Bush's well-known aversion to new taxes. To the extent that they address the issue at all, they incline toward legislation requiring all employers either to provide adequate medical insurance or pay taxes for a government safety-net program.

Even this approach lacks sufficient support, which is just as well. It would penalize U.S. global competitiveness even more than now and, in the long run, would take more money out of our pockets than would national health insurance as companies passed on their higher costs to consumers.

The Canadian approach makes much more sense—especially if combined with reform of U.S. liability laws, which force doctors to pay big malpractice insurance premiums and encourage them to order unnecessary tests.

With a universal system, we would no longer need separate taxpayer-supported systems for the poor, the elderly, veterans and the like, nor would there be much need for private health insurance.

Savings in administrative costs would help, too. About 8.5% of health spending in this country goes for administration, compared with only 2.5% in Canada. The difference lies in the enormous paper work generated by hundreds, even thousands of different medical plans here, compared with Canada's single basic system.

The biggest obstacle to decent medical care in America is not the cost in dollars, but the resistance of entrenched interests in the medical and insurance industries to fundamental change in a system that costs too much and delivers too little.

IN HONOR OF OCCUPATIONAL THERAPY RECOGNITION MONTH

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Ms. LEHTINEN. Mr. Speaker, I rise today to bring your attention to Occupational Therapy Recognition Month which is being celebrated in April. In Miami, a group of occupational therapists are gathering this week to pay tribute to the thousands of dedicated professionals who help bring hope and independence to

people of all ages who need help with their disabilities.

Millions of people every year are temporarily or permanently disabled by birth defects, illness or injury. Skilled help by occupational therapists allows those who need help to live independent, productive and satisfying lives. Occupational therapists help them become less dependent on others for their daily needs. They help people avoid costly institutional care and enable them to learn job skills and seek productive more lives.

On Thursday, April 5, occupational therapists in Miami will gather at a reception at Palmetto Medical Plaza to honor their colleagues and help raise awareness about the contributions by their profession. I want to make special mention of Teresita Rasco, an occupational therapist who is one of the organizers of the Miami Occupational Therapy Forum, Elizabeth Brinegar and Joy Verrusio of Bon Secours Hospital, Carmen R. Cohen, vice president of marketing and program development at West Gables Rehabilitation Hospital, who will be guest speaker, and Mike Nolan, also of West Gables Rehabilitation Hospital. I ask my colleagues in Congress to join me in recognizing the valuable work and compassion by these dedicated occupational therapists.

AL BROWN: A MODEL FOR ALL PUBLIC SERVANTS

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. SOLOMON. Mr. Speaker, please join me in paying tribute to Al Brown.

Al Brown has retired after more than 29 years on the Malta Town Broad in the 24th New York District. When people in our district think of public service, they think of Al Brown. When I say I am going to miss him, I know I speak for everyone in the town of Malta.

Mr. Speaker, like many of the Members of this body, I got my start in politics on the local level. Before concerning myself with Federal deficits and strategic arms talks, I concerned myself with school board levies, potholes, and police cruisers. And that is the way it should be. That's the only level of government many Americans experience close-up, the level that affects their lives the most on a daily basis.

And that is where people like Al Brown excel, in those local governments that are most responsive to the needs of the people. I do not need to tell anyone on this floor, Mr. Speaker, that to stay in office—any office—for over 29 years you have to be doing something right. And Al Brown has been doing right by the people of Malta since his first day in office.

Mr. Speaker, there will be a testimonial retirement dinner for Al Brown on Monday, April 16. Let us add our own testimonial today to Al Brown, a great public servant and a great American.

THE 10TH ANNIVERSARY OF RAIN HOME ATTENDANT SERVICES, INC.

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. ENGEL. Mr. Speaker, 10 years ago this June, a leading Bronx community group, Regional Aid for Interim Need Inc. [RAIN] began a service that has become a vital part of the lives of hundreds of Bronx residents—RAIN Home Attendant Services.

Under the guidance of director Murray Kaufman and RAIN's founder Bea Castiglia, the home attendant service has allowed the elderly and disabled to avoid being sent to nursing or group homes prematurely. Certified and trained home attendants help meet their clients' daily needs and enable them to continue living in their homes with pride and dignity. For 10 years, the service has provided high quality care to more than 1,000 clients in the northeast and northwest Bronx.

Every nurse, case coordinator and social workers deserves congratulations on the 10th anniversary of RAIN Home Attendant Services. The pride and dedication they have exhibited has made their program a model for quality home care services. Their success is proof that compassionate care can be provided to the elderly and disabled in their own homes. I believe health care providers throughout the United States can learn much from the many services delivered by RAIN.

I extend thanks and congratulations to Bea Castiglia and Murray Kaufman for the leadership they have exhibited, and on behalf of my constituents I wish them many, many more years of success.

PRIME MINISTER COMPTON URGES UNITED STATES NOT TO SIDELINE THE CARIBBEAN

HON. GEO. W. CROCKETT, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. CROCKETT. Mr. Speaker, in my capacity as chairman of the Subcommittee on Western Hemisphere Affairs I recently led a delegation to Saint Lucia and the Dominican Republic for the purpose of evaluating the success of United States aid programs in the Caribbean.

What we found was that despite the best intentions of the Caribbean Basin Initiative [CBI], the region has suffered from benign neglect. We found that in spite of U.S. calls to countries around the globe to open their markets to free tade, our own markets have remained almost impenetrable. In fact, instead of increasing, United States aid and trade with the Caribbean have declined dramatically since the initiation of the CBI.

In his opening address to the consultation in Saint Lucia, the Prime Minister of Saint Lucia, the Right Honorable John Compton, spoke eloquently of these very issues. While freedom and democracy are breaking out all over the world, he called on the United States not to forget those in this hemisphere that have remained democratic throughout, saying, "Our friends in the U.S. Congress and in the administration, should ensure that notwithstanding the dramatic events in Eastern Europe and Central America, we in this region, while not being 'headlined,' should not be 'sidelined' to languish in a state of underdevelopment."

The entire text of the Prime Minister's eloquent address follows:

ADDRESS BY RT. HON. J.G.M. COMPTON, PRIME MINISTER, SAINT LUCIA

Mr. Chairman, Honourable Ministers and Officials from other Caribbean countries, Ladies and Gentlemen: Let me in your name and on your behalf welcome to Saint Lucia Mr. George Crockett of the U.S. House of Representatives, a tried and tested friend of the Caribbean and his team of officials and advisers.

Perhaps I will take this opportunity to thank Representative Crockett for his determined effort in keeping the interest of the Caribbean area on the U.S. national agenda at a time when events of such a world shaking nature are taking place outside of the Caribbean, and in particular to thank him for his efforts in reforming and improving upon the Caribbean Basin Recovery Act now before Congress and known as C.B.I. II, the economic charter under which the relationship between the U.S.A. and the Caribbean is conducted.

This meeting is but one of a series of discussion sessions being conducted under the guidance of Rep. Crockett.

Since the last session in Barbados, the entire world has watched unfolding, the dramatic events of Eastern Europe and Central America. The shock waves of the crash of the Berlin Wall has sent tremors felt in the remotest parts of the world. This monstrosity which was so often bathed in the blood of freedom seekers, was the scene of champagne parties; "Perestroika" and "Gasnost" have acquired a momentum of their own, and the fresh winds of change ushered in have now become a veritable hurricane.

In geopolitical terms, this is a most welcome development and should be encouraged, and the Western world which has so long advocated these changes should undertake programmes to sustain and accelerate them.

However, the parable of the Prodigal Son should not be repeated here. While the return of Eastern Europe to the democratic fold should be celebrated with the killing of the proverbial "fatted calf"; while the democratic processes in the Central American countries of Nicaragua, Panama, El Salvador and Honduras should be similarly celebrated, we, who throughout the years have been steadfast in sustaining the democratic values in this region; we who inspite of our trials and adversities have never turned to the Colonels or the Commissars for solutions, should not be excluded from the table and forced to gather the crumbs. Our friends in the U.S. Congress and in the Administration, should ensure that notwithstanding the dramatic events in Eastern Europe and Central America, we in this region, while not being "headlined", should not be "sidelined" to languish in a state of underdevelopment.

We in the Caribbean now face one of our greatest challenges as we prepare to enter the 21st century.

While there has been a call for a New Marshall Plan for Eastern Europe, the call for a "Columbus Plan" to celebrate the 500 years of association of this Region with Europe, goes largely unheeded. While after nearly three years of effort the Support Group for Guyana has not been successful in raising a mere $35 million for Guyana, the same group of nations could, within a period of three months, mobilise a rescue package of $1,000 million for Poland.

What we in this region are seeking are not "handouts" but rather a "hand up"—an opportunity to earn our living. Not Food Aid, but access to markets for our products; not mere promises and polite rhetoric but policies fairly administered without the bureaucratic pitfalls and administrative hurdles which so often obstruct the lofty goals approved by Governments. The promises of the C.B.I. should not be the Trials of Tantalus, always receding from our thirsty lips; but rather should be a door of opportunity through which men and women of enterprise can freely enter in search of a better and fuller life.

It is in this context that I welcome these series of consultations, to see how we, whose association with the United States of America is linked not only by history and geography, but by the common ideals which we share; how we, by our own efforts and through our shared experiences, through a system of free enterprise and access to markets, can remove from our region, the scourage of poverty and want, which through the centuries have been the constant companions of the majority of our people.

The principal instrument which we have forged to achieve this noble objective was the Caribbean Basin Recovery Act or the CBI as it is popularly known. The intent of this Act was to offer to beneficiary countries access to the U.S. markets for a wider range of products; direct economic assistance for improvement of our infrastructure base to facilitate this process, and capital investment to stimulate the private sector.

Let us for a moment examine frankly whether these goals have been met. The cold statistics shorn of polite rhetoric will lead us to the conclusion that the CBI has not lived up to its early promise. Direct economic assistance for the development of our infrastructure has been drastically reduced and is now 35% below previous levels. What is most amazing in this context is that not even the most successful programme have been spared. For example, only the most persistent and vocal efforts of the OECS leaders and the Caribbean Development Bank saved the most successful programme of the Basic Needs Trust Fund from the knife. But similar representations were unsuccessful with respect to the Youth Skills Programme—a programme so important to us that our Governments in spite of the termination of U.S. aid have continued this project with their own meagre resources.

Investment which was never a flood, has slowed to a mere trickle. In trade, the picture is even less encouraging and the balance of trade against the Caribbean worsens with each succeeding year. The countries of the Caribbean can therefore not be blamed for the U.S. trade deficit.

Let us take a few examples to illustrate the point. Trade with the Bahamas which presidential aspirants can reach by "Monkey Business" in one hour, has declined from $1.3 billion in 1983 to $285 million in 1988 and Trinidad and Tobago whose recovery is vital to the entire CARICOM region has fared no better, and U.S. trade with that country has declined over the same period from $1.5 billion to $846 million. In the case of Barbados the decline was from $203 million to $53 million and with Guyana the decline was some 22% and yet we are termed "beneficiary countries" under the CBI. It would appear that we need a new definition of the term "beneficiary."

In trade, protectionism—whether legal, administrative or bureaucratic—appears to be the rule rather than the exception. Without one scintilla of scientific evidence, many of our agricultural products are deemed harmful to health as soon as they begin to penetrate the U.S. market.

Sugar, one of the major exports of five of our CARICOM countries, lives constantly in the shadow of the Sword of Damocles. The sugar quota is often arbitrarily reduced and in its place "food aid" is offered—stripping a country of its very self-respect. Sugar imported into the U.S. since 1982 has fallen from a 50% of domestic consumption to a mere 7% in 1988 with hundreds of millions of dollars lost in export earnings, and thousands of jobs in an industry which is the mainstay of the economy of five of our countries. At the same time, the American taxpayer spends $48 billion to subsidize domestic producers. While the recent increase in the quota is welcome, the arbitrariness with which this quota is adjusted does not lend itself to long term planning.

Many of our countries which live by the export of bananas to Europe must brace themselves for changes in that market. The Single Europe Act in 1972 will open the door to competition in that market which our products must face. This calls for diversification, not only in agriculture but in this entire economy. For this, assistance is needed not only in access to new markets for new crops, but to diversify into other fields such as tourism for which our countries, with the proximity to the U.S. markets hold a particular advantage. But there must be investment in this field in both the private and the public sectors.

Many of our countries because of the progress made by our own efforts, are now being denied access to concessionary funding from international institutions and our projects are too small to attract World Bank funding. It is therefore to our traditional friends that we must look for that extra push to get us on the road to sustained growth.

This meeting here today following upon the recent visit of Vice President Quayle to the region, is reassuring that in the headline grabbing events in other parts of the world, there is a forum to address the Caribbean concerns.

I therefore welcome you to St. Lucia and hope that the preparations for this meeting will contribute to its success.

EDUCATION: CULTIVATING THE INVENTORS OF TOMORROW

HON. TOM SAWYER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. SAWYER. Mr. Speaker, I would like to share with our colleague an article written by Edwin J.C. Sobey, Ph.D., for the March 22 edition of my hometown newspaper, the Akron Beacon Journal.

Dr. Sobey, the executive director of the National Invention Center, Akron, OH, the new home of the Inventors Hall of Fame, offers an insightful yet commonsense plan for parents who want to encourage their children's interests in science and mathematics.

"Will the great inventors of this next century be Americans?" asks Dr. Sobey. His response reflects the concerns of a wide range of Americans in the academic and research communities who fear that America's poor standing in international comparisons of math and science skills will translate into an inability to maintain our technological and innovative edge.

Dr. Sobey proposes that parents work in a close partnership with teachers to help reveal the dual fascination of math and science to young students. Both in the classroom and in the living room, all of us must work with our children to show them that we share a genuine interest in learning and that exploring these important disciplines can be both enjoyable and rewarding.

I highly recommend this article to my colleagues and the Nation. Dr. Sobey is right. It is not too late to cultivate the Edisons, the Bells, the Carvers, and Marconis of tomorrow, if we work with our children today. In Ed Sobey's words, "Let's start tonight."

[From the Beacon Journal, Mar. 22, 1990]

WHY DO OUR CHILDREN FAIL IN SCIENCE AND MATH?

(By Edwin J.C. Sobey)

Where are the Edisons and Bells and Marconis of the next century?

Are they enrolled in school and developing the insatiable curiosity to explore and develop the technologies of tomorrow?

Will the great inventors of the next century be Americans?

It is not xenophobic fear that directs this question, but concerns of whether this nation will continue to share in the economic rewards of technological innovation.

Sadly the answer is no.

We as a nation are not preparing the next generation of inventors. The intellectual resources needed to fuel the next technological revolution are not being prepared at home. But they could be. We could make a radical transformation that would have enormous benefits. And we could start now.

Every year new test scores show that American students are falling behind their peers around the world.

Students in Third World nations, where beasts of burden are not uncommon, score as well or better than our students, who are exposed to home computers, space camps and video technology.

Why do our students fail in science and mathematics?

Nearly every child trundles off to a school with an inquisitive mind and a yearning to learn. Kids love science and want to experiment, that is, to try things out. But some change their minds in a few years, and by the time the high school counselor asks them what courses they want to take, for too many, science isn't on the list.

I submit that there is no biological reason for this mass defection from science. We, the nation, are convincing kids that sicence is not fun or worthy of their pursuit.

So where do we go to find the inventors of the next century? The system is failing us, and it is time to act.

If changes are to occur, then every citizen, every parent, every friend of education must step forward to be a part of the solution.

Every parent must carve out more time to work with his or her children, to work on homework, to help them on projects, and to listen to their ideas.

Parents need to seek out the resources in their communities: the museums, libraries and zoos that can spark the interest and imagination of their children.

Nothing else in the education system could have as immediate or long-lasting impact as improving parental involvement. Nothing. And it can start now. We need not wait years for studies or legislation. We must not wait for the education profession, we can act now.

Here are seven specific actions that parents can take, starting tonight, that will improve their child's education.

Parents need to spend time with their children every school night. Parents need to show concern with homework and school progress. They need to help with and provide inspiration for homework and school projects.

Parents need to ask about assignments nightly and expect to see papers and test results. If they show concern, their children will understand that they too should be concerned.

Parents can encourage a child's other interests outside of school. That is, encourage their hobbies. Almost any active hobby will entail use of basic education skills and will foster learning in many different fields.

Active participation means skill development, research and reading, experimenting, questioning, exploring, observing and working towards a goal. These are the same skills needed in science and other fields.

If a child doesn't have hobbies, how do you get started? Try visiting a museum or attending an arts performance. Take a family hike or visit an adult hobbyist. When you see a spark of interest, nurture it.

A real benefit of hobbies is that they can build interest that will carry a child to learn in new areas. Another benefit is that the television stays turned off.

The more things that you can help the child become interested in, the less you will hear, "There's nothing to do except watch television."

Encourage creative expression. Listen to questions and treat them as the serious inquiries that they are. Encourage children to express their ideas and create stories and games. Help them write them down or draw pictures of them. What could be better for your children than learning to better express himself or herself in written, spoken or visual language?

Choose toys carefully. Children learn more from play than they ever will from classroom lessons. If you choose toys that encourage creativity and thought you are putting the tools of learning in the hands of your children.

If you choose those overly complex toys that can only do one or two activities, you are wasting your money. These always look interesting on the store shelves but they don't allow creative uses. After a few days they end up buried in the closet.

Read with your children. Set up a nightly routine in which you sit down together to read. Older children can read to you, but will still enjoy having you read. They will develop a love of books and reading. And, the television will last years longer.

Talk to the teachers. Let them know you are concerned. Don't let them brush you off or give you technical jargon. Make sure you understand them and they understand you. Most teachers want to help your child to learn. By forming an alliance with them you will better succeed and your involvement can help them to be better and more caring professionals.

Visit your child's classroom. You need to know how it operates. Spend a few minutes watching what goes on. Don't evaluate the activity, watch the expressions on the faces of the children.

Are they actively participating in projects? Are they eagerly engaged in their tasks? Is learning fun for them? If not, maybe you need to have your child reassigned to another teacher. If you are not assertive for your child's rights to a good education, who will be?

Where will the inventors of the next century come from? Unless we change our system of educating our youth, they will not come from America.

Yet we can make great improvements today for so little money, without government direction and without waiting for the education establishment. We must each play a role. Today's the day to change our future and to start the inventors of the 21st century on their way.

Let's start tonight.

A TRIBUTE TO DAVID MANNERS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. LAGOMARSINO Mr. Speaker, I would like to have the following tribute which was written by the Reverend Jonathan Sinclair Carey on behalf of my constituent, David Manners, included in the RECORD.

A TRIBUTE TO DAVID MANNERS

On April 30th a most extraordinary American citizen celebrates his ninetieth birthday in Santa Barbara: Mr. David Manners. To movie audiences of the 1930s, his was a household name; yet today he is generally forgotten by the public, much to his own satisfaction, it must be said. But today, on the occasion of his birthday, Mr. Manners is worthy of a public tribute on account of his many contributions to this country.

Mr. Manners was born in Nova Scotia of British parents, actually christened Rauff de Ryther Aklom and able to claim William the Conqueror as a direct ancestor. He attended Trinity School in New York City, a member of the Class of 1919. Upon graduation, he entered the University of Toronto to study forestry; but he soon determined he was meant to trod the boards, not study their composition. Leaving college, much to the chagrin of his Cambridge-educated father, the budding thespian went to New York City, adopting his mother's maiden name as his disapproving father did not want him to bring the family name into disrepute by his choice of profession.

He appeared in several major Broadway productions. Eventually he went to California and landed a leading role in the 1929 classic anti-war film *Journey's End.* Yet for many people, he is probably better know for his role in the classic gothic horror film *Darcula,* which has scared generations of movie-goers since its release in 1931. Between 1929 and 1936 he appeared in some forty films, including *Kismet* (1930), *The Millionaire* (1931), *A Bill of Divorcement* (1932), *The Mummy* (1932), *The Black Cat* (1934), *A Woman Rebels* (1936), and *Hearts in Bondage* (1936). Mr. Manners co-starred with a virtual *Who's Who* of the film industry, including such legendary performers as Loretta Young, Katherine Hepburn, George Arliss, Boris Karloff, Bela Lugosi, Ruth Chatterton, Eddie Cantor, Carole Lombard, and Claudette Colbert.

Yet in 1936 Mr. Manners left films to pursue other interests, including a return to the legitimate stage and an acclaimed appearance in *Lady Windemere's Fan* in the 1940s. He has written a number of books and articles through some five decades. Indeed, for the past ten years this intrepid individual has owned a word processor and continues to write and to publish, mostly poetry and philosophy. As an example of his thought, three years ago he published *Awakening from the Dream of Me.* As he states in the first chapter, "We dream away our lives wrapped in cocoons, patterning our lives on the past, repeating old errors. Only when we awake from the mortal dream do we discover the reality of our being."

No words could more eloquently express Mr. Manners' philosophy of life. Quite frankly, he has no great wish to relive those movie or stage days, however most people may yearn for such nostalgia. His concern is with the present, with trying to discover, or to awaken to, the meaning of truth and eternal values in this world today. As he has also written, "This world is full of magic. The impossible *is* ever possible." Politicians should be as optimistic, and philosophical, as this prophet.

By all accounts, David Manners is an American sage. And we are fortunate to have him claim us as his adopted country. As I understand it, in 1930 Mr. Manners was making a film in England. One night he was wandering around London, struggling to find his way in the notorious fog. Suddenly he saw the Stars and Stripes appear in a light and realized he was standing in front of the American Embassy. In that moment he also realized that indeed he was an American, despite his British and Canadian ancestry. Returning to the United States, he applied for citizenship. Almost sixty years later, he still displays the American flag presented at the ceremony by his front door.

So on the happy occasion of his ninetieth birthday, I am happy to pay tribute to this most private of individuals and to his many achievements, now including attaining the rank of nonagerian. I am sure that other Americans, as well as would have his father if he were still alive, join me today in expressing our best wishes and gratitude to David Manners, actor *emeritus* and active philosopher-poet, for his stellar contributions to American culture.

NEED FOR REGULATORY EXPANSION FOR FINANCIAL PLANNERS

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. ECKART. Mr. Speaker, it has been concluded that regulation over investment advisers and financial planners has been lax, to say the least. Limited resources at the Securities and Exchange Commission [SEC], the lack of regulatory direction from Congress and the increasing number of individuals employed

in the investment adviser/financial planner field—the number of advisers has tripled from about 4,600 to 14,000 since 1980—have resulted in inadequate protections for investors.

Some individuals providing investment advice are not required to register with the SEC because they are called financial advisers, financial consultants, or investment consultants instead of the traditional investment adviser. This loophole has allowed many individuals to practice their profession without regulation and has permitted many to abuse the profession and bankrupt customers through bad investments.

Representative BOUCHER has introduced the Financial Planners Disclosure and Enforcement Act of 1990, which would tighten up certain provisions contained in the Investment Advisers Act of 1940. I have cosponsored this bill to give needed protection to investors.

This bill would mandate that any individual claiming to be a financial adviser, or other titles denoting a profession which provides investors with advice, would be included in the definition of investment adviser and hence required to register with the SEC. It would also mandate up-front disclosure of compensation to inform potential clients the type of payment that is required for services rendered. Under this bill, either the SEC or clients will have an opportunity to file charges against an investment adviser for alleged abuses of the system. The SEC will have the authority to file civil penalties while customers will have the opportunity of filing complaints through private rights of action.

During continued deliberation of this bill, I hope to address other concerns I have about the investment adviser industry and the effectiveness of the SEC to enforce laws and regulations. I, along with Messrs. MARKEY and BOUCHER, requested the General Accounting Office to examine the investment adviser profession, the effectiveness of SEC oversight and additional statutory and regulatory changes which would benefit the industry and the general public.

While we are still awaiting GAO's final recommendations, some important issues have been revealed. Currently the general public equate registered with the SEC with the good housekeeping seal of approval. Registering with the SEC is nothing more than disclosing address of business, past experience, education and any criminal record. The SEC does not test the applicants' ability to manage clients' funds and render sound investment advice.

GAO estimates that 60 percent of registered investment advisers are never inspected, and of the advisers inspected, 80 percent of them are in violation of some securities regulations—mostly in the area of disclosure, fee structure, and bookkeeping. Either a self-regulatory organization needs to be established to monitor activities of registered advisers, or the SEC needs more resources to adequately oversee this growing profession.

I also call on Congress to examine further the existing fee structure. Currently, anyone who wishes to register with the SEC must pay a one-time fee of $150. Oftentimes, large investment firms with hundreds of investment advisers, register the company as a single investment adviser, hence paying only $150 for the whole firm. We must investigate the possibility of altering the fee structure and possibly earmarking any increased revenue for the SEC for better investment adviser oversight.

I look forward to working with Mr. BOUCHER to close some of the regulatory loopholes that currently exist in the law and provide more adequate protection for investors.

RABBI MENACHEM M. SCHNEERSON, 40TH ANNIVERSARY COMMEMORATION

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. TOWNS. Mr. Speaker, today I rise to commemorate the 40th anniversary of Rabbi Menachem M. Schneerson's leadership of the Lubavitcher Rebbe.

During the Rebbe's four decades of inspired leadership, Lubavitch has become the world's largest Jewish outreach organization, maintaining centers in almost every Jewish community throughout the world.

These educational and social service institutions serve a variety of functions for all Jews, regardless of background or affiliation. Programs geared to humanitarian endeavors reach beyond the Jewish community to all mankind. In the United States alone, more than 180 centers serve every State in the Union.

In addition to the United States, Lubavitch institutions have been established in diverse areas around the world, including Argentina, Australia, Austria, Belgium, Brazil, Canada, Chile, Colombia, Costa Rica, England, France, Holland, Hong Kong, Hungary, Italy, Morocco, Paraguay, Peru, Scotland, Soviet Union, South Africa, Spain, Switzerland, Tunisia, Uruguay, Venezuela, and West Germany.

This man of vision and drive, began his life of service to others many years ago. After emigrating to the United States in 1941, he was appointed by his father-in-law to head his newly founded organizations: Merkos L'inyonei Chinuch, the education arm of the Lubavitch movement; Machne Israel, the movement's social service organization, and Kehot Publication Society, the Lubavitch publishing department.

Shortly thereafter, Rabbi Schneerson began writing his scholarly notations to various Chassidic and Kabbalistice treaties, as well as a wide range of responses on Torah subjects. With publication of these works his genius was soon recognized by Jewish scholars the world over.

In 1950, Rabbi Menachem M. Schneerson, ascended to the leadership of the flourishing movement. Lubavitch institutions and activities soon took on new dimensions. These educational and social service institutions serve a variety of functions for the entire specturm of Jews, regardless of background or affiliation. Indeed those programs geared to humanitarian endeavors reach out beyond the Jewish community to all mankind. In the United States alone, more than 180 centers serve every State in the Union.

Under the Rabbi's guidance, the Lubavitch publishing house, Kehot Publication Society, has become the largest Jewish publishing house in the world. It publishes and distributes millions of books, pamphlets, cassettes and educational materials in Hebrew, Yiddish, English, Russian, Spanish, French, Portuguese, Italian, Arabic, Farsi, Dutch, and German.

In his mission to provide a sense of community, the Rebbe has established special education facilities for alienated youth and young adults. In addition to attempting to fulfill the mission to young people, the rabbi has established full-time yeshivas for Jewish men and women in Chabad-Labavitch centers and synagogues around the world. These classes have opened new horizons to people with little or no background in Torah study.

In addition, to working actively to serve, the rabbi, is a systematic and conceptual thinker. His unique analytical style of thought has resulted in a monumental contribution to Jewish scholarship. More than 125 volumes of his talks, writings, correspondence, and responsa have been published to date.

Rabbi Menachem Schneerson's brilliant insights into the human experience and world events, genuine compassion for others, strong leadership and profound thinking have made him a legend in his lifetime, and won him the admiration, respect and awe of all those who have come to know him.

EARTHTECH 90

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. ROE. Mr. Speaker, the start of Earthtech 90 tomorrow will mark a turning point for the environmental preservation of cur planet. This initiative will marshal business, government, and all private citizens to share the responsibility for protecting and preserving their global habitat.

Earthtech 90 is an effort to bring forth the environmental conscience that must, from this moment on, be our guide in planning the world's future economic and social development.

We must make a commitment to a new way of thinking. We must develop environmental scruples. We must plan every new technology and every new product based on a deep-seated belief that we are fundamentally responsible for the Earth's survival, each day, and every day.

Our environmental problems require a two-pronged approach. On the one hand, we must have the initiatives and incentives that Earthtech 90 represents. On the other hand, we must move forward aggressively to expand our research programs designed to help us better understand global change and its implications. Together, these efforts will bring forth the best judgments for development of the most practical solutions.

I want to commend the sponsors of this important event, the Environmental and Energy Study Institute and the Environmental and Energy Study Conference. The cochairmen of Earthtech 90, my distinguished colleagues

Senator AL GORE and Senator JOHN HEINZ, are to be especially complimented for their foresight and commitment.

REMEMBERING THE ONGOING PLIGHT OF SOVIET JEWRY

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. GREEN. Mr. Speaker, I should like to commend the Greater New York Coalition for Soviet Jewry and other Jewish organizations for keeping the problems of Soviet Jewry in the political and public forefront through important activities such as the Rally of Response/Solidarity Sunday which took place at the United Nations on April 1, 1990.

Under Mikhail Gorbachev's policies of glasnost, advances have been made in the areas of wider emigration rights for Soviet Jews, release of major long-term refuseniks, and sanctioning of Jewish cultural and religious activities. In 1989, 12,915 Soviet Jewish emigrants arrived in Israel. In just the first 2 months of 1990, that number has already reached 10,569. In all, over 1 million Soviet Jews have begun the emigration process to leave the Soviet Union. Israel needs the help of its friends and supporters in the United States and elsewhere in order to settle successfully and assimilate this large influx of immigrants.

While there is a growing fear of anti-Semitism among Jews in the Soviet Union, Arab States continue to pressure the Kremlim to scale back the Soviet Jewish exodus to Israel.

Raising public awareness about the ongoing needs of Soviet Jews is instrumental to ensuring that the advances made for Soviet Jews under the policies of Mikhail Gorbachev are retained in spite of pressure from the Arab nations. There is a corresponding need to keep the problems and concerns of Soviet Jewish emigration and general United States' policy toward Israel in the United States political forefront, especially in light of President Bush's recent remarks about East Jerusalem, which have confused both the American public and its decisionmakers regarding our policy towad Israel.

I strongly support the right of all Jews in the Soviet Union and anywhere in the world to freely emigrate to Israel and other countries in which they are allowed to live, work, and worship without fear, intimidation, or discrimination. I encourage the Government of the Soviet Union to continue its current positive policies on Jewish emigration.

I take this opportunity to applaud the efforts of the Greater New York Coalition for Soviet Jewry, the Jewish Community Relations Council, the National Conference on Soviet Jewry, the Simon Wiesenthal Center, and the United Jewish Appeal-Federation of Jewish Philanthropies of New York, for keeping the needs of Soviet Jewish emigrants to Israel and other countries, including the United States, in the political and public forefront.

A TRIBUTE TO BOB HUBER

HON. ELTON GALLEGLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. GALLEGLY. Mr. Speaker, I rise today to honor a longtime friend and colleague for his service to my hometown of Simi Valley, CA. Last weekend, Robert O. Huber was named Citizen of the Year by the Simi Valley Chamber of Commerce. I can assure you it is an honor that was long overdue.

For more than two decades, Bob has been there when his community called. Both in his business career and in his civic involvement, Bob has selflessly given of his time and talents to make Simi Valley a better place to live and work.

Besides serving with me on the Simi Valley City Council for 4 years, Bob has served in leadership roles with a number of civic organizations, including the Boy Scouts, the YMCA, the Rotary Foundation, the United Methodist Church, and the United Way.

During his long business career in Simi Valley—first as founder of Huber Chapel Mortuary, and for the past 11 years as an attorney in private practice—Bob has played a key role in community affairs. He personally wrote the industrial development resolution that started the city's commercial and industrial development program in 1971; he organized a business group that was instrumental in keeping gambling out of the city in 1972; he initiated the city's tree preservation ordinance and its affordable housing committee; and he even conceived the city's official slogan.

Bob has been recognized many times for his dedication to his community. His honors include the Simi Valley Chamber of Commerce's Man of the Year Award, Rotarian of the Year, the Jaycee Distinguished Service Award, the Rotary Club Paul Harris Fellow Award, and being named one of five outstanding young men in California in 1973 by the State Jaycees.

Mr. Speaker, it's truly an honor to be able to share Bob Huber's proud record of accomplishments with my colleagues. And with his wife, Laurie; and their sons, Todd and Chris, I'm sure my colleagues join with me in congratulating him and recognizing him for his outstanding service to his community.

WHY I AM PROUD OF AMERICA

HON. JAMES V. HANSEN

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. HANSEN. Mr. Speaker, it is my privilege to pay tribute to a young constituent from my district, Max David Roth. He is the recent State winner from Utah of the Voice of Democracy broadcast scriptwriting contest. More than 137,000 secondary school students participated in the contest this year, submitting essays on "Why I am Proud of America." David's essay is well-crafted and insightful, and I encourage my colleagues to take a moment and read it:

WHY I AM PROUD OF AMERICA

(By Max David Roth, Utah winner of the 1989/90 VFW Voice of Democracy Scholarship Program)

I go to see my Grandma quite a bit. We talk, play cards and watch T.V. Sometimes I pick up a book in her apartment. It's a collection of the works of Norman Rockwell, and I always flip to a picture that never fails to give me chills. I think it depicts better than anything why I'm proud of America. It's part of Rockwell's freedom series and it's titled "Freedom of Speech". An ordinary man stands in his jacket, plaid shirt, and faded jeans addressing a town meeting. His face expresses the fear known to anyone who has spoken in public and the determination of a man who truly believes in what he's saying. He's not a statesman, or general, or an aristocrat. He's just a man with something to say and, because of this great nation, the right to say it. America's hero lives in the body of this nameless man and in every man or woman with the courage to take a stand on an issue.

America is so wonderful because it was the first modern nation to realize that if everyone has a say, somebody's going to come up with some pretty good ideas. This simple concept we call democracy has lasted 200 years now and has proven to the world that a nation with roots in liberty will grow fuller, stronger, and more beautiful than any nation with roots in oppression.

Now I know all of this sounds corny. I have a lot of trouble addressing a subject like America, or liberty without sounding corny. Maybe I've watched "Mr. Smith Goes to Washington" a few too many times on my VCR. Maybe I believe too much in Norman Rockwell's America. Maybe I listened too long to my grade school teachers who first mentioned such names as Washington, Jefferson, and Lincoln in reverent tones. But, I don't think I did.

I remember when my grandpa gave us an encyclopedia for Christmas when I was in the third grade. I used to look up the presidents and just sit and stare at those huge articles. Some of those guys had five or six whole pages. I couldn't imagine where these men came from or what made them so great. I saw them as gods, perfect in every way. Their accomplishments seemed impossible and their ideas expressed a genius that I could never hope to attain. Then I read about them and learned that Washington didn't really want to be president, Jefferson opposed ratification of the Constitution, and Lincoln was somewhat of a social misfit who lost as many elections as he won. Ironically, this information was more pleasing to me than I care to say. It made me realize that great men need not be perfect. It struck me that the great men in our history didn't come from anyplace special. Some were rich and some were a lot poorer than I am. The only thing that made them standout was that they had ideas and more importantly, the courage to voice those ideas. They believed in freedom and were willing to risk everything to gain it.

The effect of their courage is still being felt across the globe as new heroes spring up demanding from their governments the same respect that we've enjoyed for two centuries. When such events unfold I can't help but feel proud of the great Americans who started it all. Maybe some of those America's heroes began by standing up in a town meeting and saying their piece, and maybe someday I could do the same thing as well, or better. Maybe I could become

president and lead the free world. It might sound like a kid's dreams, but where else can a kid dream like that? Besides, it just might happen, after all, this is America.

PUEBLO SCHOOL'S SUCCESS CATCHES U.S. EDUCATORS' EYE

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. RICHARDSON. Mr. Speaker, I rise today to commend Santa Clara Day School in Santa Clara Pueblo, NM, for its nomination for the U.S. Department of Education's Elementary School Recognition Program.

Santa Clara Day School has developed innovative programs to promote education among its Indian students. These programs stress the importance of their Indian cultural heritage. The teachers at Santa Clara teach both English, and Tewa, which is Santa Clara's native language. Parents and grandparents also participate in the childrens' education. The approach that Santa Clara has taken with the teaching of their children has caught the eye of Federal educators who are planning a visit to take a closer look at programs the school has developed.

Mr. Speaker, I am very proud of the success Santa Clara Day School has achieved in bettering the education of their Indian students. I would like to take this opportunity to share the following article on Santa Clara Day School with my colleagues.

[From the Journal North, Mar. 22, 1990]

PUEBLO SCHOOL'S SUCCESS CATCHES U.S. EDUCATORS' EYE

(By Camille Flores)

SANTA CLARA PUEBLO.—Santa Clara Day School provides an atmosphere where children can assert themselves with confidence as Indians in a mostly non-Indian world, says school principal Solomon Padilla.

The 116-student elementary school has been nominated for the U.S. Department of Education's Elementary School Recognition Program and targeted for a visit from federal educators who want to take a closer look at programs the school has developed.

"We're teaching them to be proud of their culture in a predominantly non-Indian world," Padilla said.

The programs developed slowly and with help from a community, he said. The principal, who is a non-Indian, has been at the school for 20 years, three years as teacher and 17 as principal. "The school's greatest asset is the pueblo itself.

"Parents and grandparents participate in the education. When everybody is watching over the schools, the children are made to feel real important," he said.

The school was built in the 1920s, but until 1976 English was the only language spoken there. And until teachers decided to write and deliver their own curriculum about five years ago, lessons weren't geared to teaching Indian children.

Today, teachers greet students, "Un sengi thaamuu enyae," which in Tewa means, "Good morning, students." All subjects in kindergarten through third-grade are taught in both Tewa, the native language of the Santa Clara people, and English.

"What they learn in one language is reinforced in the other," Padilla said, adding that the school is working to expand bilingual education through the sixth-grade."

When kindergarten teacher Frances Harney asked her students this week, "What is an Indian," they responded: "It's dancing around the fire at night," "speaking native tongue," "singing," "eagle dances," "baking bread," and "making pottery and jewelry."

These culturally rich experiences have been integrated into lesson plans that make everything from computers to math relevant to an Indian child, Harney said.

"Children who are culturally comfortable just learn better—that's what we've found," Padilla said.

About half the teachers at the day school are Indian, but Padilla is quick to point out teachers are chosen solely for their qualifications to teach pueblo children. "Everyone wants to live in this area, so we are able to pick the best," he said.

"We're not textbook oriented," Harney said. "We use a hands-on approach to teaching, because that's how our children learn best."

The school's computer laboratory is nearly always in use, even after school, by students who write, edit and publish their own newspaper, Tewa Timeline. Students even published a calendar using the computers that includes student art, essays and poems.

Arlene Romero's sixth-graders use the computers (one for every four students) during class time to correspond with pen pals at a non-Indian school in Colorado. Next month the students will travel to visit their writing buddies at Steele Elementary School in Colorado Springs and present a play they wrote themselves, Tewa Cinderella.

In all grades, special emphasis is placed on "inter-generational projects," Padilla said. Third-graders are working with "grandparents" from the pueblo's senior citizen center to write a history of Santa Clara Day School. Students are expected to be involved in important aspects of pueblo life, such as dances and cleanup projects.

Of the Eight Northern Indian Pueblos, Santa Clara is the third largest in population, but more Indian children attend Santa Clara Day School than attend any of the other pueblo schools, Padilla said. And even though Santa Clara children are eligible to attend state schools or private schools outside the pueblo, "most chose to stay here," he said.

The school is open to Indian children and is accredited by the state, the U.S. Department of Education and by the North Central Association of Colleges and Schools, for which Padilla serves as evaluator for other member elementary schools. Non-Indians may attend the pueblo school, but must pay tuition.

TRIBUTE TO JOSHUA TORCZYNER

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. LANTOS. Mr. Speaker, I invite my colleagues to join me in paying a well-deserved tribute to Joshua Torczyner for his heroic efforts in saving the lives of those whose lives where threatened by Adolf Hitler and the Nazi machine of destruction.

Joshua Torczyner—who now lives in Burlingame, CA, in my congressional district—was born in Vienna, Austria, in 1910. As a young man, he joined the Maccabi organization, a Jewish youth scouting organization in Germany and Central Europe, which encouraged and assisted settlement in Israel as the Nazis rose to power in Germany. Maccabi was a source of hope, inspiration, and assistance to thousands of Jews in Europe. Maccabi members were instrumental in the rescue of Jews and in their resistance to Nazi extermination programs.

In Vienna, Joshua Torczyner became leader of the rescue and emigration effort, and in that role encountered the infamous SS Col. Adolf Eichmann. Mr. Torczyner defied Eichmann and implemented a grand scheme to smuggle Jews out of Vienna through a major underground effort.

Later Joshua Torczyner became the head of the World Maccabi Aid Committee in Geneva, Switzerland, and in 1940–41 he was involved in the Jewish underground in Belgium. He managed to escape from the Nazi war machine by fleeing to Cuba, and he later moved to the United States.

Since coming to California, Mr. Torczyner has been active in Jewish affairs in the bay area and throughout California. He is the owner of Pacific Diamond Co. in San Francisco, and as I mentioned, he resides in Burlingame.

Mr. Speaker, I am delighted and honored to pay tribute to Joshua Torczyner, a man who was a bright beacon of light to his fellow men during a period of terror and darkness.

LOCAL 18 OPERATING ENGINEERS DEDICATE NEW OFFICE

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. WYLIE. On Saturday April 7, 1990, Local 18, International Union of Operating Engineers, will dedicate its new Columbus, OH, office at 1180 Dublin Road with a flag raising and ribbon cutting ceremony.

As this ceremony takes place, this outstanding labor organization which has had a tremendous impact on the State of Ohio and the lives of its citizens will officially enter its 51st year of service to our Nation. Local 18 actually came into being on October 1, 1939, when six autonomous local unions became the International Union of Operating Engineers, Hoisting and Portable Branch with territorial jurisdiction in 85 of Ohio's 88 counties and 4 from northern Kentucky.

In the 50 years since, local 18 members have been involved in numerous construction projects in Ohio, including:

Ravenna Ordnance Plant, Curtiss-Wright Plains in Columbus and Cincinnati, Plum Brook near Sandusky, a naval ordance plant in Canton, and improvements at Patterson and Wright fields in Dayton during World War II.

Construction of the 7-mile $8.6 million Columbia Parkway in Cincinnati, a Public Works Administration project of the early 1940's.

Construction of the Ohio Turnpike across the northern section of the State from Indiana to Pennsylvania in the mid-1950's.

Highway and university construction projects in the 1960's.

Perry Nuclear Power Plant construction in 1977.

"Operation Jobs-Highways," a $1.9 million highway construction and jobs program, and a shoring of the State's crumbling infrastructure in the 1980's.

In 1942 a book about local 18 was published. What was said then in this publication, The Book of Local 18, holds true today and bears repeating:

To progress together, labor must meet the changing conditions of industry equally as they occur * * *. Local 18 is alert to the fact that Agreements with employers means little unless the employer can make money. This is his incentive to remain in a business which will continue to create jobs * * *. It takes two to make a business bargain, and both must profit if is to last. This Local accepts the soundness of two-way responsibility * * *. Local 18 offers the best possible means available to operate a job with qualified and satisfied operators.

While the road ahead is never precisely clear, it is safe to predict that whatever occurs in Ohio from a standpoint of construction in the 1990's and beyond will be accomplished because of this "partnership" and those who make up he membership of local 18. I am certain that my colleagues join me in saluting local 18 and in recognizing the many significant and valuable contributions of organized labor throughout this Nation's history.

H.R. 3847, LEGISLATION ELEVATING EPA TO CABINET LEVEL STATUS

HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. GLICKMAN. Mr. Speaker, last week, I made a statement during consideration of H.R. 3847, a bill elevating the Environmental Protection Agency to Cabinet level status. I spoke out against the bill during general debate; however, after the House of Representatives accepted all of the strengthening amendments and rejected the weakening amendments offered on the House floor, I decided to support this legislation. I was originally opposed to the bill because I felt that President Bush was using it so he could be remembered as the environmental President as well as the education President, the transportation President, and the pro-family President. I objected to his creation of yet another Cabinet department just to make the point that he is committed to the environment.

During the past decade or so, we have added four new chairs to the Cabinet table. My point in speaking against the bill was that if we are going to create a Department of Environmental Protection, we should combine all of the environmentally related offices of our Government and give the new Department some real responsibility and clout. I feared that as a Cabinet level department, the EPA would lose its independent status and become a vehicle for the administration's policy. Without an expansion of its powers, we risk reducing EPA's responsiveness to Congress' mandate to clean up the environment. I argued that a seat at the Cabinet table is no substitute for a commitment to clean up our air and water.

Ironically, the Bush administration opposes this legislation as it was passed by the House of Representatives. In fact, the only provision the administration supported was the Hastert amendment which entirely gutted the bill, stripping it down to a simple gesture of elevating the EPA to Cabinet level status. It's too bad that President Bush confuses form over substance.

I decided to support this bill once the major strengthening amendments were agreed to: the Synar amendment establishing the basis for regional administrator appointments without regard to political affiliation; the Martin amendment increasing the number and improving the training of criminal and civil investigators at the new Department; the Roe amendment to create an environmental research institute to support long-range environmental research; and Eckart amendment making Federal departments and agencies subject to Resource Conservation and Recovery Act regulations. These amendments will seriously strengthen the independent enforcement of our environmental laws. If we want to be serious about the environment, we must give this agency some authority, resources, and real commitment, not just a resolution on paper.

SUPPORT FOR WORKERS' RIGHTS IN S. LICHTENBERG

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. CLAY. Mr. Speaker, as we begin the work of the second session of this the 101st Congress, I am reminded of a statement made by Ms. Barbara H. Lewis a textile worker at S. Lichtenberg, a Georgia employer. As I am sure many Members are aware, the employees of that company are in a battle for survival.

Nearly 2 years after voting to be represented by the Amalgamated Clothing and Textile Workers Union, management still refuses to cooperate with the official bargaining representative. The National Labor Relations Board has issued complaints containing over 140 charges of Federal labor law violations. The majority of the complaints stem from racial and sexual discrimination, and a number of law suits have been filed.

Our deeds in the coming year will greatly affect those who are perched on that fence between welfare and the working poor. We should heed their cries for self respect and human dignity.

The following statement by Barbara H. Lewis was made on September 14, 1989, at the Congressional Black Caucus Labor Braintrust Workshop:

REMARKS OF BARBARA HINES LEWIS

Thank you for the opportunity to speak here today, to tell you about the struggle we've experienced for almost two years at S. Lichtenberg factories located in Louisville and Waynesboro, Georgia.

Today's workshops are about the future of minorities in the workforce, and for those of us who live in eastern Georgia, we are worried about our future. I worked at the Delila plant for eight years, before being terminated this past May. During those eight years, I worked in almost every department. Then, in May, I was permanently laid off. They closed down my area, and found another job in the plant for my supervisor, who was white, but not for me. Four black workers have trained her for her new job. As for me, I've worked all through the plant and they said they didn't have another job available.

I know I was terminated and so were a lot of the others because of our involvement to make a change. We are fighting for a better future for ourselves and our children. Over a year ago, we voted to join the Amalgamated Clothing and Textile Workers Union (ACTWU). Even though the company did everything they could think of to stop us, we voted by an overwhelming margin—413 to 185—for the union. We needed a union because we thought that when you retire, after ten or twenty years of service for this company, you are entitled to something. At S. Lichtenberg, we don't have a pension plan. Last year a black woman who worked there for 22 years, and was making $5.45, retired, and the company didn't even say thank you. But when two whites retired after thirteen years each, they got silver trays and their picture in the paper. It may not seem like a big thing, but when you give your whole working life for a company, and they treat whites one way and blacks another, it hurts and you feel it.

One reason we wanted a union is we don't make enough money. Hard labor but cheap pay. Most people start at minimum wage and after ten years still aren't making more than $6 an hour. A lot of them, as I am, are single parents, and you can't really make ends meet for you nor your children on those kinds of wages. S. Lichtenberg offers very few benefits. Our health insurance has a $500 deductible yearly, and if you want family coverage, you have to pay more than $30 a week for it. I don't even know anyone who has family coverage, because no one can afford it.

The main reason we wanted a union is that we wanted respect. One woman worked for ten years at the Samsons plant. Her seven year old son was diagnosed as having cancer. The company gave her a hard time about the time she was taking off to go with him to the hospital for treatments. They told her she should find somebody else to take him instead. Eventually they came up with an excuse and fired her.

I was brought up to believe in doing a good job of whatever you do and being proud of it. My father was a seasonal worker and my mother a factory worker, and together they sent eleven children through high school and some through college. To me that's something I've got to be proud of. But the Lichtenberg Company doesn't treat its employees with respect. The owners came down from New York in the 1960s and 70s and set up their plants in these small towns in Georgia. At first, there were a lot of white workers, but over the years, most of them found better jobs, and when we started to organize, the plants

were at least 90% black. For most of the people there, our ancestors were slaves on the plantations. Now, there's a lot of unemployment. Burke County, where the Samsons plant is, still has one of the highest unemployment rates in all of Georgia; for two weeks before I came up here, unemployment in Burke County was 11%.

In Louisville, where I live, blacks are about 65% of the people, with brilliant ideas but no power. There are about 5 wealthy whites that control the town and hinder its progress. We have in the center of town a slave market, the only one that is still standing in the state of Georgia. Tourists find it interesting, but we blacks view it differently. We see in it the slave mentality that many whites want us to have, and our still not having an equal opportunity in society.

So we organized, we voted to join the union, but the company didn't stop fighting us even after we won by such a huge majority. They paid thousands of dollars to their lawyers and filed objections to the election. The Judge finally said this July, over a year after the election, that all of their objections were without merit, and recommended to the National Labor Relations Board that ACTWU be certified. But the company appealed, and we're still fighting. Meanwhile, they've laid off and fired a lot of people; we've filed over 140 charges for unfair labor practices because of how they've treating union supporters. We filed race and sex discrimination charges with the Equal Employment Opportunity Commission last December.

While the company is treating us this way, they continue to sell their curtains and draperies to the Army, Navy, and Air Force, to sell on military bases all over the country. The way we see it, the US government and the taxpayers' money is aiding this company to discriminate against us. We later found out they hadn't even filed the forms they're supposed to as a federal contractor to show they are obeying anti-discrimination laws. So now we've filed a complaint with the Office of Federal Contract Compliance, and several members of the Congressional Black Caucus are asking the agency to investigate our situation. I think it will not only help workers at Samsons and Delila, but it will show the truth to what was said at the civil rights march in Washington in August, that there will be no retreat on civil rights, no matter what the Supreme Court does.

This workshop is about the future of blacks in the workforce. So what about the future? One thing that working with the union has done, it has made us know that the only way the future will be better is if we stand together and fight for it. This past year and a half, many of us began to realize we weren't just fighting for our own futures, or even just our children, but for a better future for Black people all over the South. Because unions are one of the most important ways we come together and win the dignity and respect we deserve, and until we have equality in the workplace, its hard to really have it anywhere else. If you don't have equality in your paycheck, or equality in a chance for a promotion, how do you teach your children they are really equal in life and have them believe you?

It has helped a lot that we have gained support from people across the country. Dr. Joseph Lowery, Reverend Jesse Jackson and others have spoken out on our behalf. We've been on the NBC Today Show, and in the Washington Post and all kinds of other newspapers. Right now the Jewish Labor Committee and the Coalition of Black Trade Unionists and the National Organization of Women and lots of other groups are getting their affiliates to get involved to help us. If the Lichtenbergs would listen, they would know that we just want to build a better future for all of us. One way or another, we plan to build that future, even if it takes the support of everybody who believes in justice in the whole United States.

I want to thank Congressman Hayes and Congressman Clay for inviting me here today to talk about our struggle. I would like to leave you with a poem I wrote, which was inspired by what we have been going through:

IT'S A COMING

(By Barbara Hines Lewis)

Yas sir I sees a better day is coming.
Afser while, if I don't—
Maybe my chullen—can run anusher mile.
Us done bored us burdens in thee heat of thee day
King Jesus thee head Mas-sir done he'ed us pray.
Us started out a long time in them cotton fields
Sanging his be over soon,
And looking to them hills.
Us couldn't read, sho' couldn't write
But got a pray through in thee wee hours of thee night.
Yas sir us barely made it off a wing and a prayer
Cause us never forgot King Jesus was there.

And through workshops like this and the help of people like you, the workers at Samsons and Delila truly believe It's A Coming.

EAGLE SCOUT HONORED

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. LIPINSKI. Mr. Speaker, it gives me great pleasure to bring to the attention of my colleauges, an outstanding young individual from the Fifth Congressional District of Illinois who has completed a major goal in his scouting career. On Saturday, June 23, 1990, at St. Rene Goupil Hall located in Chicago, IL, Joseph LeCompte will be honored at an Eagle Scout Court of Honor.

It is important to note that less than 2 percent of all young men in America attain the rank of Eagle Scout. This high honor can only be earned by those scouts demonstrating extraordinary leadership abilities. This young individual has clearly demonstrated such abilities through his dedicated community service and deserves special recognition.

In light of the commendable leadership and courageous activities performed by such a fine young man, I ask you, my fellow colleagues, to join me in honoring Joseph LeCompte for attaining the highest honor in Scouting—the Eagle Scout. With God's blessings, let us wish him the very best in all of his endeavors.

LITHUANIAN INDEPENDENCE

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. BLILEY. Mr. Speaker, I stand here today to urge my colleagues to take notice of the secession crisis that is taking place in Lithuania. It has been 3 weeks since the Lithuanian Parliament declared its independence from the Soviet Union yet already, Soviet troops are moving into the capital, Vilnius. They have occupied the Lithuanian Communist Party headquarters and seized Lithuanian deserters of the Soviet Army.

Since 1795, the Lithuanian people have been forced to live under the religious, political, and cultural repressions imposed interchangeably by both the Russians and Germans. In 1920, Russian leaders signed a peace treaty with the Lithuanian Government recognizing full right of self-determination, freedom to secede from the state, full sovereignty and independence for both the Lithuanian people and their territory. However, with the outbreak of World War II, Lithuania, acting as a buffer state between the Soviet Union and Hitler's Germany, was one of the first to experience the aggression and fury of the war. As an occupied territory during the war, the Lithuanian people experienced communism and Soviet domination and eventually were completely subsumed into the Soviet Union.

I want to take this opportunity to point out that the Lithuanians have been fighting desperately for their independence, for the very freedoms we Americans have lead the battle to defend over the past several decades. The United States has never recognized the annexation of Lithuania into the Soviet Union so now is not the time for us to turn our backs on the people of Lithuania. They need our support and we have a responsibility to give them that support.

We have already witnessed that communism as a political and economic theory does not work. We have seen Mr. Gorbachev initiate some democratic and economic reforms in his own country as well as permit the release of the occupied Eastern bloc countries from the Warsaw Pact. The countries in the Eastern bloc have won their independence and are now basking in the freedoms that accompany that sovereignty. The United States has been supportive through all paths of assistance, yet we stand unheeding and uncommitted to Lithuania's cry for independence?

The United States has been a stalwart of freedom, protecting the rights that accompany sovereignty and democracy. The Soviet Union has occupied Lithuania for 50 years while we have denied that occupation. It is time for the United States to establish diplomatic relations with this Baltic republic. The United States must continue to preserve democracy for those who so desire to share in its fruits. We cannot sit by and let Soviet aggression place fear in the Lithuanian people. This cannot be another incident like that which took place in China last summer. Our support for freedom and democracy must not wane now as it did when the Communist forces of China ran

down students who were peacefully making their voices heard for the freedoms they so desired. Lithuanians have the right to enjoy freedom as much as the Chinese students who fought for it almost 1 year ago. Communist aggression seems to have reared its ugly head once again, when unprecedented advancements away from the Communist theory had been talking place around the world.

Mr. Speaker, once again, I urge my colleagues to make their voices heard. We cannot allow the Soviets to think that we are reconciliatory when human rights and democracy are in question. We cannot allow the Soviets to feel that our trust for them is so deep that we cannot see the aggression that is taking place in Lithuania. The United States cannot look through the rose-colored glasses of emotion and faith in Soviet words. We cannot stand by and permit a peaceful revolution for democracy and freedom turn into a devastating show of force and violence. It is our responsibility to help protect the Lithuanian right to sovereignty and ensure them of our support for their battle.

THE CENTENNIAL ANNIVERSARY OF THE GLADWIN MASONIC LODGE

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. SCHUETTE. Mr. Speaker, ladies and gentlemen of the House, I rise today to pay tribute to the Gladwin Masonic Lodge, which on April 7, 1990, will celebrate its 100th anniversary.

The history of Freemasonry in America is long and distinguished, dating to 1730, with the founding of the first lodges in Boston and Philadelphia. The first Masonic book published in the Western Hemisphere was written by no less distinguished an author than Benjamin Franklin, an early leader in Pennsylvania's Freemason movement. Other Freemasons who figured prominently in the American Revolution include John Hancock, Paul Revere, and George Washington, and a total of 14 American Presidents have been Freemasons.

Using the tools and implements of the builder, Masons seek to teach basic moral truths, emphasizing the fatherhood of God and the brotherhood of mankind. Like Masonic lodges throughout the world, the Gladwin Masonic Lodge gives generously of its time and talents to community service and charity. It awards an academic scholarship each year for the outstanding math or architecture student of Gladwin High. The Gladwin Masons sponsor and participate in their city's annual Memorial Day parade and ceremony. They are also active in the war against juvenile diabetes, a special project of the Freemasons nationally.

Mr. Speaker, my colleagues in the House, please join with me in honoring the 100 years of exemplary service given by the Gladwin Freemasons, and extending our best wishes to the Most Worshipful Grand Master Thomas C. Cross of the Freemasons of the State of Michigan as he rededicates Gladwin Lodge No. 397 for the purpose of practicing the craft of Masonry.

EARTH DAY

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. BROWN of California. Mr. Speaker, the 20th anniversary of Earth Day is only 19 days away. Efforts are underway to celebrate this occasion around the world. The reason for this is simple: the environmental problems facing us today have reached global proportions.

What is needed at this juncture in the course of human history is a fundamental, world-wide reappraisal of the role of technology in our lives. We must all reconsider our attitudes toward the develcpment and application of technology. The modern use of technology to dominate and change nature may need modification as we adopt the concept of sustainability. As Aldo Leopold observed in A Sand County Almanac:

By and large, our present problems is one of attitudes and implements. We are remodelling the Alhambra with a steam-shovel and are proud of our yardage. We shall hardly relinquish the shovel, which after all has many good points, but we are in need of gentler and more objective criteria for its successful use.

The impetus for such a shift in attitude commenced 20 years ago with the first Earth Day. The environmental demonstrations of April 1970 captured the attention of politicians and forced the environment onto the national political agenda. And yet, clearly what we are doing today with our technologies is not sustainable.

It is not too late, however, to reverse this trend. What is needed to make this 20th anniversary of Earth Day successful is a world wide demonstration of everyone's personal commitment to take immediate steps to help preserve the planet—to develop an environmental ethic. The fate of the earth and of future generations rests on our shoulders. On April 22, lets show the world that we care deeply about the environment and that we are committed to its protection.

IN HONOR OF P.S. 179 ON ITS 75TH ANNIVERSARY

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. SCHUMER. Mr. Speaker, I rise today to pay tribute to P.S. 179 of Kensington, Brooklyn, as it celebrates its 75th anniversary on May 6, 1990.

Let us go back in time to remember the individuals and organizations that made P.S. 179 a reality. In 1909, the Kensington and Parkville Improvement League started their campaign to procure money for the construction of a new school. Through tireless commitment and unceasing dedication, the league finally gathered together funds to build P.S. 179—the Kensington School.

Upon completion P.S. 179 was said to be the most modern and up to date school in all of greater New York. It accommodated 2,100 pupils and a nurse was always in attendance. Among its feature was an open air classroom with a kitchenette attached for anemic children.

On May 6, 1915, the Kensington school open its doors to Brooklyn's youth. I possessed a full complement of officers and teachers, and students were able to begin work immediately. On hand was Mr. Henry Ludwig, the first principal, and Ms. Clementine Witte, the first assistant principal.

Through the years, P.S. 179 illustrated its commitment to higher learning, not only through education but through its active role in the Brooklyn community. Inspired by the proclamation of President Wilson declaring it to be our patriotic duty to grow vegetables on all available land, P.S. 179 started a community farm surrounding the rest of the community to take part. During World War I, the school planted victory gardens and sold Liberty Bonds, and even hosted a gala bazaar to raise war funds.

Today, P.S. 179 continues its fine tradition. The faculty is committed to enriching children's lives and preparing them to be well-rounded individuals. We can be assured that through their efforts, our youth will strive to reach their full potential. The Kensington school is a model learning institution that should serve as an example to other schools throughout our great Nation.

Mr. Speaker, please join with me in honoring P.S. 179 on its 75th anniversary. The school's dedication to education and its commitment to the Brooklyn community, young and old, has earned our deepest gratutide.

THE SOCIAL SECURITY TRANSITIONAL BENEFIT COMPUTATION ACT

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. MADIGAN. Mr. Speaker, I rise today to urge my colleagues to sign discharge petition No. 4 to the Social Security Transitional Benefit Computation Act of 1989.

Back in 1972, when Congress enacted annual cost-of-living increases for Social Security beneficiaries, it used a formula which mistakenly credited workers for both inflation and wage increases. In an effort to correct the mistake, Congress passed the Social Security amendments on December 15, 1977 which created what is now commonly known as the notch. Notch babies, who now wish to be called notch victims, are those individuals who were born between 1917 and 1921. As a result of the 1977 legislation, these notch babies receive up to $100 a month less in benefits than those beneficiaries born just before them.

The Social Security Transitional Benefit Computation Act would ease this discriminatory difference in benefits by establishing a more gradual 10-year period of transition to the changes in benefit computation rules which were enacted in the 1977 notch amendments. Seven million people are affected by

the 1977 transition formula. Seven million people are receiving lower benefits simply by virtue of the year in which they were born. It is important for all Members of the House to have the opportunity to vote on this issue. Therefore, I urge my colleagues to ease this inequity and join me in signing discharge petition No. 4.

KANSAS TOOLING AND MACHINING INDUSTRY

HON. JAN MEYERS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mrs. MEYERS of Kansas. Mr. Speaker, I am proud to announce that Jose Tomez of Kansas City, MO, an apprentice with A&E Tool & Die Co. of Kansas City, KS, is a regional winner in the National Tooling & Machining Association's [NTMA] 18th Annual Apprentice Contest. A&E Tool & Die Co. is sponsoring Mr. Tomez in the contest.

This conest draws attention to the importance of the tooling and machinery industry to our Nation's economy. This industry is essentially the means of production for our country's manufacturing sector.

The contest is open to all fourth year apprentices employed by NTMA member companies. Finalists in the contest are among the very best in the tooling and machining industry. With a shortage of skilled tool and diemakers, Jose Tomez' skills will be greatly appreciated in an industry which generates annual sales in excess of $20 billion.

Mr. Tomez is competing with 13 other regional winners throughout the United States in the finals competition currently being held in Meadville, PA. I welcome Mr. Tomez' specialized skills in the tooling and machining industry, and would like to take this opportunity to wish him well in the competition.

SALUTE TO THE UNIVERSITY OF WISCONSIN BADGERS 1990 NCAA HOCKEY CHAMPIONS

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. MOODY. Mr. Speaker, I am privileged to honor the University of Wisconsin Badger Hockey Team who defeated Colgate University 7 to 3 this past weekend to win the 1990 NCAA Hockey National Championship.

Coach Jeff Sauer's squad displayed incredible poise and skill in bringing home the Badger's fifth national championship in 17 years. Skating to the cry of "Drive for Five," the Badgers also won the 1990 Western Collegiate Hockey Association regular season and playoff titles.

Wisconsin was led by seniors John Byce, Rob Mendel, Mark Osiecki, Steve Rohlik, Tom Sagissor, Gary Shuchuck, and Chris Tancil, Other members of the national championship team include Sean Hill, Doug McDonald, Barry Richter, Rob Andringa, Dennis Snedden, Don Granato, John Parker, Brett Kurtz, Tray Tuomie, Roger Sykes, Jon Helgeson, Chris Nelson, Duane Derksen, Jason Francisco, Jon Michelizzi, and Matt Glaesman. I congratulate these fine players, as well as Coach Sauer, assistant coaches Mike Kemp, Peter Johnson, Ian Perrin, Bill Howard, and Athletic Director Pat Richter.

The Badgers used a ferocious defense and an aggressive, crisp passing offensive to treat the thousands of Badger fans to an exciting and rewarding year. These student athletes have displayed the talent and class to rank as one of college hockey's alltime great teams.

Mr. Speaker, I join the greatest hockey fans in the world and Wisconsin alumni throughout the country in saluting this truly outstanding collegiate team.

MARX LEVA CELEBRATES 75TH BIRTHDAY

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. LEHMAN of Florida. Mr. Speaker, for over 50 years, my cousin, Marx Leva, has been a quiet, effective force in this city. On the occasion of his 75th birthday, I thought it would be appropriate to briefly review a few of the highlights of this remarkable man's life.

Marx Leva was born in Selma, AL, where he established a perfect academic record through high school. He studied at the University of Alabama, where he distinguished himself. As a native of Selma myself, I can say that in those days opportunities in our hometown were limited. Marx set high goals for himself, however, and he achieved them. He graduated from Harvard Law School, where he made Law Review, and clerked for Supreme Court Justice Hugo Black.

During World War II, Marx served his country ably and honorably, first on the War Production Board and later as a naval officer facing combat in the Mediterranean Sea. He later served as an aide to General Eisenhower and Admiral Forestal, and he was the principal author of the Reunification Act. He also served as Assistant Secretary of Defense. Since that time, he has been a successful Washington attorney.

Mr. Speaker, I know my colleagues join me, his family and friends in extending our warmest congratulations to Marx Leva on his 75th birthday.

WHAT DOES IT COST TAXPAYERS?

HON. JIM LIGHTFOOT

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. LIGHTFOOT. Mr. Speaker, have you ever wondered how much each new spending bill would cost per taxpayer? Would taxpayers be so supportive of new spending programs if they knew that it would cost them personally?

For example, H.R. 3, the new child care bill, is estimated to have a price tag of nearly $30 billion. That breaks down to $83.36 per individual taxpayer. That amount may seem insignificant, but when coupled with other new expenditures Congress has or will pass, the taxpayers' tab begins to add up.

That's why I have introduced a resolution to amend the rules of the House to require the committee report on every bill authorizing or appropriating funds to list a cost estimate of the bill per taxpayer.

The resolution would take effect at the beginning of the next Congress and cost estimates would be based on the most recent year's figures. The report would be required to give a cost estimate for the first 3 years following a bill's enactment, based on the current estimate of the number of taxpayers.

I hope my colleagues will join me in the effort to restore some perspective to the new spending bills this body continues to approve without giving consideration to the cost to the taxpayers to this country.

THE REVITALIZATION OF EAST FALLS

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. GRAY. Mr. Speaker, I rise today to pay tribute to the revitalization of a very old landmark in East Falls, one of Philadelphia's historic neighborhoods.

Just a few minutes from center city Philadelphia, nestled inside a scenic spot right along the Schuylkill River, East Falls nonetheless seems like a world apart. With its gently rolling hills, its gracious houses, and its stately mansions, this charming neighborhood has a style, texture, and flavor all its own.

And yet, East Falls is an important part of the fabric of the city and its history. Ridge Avenue itself was once a well-traveled path of the Lenni Lenape Indians. During the Revolutionary War, George Washington's Army camped on the site of the Queen Lane Reservoir, and Lafayette set up his own headquarters on what is now McMichael Park. And in 1808, the Nation's first kindergarten opened on Midvale Avenue in East Falls.

The community boasts more than its share of prominent citizens, both past and present. They include Senators, council people, several former mayors, and Thomas Mifflin, a signer of the Constitution. Olympic sculling champion and businessman John B. Kelly lived and raised his family here and it was at the Liberty Theater that his daughter Grace, the Princess of Monaco, first caught the admiration of her public.

During Philadelphia's heyday as a great industrial city and a center for the textile trade, East Falls was home of Dobson's Textile Mill. The largest individually owned producer of woolens in the United States, Dobson's made rugs, upholstery fabrics, and other goods for an international market. A grateful Union Army kept itself warm in blankets made at this East Falls landmark.

Now, only the buildings of the mill remain—10 handsome, solid structures of native Wissahickon schist, recently nominated for landmark status on the National Register of His-

toric Places. But they will once again be an integral part of the vitality of the neighborhood. Thanks to vision and innovation, the Dobson's Mill, with the 13 surrounding acres will be transformed into a site which will include 300 residences and commercial space. The architectural integrity of the existing buildings will be preserved and this part of East Falls will again be alive with residents and commerce.

Please join me in applauding this historic rebirth.

MOUNT WASHINGTON CELEBRATES ITS 55TH YEAR OF ASSOCIATION WITH THE NATIONAL WEATHER SERVICE

HON. CHUCK DOUGLAS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. DOUGLAS. Mr. Speaker, April 1990, will mark the 55th year of Mount Washington's direct association with the Weather Service of the U.S. This partnership has been a valuable and productive asset in the forecasting of the weather.

The history of the Mount Washington Observatory is intertwined with the measuring and experimenting of the weather. The first Government interest in the mountain occured in 1870. The U.S. Army Signal Corps recognized the value of Mount Washington and established a year-round occupation of the summit in order to observe and forecast the weather. This Army post lasted until 1892, on a year-round basis, and continued until 1896, as a summer observation post.

In 1934, the Government's interest in the mountain was reborn as a result of a 231 mile-per-hour wind, the highest surface wind velocity ever recorded, prompting the U.S. Weather Bureau to establish its office on the mountain in 1935. The Government's personnel was later replaced in the 1950's by the observatory's own staff.

The mountain was also found to be useful during World War II as research was performed there on aircraft icing. The discoveries made there helped make modern air travel safer.

Today, the Mount Washington Observatory still serves as a invaluable asset for the National Weather Service and as a major tourist attraction. The facility reports eight times daily on synoptic and airways observations using the standard NWS procedure for forecasting on climatological purposes. These services are performed for an annual fee of only $23,000, which is less than half the salary of a single forecaster.

The observatory also fills many other vital functions such as initiating its own research, and performing research for government and for private contractors. The research performed at the facility ranges from experiments in radio propagation, to investigations into aspects of cloud physics. Annually, the laboratory participates in the Cold Regions Research Programs and Environmental Laboratories in Hanover, NH.

The observatory complements its scientific value by being the repository for historical artifacts of the White Mountain region. This along with its proven research capabilities makes Mount Washington worthy of honoring its 55th year of direct association with the Weather Service of the United States.

RESTORE LOCAL PROGRAMMING

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. GUNDERSON. Mr. Speaker, the talk around local coffee shops in a few small communities in rural western Wisconsin has not been so much about the Federal deficit or the remarkable changes in Eastern Europe—but instead the spotlight over the last few months has centered around the loss of programming on local cable television.

The problem began on January 1, 1990, when the new syndicated exclusivity—syndex—and modified network nonduplication rules went into effect. The rules essentially allow all commercial television stations licensed to a television market which is within the geographic zone within which the television is entitled to enforce its exclusivity rights, regardless of whether they are carried on the cable system, to request syndex blackout protection. Thus, all duplicating programming carried over a cable system must, if requested, be blacked out. A geographic zone is anything within a 35-mile radius.

Concurrent with its new syndex rules, the FCC modified its rules on nonduplication of network programming. Local television stations may require a cable community unit, located in whole or in part within the geographic zone for a network program, to delete duplicative network programming broadcast by distant stations.

The FCC rules were not intended to result in blackout or disconnection of local broadcasts. One of the primary objectives of these communities' initial franchising requirements was to ensure that local or Wisconsin broadcasts would be carried to the greatest extent possible over their cable systems. Yet the law has forced one cable company to drop its three western Wisconsin network affiliates. Now those subscribers must get network shows from Minnesota television stations. As you might expect, many local cable TV subscribers are up in arms, and rightly so, by the enforcement of this law which has resulted in the loss of Wisconsin programming.

The deletion of these channels has already resulted in the loss of subscribers to the local cable system. It is further expected that the loss of these channels will have an adverse impact upon city franchise fees and local business revenues since local business will lose an important source of advertising. Further, the residents of these communities no longer have access to broadcast channels with a strictly Wisconsin identity.

On one final note, I received a letter from a Mrs. Kathryn Thalacker, from Hudson, WI, that I would like to share with you. Mrs. Thalacker wrote,

Congressman Gunderson, please, help this area have access to all the Wisconsin television possible. Please, help keep us knowledgeable about our State's political scene. Please, help us become familiar with our State's leaders when running for office * * * and please, do all you can to keep citizens west of the Knapp Hill informed, interested Wisconsinites.

Mr. Speaker, I do intend to help. Today, I am introducing legislation that would require the Federal Communications Commission to amend the syndicated exclusivity and network nonduplication rules to protect the community of one State that falls in the primary market of a broadcaster located in another State, if that local community represents less than 1 percent of the total viewing audience of the area of dominant influence of such a broadcaster.

I encourage my colleagues to join me in helping to alleviate this injustice since surely the syndex and nonduplication rules did not intend for this to happen.

TRIBUTE TO A.C. LYLES

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. WAXMAN. Mr. Speaker, I rise today to congratulate Mr. A.C. Lyles on his receipt of the Boy Scouts of America Jimmy Stewart Good Turn Award.

A.C. is truly a self-made man. He began with Paramount Pictures 50 years ago distributing bumper stickers and handbills for the Florida Theater. A.C. later worked his way up to become head of his own production unit at Paramount.

Mr. Lyles has lead a varied, interesting life. Through the years he has received many honors. Some of those highlights include: In 1966, he was awarded, along with John Wayne, the famous Golden Spurs Award for his work producing westerns. In 1984, then-President Ronald Reagan presented him with the George Washington Award of the Freedoms Foundation. Lyles was also appointed by Reagan to the national board of ACTION, the Federal domestic volunteer agency, and to the President's Advisory Council on Private Sector Initiatives.

Mr. Speaker, A.C. Lyles is vibrant proof that the American dream is alive and well. I congratulate him on his extraordinary accomplishments and the Boys Scouts for their choosing such a deserving awardee.

NATIONAL OCCUPATIONAL SAFETY AWARENESS WEEK

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. GEJDENSON. Mr. Speaker, today I have introduced legislation that would designate September 16–23, 1990, as National Occupational Safety Awareness Week.

More than 6.4 million occupational injuries and illnesses are reported each year. Nearly one-half of these injuries were serious enough

for the worker to have lost work time or to have experienced restricted work activity. Furthermore, these cases resulted in approximately 54 million lost work days in 1988 alone. These numbers reflect an alarming upward trend in on-the-job injuries and illnesses that has occured in last several years. In 1987, the Bureau of Labor Statistics [BLS] estimated that injury and illness incident rates climbed from 7.9 percent to 8.3 percent. In 1988, the BLS statistics show yet another increase from 8.3 percent to 8.6 percent.

This legislation has been widely endorsed by the International Association of Industrial Accident Boards and Commissions. I urge my colleagues to cosponsor National Occupational Safety Awareness Week and bring attention to the importance of on-the-job safety for both employees and employers. Prevention of work-related crises through safety awareness can have a substantial impact on the Nation's safety and health picture.

TRIBUTE TO DR. WILLIAM WARFIELD

HON. TERRY L. BRUCE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. BRUCE. Mr. Speaker, I rise today to honor Dr. William Warfield, a distinguished performer and professor of music at the University of Illinois at Urbana-Champaign. In May of this year, this fine musician and academician will retire from full time teaching.

William Warfield was born on January 22, 1920, and began to develop his musical appreciation and talents at the early age. A young admirer of the singing of Paul Robeson and the artistry of Marian Anderson, Dr. Warfield remembers singing "Deep River" before a school assembly and first experiencing the marvelous feeling of accepting his audience's applause.

At the age of 18, he won first place in the National Music Educators League competition and a scholarship to the Eastman School of Music. After earning his bachelor's degree in 1942, he entered the military and served in the intelligence unit, making use of his fluency in Italian, French, and German. With the end of World War II, he returned to the Eastman School and completed his master's degree.

William Warfield's wide range of professional performances include an appearance in the broadway show, "Call Me Mister," in 1947 and his Town Hall debut recital in 1950. In 1951, he played the role of Joe in Jerome Kern's "Showboat," and his rendition of "Old Man River" became an immediate sensation. He first performed what would become one of his most memorable roles, that of Porgy in "Porgy and Bess," in 1952. Since that time, Dr. Warfield's pursuits have taken him all over the world, and he has appeared as a guest artist in numerous international festivals.

His talents have gone unrecognized as his awards include an alumni citation from the Eastman School of Music, an honorary doctorate from the University of Arkansas, and a Grammy Award in 1984 for his narration of Copeland's Lincoln Portrait.

In 1974, William Warfield accepted a position on the faculty of the University of Illinois School of Music, where he presently presides as division chair. His contributions to young musicians as teacher and mentor have endeared him to thousands of students and he is held in high regard by all with whom he has worked and performed.

I would like to take this opportunity to wish him the best during his retirement and thank him on behalf of the Urbana-Champaign community that has greatly benefited from his love of music.

IN RECOGNITION OF 100 YEARS OF SUCCESSFUL BUSINESS

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. GEKAS. Mr. Speaker, I ask my colleagues to join me in congratulating a local business in my congressional district upon its 100th anniversary.

Millers Mutual Insurance Co., was founded in Harrisburg on March 26, 1890, by a locally organized group of flour and grain millers. As a "mutual plan" insurer, the company was owned by its policyholders. That tradition continues to this day. Also continuing to this day is Millers' reliance on the basic principles on which it was founded.

Millers employs 88 people, has 350 independent agents in the middle Atlantic region and provides special agri-business risk management services in 36 States.

Mr. Speaker, our country was founded on farming and agriculture. The values of this industry—hard work, quality production, and love of the land—are fortunately still with us as we enter the 21st century. By insuring agricultural properties, Millers provides Pennsylvanians with a vital service—it allows our farmers to go about their important work without fear of a disaster wiping out their savings. Thus, Millers helps preserve those values so dear to Pennsylvanians and all Americans.

I congratulate Millers Mutual Insurance Co., on work well done.

GREAT LAKES SHIPPING AND MARITIME PRIORITIES FOR THE 101ST CONGRESS

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. DAVIS. Mr. Speaker, the Great Lakes is important to the shipping and maritime segment of the national economy. Recently, the 1990 Seaway Review Magazine included an article on this subject entitled, "Identifying Shipping and Maritime Priorities," authored by Timothy A. Mohler, chairman of the Great Lakes Task Force. In that article he reports on Great Lakes priorities and the work of both the Great Lakes Task Force and the Great Lakes Commission. I thought it would be a service to relate their concern today.

Specifically, the article points out that Great Lakes transportation has been the foundation on which the regional and national manufacturing economies were built. Industrial activity will change over time as new products and markets are developed. Economic growth is subject to periodic cycles. The Great Lakes shipping industry as part of this dynamic economy adjusts as circumstances require and anticipates future challenges and opportunities.

The Great Lakes Task Force is a voice for the shipping and maritime interests in that region. The principal message of the task force is a clear and concise articulation of policy priorities aimed at protecting this valuable economic sector and improving its performance. I am pleased to be able to highlight and support these priorities. These priorities include steel import relief, Soo Lock and connecting channel construction, domestic cabotage law compliance, enactment of Great Lakes set-aside, enforcement of other preferences for government cargoes, appropriate dredging material disposal, shipbuilding enhancement, rejection of Coast Guard user fees, and icebreaker *Mackinaw* modernization.

A brief background on what these organizations are may be useful. The Great Lakes Task Force membership include various port, union, and maritime industry organizations. The Great Lakes Commission, an eight-State compact agency, provides support services to the task force. The task force was organized 20 years ago in response to congressional concern over conflicting views and requests from the region's maritime and shipping interests. Thus, the Great Lakes Task Force provides a valuable forum for the individual organizations to openly and thoroughly discuss these issues. When agreement is reached, the Great Lakes Task Force speaks for a united body of maritime and shipping interests.

This week in its annual meeting in Washington, DC, Mr. Mohler identified and reported on the Great Lakes Task Force legislative priorities for this Congress. Although those of us who represent the Great Lakes region are keenly aware of these priorities, I thought it would be helpful to include in the RECORD the Great Lakes Task Force Report to the 101st Congress regarding these legislative priorities. I urge all of my colleagues to read this report carefully and thoughtfully as it bears importance for the entire U.S. economy. The complete text of that report follows:

LEGISLATIVE PRIORITIES—GREAT LAKES TASK FORCE REPORT TO THE 101ST CONGRESS

The Great Lakes Task Force provides a voice for the maritime and shipping interests in the Great Lakes region, identifying and articulating legislative priorities of the region for both federal and state legislators. Task Force membership includes various port, union and maritime industry organizations. The Great Lakes Commission, an eight-state compact agency, provides secretariat services to the Task Force.

THE REGION

The region of interest to the Task Force comprises the North Central portion of the United States which bounds the Great Lakes along with western sections of Pennsylvania and New York and northern Minnesota. The hinterland served by Great Lakes ports extends west through Montana, south through Missouri and Kentucky and

includes several Canadian provinces to the north. The Great Lakes states comprise less than one-sixth of the land area of the continental U.S., yet account for one-third of the country's population and over 40 percent of the value of U.S. manufactured goods.

STEEL IMPORT RELIEF

The Great Lakes Task Force urges Congress to support extension of the Voluntary Restraint Arrangement (VRA) program for steel imports. The VRA program, initiated by the President in 1984, involves the negotiation of bilateral agreements with major steel exporting countries. The goal of the program is to reduce annual imports of finished steel products to 18.5 percent of the U.S. market for a five-year period and to reduce annual imports of semi-finished steel to 1.7 million tons.

The Steel VRA Program will expire in September 1989 unless it is extended. The unfair trade practices of steel exporting countries which prompted the VRA program have not been eliminated. Excess foreign capacity in steel production, a principal factor in spurring the rise in imports remains, although some countries have begun to rationalize their industries. The current VRAs have been successful in reducing imports but because of a slow program start-up and no agreements with certain key export countries, import volumes for the five-year (1985-1989) period will be higher than expected.

The domestic steel industry is still vulnerable to an uncontrolled influx of foreign steel and the current steel recovery with its vast modernization and reinvestment schedule will be jeopardized without VRA program continuation. Implementation of new steel import restraint legislation will provide for increased purchases of domestic steel, increased profitability for steel producers, additional funds for capital investment by steel producers and stabilized employment in the steel industry.

SOO LOCKS AND CONNECTING CHANNELS

The need for a second large lock at Sault Ste. Marie, Michigan is widely recognized within the Great Lakes region and in Congress. Authorization for a new large lock was contained in P.L. 99-662, the Water Resources Development Act of 1986.

In the Great Lakes, 40 percent of the U.S. bulk cargo fleet is restricted to the existing Poe Lock because of vessel length and/or beam dimensions. These 29 lake carriers also represent two-thirds of fleet carrying capacity.

The proposed new lock would be designed to replace two old and outmoded smaller locks. Justification for lock construction is based on the need to maintain efficient lock operations and to reduce the risk of dependency on the existing large lock. In addition, the Soo Lock's importance in serving the nation's steel industry and hence its role in national defense is an acknowledged fact.

Channel modifications for the Great Lakes connecting channels such as those changes proposed for the upper St. Marys River and the planned Soo Locks construction are subject to cost share provisions of P.L. 99-662. Although the replacement lock was originally proposed as a 100 percent federally funded project, conference committees action resulted in a 25 percent non-federal share (during construction) and 10 percent non-federal share (over 30 years) requirement. At an estimated $240 million cost for the new lock, the non-federal share amounts to over $84 million.

The Great Lakes Task Force urges Congress to appropriate funds for a replacement lock at Sault Ste. Marie, Michigan and for necessary connecting channel improvements. These waterways and the Soo Locks complex serve international navigation and Canadian lake carriers are a major beneficiary. The cost share plan for related new construction could discriminate against U.S. commercial navigation and would certainly create financial difficulties for the U.S. iron ore and steel industries. Also, grain exports by North American producers would be handicapped.

The Jones Act refers generally to U.S. law that governs domestic transportation of goods and passengers by water. Section 27 of the Merchant Marine Act of 1920 requires that such transportation between U.S. points must be in U.S.-built and U.S. citizen-owned vessels that are Coast Guard documented. The Jones Act and other cabotage laws were enacted to protect and foster the United States-flag merchant marine.

The Great Lakes Task Force strongly opposes any action that would weaken the Jones Act or change its purpose and scope. Particular reflagging measures which relate to national security situations or circumstances requiring short-term response are not inconsistent with the Task Force position.

Protection of the Jones Act goes along with measures intended to strengthen the merchant marine. The Great Lakes Task Force acknowledges the work of the Commission on Merchant Marine and Defense. The Commission, created in 1986, has conducted an intensive review of the U.S. flag shipping industry and its vital connection with military preparedness. The Commission's final report with recommendations and an action strategy was presented to the President in February 1989 and should be considered by the new administration and the 101st Congress. However, those recommendations pertaining to a 100 percent cargo preference requirement for foreign and cargo, including P.L. 480 shipments, are not supported by certain Great Lakes port and terminal interests.

A serious threat to the Jones Act developed during negotiations on the U.S./Canada Free Trade Agreement (FTA). Canadian maritime interests wanted access to U.S.-protected shipping, but Congressional opposition influenced negotiations and FTA provisions were revised accordingly. However, continued vigilance is needed to ensure that future U.S./Canada trade matters do not harm the U.S. maritime industry.

The Canadian situation is of particular interest to the Great Lakes Task Force because nearly all waterborne trade between the U.S. and Canada on the Great Lakes is carried by Canadian vessels. In 1986, the General Accounting Office reported on this situation, identifying the reasons for the staggering imbalance. Shipbuilding subsidies and favorable tax rules for Canadian operators stand out among the major reasons why nearly all cross-lake trade is delivered on Canadian bottoms. As is demonstrated by the Canadian shipping case. U.S. carriers are sometimes at a disadvantage and the Jones Act affords needed protection for the domestic maritime commerce of the United States.

U.S. FLAG SHIPPING ON THE GREAT LAKES

The Great Lakes are now without any U.S. flag liner service after years of such service. This is a difficult situation and is a major obstacle in securing government preference cargoes for Great Lakes ports. The lack of U.S. flag service may jeopardize future P.L. 480 Food for Peace shipments. The December 31, 1989 expiration of the Great Lakes P.L. 480 set-aside as provided for in the 1985 Omnibus Farm Bill will exacerbate the region's problem with this commodity category.

Without U.S. flag overseas vessels, the possibility of military household and equipment shipments is eliminated. Preference cargoes entail significant dockside labor. When U.S. vessels are used shipboard labor requirements help maintain the Merchant Marine and provide trained seamen for possible duty in times of national emergency.

The Great Lakes Task Force urges legislators to encourage the expansion of U.S.-flag vessel service in the Great Lakes as one method of solving this problem. A waiver of the three-year wait requirement for reflagged vessels to carry non-military preference cargo would help to reduce the problem. Also, the establishment of a military "outport" at a Great Lakes port irrespective of current cargo flows could induce new U.S. flag service for the region.

DREDGING AND CONFINED DISPOSAL FACILITIES

The Great Lakes Task Force recognizes the important contribution that confined disposal facilities (CDFs) for dredged material have made to Great Lakes commercial navigation and improving water quality. There is a long-term need for commercial harbor dredging in the Great Lakes along with a means to dispose of dredged material in an appropriate manner. Under the existing CDF authorizing legislation (Section 123, P.L. 91-611), 26 CDFs have been built in the Great Lakes since 1970 and several are under construction or are planned. The prevalence and persistence of contaminated sediments in many Great Lakes commercial harbors coupled with a government policy aimed at protecting water quality and enhancing commercial navigation focuses attention on dredging activities and their impact on the environment.

As CDF filling progresses, the need for additional sites for particular project areas will arise. In the next several years, the need will increase—over half of the CDFs will be full (original design capacity) by 1993. Current Corps policy indicates that any new CDFs for an existing commercial navigation project will be constructed under prior project authority which in some cases may entail a substantial non-federal cost share. The Task Force supports the need for a General Accounting Office study of the Great Lakes CDF program to assess potential non-federal cost share issues for new CDFs.

GREAT LAKES SHIPBUILDING

An integral part of the Great Lakes maritime infrastructure is the region's shipbuilding and repair industry. The industry is comprised of several major and numerous smaller yards and "topside" repair facilities. They contribute not only to the economic vitality of the region and the nation but to national security as well.

The economic benefits generated by the Great Lakes shipbuilding and repair industry include the thousands of jobs in the major yards, in allied supplier industries and ship docking firms serving the deep-draft bulkers calling at the yards for repairs. For instance, a study prepared by International Maritime Associates determined that $130 million in repair and maintenance work for the U.S. Great Lakes bulk fleet would be generated between 1987 and 1991. That amount does not include repair and maintenance revenue generated by dredges, tugs, barges and passenger/excur-

sion vessels which would accrue to smaller facilities on the Great Lakes.

The economic benefits of those revenues may be reduced in the future, however, because of the Free Trade Agreement signed between the United States and Canada. The FTA's tariff provisions mandate a ten-year phaseout of the 50 percent ad valorem customs fee on non-emergency vessel repairs performed in Canadian yards. Coupled with the advantages of the currency exchange rate and government-paid health benefit costs, the repeal of the 50 percent ad valorem fee will give the Canadian shipbuilding industry an advantage over its U.S. counterpart on the Great Lakes.

The Great Lakes shipbuilding base is a proven, cost effective and reliable national security asset. From the construction of submarines during World War II to the building of minesweepers essential for operations such as those conducted in the Persian Gulf, the shipyards on the Great Lakes have contributed greatly to naval shipbuilding needs. To preserve this asset, the Department of Defense must let shipbuilding contracts of levels at which shipyards can make reasonable profits and must also seek means to provide work to the regional shipbuilding base on the Great Lakes.

COAST GUARD USER CHARGES

The 100th Congress rejected United States Coast Guard (USCG) user charges and should be commended for its opposition to yet another potential burden for the Great Lakes maritime industry. However, new user charge proposals may be forthcoming.

The Great Lakes Task Force is opposed to Coast Guard user charges because they are, in plain terms, nothing more than additional taxes on the maritime industry. The "services" to be covered by such user charges benefit other interests as much, if not more, than the maritime industry. To make ship owners, port authorities, and seamen pick up the tab for Coast Guard activities such as vessel and terminal inspection, licensing of maritime personnel and domestic icebreaking would be unfair. For example, aids to navigation, for all appearances a purely maritime function, are maintained just as much to protect life, environment, and property. Coast Guard icebreakers play an important role in flood control as well as keeping navigation lanes open during the winter freeze-up and spring break-up.

The factor of additional costs attributed to user fees cannot be overlooked. The competition between transportation modes often boils down to pennies per ton. Even a minimal fee for Coast Guard services could divert cargo from the Great Lakes.

The Coast Guard's current role requires continued full federal funding. Whereas the USCG was almost totally oriented to commercial safety and regulation, the organization now is an integral part of our national defense capability, heavily engaged in drug interdiction and committed to environmental protection. Even the traditional commercial assistance functions are multi-mission. The Coast Guard's budget must come from general revenues now more than ever. We ask Congress to continue to fund the Coast Guard from general revenues and to oppose Coast Guard user charges.

SAVE THE "MACKINAW"

In early 1988 the U.S. Coast Guard announced a series of budget reduction measures including the deactivation of the Great Lakes icebreaker *Mackinaw.* The 290-foot, high-powered vessel was relegated to "caretaker" status after the spring ice season.

The *Mackinaw* has provided exceptional ice-breaking service to commercial navigation and has been invaluable in thwarting ice jams and related flooding along the Great Lakes connecting channels. The vessel is the only Great Lakes-stationed U.S. Coast Guard vessel capable of breaking heavy ice and operating on multiple day missions. Without the *Mackinaw.* U.S. commercial shipping could lose its competitive position and the Great Lakes region would also suffer.

Recent budget support will allow the *Mackinaw* to operate during the 1989 spring ice season but continuing budget problems may result in permanent retirement of the valuable vessel. The vessel's relatively large complement of shipboard personnel results in sizable outlays. Great Lakes maritime interests have proposed a modernization program for the *Mackinaw* that would permit it to operate more efficiently and with fewer sailors. The Great Lakes Task Force urges Congress to provide sufficient funds to modernize the *Mackinaw.*

ATHLETES AND SCHOLARS AT DUNBAR SENIOR HIGH SCHOOL

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. FAUNTROY. Mr. Speaker, it is a great honor for me to bring to your attention, and to the attention of all Members of the House, a most distinguished group of young athletes and scholars—superstars, all of them, attending Dunbar Senior High School in the District of Columbia.

All of us can be proud of the special achievements of these young students, their faculty, and their coaches. I am especially proud at this moment as I pay tribute to their achievements at Dunbar Senior High School, my high school alma mater.

ATHLETES

The boys varsity basketball team, 1989–90 season, has had a record of 34 wins and 3 losses. Among many honors and titles, they have been named "1990 City Champions," "1990 Interhigh League Champions," and "1989 Kingdom of the Sun Champions, Ocala, Florida."

CRIMSON TIDE ROSTER

Name	No.	Height	Weight	Class
Damon Singletary	10	6'3"	175	Junior.
Jermaine Brown	11	5'7"	140	Sophomore.
Romeo Roach	12	5'4"	160	Junior.
Deon Murray	13	6'1"	155	Senior.
Cedric McFadden	14	6'2"	170	Senior.
Johnny Rhodes	15	6'4"	170	Junior.
James Marshall	21	6'6"	210	Junior.
Kenyatta Massey	22	6'7"	210	Senior.
James Berry	24	6'4"	200	Junior.
Jerome Logan	25	6'10"	215	Senior.
James Washington	31	6'8"	220	Junior.
Michael Smith	32	6'8"	210	Senior.

Head coach: Michael A. McLeese.

Assistant coaches: Truhan McCray and Lafayette Mosely.

Scorekeeper: Angela Washington.

Video coordinator: Clifford N. Gibbs.

Managers: Rodney Williams and Marissa Holley.

Trainer: Fred Mathis.

Athletic administrator: Robert T. Graves.

Athletic director: Clarence E. Bell.

Individual honors: Washington Post "All Metropolitan and All Interhigh"—Michael Smith and Deon Murray.

Super Star News "All Washington"—Michael Smith, Deon Murray, and James Marshall. This is but a small number of the individual awards received by these gifted young athletes.

SCHOLARS

Scholarship at Dunbar Senior High School has always been of the highest calibre, with faculty and students sharing a sense of intellectual adventure, creativity, and accomplishment.

By way of paying tribute to these high standards, I am proud to commend the following students who began this year with at least a 3.3 grade-point average: LaRon Adams, Crystal Baker, LaTonia Boyd, Tawana Brock, Zebuion Brooks, Joseph Brown, Melissa Calhoun, Lisa Debysingh, Cherie Edelin, Nigel Ennels, LaShawn Franklin, Dwayne French, Tanya Headley, Michelle Herriott, Darchelle Jackson, Paulette Jackson, Veronica Jenkins, Derrick Johnson, Robin Kearnery, Nkeisha Maddox, Nicole Mighty, Milton Mooya, Jasmine Myers, Loretta Page, Lorenzo Paige, Kimberly Parker, Stephen Reeves, Marcia Robinson, Sheryl Robinson, Melanie Routh, Sharmella Simpson, Katina Shoulars, Keena Simon, Damon Singletary, Marcus Spells, Harriette Whorley, Lary Wydor, Sharnita Young.

Faith Baker and Shawn Chase began this school year with a 4.0 grade-point average.

Jasmine Myers was a National Achievement Scholarship Program semifinalist and commended in the 1990 National Merit Scholarship Program. Melisse Calhoun, Danique Fields, Brian Givens, and Benjamin Tett were commended National Scholars.

Tanya Headley was United States Ambassador to Israel, and Kimberly Parker has been selected to be a participant in the NBC Washington Minority Youth Training Program. Danique Fields participated in the Minority Introduction to Engineering Program at the Coast Guard Academy in New London, CT during July.

There were special honors earned in the foreign languages—Arabic, Latin, Italian, and Spanish, and in the science fair.

I want to pay special tribute to the leadership and guidance of Principal Eva R. Rousseau in keeping Dunbar Senior High School a beacon of light and learning. As citizens of Washington, DC, as parents, we thank you and your faculty for your inspired work with our young people.

A TRIBUTE TO ST. AGATHA'S SENIOR CITIZENS CENTER

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the new officers of the St. Agatha's Senior Citizens Center in Woonsocket, RI.

The president of St. Agatha's Center will be Stanley Czarn while the seat of vice president will be shared by Eddie Horrax and Lucille McDonald. Hazel Lafleur will be the secretary, and Doris Robidoux will fill the role of treasurer.

I would like to wish my best to the new officers of St. Agatha's Senior Center and hope that they continue to create a spirit of love for their 270 enthusiastic members. Their dedicaiton to the center is a testament to their unselfish devotion and desire to maintain an active organization for their fellow members.

RETIREMENT OF MAYOR DENNIS R. FELLOWS

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. TORRES. Mr. Speaker, I rise today to ask my colleagues to join me in recognizing Mayor Dennis R. Fellows of the city of Artesia. Mayor Dennis R. Fellows was first elected to the city council in 1974. He has held the office of mayor four times in his 16 years of service to the city of Artesia: 1976, 1981, and 1989.

The mayor is presently the city's representative to the Los Angeles County City Selection Committee; a director of two county sanitation districts; and is the city's representative to the U.S. Conference of Mayors. Mr. Fellows has served at various times on the City Finance Committee, the City Industrial/Commercial Development Committee, the City Law Enforcement Committee, director of Sister City Committee, and delegate for the Southern California Rapid Transit District.

Mr. Fellows is active in other organizations in the city of Artesia. He serves as treasurer of the Concordia Lutheran Church, is a member of the Lion's Club, participates in chamber of commerce events, and has been a member of the Rotary Club.

Mr. Fellows is an accountant for the firm of Soeteway & Dykstra. He attended the University of Wisconsin and California State University. He and his wife, Jo Ann have two daughters, Lisa and Kathy. The family became residents for Artesia in 1972.

Mr. Speaker on April 17, 1990, Mayor Dennis R. Fellows will retire as a member of the Artesia City Council after dedicating 16 years of loyal service. He has given his time unselfishly to the people and community of Artesia. His contributions will be remembered and his presence will be missed. I wish him good luck on a well deserved retirement.

INTRODUCTION OF H.R. 4457 "THE CORPORATE AND INDIVIDUAL INCOME TAX SYSTEMS INTEGRATION ACT OF 1990"

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. VANDER JAGT. Mr. Speaker, today I am introducing H.R. 4457, the "Corporate and Individual Income Tax Systems Integration Act of 1990."

In part because of the bias toward debt under our tax system, corporate debt levels today are at record levels. U.S. corporations are awash in debt, because capital raised in the form of debt leads to deductible interest payments for the corporation, whereas dividends paid on a corporation's equity are not deductible. These basic tax rules have resulted in a multitude of leveraged buy-outs over the past few years, and, as we see today, numerous bankruptcies and debt restructurings. The potential risks inherent in the current situation of higher debt levels for our financial institutions should be apparent. Likewise, concerns on the part of the Federal Government as both the regulator of financial institutions and as the deposit insurer must be increasing. The thrift crisis which we are in the process of addressing only serves to underscore this point.

It is time to consider whether a basic change in our tax system should be made to remove the bias toward debt financing over equity financing. The best way to neutralize the current bias toward debt financing is by implementing an integrated tax system between the corporate and individual taxpaying levels. Integrating the tax system in the way proposed in H.R. 4457 would encourage corporations to raise capital by issuing stock rather than debt.

The United States is one of the few major Western trading nations that does not have some form of integration between the corporate and individual tax systems. Given the trends in the globalization of finance, integration could help given our institutions a more level competitive playing field, and cheaper sources of capital.

H.R. 4457 accomplishes these goals by grossing-up—by the amount of the corporate tax—amounts distributed to equity holders and debt holders of a corporation. The grossed-up amount—the actual amount received, plus the corporate tax—would be includable in the receipt's gross income, but would carry with it a tax credit equal to the amount of tax paid at the corporate level with respect to the distribution.

As a consequence, corporate earnings distributed to equity holders and debt holders would be taxed at the 14-percent marginal rate at the corporate level. The tax would be in the form of the withholding tax, which could be credited against the income tax liability of the recipient of distributions from the corporation.

The benefits of H.R. 4457 are obvious:

First, it would move the current U.S. tax system toward one that was fully integrated between the corporate and individual levels. Second, it would significantly reduce the incentive to design corporate capital structures wtih heavy amounts of debt, because the treatment of debt and equity would be basically comparable. Third, significant compliance improvement with respect to the taxation of dividends and interest and could be realized, because taxes on both those forms of income would be collected at the corporate level, rather than the individual level.

Improvements in compliance would help to offset the ostensible revenue loss attributable to enacting this proposal.

I view introduction of this legislation as only one step in a long process whereby the United States would move toward an integrated tax system. Many issues need to be debated and addressed before such a system is enacted. Given both the staggering existing levels of corporate debt and the fact that many of our international competitors have systems of corporate and individual taxation that are integrated, at least partially, I believe that a national debate on this issue should occur, involving many participants from both the public and private sector. I encourage my colleagues to consider H.R. 4457 in this context.

A TRIBUTE TO THE NEWLY ELECTED OFFICERS OF CREPEAU COURT

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the recently elected officers of Crepeau Court in Woonsocket, RI, who were sworn in during their annual Christmas party December 12, 1989.

The president of Crepeau Court will be Florence Charron, while the seat of vice president will be filled by Bernadette Plante. The newly elected Hortense Lamoureux will serve as treasurer and the new recording secretary will be Stella Miszriewicz.

Throughout the year residents of Crepeau Court take part in many social events. Most notable are their St. Patrick's Day, Mother-of-the-Year, and Christmas parties.

I would like to wish my best to the new officers of Crepeau Court and hope that they continue to create a spirit of love within their home. Their dedication is a testament to their unselfish devotion to their fellow tenants.

HONORING FRANCES C. VALENCIA, COMMUNICATION WORKERS OF AMERICA LOCAL 9400

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. TORRES. Mr. Speaker, I rise today to recognize a special individual, Frances C. Valencia, secretary-treasurer of the Communication Workers of America, local 9400 who is retiring after 47 years of working on behalf of

labor. Fran will be honored at a special dinner on Friday, April 13, 1990.

Frances C. Valencia began her career with Pacific Bell as an operator in 1943, that same year she also became a union representative for the Federation of Women Telephone Workers. During the period from 1943 to 1974 she was a district union representative, a member of the FWTW Bargaining Council and vice president. Fran remained a vice president with the Federation of Women Telephone Workers when they affiliated with the Communication Workers of America in 1974 and became secretary/treasurer in 1980. She held that position until her retirement in February, 1990.

Throughout her career, Fran has worked in the community and has been active in the legislative/political action arena. She has volunteered her time and worked on many political campaigns, including my own.

In addition, Fran still found the time to be active in the United Farm Workers activities and the Labor Council for Latin American Advancement [LCLAA]. She held such offices as secretary/treasurer of the State LCLAA, and executive board member of the national LCLAA.

Fran has been honored for her selfless devotion to many causes. She received the CSSE Pueda Award for distinguished service from LCLAA in September, 1985; the 1987 Labor Latino Heritage Award from the Catholic Labor Institute; and was honored by her own CWA National Union in 1986 in recognition for invaluable contributions to her union.

Mr. Speaker, on April 13, 1990, the members of the Communication Workers of America, local 9400 will say farewell to a dynamic and caring individual. I ask my colleagues to join with me in a salute to a fine person and special friend, Frances C. Valencia, for her outstanding record of service to the community and to the working men and women of America. And, we wish her best wishes for a happy retirement.

A TRIBUTE TO ALBERT THOMAS HENLEY

HON. NORMAN Y. MINETA

OF CALIFORNIA

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. MINETA. Mr. Speaker, we rise today to pay tribute to Albert Thomas Henley, a friend and a dedicated public servant who will retire later this spring after 43 years of distinguished service to the Santa Clara Valley Water District, first as legal counsel and later as general counsel.

After Albert received his law degree from Stanford University in 1941, he went on to serve in the U.S. Infantry and Counter-Intelligence Service for the next 6 years.

In 1947 he began his long and illustrious career as a specialist in California water law in private practice and as legal counsel to the Santa Clara Valley Water Conservation District and other local water agencies. In 1968, Albert joined the water district as general counsel. He has served admirably since.

Albert Henley has played a vital role in many legislative landmarks, including the Santa Clara-Alameda-San Benito Water Authority Act, the San Benito County Water Conservation and Flood Control District Act, the Santa Clara Valley Water District Act, and others too numerous to mention here.

In addition to his legislative achievements, he has lectured both here and abroad and has written extensively on California water law. His many works include the invaluable "Evolutions of Forms of Water Users Organizations in California," published by the California Law Review (45 CLR 665).

We will miss Albert's special insight and wisdom. Most of all, we will miss his gift of lightening even the most difficult of circumstances with his delightful good humor and anecdotes. His broad understanding of California water law is legendary and he should be forewarned that he will be called on from time to time to refresh our memories with his knowledge and stories of old legislative battles.

To say we are sorry to see Albert Henley leave is an understatement. But while we are bidding farewell to a friend today, his wife, Miriam, his family, and love for overseas travel will be gaining his undivided attention.

Mr. Speaker, water is the lifeblood of the West. Albert Henley, with his dedication and knowledge, helped in a very real sense to make northern California bloom. For that we are forever grateful.

We would like to say thank you to a friend and dedicated public servant to so many over the years, Albert Henley. We wish him the best as he begins his retirement.

REMEMBERING DR. MARTIN LUTHER KING, JR.

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. DINGELL. Mr. Speaker, I rise in honor of the Rev. Dr. Martin Luther King, Jr., who is being honored by United Automobile Workers local 600 in Dearborn, MI on April 8, 1990. Unfortunately, I am unable to attend the special memorial service. But, I do want to take this opportunity to let the members of UAW local 600 know that I share their regard for Dr. King's lifetime of good work to protect the civil rights of not only blacks, but all Americans, and to shield all of our society's less fortunate.

Legislation being considered by the Congress, in response to several regressive Supreme Court decisions, may profoundly influence Dr. King's legacy and civil rights law for years to come. Some of the proposals would markedly expand civil rights coverage for certain groups and provide for more effective enforcement procedures. Recent congressional effort has focused on the Civil Rights Restoration Act, Fair Housing Amendments Act, and the Americans With Disabilities Act.

As dramatic as these events in Congress are, a host of recent Supreme Court decisions have recontoured the judicial landscape for enforcement of civil rights laws and constitutional rights. The concern for personal privacy balanced against the Government's obligation to protect the public health and safety were highlighted by two employee drug-testing decisions by the Supreme Court, the Webster ruling, and decisions on affirmative action and minority business set-asides.

The gains initiated by Dr. King can never be taken for granted. The Congress and courts must continue to protect the civil rights of all Americans. Through my capacity as a Member of the U.S. Congress, I pledge my support to protect these constitutional rights.

A TRIBUTE TO THE OFFICERS OF THE SACRED HEART SENIOR CITIZEN CLUB

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. MACHTLEY. Mr. Speaker, I rise to honor the recently elected officers of the Sacred Heart Senior Citizens Club in Woonsocket, RI.

The president of the Sacred Heart Senior Citizens Club will be Irene Vadenais while the seat of vice president will be filled by Richard Plath. Rita Cassavant will serve as secretary, and Edna Hendricken will fill the role of treasurer.

Throughout the year the 300 members of the Sacred Heart Senior Citizens Club partake in many social events. Most notable are their monthly parties such as their July Clambake, August picnic and Mother and Father's Day celebrations. This year on September 20 the club will be celebrating its 17th anniversary.

I would like to wish my best to the new officers of the Sacred Heart Senior Citizens Club and hope that they continue to create a spirit of love within their group. Their dedication is a testament to their unselfish devotion and desire to create an active organization for their fellow members.

RAIN HOME ATTENDANT SERVICES, INC.

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. SCHEUER. Mr. Speaker, over the past 10 years, RAIN Home Attendant Services, Inc. has assisted thousands of elderly and disabled residents of the Bronx to live comfortably in their own homes and to avoid institutionalization by providing a competent level of in-home services under the Medicaid Program.

The lives of many elderly, disabled, and other home-bound individuals have been enriched by the high quality personal care provided to them by a caring, professional staff of home attendants, registered nurses, and personnel specialists, all of whom are ably backed by competent administrators and a diligent office staff.

An affiliate of Regional Aid for Interim Needs, Inc. [RAIN] has helped bring some sunshine to many Bronx residents living in the twilight of their golden years. Its staff members have shown empathy, concern, and a high degree of professionalism in the delivery of services ranging from ambulation—assisting someone to move about—to bathing, feeding, light housekeeping, and personal grooming. Caring home attendants have also provided companionship for many homebound elderly who do not have relatives to whom they can turn for assistance, encouragement, or just to chat.

I commend RAIN Home Attendant Services, Inc. for its devoted efforts over the last 10 years to make the lives of so many elderly, disabled, and home-bound Bronx residents a little easier and more enjoyable.

RAIN, as we commonly know it, has always been a sustainer of life. For many of my constituents in the northeast Bronx, RAIN, Inc. has been a sustaining force enabling them to lead fuller, healthier, and happier lives. I hope that it will continue to do so for many years to come.

THE TRAGEDY OF KASHMIR

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. TORRICELLI. Mr. Speaker, in 1947 the British Government accepted the inevitability of the partition of its massive colony on the Indian subcontinent into the present-day nations of India and Pakistan. It was mutually agreed among the parties that the colony's more than 500 princely states opt for inclusion in Pakistan or India, taking into account the wishes of their people. All but three, the states of Junagadh, Hyderabad, and Kashmir, did so. In Junagadh and Hyderabad, the Indian army settled the question by intervention, but clearly the Hindu majority in both states would have chosen the same course had their wishes been asked.

In Kashmir, however, the 85-percent Muslim majority and their Hindu ruler had opposing inclinations. As a consequence, the area became a flash point between the two infant nations leading to the first of three wars between Pakistan and India. In early 1948, the Government of India took the matter of the conflict before the United Nations Security Council, and a year later in January 1949, the Security Council, with the support of both the Indian and Pakistani Governments, adopted a proposal for a plebiscite in Kashmir in order to allow its inhabitants the right of self-determination. However, U.S. Admiral Chester W. Nimitz, chosen as the Plebiscite Administrator, was unable to make any progress on the plebiscite, despite his best efforts.

For 40 years, through two more wars and continuous unrest in Kashmir, the Government of India prevented a plebiscite from bringing freedom of choice to Kashmiris and peace to the region. The Indian Government moved during this time from initial agreement to the plebiscite proposal to a rejection of it in the mid-fifties based on Pakistan's entry into a security relationship with the United States. As a member of the Security Council, the United States has consistently supported the right of self-determination for the people of Kashmir. The Soviets, however, mirroring India's opposition to the plebiscite, used its Security Council veto to deny further action or discussion with regard to the conflict.

In recent months, Kashmir has witnessed an unfortunate upsurge of violence. Indian press accounts have reported continued protests in Kashmir, including a demonstration in the capital, Srinagar, which involved 400,000 persons, fully half of the city's population. Indian Government forces have reacted strongly to the unrest, and Amnesty International has called for an investigation into reports that since January 21 as many as 50 unarmed demonstrators have been killed by Indian security forces.

This month, the U.S. Department of State issued the following statement:

We deplore the loss of life in Kashmir. We are disturbed at the rising number of casualties. We strongly urge the Government of India to restrain its security forces from using deadly force against unarmed people. We continue to believe that political dialogue is a way to address the problems of Kashmir and we urge such dialogue begin at the earliest possible time.

But the fighting continues, and the dying goes on.

Without a resolution on Kashmir, dangerous tensions in the region between India and Pakistan will continue, for the governments of the two nations will remain at loggerheads as long as Kashmir is in dispute. Conversely, a settlement of the dispute would remove the single, largest obstacle to improved Indo-Pakistani relations and could well usher in a new era of friendship and cooperation. It is past time for the world's largest democracy to live up to its principles and its promise. It is past time, as well, for the world's most powerful democracy, the United States, to take an active role in seeking to defuse this conflict and to assume a position of leadership in directing the world's attention toward a renewed effort for a plebiscite. It is time now for ballots, not bullets, time for a plebiscite in Kashmir which could fundamentally alter the history of the subcontinent, and with it, our chances for a peaceful world.

THE ELECTIONS OF OFFICERS OF THE JOHN F. KENNEDY MANOR

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the recently elected officers of the John F. Kennedy Manor in Woonsocket, RI.

The president of the John F. Kennedy Manor will be Laureni Leclerc, while the seat of vice president will be filled by Margaret Robin. Irene Pelypec will serve as secretary and Eva Lamoureux will be the new treasurer.

The officers were sworn in on December 16, 1989, during the annual Christmas party.

I would like to wish my best to the new officers of the John F. Kennedy Manor and hope that they continue to create a spirit of love within their home. Their dedication is a testament to their unselfish devotion to their fellow tenants.

A TRIBUTE TO THE GUYANA ART AND CULTURAL CENTER OF BROOKLYN, NY

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. OWENS of New York. Mr. Speaker, I wish to pay tribute to the Republic of Guyana Arts and Educational Center in Brooklyn, NY and its director and codirector, Drs. Thomas E. and Marguerite C. Thompson. They have dedicated much time and effort to sharing the rich culture and heritage of Guyana, South America, and the West Indies with the wider population of our country.

This committed team, without compensation, also serves as facilitators of educational and vocational guidance in preschool, elementary, secondary, college and adult education to not only migrating families to this country, but also to students throughout the New York metropolitan area.

This center began over 10 years ago in historic Brooklyn out of a great need to help educate and expose people from different cultural backgrounds of the Caribbean and the Americas to the valuable contributions that each has played to make our city, State and country great. Encouraged by the wise response of the various activities such as lecture series, films, exhibits and multicultural programs at Boys and Girls High School, Fenimore Street United Methodist Church, The Weeksville School and Bedford-Stuyvesant Restoration Arts and Cultural Center, all of Brooklyn, NY, the center has been praised for its strong commitment to our inner city youth. In addition, exhibits have also been viewed at the United Nations Lobby and the U.N. Church Center in New York. Programs designed by the center's directors have been used throughout the Nation including such cities as far south as New Orleans, LA and as far west as Los Angeles, CA, as part of its curriculum development.

One notable highlight of the center's outreach curriculum is the R.E.D.D. Program [Reading, Enrichment, Development and Dissemination]. This Saturday's program provides excellent opportunities for children at the center to develop language, reading and oral history skills through a rich involvement in personal interviews, music, books and creative writing.

Among those that have shared their lives and talents with children include Queen Mother Moore, historian; Tom Feelings, author and artist; Ambassador H.A. Vaughn, noted author and diplomat; nationally known recording artist Noel Pointer and Joan Maynard, artist and historian of the Society for the Preservation of Weeksville and Bedford-Stuyvesant History.

In addition, parents and children—most particularly those newly arrived from the English speaking Caribbean area—have been intro-

duced to the various cultural and educational institutions of the community at large. Field trips and tours of landmarks have also been included as part of the learning/teaching experience. Census and voter registration materials and lectures on the value of exercising the rights of citizenship to newly sworn citizens have been a key focus of this organization.

Lectures on Guyana and the surrounding area, its history, yesterday, today, and the future have been presented in public schools, colleges and other social organizations throughout New York City and New York State.

The formation of a steel band called "The Guyana All Stars Steel Orchestra" has been developed by this center that has shared concerts—both classical and folk music—for listening and dance. Outstanding folk singers of the colorful region share tradition in song and dance that depict family, village, and community customs that have been carried over into our cultural exchange in America.

Annual art shows highlight a week of celebration of Guyana Independence beginning on or near May 24 for more than 10 years. Through the years 2,000 adults and school children both public and private look forward to being a part of this cultural event which is held at the Bedford-Stuyvesant Restoration Cooperatives Center for Art and Culture, with Mr.T. Gunn serving as director.

The book "Outstanding Guyanese of America", by Dr. T.E. Thompson, director of the center, is used nationally and internationally in libraries, schools, consulates, and offices providing valuable information. Moreover, other publications sponsored by the center have been distributed throughout the New York City Public School system, providing an excellent reference tool to illustrate the various contributions the people of Guyana have made.

Guyana is located on the northern part of South America and is bounded on the north by the Atlantic Ocean, on the south by Brazil, on the east by Venezuela and on the west by Suriname.

Guyana was formerly a colony of Great Britain from 1831—at which time it assumed the name British Guiana—and remained under British rule until it attained its independence on May 26, 1966. It was declared a republic on February 23, 1970. The new country took the name Guyana, an aboriginal Indian word meaning "Land of Many Waters".

When slavery was abolished in 1834, exslaves refused to work for their former masters, even for wages. They left their plantations and established their own village communities. Immigrants were then brought from many parts of the world, such as Portugal, the United States, China, and India. Today the country's population reflects its Chinese, Portuguese, Indian European, Amerindian, and African ancestry. Each of these six groups have made contributions toward the country's progress, and today as a result, we are seeing the emergence of one people, one nation, one destiny.

The center's director, Dr. Thomas E. Thompson says that one of the center's primary goals is to preserve the history of Guyana as a leader in the Third World, thus helping build a sense of continuity, knowledge, self esteem and self worth for the present and future generations of Brooklyn's youth. This is especially imperative for those of African-Caribbean descent. He feels that young African-Caribbean Americans in particular will have a better understanding and deeper appreciation of their strengths and abilities once they know of their ancestors that came to this country under incredible odds and overcame them to be productive members of our country.

Statistically, it has been stated that the largest concentrated population of Guyanese and West Indians in America live in Brooklyn, NY and it environs. Many of these newly arrived citizens from these areas aid their former communities on a regular or disaster basis. These efforts and projects are supported by the center.

A working and visiting site was located on Rogers Avenue in the Flatbush Area of Brooklyn, which many organizations such as the Hawthorne Street Block Association, the Allied Organization of Guyana, the Guyana Circle, the United Methodist Women and the National Association of West Indian Americans have used as a meeting place.

This center has served with its leaders as a legacy of courage and commitment through the efforts of its director and co-director, Drs. Thomas E. and Marguerite C. Thompson. Through the efforts of these two strong individuals, generations of Brooklyn residents will continue to learn about their heritage and be inspired to be citizens of not only Brooklyn but the world. It has been said that not only did a tree grow in Brooklyn but a center of learning as well.

SELF-DETERMINATION FOR PUERTO RICO LAUDED BY NEW YORK TIMES

HON. JAIME B. FUSTER

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. FUSTER. Mr. Speaker, my colleagues have heard me many times address the issue of a political status plebiscite in Puerto Rico which would be sanctioned by the Congress. This is a unique opportunity, in the best tradition of self-determination, for the Congress to spell out to the 3.3 million American citizens in Puerto Rico precisely what it is prepared to offer in terms of an enhanced commonwealth status, which I favor, or statehood, or independence.

Moreover, it is a unique opportunity for the Congress to commit itself—if self-determination is to be more than just empty rhetoric—to honoring the results of that plebiscite, which would be held in the summer of 1991 so as not to conflict with the general elections of 1992.

It is this desire of Puerto Ricans across the political spectrum to decide their ultimate political status that correctly prompted the New York Times to remark in a lengthy editorial last Sunday, April 1, that "Puerto Rico's right to self-determination * * * is unarguable and fundamental." The perspective and balanced editorial, which I am inserting in the RECORD today, concludes by noting that Congress should now specify "clearly and fairly what Puerto Ricans can expect, whichever way they vote."

That is crucial to the process, Mr. Speaker. As you know, President Bush, in an appearance before a joint session of Congress a year ago, proposed such a plebiscite in Puerto Rico, endorsed the principle of self-determination, and repeated his well-known preference for statehood. I do not share that preference, even though I have great respect for the institution of statehood itself. The historical record will show that commonwealth status, which was created by the Congress in 1952, has worked very well indeed, and has shown itself to be in the best interests of both Puerto Rico and the United States.

At any rate, Mr. Speaker, legislation to authorize the plebiscite which President Bush spoke of was marked up by the Senate Committee on Energy and Natural Resources, which has primary jurisdiction, last August. Some of us consider S. 712, known as the Puerto Rico Status Referendum Act, to be unbalanced, tilting as it does toward the perceived economic benefits of statehood. But at least S. 712 serves as a vehicle to implement the will of the three major political parties in Puerto Rico, all of which uncharacteristically joined together early last year to support the principle of a binding status plebiscite.

Following the Senate Energy Committee action, the House Subcommittee on Insular and International Affairs held its first plebiscite hearings in both Washington and Puerto Rico earlier this year. As a result of these Senate and House hearings, some of which have been televised live back to Puerto Rico, enormous expectations have been created among island residents about the ongoing legislative process, and the anticipated wrapping up of that process, in Washington. It is a developing problem which we in the Congress must face head-on, and should not allow to fester, because we all know that not too much more time remains in this legislative year.

Thus, Mr. Speaker, I urge my colleagues to focus more on the issue of Puerto Rico's political status so that we might have a bill by the end of this legislative year. I am of course aware of the many other important items on our congressional agenda but I strongly appeal to my colleagues to make every effort, in the current legislative process, to help their fellow American citizens in Puerto Rico to realize that cherished dream of full self-determination. To that end, I commend to your attention the following editorial in the New York Times of April 1, 1990:

[From the New York Times, Apr. 1, 1990]

THE 51ST AND 52D STATES: LET PUERTO RICANS DECIDE THEIR FATE, BUT FAIRLY

Puerto Rico is not America's Lithuania, but it is unhappy with its status as a highly dependent commonwealth. An overwhelming majority of 3.3 million islanders are agreed that they want change. But as Congress is learning, agreement stops there. What adds to the perplexity is a parallel but unrelated campaign to grant statehood to the District of Columbia.

A Senate bill supported by the Bush Administration would offer Puerto Ricans a chance to choose, by a binding vote next year, statehood, improved commonwealth

status or independence. The problem is to assure a fair choice. If one or another side has plausible reasons for charging bad faith, the referendum could prolong the argument it is meant to end.

Polls for the first time show a narrow majority of Puerto Ricans now favors statehood. As sentiment has shifted, so has the tone of a longstanding debate. Statehood supporters now join with advocates of independence in decrying colonialism. Those clamoring for enhanced commonwealth status contend that the Senate bill is frontloaded unfairly in favor of statehood.

The argument springs from a complicated history. The U.S. acquired Puerto Rico from Spain almost incidentally in 1900. In 1917, Puerto Ricans became U.S. citizens, but not until 1947 did they elect a Governor. Five years later, Congress approved an ingenious commonwealth arrangement, giving a Spanish-speaking island home rule and exemption from Federal taxes but no vote in Federal elections.

Economically, the plan made sense. Using an additional tax break known as Section 936 of the revenue code, Puerto Rico has provided generous incentives for mainland investors. But politically, the island has been virtually a ward of Congress, without the clout it would wield with two senators and six or seven representatives, plus a Presidential vote.

This sense of being second-class citizens has given potent impetus to the statehood campaign. As statehood sentiment has waxed, so has uncertainty about Puerto Rico's tax exemptions, causing investors to hold back. To end the debate once and for all, Gov. Rafael Hernandez Colon, a commonwealth advocate, proposed a binding referendum.

But he now faults the Senate bill as "terribly, dangerously unbalanced." It would phase in Federal taxes and phase out Section 936 over four years. Meanwhile, says the Congressional Budget Office, statehood could cost other U.S. taxpayers as much as $9.4 billion in additional Federal social spending; more than half the island's population remains below the national poverty line.

A very different view is taken by former Gov. Carlos Romero Barceló, a statehood proponent. He persuasively cites similar preferential treatment granted other incoming states. Congress can redress the balance by rewording the commonwealth choice to give its proponents more of what they seek: an increased international role, an open port for air carriers, a voice in Federal appointments and jurisdiction over natural resources.

What is unarguable and fundamental is Puerto Rico's right to self-determination. The choice is primarily between two forms of association with the United States. Even the minority favoring independence relies on reason rather than passion. Congress can reciprocate by specifying clearly and fairly what Puerto Ricans can expect, whichever way they vote.

A TRIBUTE TO THE OFFICERS OF THE HANORA LIPPETT APARTMENTS

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the reelection of the officers of the Hanora Lippett Apartments in Woonsocket, RI, who were installed at a dinner in their honor on November 9, 1989.

The president of Hanora Lippett Apartments will remain Doris Turcotte, while Irene Vadnais will continue in her role as vice president. Rena Godin will remain secretary and the role of treasurer will continue to be filled by Theresa Berube.

The residents of the Hanora Lippett Apartments are well known in the community for their monthly suppers, summer cookouts, and Wednesday night Bingo.

I would like to wish my best to the officers of the Hanora Lippett Apartments and hope that they continue to create a spirit of love within their home. Their dedication is a testament to their unselfish devotion and desire to create a home for their fellow tenants.

FRAMEWORK FOR UNITING GERMANY

HON. JOSEPH P. KENNEDY II

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. KENNEDY. Mr. Speaker, many of my colleagues share my concern about how to determine the most appropriate role that the Congress should play in the reunification process now underway in Europe. We want to guarantee a method which provides for the most peaceful, fair and respectful process possible. With this in mind, I would like to introduce into the CONGRESSIONAL RECORD the following article which suggests using the Commission on Security and Cooperation in Europe [CSCE] as a basis for a final treaty. The article, by Stanley R. Sloan of the Congressional Research Service, appeared in the March 27 edition of the Christian Science Monitor, and I am sure they will find it of great interest:

The process of reorganizing Europe for the post-cold-war era has begun. The East and West German governments are shaping a unified German state. The Four Powers—the United States, the Soviet Union, France and Great Britain—are discussing the international aspects of unification.

All parties to this "two-plus-four" process agree that the interests not only of Germany but also of other states should be taken into account in the process of German unification. But there is very little agreement on the final sum of the two-plus-four equation. Toward the end of the year, President Bush, Soviet President Gorbachev, and the other leaders of the 35-member Conference on Security and Cooperation in Europe (CSCE) will meet to consider German unification and other questions about Europe's future.

European governments are moving toward a consensus that the CSCE should become the overarching framework for decisions on the future of Europe. But skeptics, some prominently placed in the Bush administration, contend that the 35-nation group is too diverse to be an effective decisionmaking body. They argue that traditional antagonisms, as between Greece and Turkey, would frequently block consensus, and that even small countries like Malta could exercise a veto.

The doubters also note that the basis for the CSCE—the 1975 Helsinki "Final Act"—is not a treaty and therefore not legally binding on the members. This criticism may in fact be the key to a solution. One of the few apparent ways to deal with the concerns of countries that are not involved in the two-plus-four negotiations, and with the U.S. Congress's interest in playing a role, would be to transform an amended CSCE Final Act into a treaty.

The CSCE Final Act lays out a set of guidelines for cooperation among states in promoting peace, economic cooperation, and human rights in Europe. This "declaration on principles guiding relations between participating states," which would be the heart of a new treaty, usefully precludes any changes in European borders except through peaceful means. And it could be amended to reflect the outcome of the two-plus-four negotiations.

These terms might include, for example, promises not to station NATO forces in Germany's eastern territory and German reaffirmation of its commitment not to become a nuclear power. The conventional-arms control talks now going on in Vienna and projected negotiations on removing U.S. and Soviet short-range nuclear weapons from Europe could clearly be brought under the CSCE umbrella.

In addition, the declaration could be strengthened to acknowledge clearly the legitimacy of all treaties, bilateral accords, and organizations in Europe that contribute to the goals articulated in the Final Act. This "grandfather clause" would spread the CSCE umbrella over a wide range of present institutions, such as the German Community, the Western European Union, and the Council of Europe, as well as over new institutions deemed necessary in the future. It could also provide the basis for continued adherence of current NATO members to the North Atlantic Treaty, whose principles are worth preserving even if the organization itself becomes less relevant to new political realities.

This approach might prove cumbersome. Some governments might regard the Final Act's provisions acceptable as political commitments but not as legal obligations. Going down this road thus would not be easy. But, at the moment this approach, based on a set of guidelines already accepted by 35 states, presents an option against which other approaches could be measured.

Giving the Final Act legal standing would provide an institutional way for the United States and the Soviet Union to remain constructively involved in future European developments while at the same time supplying the international framework for German unification. It might also make it possible to forge the drafting of a peace treaty to end World War II, a process that the Germans would like to avoid.

This framework could make it easier for the Soviet Union to swallow the membership in NATO of a united Germany, or other suggested arrangements to integrate German military forces with those of its neighbors. This could develop under the

auspices of the European Community or the Western European Union.

A CSCE treaty would also allow Congress to participate through the ratification process in the creation on a new European order. This would help establish a strong domestic foundation for a leading U.S. role in the process of strengthening democratic insitutions across Europe and in the construction of a more cooperative European security system.

Sincerely,

JOSEPH P. KENNEDY,
Member of Congress.

QUESTIONS ABOUT THE SUPERCONDUCTING SUPER COLLIDER [SSC]

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Ms. SCHNEIDER. Mr. Speaker, one of the difficult budget issues for Congress this year will be how to provide funding for the superconducting super collider [SSC]. Although the administration proposed $318 million for this project in the fiscal year 1991 Department of Energy budget, questions remain about magnet construction, international participation, and competition with other programs.

Therefore, I thought my colleagues would find the following editorial by Congressman SHERWOOD BOEHLERT useful and request that it be entered into the RECORD:

[From the Washington Post, Apr. 1, 1990]

COLLIDING WITH SCIENTIFIC PRIORITIES

When Congress begins debating the future of the Superconducting Super Collider (SSC) this week, more will be at stake than an $8 billion piece of physics equipment.

The White House Science Office recently enumerated four priorities for U.S. technology policy, each of which carries a multibillion dollar price tag. The four were: improving education at all grade levels, understanding global climate change, making American industry more competitive and building a national supercomputer network connecting all universities.

These are hard priorities to argue with, and the SSC would detract from all. The supercomputer network, for example, was not included in the administration's 1991 budget proposal because funds were scarce.

Yet the most recent increase in the estimated cost of the SSC—$2 billion—would more than pay for the five-year networking initiative. And the network, which would eventually link every college and university in the country, would improve research and education in all fields of science (including high-energy physics).

Industry is unimpressed with the SSC. When top industrial researchers were asked to rank the importance of major science projects last summer, the SSC ended up dead last.

In that survey by the Industrial Research Institute, the SSC was viewed as less deserving of funding than the human genome project, the hypersonic plane, the space station or even the Strategic Defense Initiative. These results held true even when researchers from corporations with contracts for the projects were eliminated from the survey.

The current state of the project was stated quite candidly by the president's science adviser, D. Allan Bromley, in congressional testimony last month. He said the SSC was about to move "from the conceptual design to the point where the real honest professionals sit down and say, 'All right, we have got to build this thing and start putting together the design.' "

"Putting together the design" includes figuring out how to fabricate the key components of the SSC—its magnets. A Department of Energy review panel concluded that the magnets "are not satisfactory for operation . . . and therefore the magnet design cannot be considered completed at this time."

The Congressional Budget Office adds, "Allowing more time for the DOE's magnet [research] might be well advised. Consrtuction began on a previous accelerator before the magnet problems were solved, leading to cancellation of the project after $224 million had been spent."

Yet more than half of the administration's $318 million request for the SSC for 1991 is categorized as money for construction, including $15 million for site preparation.

The Department of Energy is just as far from completing its financing plans as from finishing its technical ones. The department has been assuming that $1 billion will be supplied by foreign partners, but no commitments have been made.

DOE officials have always displayed a disturbing ambivalence about raising foreign funds for the SSC even though scientists from all over the world will be using the equipment and the resulting data.

Under increased scrutiny, the project's supporters have gone on the offensive, accusing SSC opponents of being anti-science.

Even though higher priority science projects have arisen, even though the project is being redesigned, even though science is becoming more international, even though the federal budget is strained, the SSC supporters object to the most benign changes in their plans, such as a two-year delay in construction spending or relying more on foreign funds.

Further, Deputy Secretary of Energy Henson Moore is quoted as saying that without the SSC "this country risks being underfunded in basic research." Actually, it is the SSC itself that threatens to wreck basic research—pouring billions into the narrowest of research fields while other ventures with greater ramifications for both basic human understanding of science and industrial progress go wanting.

THE AFA VERSUS THE TRUTH

HON. ALFRED A. (AL) McCANDLESS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 1990

Mr. McCANDLESS. Mr. Speaker, when individuals or groups intentionally use falsehoods, half-truths, and incorrect information in an effort to raise money, I believe that our constituents should be warned. Specifically, I would like to address my comments to a group calling itself the American Family Association [AFA].

I have received a number of inquiries from my constituents about articles which were printed in the AFA Journal: about a letter asking for money for the AFA signed by Donald E. Wildmon; and about a full page ad asking for money for the AFA which appeared in USA Today. Unfortunately, but seemingly by design, the article, the ad, and the letter contain several serious inaccuracies and misrepresentations about a vote which took place in the House of Representatives on September 13, 1989.

At issue is Federal support for the National Endowment of the Arts [NEA] and their funding of highly offensive and objectionable "works of art." I am opposed to the use of American taxpayers' dollars to pay for, or to promote, offensive art. But I cannot, and do not, condone the AFA's use of deception and misrepresentation.

During the consideration of H.R. 2788, the Department of Interior appropriations for fiscal year 1990, which contained funding for the NEA, I supported efforts to restrict and reduce funding for the NEA. After the legislation passed the House, it went to the Senate where an amendment, offered by Senator JESSE HELMS to restrict Federal funding for works of art deemed to be obscene or indecent, was adopted. After the Senate passed H.R. 2788, it was sent to a conference committee, made up of a small number of Senators and Congressmen, whose task it was to resolve the between the House and Senate versions of the bill.

On September 13, the issue came before the House of Representatives. However, the issue was not "an amendment * * * which would have prohibited the NEA from using your tax dollars to support such exhibits," as the AFA has incorrectly reported several times. Rather, the issue was a motion to instruct the House conference members on H.R. 2788. Not only did the AFA fail to correctly explain the true nature of the issue, but it also failed to explain that a motion to instruct is not binding on either the House or the Senate, and is largely procedural.

Congressman RALPH REGULA, a senior member of the Appropriations Committee, moved that the House conferees address the concerns raised by the Helms amendment. While the Helms amendment certainly was well intended, it was generally felt that the actual language was vague and ambiguous, and was subject to a court challenge. Specifically, the amendment failed to provide a standard by which a work was to be judged obscene or indecent, and further failed to designate the entity that would make that determination. The Regula motion provided the conferees with the opportunity to work with Senator HELMS in an effort to enact an effective ban on the Federal funding of obscene or indecent material. As such, I found the Regula motion to be acceptable, and voted to support its passage by voting for the previous question.

To characterize that vote, as the AFA has, as a vote for "supporting the NEA in its abuse and misuse of tax dollars," is a gross misrepresentation of the facts. For an organization which claims to support family values, to resort to falsehoods designed to enrage people for the expressed purpose of raising money for itself, is inexcusable. Such an orga-

nization is not deserving of either money or credibility.

In passing, I should note that had the previous question failed on the Regula motion, Congressman DANA ROHRABACHER would have offered a motion to have the conferees simply accept the Helms language without the opportunity to address some of the questions surrounding it. For the reasons I have already stated, I preferred the Regula approach, but would have supported the Rohrabacher motion had the Regula motion failed. However, no one from the AFA has bothered to ask me about this.

The AFA has previously misrepresented the facts when, in its January 1990 issue of the AFA Journal, it carried an article supposedly written by Congressman ROHRABACHER. Because he neither wrote the article, nor gave the publication permission to use his name, Congressman ROHRABACHER took the highly unusual step of disavowing the article.

Mr. Speaker, our constituents deserve the facts and the truth. Unfortunately, apparently in its zeal for money, the AFA has overlooked both.

HOUSE OF REPRESENTATIVES—*Wednesday, April 4, 1990*

The House met at 12 noon.

The Reverend Dr. Samuel J. Wooldridge, Calvary Bible Church, St. Marys, WV, offered the following prayer:

Our Heavenly Father, I ask You today that You give these Representatives the wisdom of God to help our great country on the path of our forefathers.

Give to these Representatives the burden of Christopher Columbus to establish a nation where Jesus is Lord.

May these Representatives give themselves to the same cause of Benjamin Franklin "to give ourselves according to the commands of God." May these men and women remember that the desire of our forefathers was for us, as a nation, to be an example to all other nations for the glory of God.

Let these here today make it their life's desire to say with Sam Adams, "No King but King Jesus."

Give to these Representatives wisdom in matters of the life, freedom, and liberty under God's control. Help these, O Heavenly Father, to keep our America free from becoming a godless nation. Let us all strive to hold the cause of God close to our being. "Let us search and try our ways and turn again to the Lord." Let us say with Thomas Jefferson, "I tremble for my country when I reflect that God is just, and that His justice cannot sleep forever."

Help us, O God, to return to our forefathers' desire for our America.

In His precious name we ask. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Pennsylvania [Mr. WALGREN] come forward and lead us in the Pledge of Allegiance?

Mr. WALGREN led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

INTRODUCTION OF REV. DR. SAMUEL J. WOOLDRIDGE

(Mr. MOLLOHAN asked and was given permission to address the House for 1 minute.)

Mr. MOLLOHAN. Mr. Speaker, it is my privilege to welcome Dr. Samuel J. Wooldridge, pastor of the Calvary Bible Church in St. Marys, WV, to the House of Representatives this morning.

Throughout Dr. Wooldridge's 22 years in the pastorate, he has touched many lives through a number of different mediums. He has started three churches as well as one Christian school.

He has sponsored radio ministries and he has ministered to the blind. He currently serves as president of Fundamental Literature for the Blind, which distributes books on cassette tapes around the world.

Dr. Wooldridge has written a series of books and pamphlets on issues as diverse as marriage, money, depression, and Christian growth.

Mr. Speaker, the people of St. Marys are the richer for Dr. Wooldridge's presence, and I welcome him to this Chamber.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed, with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 1243. An act to require the Secretary of Energy to establish three Centers for Metal Casting Competitiveness Research.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1781. An act to establish as the policy of the United States the preservation, protection, and promotion of the rights of Native Americans to use, practice and develop Native American languages, to take steps to foster such use, practice and development, and for other purposes.

RESIGNATION AS MEMBER OF COMMITTEE ON EDUCATION AND LABOR

The SPEAKER laid before the House the following resignation as a member of the Committee on Education and Labor:

HOUSE OF REPRESENTATIVES,
Washington, DC, April 4, 1990.

Hon. THOMAS FOLEY,
Speaker of the House, U.S. House of Representatives, Washington, DC.

DEAR MR. SPEAKER: I hereby tender my resignation from the Committee on Education and Labor.

Respectfully,

PETER J. VISCLOSKY,
Member of Congress.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

APPOINTMENT AS MEMBER TO SELECT COMMITTEE ON AGING

The SPEAKER. Pursuant to the provisions of clauses 6 (f) and (i) of rule X, the Chair appoints the gentleman from Utah [Mr. OWENS] as an additional majority member to the Select Committee on Aging.

ELECTION OF MEMBERS TO CERTAIN STANDING COMMITTEES OF THE HOUSE

Mr. HOYER. Mr. Speaker, I offer a privileged resolution (H. Res. 375), and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 375

Resolved, That the following Members be, and are hereby, listed to the following standing committees of the House of Representatives:

Committee on Banking, Elliot L. Engel, New York;

Committee on Education and Labor, José E. Serrano, New York, to rank after Craig A. Washington, Texas;

Committee on Government Operations, Dennis E. Eckart, Ohio;

Committee on Small Business, José E. Serrano, New York.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ADJOURNMENT OF THE HOUSE FROM WEDNESDAY, APRIL 4, 1990, TO WEDNESDAY, APRIL 18, 1990 AND RECESS OR ADJOURNMENT OF THE SENATE FROM THURSDAY, APRIL 5, 1990 OR FRIDAY, APRIL 6, 1990 TO WEDNESDAY, APRIL 18, 1990

Mr. GEPHARDT. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 299) providing for an adjournment of the House from April 4, 1990 to April 18, 1990 and a recess or adjournment of the Senate

from April 5 or April 6, 1990, and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 299

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Wednesday, April 4, 1990, it stand adjourned until 12 o'clock meridian on Wednesday, April 18, 1990, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first; and that when the Senate recesses or adjourns on Thursday, April 5, 1990, or on Friday, April 6, 1990, pursuant to a motion made by the Majority Leader, or his designee, it stand in recess or stand adjourned until 12 o'clock meridian, or until such time as may be specified by the Majority Leader or his designee in the motion to adjourn or recess, on Wednesday, April 18, 1990, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first.

SEC. 2. The Speaker of the House and the Majority Leader of the Senate, acting jointly after consultation with the Minority Leader of the House and the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING THE SPEAKER AND MINORITY LEADER TO ACCEPT RESIGNATIONS AND APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING ADJOURNMENT

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Wednesday, April 18, 1990, the Speaker and the minority leader be authorized to accept resignations and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, APRIL 18, 1990

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday, April 18, 1990.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

FEDERAL RESPONSIBILITY TO SET AND ACHIEVE GOALS

(Mr. TANNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TANNER. Mr. Speaker, in recent months, it has become clear that the administration is long on setting worthwhile national goals, but short on living up to its responsibility to help achieve them. Instead, State and local governments are left to confront difficult, complex—and yes—expensive policies with few, if any, Federal resources.

The Secretary of Education came out last year with a list of improvements needed in education, something we all support. The Secretary of Transportation has declared that fixing the Nation's vital transportation system is in the national interest; again something we know is true. The list goes on and on.

These declarations, regretably, are nothing more than cheers from the sidelines. Governors, State legislatures, mayors, and city councils have been left the task of achieving those goals and with the burden of paying for them.

I share the frustrations of the talented men and women who serve their States and communities. I am convinced that there is a Federal responsibility to not only set goals but to achieve them.

We all know people who talk a good game. Back home we have a saying that describes them: "Big hat, no cattle."

□ 1210

LET US REMOVE VIOLATORS OF OUR ENVIRONMENTAL LAWS FROM WASTE DISPOSAL BUSINESS

(Mr. PAXON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAXON. Mr. Speaker, all Americans are rightly concerned about toxic and hazardous waste pollution. I think, though, that Americans would be even more concerned if they found out that toxic and hazardous polluters can actually get paid by the Government to clean up the pollution.

To remedy this I have introduced legislation, along with my distinguished colleague from Oklahoma, MIKE SYNAR, that will give the Environmental Protection Agency the authority it needs to remove violators of our environmental laws from the waste disposal business.

Our legislation requires that all firms and individuals seeking contracts from the EPA disclose extensive information about the owners and key employees involved in their companies. And further, any found to have violated our environmental laws would be banned from receiving EPA contracts.

Mr. Speaker, it is time to take the profit out of pollution. I urge every one of my colleagues to cosponsor this important legislation.

PASSING THE BUCK TAKES ON A NEW MEANING

(Mr. FROST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FROST. Mr. Speaker, President Bush has given a new meaning to the old expression about passing the buck. Unfortunately, when it comes to increasing taxes, it is not the buck he is passing but the responsibility for collecting the buck.

Time after time President Bush has called on State and local governments to raise taxes to fund the programs he says we need as a nation. When he talks about no new taxes, he obviously has all fingers on both hands crossed. He loves new taxes as long as the Governor of Texas, the Governor of California and the Governor of New York are the ones proposing them. Not only does he love these new taxes, he makes it impossible for States to function without new taxes.

There is great irony in all this. Few days pass when officials from my State do not ask me why the Federal Government keeps collecting aviation and highway taxes and yet refuses to spend all the taxes even though there are pressing needs in road construction and airport safety. The Bush administration, of course is using these taxes to hide the size of the Federal budget deficit.

And so, Mr. Speaker, we have a President who loves taxes when they are collected by another layer of government and even loves Federal taxes when he can hoard them and not spend them for the specific purpose for which they are raised.

Its time that President Bush stops this fiscal charade. It is time for a little honesty.

COLA FREEZE PROPOSAL

(Mr. GOSS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOSS. Mr. Speaker, 2 months ago our President stood in this Chamber and said "Don't mess with Social Security." Today I'm asking my colleagues to honor that request.

Incredibly, there are Members of this Congress who want to shake up what is now a financially sound Social Security System.

First came a prominent Member of the other body. He wants to cut the

Social Security trust fund. Then, while the shockwaves were still reverberating that Social Security might once again be headed for broke, one of our prominent colleagues proposed a 1-year freeze in senior's cost-of-living adjustments.

These two proposals make a brutal one-two punch into the guts of our nations seniors—all under the guise of deficit-reduction.

Mr. Speaker, one proposal threatens the future integrity of a system seniors have counted on for more than 50 years. The other plan would pull the rug out from under that system today. My mail reflects building anxiety about just what exactly are we doing up here.

Yes, the Congress has to get serious about real deficit reduction—there's no question about it. But the way to accomplish our budget goals is not to sock it to our seniors. The way to reduce our deficit is to get rid of waste and unnecessary programs while making new programs pay for themselves. No matter how you draw it, the bottom line must always be the same—we are not going to raid the Social Security System.

PRESIDENT BUSH SEES NATIONAL PROBLEMS AS STATE AND LOCAL PROBLEMS

(Mr. NAGLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NAGLE. Mr. Speaker, 200 years ago, after 8 years under the old Articles of Confederation, the Founding Fathers concluded that a weak and feeble national government was a dangerous and inadequate way to try to run a great nation. So they junked the Articles of Confederation and adopted our great Constitution.

Two hundred years of unparalleled progress is testimony to the wisdom of that decision.

It is also compelling evidence of what can be achieved when we join together in common purpose; sharing our revenues to invest in ourselves; and expressing our collective will through a national government willing to act.

That is why I am perplexed, Mr. Speaker. I cannot understand—poised, as we are on the edge of the 21st Century—why President Bush seems to think that same weak and feeble role for the national government, which was so wisely rejected 200 years ago, is what we need today.

For in the final analysis, there is no difference between a national government unable to act, and a national government unwilling to act. The end result is the same.

The President continues to proclaim that national problems are now State and local problems; and he continues to announce that Federal Government responsibilities are now State and local government responsibilities.

Mr. Speaker, this is no way for a great nation to prepare to meet the 21st century.

REDUCING PAPERWORK AND SIMPLIFYING PENSION AND BENEFIT LAWS

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHULZE. Mr. Speaker, today I am introducing legislation which will reduce paperwork and simplify complicated employee benefit definitions. Employers will soon be required to report their number of highly compensated employees. My bill will clarify the term, highly compensated, to be employees earning in excess of $75,000. The current proposed definition is confusing, overly complex and time-consuming for employers.

My legislation will also make a uniform definition of compensation as wages or earned income. Under current law, compensation is defined in several ways making pension laws much more confusing.

Finally, my bill would delay the imposition of reporting requirements until 1992; or, until a burden study to analyze the costs to employers of reporting the number of highly compensated employees has been completed.

Let us give our employers some breathing room and support legislation to simplify our overly complex pension and benefit laws.

CHAI LING: A SOURCE OF INSPIRATION TO CHINESE FOR DEMOCRATIC REFORM IN CHINA

(Ms. PELOSI asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. PELOSI. Mr. Speaker, today the world celebrates the freedom of Chai Ling, one of the top student leaders in last spring's pro-democracy movement in China. Chai Ling's escape from China is significant because she led the last group of students out of Tiananmen Square and is one of the few living witnesses to the massacre on the night of terror in Beijing. Chai Ling was heard from last after the massacre when she videotaped a message detailing the assault on the demonstrators. In that message she told of her concern for the movement, for the protestors and for her own safety.

Following that she was placed on China's most-wanted list.

Outside of China, however, this 23-year-old's efforts earned international recognition and a nomination for the Nobel Peace Prize. Her brave and heroic efforts still serve as a source of inspiration to many Chinese who still hope for democratic reform in China.

Today in China is Qing Ming, the official day of mourning in China. While the Government increases its security because it fears the people, the people of China remember those who gave their lives for the pro-democratic movement. Today they may celebrate the fact that a leader of that movement is finally safe.

We here in the House of Representatives must by our actions never forget the martyrs of democracy in China.

ADDING REASON, COMPASSION AND COMMON SENSE TO THE SOCIAL SECURITY SYSTEM

(Mr. CHANDLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CHANDLER. Mr. Speaker, I rise today to enlist my colleagues' support for legislation that would correct an unintended, but serious flaw in current Social Security rules. The flaw is a bias against certain divorced persons.

Together with my colleague from Washington, Mr. SWIFT, I have offered legislation to correct that bias.

Mary Blackwood is a retired woman in Port Angles, WA, who lost her Social Security benefits after she and her husband were divorced and he returned to work.

She lost the benefits because of rules mandating a 2-year waiting period for persons eligible to receive benefits based on their former spouse's account. When Mrs. Blackwood's ex-husband returned to work, his actions effectively suspended her benefits for 2 years.

Our bill would correct this injustice by eliminating the 2-year waiting period for anyone who has received benefits for 12 consecutive months or in every month from age 62 until their divorce.

Although cases like Mrs. Blackwood's are rare, they still cause untold hardship for senior citizens who rely on Social Security.

In the spirit of compassion, I urge my colleagues to join me in sponsoring this commonsense bill.

□ 1220

DOUBLE STANDARD ON DRUG USE

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, President Bush picked Timothy Ryan to head the Office of Thrift Supervision, even though Mr. Ryan has admitted abusing drugs. Mr. Ryan said,

and I quote, "I smoked marijuana and I used cocaine perhaps once or twice."

Let me remind Members here, we put people in jail for cocaine. America imports 60 metric tons of cocaine a year. In fact, with this admission, Mr. Ryan could not sit in the driver's seat of a Trailways bus, but the President wants to put him in the driver's seat of this savings and loan fiasco.

Now what really gets complicated, there is a prisoner in Indiana, Brett Kimberlin, that said that he had sold Vice President QUAYLE drugs while the Vice President was a student at law school. Now, frankly, the Vice President denied it, and I tend to believe him. However, I think we should investigate it. This is a war on poor people, not drugs, and evidently what we're putting kids on the streets in jail for, we are willing, to overlook and pardon the same behavior of people in high places. This is not the type of double standard that Congress should tolerate.

SUPPORT SOCIAL SECURITY

(Mr. SCHIFF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHIFF. Mr. Speaker, there are media reports that an increasing number of Democratic party leaders are endorsing the Moynihan plan to reduce Social Security revenues.

This could be popular at first, because everyone loves a tax decrease.

But, reducing Social Security revenues now, only means that in the future, there will be one of two equally bad results for the American people:

First, Social Security will again run out of money, or;

Second, future workers will have to pay oppressive Social Security taxes.

Although I agree that we need a budget change to take Social Security out of the total Federal budget calculations, it is wrong to place a short-term political gain ahead of the future welfare of the American people, which is what reducing Social Security revenues means.

I will fight to keep our Social Security System solvent for not only today's retirees but for the generations of retirees to come.

$3 TRILLION AND COUNTING

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, yesterday this House answered the President's call and voted to give $720 million to Panama and Nicaragua.

That's $1,200 for every man, woman, and child in those two countries. Today, the U.S. Treasury announced that the national debt has reached $3 trillion. It would require $12,000 from every man, woman, and child in America to pay it off. Who is kidding whom along Pennsylvania Avenue?

PRO-BUSH PLEDGE NOT TO "MESS WITH SOCIAL SECUITY"

(Mr. THOMAS of Wyoming asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMAS of Wyoming. Mr. Speaker, our President said it best when he made a promise not to "mess with Social Security." I join my Republican colleagues in the fight to save Social Security.

Since President Bush's pledge, the Democrats have proposed cutting the Social Security payroll tax, returning the system to pay as you go, and freezing COLA's for 1 year. They assert that first, the trust fund reserves are worthless IOU's—the truth is that the reserves are invested in Treasury obligations, and the Treasury pays the trust fund substantial interest payments; second, the reserves are sufficiently high to return to the pay-as-you-go system—the truth is that we adopted the current system in 1983 because we realized the pay-as-you-go philosophy left the system vulnerable; and third, the payroll tax is regressive—the truth is that the Social Security System is the most progressive element of the Federal budget. Let me elaborate on the regressive versus progressive argument. Lower income retirees receive disproportionately more benefits; that is, they get back a much larger fraction of their average earnings than higher income retirees.

Let us look at the facts through all of this fiction. And let us not mess with Social Security.

URGE CORRECTION OF UNFAIR LEGISLATION

(Mr. SWIFT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SWIFT. Mr. Speaker, I want to refer to the remarks made just earlier by my colleague, the gentleman from Washington [Mr. CHANDLER], who is a member of the Committee on Ways and Means, and has introduced a bill over which that committee has jurisdiction, on behalf of a constituent of mine.

She has been caught in a classic example in which a citizen is caught in a crack between legislative intent and common sense. The law was written to address a very real abuse. Unfortunately, it has inadvertently created a situation that is unfair to people in Mrs. Blackwood's position. Mr. CHANDLER's bill would correct that, and it deserves fast attention by the Committee on Ways and Means, and passage by this House.

CONGRATULATIONS TO SENATE ON CLEAN AIR ACT

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, it is not often that any Member of this House takes the well to praise the actions of the other body. I am doing that today because I believe that the action that they took late last night in passing the Clean Air Act was historic and very important.

Not since 1977 has the U.S. Senate reported out a clean air bill. I will say, Mr. Speaker, as a gentleman in this House who represents the area of this country with the highest number of first-stage smog alerts in the entire Nation, I believe that it is very important for this House to move ahead and bring about a very, very strong Clean Air Act.

Of course, I do not want to jeopardize jobs or opportunities for anyone. However, I do believe it is important that we do, finally, recognize and actually implement a strong clean air bill.

NATIONAL RECYCLING POLICY URGED

(Ms. SLAUGHTER of New York asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SLAUGHTER of New York. Mr. Speaker, on Earth Day 20 years ago we witnessed an environmental teach-in that began to inform the public on environmental issues and how we can try to stop environmental degradation.

On this anniversary, the 20th, we must go beyond teaching and enact Federal policies that will encourage local recycling initiatives like the one in my county, because our future depends on it.

We have passed the important environmental issues legislation, including the oil spill prevention bill, and elevating the EPA to Cabinet status, and now that the Senate has passed a clean air bill, we will begin to act on it, as well. I think this is an appropriate way for Members to begin Earth Month.

However, we are still missing the best opportunity to preserve national resources, to save money, to conserve energy, because we have no Federal recycling policy. Our Nation's environmental and energy policies will not be complete until recycling becomes a major focus. Unless we remove from reliance on nonrenewable energy and material resources, we will not have the sustainable economy, and we cer-

tainly will not be sustaining our environment.

My own county, as I mentioned before, has an ambitious program that is now being started in the other three counties in the 30th Congressional District. I am very proud of that, and look forward to seeing that as a national policy.

□ 1230

SOCIAL SECURITY AND FAIRNESS

(Mr. CAMPBELL of California asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. CAMPBELL of California. Mr. Speaker, I rise to address the question of Social Security. Let me point out one thing about the present system and fairness.

Right now we have people working and the money they put into Social Security goes to their own retirement. That is fair. Because of the baby boom after the Second World War, we have more people working right now, and money is being put aside for the time when they will need it. That is fair.

What is not fair is the proposal by Senator MOYNIHAN which would say that those people who could now be putting money into the Social Security trust fund will not have to, and instead when they retire, we will simply raise the taxes on our children.

When we speak against the budget deficit, we speak about the unfairness of intergenerational transfer. When we speak about health care, we speak about the unfairness of ignoring the young people who are in need. Yet when we come to Social Security, it appears as though Senator MOYNIHAN and those who follow his proposal here in the House would willingly tax the children of present workers to pay their benefits. I suggest to the Members that is unfair, and I suggest that President Bush had it right when he said, "Don't mess with Social Security."

Preserve Social Security, I say to the Members of this House and the other body, and take the issue of fairness to our children.

LEGISLATION TO TERMINATE PRODUCTION OF "STEALTH" BOMBER

(Mr. ROWLAND of Connecticut asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. ROWLAND of Connecticut. Mr. Speaker, the problems facing the B-2 "Stealth" bomber seem to grow with each passing day. One day the cost goes up, the next day the prime contractor is named in yet another Justice Department investigation, and the following day the Air Force reveals that our fleet of B-52's will be viable cruise missile carriers until the year 2030.

The handwriting is on the wall, Mr. Speaker, and B-2 supporters know it. Therefore, let me make a new appeal to our colleagues to support the Rowland-Kasich-Dellums legislation. I ask the Members to join the 125 Members of this body who are supporting this legislation, which would terminate the production of B-2's beyond the 15 aircraft which have been paid for to date. What it keeps in place is research and development funding.

Most of the cosponsors of the B-2 termination support the concept of Stealth technology and believe that it should be pursued. But we cannot support a procurement rate that jeopardizes the financial future of the military. Even the Air Force has revised its cost estimate of the B-2, saying that the B-2 is now pegged at just over $75 billion.

Mr. Speaker, for the sake of the future of the Air Force, the need to reduce our own crushing deficit, and plain common sense, let us stop building B-2's now. Fly it, then buy it, but always remember—buyer beware.

SUPPORT URGED FOR EDA REAUTHORIZATION

(Mr. ENGLISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ENGLISH. Mr. Speaker, I rise today to join with my colleagues in supporting the reauthorization of the Economic Development Administration and, specifically, H.R. 2015. I especially want to support this measure because EDA play such an important role in rural economic development, a subject close to my heart. Two weeks ago this body passed H.R. 3581, the Rural Economic Development Act of 1990, a measure which will bring significant change for the better to rural areas across this country. EDA and the Rural Economic Development Act will work together to better serve our Nation's distressed rural communities. This partnership is clearly reflected by the fact that EDA representatives will serve as members of the Rural Economic Development Review Panels established by H.R. 3581.

EDA's economic development districts are public-private partnerships which allow local elected officials, business leaders and community representatives to work with development professionals in creating long-term plans for revitalizing and sustaining rural areas. No doubt, EDA's financial participation in many cases is the crucial link to making a rural economic development project reality. The record speaks for itself. Although EDA's 1988 investment in projects was a modest $127 million, this amount ultimately leveraged $1.5 billion in local and private sector funds. In fact, this investment has resulted in the creation of 56,729 long-term jobs.

Mr. Speaker, I urge my colleagues to join with me today in supporting the passage of H.R. 2015.

A REPORT ON THE SOVIET UNION'S "LAST GULAG"

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Mr. Speaker, I rise today on behalf of the prisoners in Perm Labor Camp 35 in the Soviet Union. Perm 35 has been called the "last Gulag" perhaps because it holds many of the remaining alleged Soviet political prisoners.

Last August, my colleague CHRIS SMITH and I were the first United States officials permitted to inspect a Soviet political camp—Perm 35. Last week, our head of the United States Prison Bureau, Michael Quinlan, who is our top correctional official, visited the same Soviet labor camp. He was joined by Chuck Colson, head of Prison Fellowship International, in a visit to several Soviet camps and prisons for an exchange of ideas, to offer expertise and also to further advance the opening up of the Soviet gulag.

I am deeply saddened that Mr. Colson and Mr. Quinlan met many of the same prisoners we met last year.

Goldovich—Sentenced to 15 years for treason to the motherland for attempting to cross the Black Sea in a rubber raft in 1985, when emigration was denied to him.

Klimchak—Sentenced for treason also for trying to flee the repression of a previous era by crossing the Iranian border, carrying short stories deemed nationalistic by the Soviets.

Kazachkov—Again, denied the right to emigrate and sentenced on espionage charges for meeting with a U.S. consular official. Then sentenced again in prison to 3½ years not in Perm 35, but the even stiffer regime of Chistopol Prison. This occurred after our visit with him and after his efforts to form a Helsinki monitoring group to monitor conditions in Perm 35.

Lubman—More than a decade of harsh punishment in Perm 35 for writing a manuscript exposing corrupt Soviet officials.

There are others facing similar excessive punishment for basically political acts committed during the Brezhnev era.

Mr. Speaker, we are led to believe that this is not the way the Soviets do business in the Gorbachev era. For months, the U.S. Helsinki Commission, Ambassador Richard Schifter, others in the State Department and Congressman SMITH and myself have

sought the release of these and other prisoners on humanitarian grounds.

These men should be released.

APRIL 4, 1990—A DAY OF REMEMBRANCE OF THINGS PAST

(Mr. FAUNTROY asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. FAUNTROY. Mr. Speaker, today is April 4, 1990, and I want to remind my colleagues that on April 4, 1968, 22 years ago, an assassin's bullet felled Dr. Martin Luther King, Jr., and that in the decade of the 1960's we lost four of the brightest, most courageous young men this Nation has ever produced—John F. Kennedy on November 22, 1963; Malcolm X on February 25, 1965; Martin Luther King, Jr., on April 4, 1968; and 2 months later, Robert F. Kennedy on June 5, 1968.

Their only crime was that they saw pain and wanted to heal it, and that they saw war and wanted to stop it. Born in this century, tempered by war, they wanted to build a world free of the barbarism of war and decadence, of racism and the scourge of poverty.

I hope at a time when the East-West tensions are winding down and resources are being released that we will join in their memory to build a nation and a world of justice where none shall prey upon the weakness of others, a nation and a world of plenty where greed and poverty will be eliminated, and, above all, a nation and a world of sisterhood and brotherhood where success is founded upon the kind of service that these four men sought to render this Nation, and where honor is given for the kind of nobleness that their lives represented.

NATIONAL WOMEN VETERANS RECOGNITION WEEK

(Mr. BILIRAKIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BILIRAKIS. Mr. Speaker, today, I am proud to introduce a joint resolution honoring the work and dedication of the more than 1.2 million women veterans in this Nation.

Women have served in and with the military service since our country was founded. Despite the fact that women are officially excluded from combat duty, we all know that many women veterans have served admirably under very difficult and dangerous circumstances. This was clearly demonstrated recently by the activities of women in the military action in Panama.

"National Women Veterans Recognition Week" is a time for this Nation to express our gratitude to all women veterans for their service. It is also a time for women to remember their years in uniform and take pride in their many contributions made to the security and well-being of this great country.

Mr. Speaker, "National Women Veterans Recognition Week" already has over 100 original cosponsors. I urge the rest of my colleagues to join me in supporting this important resolution.

□ 1240

TRIBUTE TO DR. MARTIN LUTHER KING, JR. AND ADAM CLAYTON POWELL, JR.

(Mr. FLAKE asked and was given permission to address the House for 1 minute.)

Mr. FLAKE. Mr. Speaker, today we recognize two individuals who gave their lives in the fight for civil rights, Dr. Martin Luther King, Jr., who died on April 4, 1968, and the Reverend Congressman, Adam Clayton Powell, who died on April 4, 1972. Both of them in their own way made a mark in history, by defining justice to all of society, by trying to assure that all persons in this society would have rights and access to be able to function within a society that considers itself the model of democracy for the whole world. Long before the changes in Eastern Europe came Martin Luther King, Jr., and Adam Clayton Powell, Jr., expressing the sense of righteousness, a sense of indignation on behalf of those who did not fulfill the moral obligations to see all human beings on the basis of the content of their character rather than the color of their skin.

Mr. Speaker, today, as we memorialize them, they represent the models out of which others have evolved to try to change the very fate of the Nation and the world in which we live. The evidence of what is happening in Eastern Europe today builds on the shoulders of Martin Luther King, Jr., and Adam Clayton Powell, Jr.

MOYNIHAN PROPOSAL TO CUT THE SOCIAL SECURITY PAYROLL TAX

(Mr. RIDGE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RIDGE. Mr. Speaker, I rise today to express my opposition to Senator MOYNIHAN's plan to cut the Social Security payroll tax and to express my surprise that the Democratic National Committee endorses it.

Mr. Speaker, this proposal endangers the Social Security trust fund reserves and could lead to substantially higher taxes when current obligations become due. The Moynihan proposal puts the future stability and integrity of the Social Security system in doubt and only creates problems where solutions are needed. It is unfair to future generations to eliminate reserves created for them and paid for by them.

Mr. Speaker, I do not know why the Democrats would endorse such a plan eagerly. Maybe they simply saw a surplus that they could not figure out a way to spend.

We may not know why the Democrats may want to threaten Social Security, but the American people should know that President Bush and the Republicans will try to do all they can to keep those Democratic hands off those Social Security benefits.

THE PRESIDENT'S TRANSPORTATION PLAN ABANDONS FEDERAL RESPONSIBILITIES

(Mr. OWENS of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OWENS of Utah. Mr. Speaker, I rise today to support officials in my State of Utah who are not favorably moved by the "moving America" part of the President's transportation plan. He wants the States and local governments to raise their taxes.

Mr. Speaker, this is nothing more than a shell game played to hide deficit spending with our Nation's trust funds, sticking it to the States and local governments and abandoning Federal responsibilities.

For nearly a decade now we have paid billions of dollars in taxes on each gallon of gasoline and each airline ticket with faith that this money would go into trust funds for maintenance of our highways and airports.

However, Mr. Speaker, while these billions of dollars in surplus remain unspent, our highways have been allowed to deteriorate, our bridges have become unsafe, our airports out of date. Our transportation system is no longer a worldwide symbol of our Nation's vitality. It is becoming a bumpy road to nowhere.

My colleagues, this is like a bank telling someone on Christmas Eve that it has decided to keep the money being put into Christmas club accounts because the bank is short of cash. State and local governments in Utah and all over this country are quite rightly saying, "Bah Humbug," to the President's plan. The latter-day Scrooge in the White House needs a visit from the Ghost of Reagan Past.

REMEMBERING ROBIN GATWOOD

(Mr. BALLENGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BALLENGER. Mr. Speaker, I am a cosponsor of House Joint Resolution 467, a resolution to authorize and request the President to proclaim Sep-

tember 21, 1990, as National POW/MIA Recognition Day. While September is several months away, I want to use the opportunity of my cosponsorship of this legislation to relate a personal story.

I have a special interest in the continued search for missing servicemen in Southeast Asia because the son of a friend of mine is among the missing. During the Vietnam conflict, Robin Gatwood, a fighter pilot, was shot down and reported missing. Since that time his father, Dr. Robin Gatwood, has been a leader in the effort to locate our missing servicemen.

I can only imagine the frustration and pain that parents, spouses, and friends continue to feel, knowing that loved ones could still be alive and held captive in Southeast Asia. I know from talking with Dr. Gatwood that one of the sources of this frustration is the U.S. Government. The process of locating missing men has been, and continues to be, a long seemingly unending process. The very least we can do as a legislative body is to continue to call attention to this issue by proclaiming a day of recognition.

We must continue to send the message to Hanoi that we will not forget our fellow citizens. This resolution will help achieve that goal.

CRACKING DOWN ON PENNY STOCK FRAUD AND ABUSE

(Mr. WYDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYDEN. Mr. Speaker, worthless penny stocks are the ripoff vehicle of choice for growing numbers of fly-by-night operators who work out of boiler rooms to try to rip off the elderly and the vulnerable.

So, Mr, Speaker, I am particularly pleased to join today with the gentleman from Michigan [Mr. DINGELL], the gentleman from Massachusetts [Mr. MARKEY], and the gentleman from New Jersey [Mr. RINALDO] in introducing legislation to crack down on penny stock fraud and abuse.

Our legislation mandates increased disclosure of the risks of these stocks, gives regulators additional tools to bar the crooks from promoting these stocks and creates a new system of review to block the sale of inherently fraudulent penny stock offerings.

Mr. Speaker, last year, at the direction of the gentleman from Massachusetts [Mr. MARKEY] I held a hearing of our subcommittee in Portland to examine this important financial issue. We saw a little bit of the high pressure sales tactics that are being used to bilk unsuspecting investors of an estimated $2 billion each year. It is high time that we stop these blank check offerings that are really a black hole for most investors, and I commend our colleagues to the bipartisan legislation that we introduced today.

WHY THE FEDERAL GOVERNMENT IS $300 BILLION IN DEFICIT EVERY YEAR

(Mr. ROHRABACHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROHRABACHER. Mr. Speaker, we hear charges from the other side of the aisle that President Bush is violating his "no new tax" pledge by relying on State and local governments to pick up responsibilities, responsibilities that the other side of the aisle would prefer were left totally to the Federal Government.

Mr. Speaker, one of the reasons the Federal Government is bankrupt, that the Federal Government is basically $300 billion in deficit every year, is because the Federal Government has taken on every task that needs to be taken on around the United States, co-opting local government, and State government and the private sector and co-opting local funds right along with those responsibilities.

President Bush offers us a responsible alternative. He is not for raising taxes, which would be the most irresponsible alternative. Instead he is seeking to refocus on federalism and to make sure that the Federal Government, along with the State and local governments, performs their tasks responsibly.

THE PENNY STOCK REFORM ACT OF 1990

(Mr. MARKEY asked and was given permission to address the House for 1 minute.)

Mr. MARKEY. Mr. Speaker, I am pleased to announce the introduction of the Penny Stock Reform Act of 1990 today, a comprehensive effort to clean up the rampant fraud now pervading the penny stock market. The gentleman from Michigan [Mr. DINGELL], chairman of the Committee on Energy and Commerce, joins with me in the introduction of this legislation today along with the gentleman from New Jersey [Mr. RINALDO], the ranking minority member, and the gentleman from Oregon [Mr. WYDEN]. Joining as well as the gentleman from New Mexico [Mr. RICHARDSON], the gentleman from California [Mr. MOORHEAD], and the gentleman from Maryland [Mr. MCMILLEN]. In particular I would like to note the extraordinary contributions of the gentleman from New Jersey [Mr. RINALDO] and the gentleman from Oregon [Mr. WYDEN] and their staffs who have been so dedicated to developing legislation in this area.

As my colleagues can imagine, we are looking for additional cosponsors. We believe this is a very important piece of legislation which has an excellent change of passing this year, and we are looking for additional support from Members of this House.

Mr. Speaker, last fall the Subcommittee on Telecommunications and Finance held two hearings to examine the problem of fraud in the penny stock market. According to the findings of the North American Securities Administrators Association's 50-State survey, investors lose $2 billion or more each year due to fraud and abuse in the penny stock market.

□ 1250

The legislation that we are introducing today would expand the Securities and Exchange Commission's authority to bar crooked promoters and consultants from the Securities business, mandate that all penny stocks trade through an automated quotation system and greatly expand disclosure.

We believe it is an excellent bill. We would like your support, and we look forward to its swift passage this year.

LITHUANIAN INDEPENDENCE

(Mr. COX asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COX. Mr. Speaker, not long ago President Vaclav Havel, of Czechoslovakia, delivered an address to a joint meeting of this Congress that talked about democracy and the rebirth of the human spirit. It was a stirring image, reminding us that democracy is winning in Eastern Europe.

Mr. Speaker, the new President of Lithuania makes President Vaclav Havel look like a career politician. Dr. Vytautas Landsbergis is a professor of music. He teaches piano at the Conservatory of Music in Vilnius. Last year, before he was President of Lithuania, Dr. Landsbergis and I met in my office across the street to write out the first version of a resolution supporting Lithuanian independence. By the time I left for the February elections in Lithuania, we had gathered already 80 cosponsors.

Today this Congress will vote on a resolution in support of Lithuanian independence that is supported by the leadership of both the Democratic and Republican Parties. The message from this Congress to the Soviet Union will be clear. America has never recognized the forcible incorporation of Lithuania into the Soviet Union. We want a stop to the violence against the Western press and the innocent Lithuanian people. Lithuania will be free, and I am proud as a consequence of the vote today that the American people and this Congress will stand shoulder to shoulder with her.

DEMOCRATIC PARTY CAN NO LONGER BE TRUSTED ON SOCIAL SECURITY

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, it has been very worthwhile to have several Members today focus attention on the stunning reversal done by the Democratic Party on the issue of protecting the Social Security System and Social Security benefits. It is a leader of the Democratic Party who has proposed doing away with Social Security COLA's this year. It is a leader of the Democratic Party who proposed abandoning the bipartisan accord on Social Security of 1983, thereby jeopardizing the integrity of the Social Security System. It is the National Democratic Party that has gone on record as supporting the abandonment of the bipartisan accord, and thereby have said to generations of Americans now paying Social Security taxes that there may be no benefits for them in the future. For a party that has long billed itself as a defender of Social Security, this is a big switch. What this switch says is clear. The Democratic Party can no longer be trusted on Social Security.

WE MUST STAY THE COURSE OF JEWISH FAMILIES EMIGRATING FROM SOVIET UNION

(Mr. SKAGGS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKAGGS. Mr. Speaker, we have seen some enormous changes in the world in the last year. Where there was once silence and oppression, there are now new voices of hope. The wall that separated East from West for so long has been torn down, and in its place is a negotiating table.

But for many Jewish families who dreamt for years of emigrating to the West, these changes have turned their dreams into reality. We are right to welcome and praise the increase of Jewish emigration from the Soviet Union, but in our enthusiasm and praise we cannot close our eyes to the thousands of families who are still waiting to emigrate. We cannot close our eyes to those who because of supposed "state secrets" from jobs they held 15 years ago, supposedly, are still denied exit visas. We cannot close our eyes to those would-be immigrants who now have to wait for 1 year because the Soviet Union is restricting flights to Israel.

The Jackson-Vanik amendment has been an appropriate and legitimate standard against which to measure Soviet emigration policies. In our economic and political relations with the Soviet Union, we must remain insistent about free emigration rights, and forceful in protesting the arbitrary treatment of long-term refusniks. Change in the Soviet's emigration policies must be pushed to a just conclusion. Our steadfastness of purpose has accomplished a great deal. Now we must stay the course.

PRESIDENT BUSH'S NO TAX PLEDGE

(Mr. HANCOCK asked and was given permission to address the House for 1 minute.)

Mr. HANCOCK. Mr. Speaker, my colleagues on the other side of the aisle have mentioned several times today that President Bush's no tax increase pledge only applies to the Federal Government, that he is in fact advocating tax increases at the State and local levels.

Let us get the facts straight. State and local problems and lack of funds emanate from a wasteful and bloated Federal Government which has over the past 50 years of a Democrat-controlled Congress preempted the prerogatives of State and local governments.

More specifically, we have moved State and local governments tax bases to Washington, DC. It is time we discontinued this course. Over time, this is one of the things President Bush's no tax increase pledge will accomplish.

LIMIT FURTHER PRODUCTION OF THE B-2 BOMBER

(Mr. SLATTERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLATTERY. Mr. Speaker, there is more bad news for the B-2. The Director of the Congressional Budget Office, Mr. Reischauer, has just written our colleague, the gentleman from Ohio [Mr. KASICH], a letter wherein he indicates that the cost estimate of the B-2 has now been increased by some $6.5 billion over the most recent administration estimate. In this letter, Mr. Speaker, the CBO Director indicates that this is due to the fact that the administration has underestimated the inflation rate in their proposal, and in addition to that has also not adequately accounted for modifications that the program anticipates, and lastly, the other reason is that the current estimate of the B-2 learning curve assumes efficiencies and cost reductions are realized more rapidly than has been the case for other aircraft, including the B-1B bomber.

Mr. Speaker, I would just observe that this is another reason why I urge my colleagues to join me and my friend, the gentleman from Ohio, and my friend, the gentleman from California in cosponsoring H.R. 3978, which proposes to limit further production of the B-2 to the 15 that are under production and save the taxpayers of this country some $35 billion to $40 billion.

□ 1300

SAVE THE EASTERN MARKET

(Mr. INHOFE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. INHOFE. Mr. Speaker, the city of Washington, DC has come up with yet another brilliant idea. This time the idea entails the shelling and remodeling of historic Eastern Market. I know that many of you, like myself, have been going to the Eastern Market for years. The fresh fruit and produce that arrives every Saturday from farmers all the way from West Virginia to the Eastern Shore in Maryland attract visitors and residents alike. Although it is an unpretentious place, national publications like the Washington Post, New York Times, Vanity Fair, and Conde Nast Traveler, have recognized and sung the praises of the greatness of the food, produce, and atmosphere.

And now what is the D.C. administration proposing? As part of a neighborhood revitalization project they have tacked on a costly provision to remodel Eastern Market for the whopping sum of $3.8 million. This amount can only be considered additional, wasteful debt. When the District of Columbia is suffering from severe infrastructure problems, they should be directing their precious funds to more worthwhile and necessary projects like making the roads serviceable, and addressing the ridiculously high crime rate. The great historical institution of Eastern Market does not want, need, or require any doctoring. The D.C. government annually informs Congress about the efficient and frugal system that they run, I hope that this absurd proposal is not an indication of the District of Columbia's efficiency and frugality.

Going into the Eastern Market all of your senses are greeted—the sights of the beautiful fruit and vegetables, the wonderful smells of fresh breads and meats, and the sound of chattering and laughter by relaxed and happy workers and visitors. All of this would change dramatically, and for the worse, if the city of Washington gets its way and succombs to the sterility, superficiality, and greed of chain eateries.

The officials who so brilliantly concocted this plan seem to be completely oblivious to the fact that this act would totally destroy the charm and atmosphere that make it so popular and so unique. Through renovation are they thinking of creating another Union Station? A place with chain eateries? A place where longstanding concessionaires like Tommy Glasscoe

are no longer wanted or appreciated? Mr. Glasscoe and those like him have helped to create the history and atmosphere that is such a great part of Eastern Market. In fact, without them, Eastern Market could not exist.

What we have here is the blatant manipulation by a city bureaucracy of the city code to do away with a part of the District of Columbia history despite the wishes of residents and patrons. I recognize it for what it is because as a three-term mayor of a major metropolitan city, I fought hard against the city bureaucracy which tried to use the city code to push through its own agenda.

While this project would be incurring huge debts, taking moneys away from virtually necessary projects and essentially mortgaging the District of Columbia even more, it would all be money wasted. The patrons who now frequent Eastern Market and enjoy it as it is, would stop visiting Eastern Market. They would stop going to Eastern Market because the essence of the place would be gone. Then, there would not even be the patrons to help alleviate the costs that the District of Columbia would have heaped on Eastern Market.

The so-called renovation would completely and utterly destroy a historical, cultural, and social center of Capitol Hill. The notion that the D.C. government could even consider dropping a $3.8 million bomb on the Eastern Market is unbelievable. Let us not fix what ain't broke—keep Eastern Market out of meddling hands—keep it as it is.

HOUSE CONCURRENT RESOLUTION 271 SEEKS RELEASE OF HOSTAGES

(Mr. MAZZOLI asked and was given permission to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, I rise in very proud support of House Concurrent Resolution 271, which was passed by this body last evening. It is a sense-of-Congress resolution expressing the fervent desire that the President of the United States seek the release of the hostages who have been held in Lebanon for these many years, and to put that release as a high priority and do everything in his power and this Nation's power to expedite and accelerate the release of these people.

House Concurrent Resolution 271, Mr. Speaker, would be always of interest to every American and to all of us as citizens of this country, but it is of special importance to people from Kentucky. One hostage, Terry Anderson, who has been held now for over 5 years—March 16 was the fifth terrible anniversary of his incarceration—has a sister, Peggy Say, who is now a resident of west Kentucky in the District, I believe, of my friend from the First District, the gentleman from Kentucky [Mr. HUBBARD]. Therefore, I hope, as a Kentuckian, as a citizen of this country, and really as a citizen of the world, that House Concurrent Resolution 271, authored by my friend the gentlelady from New York [Ms. SLAUGHTER], is swiftly moved by the other body, and does, indeed, help us seek and realize the release of these hostages.

IF WE WAIT, THEY WILL BUY

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, Baltimore baseball fans do not often agree with George Steinbrenner, the owner of the Yankees, but we are as concerned as he that a Japanese company has bought the Double A Birmingham Barons.

This is another Japanese test for Americans to face.

Americans like TV—and now the Japanese make most of our TV's.

Americans love cars—and now Honda makes America's No. 1 selling car.

Americans love movies—and now Sony owns Columbia Pictures.

Baseball is America's pastime—and now the Japanese are in the ballpark, in the stands, ready to take the field.

When will the umpires call "foul"? You cannot say the Japanese can make baseball better, can make it smaller—it does not apply—90 feet will always be the distance from third to home.

But they can own and take control of the only business the Supreme Court has decided is not subject to antitrust laws.

And one of America's favorite songs "Take Me Out to the Ballpark" could be changed to "Buy Me Some Suchi with Crackerjacks."

And to paraphrase the award winning film "Field of Dreams"—if we wait—they will buy.

INTRODUCTION OF A BILL REGULATING PENNY STOCKS

(Mr. RINALDO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RINALDO. Mr. Speaker, today, I joined Congressman DINGELL, the chairman of the Energy and Commerce Committee; Congressman MARKEY, the chairman of the Subcommittee on Telecommunications and Finance, and RON WYDEN, the gentleman from Oregon, in introducing a bill to significantly increase the regulation of the penny stock market. That makes today an important day in the history of investment in this country.

The penny stock market has been a continuing source of investor fraud. Every year thousands of investors fall victim to penny stock schemes aggregating in the millions of dollars, but that individually are each so small that in most cases they slip between the cracks of law enforcement. Federal and State securities regulators have applied their limited resources to the problems of the penny market for years, but have not been able to effectively protect investors.

The bill introduced today mandates increased securities industry self-regulation of the penny stock market. This is an entirely different approach from the traditional problem solving suggestion of increased Government regulation. The securities industry is being called upon to help clean up its own house and the combined resources of the Federal Government, the States and the industry, may finally put an end to this terrible abuse of small investors.

In the weeks to come I am looking forward to the debate on this important bill and I urge all my colleagues to support our efforts.

PRAY FOR HOSTAGES IN LEBANON

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, I want to join the gentleman from Kentucky sitting in the Chair in an appeal to our fellow Americans over this religious holiday that we are about to take to pray for our eight Americans and the other European hostages who are held in some horrible dungeon confinement in the Middle East.

The hostage crisis that ended after the Vietnam war where Americans were held missing in action against their will, and have now, I guess, drifted into a historical footnote to history, because it has been, after all, since 1973 since we had the majority of our POW's returned. We have now passed, as the gentleman pointed out, Mr. Speaker, the halfway point on March 16, just a few days ago, the longest held hostage, a Kentuckian, Terry Anderson, or, rather, his sister has now become a Kentuckian, we passed the 5-year point; the longest American POW who was returned was an American Army Green Beret major named Floyd Thompson. He was held 1 week shy of 9 even years.

So Terry Anderson is now half a year past the midpoint of the longest held American throughout the 214 years of our history.

This is a sad situation as we celebrate the resurrection of Jesus Christ. This beautiful Easter holiday I would

ask every American in our great Nation of 250 million people to find some moment either on Good Friday or on that joyous Easter celebration day when more Americans go to church probably than any other day other than the birth of Christ, Christmas.

Please, pray for the speedy return of the 24 hostages held in the Middle East and our 8 Americans.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. MAZZOLI). Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 5, rule I, the Chair will now put the question on each motion to suspend the rules on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 1048, by the yeas and nays; and

House Concurrent Resolution 289, by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic vote after the first such vote in this series.

HATE CRIME STATISTICS ACT

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and concurring in the Senate amendment to the bill, H.R. 1048.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York [Mr. SCHUMER] that the House suspend the rules and concur in the Senate amendment to the bill, H.R. 1048, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 402, nays 18, not voting 13, as follows:

[Roll No. 66]

NOT VOTING—13

Akaka	Ford (TN)	Stump
Clay	Gingrich	Vento
Feighan	Hatcher	Yates
Flippo	Lowey (NY)	
Ford (MI)	Nelson	

□ 1330

The Clerk announced the following pair:

On this vote:

Mr. Nelson of Florida and Mr. Clay for, with Mr. Stump against.

Messrs. ARMEY, DORNAN of California, MARLENEE, McEWEN, HUNTER, and HAMMERSCHMIDT changed their vote from "yea" to "nay."

Mr. PETRI changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate amendment was concurred in.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. MAZZOLI). The Chair will advise Members that the Chair will reduce to 5 minutes the time for an electronic vote on the additional motion to suspend the rules on which further proceedings were postponed.

IN SUPPORT OF LITHUANIAN INDEPENDENCE

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and agreeing to the concurrent resolution (H. Con. Res. 289) as amended.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana [Mr. HAMILTON] that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 289) as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 416, nays 3, not voting 14, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

The title of the concurrent resolution was amended so as to read: "Concurrent resolution in support of the right of the Lithuanian people to independence."

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. AKAKA. Mr. Speaker, I was unavoidably detained on the Senate side and was not able to vote on rollcall No. 66, H.R. 1048, the Hate Crime Statistics Act. Had I been here, I would have voted "aye."

Mr. NELSON of Florida. Mr. Speaker, had I been present, I would have voted "aye" on rollcall No. 67.

□ 1340

ORGAN TRANSPLANT AMENDMENTS ACT OF 1988 EXTENSION

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 3968) to amend the Organ Transplant Amendments Act of 1988 to change an effective date.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. MAZZOLI). Is there objection to the request of the gentleman from California?

Mr. BILIRAKIS. Mr. Speaker, reserving the right to object, I do not object, but I rise to ask the chairman of the Subcommittee on Health and the Environment of the Committee on Energy and Commerce to explain very briefly this bill to the rest of us.

Mr. WAXMAN. Mr. Speaker, will the gentleman yield?

Mr. BILIRAKIS. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, organ procurement organizations are local agencies responsible for retrieving organs. They must be certified by the Health Care Financing Administration, and recertified every 2 years, in order to receive Medicare payments. When they come up for recertification this spring, they will be subject to a new, more ambitious standard of performance than when they were originally certified. This standard was adopted by the Congress in 1988, with a delayed effective date.

As many as half of the 72 existing OPO's may be in jeopardy of not meeting the new standard and being denied recertification. If that occurred, it would seriously harm the organ transplant program. The bill before us now, H.R. 3968, will delay the applicability of the new standard until January 1, 1992. This will preserve the status quo and avoid decertifications, giving us time to carefully reexamine the applicable standard.

I urge the members to agree to this unanimous-consent request and to adopt the bill today.

Mr. Speaker, I would ask the gentleman from Florida to yield to the gentleman from Pennsylvania [Mr. WALGREN] to further address the substance of this legislation, since the bill before us is the product of his activities.

Mr. BILIRAKIS. Mr. Speaker, I am glad to yield to the gentleman from Pennsylvania.

Mr. WALGREN. Mr. Speaker, I thank the gentleman for yielding.

I rise to underscore the importance of the House passing this bill and to say how marvelous it is to see the House act so swiftly when there is a real need. And there is a real need in this instance. All of us know instinctively the importance of the national organ procurement system. We have witnessed families and parents in what often amounts to almost a race with death to try to find a matching organ for one of their children when that child's life is literally at stake.

We have had growing pains or starting-up pains as we have tried to establish over these last several years a national organ procurement system. It is one that has been give much lipservice but little money. But it is important that these organizations that are in the field be able to continue.

In the past, in 1988, we required them to find at least 50 organs a year, and that requirement was in place by this spring, so literally half of the procurement organizations would be required to be decertified by the Department of Health and Human Services this spring if we do not extend this date. Obviously we need to build on the foundation they have started.

The chairman of the Subcommittee on Health and the Environment is planning reauthorization hearings on organ transplants this summer. We ought to do this in the right way, and the way to do that is to not shut these organizations down now but to extend this date.

Mr. Speaker, I thank the gentleman for yielding.

Mr. BILIRAKIS. Mr. Speaker, continuing my reservation of objection, I would merely supplement the remarks of my colleagues with whom I serve on the committee. I commend and thank the chairman of the subcommittee, the gentleman from California [Mr. WAXMAN], and the gentleman from Pennsylvania [Mr. WALGREN] for their comments and for their interest in this subject.

I would merely add that we oftentimes question what the proper role of the Federal Government might be, and I should think that the Federal Government must be involved when it comes to something like this, when only the Federal Government can actually motivate and encourage a Federal national registry of this type.

Mr. Speaker, I wish to commend also my colleague, the gentleman from Florida [Mr. YOUNG], who shares Pinellas County in Florida with me. The gentleman from Florida [Mr. YOUNG] has played a very large part in the national registry of bone marrow donors.

I would merely like to add, Mr. Speaker, that even though this is not part of this bill, because we are merely extending the time, I am very hopeful that we can come up with some sort of a solution to this business of registering, because for a person to even be tested to determine whether or not they might become a part of the registry, it costs them $75 per person as a fee. It rubs me a little wrong that a person has to pay in order to be able to volunteer his name and his future bone marrow.

We know that a bone marrow transplant is a cure for more than 60 formerly fatal blood disorders such as leukemia and aplastic anemia. The only limitation on this program is our ability to bring together matched donors and patients.

Mr. Speaker, again I commend my subcommittee chairman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California.

There was no objection.

The Clerk read the bill, as follows:

H.R. 3968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 402(c)(3) of the Organ Transplant Amendments Act of 1988 (42 U.S.C. 273 note) is amended to read as follows:

"(3) The amendment made by paragraph (1)(A) shall take effect on January 1, 1991.".

COMMITTEE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The SPEAKER pro tempore. The Clerk will report the committee amendment in the nature of a substitute.

The Clerk read as follows:

Committee amendment in the nature of a substitute: Strike all after the enacting clause and insert in lieu thereof: That section 402(c)(3) of the Organ Transplant Amendments Act of 1988 (42 U.S.C. 273 note) is amended by striking "until 2 years" and all that follows and inserting "until January 1, 1992.".

The committee amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title of the bill was amended so as to read: "A bill to further delay the applicability of certain amendments to the Public Health Service Act that relate to organ procurement organizations."

A motion to reconsider was laid on the table.

PUBLIC WORKS AND ECONOMIC DEVELOPMENT AMENDMENTS OF 1989

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call us House Resolution 372 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 372

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2015) to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and which shall not exceed one hour, with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation, and with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs, the bill shall be considered for amendment under the five-minute rule. In lieu of the amendments now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill (H.R. 4435) as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered by titles instead of by sections, and each title shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from South Carolina [Mr. DERRICK] is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], and pending that, I yield myself such time as I may consume.

□ 1350

Mr. Speaker, House Resolution 372 is an open rule providing for the consideration of H.R. 2015, the Public Works and Economic Development Act Amendments of 1989. This is a bill that would amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965.

This resolution is a straightforward rule. It is open and provides for 1 hour of general debate, with 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation and 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs.

The rule makes in order the text of H.R. 4435 as an original bill for the purpose of amendment. This bill is simply a combination of two reports from the committees of original jurisdiction on this bill; it makes no substantive changes to H.R. 2015. The

rule further states that H.R. 4435 is to be considered by titles, with each title considered as having been read.

Finally, Mr. Speaker, this rule provides for one motion to recommit with or without instructions.

Mr. Speaker, this rule provides for the consideration of a bill that would provide new authorizations for both the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965. It would also amend these programs to meet current needs. As some of my colleagues will remember, the administration has not supported reauthorization of these programs since their expiration in 1982.

Mr. Speaker, evaluations of the existing EDA and ARC programs have shown them to be highly successful Federal investments. The funds provided through these programs have leveraged billions of dollars in private capital, created and saved millions of private sector jobs, and returned billions of tax dollars to Federal, State, and local treasuries.

In my region of South Carolina alone, these programs have recently supported an industrial and business development center in Pendleton, SC; a 5-million-gallon water storage facility in Greer; and a water line for Anderson County.

Our country needs to continue developing its infrastructure if we are to remain competitive in international markets. In doing this we should fully utilize all of our country's regions. H.R. 2015 is designed to ensure that the Economic Development Administration and the Appalachian Regional Commission contribute to the goal of nurturing and diversifying the economies of urban and rural communities in the United States.

Mr. Speaker, House Resolution 372 is a straigthforward rule that will facilitate the consideration of this bill. I urge my colleagues to adopt this rule and the underlying bill, H.R. 2015.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to commend the members of the two committees with jurisdiction over this bill, the Committee on Public Works and Transportation and the Committee on Banking, Finance and Urban Affairs, for their hard work in bringing this bill to the floor of the House.

The programs authorized in this bill, the Economic Development Administration and the Appalachian Regional Commission have made major contributions to economic growth in my region of the country. In the years these programs have been in effect there has been great improvement. There is still much more to be done, and it is crucial that both the Economic Development Administration and the Appalachian Regional Commission be continued.

The rule that is before us today is the right way to bring this legislation to the floor. There are no restrictions on the normal open amending process. There are no waivers of the Budget Act and there are no waivers of the rules of the House. This is the kind of rule we should use more often.

Mr. Speaker, I ask for a yes vote on this rule, so that the House may proceed promptly to the consideration of the legislation to authorize the Economic Development Administration and the Appalachian Regional Commission.

Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. MAZZOLI). Pursuant to House Resolution 372 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2015.

The Chair designates the gentlewoman from New York [Ms. SLAUGHTER] as the Chairman of the Committee of the Whole, and requests the gentleman from Florida [Mr. BENNETT] to assume the chair temporarily.

□ 1355

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2015) to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, with Mr. BENNETT (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from California [Mr. ANDERSON] will be recognized for 15 minutes, the gentleman from Arkansas [Mr. HAMMERSCHMIDT] will be recognized for 15 minutes, the gentlewoman from Ohio [Ms. OAKAR] will be recognized for 15 minutes, and the gentleman from California [Mr. SHUMWAY] will be recognized for 15 minutes.

The Chair recognizes the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 2015, a bill designed to help some of our Nation's most economically distressed communities move toward economic growth and stability.

The bill contains two titles. Title I, the National Development Investment Act, revises and reauthorizes the programs of the Public Works and Economic Development Act by providing economic tools to local communities that need special assistance. Title II amends the Appalachian Regional Development Act consistent with the policies endorsed by the Appalachian Governors.

H.R. 2015 is substantially the same as H.R. 2686 which passed the House in the 100th Congress by a bipartisan vote of 330 to 89 and is similar to bills which overwhelmingly passed the House in the three preceding Congresses.

Many Members know from firsthand experience of communities in their own districts that have benefited from successful economic development programs. There is a continuing urgency to maintain a Federal role in targeting economic programs to areas that have been bypassed during periods of national economic expansion such as we have recently experienced. The strength of our national economy depends on the cumulative effect of self-sufficient and productive local and regional economies. It is essential that we develop and maintain our Nation's economic strength in order to deal with the effects of changing world economies.

This legislation is the result of extensive legislative and oversight hearings and indepth evaluations of existing programs. Many hours of hard work over a period of several years have been expended by both the Committee on Public Works and Transportation and the Committee on Banking, Finance and Urban Affairs. I want to commend the gentleman from Illinois, Congressman GUS SAVAGE, chairman of our Subcommittee on Economic Development, who guided H.R. 2015 through our committee.

I also want to thank former chairmen of the Economic Development Subcommittee. The dedicated leadership of Congressman JIM OBERSTAR, of Minnesota, over a period of several years was instrumental in bringing about this carefully constructed economic development initiative, and Congressman HENRY NOWAK, of New York, worked hard during his chairmanship to garner support.

Thanks are also due Representative BOB MCEWEN, of Ohio, who was ranking Republic member of the subcommittee last year and Representative RON PACKARD, of California, who recently took over that position, for their active cooperation in reporting in H.R. 2015, and Representative JOHN PAUL HAMMERSCHMIDT, of Arkansas, ranking Republican member of the full committee, and Representative

BILL CLINGER of Pennsylvania, former ranking member of the subcommittee whose contributions to the legislation and whose constant support and effort helped make this bill possible.

Special thanks also go to members of the Banking, Finance and Urban Affairs Committee, especially to Chairman GONZALEZ and to Congresswoman MARY ROSE OAKAR, who chairs the Subcommittee on Economic Stabilization, for their fine work.

The National Development Investment Act emphasizes a local leadership role, greater private sector and intergovernmental cooperation and coordination than is found in existing law, and greater leveraging of the Federal dollars. The bill authorizes grants of up to 50 percent for basic public infrastructure, for locally administered revolving loan funds to assist small businesses to set up employee stock ownership organizations, for other projects that promote small business development and job creation as well as for planning and assisting in preparing investment strategies.

Eligibility is based on distress criteria that target funds to areas of need where there is potential for success. The long-term designation under existing law is eliminated and applicants must demonstrate distress with each application.

The bill authorizes $276 million for the National Development Investment Act and $185 million for the Appalachian Regional Commission programs for each of the fiscal years 1991, 1992, and 1993. These authorization levels are considerably lower than the pre-1982 levels and reflect the committee's strong commitment to helping reduce the Federal deficit while maintaining a Federal role in regional and subregional economic development. These programs provide the foundation for growth and productivity and serve an essential national economic and social purpose.

Mr. Chairman, I urge passage of H.R. 2015 and I reserve the balance of my time.

□ 1400

Mr. HAMMERSCHMIDT. Madam Chairman, I yield myself such time as I may consume.

Madam Chairman, once again we have before us a bill to reauthorize the programs of the Economic Development Administration [EDA] and the Appalachian Regional Commission [ARC].

The House has expressed strong support in the four previous Congresses for legislation reauthorizing these programs, which since 1965, have provided the impetus for revitalization and development in economically distressed areas. With each bill, the Public Works and Transportation Committee has worked diligently and in bipartisan fashion to address legitimate concerns raised about these programs.

The bill before us today is one with eligibility criteria sufficiently narrowed so that the modest amount of Federal funds authorized are specifically targeted to the most distressed areas of the country and to those projects with the greatest potential for success. And the authorization levels specified in this bill are considerably reduced from those prior to 1982 when we made the first of our four attempts to reauthorize these programs.

Several significant reforms are made in the EDA and ARC programs by this bill. Areas eligible for EDA assistance have been reduced from close to 80 percent to roughly 40 percent of the Nation. Limitations have been imposed on the grant and loan amounts which can be awarded for an eligible project. Long-term designations of distress are eliminated and annual certifications are mandated. Most importantly, the bill requires comprehensive, coordinated planning between State and local officials to insure that long term successful economic development strategies are implemented.

One can argue over various provisions of an EDA reauthorization bill and over certain aspects of the overall program. However, there really should be no argument as to the validity of needs in economically distressed communities throughout this country. The economic expansion of the past few years has not reached into all segments of the population. Communities in many areas have seen their basic public infrastructure facilities collapse or hover at the brink of collapse. There can be no economic growth or expansion for those areas under such circumstances.

H.R. 2015 represents an important effort toward the rebuilding of those vital public infrastructure facilities it authorizes $200 million a year over 2 years for grants for the construction repair and rehabilitation of those facilities as well as to create revolving loan funds to stimulate the growth of small businesses. Emphasis is placed upon the leveraging of private funds and the development of long-term economic recovery strategies designed to aid distress areas in attaining economic self-sufficiency.

H.R. 2015 also extends the highway and nonhighway programs of the Appalachian Regional Commission, in line with the current request of the Appalachian Governors. Continued economic development assistance is provided to be utilized toward area redevelopment programs and the construction of the developmental highway system for one of the most economically depressed areas of the country.

I commend Chairman GLENN ANDERSON; our Economic Development Subcommittee chairman, GUS SAVAGE; the subcommittee's former ranking Republican member, BOB MCEWEN; and the current ranking Republican member, RON PACKARD for their leadership in crafting this legislation. The program reforms included in this measure need to be enacted into law, and I hope this will be the Congress in which we do just that.

Mr. HAMMERSCHMIDT. Madam Chairman, I ask unanimous consent to yield the balance of my time and that time to be controlled by the gentleman from California [Mr. PACKARD], the chairman of the subcommittee.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Ms. OAKAR. Madam Chairman, I yield myself such time as I may consume.

Madam Chairman, I appreciate the opportunity to be one of the floor managers of H.R. 2015, to support one of the finest bills I think relative to economic development, creation of jobs, trying to wipe out poverty in this country, the Public Works and Economic Development Amendments of 1989.

First of all, I want to thank many of the members of the committees for supporting this bill and for their cooperation. I want to thank the committee chairman, the gentleman from Texas [Mr. GONZALEZ] and the gentleman from Ohio [Mr. WYLIE], the minority leader of the full committee; my minority leader, the gentleman from California [Mr. SHUMWAY] who is always extremely cooperative, for their bipartisan spirit in addressing the bill.

I want also to thank the committee chairman, the gentleman from Massachusetts [Mr. MOAKLEY] and the ranking member, the gentleman from Tennessee [Mr. QUILLEN] and the Rules Committee for giving us an open rule and dealing with the rule expeditiously.

In addition, it is always a pleasure to deal with the committee chairman, the gentleman from California [Mr. ANDERSON] and the ranking member, the gentleman from Arkansas [Mr. HAMMERSCHMIDT], the gentleman from Illinois [Mr. SAVAGE], who is the chairman of the subcommittee; the gentleman from California [Mr. PACKARD], the gentleman from Ohio [Mr. MCEWEN], and others. They do a terrific job for us in this country relative to Public Works, and it is a pleasure to have this bill sent to both committees, because we work in a spirit of cooperation.

Madam Chairman, the bill amends the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965.

Basically, I will revise and extend my remarks, but I want to say that testimony has supported the fact that national monetary and fiscal policy has not reached all areas of our country in a timely and equitable manner. The EDA and the ARC programs have targeted areas of our country that are most in need, provide for an economic development policy which includes financial assistance by the Federal Government in economically distressed areas of our country.

Just to give you a statistic that I think is important, and this bill has been a part of law since 1965, but as of 1981 the EDA with a modest investment has generated 1.4 million jobs in the private sector, leveraged $9 billion in private capital and was responsible for returning $6.5 billion annually to Federal, State, and local treasuries.

With respect to the Appalachian program that we have on the books, per capita income in the Appalachian region has risen 10 percent. More than 1 million jobs have been created, and the poverty level has declined 54 percent in this formerly isolated region.

Madam Chairman, let me also add, and I want to emphasize this, we had during our subcommittee hearings members of the Energy Department and the Pentagon testify about the relevance of title IX. Title IX of the Public Works and Economic Development Act of 1965 authorizes the EDA to provide special economic development and adjustment assistance in areas experienced or threatened by sudden and severe economic dislocation, as well as areas suffering long-term economic deterioriation.

Recently this committee which I chair, the Economic Stabilization Subcommittee of the Committee on Banking, Finance and Urban Affairs, heard testimony from the administration, as I mentioned, on the sectorial economic ramifications concerning future defense reductions and the consequences of such cuts on the microeconomy, the industries, the work force, and the communities where defense production has taken place.

In other words, this title will specifically target areas that must have an economic recovery and must maintain something that was formerly a defense industrial base. They will be able with some help and some planning and some seed money from the Government to be able to translate their defense base to a civilian industrial base.

We do not want to see dramatic losses of jobs in this country when we reduce the defense budget. Title IX specifically seems to address in a small part that problem.

Indeed, no Member wants to witness economic disruption within their districts, so I would certainly want my colleagues to know that the administration in this respect did testify that the EDA was the best vehicle to facilitate such a transition.

Madam Chairman, for this reason and the fact that the EDA and ARC have demonstrated their viability and success and because these programs have shown that a subnational economic development policy is cost-effective, I want to have a really resounding success with this bill, because frankly we ought to be doing more targeting and we ought to be doing more for economic recovery in this country. We ought to be doing more to help those communities who have roads and bridges that need repair, to target areas of poverty.

I think, Madam Chairman, in this spirit when we are seeing the liberation of so many countries in Eastern Europe and indeed throughout the world, we have to ask ourselves, where is our revolution? I think, it has to be related to the quality of life of our people, and that certainly relates to economic recovery so that we can be competitive in the global economy, as well as to improve the quality of life of our own American citizens.

H.R. 2015 amends the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965. The bill was reported by the Committee on Public Works and Transportation with amendments on November 17, 1989. The bill was reported, as amended, by the Committee on Banking, Finance and Urban Affairs, with a quorum present on March 22, 1990. H.R. 2015 is the product of extensive hearings in both committees. Similar legislation has passed the House previously with bipartisan support—most recently in the 100th Congress when it passed the House 330 to 89.

Title I of the bill revises and extends the Public Works and Economic Development Act of 1965. It provides authorization for appropriations for fiscal years 1991, 1992, and 1993 at $250 million each year for programs and planning and $26 million for salaries and expenses for the Economic Development Administration [EDA]. Program assistance is provided for development investment assistance and investment strategy, planning, evaluation, and demonstration programs. Grants may be used for new construction and improvement of public facilities; to establish revolving loan funds to (1) stimulate small business growth and (2) set up employee stock ownership organizations; and for community development organizations to help small businesses by reducing interest rates for economic development project activities. Grants may also be used for economic development planning and the management assistance for colleges and universities.

Title II provides authorization for appropriations annually for fiscal years 1991, 1992, and 1993 for the Appalachian Regional Commission [ARC]. It authorizes $144 million for the development of highway and local access roads; $37.5 million for nonhighway programs; and $3.5 million for salaries and expenses.

Mr. SHUMWAY. Madam Chairman, I yield myself such time as I may consume.

Madam Chairman, I hesitate to rise and speak in opposition to this bill after the chain of speakers who have just spoken to us in favor of it. But I do rise in opposition to it.

I was opposed to it in the Committee on Banking, Finance and Urban Affairs, and my opposition continues to this day.

I would simply like to express some of the reasons for my opposition to the Members here this afternoon.

This bill addresses largely areas of need, needs which have been met by local and State governments, and it seems to me needs now that the answers lie more in the realm of local and State governments than they do with the Federal Government.

Certainly those of us here in the House of Representatives feel very keenly the need to address Federal deficits and to reach out for ways to bring our budget into balance. Congress has the responsibility to balance the budget, and so to do that we must make many sacrifices.

I think we have to scrutinize more carefully than ever we have before multimillion-dollar programs such as this one, and we also have to scrutinize those programs that only cost a few million. Actually there should be no spending program approved just because it happens to be small.

The administration's recently announced transportation plan recognizes that public-works spending is usually more responsive to the needs and desires of taxpayers when the control and the responsibility for that spending are closer to home. Pork-barrel projects are more easily carried on on the near anonymous Federal level.

I am afraid the Economic Development Administration and the Appalachian Regional Commission prove this argument rather than disprove it.

Madam Chairman, I was going to offer an amendment which would address the problem of pork-barrel tagons on bills like this, but for reasons that I will announce in a few moments, I am not going to offer that amendment, but I wanted to point out that actually my first preference if I were to offer an amendment would be to strike funding for these programs except perhaps for enough dollars to oversee the wind-down, administrative expenses.

This was the approach taken by the Reagan administration for the past several years, and I think that ap-

proach was responsible, because it reflected the fact that we are talking here about only temporary programs. They were designed and developed to help a few distressed areas in our country, and actually they did expire on September 30, 1982. They have been kept alive during the years since only by the ongoing appropriations process.

The program, for example, for the EDA has been expanded to cover some 80 percent of the Nation and, indeed, it has taken on the appearance of a general entitlement program. I am sure that that will be the tenor of the arguments here today, but at the same time it has become a very convenient vehicle for adding on what we commonly refer to as pork-barrel projects, projects that are designed to favor one area of the country, projects that could not pass muster on their own accord, because they obviously are parochial in their nature and designed to favor just one or a few number of Members.

I offered an amendment in the committee as we debated this bill which would have stricken the funding except for those administrative expenses. That amendment was defeated, and I am sure that were I to offer that amendment here today the same would happen here.

There is a great deal of support for these programs in the House. But I would ask the Members that, in light of our budgetary squeeze and in light of our desire to prune back on pork-barrel-type projects, that in the future we look more carefully at programs like these and, indeed, I would call upon the administration to do so as well. Because we are going to have to find ways to be more responsible in our spending habits.

Bills like these, I think, are the ones that cry out for that kind of careful, close scrutiny, and I would hope that in the future we will be able to provide it.

For those reasons, Madam Chairman, I do rise in opposition to the bill, and I urge my colleagues, as they vote upon this bill in a few moments, to think carefully on both sides of this issue.

Madam Chairman, I reserve the balance of my time.

Mr. ANDERSON. Madam Chairman, I yield 3 minutes to the gentleman from Illinois [Mr. SAVAGE].

Mr. SAVAGE. Madam Chairman, I rise in support of H.R. 2015 and H.R. 4435 and urge Members of the House to pass it by an overwhelming vote. It is a great pleasure for me, as chairman of the Subcommittee on Economic Development and sponsor of this legislation, to join with my colleagues on both the Committee on Public Works and Transportation and the Committee on Banking, Finance and Urban Affairs who have worked to bring this bill to the House floor.

It is substantially the same as the bill that passed the House in the 100th Congress by a strong bipartisan vote and those that passed overwhelmingly in the three previous Congresses.

The bill provides urgently needed Federal investment dollars to severely depressed regional and subregional areas that have been bypassed during times of national economic growth. It is designed to assist those areas and industries and groups within those areas in their efforts to nurture existing resources, to promote growth and diversification and to create or retain permanent jobs in the private sector.

H.R. 2015 has two titles: Title I, known as the National Development Investment Act, revises the existing programs of the Public Works and Economic Development Act and authorizes new economic development programs through fiscal year 1993. Title II extends the Appalachian Regional Development Act through fiscal year 1993 and reflects policies adopted by the Appalachian Governors to meet current needs within the region.

The National Development Investment Act itself contains three titles which provide for an Economic Development Assistance Program in title I, an Investment Strategy, Planning and Demonstration Program in title II, and for administration of the act in title III. It utilizes the experience and capabilities gained over the years, incorporating the positive elements of past and present development activities and dropping those elements of the existing programs which have been highly criticized.

This bill retains technical assistance provisions and grant programs for States, local governments, economic development districts, Indian tribes, and development organizations. Development assistance grants include those for site preparation, construction, or improvement of public facilities; for capitalizing locally administered revolving loan funds to provide loans for small business growth and to promote employee stock ownership organizations; and for community development corporations to reduce interest rates for small business development projects. The Federal financial responsibility is reduced to 50 percent for public facilities grants which can go up to 80 percent under existing law. The Federal match for the revolving loan funds is also 50 percent and the fund for small business loans is limited to $1 million. The limit on grants to each applicant under the economic development assistance programs has been increased to $4 million from the $2 million contained in the previously passed bills.

Funds are also available—up to 75 percent Federal share—for economic development planning, including preparation of development investment strategies; for universities and colleges to provide managerial and technical assistance; and for evaluations and demonstration programs.

Eligibility is determined by any one of three distress criteria: Unemployment of 1 percent above the national average for the previous 2-year period; or per capita income 80 percent of the national average; or sudden and severe economic distress due to loss of a major employer. This bill limits the eligibility criteria so that only areas with the greatest need will receive assistance. Moreover, it does away with the long-term eligibility of existing law by requiring applicants to demonstrate distress with each new application. Under this bill, about 39.7 percent of the Nation's population would be eligible in contrast to existing legislation which covers about 80 percent.

In addition, each applicant is required to prepare a long-range development investment strategy which will be an important element in evaluating applications for eligibility. It must be a realistic, action document that will analyze the economic problems involved, identify specific elements that will reflect cooperation and coordinated development efforts and mutually supporting projects in distress areas, and show active participation by the private sector and other non-Federal governmental units. Communities will prepare their own strategies, set their own priorities and direct their own destinies.

The broader approach envisioned by the development investment strategy replaces the project-by-project approach of the existing legislation and could, in fact, include coordination with efforts of various jurisdictions. This is a major improvement which should permit the linking of several projects for a more comprehensive recovery and greater leveraging of the Federal dollar.

Annual authorizations for the National Development Investment Act for fiscal years 1991, 1992, and 1993 are $200 million for project grants, $50 million for planning and $26 million for salaries and expenses.

Title II of H.R. 2015 extends for 3 years the Appalachian Regional Development Act. Despite the considerable economic improvements over the years resulting from development initiatives of the Appalachian Regional Commission, the region still lags behind most other areas of the Nation in economic opportunity and quality of life. It is still trying to overcome the recession of a few years ago, which was a serious setback to the region, the decline of the steel and coal industries and the effects of changing national and international economies in recent years.

The amendments contained in this bill are designed to assist the Commis-

sion's efforts to meet the new challenges of today's world economy. In addition to $3.5 million for salaries and expenses, $144 million is authorized annually through 1993 for up to 80 percent Federal share to construct additional miles in the Appalachian highway system, which is an important catalyst for promoting and developing private sector business and industry.

For the area development programs, $37.5 million is authorized representing a 50-percent Federal share. Funds could be used for projects to provide basic needs in the region's most severely distressed and underdeveloped counties and areas. In addition, program funds will focus on economic and human resource development projects regionwide aimed at improving economic competitiveness, business development, and community infrastructure, at providing worker training and retraining to enhance manpower skills, at encouraging industrial and enterprise development programs, and at promoting State and local government and private sector initiatives for developing and sustaining economic growth and stability.

The assistance provided by the Federal Government under this bill is not excessive. It requires substantially larger contributions by local communities than in the past. It represents an investment by the Federal Government in our Nation's depressed subregional areas and is an essential ingredient in increasing the ability of all regions of our Nation to be more productive and competitive in meeting the needs of a changing world economy.

This legislation has been overwhelmingly supported in the House in the last three Congresses. In the 100th Congress, it passed by a vote of 330 to 89, in the 99th Congress by a vote of 290 to 96; in the 98th Congress by 306 to 113; and in the 97th by 281 to 95. Over the years, amendments to terminate the EDA by striking funding from the appropriations bills were soundly defeated. These votes are a clear indication of the support in this body for these programs.

We are hopeful that the other body will finally move to take action on this legislation. I urge my colleagues in the House to continue their strong support and overwhelmingly pass H.R. 2015. In that way, we can send a strong signal to the other body that we continue to view these programs as having an important role in our National economy.

Madam Chairman, a copy of the summary of H.R. 2015 follows my remarks:

SUMMARY OF H.R. 2015 TO REVISE AND EXTEND EDA AND ARC

Title I of the bill revises and extends Public Works and Economic Development Act of 1965; provides authorizations for Fiscal years 1991, 1992 and 1993 at $250 million each year for programs and planning and $26 million for salaries and expenses.

To qualify, applicants must meet one of three distress criteria—

(1) Unemployment 1% above national average, previous 24 months;

(2) Per capita income 80% of national average (latest statistics);

(3) Significant job loss due to sudden economic dislocation.

Qualified applicants: States, counties, cities, towns, economic development districts, Indian tribes and development organizations.

Program assistance provided:

DEVELOPMENT INVESTMENT ASSISTANCE (TITLE I)

Grants for new construction and improvement of public facilities (including site preparation)—up to 50% Federal share.

Grants to establish revolving loan funds to stimulate small business growth—$1 million limit and 50% Federal match.

Grants to establish revolving loan funds to set up employee stock ownership organizations—50% Federal match.

Grants to community development organizations to help small businesses by reducing interest rates for economic development project activities.

Technical Assistance by Secretary.

$4 million limit on grants under this title to each applicant, except for grants to promote employee ownership organizations.

STRATEGY, PLANNING, EVALUATION AND DEMONSTRATION (TITLE II)

Grants for economic development and strategy planning.

Grants to colleges, universities and other groups to provide management and assistance—75% Federal match to costs.

Authorizes evaluations and demonstration programs. Results to be reported to Congress within 90 days of completion.

Development Investment Strategy required, to include: inventory of community resources, industries and businesses; infrastructure available and needed; workforce skills; land available; showing of non-federal matching funds; showing of private sector willingness to invest; description of industry/business to be created or expanded; demonstration of participation by representative percentage of small business concerns owned and controlled by socially and economically disadvantaged individuals.

Application Procedure:

Submit to Secretary of Commerce with Development Strategy.

Certify area meets distress criteria, and performance responsibilities.

Secretary reviews for approval/rejection based on consideration of several factors including severity of distress, anticipated increase in permanent employment, extent of private sector and non-federal involvement.

Subsequent applications must demonstrate new showing of distress.

Title II of the bill amends Appalachian Regional Development Act of 1965.

Provides authorizations annually for Fiscal Years 1991, 1992, 1993.

For Development Highway and local access roads, $144 million up to 80% Federal share); for non-highway programs, $37.5 million (up to 50% Federal share); for salaries and expenses, $3.5 million.

Allows funds to be used for projects and programs to assist the most severely distressed and underdeveloped counties; for revolving loan funds for business assistance loans; for establishing business incubators; for community infrastructure projects; for on-site employee training and programs to enhance manpower skills; and for other initiatives directed toward developing and sustaining economic growth and stability.

Mr. PACKARD. Madam Chairman, I yield myself such time as I may consume.

Madam Chairman, the bill, H.R. 2015, before the House today reauthorizes the Economic Development Administration and the Appalachian Regional Commission. The programs, in existence since 1965, have been funded through the appropriations process since the authorization for them ran out in 1982.

The Members of the House, in bipartisan manner, have overwhelmingly supported reauthorizing these programs in past Congresses. The bill has, however, died in each case from inaction in the Senate.

We can stand here today and debate the merits of these programs, whether or not the program has been a success, or whether or not this program should be funded all afternoon. In all honesty, these programs will probably be funded through the appropriations process, regardless of the vote today.

While I generally have problems with programs such as these, I do support the bill H.R. 2015 because it contains reforms that will improve the manner in which these programs are administered.

The eligibility requirement is strengthened in the bill so that it will reduce the percentage of population eligible for EDA funding from 80 to 40 percent of the population of the Nation. This is a significant change, and would possibly dramatically affect these programs.

Strict limitations have been imposed on the grant and loan amounts which can be awarded to eligible projects. No longer can communities be designated as being long-term distress areas. This bill requires annual certification to see which communities are eligible under the requirements of the bill.

These programs have absorbed a great deal of criticism from the administration as not being successful and of being mismanaged. I hope that the reforms contained in this bill will be adopted so that the sometimes just criticisms and concerns of these programs can be taken care of. I ask my colleagues to join me in support of this bill and its reforms because quite frankly, it's better than current law.

I commend Chairman ANDERSON; Congressman HAMMERSCHMIDT, the ranking member of the full committee; Congressman SAVAGE, chairman of the Subcommittee on Economic Development; Congressman MCEWEN, the former ranking member of the subcommittee; all for their fine work on formulating this reform bill.

□ 1420

Ms. OAKAR. Madam Chairman, I yield such time as he may consume to the gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. Madam Chairman, I rise in strong support of this proposal to continue investing in the Nation's economic future.

I serve as a member of the Commerce Subcommittee of the Appropriations Committee that appropriates funds for the Economic Development Administration.

In deciding whether to reauthorize the programs administered by the Economic Development Administration we should first ask, and answer, the proverbial political questions:

"What has EDA done for us lately?"

"Why should taxpayers support the reauthorization of the EDA economic development assistance programs?"

"Is it worth the investment of tax dollars in an era of deficits?"

When I became a Member of Congress in 1969 northeast Arkansas was losing population because citizens were unable to find work at home. Since 1969 thousands of private sector jobs have been created to provide employment—16,000 of those jobs were made possible because of the investments of the Economic Development Administration in the local economies in need of public works to attract industry and jobs. Local needs that are not met by local and State Government.

If America is to be competitive in today's global economy, we must invest more, not less, in the Nation's public works infrastructure such as education facilities, industrial parks, highways and bridges, and water and waste disposal systems.

The 1980's have been termed the decade of disinvestment in America. We cannot allow this trend to continue into the 1990's. We cannot afford to continue to allow our public works infrastructure to crumble and our people to go without the training they need if we are to compete in a global economy.

Since they began 25 years ago, the investment programs managed by the Economic Development Administration have established an extraordinary record of assisting communities and people to help themselves become and continue to be self-supporting, taxpaying citizens.

Investments made in America by EDA programs have paid handsome dividends in generating and maintaining private sector jobs; in helping local communities, counties and regions in building ports, industrial parks, and water systems; and, in aiding in the construction of vocational-technical schools where people can learn the skills necessary to gain and hold jobs.

EDA investments have aided in the creation of 16,000 private sector jobs in the First Congressional District of Arkansas and 80,000 statewide in the last 25 years—an impressive record of accomplishment.

EDA job-generating investments are moneymakers for government treasuries at all levels of government. This fact has been documented by many studies. In fact, studies have shown that the taxes paid by holders of jobs created by EDA funding repay EDA's entire investment every 18 months. What a deal!

People in at least 60 First Congressional District communities, towns, and cities have benefited from EDA investments totaling about $46.5 million.

These have included: Ash Flat, Augusta, Batesville, Bay, Black Oak, Blytheville, Brinkley, Brookland, Bono, Burdette, Caldwell, Calico Rock, Clarendon, Clinton, Caraway, Cash, Cave City, Corning, Cotton Plant, Delaplaine, Earle, Forrest City, Greers Ferry, Heber Springs, Helena, Hughes, Imboden, Jonesboro, Lafe, Lake City, Madison, Mammoth Spring, Manila, Marianna, Marion, Marked Tree, Marmaduke, Melbourne, Monette, Mountain View, Newport, Osceola, Pangburn, Paragould, Parkin, Piggott, Pocahontas, Portia, Powhatan, Rector, Salem, Stuttgart, Sunset, Trumann, Valley View, Walnut Ridge, West Helena, West Memphis, Wheatley, and Wynne. This is only a partial list.

All of the 24 counties in the First Congressional District of Arkansas have benefited from EDA's planning and technical assistance.

It is appropriate to be specific about some of the results of EDA's investments in First Congressional District of Arkansas. Due to the time restriction we are working under, I will cite just a few to show the good results EDA's programs have helped produce throughout First Congressional District. This has been repeated all across Arkansas and the Nation.

At Pocahontas, an EDA investment of $517,000 made it possible for the city to construct a new municipal center.

Corning, AR, is a city of about 3,650 persons. EDA helped them establish their industrial park—700 people have jobs in industries located in that park. The industries range from furniture manufacturing to rice drying.

At Forrest City, EDA investments aided in improving an industrial park—8 industries employing 1,200 people have located in that park since the work was accomplished. They are Reltoc, Bear Brand Products, Yale, Sanyo Manufacturing Co., Airtherm, Charles Townsend Co., Mid-South Foam, and Charles Todd Co. None of these were operating in Forrest City, which has a population of about 12,000, before the industrial park improvements were made.

In addition, Forrest City Grocery has recent broken ground for a construction of a distribution center at this industrial park. And, Pepsi-Cola has requested bids on construction of a distribution center in the same industrial park.

Also, a $1,121,000 investment by EDA made it possible for the Forrest City School District to construct a public safety building.

Forrest City is located in one of the most severely economically distressed countries in the Nation.

An EPA investment of $22,000 in a port site study for Phillips County, AR, is generating equally dramatic results.

Less than 2 weeks ago the voters of Phillips County, AR, another of the most severely economically distressed counties in the Nation, agreed to tax themselves in order to support construction of a new slackwater harbor on the Mississippi River. The vote to increase their sales tax was an overwhelming 4,843 for to 1,483 against. The tax revenues will be used to pay the local cost share, about $12 million, of the project in which the Federal Government, through the Corps of Engineers, is a partner.

In the long term that slackwater harbor project is expected to generate 30,000 new private sector jobs in the region.

As I indicated at the beginning of my remarks, education is a key to America's ability to successfully compete in the current global economy. In the past, EDA investments have assisted in the establishment of area vocational-technical schools and skills training centers, including a number in Arkansas.

EDA provided $585,272 of the $1 million cost of building the Black River Vocational-Technical School at Pocahontas. Thus far, 27,000 students have received training at Black River.

With its faculty and staff of 55 persons, the school now provides instruction in 15 programs. These include automated data processing, aviation mechanics, commercial food service, computerized accounting, diesel engine repair, licensed practical nursing, and respiration therapy. It also provides classes for members of volunteer fire departments.

Students trained at this school are better able to enter the work force and command a higher salary than they would otherwise. I don't know what value some would put on this type of investment, but I believe these students would term it of the utmost value. Their future is certainly brighter because of it.

Over the years Black River graduates have served on my staff. The quality of their performance has been excellent testimony for the training they received.

These kinds of contributions by EDA are investments in the future—train-

ing people so they can obtain jobs and support their families by becoming tax-paying citizens.

In the First Congressional District of Arkansas, which I have the privilege of representing, EDA investments have been used to great advantage. The projects range from industrial park construction and improvement to expanded health care facilities to training students for better jobs. These are investments in America and its people. They are investments which have paid and will pay great dividends, here at home.

One citical factor in the success of EDA programs has been the requirement that local officials and community leaders be directly involved in the decisionmaking on investments in their areas. Local people know their problems and needs. Since EDA programs began in 1965, Congress has made certain they are a part of the solution.

Another vital element of the achievements of EDA's economic development programs in Arkansas and many other States has been the assistance, dedication, and knowledge contributed by multicounty economic development districts. These are governed by boards composed of elected officials and community leaders from the areas they serve. They are staffed by small bands of well-trained and committed professionals.

This economic development legislation makes clear that Congress intends that participation by local officials, community leaders, and the multicounty districts continue to be a fundamental part of economic development decisionmaking.

There are two aspects of this proposal which are of particular concern to me. These are the funding levels it would authorize and the level at which the EDA cost-share of projects is capped.

Since 1981, funding for EDA programs has been cut by about 75 percent. I believe Congress should be putting more, not less, into these programs; however, I recognize that the tight Federal budget and struggle to bring down the deficit limits our ability to do that at this time.

Limiting the EDA cost-share to 50 percent in all cases, regardless of the specific economic distress and unemployment situation, could be a major obstacle to program participation by some of the Nation's most distressed areas. I hope that during this debate, and the ongoing consideration of this legislation, Congress will respond to the problem of the limited cost-sharing resources available to such areas.

Congress has successfully fought off 10 years of efforts by Presidents to kill EDA economic development assistance programs. We have done so because elimination of these programs will make it even more difficult for areas to invest in facilities to aid in attracting industry.

It is time for the Congress to pass this economic development proposal and send a message to the Nation that it means to reverse the dangerous tread of slashing funds intended for investment in America. Let us not continue the decade of disinvestment.

Mr. SHUMWAY. Madam Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. WYLIE].

Mr. WYLIE. Madam Chairman, I rise in opposition to H.R. 2015, and I would note that the Secertary of Commerce and the Federal Cochairman of the Appalachian Regional Commission [ARC] will recommend that the President veto this bill if presented to him in its current form.

H.R. 2015 would authorize $828 million for the Economic Develpment Administration [EDA] during fiscal years 1991 through 1993 and $555 million for Appalachian Regional Commission during the same period.

This is essentially the same bill as H.R. 2686 that was introduced in but not enacted by the 100th Congress, and is similar to bills in the 99th, 98th, and 97th Congresses which were not enacted by those Congresses. In fact, authorization for EDA and ARC expired in 1982. These programs have only been kept alive through the appropriations process, in which they have become a channel for pork-barrel projects which would probably not have otherwise received Federal funding.

Begun 25 years ago as part of the Great Society, these two programs were intended to eliminate pockets of poverty in areas where a small percentage of the population lived. Today, however, some 80 percent of the country is qualified for EDA assistance, and ARC has grown to include 20 million people in West Virginia and parts of 12 other States, an area stretching more than 1,000 miles from one end to the other.

Furthermore, as the senior House Republican on the Joint Economic Committee, I would remind my colleagues of the need to balance the budget and conserve taxpayers' money. The budget deficit reduction goals for the coming years will be difficult to meet. This authorization of $1.4 billion is one expense that we can and must forgo if we are to achieve the fiscal responsibility required of us.

For these reasons, I urge a no vote.

Mr. ANDERSON. Madam Chairman, I yield 3 minutes to the gentleman from Virginia [Mr. PAYNE].

Mr. PAYNE of Virginia. Madam Chairman, I want to thank you for your leadership and commend Congressman SAVAGE for his efforts in developing H.R. 2015, the Public Works and Economic Development Act Amendments of 1989. Also, Congressman HAMMERSCHMIDT, Congressman MCEWEN, the former ranking minority member on the subcommittee, and Congressman PACKARD, the present ranking minority member, have all been very active in creating this bill, and I want to thank them also for their leadership and support.

Madam Chairman, I strongly support this bill. There are many areas of our Nation that have not benefited from economic growth. And in these areas both the Economic Development Administration and the Appalachian Regional Commission have demonstrated that public-private partnerships do work. Both of these agencies provide the necessary seed money that allow distressed communities to improve their economic bases. In my district, a rural district in Virginia, an EDA Revolving Loan Program has been established to attract industries to the region and help developing industries establish themselves. One planning district commission received a $1 million EDA grant and with the assistance of State and local governments and private funds has made over $2 million in loans funding projects totaling over $24 million creating more than 1,000 jobs. This example clearly demonstrates that providing seed money results in attracting greater private investment in specific projects. Also, we have other examples in our district of how EDA has provided the simple things that many Americans take for granted—such as a sewer system in a small town that only had septic tanks that continuously leaked—or the development of industrial parks that result in new business entering an area and creating new jobs.

While I am speaking about experiences within my largely rural congressional district, this bill is intended to benefit both urban and rural communities to ensure the improvement of our Nation. Funds are distributed broadly throughout the Nation. During the course of the hearings on this bill, our subcommittee heard from diverse demographic groups ranging from Appalachia to inner cities suffering from severe economic distress. They all clearly demonstrated that it is very important that we continue to maintain the public-private partnership relationship between State and local and Federal partnership that exists in both EDA and ARC.

Through both of these agencies, we are working toward a central goal: improve the quality of life of all Americans. By striving to improve our distressed areas, we will aid in improving the entire economic strength of our Nation and ultimately place our Nation in a stronger position to compete internationally. Another Public Works and Transportation Subcommittee, the Subcommittee on Surface Transportation, just completed a

series of hearings on the post-Interstate Highway System and the full committee held a hearing just last week on the importance of infrastructure to our Nation. The common thread that went through all of these hearings was our Nation must be built on a solid foundation, solid infrastructure investment in order to be a viable international competitor. This bill before us today is one important means of providing that sound footing broadly by aiding our particularly distressed areas.

This body has been consistent in supporting legislation to reauthorize both the EDA and the ARC. I support this piece of legislation and I urge my colleagues to vote for H.R. 2015.

□ 1430

Mr. PACKARD. Madam Chairman, I yield 3 minutes to the gentleman from Pennsylvania [Mr. SHUSTER] one of the ranking members of the committee.

Mr. SHUSTER. Madam Chairman, it is easy for Members from prosperous congressional districts to say that this legislation is not needed. But the fact is this is precisely the kind of legislation that we should be focusing on in this Congress, because this is not throwing money across the United States everywhere whether it is needed or not. Rather this is targeted funds.

In fact, in the past, there has been some valid criticism of this program saying that we were too inclusive, and the committee acted responsibly to change the criteria and to tighten up the criteria to the point that instead of about 80 percent being eligible it is going to be cut in half. That is a step in the right direction, to focus, to target where this money is most badly needed.

I happen to represent 10 counties in Appalachia, central Pennsylvania, counties which historically have suffered double digit unemployment, 15 percent, 18 percent unemployment. But thanks to the Economic Development Administration and ARC, and an awful lot of local involvement and commitment, those double digit unemployment rates have dropped dramatically, and today most of the counties in my congressional district are down, and instead of 15 percent unemployment they have 5 percent, 6 percent, 7 percent unemployment. We have cut our unemployment in half, largely thanks to these very programs.

Yet, ladies and gentlemen, the job is only half done. It is ony half done because there are still counties across America which are suffering very high unemployment, double digit unemployment, and those are precisely the kinds of counties that are targeted here and should be targeted, and we should vigorously support this very specific, precise legislation so that we can invest in America, and not only invest in America, but even more importantly, invest in that part of America which most badly needs our commitment and our investment.

We talk about infrastructure. Here is a bill that focuses and supports the development of infrastructure in those counties and communities of America which most badly need that commitment.

So I urge Members to vigorously support this legislation. It is precisely the kind of investment we need for a better America as we move into the next century.

Mr. SHUMWAY. Madam Chairman, I yield 2 minutes to the gentleman from Kentucky [Mr. ROGERS].

Mr. ROGERS. Madam Chairman, I rise in support of the bill.

These two programs—ARC and EDA—exist to help those pockets in this country that fall behind, that continue to scrape along, that missed the train that's brought this country the longest and best economic expansion since World War II.

Yes, our national economy has changed, and strengthened. But the areas many represent—now, only now, are making the progress for which the founders of these programs longed.

ARC and EDA have been essential parts of that progress, reversing decades of poverty, despair, underdevelopment and outmigration.

And they work by giving seed to the efforts of communities, which want nothing more than a little assistance in lifting themselves up.

EDA

We need to reauthorize EDA, which since 1982 has relied on the willingness of my appropriations subcommittee to restore funds from year to year.

It's the only agency in the Federal Government devoted to helping communities in depressed areas—tying grants to bird-in-hand situations—producing infrastructure, financing, job leverage, and development to needy regions, particularly the rural ones.

ARC

In ARC we have a leader and a partner, working toward giving the people of Appalachia simply a better way of life.

I could offer many examples, but let me relate just one.

My district has one of the largest school dropout rates in the Nation.

My counties secured from ARC, a $50,000 grant, with which they formed a self-help, 27-county educational improvement program called "forward in the fifth."

Today that organization, 27 counties and hundreds of volunteers strong, has a $300,000 annual budget, all private. And that one organization is keeping kids in school, broadening their horizons, providing career counseling to help our young people learn where an education can lead them, and getting GED's to adults who had long ago dropped out and given up.

It will change my district, providing an educated population that will attract jobs and prepare us for a new decade.

Both ARC and EDA are serving that mission. And it could not be more necessary now. Everyone of us knows the transformation our economy is undergoing—it's happening at a historic rate. New technologies are altering the number and types of workers needed; new industries are emerging. And yet, we have areas without the most basic instruments they need to cope in this new world, like education and infrastructure.

We owe it to these communities to help them not just turn things around, but gear up to play ball in this new environment. With ARC and EDA at their side, they can excel, recruit, train and develop; building self-sustaining economies that will employ, feed and house people, without reliance on the many social welfare programs that do so now.

I ask you to support the modest vehicles that spur these efforts in ARC and EDA.

Mr. ANDERSON. Madam Chairman, I yield such time as he may consume to the gentleman from New Jersey [Mr. HUGHES].

Mr. HUGHES. Madam Chairman, I thank the distinguished gentleman for yielding, and I rise in strong support of H.R. 2015, the legislation to reauthorize the U.S. Economic Development Administration.

I could add to the litany of success stories, but time does not permit it.

Madam Chairman, I rise today to express my strong support of H.R. 2015, legislation to reauthorize the U.S. Economic Development Administration.

I do not think there are many agencies in the Federal Government which operate as efficiently, or contribute as many benefits to our economy, as the EDA. Over the years, the EDA has directed millions of dollars into economically distressed communities around the country, to help them make badly needed infrastructure improvements and develop new strategies for creating jobs.

These efforts have helped create the right climate for industries to expand or relocate to distressed areas. The bottom line has been new jobs, new tax ratables, and a tremendous boost for many communities which need help.

Madam Chairman, if you are looking for an example of the EDA success story, I would proudly direct your attention to my congressional district in southern New Jersey. In the mid-1970's, my district had one of the highest unemployment rates in the country—upwards of 20 percent in some areas.

Many older, smokestack industries had gone out of business and few companies were moving in to replace them. What is more, many communities lacked the paved roads, water and sewer lines and other basic

services they needed to attract new business growth.

Under the guidance of the EDA, we formed the first regional economic development district in New Jersey, comprised of Atlantic, Cumberland, Cape May and Salem Counties. The purpose of the organization was to help diversify our industrial base and promote new economic development opportunities throughout the region. I am pleased to say this effort has been a great success.

Since 1979, the South Jersey economic development district has attracted more than $12 million in Federal investments, and has helped create more than 2,500 new jobs in the four-county area. Through the assistance of the EDA, we have constructed a marine research laboratory in bivalve which is helping to revitalize the shellfishing industry in the Delaware Bay; new industrial parks in Bridgeton, Millville, Vineland, Hamilton Township, and Cape May; a seafood processing plant in Cape May; new facilities at the Salem port; reconstruction of the boardwalk in North Wildwood; a new terminal at the Bridgeton port; and an expansion of the Vineland produce auction to help our farmers.

It is doubtful that any of these projects, and the many benefits they have generated, would have come about without the assistance of the EDA. At a time when so many Federal programs have been cut back or terminated, the EDA remains one of the few sources of Federal assistance that distressed communities can turn to for help.

The agency does a great job. The administrators and staff at EDA are extremely competent. They work very closely with the local officials to help target their programs to areas of greatest need. Southern New Jersey is really coming into its own these days, and a lot of the credit has to go to the EDA.

Madam Chairman, each of the last two administrations has been trying to shut down the EDA for the last 8 years. I think that would be a terrible mistake. While our economy may indeed be doing well overall, there are still many parts of the country and many small communities in particular which need help. Our future economic growth is going to depend in large part upon our ability to rebuild our infrastructure, and the EDA will play a major role in that effort.

H.R. 2015 would authorize a total of $276 million in each of the next 3 fiscal years for the EDA, including funds for construction, planning and administration. It is a good bill and I would urge my colleagues to support it.

Mr. PACKARD. Madam Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. CLINGER], a member of the committee.

Mr. CLINGER. Madam Chairman, I rise in very strong support of this measure, and I guess that is not too unexpected when considering, as the chairman indicated, I am a former chief counsel of the Economic Development Administration and worked there for 2 years. But I think my service there has given me the incentive to really follow this program over a long period of time, and I want to state categorically that the charge that used to be leveled at EDA by our former colleague, Mr. Stockman, that EDA created no jobs anywhere is absolutely wrong, and I think that we have had had testimony to that here today from a number of Members.

We have seen the results that EDA can produce in areas of great distress, and it does create jobs. I can vouch for that from my experience both in the agency and since coming to Congress.

This bill is basically the same one that passed in the last three Congresses, and it has passed by an overwhelming margin. It has never become law because the Senate, for one reason or another, has not acted.

So the EDA does survive because of the appropriations process, but the point is that the grants and loans that are presently made under the program are made under the old Public Works and Economic Development Act of 1965. And it is absolutely true, 80 percent of the country now qualifies, and that is ridiculous. This bill changes that. It tightens and targets the program to areas of greatest distress.

I would take exception with our colleague from Ohio who said that that has resulted in large numbers of pork barrel projects. I can assure the ladies and gentlemen here that the screening process for the projects that any project must go through at EDA to receive funding is the most vigorous in Government. They have to meet very, very high standards before they are funded. It may be true that we have put projects in areas that perhaps did not deserve them because they had too low an unemployment rate, but the fact is I am convinced that every project that has been funded has been a worthwhile project.

□ 1440

Two other points in my very limited time: First, the gentleman from Pennsylvania [Mr. SHUSTER] has made one of them earlier. That is this bill addresses what we all agree is a crisis in this country. It is the infrastructure crisis.

This program is going to give support to the areas, the communities, the small towns and cities that need desperately to address this infrastructure crisis.

The second item is this program continues title IX. Title IX is for sudden and severe dislocations. Ladies and gentlemen, we are going to have some severe dislocations in this country as we see the defense budget being reduced. There are going to be communities that are going to be hurt badly by this, and what this bill will do is provide the vehicle by which we can address those dislocation problems.

I urge strongly the support for this bill.

Ms. OAKAR. Madam Chairman, I yield 1 minute to the distinguished gentleman from Alabama [Mr. BEVILL].

Mr. ANDERSON. Madam Chairman, I also yield 1 minute to the gentleman from Alabama [Mr. BEVILL].

Mr. BEVILL. Madam Chairman, I rise today to voice my strong support for the reauthorization of the Appalachian Regional Commission, which was created 25 years ago.

When President Lyndon B. Johnson signed the Appalachian Regional Development Act of 1965, he opened the door for major improvements in the region covering 13 States.

This new program enabled the Federal Government and the States to work together to address the economic problems of one of our Nation's most important regions.

Johnson noted that renewing the strength of Appalachia adds strength for all America. I believe that is true today.

The region of Appalachia has many natural and human resources, which we as a nation cannot afford to waste. These resources enrich all of us. By the same token, their neglect is a drain upon our National Treasury.

The Appalachian Regional Commission was founded on the concept of great vision. That vision called for the economic development of an impoverished region by building an infrastructure that would serve the people of the region as well as the industry that must be attracted to it.

We have just come to the end of a most unfortunate period in our legislative history. From 1981 through 1988, the administration did not share this vision of economic development. It did not support the ARC Program. It worked actively to eliminate it.

Apparently, the current administration sees things differently. The administration's 1991 budget includes $50 million for the ARC. But while this recognition is welcome, it is merely a token.

Spread among 13 States, this amount does not begin to address Appalachia's problems. It does not recognize that Appalachia is still trying to catch up from the devastating effects of the recession of the early 1980s; it does not recognize that unemployment is still significantly higher in the majority of the Appalachian States than in the rest of the Nation, especially in coal mining and manufacturing areas where many jobs have been permanently lost.

The bill before us today recognizes Appalachia's needs. It emphasizes completion of critical portions of the Appalachian highway system, which has brought more jobs than any other program to the region. It provides funds that may be used in the region's poorest counties, to enable their residents to achieve acceptable standards in clean drinking water and safe sewage disposal facilities.

It emphasizes the creation of additional jobs—always a major commission goal—but it also provides support for development of the region's human resources through vocational education and training and with funding for local health care projects.

In short, it will continue to work to develop those resources that are so vital to our entire Nation's economic health.

This bill represents an investment in our future. It is a program that I believe my colleagues from all parts of the Nation can take pride in and I urge you to join me in supporting it.

Mr. SHUMWAY. Madam Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. I thank the gentleman for yielding.

Madam Chairman, I am caught in that great dilemma which is very familiar with us, each Member of Congress, from time to time. On the one hand I want to support the President's proposals for deficit reduction and the eventual balancing of the budget, which is extremely important to all Americans.

Of course that includes my constituents.

On the other hand his reductions as proposed for the Appalachian Regional Commission are visited against my very same constituents where, for a generation now, we have noted significant advances particularly in highway construction because of the outlays that have been permitted for the Appalachian Regional Commission.

This bill then goes into a new 3-year funding program at higher levels than the President would wish to see for the Appalachian Regional Commission.

What do I do? I believe that for the moment I must, in the interest of totally scrutinizing the entire budgetary picture, support this legislation, to be able to report back to my constituents that we are looking very closely at the continuation of funding for the Appalachian Regional Commission, particularly in highway construction.

But at the same time I will say to them as I say here on the floor that I believe the deficit reduction and the balancing of the budget in the long run is better for us here in our parochial interest at home even though it might appear we are voting against the bill that would strike home with some beneficial results.

So continuing on that dilemma, I today will vote for the bill as it now stands, consult further with my constituents, look at the overall picture of the deficit reduction for which we all yearn and the balanced budget to which we all want success to come, and then reiterate my position on the floor and make the record clear once and for all.

Mr. ANDERSON. Madam Chairman, I yield 2 minutes to the gentleman from West Virginia [Mr. RAHALL].

Mr. RAHALL. I thank the chairman.

Madam Chairman, President Kennedy campaigning during the 1960 campaign for the presidency, visited the Appalachian regions of this country. He saw the poverty, he saw the distress and despair that existed within the Appalachian hollows. At that time he saw the need for such a program as economic development in the Appalachian Regional Commission. He made that promise to the people of the Appalachian hills and to the people of West Virginia in that State of West Virginia.

Unfortunately, his tenure expired before he carried through on his promise, but President Johnson and this Congress carried through on that promise in 1965.

In the 25 years since, we have seen progress being made; we have seen people employed, roads built, health facilities built, wastewater treatment, business indicators, industrial parks, vocational schools, we could go on and on.

But as has already been mentioned, progress has been made but much more progress needs to be made. Throughout the Appalachian regions of this country, throughout the rural portions of this country today, we see where highways are very difficult to build. We have been devastated by the loss of airline service because of deregulation; we have been devastated by the loss of truck service because of trucking deregulation; we have been devastated by a loss of bus service because of busing deregulation.

We could go on and on about how the rural parts of this Nation have been isolated and cut off from the major markets of this country.

A very important part of the Appalachian Regional Commission is the Appalachian highway program.

There is an effort to supplement and build upon highways in this country, upon our highway interstate system to provide access for the rural people of this Nation to reach the major markets so that they can have access to the transportation systems that exist in the big cities.

There are examples of where EDA has targeted distressed areas in this country and has been so helpful. Overall, however, we must look at the fact that this bill today is very important to the development of our infrastructure, to the uplifting of our people's spirits in order to become productive and job-occupying citizens of this country.

Madam Chairman, I urge support of this legislation.

The Economic Development Administration [EDA] targets economically distressed areas for assistance. EDA grants finance roads, waste water treatment, business incubators, industrial parks, vocational schools and other projects important to the creating of new jobs and long-term development. The EDA also provides small businesses with the necessary start-up funding essential to begin operation. While it is difficult to successfully measure the direct effectivenss of EDA due to its mission, various econometric analyses have supported the notion that EDA has had a positive effect on employment.

In its 24-year history, the ARC has made tremendous progress in broadening the economic base of the 13-State Appalachian Region and in improving the quality of life for the over 20 million people who live there. The most important mission of ARC is the construction of the Appalachian Development Highway System. According to a survey conducted by the ARC, more than 81 percent of the 695,000 jobs created in the region between 1980 and 1986 were in the 241 Appalachian counties with a completed Appalachian development or interstate highway. Significantly, in those 241 counties, the unemployment rate is 1.5 points lower than in the rest of the region.

These programs have suffered from continued neglect. This bill will authorize the funds we should appropriate for these important programs. Yesterday, this body voted without my help to send more aid to foreign countries in a supplemental appropriations bill than this bill would provide in the next fiscal year for domestic assistance programs. It has been my contention that Congress has not provided the needed funds for domestic programs. Yesterday, I was told that I am wrong, and that we are willing to support our own economic development. Here is your chance to demonstrate your support for economic development in the poorest areas of our country. I urge you to vote for this important legislation.

Mr. PACKARD. Madam Chairman, I yield 1½ minutes to a member of the committee, the gentleman from Michigan, Mr. FRED UPTON.

Mr. UPTON. Madam Chairman, I thank the gentleman for yielding time to me.

Madam Chairman, I rise in strong support of this reauthorization bill.

We all know that the authorization for the EDA and the ARC expired back in September 1982. We all know that the Congress has repeatedly passed appropriation bills funding both programs in spite of strong administration opposition.

On August 6, 1987, 3 years ago, I took a step that recognized reality. I stood right here on the House floor, spoke on behalf of reauthorizing EDA, and voted in favor of targeting EDA programs to the areas that needed it most.

Earlier that year, I had voted with 145 colleagues to eliminate appropriations for EDA. But on that autumn day almost 3 years ago, I realized the bottom line. These programs would continue to exist regardless of whether or not a reauthorization bill passed. The votes were simply not there to eliminate the EDA; EDA and ARC

would continue to exist with or without an authorization bill—through appropriations.

From that basic reality, I concluded then—as I do now—that the most responsible thing for Congress to do is to reform the EDA to make sure those appropriated funds are wisely spent in communities that truly need it.

The reauthorization bill before us today is substantially similar to the reform which I supported in 1987. It is clear that the Federal Government does not need to be handing out economic development assistance to the Beverly Hills' of the world. This bill proposes to accomplish that goal by making eligibility contingent upon real needs. Real needs such as those evident in innercity urban areas as well as distressed rural areas.

If anything, the situation with respect to funding the EDA in the 1990's is that much more clear. Funding of EDA will continue. Therefore, I urge Congress to recognize reality by supporting an improved EDA. Furthermore, I urge the administration to take a step into reality by dropping its objections to this bill.

□ 1450

Mr. PACKARD. Madam Chairman, I yield 2 minutes to the gentleman from Florida [Mr. GRANT], a member of the committee.

Mr. GRANT. Madam Chairman, to the Members who spoke in opposition to this bill, I would like to say one thing: That I do not think that this Congress or this President or anyone else is going to balance this budget on the backs of the poor people of this Nation. We are simply not going to allow that. It is not appropriate. It is extremely important for Members to send that message that we do not want that to happen.

Sure, we need money to fight the drug war. Sure, we need money to teach kids to read. Sure, we need money for other laudable purposes, but can Members name me one more laudable goal than to give the human beings in America a decent job? I cannot think of one.

If a person has a job, it is not a sterile thing. They can send their kids to school. They can buy a car. They can pay for a home, the American dream. They can do wonderful things with a job. They cannot do without a job. Above all, as the gentleman from West Virginia said, it restores human dignity to human lives.

Now, the Economic Development Administration was created to stimulate the economy. Before we can create a job, we have to have roads, we have to have a place for an industry to locate, we have to have sewer lines, we have to have treatment plants, we have to have other things such as hospitals, schools, even recreation to make it attractive.

Last year, because of the actions of this Congress, we put $120 million, $120 million as an investment into America. That led to $1.5 billion of local and private investment in America. Guess what that did? It created 57,000 jobs, jobs for humans, where they could go to work every day and do those things that I just mentioned.

This is a program that works. It works for all Americans. We need to make some improvements. That is why we are having this reauthorization bill. It is appropriate that we should do so. This is not just another pork barrel piece of legislation. This is a piece of legislation as an investment, as some say, in America. But more importantly than that, it is an investment in human lives. I urge our very, very strong support for this measure.

Mr. ANDERSON. Madam Chairman, I yield 1 minute to the gentleman from Texas [Mr. PICKLE].

Mr. PICKLE. Madam Chairman, I rise today in strong support of the reauthorization of the Economic Development Administration. I firmly believe that EDA has been a good investment by the Government.

The goal of the Economic Development Administration is to provide financial assistance to create or retain permanent jobs by providing for the expansion, establishment, or retention of plants or programs in distressed areas. In my opinion the Economic Development Administration has made a steady contribution over the years. As I look back over the years, several communities in my area have profited with cooperation with EDA.

With the cooperation of the EDA Director, Joe B. Swanner, in Austin, EDA was a participant in the development of the University of Texas Buescher Science Center in Smithville, TX. That facility now operates out of four buildings, employs over 250 top scientists, and is one of the most advanced laboratories for the study of carcinogens. This facility would not have been possible without the original investment by the Economic Development Administration and the University of Texas.

Today at the Buescher Science Center we have visiting researchers from all over the world and it is considered one of the premier cancer study laboratories in the United States. This project alone is worth all the support we can give to the Economic Development Administration and I urge my colleagues to vote for full funding for the Economic Development Administration.

Mr. SHUMWAY. Madam Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. PACKARD. Madam Chairman, I have no further requests for time, and I yield back the balance of my time.

Ms. OAKAR. Madam Chairman, I yield 1 minute to the gentleman from Mississippi [Mr. ESPY].

Mr. ESPY. Madam Chairman, I am always glad to rise in support of this legislation, and I do want to congratulate the chairmen of the authorizing committees and subcommittees, and the ranking minority members for moving H.R. 2015 to the floor for consideration at this time. It is an important bill; it supports two effective agencies—EDA and ARC.

Yesterday, during debate on the foreign assistance section of a supplemental appropriations bill the argument was made that this Congress was not doing enough to support certain disadvantaged and certain impoverished regions in this Nation. I agree with that. We need to do more. Through H.R. 2015, it is one way to do it.

I have seen the benefits of Federal economic development assistance programs to local and State governments, and I encourage its continuance. The EDA has provided seed funds to spur job creation or job retention projects, and achievements have been many. We have heard them all over this afternoon, Madam Chairman, from Alabama, to Arkansas, to West Virginia, to Mississippi.

The policy of targeting Federal economic assistance funds is very appropriate, and in these days of scarce dollars, it seems that targeting the funds to help the most needed of communities is imperative and is what we ought to do.

Let me say that I do believe we ought to extend these very valuable programs. I do support the passage of H.R. 2015.

Ms. OAKAR. Madam Chairman, I yield 45 seconds to the distinguished gentleman from West Virginia [Mr. MOLLOHAN].

Mr. MOLLOHAN. Madam Chairman, I rise in strong support of H.R. 2015 to reauthorize the Appalachian Regional Commission, and the Economic Development Administration.

The dean of the West Virginia delegation, who preceded me in remarks, eloquently described the benefits of the ARC and the EDA to infrastructure in West Virginia. Some people have criticized that as being pork barrel. They ought to understand that these programs have proven themselves invaluable, not only with regard to public works projects, but leveraging private efforts to develop businesses that will be ongoing private jobs in our area.

The EDA and ARC have both participated in a mid-Atlantic aerospace center in Harrison County that will be a state-of-the-art airport rehabilitation facility, a West Virginia discovery lab, and a medical life sciences medical park in Clarksburg, WV.

I think that the Congress, as they consider the reauthorization, ought to consider how important it is to our area not only for infrastructure development, but also in leveraging private enterprise. I urge support of this legislation.

In my own area, these programs have proven themselves invaluable to important economic development projects. Both the EDA and the ARC are leveraging private efforts to develop a mid-Atlantic aerospace center in Harrison County that will be a state-of-the-art airplane rehabilitation facility. The EDA has supported the West Virginia University discovery lab, which offers facilities for the development of innovative technologies important to West Virginia's small manufacturers. The EDA has also contributed to a life sciences medical park in West Virginia, and a software development center at Wheeling Jesuit College.

These are not pork barrel projects, Madam Chairman. They are, rather, examples of the Federal Government supporting the efforts of private individuals to revitalize their local economies.

The need is there, Madam Chairman. The only remaining question is why the rest of the country should pay attention to it. Without being glib, the answer to that question, quite simply, is that it is the neighborly thing to do.

In a very real way, Madam Chairman, the strength of this Nation derives from our ability to maintain a sense of community across a huge geographic area and among a large and increasingly diverse population. Our willingness to create and support programs that explicitly ask the relatively well off to give to those in need is a measure of that sense of community. It strengthens us, it ties us closer together. These programs remind us that this Nation is more than a collection of States and this society is more than a collection of separate economic strata.

Those who argue that we should eliminate programs like the Economic Development Administration and the Appalachian Regional Council essentially deny that sense of community. To their way of thinking, it is a Darwinian jungle out there: If you can't find a job in West Virginia, they argue, well, you can always vote with your feet. If you're living in a ghetto in Philadelphia, well you probably somehow deserve your fate.

Madam Chairman, I think most people in this country reject that approach, and I ask my colleagues to support this reauthorization.

Ms. OAKAR. Madam Chairman, I yield myself the remainder of the time.

I hope we get a resounding positive vote on this legislation, to send a signal that we really do want programs that reflect a public-private partnership, as EDA does, and the Appalachian-ARC legislation does, because we really are seeing the elimination of program like UDAG, et cetera. I, for one, think that it is terrible.

I hope my colleagues will send a resounding positive vote so we can signal to the administration that we like this program and we want to see it expanded and continue.

Mr. McDADE. Madam Chairman, I rise in support of two historically productive and vitally needed programs to notheastern Pennsylvania and the Nation. The Economic Development Administration [EDA] and the Appalachian Regional Commission [ARC] have a exemplary record of bringing jobs, enterprise development, and a higher quality of life to many less advantaged areas of the Nation.

H.R. 2015, the Economic Development Administration authorization, will allocate $276 million for the next 3 fiscal years for the Economic Development Administration of the Commerce Department and over $50 million a year for investment strategy, planning, evaluation, and demonstration programs. The measure also authorizes a total of $185 million for the Appalachian Regional Commission, including $114 million a year for highway programs and $37.5 million a year for nonhighway programs.

These funds will be utilized to build safer highways through rural areas which are in great need of repair and improvement. United States Route 15, a component of the Appalachian Throughway, which traverses my district, has one of the highest accident and fatality rates in the State of Pennsylvania and the Nation. Pennsylvania needs the transportation funds provided through the ARC to correct the many hazardous conditions on Route 15 which are intolerable for a major U.S. highway. Clearly, numerous roads in other Appalachian States are in need of similar repairs.

The measure additionally provides States, local governments, economic development districts and nonprofit organizations with economic development planning grants which can be utilized to improve the job-creating capacity of the local economic infrastructure. The effectiveness of this program was demonstrated by the Northern Tier Regional Planning and Development Committee which recently administered 40 loan and grant applications which created over 800 local jobs.

Funding provided through EDA and ARC has additionally been utilized by the Northern Tier Regional Planning and Development Committee to support hospitals, construct badly needed sewer systems, conduct day care feasibility and senior citizen centers studies. Clearly, the ability of these programs to provide the fundamentals of life like: secure jobs, safe roads for commerce, clean water, effective sewer systems and the opportunity to fulfill intrepreneurial skills are invaluable and must not be allowed to be terminated.

Recent administrations have proposed phasing out EDA and ARC. However, successive Congresses, with my support, have wisely fought for their survival and the resultant economic benefits that have been brought to the American people. The economic returns from this Federal partnership with local business can be measured not only in jobs created but in revenues returned to the Federal treasury from profit producing businesses and workers.

Neither program has been authorized since 1982, although EDA and ARC programs have been funded annually through appropriations measures. As a member of the House Appropriations Committee, I have resolutely supported appropriation bills that kept these programs alive and vital. I will continue to work diligently with my colleagues this year in passing this necessary piece of legislation to reauthorize EDA and ARC. I strongly urge your support of H.R. 2015.

Mr. COLEMAN of Texas. Madam Chairman, I rise today at least in part reluctantly in support of the legislation on the floor.

As a representative of one of the most needy regions of the country, I am very supportive of the concept of regional economic development, such as that which we are considering for the Appalachian region. At the same time, I want to remind my colleagues that I have introduced legislation to authorize a Border Regional Commission for our Nation's Southwestern region for the last two congressional sessions, and my legislation has not been the subject of a hearing this session in any of the four full committees or seven subcommittees to which it was referred, despite the fact that it is supported by 32 of my colleagues and was cosponsored by 34 Members in the 100th Congress.

Last session, the bill to establish a Border Regional Commission was the subject of a hearing by the Subcommittee on Housing, and was later marked up by this subcommittee and the full Committee on Banking, Finance and Urban Affairs. This session, however, neither this committee nor the other committees with jurisdiction—Education and Labor, Energy and Commerce, or Public Works and Transportation—have been able to schedule consideration of this legislation.

The need to grant Federal assistance for economic development in the border region is evident. Out of 25 communities in the Nation with the lowest per capita income, four are in Texas, along the United States-Mexico border. This bill would assist distressed communities where unemployment rates, per capita income figures, or plant closings or other major economic dislocation occur. In my congressional district in El Paso, we have had double-digit unemployment rates for several years. The most recent per capita income figures available, for 1987, show that El Paso's per capita income was 46 percent of the national average. Whereas the national average was $16,444, El Paso's was $7,723. Aside from these persistently high unemployment rates, there are also environmental and health problems, high levels of poverty, high dropout rates, low levels of educational attainment, high population growth rates, poor housing, and poor transportation that is not conducive to economic development. Yet despite these many problems, the population in these areas continues to multiply.

For example, the 30-county border region held an estimated 1.4 million people in 1980. By 1984, this estimate had grown to 1.6 million, and is expected to reach 2.4 million by the year 2000. This increased population will in all likelihood have few resources, little income, and a low tax base, but will create a need for more highways, jobs, more schools and housing, more airports, and sewage and water treatment plants. Resolving these problems along the Southwest border creates additional challenges in a region such as ours with the unique international and geographic factors that come into play. State and local governments have dealt with these problems and their consequences as best they can. Un-

fortunately, the situation has proven too massive for individual local governments to grapple with, and conditions have worsened as a result.

In addition, the Nation's Southwestern border is host to hundreds of thousands of residents who lack in basic housing necessities, as they are forced to live without access to running water and sewage collection services. These communities, which we commonly refer to as "colonias," are the result of long-term neglect in this area of the country, and a comprehensive approach is needed to make any significant impact in the problems in the region. My bill seeks to alleviate this problem by addressing the root causes of the colonias as well as other conditions in the region by assisting State and local governments in dealing with the special economic and human resource problems in the region.

The Border Regional Commission I propose is patterned after the Appalachian Regional Commission, our country's first commitment to regional economic development. The creation of the ARC in 1965 authorized a broad spectrum of economic development programs to contribute to the growth of the 397-county Appalachian region. I trust the Members representing communities in Appalachia realize I am not opposing the Appalachian Regional Commission. On the contrary, I agree that certain communities in our country need Federal assistance because of factors found in the area which make it more difficult for them to deal with problems that other parts of the country would be able to address. However, I also hope to have their support in recognizing the needs of the border areas.

Alleviating the problems of the border region requires a new approach. Even once the drinking water and sewage disposal problems in the colonias are resolved, there will remain many other problems both in the colonia communities and in the many other economically depressed counties along the border. The Border Regional Commission would address the root causes that have created the problem in the colonias: housing, education, unemployment, and health, and would address in a comprehensive manner the range of problems found in the border area.

I thank those colleagues who have supported my efforts in this regard in the past, and I hope to have an opportunity to work with the chairmen of the committees with jurisdiction in having my bill heard.

Mrs. LLOYD. Madam Chairman, I rise in strong support of legislation to reauthorize the Economic Development Administration [EDA] and the Appalachian Regional Commission [ARC].

This legislation is imperative to the Appalachian region of the United States which, while rich in natural resources and cultural diversity, lags far behind the rest of the Nation in economic growth. Its stated purposes—to assist the region in meeting its special problems, to promote its economic development, and to reaffirm the framework for joint Federal and State efforts toward providing the basic facilities essential to its growth, are essential to strengthening the entire region.

This bill reflects the continued concerns of the Congress about problems relating to inequities in the economies and fiscal capacities that exist between some communities and regions, as well as our continued interest in a Federal commitment designed to achieve better economic balance nationwide.

H.R. 2015 is designed to ensure that the Economic Development Administration and the Appalachian Regional Commission contribute to the goal of nurturing and diversifying the economies of both urban and rural communities. These programs have a proven track record of success in Tennessee and it is essential that valuable State and local projects which receive assistance under this act go forth. I urge my colleagues to join with me in strongly supporting H.R. 2015.

□ 1500

The CHAIRMAN. The time of the gentlewoman from Ohio [Ms. OAKAR] has expired.

All time has expired.

Pursuant to the rule, the amendment in the nature of substitute consisting of the text of the bill H.R. 4435 shall be considered as an original bill for the purpose of amendment and each title shall be considered as having been read.

The clerk will designate title 1.

Mr. ANDERSON. Madam Chairman, I ask unanimous consent that the amendment in the nature of a substitute be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The text of the amendment in the amendment in the nature of a substitute is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—NATIONAL DEVELOPMENT INVESTMENT

SEC. 101. SHORT TITLE.

This title may be cited as the "Public Works and Economic Development Act Amendments of 1990".

SEC. 102. AMENDMENT TO PUBLIC WORKS AND ECONOMIC ACT OF 1965.

The Public Works and Economic Development Act of 1965 is amended to read as follows:

"SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

"(a) SHORT TITLE.—This Act may be cited as the 'National Development Investment Act'.

"(b) TABLE OF CONTENTS.—

"TITLE I—DEVELOPMENT INVESTMENT ASSISTANCE
"Sec. 101. Findings and purposes.
"Sec. 102. Development investment assistance.
"Sec. 103. Qualifying applicants and limitations on locations of projects.
"Sec. 104. Application for grant.
"Sec. 105. Distress requirements.
"Sec. 106. Development investment strategy.
"Sec. 107. Limitations on revolving loan funds.
"Sec. 108. Federal share.
"Sec. 109. Limitations.
"Sec. 110. Community development corporations.
"Sec. 111. Obligation of funds.
"Sec. 112. Authorization of appropriations.
"TITLE II—INVESTMENT STRATEGY, PLANNING, EVALUATION, AND DEMONSTRATION
"Sec. 201. Investment strategy and planning.
"Sec. 202. Evaluation and demonstration.
"Sec. 203. Federal share.
"Sec. 204. Obligation of funds.
"Sec. 205. Authorization of appropriations.
"TITLE III—ADMINISTRATION
"Sec. 301. Definitions.
"Sec. 302. Appointment of assistant secretary.
"Sec. 303. Consultation with other persons and agencies.
"Sec. 304. Administration of assistance.
"Sec. 305. Powers of the Secretary.
"Sec. 306. Certification.
"Sec. 307. Savings provisions.
"Sec. 308. Annual report.
"Sec. 309. Prevailing rate of wage.

"Sec. 313. Authorization of appropriations.

"TITLE I—DEVELOPMENT INVESTMENT ASSISTANCE

"SEC. 101. FINDINGS AND PURPOSES.

"(a) FINDINGS.—The Congress finds and declares the following:

"(1) Historical and structural economic patterns in national and world markets have resulted in disparate economic conditions among various areas and communities in the United States.

"(2) Some areas and communities suffer from substantial and persistent unemployment and underemployment.

"(3) Economic distress caused by structural problems, severe dislocations, or cyclical downturns adversely affects communities and areas and their residents, industry sectors, and groups within the population. Among the most severely affected in distressed areas are socially and economically disadvantaged individuals from groups which suffer the effects of past and present discriminatory practices.

"(4) The changing national and global economies over the past decade have created new problems and challenges for the Nation. Our trade deficit has increased to serious proportions while our export of manufactured goods to other nations has dropped dramatically, and our export of industrial jobs to other nations has reached an alarming level.

"(5) The private sector remains the ultimate generator of employment and economic growth, but the public sector must reverse decades of infrastructure neglect as a necessary concomitant to private business stability and expansion.

"(6) It is in the national interest to develop a partnership between the public and private sectors to plan and implement development and adjustment activities to alleviate such distress.

"(7) Delivering and coordinating Federal assistance to economically distressed areas and industries and groups within those areas is crucial to the health of the national economy and the well-being of the Nation's citizens.

"(b) PURPOSES.—The Congress declares that the purposes of this Act are—

"(1) to promote balanced national growth and economic development by providing Federal aid to distressed areas in—

"(A) planning and financing public works,

"(B) promoting business assistance and other development activities to foster additional long-term employment opportunities for the unemployed and underemployed, and

"(C) benefiting the socially and economically disadvantaged, through the stimulation of private investment through Federal assistance;

"(2) to make the Nation's industrial and commercial resources more competitive in national and international markets;

"(3) to build, rehabilitate, and repair public infrastructure where it is inadequate to support and encourage private investment in the area;

"(4) to recognize and rely upon improved State and local governments' capacity to direct their own destinies; and

"(5) to link public and private funds to foster coordination of resources between these sectors, in order to leverage the maximum investment in the long-term economic vitality of all areas.

"SEC. 102. DEVELOPMENT INVESTMENT ASSISTANCE.

"(a) GRANTS.—Upon application of an applicant qualifying under section 103 and subject to the provisions of this title, the Secretary is authorized to make a grant to such applicant for one or more of the following:

"(1) CONSTRUCTING AND IMPROVING PUBLIC FACILITIES.—Construction, repair, rehabilitation, and improvement of public facilities, including demolition of existing structures and other site preparation measures, and the acquisition of land and other public works improvements to encourage and support private development.

"(2) REVOLVING LOAN FUNDS.—Establishment of revolving loan funds to promote establishment and growth of small businesses and to retain firms and entrepreneurs which contribute to the creation, retention, and expansion of private sector jobs.

"(3) EMPLOYEE STOCK OWNERSHIP PLANS.—Establishment of revolving loan funds to promote establishment of qualified employee ownership organizations which prevent economic dislocation, facilitate economic adjustment, or contribute to economic diversification and long-term economic vitality.

"(b) TECHNICAL ASSISTANCE.—Upon application of an applicant qualifying under section 103 and subject to the provisions of this title, the Secretary may provide technical assistance for improving and enhancing economic development.

"SEC. 103. QUALIFYING APPLICANTS AND LIMITATIONS ON LOCATIONS OF PROJECTS.

"(a) APPLICANTS FOR DISTRESSED LOCAL GOVERNMENTS.—The following entities may apply for assistance under section 102 for projects and activities to be carried out in the jurisdictional area of a unit of local government which meets the requirements of section 105:

"(1) STATE GOVERNMENT.—The State in which the unit of local government is located may apply if—

"(A) such unit has a population of less than 50,000; and

"(B) such unit is located outside the boundaries of an economic development district.

"(2) LOCAL GOVERNMENT.—The unit of local government may apply; except that—

"(A) in any case in which the unit of local government has a population of less than 50,000 and is located outside the boundaries of an economic development district, such unit must consult the State in the preparation of the grant application; and

"(B) in any case in which the unit of local government is located within the boundaries of an economic development district, such unit must consult such district in the preparation of the grant application.

"(3) ECONOMIC DEVELOPMENT DISTRICT.—The economic development district in which the unit of local government is located may apply.

"(4) ECONOMIC DEVELOPMENT ORGANIZATION.—A private or public nonprofit organization established for economic development purposes and representing an area within the jurisdictional area of the unit of local government may apply if—

"(A) such unit has a population of 50,000 or more;

"(B) such unit is located outside the boundaries of an economic development district; and

"(C) the grant application has been approved by such unit.

"(b) APPLICATIONS FOR INDIAN LANDS.—An Indian tribe may apply for assistance under section 102 for projects and activities to be carried out on lands owned by, or held in trust for, such tribe if such lands meet the requirements of section 105.

"(c) APPLICATIONS FOR POCKETS OF POVERTY.—The following entities may apply for assistance under section 102 for projects and activities to be carried out in an area which meets the requirements of section 105 and is located in the jurisdictional area of a unit of local government which has a population of 50,000 or more and does not meet such requirements:

"(1) LOCAL GOVERNMENT.—The unit of local government may apply; except that in any case in which the unit of local government is located within the boundaries of an economic development district, such unit must consult such district in the preparation of the grant application.

"(2) DEVELOPMENT ORGANIZATION AS APPLICANT.—A private or public nonprofit organization established for economic development purposes and representing the area meeting the requirements of section 105 may apply if such organization consults the unit of local government in the preparation of the grant application.

"SEC. 104. APPLICATION FOR GRANT.

"(a) CONTENTS.—An application for assistance under this title shall include, but need not be limited to—

"(1) a certification that the area over which the applicant has jurisdiction meets the requirements of section 105; except that—

"(A) in any case in which the applicant is a State, economic development district, or an organization described in section 103(a)(4), the certification must be for the area over which the concerned unit of local government has jurisdiction;

"(B) in any case in which the applicant is an Indian tribe, the certification must be for lands owned by, or held in trust for, such Indian tribe; and

"(C) in any case in which the applicant is an organization described in section 103(c)(2), the certification must be for the area such organization represents;

"(2) a certification relative to the performance of any responsibilities which the Secretary has agreed to accept under section 306; and

"(3) a development investment strategy prepared in accordance with section 106.

"(b) FACTORS TO BE CONSIDERED IN APPROVAL PROCESS.—In approving applications for assistance under this title, the Secretary shall give consideration to—

"(1) the severity of distress in the area for which the grant is to be made;

"(2) the extent to which the grant will result in increased, or more stabilized, permanent employment in such area;

"(3) the ratio of private sector investments committed in such area to the amount of the grant applied for;

"(4) the extent to which the appropriate State and local governments have undertaken or agree to undertake other related actions to encourage economic development and the expansion of employment opportunities;

"(5) the effectiveness of the development investment strategy and the degree to which the proposed project contributes to its implementation (including the strategy's relationship to economic problems identified in the strategy), expands employment opportunities in the existing labor market, provides incentives to retain private businesses, expands or improves public facilities, and encourages private investment; and

"(6) the extent to which the strategy and activities are consistent with State and local goals and contribute to long-term economic growth and private sector employment opportunities and establish an overall strengthened economic and business environment which will be self-sustaining.

"(c) LIMITATION ON ASSISTANCE FACILITATING RELOCATIONS.—No assistance may be provided under this title for projects intended to facilitate the relocation of industrial or commercial plants or facilities from one area to another, unless the Secretary finds that such relocation would not significantly and adversely affect employment in, or the economic base of, the area from which the industrial or commercial plant or facility would be leaving.

"SEC. 105. DISTRESS REQUIREMENTS.

"(a) CERTIFICATION.—In order to be eligible for assistance under this title, the applicant must certify that the area which is required by section 103 to meet the requirements of this section meets one or more of the following criteria:

"(1) The area has a per capita income of 80 percent or less of the national average.

"(2) The area has an unemployment rate 1 percent above the national average percentage for the most recent 24-month period for which statistics are available.

"(3) The area has experienced or is about to experience a sudden economic dislocation resulting in job loss that is significant both in terms of the number of jobs eliminated and the effect upon the employment rate of the area.

"(b) DOCUMENTATION OF DISTRESS.—Documentation of distress shall be supported by Federal data, when available, and in other cases by data available through the State government. Such documentation shall be accepted by the Secretary unless it is determined to be inaccurate. The most recent statistics available must be used.

"SEC. 106. DEVELOPMENT INVESTMENT STRATEGY.

"(a) PREPARATION AND CONTENTS.—Except as provided in subsection (b), an applicant for assistance under this title shall prepare a development investment strategy for the area which is required by section 103 to meet the requirements of section 105. The development investment strategy must—

"(1) identify the economic development problems sought to be addressed by the grant;

"(2) identify past, present, and projected future economic development investments in such area and public and private participants and sources of funding for such investments;

"(3) identify the extent to which the development investment strategy takes into account—

"(A) availability of developable land and space in the area;

"(B) public works, public service, and development facilities in the area;

"(C) availability of low-cost capital;

"(D) tax policy on investments in the area;

"(E) level of skill of the labor force; and

"(F) ability of State and units of local government to provide financial assistance in the management and implementation of the strategy;

"(4) set forth a strategy for addressing the economic problems identified in paragraph (1) and discusses the manner in which the strategy will solve such problems;

"(5) provide a description of the projects necessary to implement the strategy, an estimate and analysis of the costs and anticipated benefits of implementing the strategy, and an estimate of the timetables for completion of such projects;

"(6) provide a summary of public and private resources which are expected to be available for such projects; and

"(7) provide a comprehensive plan which demonstrates participation in all phases of the development and implementation of the development investment strategy by a representative percentage of small business concerns owned and controlled by socially and economically disadvantaged individuals, as defined by section 8(d) of the Small Business Act (15 U.S.C. 637(d)) and relevant subcontracting regulations promulgated pursuant thereto.

"(b) CONSULTATION OF STATE OR ECONOMIC DEVELOPMENT DISTRICT.—In any case in which a unit of local government is the eligible applicant under section 103(a)(2), the unit of local government shall consult the State or economic development district, respectively, in the preparation of a development investment strategy.

"(c) APPROVAL OF DEVELOPMENT ORGANIZATION'S STRATEGY.—In any case in which a private or public nonprofit development organization within a unit of local government is the eligible applicant under section 103(c)(2), the organization must consult the unit of local government in the preparation of the organization's development investment strategy.

"SEC. 107. LIMITATIONS ON REVOLVING LOAN FUNDS.

"(a) PURPOSES AND USES OF GRANTS.—Grants under section 102(a) shall be for the purposes of stimulating small business development and promoting economic growth which contributes to an improved local tax base and the creation of permanent employment opportunities. Such grants may only be made to establish or recapitalize a revolving loan fund which will be used only—

"(1) for making loans or guaranteeing loans to small businesses for initial or working capital, or the purchase, rehabilitation or expansion of facilities or equipment; and

"(2) for making loans or guaranteeing loans to businesses if a relatively small amount of capital is needed to complete financing necessary to retain the business in the area.

"(b) DISTRESS REQUIREMENTS.—A grant made under section 102(a)(2) shall be made on the condition that the revolving loan fund established or recapitalized pursuant to such grant shall be used only for providing assistance described in subsection (a) in areas which meet the requirements of section 105.

"(c) LIMITATION ON AMOUNT OF GRANT.—No grant for the establishment or recapitalization of a revolving loan fund under section 102(a)(2) shall be made for more than $1,000,000.

"(d) CREDIT ELSEWHERE TEST.—No loan or guarantee shall be made from a revolving loan fund established or recapitalized pursuant to a grant under section 102(a)(2) unless the financial assistance applied for is not otherwise available from private lenders on terms which in the opinion of the administrator of the revolving loan fund will permit the accomplishment of the project.

"(e) TERMS OF GRANTS.—

"(1) USE ASSURANCES.—Any applicant for a grant for establishment or recapitalization of a revolving loan fund under section 102(a)(2) shall give assurances that amounts of any loan which are repaid to the fund will be available only for the purposes set forth in subsection (a).

"(2) REPAYMENT ASSURANCES.—No loan or guarantee may be made from a revolving loan fund established or recapitalized pursuant to a grant under section 102(a)(2) unless the applicant for such loan or guarantee provides reasonable assurance of repayment of the loan.

"(3) GRANTEE AS ADMINISTRATOR.—The grantee of any grant for establishment or recapitalization of a revolving loan fund under section 102(a)(2) shall administer the fund.

"(f) CONSIDERATION OF PAST PERFORMANCE.—In determining whether or not to make a grant for recapitalization of a revolving loan fund established or recapitalized pursuant to a grant under section 102(a)(2), the Secretary shall consider past performance of such fund.

"SEC. 108. FEDERAL SHARE.

"(a) CONSTRUCTION AND IMPROVEMENT PROJECTS.—The amount of any grant for a project described in section 102(a)(1) shall be that amount which when added to amounts available from all other sources is sufficient to complete such project, except that in no event shall the amount of any such grant exceed 50 percent of such cost of completing the project as determined at the time of the grant application. No additional funds shall be granted or otherwise made available under this Act for any project described in section 102(a)(1) for which a grant has been made under this Act.

"(b) ESTABLISHMENT OF REVOLVING LOAN FUNDS.—The amount of any grant for the establishment of a revolving loan fund under section 102(a) shall not exceed an amount which is equal to the amount of funds available from all other sources for the establishment of such revolving loan fund. The amount of any additional grant for the recapitalization of a revolving loan fund previously established with a grant under section 102(a)(2) shall not exceed an amount which is equal to ⅓ of the amount of funds available from all other sources for such recapitalization.

"(c) INDIAN TRIBES.—In the case of a grant to an Indian tribe under section 102(a), the Secretary may reduce or waive any non-Federal share required by this section.

"SEC. 109. LIMITATIONS.

"(a) OBLIGATIONS IN A STATE.—Except for expenditures to Indian tribes, not more than 15 percent of the appropriations made for a fiscal year pursuant to this title may be expended in any one State.

"(b) OBLIGATIONS TO A PERSON.—The Secretary shall not obligate more than $4,000,000 in any fiscal year to any person (including any State or local government or public organization) for grants under this title, other than grants for establishment of qualified employee ownership organizations.

"SEC. 110. COMMUNITY DEVELOPMENT CORPORATIONS.

"(a) GRANTS.—The Secretary may make grants to community development corporations to assist small businesses by reducing the interest rates for economic development activities to be carried out by such businesses in areas meeting the distress requirements of section 105.

"(b) AGGREGATE AMOUNT.—The aggregate amount of grants under this section may not exceed $10,000,000 in any fiscal year.

"SEC. 111. OBLIGATION OF FUNDS.

"(a) BY MAY 31.—Not later than May 31 of each fiscal year, the Secretary shall obligate for grants under this title not less than 50 percent and not more than 60 percent of the funds appropriated for such fiscal year pursuant to this title.

"(b) BY SEPTEMBER 30.—Not later than September 30 of each fiscal year, the Secretary shall obligate for assistance under this title the remaining funds appropriated for such fiscal year pursuant to this title.

"SEC. 112. AUTHORIZATION OF APPROPRIATIONS.

"There is authorized to be appropriated to carry out this title, to be available until expended, $200,000,000 per fiscal year for each of fiscal years 1991, 1992, and 1993. Not more than 25 percent of the amount appropriated pursuant to this section for any fiscal year shall be expended to carry out section 102(a)(2).

"TITLE II—INVESTMENT STRATEGY, PLANNING, EVALUATION, AND DEMONSTRATION

"SEC. 201. INVESTMENT STRATEGY AND PLANNING.

"(a) GRANTS FOR ECONOMIC DEVELOPMENT PLANNING.—The Secretary is authorized to make grants for economic development planning, including the preparation of development investment strategies under section 106 and the payment of administrative expenses, to—

"(1) any State,

"(2) any economic development district,

"(3) any Indian tribe,

"(4) any county if the jurisdictional area of such county meets the requirements of section 105 and is located outside of the boundaries of an economic development district, and

"(5) any other unit of local government with a population of 50,000 or more if the jurisdictional area of such unit meets such requirements and is located outside of the boundaries of an economic development district.

The Secretary is also authorized to make grants for preparation of a development investment strategy under section 106 to any unit of local government with a population of 100,000 or more if the jurisdictional area of such unit meets the requirements of section 105 and, in any case in which such unit is located within the boundaries of an economic development district, such unit consults the district in the preparation of the investment strategy.

"(b) COMPREHENSIVE PLANNING REQUIREMENT.—Planning carried out under this section shall be a part of a comprehensive planning process and shall be a continuous process involving public officials and private citizens in analyzing local economies, defining development goals, determining project opportunities, and formulating and implementing a development program.

"(c) PREPARATION OF STATE PLANS.—Any State economic development plan prepared with assistance under this section shall be prepared by the State with the active participation of units of local government and economic development districts located in whole or in part within such State and shall set goals for economic development within such State.

"(d) ANNUAL STATE REPORTS.—Each State receiving assistance under this section shall submit to the Secretary an annual report on the planning process assisted under this section.

"(e) DISTRICT AND LOCAL PLANS CONSISTENT WITH STATE PLAN.—Any economic development planning by an economic development district or a unit of local government for which a grant is made under this section shall be consistent with the State economic development plan for the State in which such district or unit is located.

"(f) COORDINATION OF RESOURCES.—Grants under this section shall be used, to the maximum extent possible, to provide coordination of investment for community facilities, economic development, manpower training, and transportation services.

"(g) ENCOURAGEMENT OF ASSISTANCE.—Each applicant for assistance under this section is encouraged to provide project planning, financial analysis, marketing, management, feasibility studies, and other technical and financial assistance to communities and neighborhoods within its boundaries.

"SEC. 202. EVALUATION AND DEMONSTRATION.

"(a) EVALUATION OF DEVELOPMENT INVESTMENT EFFORTS.—The Secretary is authorized to conduct a program of evaluation of Federal, State, and local development investment efforts in order to—

"(1) assist in determining the causes of unemployment, underemployment, severe economic adjustment problems, and chronic distress in areas and regions of the United States; and

"(2) assist in formulating, implementing, or improving programs at the National, State, or local levels which are designed to increase employment in private firms, assist depressed industry sectors, or otherwise promote economic development or adjustment.

"(b) DEMONSTRATION PROGRAMS.—

"(1) IN GENERAL.—The Secretary is authorized to conduct demonstration programs to test the feasibility of new ways to increase productivity and growth designed to make the steel industry and related industries more competitive, to encourage the use and development of innovative technology and research in economic development, to match the labor force with projected labor markets, to improve United States competitiveness, and to encourage economic diversity and regional balance.

"(2) REPORTS.—Not later than 90 days after completion of each demonstration program conducted under this subsection, the Secretary shall transmit to Congress a report on the results of such program.

"(c) ADMINISTRATION.—Programs authorized under subsections (a) and (b) of this section may be carried out by the Secretary acting through the staff of the Department of Commerce, in cooperation with or by the provision of funding to other departments or agencies of the Federal Government, or by contract.

"(d) GRANTS FOR MANAGEMENT AND TECHNICAL ASSISTANCE.—The Secretary is authorized to make grants to colleges, universities, and other organizations to establish and support ongoing programs which provide to businesses and units of local government management and technical assistance for the purposes of promoting productivity, economic development, and employment opportunity.

"SEC. 203. FEDERAL SHARE.

"(a) ECONOMIC DEVELOPMENT PLANNING.—The amount of any grant under section 201 may not exceed 75 percent of the cost of economic development planning or of the preparation of a development investment strategy.

"(b) MANAGEMENT AND TECHNICAL ASSISTANCE.—The amount of any grant under section 202(d) may not exceed 75 percent of the cost of establishing and supporting the ongoing management and technical assistance program.

"(c) DETERMINATION OF NON-FEDERAL SHARE.—In determining the amount of the non-Federal share of costs under this section, the Secretary shall give consideration to all contributions both in cash and in kind, including space, equipment, and services.

"(d) INDIAN TRIBES.—In the case of a grant to an Indian tribe under section 201, the Secretary may reduce or waive any non-Federal share required by this section.

"SEC. 204. OBLIGATION OF FUNDS.

"Not later than December 31 of each fiscal year, the Secretary shall obligate for grants under section 201, 90 percent of the funds appropriated for such fiscal year pursuant to this title, other than those funds made available for purposes of section 202. The remainder of such funds shall be obligated during such fiscal year only for making grants under section 201 in areas meeting the criteria set forth in section 105(a)(3).

"SEC. 205. AUTHORIZATION OF APPROPRIATIONS.

"(a) IN GENERAL.—There is authorized to be appropriated to carry out this title, to be available until expended, $50,000,000 per fiscal year for each of fiscal years 1991, 1992, and 1993.

"(b) LIMITATION ON AMOUNT FOR SECTION 202.—Of sums authorized to be appropriated under subsection (a) of this section, not to exceed $13,000,000 in fiscal year 1991 and not to exceed $15,000,000 in each of fiscal years 1992 and 1993 shall be available for purposes of section 202.

"TITLE III—ADMINISTRATION

"SEC. 301. DEFINITIONS.

"For purposes of this Act—

"(1) ECONOMIC DEVELOPMENT DISTRICT.—The term 'economic development district' means—

"(A) an economic development district designated on or before January 1, 1990, under section 403(a)(1) of the Public Works and Economic Development Act of 1965; and

"(B) any district within a State which is designated by the Secretary, which district is of sufficient size or population and contains sufficient resources to foster economic development on a scale involving more than one county and does not contain within its boundaries any part of another economic development district designated under subparagraph (A) or under this subparagraph.

"(2) JURISDICTIONAL AREA.—The term 'jurisdictional area' means the area over which a unit of local government has jurisdiction.

"(3) INDIAN TRIBE.—The term 'Indian tribe' means the governing body of an Indian tribe, an Indian authority or tribal organization or entity, an Alaska Native village, or any Indian group which is recognized as an Indian tribe by the Secretary of the Interior, except that the term 'Indian tribe' shall also include those bodies, authorities, organizations, entities, or groups not recognized by the Secretary of the Interior, if such body, authority, organization, entity, or group is recognized as a tribe or other similar appropriate entity by the State in which it is located and such State holds land in trust on behalf of such tribe or other similar appropriate entity.

"(4) QUALIFIED EMPLOYEE OWNERSHIP ORGANIZATION.—The term 'qualified employee ownership organization' includes a qualified employee trust as defined in section 3(c)(2) of the Small Business Act, except that—

"(A) such term shall not be limited to plans maintained by small business concerns or to loans guaranteed under such Act;

"(B) in the case of any form of financial assistance, the principles of section 3(c)(2)(B) of such Act shall apply under regulations prescribed by the Secretary; and

"(C) there shall be periodic reviews of the role, in the management of the concern involved, of employees to whose account stock is allocated.

"(5) SECRETARY.—The term 'Secretary' means the Secretary of Commerce.

"(6) SMALL BUSINESS CONCERN.—The term 'small business concern' means a business that is independently owned and operated, is not dominant in its field of operations, and meets such other criteria as the Secretary, after consultation with the Administrator of the Small Business Administration, may by regulation establish, including numbers of employees and dollar volume of business by industrial classes.

"(7) STATE.—The term 'State' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Marianas.

"(8) UNIT OF LOCAL GOVERNMENT.—The term 'unit of local government' means any city, county, town, parish, village, or other general purpose political subdivision of a State.

"SEC. 302. APPOINTMENT OF ASSISTANT SECRETARY.

"The Secretary shall administer this Act with the assistance of an Assistant Secretary of Commerce, established by section 601 of the Public Works and Economic Development Act of 1965. Such Assistant Secretary shall perform such functions as the Secretary may prescribe.

"SEC. 303. CONSULTATION WITH OTHER PERSONS AND AGENCIES.

"The Secretary is authorized from time to time to call together and confer with any persons, including representatives of labor, management, agriculture, and government, who can assist in meeting the problems of area and regional unemployment or underemployment. The Secretary may make provisions for such consultation with interested departments and agencies as he may deem appropriate in the performance of the functions vested in him by this Act.

"SEC. 304. ADMINISTRATION OF ASSISTANCE.

"No grant shall be approved under this Act unless the Secretary is satisfied that the

project for which Federal assistance is granted will be properly and efficiently administered, operated, and maintained.

"SEC. 305. POWERS OF THE SECRETARY.

"(a) LIST OF POWERS.—In performing his duties under this Act, the Secretary is authorized to do the following:

"(1) Adopt, alter, and use a seal, which shall be judicially noticed.

"(2) Hold such hearings, sit and act at such times and places, and take such testimony, as the Secretary may deem advisable.

"(3) Request directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality information, suggestions, estimates, and statistics needed to carry out the purposes of this Act. Each department, bureau, agency, board, commission, office, establishment or instrumentality is authorized to furnish such information, suggestions, estimates, and statistics directly to the Secretary.

"(4) Acquire, in any lawful manner, any property (real, personal, or mixed, tangible or intangible), whenever deemed necessary or appropriate to the conduct of the activities authorized by this Act.

"(5) Procure by contract the temporary or intermittent services of experts and consultants or organizations therefor as authorized by section 3109(b) of title 5, United States Code, and allow them, while away from their homes or regular places of business, travel expenses (including per diem in lieu of subsistence) in accordance with section 5703 of title 5, United States Code, for persons in the Government service employed intermittently, while so employed.

"(6) Sue and be sued in any court of record of a State having general jurisdiction or in any United States district court, and jurisdiction is conferred upon such district court to determine such controversies without regard to the amount in controversy; but no attachment, injunction, garnishment, or other similar process, mesne, or final, shall be issued against the Secretary or property of the Secretary.

"(7) Establish such rules, regulations, and procedures as the Secretary may deem appropriate in carrying out the provisions of this Act.

"(b) LIMITATION ON STATUTORY CONSTRUCTION.—Nothing in this Act (including subsection (a)(6)) shall be construed to except the activities under this Act from the application of sections 517, 547, and 2679 of title 28, United States Code.

"SEC. 306. CERTIFICATION.

"(a) ACCEPTANCE.—The Secretary may discharge any of his responsibilities relative to a project for which a grant may be made under title I of this Act by accepting a certification by the applicant of the applicant's performance of such responsibilities.

"(b) RESCISSION OF ACCEPTANCE.—Acceptance by the Secretary of an applicant's certification under this section may be rescinded by the Secretary at any time if, in the opinion of the Secretary, it is necessary to do so.

"(c) REGULATION.—The Secretary shall issue such guidelines and regulations as may be necessary to carry out this section.

"SEC. 307. SAVINGS PROVISIONS.

"(a) AFFECT ON PROCEEDINGS.—No suit, action, or other proceeding lawfully commenced by or against the Secretary or Assistant Secretary or any other officer in his or her official capacity or in relation to the discharge of his or her official duties under the Public Works and Economic Development Act of 1965, shall abate by reason of the taking effect of the amendment by section 102 of the Public Works and Economic Development Act Amendments of 1990, but the court may, on a motion or supplemental petition filed at any time within 12 months after the effective date of such amendment, showing a necessity for the survival of such suit, action, or proceeding to obtain a settlement of the questions involved, allow such suit, action, or proceeding to be maintained by or against the Secretary or Assistant Secretary or such other officer of the Department of Commerce as may be appropriate.

"(b) EXISTING REGULATIONS AND PROCEEDINGS.—All rules, regulations, orders, authorizations, delegations, or other actions duly issued, made, or taken by or pursuant to applicable law, before the effective date of such amendment, by any agency, officer, or office pertaining to any functions, powers, and duties under the Public Works and Economic Development Act of 1965 shall continue in full force and effect after such effective date until modified or rescinded by the Secretary or such other officer of the Department of Commerce as, in accordance with applicable law, may be appropriate.

"SEC. 308. ANNUAL REPORT.

"The Secretary shall make a comprehensive and detailed annual report to Congress of operations under this Act for each fiscal year beginning after the year ending September 30, 1990. Such report shall be printed and shall be transmitted to Congress not later than February 1 of the year following the fiscal year with respect to which such report is made.

"SEC. 309. PREVAILING RATE OF WAGE.

"(a) GENERAL RULE.—All laborers and mechanics employed by contractors or subcontractors on projects assisted by the Secretary under this Act shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Act of March 3, 1931, commonly known as the Davis-Bacon Act (46 Stat. 1494; 40 U.S.C. 276a–276a–5).

"(b) ASSURANCE.—The Secretary shall not extend any financial assistance under this Act for any project without first obtaining adequate assurance that the standards required by subsection (a) will be maintained upon the construction work.

"(c) FUNCTION OF SECRETARY OF LABOR.—The Secretary of Labor shall have, with respect to the standards required by subsection (a), the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. App.), and section 2 of the Act of June 13, 1934 (48 Stat. 948; 40 U.S.C. 276c).

"SEC. 310. RECORD OF APPLICATIONS.

"The Secretary shall maintain as a permanent part of the records of the Department of Commerce a list of each application approved for a grant under this Act, which shall be kept available for public inspection during the regular business hours of the Department of Commerce. The following information shall be posted in such list as soon as each application is approved:

"(1) The name of the applicant.

"(2) The amount and duration of the grant for which application is made.

"(3) The purposes for which the proceeds of the grant are to be used.

"SEC. 311. RECORDS AND AUDIT.

"(a) GENERAL RULES.—

"(1) RECORDS.—Each recipient of a grant under this Act shall keep such records as the Secretary shall prescribe, including records which—

"(A) fully disclose the amount and the disposition by such recipient of the proceeds of such grant, the total cost of the project or undertaking in connection with which such grant is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources; and

"(B) review the efficiency, economy, and effectiveness of the project carried out under this Act.

"(2) REPORTS TO SECRETARY.—Not later than January 11 and July 11 of each year, each recipient shall transmit a report to the Secretary containing all information prescribed under paragraph (1) which relates to all activities carried out during the preceding period relating to grants made to it under this Act. Each report submitted in January of each year shall include an audited statement of funds spent on the project or undertaking during the preceding fiscal year. Such statement shall be prepared in accordance with chapter 75 of title 31, United States Code, or agency regulations governing the audit of nonprofits.

"(b) ACCESS TO INFORMATION.—For the purpose of reviewing the efficiency, economy, and effectiveness of programs carried out under the provisions of the Act, including audit and examination, the Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of any recipient, subrecipient, contractor, or subcontractor that are pertinent to assistance received under this Act.

"SEC. 312. NONDISCRIMINATION REQUIREMENTS.

"In administering this Act, the Secretary may not—

"(1) discriminate in favor of or against any qualified applicant based on the fact that the area in which the project would be located is either rural or urban in character;

"(2) create separate allocations of funds to provide assistance for urban and rural areas unless such allocations are based on objective findings of relative levels of distress in areas qualified for assistance under this Act; or

"(3) deny assistance to a qualified applicant based on the fact that the project area is located in a State which has a low level of unemployment.

"SEC. 313. AUTHORIZATION OF APPROPRIATIONS.

"There is authorized to be appropriated for salaries and administrative expenses to carry out the provisions of this Act $26,000,000 per fiscal year for each of fiscal years 1991, 1992, and 1993. Appropriations under this Act shall remain available until expended. Any contract entered into pursuant to this Act shall be effective only to such extent and in such amounts as may be provided in advance in an appropriation Act.".

TITLE II—APPALACHIAN REGIONAL DEVELOPMENT

SEC. 201. SHORT TITLE.

This title may be cited as the "Appalachian Regional Development Act Amendments of 1990".

SEC. 202. FINDINGS AND PURPOSES.

Section 2 of the Appalachian Regional Development Act of 1965 is amended—

(1) in subsection (a) by striking out the period at the end of the 6th sentence and inserting in lieu thereof "and in severely distressed and underdeveloped counties and areas lacking resources for basic services."; and

(2) by adding at the end of such section the following new subsection:

"(c) The Congress further finds and declares that, while substantial progress has been made in fulfilling many of the objectives of this Act, rapidly changing national and global economics over the past decade have created new problems and challenges for rural areas throughout the Nation and especially for the Appalachian region. Thus, the problems of the region are not only to provide the infrastructure necessary to economic and human resource development, to develop its industry, and to generate a diversified regional economy, but to make the region's industrial and commercial resources more competitive in national and world markets. It is, therefore, also the purpose of this Act to provide a framework for coordinating Federal, State, and local initiatives to respond to the economic competitive challenge through improving the skills of the region's manpower, adapting and applying new technologies for the region's businesses, and improving the access of the region's businesses to the technical and financial resources necessary to their development while continuing to address the need to provide basic services for the more disadvantaged areas of the region so as to provide a fairer opportunity for the people of the region to share the quality of life generally enjoyed by citizens across this Nation.".

SEC. 203. AUTHORIZATIONS FOR ADMINISTRATIVE EXPENSES.

Section 105(b) of the Appalachian Regional Development Act of 1965 is amended by striking out the period at the end thereof and inserting in lieu thereof the following: ", and not to exceed $3,500,000 per fiscal year for each of fiscal years 1991, 1992, and 1993. Of amounts appropriated pursuant to the preceding sentence for each of fiscal years 1991, 1992, and 1993, not to exceed $1,000,000 shall be available for expenses of the Federal cochairman, his alternate, and his staff.".

SEC. 204. EXTENSION OF LEASE TERMS.

Section 106(7) of the Appalachian Regional Development Act of 1965 is amended by striking out "1982" and inserting in lieu thereof "1993".

SEC. 205. HIGHWAY SYSTEM.

(a) AUTHORIZATION OF APPROPRIATIONS.—Section 201(g) of the Appalachian Regional Development Act of 1965 is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "; and $144,000,000 per fiscal year for each of fiscal years 1991, 1992, and 1993.".

(b) FEDERAL SHARE.—

(1) GENERAL RULE.—Section 201(h)(1) of such Act is amended by striking out "70 per centum" and inserting in lieu thereof "80 percent".

(2) APPLICABILITY.—The amendment made by paragraph (1) shall apply to projects approved after March 31, 1979.

SEC. 206. DEFINITIONS.

(a) UPDATING OF COVERED FEDERAL GRANT-IN-AID PROGRAMS.—The first sentence of section 214(c) of the Appalachian Regional Development Act of 1965 is amended by striking out "December 31, 1980" and inserting in lieu thereof "October 1, 1994".

(b) LIMITATION ON COVERED ROAD PROJECTS.—The second sentence of such section is amended by inserting "authorized by title 23, United States Code" after "road construction".

SEC. 207. PROGRAM DEVELOPMENT CRITERIA.

Section 224(a) of the Appalachian Regional Development Act of 1965 is amended by inserting before the semicolon at the end of paragraph (1) the following: "or in a severely distressed and underdeveloped county or area lacking resources for basic services".

SEC. 208. REMOVAL OF LIMITATION.

Section 224(b) of the Appalachian Regional Development Act of 1965 is amended—

(1) by striking out "(2) to finance" and all that follows through "(3)" and inserting in lieu thereof "(2)"; and

(2) by striking out "(4)" and inserting in lieu thereof "(3)".

SEC. 209. MAXIMUM FEDERAL SHARE.

Section 224 of the Appalachian Regional Development Act of 1965 is amended by adding at the end thereof the following new subsection:

"(d) MAXIMUM FEDERAL SHARE.—Notwithstanding any other provision of this Act, after September 30, 1990, grants made with funds authorized under this Act shall not exceed 50 percent of the costs of any project approved under this Act (except projects under section 201); except that, notwithstanding any limitation of any other Federal law, such grants may increase the Federal contribution to any project being carried out under such other law and eligible for financial assistance under this Act to such percentage as the Commission determines appropriate within the limitations of this Act.".

SEC. 210. GRANTS FOR ADMINISTRATIVE EXPENSES AND DEMONSTRATION PROJECTS.

(a) GENERAL RULE.—Section 302(a)(3) of the Appalachian Regional Development Act of 1965 is amended—

(1) by inserting after "technical assistance" the following: "(including technical assistance for business development and stabilization and application of technologies and productivity improvement)";

(2) by inserting after "training programs" the following: "(including on-site employee training and programs to upgrade employability of the region's people)"; and

(3) by inserting after "demonstrations" the following: "(including demonstrations of service consolidations and other methods of increasing efficiency of local governments, the establishment and operation by States, public agencies, or nonprofit development organizations of revolving funds for business assistance loans, the establishment and operation of business incubators and the provision of industrial facilities and equipment by public agencies and nonprofit organizations on such terms (including terms of reasonable recovery of grant funds upon resale) as are approved by the Commission, and the acquisition and development of land)".

(b) LIMITATIONS ON DEMONSTRATION GRANTS.—Subsection (b)(1) of such section is amended—

(1) by striking out ", (3), or (4)," and inserting in lieu thereof "or (4),";

(2) by inserting "or economic" after "energy"; and

(3) by striking out the second sentence and inserting in lieu thereof the following: "Funds in energy enterprise development loan funds established with grants previously approved by the Commission under this section may, upon approval of the Commission pursuant to section 303, after the date of the enactment of the Appalachian Regional Development Act Amendments of 1990, be made available for the purposes authorized in subsection (a)(3).".

SEC. 211. AUTHORIZATION OF APPROPRIATIONS FOR GENERAL PROGRAM.

Section 401 of the Appalachian Regional Development Act of 1965 is amended by adding at the end thereof the following: "In addition to the appropriations authorized in section 105 for administrative expenses and in section 201(g) for the Appalachian development highway system and local access roads, there is authorized to be appropriated to the Commission, to be available until expended, to carry out this Act, $37,500,000 per fiscal year for each of fiscal years 1991, 1992, and 1993.".

SEC. 212. EXTENSION OF TERMINATION DATE.

Section 405 of the Appalachian Regional Development Act of 1965 is amended by striking out "1982" and inserting in lieu thereof "1993".

AMENDMENT OFFERED BY MR. TRAFICANT

Mr. TRAFICANT. Madam Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TRAFICANT: At the end of the bill, insert the following new section:

SEC. . BUY-AMERICAN REQUIREMENT.

(a) DETERMINATION BY THE COMMISSION.—If the Appalachian Regional Commission, with the concurrence of the Secretary of Commerce and the United States Trade Representative, determines that the public interest so desires, the Commission is authorized to award to a domestic firm a contract made pursuant to the issuance of any grant made under this Act that, under the use of competitive procedures, would be awarded to a foreign firm, if—

(1) the final product of the domestic firm will be completely assembled in the United States;

(2) when completely assembled, not less than 51 percent of the final product of the domestic firm will be domestically produced; and

(3) the difference between the bids submitted by the foreign and domestic firms is not more than 6 percent.

In determining under this subsection whether the public interest so requires, the Commission shall take into account United States international obligations and trade relations.

(b) LIMITED APPLICATION.—This section shall not apply to the extent to which—

(1) such applicability would not be in the public interest;

(2) compelling national security considerations require otherwise; or

(3) the United States Trade Representative determines that such an award would be in violation of the General Agreement on Tariffs and Trade or an international agreement to which the United States is a party.

(c) LIMITATION.—This section shall apply only to contracts made related to the issuance of any grant made under this Act for which—

(1) amounts are authorized by this Act (including the amendments made by this Act) to be made available; and

(2) solicitation for bids are issued after the date of the enactment of this Act.

(d) REPORT TO CONGRESS.—The Commission shall report to the Congress on contracts covered under this section and entered into with foreign entities in fiscal years 1990 and 1991 and shall report to the Congress on the number of contracts that meet the requirements of subsection (a) but which are determined by the United States Trade Representative to be in violation of the General Agreement or an international agreement to which the United States is a party. The Commission shall also report to the Congress on the number of contracts

covered under this Act (including the amendments made by this Act) and awarded based upon the parameters of this section.

(e) DEFINITIONS.—For purposes of this section—

(1) SECRETARY.—The term "Commission" means the Appalachian Regional Commission.

(2) DOMESTIC FIRM.—The term "Domestic Firm" means a business entity that is incorporated in the United States and that conducts business operations in the United States.

(3) FOREIGN FIRM.—The term "foreign firm" means a business entity not described in paragraph (2).

Mr. TRAFICANT (during the reading). Madam Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. TRAFICANT. Madam Chairman, this is the standard "buy American" amendment.

Madam Chairman, I commend the authors of this bill and all the respective chairmen involved.

This is the standard "buy American" amendment, and I am pleased with the fact that the leadership has agreed to this particular amendment.

Ms. OAKAR. Madam Chairman, will the gentleman yield?

Mr. TRAFICANT. I yield to the gentlewoman from Cleveland, OH.

Ms. OAKAR. Madam Chairman, I rise in support of the amendment and I want to compliment the gentleman. I think the spirit of the entire legislation is to create jobs for Americans, and I support the gentleman's amendment.

Mr. TRAFICANT. Madam Chairman, I appreciate the support of the gentlewoman from Ohio.

Mr. ANDERSON. Madam Chairman, will the gentleman yield?

Mr. TRAFICANT. I am glad to yield to the chairman of the Committee on Public Works and Transportation.

Mr. ANDERSON. Madam Chairman, we have reviewed the gentleman's amendment. It is acceptable on our side, and I urge its adoption.

Mr. PACKARD. Madam Chairman, will the gentleman yield?

Mr. TRAFICANT. I yield to the vice chairman of the subcommittee.

Mr. PACKARD. Madam Chairman, I thank the gentleman from Ohio for yielding.

Madam Chairman, we support the amendment. It has a very narrow application to programs being reauthorized, and we have no objections to its adoption.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio [Mr. TRAFICANT].

The amendment was agreed to.

Mr. WHITTEN. Madam Chairman, I move to strike the last word.

Madam Chairman, let me say to my colleagues that we, in this country, seem to have neglected to make a distinction between investment spending and that which lasts 24 hours.

On yesterday, I presented to the House a dire emergency supplemental bill (H.R. 4404) and pointed out that we have to take care of our own country. Today, I appeared before the Committee on Government Operations and pointed out that the wealth behind our country is the country itself. I am for balancing budgets. In our Committee on Appropriations, we have held our total of appropriations since 1945 $173 billion below the recommendation of Presidents.

But there is one thing we should do. We should change our rules for investment spending—that which lasts 100 years, which contributes to our economy, and which should be considered different from that spending which lasts 24 hours.

I am for a balanced budget. I have worked toward a balanced budget, because we need stability. But let us keep in mind that wealth is material things, and paper money is something that the Federal Reserve bank can issue and is issuing.

We have since 1981 increased our debt over $2 trillion, but not because of what we spend taking care of our country, which is the only thing we must take care of. I happen to come from an Appalachian region. Money has been well spent there.

May I say today, in view of the legislation we see in view of what we read, hundreds of thousands of troops are going to be released, we are going to cancel a lot of military contracts, and those folks are going to be looking for jobs.

To prepare for that, by all means we should restore revenue sharing, since with one-fourth of what we spend annually on foreign aid, we can look after over 39,000 communities in this country where the people locally have practically fought each other to be sure they got their dollar's worth.

Why do we do that? Because that is our wealth, and we had better get ready now so when this shift in our work force takes place, we can take care of it.

I do not know of anything that has done greater service than the EDA, and I do not know anything that has had better results than revenue sharing. So I say, and I repeat it now, that our money has nothing behind it except our country. That being true, we had better look after our country. The idea of a budget request of over $1 trillion but with no new starts for investment in our country is not looking after our country. I say again that we had better do it.

Let us keep this in mind. We can leave all the money in the world and a wornout land to our children and they will never make it. But if we take care of our own country, they could set up their own financial system. So I say to the Members that nothing I know of has contributed more to the well-being of this country and to my immediate section than the Appalachian program. It is selective, and the local people contribute to it. That gives it a sense of value.

I plead with the Members, let us start looking after our country, not because we are opposed to all these other things, but so we can afford the other things. Let us look after our country first, because we must give attention to investment spending where the benefits are felt for many years. And we need to change the House scoring rules so we can look at that and not have it charged up to annual expenses.

Madam Chairman, I hope the Members will go along with this bill.

Mr. WOLPE. Madam Chairman, I move to strike the last word.

Madam Chairman, I rise in strong support of the legislation to revise and extend programs of the Economic Development Administration and the Appalachian Regional Commission. This bill represents a needed Federal commitment to economic development, and recognizes the importance of strong intergovernmental and public-private partnership efforts to deal with problems of unemployment, of underinvestment, and of economic dislocation.

H.R. 2015 addresses three aspects of the public economic development role that cannot be addressed effectively other than by a Federal program.

First, there is a need for Federal funds to help create the infrastructure necessary for job creation and retention. Scores of communities, in Michigan and across the country, must adjust to the economic realities of the 1990's and take advantage of new opportunities for economic growth and diversification. EDA programs provide a vehicle to help them make that transition.

Second, there is a need for business finance resources to complement public infrastructure investments, especially in small towns and rural areas. Michigan and other States have implemented numerous programs to meet the ongoing development finance needs of new and small companies. However, an injection of Federal funds like that proposed in H.R. 2015 is needed to buttress State efforts in economically distressed areas that have a significant level of need.

Third, only the Federal Government can effectively maintain an emergency response program to provide help to communities facing a sudden and severe economic crisis, such as the impending closure of a major plant or military base.

EDA-assisted projects overall have encouraged high levels of private development activity and helped increase local job opportunities. In Michigan, for example, EDA funds have helped improve industrial park sites and upgrade water and sewer systems, as well as support development planning and staff capacity efforts. Nationally, $120 million in EDA public works grants helped leverage $1.5 billion in private monies in fiscal 1988 alone, according to agency data—returning $12.5 for every $1 invested. H.R. 2015 will continue EDA's traditional role of investing in public works and infrastructure projects, requiring that Federal resources be matched by recipients to stimulate greater private investment in commercial and industrial activities.

The bill calls for improved economic development planning, in the form of a development investment strategy, rather than perpetuate the project-by-project approach of current law. The shift in program planning emphasis from building for the sake of building to laying a base for current and future economic development activities will ensure more efficient use of Federal resources and help avoid the scattershot approach of past programs. The strategy is intended not only as a planning document, but an economic development action plan.

The bill also addresses a major complaint about current EDA programs by including more rigorous targeting criteria. Funds would be channeled to communities manifesting considerable economic distress such as high unemployment, or economic dislocation such as a plant closing. Long-term designation would be eliminated; areas would have to requalify as distressed each time they applied for EDA funds.

EDA programs deserve formal reauthorization and I congratulate the Committees on Public Works and Banking on the solid approach to economic development they have crafted in this legislation. EDA programs have limped along since 1982 without congressional authorization, in the face of stiff opposition from the Reagan and Bush administrations. States such as Michigan have done an excellent job in sparking local economic development activities, but they can not do it alone. In passing H.R. 2015, the House will underscore the essential Federal role in local economic development strategy-making and project implementation. This type of Federal investment is essential to the Nation's economic well-being. If distressed areas are not helped, and they fall into an even deeper decline, the ultimate Federal cost in years to come will be much more substantial.

□ 1510

AMENDMENT OFFERED BY MR. GRANT

Mr. GRANT. Madam Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GRANT: Page 17, line 17, strike ", except that in" and insert ". In".

Page 17, line 19, after the period insert the following:

The Secretary may increase the maximum percentage of a grant from 50 percent to not more than 80 percent of the costs of completing a project described in section 102(a)(1) for an area which the Secretary determines is one of the most distressed of the areas meeting the distress requirements of section 105; except that the Secretary may not increase such percentage for more than 25 percent of the grants made in any fiscal year. In developing guidelines for determining which areas are the most distressed, the Secretary shall consider whether (1) the median family income for the area for the most recent 24-month period for which data is available is less than or equal to 75 percent of the national average median family income for such period, or (2) the average unemployment rate for the area for such period is greater than or equal to 2 times the national average unemployment for such period.

Mr. GRANT (during the reading). Madam Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. GRANT. Madam Chairman, I yield to the gentleman from West Virginia [Mr. RAHALL].

AMENDMENT OFFERED BY MR. RAHALL

Mr. RAHALL. Madam Chairman, I ask unanimous consent to offer an amendment and ask that it be allowed to be considered en bloc with the amendment of the gentleman from Florida.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. RAHALL: Page 41, line 6, after the first period insert the following:

The Commission may increase the maximum percentage of a grant from 50 percent to not more than 80 percent of the costs of a project approved under this Act for a county which the Commission determines is one of the most distressed counties in the Appalachian region; except that the Commission may not increase such percentage for more than 25 percent of the grants made in any fiscal year.

Mr. RAHALL (during the reading). Madam Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. GRANT. Madam Chairman, I spoke a few moments ago about how much I do like this bill. I do like this bill. I think we need it.

What this bill does basically is to put some constraints on both these programs, badly needed constraints. It is long overdue, and I think that in the wisdom of the legislative body that we are going to do that.

However, Madam Chairman, in some instances we put a few too many constraints on these programs. What our amendments do, Madam Chairman, is the gentleman from Illinois [Mr. SAVAGE], the distinguished chairman of the subcommittee, the gentleman from West Virginia [Mr. RAHALL] and I have crafted an amendment which would make provisions for the most severely distressed, economically, distressed, areas of America.

As with any illness, and in this we are talking about economic illness of course; as with any illness, even a physical illness, some are more serious than others. One may have a broken bone, and it may be a compound fracture as compared to just a simple fracture. We could have a common cold, or we could have pneumonia. Economic illness is the same thing.

Madam Chairman, there is no question that we have an illness in some parts of our country, and what we are doing is trying to address those illnesses.

Our amendment basically provides that the provision in the bill, which now places a maximum Federal share on any grant at 50 percent, be extended at the discretion of the Secretary to 80 percent in those instances where there is severe economic distress. There are provisions in the amendment that suggest that the Secretary should take into consideration the unemployment rate in the area, that they should take into consideration the median family income in the area applying for the grant, and we think that it addresses not only the needs of America, but the severe need in some parts of America.

Mr. RAHALL. Madam Chairman, I rise in support of the amendment.

Madam Chairman, H.R. 2015 reduces the maximum allowable Federal cost share for EDA construction and improvement projects and for ARC nonhighway programs from 80 to 50 percent. This proposed change is meant to conform to fiscal reality. However, both EDA and ARC were specifically designed to assist distressed communities. I believe that reducing the Federal cost share to 50 percent with no discretion to provide greater funding would circumvent the very intent of these important programs.

There is nothing in existing law which forces EDA or ARC to provide a cost share higher than 50 percent. However, if this discretion is removed entirely, they will be prohibited by law to provide a higher cost share in the

event that the applicant community does not have the available funds.

Our amendments represent a compromise. They would grant the Secretary and the Commission limited discretion to provide up to 80 percent Federal cost share for areas that are determined to be the most distressed. However, the number of grants made at increased Federal percentage may not exceed 25 percent of the total grants made by EDA or ARC in any fiscal year.

This flexibility is important. I do not have data for around the country but I know that in West Virginia, 18 counties have been designated by EDA as areas which are eligible to receive cost shares higher than 50 percent based upon the level of distress in those areas.

During fiscal year 1988, ARC funded 35 projects in its 90 distressed counties at above the 50 percent level. In fiscal year 1989, 23 projects in the distressed counties were funded at more than 50 percent from a total project count of approximately 275 in fiscal year 1989.

Clearly the need is there for some discretion to fund projects at a higher Federal share. I urge my colleagues, particularly those who overwhelmingly voted yesterday to send considerable aid to foreign countries, to join us in helping the poorest communities in our own country.

Mr. HAMMERSCHMIDT. Madam Chairman, I rise in support of the amendment.

Madam Chairman, I rise in support of the amendments of the gentleman from Florida [Mr. GRANT], the gentleman from West Virginia [Mr. RAHALL], and the gentleman from Illinois [Mr. SAVAGE].

H.R. 2015 was originally drafted as a reform bill, designed to limit Federal funding in local projects, encourage more private sector involvement, and ensure that the local commitment is high. These amendments are the result of a compromise and I will support them.

The bill under consideration would limit EDA's share of a public facilities project and ARC's share of a nonhighway project to 50 percent of the total cost. The Grant-Savage-Rahall amendments would allow the Secretary of Commerce and Appalachian Regional Commission to make very limited exceptions to this rule, and allow certain projects to exceed this 50-percent ceiling.

The Secretary or Commission would be able to increase the Federal share in such projects up to 80 percent for areas determined to be among the most distressed. Criteria guiding the determination of what constitutes most distressed would be promulgated by the Secretary or Commission. The Federal share could not be raised for more than 25 percent of grants made in any fiscal year.

Because increasing the Federal share would only be permitted with approval of the Secretary or Commission and under very limited circumstances, this amendment maintains the integrity of the reforms contained in H.R. 2015. I commend my colleague from Florida for his expertise in helping to draft these compromise amendments. Along with Mr. RAHALL and Mr. SAVAGE, Mr. GRANT's knowledge of the EDA Grant Program and how this legislation would impact upon his and similar districts were key in reaching this workable compromise.

I support this amendment, and I hope my colleagues will as well.

Mr. GRANT. Madam Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Florida.

Mr. GRANT. Madam Chairman, I want to make one point to my colleagues, and that is that the contributions that the Secretary shall make are not necessarily limited to the two mentioned in the amendment. There are others that the Secretary might mention, might take into consideration rather, including financial constraints such as a constitutional cap on taxing authority, those kinds of things, and I just wanted to make that point.

Mr. HAMMERSCHMIDT. Madam Chairman, I certainly agree with the gentleman from Florida [Mr. GRANT]. I believe that is the consensus of our full committee, and we need to make some legislative history to make the point.

Mr. ANDERSON. Madam Chairman, I move to strike the last word.

Madam Chairman, I rise in support of the amendment of the gentleman from Florida [Mr. GRANT] and the gentleman from Illinois [Mr. SAVAGE], as well as the amendment of the gentleman from West Virginia [Mr. RAHALL]. Both of these amendments address the issue of providing up to 80 percent Federal funding for projects in the most distressed areas.

I believe these amendments are good public policy, and I support them.

Mr. CLINGER. Madam Chairman, I move to strike the requisite number of words.

I do rise in support of this very finely crafted amendment by the gentleman from Florida [Mr. GRANT] and the gentleman from West Virginia [Mr. RAHALL] our colleagues. EDA and the Appalachian Regional Commission, after all, were founded, originally created, to assist those communities in this country which are distressed, and are having a tough time making it and who need that little extra help. So, it would be very ironic if in passing this legislation we were to exclude the communities that were in most desperate need of help, those that were really having the hardest possible time addressing their very real needs.

So, Madam Chairman, I think this amendment does something that is very necessary. It is going to provide the kind of flexibility to the Assistant Secretary that is going to be essential to see that this program is carried out equitably for all concerned.

I would point out that most of the grants that are going to be made on this program will be made at the 50-percent level, and that is important because we recognized over time that the projects where the communities are expected to put up some of the resources are going to select higher quality projects, but, on the other hand, we do have communities where they are not going to get into the game at all unless they are given more help.

Now there are going to be those who, perhaps, would say this goes back to the old formula, what we have in the existing law, the 90 percent, and that there were abuses under that program, but I would point out that this amendment limits the amount that will go out under this amendment to only 25 percent of the grants that could go out on this program would be over the 50-percent level.

More importantly, I think the amendment gives the discretion to the Assistant Secretary and to the Commission to make the determination where it is absolutely necessary.

We have learned, I think, over time that there are some communities in which it would just not be worthwhile to put the money in. I mean it is unfortunate that some communities are basket cases, and we are never going to be able to, with the minimum amount we have available, to save them. We know what those factors are, and we have to have available land, we have to have an available work force, we have to have the potential for a tax base. There are a number of factors that go into this.

□ 1520

So this program can be limited to those communities that do not have the wherewithal now, but do have the criteria, the factors, where a minimum investment by the Federal Government could make a very real difference; so this I think is a well-crafted amendment. It is one that I believe deserves the support of this body.

Mr. PACKARD. Madam Chairman, I move to strike the requisite number of words.

Madam Chairman, this amendment expands the amount of the Federal share up to a possible 80 percent, but limits the eligibility to the most distressed areas, and further limits that only 20 percent of the available grants in any fiscal year exceed the 50-percent Federal share as mandated in the bill.

I have some problems essentially with this effort; however, I recognize

that the amendment is a product of a compromise that has been worked out among several Members and their staffs. While I have some reservations about moving away from the fundamental reforms that we have worked hard for in this bill, I am willing to accept this compromise, recognizing that it will provide some communities that otherwise could not participate to participate in the EDA grants.

Therefore, I ask my colleagues to support this amendment.

Ms. OAKAR. Madam Chairman, I move to strike the requisite number of words.

Madam Chairman, I rise in support of the amendment. I think that some will say, "Oh, we're going back to the old formula," but the fact is that like many bills that come to the floor, we ought to view the problems of poverty and need in a national perspective. It may not affect my district or the districts of others, but it certainly affects areas like West Virginia, which I think the gentleman from West Virginia [Mr. RAHALL] eloquently has talked about so often.

For that reason and other reasons, I want to compliment the gentleman from Florida [Mr. GRANT] and the gentleman from West Virginia [Mr. RAHALL]. I think it is a worthy amendment. I have no reason to object, and urge its adoption.

The CHAIRMAN. The question is on the amendments en bloc offered by the gentleman from Florida [Mr. GRANT] and the gentleman from West Virginia [Mr. RAHALL].

The amendments en bloc were agreed to.

Mr. SHUMWAY. Madam Chairman, I move to strike the last word.

Madam Chairman, I prepared two amendments to be offered to H.R. 2015, which would direct that appropriations for the Economic Development Agency [EDA] and the Appalachian Regional Council [ARC] be made only for projects selected through the agencies' standard selection procedures. In other words, the amendments seek to prevent earmarking of funding for legislatively mandated projects.

In my view, remedial action is needed because EDA and ARC have become channels for irresponsible pork barrel spending. However, closer examination has revealed that the problem is much broader than I originally believed; the amendments will not serve the intended purpose. While they would take a step toward limiting the discretion of the Appropriations Committee, they would do nothing to shake up EDA and ARC, or to make those agencies realize that they must improve the manner in which they function. In my opinion, the agency is failing to be responsive to the needs of economically disadvantaged areas in some cases, and serving such needs was the reason EDA was established. As I prepared these amendments, EDA was less than forthcoming in cooperating with my requests for information concerning its practices and procedures. My amendments would not correct those serious flaws. Furthermore, the amendments would not really solve the problem of earmarking by the Appropriations Committee; as long as Congress tolerates the practice, it would continue.

Suggesting these ideas, however, will not only send a loud and clear message to EDA—it will also send an important message to the Appropriations Committee. In this time of scarce Federal dollars and budget restrictions, pork barrel spending simply will not be tolerated. The Appropriations Committee should exercise both discretion and responsibility. Philosophically, I am opposed to dictatorial policies. The amendments I had prepared were somewhat in contradiction to that philosophy. I believe that, by not offering these amendments, I am more accurately stating my concerns, and am directing the attention of the Appropriations Committee, my colleagues in the House, and the agencies themselves to some very troubling problems.

Finally, let me make it clear that I am not throwing away the text of these amendments. I am simply not offering them at this time, to allow for changes to be made not only by the agencies, but also throughout the appropriations process. If no progress becomes evident in the future, that will be the time to determine appropriate remedial language to address ongoing problems.

Mr. McEWEN. Madam Chairman, I move to strike the requisite number of words.

Madam Chairman, I join my colleagues in support of this legislation. I specifically would like to applaud the statement of the gentleman from California who pointed out that it has been the desire of many of us to make this program workable to the cause for which it was intended. If one were to travel throughout the Appalachian regional area, if one were to see where the Economic Development Administration has been assigned to do its task, there are many excellent examples of where areas that have been abandoned by the rest of our economy and our Nation were able to come to the aid of a school district or a county where there was no medical service at all, or where there was no clean water or sewers, and strides have been made as a result by the Economic Development Agency, and the Appalachian Regional Commission.

I therefore strongly support this reauthorization, but encourage my colleagues also to do what has to be done, and that is to see that this is enacted into law, that those recommendations and changes that are the product of the hearings of the Public Works Committee and the other committees of jurisdiction, make sure that they are not just another expression of concern by this body, but that they are passed by the other body as well and presented to the President. Then all of us can look at this program and see where these improvements can be made, where the oversight and finger manipulations of the Appropriations Committee that has taken actions that are unbecoming this body, that has mandated programs that are without the purview of the Appalachian Regional Commission, and yet they were directed to make those expenditures, and as a result it is an embarrassment to them. It is an embarrassment to us, and it is a disservice to those who live in those sections of our country that need this assistance very dearly.

This bill does that. This bill does make those improvements. This bill does say that those who are most in need will receive the funds.

I think this improvement is a tremendous step forward for both those agencies, that as I say have done great good for our Nation; so I urge my colleagues that in voting for this that you not see it as a region of the country that is being benefited, but that our entire Nation is being benefited, and especially so that this legislation must be enacted into law, signed by the President and a new life and a new lease given to the Economic Development Administration and the Appalachian Regional Commission and those who are dependent upon their services for adequate care.

Mr. APPLEGATE. Madam Chairman, I move to strike the requisite number of words. I rise in support of the bill. I rise in support, although a little bit late, on behalf of the Rahall-Grant increase, which I was very happy to see passed.

The EDA and the ARC, I think as most people have said and I have heard, is an investment in America. It is an investment in America's children. It is an investment in America's families. It is an investment in America's communities. It is an investment into the quality of life for many Americans who have been denied their jobs, who have been denied a quality of life in certain sections of the country. These programs have been extremely successful.

Let me just say this, that these programs, the Appalachian Regional Commission has been the most successful in its concepts in the history of this country.

□ 1530

It has raised the literacy rate in the area of Appalachia. It has provided better education. It has helped to subsidize and built vocational educational schools. It has lowered the poverty level. It has helped to provide grants where grants are necessary to help people and to help the communities, the communities who have been hurt over the years because of a tremendous amount of loss of jobs.

In my area where foreign imports have caused 15,000 jobs to go down the tubes in the steel mills, we will never get those back, and when people are not working, communities without workers are communities without funds.

With the clean air bill that seems to be rushing through the Congress right now, we stand to lose thousands more of steelworkers' jobs. We stand to lose thousands of coal mining jobs, and we stand to lose hundreds of small businesses which are dependent upon these steelworkers and dependent upon these coal miners.

I say that we have got to have this kind of legislation if we are going to meet the needs of the people, people who have paid taxes in. We have lost the UDAG's, as I heard my good chairman talk about. We have lost revenue sharing. We do not have this money available to us. We just cannot continue to have it taken away from us. It is double jeopardy is what it is.

When my area worked and when my thousands of steelworkers were working and when my thousands of coal miners were working, we helped to fund all the rest of the programs throughout the United States because we prospered. We are now not prospering, and all we are doing is asking you to support a bill that will now help us. Just remember the past. It might return, and someday you who live in the prospering communities across America might get stripped of some of your luxuries and you may have to look back to some of your old friends.

I am very glad to see this bill where it is and the support that it has. I appreciate everybody supporting it as they have. It will help America, and it will help Americans.

Mr. WALKER. Madam Chairman, I move to strike the requisite number of words.

Madam Chairman, this has been a very nice love fest out here on the floor today, and it is certainly a compliment to the committee that they have worked hard enough on a bill to bring all these disparate elements together in support of this particular piece of legislation. There have been a lot of fine words said about it.

We have not had very much discussion though about a few facts that might want to be considered by Members as they consider this particular bill. We have not had much discussion today, for instance, about deficits. We have not heard very much about deficit spending out here today.

The reason why I bring that up is because I have been on the floor on a lot of occasions listening to Members come to the floor and wondering where deficits came from. They do not come from Congress we are always told. I mean, some of us have raised the point along the way that Congress might be responsible for some of this spending that ends up being deficits, and we have been told over and over again that, by particularly Members from the majority side, "Oh, no, deficits never start here. The deficits are the administration's responsibility. We have had Presidents, and we have had that Ronald Reagan down there just overspending like mad. It is his responsibility. Now we have got George Bush, and it is his responsibility that we have deficits."

I think maybe we ought to raise maybe one little point about the bill we have got here. This is a bill where the administration zeroed out in its budget EDA. This bill now proposes to spend over the next 3 years $828 million in a program that the administration zeroed out in an attempt to try to do something about the deficit. This bill proposes to spend in the Appalachian Regional Commission $555 million. The administration, over that same period of time, has asked for $155 million. There is a little $400 million difference there. If you add that to the $828 million, somewhere here we have come up with a $1.3 billion problem that we do not talk about.

Somehow that is one of those little deficit numbers that just gets forgotten.

I have another little problem, and that is that somewhere this money that we authorize in these programs gets taken out of the hide of something somewhere. It is fine to talk about all of the good things this program did. There is some difference of opinion with that when the EDA defaults on about 50 percent of the loans it gives out. There is some question to believe that maybe these programs have not worked quite as well as some people claim, but that is beside the point. The point is that when this money gets over into 302(b) allocations, it comes out of the hide of programs that, I think, are fundamental to this Nation, too.

One of the places this money has been taken out of is science and technology. One of the places where this money has been stripped out is in doing the high technology work that this country needs to be done, and we find then that the moneys that this administration is coming up with to expand the research budgets of the country get undermined when these programs come up against it and we lose our ability to address the future.

Why will we not have jobs in the 21st century? If we do not make the investment in science and research now. We will not get jobs in the 21st century by continuing to do things where we start with the belief that the way that this country progresses is because of what government does for people.

I would suggest that it really does make sense to believe in what people do for themselves is what is going to help us in the next century, and giving them the tools, the science and research tools, to progress in the next century is what is going to make it for the country.

So this $1.3 billion of spending over and above what the administration has asked for is real money. It will cause deficits. It will cause a lack of investment as a result of those deficits. It will come out of the hide of science and technology, among other things, in the future.

Those are considerations Members might want to give that have not been discussed very loudly today.

Mr. TRAFICANT. Madam Chairman, I move to strike the requisite number of words.

Madam Chairman, I do not want to take all the 5 minutes.

But I am not surprised; we talked yesterday about deficits, as well. I do not know of anybody who got on the floor yesterday when we talked about a supplemental foreign aid bill who talked about deficits. We talked about taking the money that was already in defense, transferring it, and it was really not coming out of the hide of anybody.

Mr. WALKER. Madam Chairman, will the gentleman yield?

Mr. TRAFICANT. No; I will not yield.

Mr. WALKER. I just wanted to ask the gentleman: How did the gentleman vote on the bill yesterday?

Mr. TRAFICANT. Madam Chairman, I said I will not yield. I think everybody knows how I felt about the bill yesterday. There were some good parts of the bill that I was prepared to vote for. I think everybody knows the gentleman's feelings on the foreign aid section. I am not going to question Members' motives, but just to say this today, that when we stand up today and talk about deficits for a part of America that has been hit harder than anybody else, and my district is not in the Appalachian region, but I have to give credit to the chairman, the gentleman from Ohio [Mr. APPLEGATE], and he and I share part of Columbiana County, who was able to get the House to put Columbiana County into the Appalachian Regional Commission, and I commend him on behalf of the few constituents I have in that county, commend him for that move, and I commend everyone in this House

today who has taken it upon themselves to look at a section of America that has been literally decimated.

We are not breaking the bank, and I am not going to get us into a big brouhaha here. Every time I hear somebody stand up about deficits, we are talking about people who sometimes do not have shoes. Their kids cannot get to school some days. Both parents are working, and at the schools, if there is bad weather, they do not even send the kids home, because there is no one home to greet the kids.

We are talking about, what, $400 million a year. We are going to bust Uncle Sam's back and the bank? Come on, now, this is exactly what we are talking about, and the policy that should be discussed in this House, and I just hope that the Members realize that is what we are talking about here today.

I commend Members like the gentleman from Pennsylvania [Mr. CLINGER], the gentleman from California [Mr. PACKARD], and many others on that side of the aisle who realize the hardship that people have whom we represent, and that there is nothing un-American about this bill.

This is America today.

Mr. DE LA GARZA. Madam Chairman, I move to strike the requisite number of words.

Madam Chairman, my colleagues, I rise in support of this legislation for a very personal reason, that I was part of the Congress that first established EDA.

For some unknown reason, subsequent administrations have always attacked it, have always tried to cut the funding, and have always tried to do away with the EDA.

From all of the programs that impact in my congressional area, my congressional district, let me say that we have what is known as the Rio Grande Valley Economic Development Council, with all representatives from all the area.

□ 1540

I have another part of my district that belongs to another one, and another part that belongs to another one. But for now let me just mention the Rio Grande Valley Development Council. They have a slide presentation in which they show you slide by slide the project that was funded in whole or in part by EDA. It has the name of the company.

You can leave there and go to the community and see the project in existence operating. There are parking lots full of workers' cars.

This is the only area outside of agriculture. In agriculture we suffer and die every other year it seems like. But the EDA, the Port of Brownsville, the Shrimp Port Basin, the Military Highway Water Supply District, these are the types of projects that we have brought to our area from EDA.

This is the kind of project that I like to vote for, and I know that most of my colleagues will also, the one where you can trace the dollar from the taxpayer to the Treasury to the business to the worker. This is part of the enhancement of the GNP. This is part of reducing unemployment. These are jobs that are clearly jobs, daily jobs, unlike agriculture that you have to suffer by.

So it makes you feel good to see a parking lot of workers' cars. These are old year cars, but nonetheless, the people are working.

I would dare say that this has been one of the best programs. The Economic Development Administration has been administered with no scandal. I challenge anyone to go find like what you have found in other agencies. There is no scandal. Joe Bailey Swanner was the one that handled the Texas and Southwest area for many years, and he was a dedicated public servant. He worked with us. I am here to attest to the fact that EDA has made jobs in my district and anyone can come and I can take you to the plant.

We are now having new research and technology that has come into the picture. Fruit of the Loom is going to build a plant outside of Arlington, TX. What we are going to do there in part with the help of EDA is bring the cotton to the gin, gin it, throw the bale into the next building, textile, make the material, throw the material into the next building, make the Fruit of the Loom products. Cotton is going to come in on this side, Fruit of the Loom is going to have the final product at the other end of this long building.

This is what we have been talking about in rural America. This is what we have been talking about, enhancing the availability.

Those people with those cars in that parking lot pay taxes, more than what we first loaned them through EDA, loans or grants. I think this is what we are looking for. I think we should do more of this, make taxpayers out of people that have no other recourse but to receive assistance from the government.

I am here to personally attest to the fact that the program has been well run, thanks to the people in my local area and to the people at EDA who have managed it, the people that have received the grant and/or loan, have been responsible, and in the end everyone has won. We have more money coming into the Treasury, we have more people off the unemployment lists, and it makes you feel good to see that your tax dollar went for something like that.

Mr. COX. Madam Chairman, I move to strike the requisite number of words.

Madam Chairman, I rise in opposition to H.R. 2015. I do so reluctantly, as a member of the Economic Development Subcommittee, because the authorizations would greatly exceed our budget. H.R. 2015 would authorize appropriations totaling $828 million during fiscal years 1991–93 for the Economic Development Administration [EDA] despite the fact that the President's 1991 budget proposes to terminate EDA. H.R. 2015 also authorizes appropriations totaling $555 million during fiscal years 1991–93 for ARC, compared to the $155 million proposed by the administration for those years.

President Bush believes and I agree that decisions to undertake economic development projects with only local benefits are more appropriately made and financed by private investors or State and local governments. I also believe that the goals of EDA programs can be better met at the Federal level through the administration's national policies of fostering economic expansion and job creation. In the case of highly distressed areas, incentives such as those in the administration's enterprise zone proposal would be more effective than the EDA programs.

Despite my reservations, I could support the enactment of H.R. 2014 if it were amended substantially to:

Delete the appropriations for EDA and retain only those provisions that would improve EDA program management in the event funds are appropriated for EDA; and

Limit the appropriations authorizations for the ARC to $50 million in fiscal year 1991, $52 million in 1992, and $53 million in 1993.

Mr. WALKER. Madam Chairman, will the gentleman yield?

Mr. COX. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Madam Chairman, I am sorry the gentleman from Ohio [Mr. TRAFICANT] left the floor. I wanted to carry on a dialog with the gentleman about the point I was making.

Yesterday the gentleman from Ohio [Mr. TRAFICANT] came to the floor and did indeed raise a lot of questions about deficits when it came to the supplemental appropriations bill. But this gentleman noticed on the final vote that the gentleman from Ohio [Mr. TRAFICANT] voted for the final bill, all $2 billion of it, including the money that was in there for foreign aid.

Some Members opposed the bill yesterday and voted against it because we were as worried about deficits yesterday as we are today. I will vote against this bill because I think that it does become a deficit add-on bill.

As I say, I wish the gentleman from Ohio [Mr. TRAFICANT] was here so we could discuss the topic. If one is going to worry with deficits, it has to be an everyday kind of concern.

Madam Chairman, I thank the gentleman from California [Mr. Cox] for yielding.

Ms. OAKAR. Madam Chairman, I move to strike the requisite number of words.

The gentleman from Ohio [Mr. TRAFICANT] was not here to defend himself, but I would like to note for the record, without commenting on the merits, that the gentleman did offer amendments to reduce foreign aid 3 percent and 5 percent. I think that should be stated for the record.

Just briefly I would like to say that with this modest investment of this bill in the last few years, it has generated $4.7 billion by the private sector in investment, generated 1.4 million jobs, leveraged $9 billion in private capital, and was responsible for decreasing the deficit because it returned $6.5 billion annually to the Federal, State, and local treasuries.

The CHAIRMAN. Are there any more amendments to the bill?

If not, the question is on the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. HARRIS) having assumed the chair, Ms. SLAUGHTER of New York, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill (H.R. 2015), to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, pursuant to House Resolution 372, she reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore (Mr. HARRIS). Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 340, nays 82, not voting 11, as follows:

Feighan	Hawkins	Yates
Flippo	Nelson	

□ 1614

The Clerk announced the following pair:

On this vote:

Mr. Nelson of Florida for, with Mr. Stump against.

Messrs. CARR, SHAW, and BARTLETT changed their vote from "yea" to "nay."

Mr. DORGAN of North Dakota changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their re-

marks and include therein extraneous material on the bill just passed.

The SPEAKER (Mr. HARRIS). Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION FOR COMMITTEE ON SCIENCE, SPACE, AND TECHNOLOGY TO HAVE UNTIL 6 P.M., THURSDAY, APRIL 12, 1990, TO FILE REPORTS ON H.R. 4329, THE AMERICAN TECHNOLOGY PREEMINENCE ACT OF 1990 AND H.R. 4380, SUPERCONDUCTING SUPER COLLIDER PROJECT AUTHORIZATION ACT OF 1990

Mr. ROE. Mr. Speaker, I ask unanimous consent that the Committee on Science, Space, and Technology have until 6 p.m. on April 12, 1990, to file a report on H.R. 4329, the American Technology Preeminence Act of 1990, and a report on H.R. 4380, the Superconducting Super Collider Project Authorization Act of 1990.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. MACHTLEY. Mr. Speaker, reserving the right to object, I wonder if this has been cleared, and I yield to the gentleman from New Jersey [Mr. ROE] for an answer.

Mr. ROE. Mr. Speaker, it has been cleared with the gentleman from Pennsylvania [Mr. WALKER].

Mr. MACHTLEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

FIGHTING FOR FAIRNESS: THE RURAL HEALTH CARE COALITION'S 1990 INITIATIVES

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, I believe that affordable health care must be available to all Americans. Today, the mounting crisis facing our Nation's health care system threatens access to these critical services.

In recent years, small communities and towns across our country have been particularly hard hit by escalating health care costs as one rural hospital after another has been forced to close its doors.

In northeast Arkansas, the plight of rural health care providers is dire. The American Hospital Association reports that in 1988, 43 rural community hospitals closed. Two of those were in the First District of Arkansas. Right now, four more hospitals in the First District face the same fate.

Other indicators of health care effectiveness reflect the severity of this situation. For example, in the Mississippi Delta, the infant mortality rate is substantially higher than in the rest of the Nation.

Faced with these realities, we must recognize that the need for more dependable and more accessible health care in rural America is indisputable.

The successes of the Rural Health Care Coalition over the past few years have given me hope that it is possible to build a solid health care system across rural America. This year, I am joining forces with 143 other members of the coalition to introduce our 1990 legislative reforms.

The Rural Health Care Coalition's bills for this year propose equitable Medicare payments to rural hospitals, the establishment and expansion of State offices of rural health, educational assistance for allied health professionals, and the revitalization of the National Health Service Corps.

These provisions will build upon our past accomplishments and help ensure that all Americans—regardless of how old they are, how much money they earn, or where they live—have access to health care.

Rural hospitals are a crucial linchpin in our health care system. Health care providers and administrators have repeatedly warned that the closure rate of these hospitals jeopardizes care for the sick, but a constituent of mine offered the most convincing reason for supporting these hospitals.

His 56-year old father died because the hospital in his community had been forced to close. He told me,

I hope this will make some people take notice of the tragedy that can and does happen when a rural hospital closes and a person has to drive so far to get help. I'm sure Dad isn't the only one who died for no reason and leaves behind loved ones who keep thinking—if only the hospital hadn't closed.

We cannot afford to allow any more tragedies like this to occur because a rural hospital has to close its doors. Rural hospitals and physicans rely more heavily on Medicare revenue than urban providers, but receive significantly smaller Medicare payments. This inequity threatens the quality of care in my district and in rural areas across the country.

Our rural hospital payment equity bill would eliminate the disparity in reimbursement rates for fiscal year 1991 and require the Secretary of Health and Human Services to reevaluate the way in which we compensate rural hospital employees.

Another significant problem which the coalition's package addresses is how to improve the supply of health care providers in rural America.

Every one of the 24 countries in my district has been designated a medically underserved area. As my constituents know, the simple truth is that if there isn't a doctor in your town, you will wait until you are much sicker to seek treatment. The cost of medical shortages, both in dollars and in suffering, is unacceptable.

The coalition's bill to reauthorize the National Health Service Corps will encourage health care professionals to practice in rural areas where they are so desperately needed.

In some of the hospitals and clinics in my district, the corps doctors are the only providers of primary care services. We recommend an infusion of new funds into this program in order to recruit more physicans and midlevel practitioners to these regions.

In addition, we propose to expand funding for allied health education. Physical thereapists, occupational thereapists, registered nurses, and dentists are in short supply in rural areas, and the coalition's bill will encourage more young people to enter these allied health fields.

Three-quarters of the funds authorized through this proposal are targeted at professionals who care for the elderly and disabled. In my State, which has the second highest percentage of elderly residents in the country, this bill is especially important.

Mr. Speaker, the coalition's legislative proposals for 1990 make important strides toward safeguarding the viability of our rural hospitals and practitioners. I strongly support its bipartisan goals, and encourage my colleagues on both sides of the aisle to do the same.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1526

Mr. DORGAN of North Dakota. Mr. Speaker, I ask unanimous consent that the name of the gentleman from Minnesota [Mr. SIKORSKI] be stricken as a cosponsor of H.R. 1526.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

STATUS ON THE AMERICANS WITH DISABILITIES ACT

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, I am pleased to rise today to bring to the House's attention that the Committee on Public Works and Transportation, by a vote of 45 to 5, reported favorably on the Americans with Disabilities Act.

That means that we have now had that bill reported favorably out of three of the four committees to which it was assigned. There have been 120 votes for it and 8 votes against it. Clearly, there is overwhelming sup-

port on both sides of the aisle. President Bush has strongly endorsed this legislation.

It is a bipartisan bill that seeks to make accessible employment, transportation, communication, and places of public accommodation to those in our society who are disabled. There are 43 million such Americans.

I see on the floor a number of people who have been very, very important in the success of that bill, not the least of which is the gentleman from California [Mr. ANDERSON] who is on the floor. I also might observe that my good friend, the gentleman from Texas [Mr. BARTLETT], has also been a very significant laborer on behalf of receiving reasonable accommodations on Americans with Disabilities Act, and I want to thank all of those who have worked on it so diligently at this time, and say that I look forward to its early passage upon our return to the House of Representatives. I know that the President looks forward to signing this bill in the near future.

CONSIDERING THE NATIONWIDE CONSEQUENCES OF THE CLEAN AIR ACT

(Mr. DONALD E. "BUZ" LUKENS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, yesterday, the Senate passed the most comprehensive revision of the clean air laws in 13 years. The House version will be on the floor in the next few weeks or months.

While we all support the concept of clean air, I am very concerned about the economic consequences we in Midwest will face if this bill becomes law are worth the environmental gains. Either way, consumers and workers look to be losers.

Mr. Speaker, I support a cleaner environment, but I am concerned that the Midwest will take a disproportional hit with the clean air act revisions. The only study commissioned by the U.S. Government does not in anyway support the claim that the Midwest pollution is causing the "acid rain" destruction of lakes in the Northeast.

I urge my colleagues in the House to consider the consequences of this bill nationwide when we debate it here in the House.

According to an article in Monday's Dayton Daily News, some 19,000 coal miners in Ohio, Pennsylvania, West Virginia, Indiana, and Illinois could lose their jobs because of restriction, on high sulfur coal in the bill. Utility customers will face higher bills, too.

The article follows:

[From the Dayton Daily News, Apr. 2, 1990]

CLEAN-AIR LEGISLATION BRINGS SOME TOUGH CHOICES

(By Jon Talton)

Just a year ago, environmentalism was a low-risk way for politicians, left and right to pad their moral assets; Who could argue with mom, apple pie and the environment?

Now comes the morning after, and we must face the real-life human and economic costs of ideas and intentions.

No longer just a glib campaign promise, the Bush clean-air legislation moving through Congress could be one of the most significant influences on the economy in coming years.

The costs will be high: at least $21 billion a year as businesses are forced to make changes to clean up smog and acid rain. The real losers, of course, will be consumers and workers—especially in the Midwest—who will pay higher prices and face lost jobs.

Moreover, the added costs and regulation will be a sizable drag on U.S. competitiveness already burdened by rules from Washington.

In return, backers say, the United States will end up with the cleanest air, cars and power plants of any industrialized country. In addition, cancer death will drop, acid rain damage to forests will cease and a beginning can be made in addressing global warming.

That, at least, is the rehtoric. But a closer look shows more messy trade-offs.

For example, some 19,000 coal miners in Ohio, West Virginia, Pennsylvania, Indiana and Illinois could lose their jobs depending on how severely Congress seeks to curtail use of high-sulfur eastern coal to deal with acid rain. Midwestern utility consumers could face much higher bills, too.

But Draconian measures against high-sulfur coal may not yield more improvements than would be achieved over a somewhat longer length of time as industries are modernized. In addition, a $500 million government study indicates acid rain has caused relatively little damage to forests and lakes, and no harm to crops or health.

This pattern repeats itself throughout close examination of the clean-air proposals; hard economic consequences versus marginal environmental or health gains, in a climate of dividend and uncertain scientific opinion.

Business itself has a habit of exaggerating costs, when in the past the economy has proven itself remarkably able to adapt to changes and stress. But we should not delude ourselves into thinking there will be no cost.

The estimated $21 billion annual price tag for the clean air bill will be added onto an estimated $80 billion a year already spent in this country to comply with environmental regulation. Many companies have simply closed as a result, and we can expect more to do so.

This cost will hit industries, such as autos and steel, already struggling in a tough global marketplace. It could extend into smaller businesses. And in every case, the cost is ultimately passed along to consumers.

The broad question facing the nation is how to turn legitimate environmental concerns into effective policy that does not choke the prosperity that allows us to worry about clean air in the first place. Then we have to worry about getting the world to go along.

But even that's not the real flesh-and-bone issue. Such a large economy as ours can endure a lot. But policy picks invariably winners and losers, whether they be regions or individuals.

The danger with ill-conceived environmental policies is that they disproportionately hurt the neediest segments of society. If those policies take away avenues of economic empowerment, then no amount of welfare can undo the damage.

It's ante up time for the environmental politicians.

SAFETY DEFECTS SURFACE IN JAPANESE PRODUCTS

(Mr. WALGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALGREN. Mr. Speaker, as we all know, Americans have a tradition of being tough on themselves—and we are often quick to criticize products made in America—and quick to attribute better qualities to products made abroad. Yet we know, as Lee Iacocca has been reminding us, that American products can be the best in the world.

As American consumers, we should remember that imported products are often produced where there is little or no regulation or system of product liability which the American marketplace relies on to protect consumers. And, that is true not just of less developed countries, but of our major trading partners like Japan, which has no law governing recalls or requiring reporting of defects.

Last Thursday, the Washington Post carried a report on an embarrassing wave of product recalls in Japan. The problem is not just poor quality control but safety involving TV sets that could catch on fire.

It is crucial that Amerian consumers be protected from unsafe foreign consumer products. As the chairman of the Subcommittee with jurisdiction over the Consumer Product Safety Commission, I have written to the CPSC, urging the Commissioner to investigate whether foreign TV sets sold here are subject to the same safety defects and to make clear to the manufacturers involved that unsafe imports have no place in this country.

Mr. Speaker, I submit my letter and the news report on these problems for the RECORD, as follows:

COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, April 3, 1990.

Hon. JACQUELINE JONES-SMITH,
Chairman, Consumer Product Safety Commission, Washington, DC.

DEAR CHAIRMAN JONES-SMITH: I am very concerned with the growing number of recalls of defective Japanese appliances and its implications for the safety of American consumers. For your reference, I have enclosed two articles which discuss this serious problem.

As you can see, since January, four Japanese electronics companies have recalled hundreds of thousands of color television sets that suddenly smoked or caused fires. While these recalls apparently took place in

Japan, the companies involved also sell many TV sets in the United States. It is very possible that the defects which caused these problems in TV sets sold in Japan may also be present in TV sets sold in the United States.

I am particularly concerned because the articles point out that Japan has no law governing recalls or defect reporting for non-automotive products. The article notes that one company, Pioneer, quietly began fixing some defective TV sets and did not issue a public recall notice for nine months. Sony took almost four months to issue a public recall notice for six TV models. Furthermore, the Japanese Ministry of Trade and Industry discovered, in its last annual inspection, that more than 30 percent of manufacturers violated government safety standards.

I urge the CPSC to investigate this matter. It is crucial that the CPSC make clear to foreign manufacturers that unsafe consumer products will not be tolerated in the United States and that the lax attitude about recalls and defect reporting that is apparently the case in Japan does not apply in this country. This situation raises several important questions:

Whether any of the recalls referred to in the articles took place in the United States;

Whether the defects that have been reported in the Japanese TV sets sold in Japan may also be present in similar sets sold here and, if so, what action the manufacturers and the CPSC have taken to correct the problems;

Whether the manufacturers involved take their defect reporting and recall responsibilities, required in the US under section 15 of the Consumer Product Safety Act, more seriously here than they do in Japan;

Whether the companies involved will adopt the new, tighter voluntary safety standard, developed by a committee of the Electronic Industries Association of Japan, for their TV sets sold here; and

Whether the apparent lack of effective Japanese government safety regulation of Japanese manufacturers increases the burden on US taxpayers and the CPSC to ensure that products imported into the US meet applicable safety standards and do not contain safety defects.

I know you share my concern about the importance of protecting American consumers from dangerous imported products and I look forward to your response to these questions.

Sincerely,

DOUG WALGREN, *Chairman,*
Subcommittee on Commerce,
Consumer Protection and
Competitiveness.

APPLIANCE RECALLS SHAKE JAPAN AS HIGH TECH OUTRACES INSPECTORS

(By Mari Yamaguchi)

TOKYO.—The race to cram more technology and power into Japanese television sets and computers sometimes has left quality inspectors behind, leading to smoking appliances and an embarrassing wave of recalls.

The recalls, following a series late last year involving some new model Japanese cars with faulty parts, have revived recollections of a time when "made in Japan" was a label of derision in the United States.

Since January, four Japanese electronics giants Sony Corp., Matsushita Electric Industrial Co., Pioneer Electronics Corp. and Toshiba Corp. have issued nationwide public notices—recalling hundreds of thousands of color TV sets that suddenly smoked or caused minor fires, Seiko Epson Corp. recalled laptop computers that smoked.

"Safety for consumers has been ignored while (companies) concentrate on technology and sales to survive in the competitive market," said Michiko Aoyama, a director at the government-backed Japan Consumer Information Center.

"I'm afraid the quality of Japanese products is declining due to imperfect quality control that cannot catch up with the speed of technological advance," she said.

Toshiba spokesman Yuji Wakayama said: "We have tried so hard to add as many features as possible while reducing the cost as low as possible. The accidents mean production under such conditions has reached the limit."

With the increasing popularity of home videos, electronics companies have been making larger screen televisions that require higher internal voltage. The recent smoking cases were traced to defects in high-voltage circuits.

Late last year, Toyota recalled thousands of its luxury Lexus cars in the United States after defects were found in the cruise-control mechanism and a brake light. Nissan earlier recalled nearly 38,000 cars in Japan.

The most recent recalls brought a warning from the Ministry of International Trade and Industry. It told the Electronic Industries Association of Japan, which groups 600 manufacturers, to investigate thoroughly, tighten safety and quality control, and adopt regular procedures for recalls.

On Wednesday, a special committee of the association announced a draft for tighter safety standards in TV sets' high-voltage circuits, to be adopted voluntarily by 11 Japanese manufacturers, and standardized procedures to handle defects.

The changes could be reflected in new products within a year, said Ryuji Iwasaki, the association's vice president.

"Generally speaking, our new voluntary safety standards require a substantial change in designs and production," said Hiroshi Wada, Sharp Corp.'s director of product planning.

This probably would result in a 2 percent price increase, he added.

Except for motor vehicles, Japan has no law or government guidelines on recalls or reporting of defects in products, giving companies a great deal of leeway in responding to problems.

"We think it is our mission to repair defects to ease our conscience," Toshiba's Wakayama said.

He added, however, that while the problem televisions smoked or burned the tables on which they sat, they "did not kill and hurt people, or burn down houses."

Industry and trade ministry official Takashi Yonehara said, "The recent TV accidents resulted mainly from complex designs and lack of quality controls."

In the ministry's last annual inspection, more than 30 percent of manufacturers were found to have violated government safety standards in products, and MITI will start announcing the names of violators, he added.

A government report in February criticized companies for not promptly giving public notice and reporting defects to industry and trade officials.

Pioneer quietly began repairs for 9,135 defective TV sets last spring, and already had fixed some 8,000 before issuing a public recall notice nine months later, company officials acknowledged.

Sony's public recall notices for six color TV models came almost four months after the first report last October of a Sony set starting to smolder in a home in western Japan.

Sony said it took time to trace the problem to a high-voltage component that had a tendency to overheat after long use.

"We admit our reaction was not quick enough. . . . I guess we could have done better," said Koichi Izukura, a Sony spokesman.

"But we thought we had to be fully prepared obtain parts and send them to service stations and so on before we made the public announcement so that our customers could get service right away," he said. The recall will cost Sony about $6.6 million, Izukura added.

Naokazu Takeuchi, spokesman for the Japan Consumer Union, one of the largest Japanese consumer groups, argues that notification of possible dangers should come before anything else.

He also says the government should help process consumer claims, to speed remedies and spread information more widely.

Atsushi Nakamura, a spokesman for the Japan Bar Association, said consumers should be protected by a product liability law, as in the United States, so that victims of product defects do not have to settle for small compensation from manufacturers.

Industry and trade official Tomosaburo Yano said the ministry has urged electronics and automakers unofficially to make safety a top priority when considering whether to recall their products.

"Companies that don't work hard to improve their products will become losers in the market," Yano said.

INTRODUCTION OF LEGISLATION TO REFORM TITLE XIX OF SOCIAL SECURITY ACT TO HELP HOLOCAUST SURVIVORS

(Mr. WEISS asked and was given permission to address the House for one minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, I am introducing legislation today that would enable Holocaust victims who reside in nursing homes or receive home- or community-based care to keep their war reparations payments from the Federal Republic of Germany. I invite my colleagues to join as cosponsors.

West Germany makes reparations to Holocaust survivors as an attempt to compensate, in some measure, for the severe physical and psychological injuries and the loss of opportunity that resulted from the Holocaust. In the United States, however, reparations recipients who receive Medicaid benefits may not keep their reparations if they reside in a nursing home, or if they receive medical treatment from home- or community-based services. This situation results from an inconsistent and unfair Medicaid procedure.

Medicaid regulations instruct officials not to count reparations as income when determining initial eligibility for Medicaid benefits. Once eligibility is established, however, Medicaid officials count the reparations as income in their determination of how much the patient must contribute to

the cost of their care. The inauspicious result: these Holocaust survivors do not get to keep the compensatory moneys.

Because reparations are meant to make amends for past injustices against Holocaust victims and not to support basic needs, I am introducing legislation to correct this unfair and inconsistent Medicaid policy. My bill amends title XIX of the Social Security Act to disregard reparations from the post-eligibility computation of income for individuals who reside in nursing homes or receive home- or community-based services.

It is my hope that this bill can be enacted expeditiously to allow these victims to receive their compensation. Although the reparations can not wipe out the suffering, they can make a difference by improving the quality of life for a Holocaust survivor.

A copy of the bill is printed below:

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled

SECTION 1. DISREGARDING GERMAN REPARATION PAYMENTS FROM POST-ELIGIBILITY TREATMENT OF INCOME UNDER THE MEDICAID PROGRAM.

(a) IN GENERAL.—Section 1902(r)(1) of the Social Security Act (42 U.S.C. 1396a) is amended by inserting "there shall be disregarded reparation payments made by the Federal Republic of Germany and" after "under such a waiver."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to treatment of income for months beginning more than 30 days after the date of the enactment of this Act.

FINANCIAL PROBLEMS CONFRONTING MEDIUM-SIZED HOSPITALS

(Mr. PASHAYAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PASHAYAN. Mr. Speaker, in the Washington Post of March 25, 1990, Representative JAMES H. SCHEUER of New York detailed in an article several financial problems confronting Medicare. On February 14, 1990, in the Fresno Bee, Mr. T.M. Johnson, the director of the Kaweah Delta District Hospital in Visalia, CA, illustrated the serious financial responsibility that Medicare places on our national hospitals. I should like to insert Mr. Johnson's article into the RECORD.

At my request, Kaweah Delta Hospital sent me a letter recounting the administrative costs that Federal programs can impose on the hospital. I place into the RECORD the letter and payment sheet that details Medicare's unfair compensation to Kaweah Delta Hospital for legitimate medical expenses.

Kaweah Delta Hospital is a 280-bed facility and the largest hospital between Fresno and Bakersfield. It is the most sophisticated hospital within easy reach of half of million residents of the southern San Joaquin Valley, many of whom live on farms in the surrounding countryside. Yet it receives only 40 percent of its outpatient surgery cost from Medicare. Unreasonable expenses that hospitals like Kaweah Delta must now absorb can only result in the deterioration of medical care for those who cannot afford private medical insurance and must rely on Medicare.

America can improve top quality medical service to all Americans, rich or poor, by relieving the financial burden that our current Medicare system places on hospitals.

Our Nation's physicians, health care workers, administrators, and supporting staff all deserve our praise and thanks for providing such technologically advanced and comprehensive medical care to all Americans. But, Mr. Speaker, I fear that high quality health care will deteriorate unless we shall relieve the unfair financial burden that our national hospitals now bear. It is particularly troublesome to realize that hospitals serving a large area and population, such as Kaweah Delta, might have to curtail or cancel many of its programs if corrective measures shall not be made.

[From the Fresno Bee, Feb. 14, 1990]

LETTER TO THE EDITOR:

Recently there was an article in the Bee about the importance of having a national health-care policy that would bring to our country a more rational system for access to health-care and for payment of health-care services. The need for such policy has never been greater.

Today's hospitals have a dual responsibility. First and foremost, they are humanitarian organizations that are here to take care of the needs of the sick and injured. Americans have determined that health care is a basic right for all citizens. Society has determined that health care should not be withheld in quality or quantity on the basis of any factor other than the best judgment of that patient's medical needs.

However, in today's environment, the hospital is also a business enterprise, and as such must apply sound business principles to the management of its resources. The difficulty lies in the fact that neither government, private industry, nor business are willing to pay for the humanitarian services performed by a hospital. The government has expressed a willingness to pay, but in reality it pays only what its limited budget allows, not what the true cost of care is. Business and industry have flatly stated that they want to pay only for the cost of care for those individuals they insure, or for those to whom they are responsible. This leaves a gap in payment sponsoring that is growing each year in hospitals throughout the nation.

The results are now becoming obvious. Hospitals are closing in many communities because they can no longer afford to run both a humanitarian and a business enterprise. In other communities, access is being curtailed to certain high-cost services, such as trauma care. These problems will continue and will worsen until a national health-care policy is established that deals with the questions of how health will be provided and who will pay for health-care services.

If an individual is without food, we don't require the local grocers to provide food to that person without cost, Similarly, if a person suspected of a crime is without representation, we do not ask the attorneys to represent the client without compensation. We don't ask landlords to provide free housing for people without a home.

In health care, however, we have asked physicians and hospitals to fulfill a humanitarian role, but there has been no agreement on the payment for carrying out that role.

In today's competitive environment, that places all health care providers in a very tenuous position. The leaders of both our state and national legislative bodies need to grapple with this dilemma very soon, because the unraveling of the health care system is already beginning.

T.M. JOHNSON,
Executive Director,
Kaweah Delta District Hospital, Visalia.

KAWEAH DELTA DISTRICT HOSPITAL,
Visalia, CA, February 22, 1990.

Hon. CHARLES PASHAYAN,
Cannon House Office Building, Washington, DC.

DEAR CHIP: At the Washington Legislative Visits, you asked for some specific information on the Medicare DRG payment system. I have attached to this letter a sample of twelve patients that we received payment for in February of this year. These twelve patients represent a variety of problems and diagnosis, and the bottomline shows that we were paid 43% of the charges. As you can see, it varies all over the map with some procedures resulting in a profit from the hospital, but several of the more serious procedures resulting in substantial losses. Overall, we lose money on Medicare. For outpatient (Part B) procedures, we are paid 40% of the charges. That is outrageous.

I recently received a complaint from a patient who was concerned about their itemized statement and several charges on that statement they felt were unjustified. As it turns out, this was a Medicare patient and the total bill was $10,843.30. The patient was complaining about several items on there, such as a pair of slippers at $3.20, an incontinent brief at $24.95, and several packages of Chuxs at $5.20 per pack. The Medicare program paid $9,106.80 for this stay, resulting in a loss of $1,736.50. It took us awhile to review the patient's bill, and in fact there was a couple of minor billing errors that we did correct. Nevertheless, we were still paid 15% less on this bill than the actual charges, and the patient still complained.

I hope this information is of use to you in understanding further the problems facing hospitals in dealing with the Medicare program. Attached also is a recent article I wrote for the Fresno Bee, which describes this dilemma in other terms.

Kindest personal regards,

T.M. JOHNSON,
Executive Director.

SAMPLE DRG CHARGES/PAYMENT, KAWEAH DELTA DISTRICT HOSPITAL, VISALIA, CA, FEBRUARY 1990

Diagnosis	DRG No.	LOS	Charges	Payment	Var.
Kidney/urinary tract procedures	315	3	$4,210	$10,626	$6,416
Major joint replacement	209	18	12,997	10,607	(2,390)
Vein ligation/stripping	119	46	39,650	12,041	(27,609)

Total			384,687	166,763	(217,924)

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 299. Concurrent resolution providing for an adjournment of the House from April 4, 1990 to April 18, 1990, and a recess or adjournment of the Senate from April 5 or April 6, 1990.

THE BAILOUT OF THE SAVINGS AND LOAN INDUSTRY

The SPEAKER pro tempore (Mr. HARRIS). Under a previous order of the House, the gentleman from Rhode Island [Mr. MACHTLEY] is recognized for 5 minutes.

Mr. MACHTLEY. Mr. Speaker, on April 15, millions of taxpayers see red as they fill out their tax returns. This year, it is the red ink we do not see that should cause outrage.

Bailing out the savings and loan industry will cost the average taxpayer anywhere from $2,000 to $4,000 each.

Not all at once, true—but that is little consolation as the savings and loan industry continues to lose money at the rate of $3 million an hour, 24 hours a day. In fact, just during the 5 minutes for this speech, the taxpayers will spend $250,000 bailing out the savings and loans.

Last year, I voted against a $50 billion taxpayer bailout of the "thrift" industry. In remarks published in the CONGRESSIONAL RECORD, I argued that the legislation grossly underestimated the ultimate cost of cleaning up the thrift insolvencies and that the bill did not effectively guarantee aggressive enforcement of the civil and criminal penalties against those who created the mess.

Now that this bill has been law for almost a year, experts report that the $50 billion taxpayer bailout is sure to cost taxpayers more than $150 billion over the next 40 years. Moreover, Congress has discovered that more than 2,300 S&L fraud and embezzlement cases are stalled because the Justice Department doesn't have enough investigators and prosecutors.

It should be noted that in the Northeast there were virtually no thrift failures. It was primarily a phenomenon of the South and Southwest. Part of this is explained by our having a more stable real estate climate. However, a great deal of credit should go to northeastern savings and loans for displaying the integrity and prudence that has kept them healthy.

If the savings and loan executives in other regions of the country had been as ethical and responsible as those in the Northeast, this crisis would not have happened.

News reports during debate over the bailout last year told of unconscionable acts of greed by numerous executives. One individual, for example, "paid" himself with a hunting club membership and three beach houses where he and his wife ran up tabs of over $750,000 a year, a $6 million fleet of five planes and six pilots, and $5.5 million in art for the thrift offices.

Prosecuting guilty S&L executives who abused their power in siphoning off their customers' money is imperative. We must make clear that depositors' money backed by the Federal Government is not a private slush fund.

While the bailout law established a mechanism that is supposed to ensure that a problem like this never happens again, there are serious questions that remain about the effectiveness of this mechanism to both solve the immediate concerns and to prevent another catastrophe in the future.

We need to reexamine the structure of our Nation's Federal deposit insurance system, and the role of risk within that system. As we know, one of the major influences on the S&L failures was the lack of responsibility certain thrifts felt toward their depositors. The system was not set up to invite such a cavalier attitude. The Federal Savings and Loan Insurance Corporation was set up in 1934 with only a $5,000 insurance limit for thrifts.

Over the years, Congress made little changes in the growing system of deposit insurance other than to increase the insurance limits periodically. However, in 1980, the House Banking Committee chairman persuaded the conference committee on the banking bill to raise the limit from $40,000 to $100,000—a $60,000 increase in 1 year.

Because raising the insurance rate made it more practical to split million-dollar deposits into insurable chunks and distribute them to the thrifts that paid the highest interest, some observers think the insurance rate increase to $100,000 led to the collapse of the thrift industry. We need to determine whether the insurance guarantee should be as high as $100,000.

And what about so-called double-dipping? Should we continue to allow large investors to split their multiple deposits of $100,000 in a variety of thrifts and to federally insure all of these deposits—100 percent—backed with a taxpayer guarantee?

Congress needs to accept some responsibility for having allowed the S&L problem to grow and grow until it became an uncontrolled catastrophe in 1989. Congress may prefer to lay all blame on Federal regulators who were too loose in warning thrift against taking risks with depositors' money, but Congress was equally negligent in not warning regulators to do more. The truth is, some in Congress were too influenced by special interest lobbyists and their own personal financial interests to vigorously protect the public good.

If there is a single overriding lesson to be learned from this fiscal disaster, it seems to me to be this: to avoid future bailouts of this kind, we need to be vigilant year round, not just when headlines warn of disaster. By then, the damage has usually already been done.

INTRODUCTION OF NFIP LEGISLATION

The SPEAKER pro tempore (Mr. LEWIS of Georgia). Under a previous order of the House, the gentleman from Nebraska [Mr. BEREUTER] is recognized for 5 minutes.

Mr. BEREUTER. Mr. Speaker, today this Member introduced a major initiative, comprehensive legislation to create a program for the mitigation of flood and erosion damage through amendments to the National Flood Insurance Program. It is entitled National Flood Insurance Compliance, Mitigation, and Erosion Management Act of 1990.

Since 1978, approximately 50,000 or 2 percent of the structures insured under the NFIP have flooded two or more times and incurred over $1 billion in damages. In addition, approximately 20,000 insured structures have sustained flood damages exceeding half of their value. Erosion along the tidal waters of the United States and the shores of the Great Lakes has also damaged or destroyed numerous other buildings and will do so with increasing regularity in the future as a result of the passage of time, projected sea level rise, and increases in erosion rates.

Despite this high level of past damage, no Federal progam exists to relocate, elevate, or floodproof these flood-prone buildings in order to prevent future damages. The legislation being introduced would create a com-

prehensive Federal program to evaluate and provide technical assistance and funds for the mitigation of flood and erosion damages to these structures, thereby reducing the vulnerability of the Federal Government to flood losses. Under the plan, owners of certain flood-prone or erosion-prone structures could take out an additional line of insurance for the purpose of performing a cost-effective and technically feasible mitigation action in the event that another flood damages their homes or businesses. The purpose is to permanently solve or at least reduce flood problems and not to simply pay flood claims to allow repairs, only to have floods and damage occur again and again.

Mr. Speaker, I would like to assure my colleagues that this bill is designed to be revenue neutral and would require no new appropriations. It would be self-supporting. Likewise, it would not jeopardize the solvency of the National Flood Insurance Fund [NFIF], but reduce current threats to its solvency from catastrophic storms. The NFIF is critical to assure that moneys paid into it by policyholders are available in adequate amounts in the event of catastrophic flood damages, such as those caused by Hurricane Hugo.

Mr. Speaker, the general encouragement offered by the chairman of the Banking Subcommittee on Policy Research and Insurance, the distinguished gentleman from Alabama, [Mr. ERDREICH] to this Member to explore the problems addressed by this legislation is certainly appreciated. Finally, Mr. Speaker, this Member would add that the concepts of flood and erosion damage mitigation which undergird this legislation appear to have the backing of numerous environmental and planning groups, and organizations representing State governments; their reaction to this specific legislative effort is therefore, expecially welcomed and encouraged. I would urge my colleagues to examine the proposed Natural Flood Insurance Compliance, Mitigation, and Erosion Management Act of 1990 and join me in supporting it through cosponsorship.

□ 1630

APRIL FOOLS AMERICA

The SPEAKER pro tempore (Mr. LEWIS of Georgia). Under a previous order of the House, the gentleman from West Virginia [Mr. WISE] is recognized for 5 minutes.

Mr. WISE. Mr. Speaker, I rise today to ask that an end be put to the April Fool's joke that the administration is playing on the country.

Last week the Justice Department launched a major publicity blitz by announcing that $395 million would be spent to assist local law enforcement. As chairman of the Subcommittee on Government Information, Justice, and Agriculture which has conducted congressional oversight on the war on drugs I have some serious misgivings about the Attorney General's assertions.

I find it particularly ironic that the administration is patting itself on the back for awarding this money because—April Fools America—most of it would not have been available had Congress not provided $150 million more than the President requested for State and local law enforcement assistance.

Last year the subcommittee began an extensive investigation into the management of the same assistance programs that the Attorney General praises in his press releases. The preliminary findings of this investigation raise serious questions about Mr. Thornburgh's claim that "these grants will assist State and local criminal justice agencies in carrying out their part of the war on drugs by attacking the problem on Main Street."

For example, Thornburgh noted that the Justice Department would "grant $395 million for antidrug abuse work in 1990 to the 50 States, five territories, and the District of Columbia." April Fools America—what Mr. Thornburgh fails to note is that this funding also is to be used for programs relating to stolen property, white collar crime, antiterrorism, domestic violence and jail construction. Certainly the funding devoted to these issues is not wasted, but to imply that State, county, and local law enforcement units are directing it all toward fighting drugs is incorrect.

As for the notion that all of this money is finding its way to Main Street—April Fools America. The subcommittee has identified at least 34 think tanks, study institutes, and trade associations that are currently the recipients of Justice Department Anti-Drug Abuse Act funds. Millions of dollars in discretionary grants have been given to these groups to produce training information, crime data or reports that supposedly benefits local law enforcement. In an effort to find out about the effectiveness of some of these efforts my subcommittee polled over 1,600 State, county, and local law enforcement officials about their knowledge of this assistance. What we learned from this survey was startling.

A police chief from a small Utah community responded that "It seems a mystery as to what grants are available and how to apply." A rural Wisconsin official noted that in 18 years of law enforcement he had never heard of any assistance from the Federal Government and an Ohio police chief told us that just trying to find out about assistance is "very difficult." My home State of West Virginia has not received one grant from this program. Sadly, a report issued by the U.S. Conference of Mayors in January showed that less than half of the money granted from DOJ's discretionary program in 1989 actually reached a State, county, or local agency.

Are things improving in this program? April Fools America—the toll free telephone number the Department of Justice lists in the Federal Register for discretionary grant information cannot even provide you with an application. It doesn't much matter anyway; DOJ officials tell us 80 to 90 percent of the money is already earmarked anyway.

Despite this, Thornburgh notes that the "war on drugs must be fought at all levels, local, State, Federal, and international." On this note we all agree but, were the implications not so staggering, some of the administration's efforts would be nothing short of comical. Take for example a program the Justice Department created with drug funds to stem child pornography, prostitution, and drug abuse. This is a wonderful idea but—April Fools America—the Department decided that "McGruff the Crime Dog" will get 27 times more money this year than their program for antichild pornography, prostitution, and drug abuse. That's taking a real bite out of crime.

To stamp out workplace drug abuse the administration has started a random drug testing program of employees at the Department of Transportation—April Fools America. The testing procedure is so primitive that the results can be masked by substituting a certain clear soft drink for urine.

My subcommittee will conduct a series of hearings on these issues this spring. The first hearing will be on the administration of the discretionary grant programs, followed by another on block grants.

It is my profound hope that we can fulfill the promises the Attorney General makes to our State, county, and local law enforcement officials. However, I think it is important that we back up this rhetoric with a serious commitment to making the programs Congress and the administration have created work as they were intended.

Cartoon crime dogs, drug bugs, think tanks, and press releases won't win this war.

TRIBUTE TO THE LATE MILLARD EVELYN TYDINGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland [Mr. DYSON] is recognized for 5 minutes.

Mr. DYSON. Mr. Speaker, I rise today to pay tribute to a former colleague of this House and a predecessor of mine from the First Congressional District of Maryland, who would have

celebrated his 100th birthday on Friday, April 6.

I am speaking of Senator Millard Evelyn Tydings, who served in both Houses of Congress and was a decorated hero of World War I. He was a man who throughout his life set an elevated standard of excellence in every activity in which he joined.

Millard Tydings was born in Havre de Grace, MD, in 1890 and educated in Hartford County's public schools and universities. He earned a law degree from the University of Maryland and was elected to the State House of Delegates in 1916.

Delegate Tydings political career was interrupted by World War I. He enlisted in the Army in 1917 as a Private and fought in France where he rose rapidly through the ranks and played a crucial role in the Allied victory at Etrayes Ridge. Lacking the artillery support to cover advancing troops, Lieutenant Colonel Tydings improvised a plan to redeploy his machineguns in order to provide maximum protection during the assault. Millard Tydings' plan of battle at Etrayes Ridge has been taught at West Point ever since.

Returning to Maryland, Delegate Tydings resumed his seat in the State house in 1919, where he served as Speaker before moving to the State senate in 1922. Millard Tydings came to Washington in 1923 and served in the 68th and 69th Congresses as a Representative of Maryland's First Congressional District. In 1926, he was elected to the U.S. Senate. His service to Maryland and the Nation was greatly appreciated during his 24 years in the Senate.

As a legislator, Senator Tydings amassed many achievements. While in the State legislature, he passed the bill which created the University of Maryland as we know it today. In the U.S. Congress, he authored the Philippine Independence bill and fought on the Senate floor for a pay-as-you-go Social Security reform remarkably similar to recent proposals which we have seen.

To those who knew him, Millard Tydings' dedication and concern for his fellow human beings stood out in everything he did. In recognition of the valuable service which our former colleague gave in Congresses past and the enduring legacy of his accomplishments, I ask my colleagues present today to join me in paying homage to Senator Tydings. We were all enriched by his presence.

VETERANS DESERVE BETTER TREATMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York [Mrs. LOWEY] is recognized for 5 minutes.

Mrs. LOWEY of New York. Mr. Speaker, I rise today to bring to the attention of my colleagues an editorial from the Westchester Gannet newspapers which should be required reading for this Congress. The editorial, "Veterans Deserve Better Treatment * * *", "highlights the urgent need for improved health care services for those who, over the years, have served our country at great personal risk.

The editiorial says, "veterans who were promised care in the V.A. system should not be sent begging for charity treatment somewhere else. Nor should they be offered second rate care because the V.A. can't figure our how to deal with problems of staffing and services."

As we work on the budget and appropriations measures, I think it is absolutely critical that we address these urgent needs. I insert the editiorial in the RECORD in its entirety.

[From the Gannet Westchester Newspapers, Mar. 6 1990]

VETERANS DESERVE BETTER TREATMENT * * *

If you do not believe the nation incurred any special debt to those who served in the armed forces, whether in peace or in war, then the plight of the Veterans Affairs medical system may not be of particular note.

But it you believe, as we do, that the nation has an obligation to its veterans, then recent reports of understaffed hospitals and misplaced priorities are particularly disturbing.

A two-month investigation by the Gannet News Service found the Department of Veterans Affairs, for all the publicity attendant to its elevation to cabinet status, is being denied the money it needs to do its job and may lack the sense of direction needed to focus its limited resources to do the most good.

The V.A. is being stiffed in President Bush's next budget to the tune of $1 billion. And that is only the money needed to maintain the status quo in a hospital system sorely in need of improvement.

Although there is some disagreement over cause and response, Gannet Westchester Newspapers' reporters found that even the officials who run the V.A. hospitals in Montrose and in the Bronx admit they have been forced to curtail services because of problems recruiting staff and lack of adequate funding from Washington.

Both hospitals have in fact shrunk at a rate much faster than the gradual decline in the ranks of American veterans.

In five years, the Franklin Delano Roosevelt Veterans Affairs Hospital in Montrose went from 1,400 beds to fewer than 900. The Bronx Veterans Affairs Hospital once was able to care for 1,700 inpatients but now has only 775 beds in use. Still, with 13,000 unused beds systemwide, the V.A. keeps up a healthy construction budget, mainly to satisfy the Congressional taste for pork.

At the same time, the V.A. pays for a wide range of costly medical research, only some of it is focused on the medical problems shared by many veterans. The V.A. has mounted only a miniscule research effort into the effects of Agent Orange, and has done comparatively little to investigate post-traumatic stress disorder, two serious medical concerns of Vietnam vets.

Research programs seem to be designed not so much to meet the needs of veterans as to satisfy the medical colleges that maintain affiliation with V.A. hospitals.

The V.A. says those affiliations are vital to professional recruiting. What of the $1 billion or more the V.A. will need in additional funding during the next fiscal year. There simply is not enough money to do both, along with a lack of resolve within the V.A. to set the priorites appropriate to its principal obligation.

Although time and peace have thinned the ranks somewhat, one in 10 Americans has served in the armed forces.

Those 24 million veterans are getting older, since 1980, the number of vets 65 or older has doubled, to 6 million. Older vets are more likely to need medical care. Even so, the Montrose hospital, for example, will operate during 1990 with some $600,000 less than it was allotted in 1989.

Medical care is expensive. If the federal government does not live up to its obligation through the V.A., the aging veteran population will have a fiscal impact somewhere else in the medical care system.

But veterans who were promised care in the V.A. system should not be sent begging for charity treatment somewhere else. Nor should they be offered second-rate care because the V.A. can't figure out how to deal with problems of staffing and services.

When the Veterans Administration was elevated to cabinet status there was reason to believe it signaled a renewed commitment on the part of Congress and the president.

Clearly, and sadly, it has not turned out that way.

* * * INCLUDING MORE NURSING-HOME CARE

The aging of the veteran population not only increases the demand for medical servics, but it presents a demand for a different kind of care.

Despite the documented, and anticipated increase in the number of older vets, the V.A. system has been slow to respond to the need for nursing-home beds. While some 3 million veterans passed the 65-year age milestone during the 1980s, the V.A. added fewer than 4,000 nursing-home beds to its nationwide system.

Even now, V.A. administrators are touting proposals to build a nursing home in Montrose. That there is a need for the facility is undisputed.

But the V.A. is prepared to pay only 65 percent of the cost, giving the bill for the rest to the State.

Given the late start the V.A. has gotten in meeting the need for nursing homes across the nation, it is understandable that the agency would want States to help pay the high cost of catching up.

INFANT MORTALITY AWARENESS DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama [Mr. HARRIS] is recognized for 5 minutes.

Mr. HARRIS. Mr. Speaker, I rise today to introduce a House joint resolution to designate May 13, 1990, as Infant Mortality Awareness Day. It is my hope that this commemorative legislation will make more Americans aware of our Nation's deplorable infant mortality rate.

As a member of the Task Force on Infant Mortality in the House Sunbelt caucus, I am pleased to be the primary sponsor of legislation to help our babies. This legislation is an important part of the task force's goal to educate and inform the public about infant mortality. It is a special honor that the task force has

chosen me to lead the drive for this commemoration.

In Alabama, we have one of the highest infant mortality rates in our country. Individuals can and should make a difference. In Greene County, AL, the efforts of Dr. Sandral Hullett and the West Alabama Health Services have dramatically improved the lives of mothers and babies in this county. I applaud the efforts of others who are working to improve the lives of mothers and infants.

The statistics about infant mortality are indeed sobering. It is a tragedy that more than 38,000 infants will likely die this year before their birthday. Each death represents a personal tragedy for one family. In addition, the international ranking of the United States on infant mortality has declined from 6th in the 1950's to 22d in the 1980's. While other nations have improved their standing, the United States has fallen farther behind.

The solution to the problem is complex. Proper prenatal care has been found to be the single greatest contributor to the birth of a healthy baby, but one in three pregnant women do not receive early and comprehensive prenatal care in the United States. Prenatal care includes regular and consistent visits by pregnant women to their health care practitioners. This regular and consistent care may be one part of the problem. In rural Alabama, transportation can be a great barrier to access to care.

Another important factor is birthweight of babies when they are born. Low birthweight has been found to be a significant determinant of infant mortality and yet 7 percent of all babies born in this country are born below a healthy birthweight. To ensure proper birthweight both nutrition and prenatal counseling can help. However, in certain high-risk cases, other medical services are necessary to prevent low birthweight.

Finally, our Nation needs to ensure that healthy babies are a priority. For every dollar spent on prenatal care on high-risk mothers, there can be a savings of more than $3. In many cases the initial investment by the State and Federal Governments can be expensive. However, providing preventive care can yield savings from high-risk infants. The expansion last year of the Medicaid Program to cover pregnant women and their infants up to 135 percent of the Federal poverty level will certainly help to ensure more care for our neediest citizens.

I hope this educational effort will make this year's Mother's Day a special day for our Nation's infants. The birth of healthy babies to healthy mothers should be the goal of all Americans.

HELPING THE HOMELESS IN PITTSBURGH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. COYNE] is recognized for 5 minutes.

Mr. COYNE. Mr. Speaker, the problem of homelessness has mushroomed in our country over the last several years. No one knows just how many women, men, and children in the United States have no home. But we do know that the problem has grown enormously; and we know that while our Nation's wealth is vast, the Federal Government's commitment to ensuring low-income housing has been entirely inadequate.

The problem is daunting. But fortunately, a number of communities around the country have made a serious commitment to providing housing for those who lack it. I am proud to say that Pittsburgh, the city I represent in Congress, is making an extraordinary—and, in some respects, a very successful—effort to help the homeless, and we have learned some lessons along the way that could prove useful for other large cities.

Last Saturday, the Washington Post printed an excellent article on how Pittsburghers are fighting homelessness. I commend it to my colleagues, and I ask that it be reprinted in the RECORD.

PITTSBURGH FINDS DIVERSITY WORKS IN FIGHT ON HOMELESSNESS

(By Gwen Ifill)

PITTSBURGH.—When the local advisory committee on homelessness meets in the cafeteria of St. Joseph's House of Hospitality every three months, no single conference table can accommodate everyone. Political leaders are likely to be there, but so are representatives from the Allegheny County health department, the Urban League and the University of Pittsburgh as well as local leaders of four different religious denominations.

This kind of broad-based response to homelessness has helped this city of 387,000 dodge the bullet that is crippling cities like New York, Chicago and Washington.

An indication of the city's success is that it is rare to see someone sleeping on downtown streets. And, at a time when many cities are scrambling to find enough shelter space, shelters in Pittsburgh are being closed.

"We have to believe that we have at least stanched the tide, not stopped it," said Kenneth Winograd, a member of the advisory commission who has worked on the city's homeless problem since 1983. "We are very certain [that] if we weren't here we'd look like other cities where you can't walk on the streets without tripping over people."

Under the loose leadership of the advisory committee, federal, state and corporate funds have been funneled to dozens of autonomous public and private organizations. These groups provide support services such as food banks and soup kitchens as well as a network of "bridge" programs that provide counseling, job training and housing to encourage "clients" to build independent lives.

Like similar efforts in Portland Ore., and Sacramento, Calif., Pittsburgh's experience shows the effectiveness of a decentralized approach based on a community-wide consensus that homelessness is not unsolvable.

While many local governments struggle to implement court orders and engage in ongoing battles over government funding, Pittsburgh activists and government officials are unabashedly lofty about their ability to battle homelessness.

"One of our goals is to eventually eliminate the shelters," said Robert Nelkin, an Allegheny County official who serves on the advisory committee. "We really would like to get out of the shelter business," he said.

In fact, the number of shelters in the city and its environs has shrunk from 25 to 15—none with more than 45 beds.

In 1987, the city rejected a plan to turn an old downtown YMCA building into a posh hotel in favor of giving a nonprofit developer the opportunity to create Wood Street Commons, a 259-unit, single-room occupancy apartment building that has 35 shelter beds.

"From the very beginning we determined we would not view shelter as the solution to the problem," said Winograd, a human services consultant who conducted the city's first needs assessment of the homeless problem in 1983.

In many respects, Pittsburgh differs substantially from other urban areas that have sought to cope with rising homelessness and a declining industrial base. The rivers, bridges and tunnels that carve the city into geographically separate neighborhoods also have served to break the homeless problem down into manageable chunks.

Perched at the confluence of the Ohio, Allegheny and Monongahela rivers, Pittsburgh has not attracted transients the way many other eastern cities have.

"New York is a magnet for homelessness; in Pittsburgh you almost know the homeless population," said Bryce Maretzki, a research and development associate at Action Housing Inc., a nonprofit agency. "It is not as overwhelming as it is in other cities. It is a personal problem that the community deals with in a neighborhood grass-roots way."

One such neighborhood-based effort is a housing facility for single men run by the East End Community Ministries, a coalition of 43 churches. There, the Rev. Dana Gold has posted a sign over the entryway that reads: "This is a House of Heroes."

Gold, a Presbyterian minister who was ordained to serve the homeless, has run the transitional shelter for more than three years. When she began, half of the house's 15 residents had substance abuse problems; now 90 percent do. All have a history of institutionalization or long-term homelessness.

Now they are expected to participate in job training, career development and outreach programs, meet with Gold for counseling once a month and help maintain the three-story apartment building that has been turned into apartments and common living areas for the residents.

One small room on the ground floor is equipped for job hunting: it contains a desk, a telephone with an answering machine, and a Bible.

The churches, Gold said, have banded together to make their outreach efforts more effective.

"They're urban churches in a poor area," she said. "It's their way to minister to the community in a concrete way."

East End Community Ministries feeds 800 families a month and operates shelters, drop-in centers and counseling services.

In the nearby town of Braddock, Debra House opened last year in a former convent to provide counseling, furnished rooms and job-training opportunities for single women and their children. Newly carpeted, equipped with kitchens and painted in pastels, it now offers lodging to 12 women and their families.

Cynthia Parrotte, 31, moved into Debra House last May with her two small daughters and pays $78 a month for her modest room while she takes accounting and business management courses at the Community College of Allegheny County.

"I'm ready to go on," she said. "They got me started. I hope to be out of here by June."

Organizers point to clients like Parrotte, who came to Debra House from a Salvation Army shelter, as an example of how homeless people can be helped back to self-sufficiency.

Allegheny County's multi-pronged effort has no headquarters and no single funding source. Participants say this is its salvation.

"Everybody needs a little more money," said Winograd. "But there is not one governmental breast to which they go to get nurtured. They have to do it in a number of ways."

Federal money is the scarcest commodity. Homeless assistance money parceled out through the McKinney Act, these providers say, is too hard to get and never goes far enough.

"Individuals and churches are the mainstay," said Nelkin. "Government is the Johnny-come-lately."

But government is still an important part of the mix. When the Federal Emergency Management Agency slashed the region's funding because its unemployment rate had dropped to 3.5 percent, the Pittsburgh-Allegheny County Private Industry Council conducted its own study to prove that the rate was actually 2 percent higher.

Moreover, the council said, the region was still suffering from the lingering effects of the economic dislocation that occurred during the last decade's downturns.

Jonathan Zimmer, the executive director of Action Housing Inc., credits Pittsburgh's success in addressing its homelessness problem to the diffuse nature of the response.

"We didn't figure there was the brain power in any one place to solve the problem," Zimmer said.

In 1985, Pittsburgh was rated as the nation's most livable city, a tourist-attracting designation that delighted community leaders. Zimmer said the region's response to homelessness also has made it a better place to live.

"Pittsburgh has gone through terribly difficult times, constantly striving to become a great city," he said. "The homeless problem has the potential to make the community more human."

THE EMPLOYMENT TAX STATUS OF CERTAIN FISHERMEN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts [Mr. DONNELLY] is recognized for 5 minutes.

Mr. DONNELLY. Mr. Speaker, I am introducing legislation today, along with my colleague, Congressman STUDDS of Massachusetts, to overturn a policy of the Internal Revenue Service with respect to self-employed fishermen. Recently, the Internal Revenue Service has been aggressively pursuing fishing boatowners in New Bedford, MA for alleged back taxes owed. In our view, the IRS policy is incorrect and unfair; furthermore, it amounts to the Service changing the rules in the middle of the game.

Mr. Speaker, the tax status of fishermen on small vessels has been specifically addressed by the Congress in the past. In general, individuals who work on small boats are generally not subject to employment tax withholding on their income. Rules achieving this result were added to the Internal Revenue Code in 1976. Since then, fishermen in this category have complied with the law and have paid their taxes. They thought—and rightly so—that we in Congress had clarified the rules.

They were right—until now. After more than a decade of relatively trouble-free experience with the law, the IRS has, without warning, changed the rules. They are retroactively applying a new standard by which the fishermen are expected to comply. The IRS is challenging the relationship which the fishermen have with the boatowners—a relationship which dates back to the whaling days of New England in the 1600's. We believe that this is unfair—and is made even more outrageous by the fact that almost certainly, the fishermen at issue have fully complied with the law. Yet the IRS refuses to confirm or deny whether the fishermen have so complied. They are perfectly willing to allow the boatowners to go to court and possibly force them to lose their livelihood over a law that is, at worst, unclear.

Mr. Speaker, as a member of the Committee on Ways and Means, I proposed an amendment to clarify this issue last year as part of the budget reconciliation legislation for fiscal year 1990. Unfortunately, due to rules set forth by Chairman ROSTENKOWSKI, I was not able to offer my amendment because my proposal had not been the subject of a hearing. Before withdrawing my amendment, however, I received assurances from the Assistant Secretary of the Treasury for Tax Policy that the IRS would not act precipitously to go after fishing boat owners until the Congress had had an opportunity to consider my amendment. Congress has not yet had a chance to do so, and I am therefore taking the first step today by introducing this legislation.

At a hearing last year on my proposal, the Treasury Department testified in support of it as a method of clarifying the law. Now that the hearing process has been completed, the committee will be free to take up my amendment as soon as it meets to consider tax legislation this year. I expect that that process will occur early this summer, and I would strongly advise that the Internal Revenue Service not violate the commitment made to the Committee on Ways and Means last year by moving forward on this issue until Congress has had an opportunity to consider my legislation.

Let me say in closing, Mr. Speaker, that I am always reluctant to propose retroactive changes to the income tax laws as I am in this case. However, here, retroactivity is completely justified. The Internal Revenue Service changed their interpretation of the law in midstream, with no warning, and expected the fishing boat owners in New Bedford to play along. If the IRS is going to retroactively change their interpretation of the law, then so can—and so must—Congress.

Mr. Speaker, I submit a technical description of my legislation for the RECORD.

DESCRIPTION OF LEGISLATION

PRESENT LAW

Under present law, service as a crew member on a fishing vessel is generally excluded from the definition of employment for purposes of determining wages subject to employment taxes if (1) the individual receives no other compensation other than a share of the boat's catch, and (2) the operating crew of the boat is normally made up of fewer than 10 individuals.

EXPLANATION OF PROVISION

Under the proposal, service as a crew member on a fishing vessel is treated as meeting the exclusion from the definition of employment even if, in addition to a share of the boat's catch, the individual receives an additional amount of compensation (such as the additional amount described in Situation 1 of Rev. Rul. 77-102,[1] or any similar payment designed to have substantially the same effect). This rule applies only if (1) the additional amount does not exceed $50 per trip, (2) payment of the amount is contingent on the attainment of some minimum level of catch, and (3) the amount is paid solely in recognition of the individual's performance of additional duties, such as those of mate, engineer, or cook, for which it is traditional in the industry to receive such additional compensation.

The proposal would modify the present-law regarding the maximum crew size by providing that, in general, the operating crew of the boat normally must consist of 10 or fewer individuals. This requirement is only satisfied with respect to a quarter if during the immediately preceding four quarters the boat's operating crew consisted of 10 or fewer individuals on at least 50 percent of the trips made during that period.

EFFECTIVE DATE

The proposal would generally be effective for taxable years beginning after December 31, 1990.

The provision relating to additional compensation, however, would be effective for taxable years beginning after December 31, 1984, unless the payor treated such remuneration as being subject to employment taxes when paid.

The change from "fewer than 10" to "10 or fewer" is a change in statutory language. No inference is intended with respect to the correct interpretation of present law. For example, no inference is intended with respect to the permissible method under present law of determining whether the requirement that the crew normally be made up of fewer than 10 individuals is satisfied.

[1] 1977-1 C.B. 299.

PENSACOLA WALL SOUTH PROJECT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. HUTTO] is recognized for 5 minutes.

Mr. HUTTO. Mr. Speaker, over 58,000 United States troops were killed or listed as missing in action as a result of the Vietnam war. Unfortunately, the horrors of that war have had a drastic impact upon many of the brave and courageous members of our Armed Forces who served there and the families and friends who lost loved ones. Clearly, vivid memories of the Vietnam war still linger today for many Americans.

The Vietnam Veterans Memorial is one of the most visited of all memorials in Washington as thousands of people each year view the black granite wall which lists those who gave the ultimate sacrifice in defense of freedom and democracy. Just as important, it serves as a source of healing

for those who still suffer the mental and physical wounds associated with that war.

On December 7, 1987, a portable replica of the memorial came for 1 week to Pensacola, the largest city in Florida's First Congressional District. The wall evoked immense emotion, and it sparked interest in placing a permanent memorial somewhere in the area.

Since that day over 2 years ago, plans have been made to construct a half-size replica of the Vietnam Veterans Memorial in Pensacola's Admiral Mason Park. The idea of a Wall South has received widespread support. It has been endorsed by State and local veterans organizations and numerous civic groups, and military commissary stores in the Southeast region have given their support by pledging to donate a certain percentage of the sale of various items. Mr. Nelson Wellborn and Mr. Lenny Collins lead the Wall South effort in Pensacola, and they, along with the many others who are involved, should be commended for their dedication and many hours of hard work toward this honorable endeavor.

The Pensacola City Council has OK'd the Wall South proposal with the stipulation that it must show public support of at least $400,000 by July 4 of this year. It is estimated that the entire project, including in-kind contributions, will cost approximately $1 million.

If completed, this project would provide thousands of people the opportunity to experience the sensation of the Vietnam Veterans Memorial without having to incur the time or expense of traveling to Washington, DC. Mr. Speaker, I fully endorse the Wall South project. It is truly a worthwhile endeavor which I sincerely hope will receive the support which it needs to be completed.

□ 1640

IN TRIBUTE TO C.R. SMITH, SECRETARY OF COMMERCE IN THE LYNDON JOHNSON ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. PICKLE] is recognized for 5 minutes.

Mr. PICKLE. Mr. Speaker, it is my sad duty to inform this House that the United States has lost one of the true giants of this century—one of the pioneers of commercial aviation, an outstanding member of the Lyndon Johnson Cabinet, and a world-renown art collector and philanthropist—C.R. Smith of Texas.

C.R. Smith passed away earlier today after a long battle with poor health. He would have been 91 years old this September.

C.R. Smith played one of the central roles in the development of commercial and military aviation in the United States. He was the individual primarily responsible for building American Airlines from a small, unprofitable operation into a leader in world air transportation. During World War II, he was appointed to help establish the Air Transport Command [ATC], which provided air transportation for the Army in all military theaters. By the end of the war, ATC had grown to be one of the largest military commands, with more than 200,000 personnel. C.R. Smith served as a major general and deputy commander of the ATC, and earned the Distinguished Service Medal, the Legion of Merit, and the Air Medal. He was also named a Commander of the Order of the British Empire for his work with British military forces.

In 1934, he became the president of American Airlines, and except for his military service he served as chief executive until 1968, when his lifelong friend President Lyndon Johnson appointed him to be Secreatry of Commerce. He served as Secretary during the last year of the President's administration. And he later returned as interim chairman of American Airlines in 1973, before finally retiring in 1974.

Born in the town of Minerva, TX, C.R. Smith majored in business administration at the University of Texas and was later honored by the university as a distinguished alumnus. His legacy to the university includes a truly invaluable collection of western art he began to accumulate in the 1930's which includes some of the most outstanding works of Charles Russell and Frederick Remington, which he donated to the university.

Mr. Speaker, while we mourn the loss of this remarkable, unbelievably warm and kind man, we remember his monumental contributions to the United States and the State of Texas. He was one of a kind, a true giant of his times, and we are all richer for having him touch our lives.

ASK PRESIDENT TO RESOLVE LITHUANIAN CRISIS BEFORE U.N.

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Maryland [Mrs. BENTLEY] is recognized for 60 minutes.

Mrs. BENTLEY. Mr. Speaker, 25 days ago, the democratically elected Government of the Republic of Lithuania declared independence from the Soviet Union. The response from Moscow has been demands for billions in economic reparations, inflammatory rhetoric, and armored personnel carriers.

Unfortunately, the response from the administration has been lukewarm—despite continued pleas for recognition from Vilnius. Mr. Speaker, for the past 50 years, we steadfastly have refused to recognize that the Soviet occupation of Lithuania conveyed Soviet sovereignty, and therefore have maintained separate diplomatic relations with that nation of 3.7 million people through the presence of a Legation here in Washington, DC. The Legation's Charge d'Affaires currently conducts the diplomatic business of Lithuania although he does not have the full diplomatic presence, nor the status of an Ambassador.

Earlier in the day, this body voted overwhelmingly in favor of a resolution asking the President to recognize the Landsbergis government. It is my hope that the President will recognize the changed circumstances in Lithuania by elevating the Legation to full Embassy status.

This elevation surely would be a boost to the Lithuanian people and clearly would complement the Lithuanian Parliament's recent decision to grant Ambassador-at-Large status to the current Charge d'Affaires—Stasys Lozoraitis. Shouldn't we, as the leader of the free world, be the first to allow him to use his new title? I certainly hope so.

Yesterday, during a press conference at the Lithuanian Legation, the Charge d'Affaires was asked about the United States response to the plight of his country. Roughly stated, his reply was that politicians and diplomats can't ever expect to get 100 percent of what they seek. Well, Mr. Speaker, I'm not so sure that we are giving even 25 percent on this one. It is for this reason that I rise today to introduce a resolution that seeks to move the administration to take positive action on behalf of the people and democratic Government of Lithuania.

Mr. Speaker, the sense of the House resolution that I am introducing today, encourages the President to bring the case of Lithuania before the United Nations Security Council and/or other relevant international councils. To date, there has never been a peace treaty resolving the territorial and legal questions surrounding the illegal occupation of Lithuania.

Over the past few weeks, the Soviets clearly have ratcheted up their campaign of intimidation, first by calling for all guns to be turned in and then by occupying government buildings and seizing so-called deserters. As I see it, we have all the ingredients for another Prague Spring.

Mr. Speaker, today, many of my constituents of Lithuania heritage joined those from elsewhere in the United States in a peaceful demonstration here in Washington. Their plea is for the President to back the Landsbergis government and the Lithuanian people who have dared to declare freedom from the U.S.S.R. yoke.

Mr. Speaker, I believe that it is time to ask the President to bring the

matter of Soviet aggression up before the United Nations Security Council—or any other international councils he should choose—in order to persuade the Soviets to cease their occupation of Lithuania.

Mr. Speaker, that is exactly what my resolution calls for. It is to express the sense of the House of Representatives that the President should bring the matter of the Soviet occupation of the Republic of Lithuania before the United Nations and other international organizations.

I am joined as original cosponsors on this by the gentlewoman from Hawaii [Mrs. SAIKI], the gentleman from North Carolina [Mr. COBLE], the gentleman from Texas [Mr. LAUGHLIN], the gentleman from New Mexico [Mr. SKEEN], the gentleman from Maryland [Mr. MFUME], and the gentleman from Alabama [Mr. HARRIS].

□ 1650

INTRODUCTION OF LEGISLATION TO PROVIDE APPROPRIATE MEDICAL PEER REVIEW FOR PHYSICIANS AND HOSPITALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. LAUGHLIN] is recognized for 5 minutes.

Mr. LAUGHLIN. Mr. Speaker, I have come to the floor several times to talk about my concern about the health care problems facing our Nation. I have come once again to discuss a problem in this area, but this problem was brought about, probably unintentionally, by legislation enacted by the Congress.

In 1986, Congress enacted the Consolidated Omnibus Budget Reconciliation Act of 1985, otherwise known as COBRA. Section 1867 of this act was amended to provide for Federal regulatory requirements for the transfer of patients with emergency medical conditions and for women in active labor.

The intent of the COBRA amendments were laudatory, namely to prevent inappropriate hospital transfers for economic reasons or "hospital dumping." Unfortunately, under COBRA, the determinations of what is an appropriate transfer for medical reasons is left up to the determination of the inspector general of the Department of Health and Human Services. The fines for a violation of the COBRA amendments is up to $50,000.

The weight of these fines is intended to deter inappropriate transfers from being ordered, but perhaps what is less obvious is that these fines may deter appropriate transfers.

I want to emphasize that I do not condone hospital dumping. Any physician or hospital that engages in this practice should be prosecuted to the fullest extent of the law and assessed the heaviest fine possible.

In the test case of this statute, which occurred in my district, the Office of Inspector General fined the physician $25,000—payable immediately. The Office of Inspector General did not interview the physician prior to assessing the fine to get the physician's side of the story. The Office of Inspector General did not even want to hear the physician's story.

Mr. Speaker, this is not a fair or reasonable process. Physicians and hospitals should not face these heavy fines and costs of defending these charges without the benefit of appropriate peer review for medical necessity. This is particularly critical for physicians in our rural areas where patient transfers of emergency cases have to be made over great distances in order to save lives.

In these cases, peer review for medical necessity is preferable to an inspector general investigatory process in which the target is not even interviewed.

Mr. Speaker, I want to emphasize that the issue here is access to necessary medical peer review. Unless appropriate medical review of these cases is required, appropriate patient transfers will be jeopardized. Plainly put, this will endanger lives. This is not a situation that we can tolerate in a rural health care system that is already suffering from closures and a declining supply of practicing physicians.

This is why, I, along with several of my colleagues, am introducing a bill to provide appropriate medical peer review for our Nation's physicians and hospitals. The bill I am introducing today stipulates that the Medicare peer review organizations [PRO's] be required to review for medical necessity all alleged dumping violations. Under my legislation, this PRO review would be binding, meaning the OIG could not levy fines in those transfers found to be medically appropriate by PRO.

Mr. Speaker, this legislation in no way lessens the fines or penalties for a violation of the COBRA statute. It merely provides for a formal and binding review of these alleged violations by PRO's. Given the complexity of medicine as it is practiced today, we should provide no less when it comes to second-guessing physicians' judgments about providing medical care and delivering babies.

As a former prosecuting attorney, I know how important due process protections are in the legal system. In our system of justice, we give murderers, robbers, dope dealers, and rapists a hearing before we assess punishment against them. Mr. Speaker, even Manueal Noriega is afforded these kinds of protections. Under the legal systems we proceed cautiously because people's reputations, freedom, and even lives are at stake in the process. The same kind of caution should be applied when we question the judgments of physicians and hospitals providing emergency medical care.

This is especially true if we expect physicians and hospitals to continue to practice medicine in remote parts of this country. Yet, under the COBRA amendments, physicians in this country aren't even afforded the opportunity for medical review by a group of their peers on alleged dumping violations.

This bill asks only that we give our doctors a hearing before we assess punishment.

Mr. Speaker, I am proud to be joined in this important piece of legislation by the following cosponsors:

ORIGINAL COSPONSORS

Congressman Alexander of Arkansas,
Congressman Archer of Texas,
Congressman Barton of Texas,
Congressman Bryant of Texas,
Congressman Bustamante of Texas,
Congressman Chapman of Texas,
Congressman Clement of Tennessee,
Congressman Costello of Illinois,
Congressman Coleman of Texas,
Congressman DeLay of Texas,
Congressman Fields of Texas,
Congressman Frost of Texas,
Congressman Geren of Texas,
Congressman Hall of Texas,
Congressman Ortiz of Texas,
Congressman Parker of Mississippi,
Congressman Sarpalius of Texas,
Congressman Stenholm of Texas,
Congressman Tanner of Tennessee, and
Congressman Wilson of Texas.

THE IMPORTANCE OF THE B-2 TO AMERICAN NATIONAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri [Mr. SKELTON] is recognized for 60 minutes.

Mr. SKELTON. Mr. Speaker, one of the most crucial debates of this year concerns the future of the B-2 bomber. The outcome of the debate will determine whether or not the United States remains the finest Air Force in the world. It will determine whether or not the U.S. Air Force will remain in the bomber business.

In an era of serious arms control negotiation, we want to reduce forces in such a fashion that those that remain are not vulnerable to the nuclear forces of the other side.

Bombers contribute to strategic stability for various reasons. First, they take hours to reach the target. Second, they can only be used in a retaliatory capacity because of their slow speed. Third, that slow speed, when compared to missiles, gives time for policy decisions to be carefully considered. Preliminary questions can be reassessed, either confirmed or reversed.

During a crisis, time is usually a decisionmaker's most precious commodity.

Mr. Speaker, we are in a transition period at this stage of the nuclear era. Thirty years ago the inaccurate single-warhead ICBM posed a far lesser threat to the forces of the other side than today's accurate multiwarheaded ICBM's found in the arsenals of both sides, the Soviet Union and the United States.

Unfortunately, these technological improvements proved to be politically destabilizing. Now, we want to go back to a more stable situation that prevailed 30 years ago. We want to make this transition with the Soviet Union through the arms reduction talks taking place in Geneva.

Let me stress that the purpose of deterrence has always been to prevent war, not to fight one. Fostering deterrence is more an art than an exact science. It is an extremely complicated task, and I would be kidding you if I told you I understood all of the details involved with that link, our nuclear strategy with our force posture with our arms control positions in Geneva, but I do know that strategy and force posture and arms control efforts must be coordinated in a way that reduces nuclear forces in a stable manner.

The improved political relationship that now exists between the United States and the Soviet Union should open the way for a much lower nuclear balance between the two countries: cheaper, less threatening, and more conducive to the aims of nonproliferation.

This transition period into which we have entered is also one marked by lower defense expenditures. In the United States the defense budget has undergone 5 years of real cuts—where increases in defense spending have not matched increased costs due to inflation. The budget deficits of the past decade led to the enactment of the Gramm-Rudman Deficit Reduction Act in the mid-1980's and defense spending was not exempted.

The collapse of the Berlin Wall last fall added a second reason for cutting the defense budget. Events in Eastern Europen and in the Soviet Union convinced many in this country that the threat posed by the Soviet Union had diminished. The talk in Washington became one of trying to figure out how to spend the peace dividend.

While developments that have taken place in the Soviet Union are for the most part positive for American interests, no one can be certain where they will ultimately lead. It is a period of uncertainty in the world. The warnings of some of us that defense cuts can be made but should be done so on a gradual basis, over a period of 5 years are not very popular in some quarters of the Congress or in some areas of the country.

The French thinker Alexis de Tocqueville observed that "the most dangerous time for a bad government is when it starts to reform itself." This is precisely the situation in which the Soviet Union finds itself today. Reform efforts during the regimes of both Louis XVI and Nicholas II ended in revolutions whose consequences in blood and treasure reached far beyond the borders of France and Russia. The historian Paul Kennedy has written, "Those who rejoice at the present day difficulties of the Soviet Union and who look forward to the collapse of that empire might wish to recall that such transformations normally occur at very great cost, and not always in a predictable fashion." Our capacity to lead during this period of instability will be vastly reduced if we rush to cut our defense budget, reduce forces overseas unilaterally, and withdraw from our commitment.

So how do the elements of nuclear strategy, budget cuts, and uncertainty in the world that I have described affect the B-2 debate now taking place in Congress? Each in its own way affects the debate profoundly. First, let me acknowledge that I believe there are legitimate arguments on both sides of the B-2 debate. While I strongly support continuing the B-2 program, opponents can make a strong case for their position by citing the high cost of the program and the diminished threat posed by the Soviet Union. These to me are the two best arguments for the other side.

A third argument that opponents sometimes use is to say that the bomber is not invisible to radar. Correspondent Mike Wallace highlighted this argument in his story about the B-2 on the February 18, 1990, edition of "60 Minutes." The point was made that the Australian Jindalle radar can track the B-2 at ranges of 1,500 miles.

This is a very weak argument and the opponents lose credibility by making it. The Air Force has used a talanted cadre of PHd's—scientists, engineers, and analysts—from government, industry, and academia to examine potential air defenses to counter stealthy aircraft. They have not yet been able to turn up any conventional or unconventional air defense scheme to detect the B-2 in a militarily useful way. Let me quote a recently issued Department of the Air Force document entitled "B-2 Survivabilty Against Air Defense Systems."

* * * During test activities, air defense sensor components will occasionally detect stealthy air vehicles * * *. What can convincingly be argued and supported by tests is that the B-2 cannot be consistently detected, tracked, or engaged at militarily useful ranges in typical operational scenarios.

More to the point, we already have many years of experience with stealth by way of the F-117 Stealth fighter. In hundreds of flight tests run against a variety of air defenses, it has proved the concept of stealth technology fundamentally sound. The B-2 is, and will remain, a highly survivable and lethal weapon.

However, let me address the two legitimate arguments of high cost and the diminished threat used by opponents of the B-2.

I want to address the issue of the B-2's cost directly and put it into some perspective. First, while expensive, the B-2 is affordable. As a percentage of the Department of Defense procurement budget the cost of the 9-year procurement program is estimated at 1.3 percent. The 4-year B-1B program percentage was 1.6 percent; the comparable figure for the 9-year B-52 program was 1.4 percent. Second, much of the investment cost in new tools and manufacturing techniques required by the use of composite materials will yield a continuing flow of benefits for years to come. This is a significant addition to the Nation's industrial base since all future fixed-wing combat aircraft will use stealth technology. In fact, the technology is already being used in the Air Force's advanced tactical fighter and the Navy's A-12 attack bomber. Third, if the B-2 is around as long as the B-52 it will prove to have been an economical investment. The venerable stratofortress will still be part of the Strategic Air Command at the turn of the century. It will have outlasted two generations of ICBM's. Three generations of SLBM's, and a fleet of ballistic missile submarines. With the special hangars designed to protect the B-2 from the elements, it should be around as long as the B-52.

What leads me to conclude that the B-2 would be a good investment for the security of the United States? A very good case can be made for reasons of technology, arms control, and force structure. The technological argument is that most profound one. Much the way the advent of the submarine in the early part of this century fundamentally transformed naval warfare, the advent of the Stealth bomber will transform air combat. Ships visible on the waters' surface became invisible under the water as submarines. Just a handful of German submarines in the early years of the Second World War almost won the fight against Britain. It wasn't until 1943 that the battle of the Atlantic was finally won. Vast resources had to be devoted to that fight—in men, money, ships, aircraft, and new tactics—to defend the convoys that were the lifeline for Britains survival.

In the late 20th century, we have entered the era of visible and invisible aircraft, those that can be tracked by radar and those that cannot. Partial exploitation of stealth technology was found in the SR-71 Blackbird surveil-

lance aircraft and the B-1B bomber. Further development of the technology occurred with the F-117 Stealth fighter and the advanced cruise missile. The B-2, designed with stealth technology in mind, represents the most advanced use of the technology—in design, materials, and avionics. In its primary strategic role, the B-2 renders obsolete approximately $350 billion of Soviet investment in air defenses which includes 10,000 radars, some 3,000 interceptor aircraft, and over 8,000 SAM launchers. The combination of a manned penetrating bomber, the B-2, and air-launched cruise missiles, on B-52 and B-1B bombers, will prevent the Soviet Union from concentrating all its air defense efforts on a single threat. Stealth technology incorporated in the B-2 will force the Soviet defense establishment to devote more of its military resources to air defense, a much more benign activity from the United States point of view. It is far better to have them spend on defense than offense.

Arms control provides a second argument for the production of the B-2.

□ 1710

The current arms control regime between the United States and the Soviet Union favors bombers. Under the START counting rules, the non-cruise-missile bomber counts as only one weapon, regardless of its bomber load. Bombers are viewed as stable because their relatively slow speed precludes their use as first-strike weapons. They do not threaten the rapid escalation associated with ballistic missiles and can be canceled or recalled.

Maintaining a substantial force of strategic bombers is the third reason for proceeding with the B-2; 132 B-2's will contribute to the maintenance of such a force, along with B-1's, B-52's, and FB-111's currently in the force. In the early 1960's the United States possessed a bomber force that consisted of more than 1,600 aircraft—1,200 B-47's and 400 B-52's. We actually produced about 2,000 B-47's and 700 B-52's in the 1950's and 1960's. By 1990 we will have a strategic bomber force of less than 350 aircraft. Should opponents of the B-2 succeed in canceling the program, that force would fall to less than 200 bombers. Half that force would be 40 years old by the year 2000.

One alternative might be to reopen the B-1B production line. Yet the B-1B will find it increasingly difficult to penetrate improved Soviet air defenses over the next decade. The strategic triad of bombers, intercontinental ballistic missiles, and submarine-launched ballistic missiles has supported our national strategy of deterrence and maintained the peace for over 30 years. Without the B-2, the United States would be unable to maintain the effectiveness of the bomber leg of the triad against improving Soviet air defense.

Mr. Speaker, another argument can be made in favor of the B-2. In both Korea and Vietnam, strategic bombers were used in combat. Conventional strategic bombardment requirements are likely to grow in the future, especially in the Third World as the number of foreign bases decline. From bases in Guam, the United States, and Diego Garcia, the B-2 can reach any target in the world with one aerial refueling. In the Libyan raid, for example, 35 support aircraft and 84 combat aircraft participated in that action. Over 130 crew members were put at risk. A very much smaller force of B-2 aircraft and KC-10 tankers, two bombers and three tankers, could have performed that mission delivering the same payload. Would the Air Force really risk the B-2 in such a mission? I think so. A drastically reduced number of people and aircraft would be put at risk in such a contingency. Even more important, the invisibility provided by Stealth technology would vastly improve the chances for the return of men and aircraft from such a raid.

Mr. Speaker, we are producing a penetrating bomber that will be hard to shoot down by any potential foe. And yet we are faced with the irony that it is Members of Congress who are trying to shoot it down. Before these critics try to shoot down the B-2 by focusing on its cost, I hope that this description of its merits will provide some needed perspective to a program I believe is vital to the future security of our country.

This vote this year on the B-2 will be a crucial one—we have had many such votes in the Congress over the past 200 years. Back in 1939 the House of Representatives voted against a $5 million appropriation to bolster the fortifications on the island of Guam. The empire of Japan at that time, saw that vote as a signal that the United States would not defend its interests in the Pacific. It was the wrong signal to send. Later this year we will have the opportunity to send a signal about whether or not this country is serious about maintaining the U.S. Air Force in the bomber business. I hope we send the right signal, not one we will regret at some future time.

PUT AN END TO THE GOVERNMENT SUBSIDIZATION OF RUNAWAY INDUSTRIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 60 minutes.

[Mr. PANETTA. Mr. Speaker, I rise today to introduce legislation that will bring an end to the current practice of government purchases of agricultural goods produced through illegal and abusive labor practices.

As many of my colleagues know, there has been a mass exodus in recent years by the American agricultural produce industry to foreign nations, particularly developing countries. The attractiveness of these countries for agricultural processing is very simple. They can employ workers willing to work under some of the worst conditions in the world for extremely low wages. This same produce, grown in the United States and processed in these countries, is being sold to the U.S. Government and paid for by taxpayer dollars.

I do not believe that the U.S. Government should be supporting exploitative labor practices by indirectly subsidizing this practice. There is no reason why we should be paying for agricultural products, produced in foreign countries, by firms paying less than subsistence wages and that are allowing sweatshop like conditions. This is not only wrong morally but fiscally. In addition, the safety of the food is now endangered by the poor decontamination procedures used in many of these countries. This is not a phenomenon that the Federal Government should support. But that is just what is happening.

Further, farmers and agricultural workers in the United States must be able to compete on an even playing field. Why should the U.S. Government help subsidize a foreign industry that is competing unfairly with American firms? Thousands of agricultural workers have lost their jobs due to this unfair advantage. By requiring foreign firms to show that they are adhering to minimum labor standards, this advantage will be taken away from countries using exploitative labor practices. To put it simply, we need a fair competitive structure in which American industry and labor can compete.

My bill would ensure that any foreign agricultural producer supplying produce to the U.S. Government adheres to current labor standards in the United States. The bill would amend the Walsh-Healey Government Contracts Act of 1936 to include foreign processed agricultural produce. The Walsh-Healey Act forbids the purchase of any product, except agricultural produce, from a company that does not meet minimal labor standards under the Fair Labor Standards Act. The Act was designed to ensure that the Federal Government was purchasing goods from firms that practiced fair labor standards. The thought back in 1936 was that the U.S. Government should set an example when purchasing goods. I believe that still holds true. Unfortunately, the Walsh-Healey Act does not specifically include agricultural produce. Since its passage, agency regulations have explicitly exempted agricultural purchase.

My bill would simply add agricultural produce to those products purchased by the Federal Government for coverage under the Act. The Federal Government should not be supporting poor labor standards. Let us withdraw the Federal Government's support in the exploitation of labor. I strongly urge my colleagues to support this bill.

NATIONAL EARTHQUAKE HAZARD MITIGATION AND INSURANCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. BROWN] is recognized for 30 minutes.

Mr. BROWN of California. Mr. Speaker, today the gentleman from New York [Mr. BOEHLERT] and I are introducing legislation to establish a national program for earthquake insurance and hazard mitigation. This bill, which is modeled after the National Flood Insurance Program, will help prepare the United States for inevitable future earthquakes.

Mr. Speaker, the United States is not prepared for major, urban earthquakes. The most expensive natural disaster in the history of our Nation was last October's Loma Prieta earthquake, which resulted in 62 deaths, an estimated $6 billion in direct damages, and perhaps twice that much in total costs. Yet we all know that the Loma Prieta earthquake was not the big one. Sometime in the next 30 years, a major earthquake will almost certainly strike one or more major urban centers in the United States. It could happen in California, but it could also be in the Pacific Northwest, the Mississippi Valley, or even along the east coast.

The costs of such a disaster will be staggering. Damages could approach $100 billion, with casualties in the thousands. The financial and social consequences could affect the entire Nation; however, many of these consequences can be averted through implementation of a national plan for earthquake hazard mitigation and insurance.

Earthquakes have been one of my prime legislative concerns over the past 15 years. I have sat through numerous, lengthy congressional hearings during this period, usually right after a major earthquake has caused great damage in an area that was not adequately prepared. These hearings often have titles such as "Lessons Learned From the Loma Prieta Earthquake," or "Lessons Learned From the Whittier Narrows Earthquake," or "Lessons Learned From the Soviet Armenian Earthquake." Well, what lessons have we learned from these disasters?

The message we have heard over and over, from the scientists, engineers, urban planners, and business and community leaders, is this: The only way to reduce the danger of earthquakes is to build safer houses, safer office buildings, and safer highways and bridges. From a collapsed home in Armenia to the Cypress Freeway in Oakland, every earthquake teaches us that the danger is not the earthquakes—the danger is the structures that surround us.

This legislation incorporates those lessons. It is a comprehensive approach to earthquake hazard mitigation, linked to the implementation of a national earthquake insurance program. The bill was crafted by incorporating the recommendations of those experts who best understand the danger of earthquakes. Let me give you two examples.

Lloyd S. Cluff, chairman of the California Seismic Safety Commission, recently testified as follows before the House Subcommittee on Science, Research and Technology:

> Public policy should encourage hazard mitigation and insurance as a means to lessen the Government's disaster assistance exposure and improve our ability to recover financially after a catastrophic earthquake * * *. A federally backed program that can reduce hazards and speed recovery after a devastating earthquake is important to California and the Nation.

George K. Bernstein, chairman of the Expert Review Committee of the National Earthquake Hazards Reduction Program, said the following to the House Banking Committee:

> Insurance is a most efficient, expeditious and comprehensive method of compensating victims of disasters. But without hazard mitigation, the guarantee of compensation from insurance will also create an incentive for irresponsible construction * * *. What is necessary is legislation that creates incentives and the will to act in States, localities and individuals so that new construction is built in recognition of the earthquake hazard * * * and available insurance is purchased.

Earthquakes are not confined to California—they are truly a national problem. Earthquakes have occurred in almost every State. Over half of the damaging earthquakes that have struck the United States in the past 250 years have occurred outside of California. Many people are unaware that the three largest historical earthquakes in the continental United States occurred at New Madrid, MO, near Memphis, in 1811 and 1812. At that time, the New Madrid area was sparsely populated, and damage was limited. Now, 35 million people live in that region. It is entirely possible that a major earthquake along the New Madrid Fault would make the Loma Prieta Earthquake pale in comparison.

The fact is, 39 States—and about three-quarters of the U.S. population—are vulnerable to moderate or severe earthquakes. Mr. Speaker, I must point out that even Washington, DC, is not exempt. A March 25 article in the Washington Post addressed this issue explicitly, and concluded that "Washington—like most East Coast cities—is at significant risk." Furthermore, the earthquake threat in the United States is growing with each passing day. There are two important reasons for this increasing risk. The first is geologic: As forces within the Earth's crust accumulate over time, there is an increasing chance that the crust will suddenly rupture along a fault. The second is demographic: Growing population, expanding urban centers, and increasingly sophisticated and costly infrastructure. Thus, the 1906 San Francisco earthquake—the magnitude 8.2 "Big One" that leveled the city—caused less damage in terms of 1990 dollars than the much smaller Loma Prieta earthquake of last October.

Estimates of the immediate consequences of a major, urban earthquake point to tens of billions of dollars in damages, and hundreds or even thousands of casualties. The Federal Emergency Management Agency [FEMA] has developed earthquake loss models for several earthquake-prone areas of the United States, which predict social and economic disruption that will severely compound the immediate earthquake damage. Destruction of bridges, water, and power lines, and emergency service facilities may seriously compromise any ability to respond once the earthquake is over. Old houses, lacking earthquake-resistant construction measures, would collapse, leaving hundreds of thousands of people homeless.

The effects would radiate far beyond the area of direct damage. In the case of Memphis, gas transmission pipelines that supply most major cities in the Northeast with natural gas could be severed, and strategic bridges across the Mississippi River might collapse. A major California earthquake could severely damage our semiconductor industry or paralyze the operation of major banks. A magnitude 8.0 Seattle earthquake could cause major disruption of our aeronautics industry, and generate a tidal wave that would inundate all low-lying areas.

The viability of the insurance industry itself could be jeopardized by such a disaster. Ironically, although few homeowners currently are insured for earthquake damage, insurance companies would still find themselves liable for huge claims from fire, liability, workman's compensation, and commercial policies. The insurance industry estimates that a major California earthquake could result in as much as $50 billion in claims, which would severely deplete industry reserves, and force the industry to liquidate assets. This in turn could have an adverse effect on financial markets throughout the country.

In spite of the national threat from earthquakes, less than 10 percent of all American homes are covered by earthquake insurance. Even in California, where insurance companies were required to offer earthquake policies, only about one-quarter of the State's homeowners have elected to purchase coverage. It has been estimated that over 90 percent of the losses to home-

owners from the Loma Prieta earthquake were uninsured.

This situation is accentuated by the absence of earthquake-resistant construction in many areas. Few regions have instituted construction codes that are commensurate with the earthquake threat. Some areas have strong building codes for new construction, but no meaningful provisions to increase the earthquake resistance of older buildings. Many of the homes that were destroyed during the Loma Prieta earthquake could have been saved by simple, inexpensive measures such as better anchoring to foundations or stronger shear walls on the ground floor.

Why do not homeowners buy earthquake insurance? There are many reasons. One explanation is the high price of premiums, and the high deductible levels offered by most companies. Another is the perception—especially outside of California—that earthquakes are not a serious problem. A third consideration is the insurance companies themselves, who are reluctant to open themselves up even further to the potentially huge losses which could result from a major earthquake.

Thus, most homeowners face the risk of earthquakes with no insurance and unsafe homes. If a house is destroyed by an earthquake, most Americans have only one place to turn: Federal disaster aid. Because homeowners know that disaster aid will be available after an earthquake, the Federal Government is in effect subsidizing inadequate home construction.

Any solution to the earthquake hazard and insurance problem must reduce the risks that Americans face from earthquakes, while minimizing the social and financial disruption after a major earthquake, and reducing the unfunded liability now shouldered by the Federal Government in the form of disaster aid, A Federal program that links earthquake hazard mitigation and earthquake insurance can provide the legal and financial incentives to achieve all of these goals.

Mr. Speaker, our proposed legislation, which is modeled after the National Flood Insurance Program, has three primary objectives:

First. To reduce loss of life and property from earthquakes through a program of earthquake hazard mitigation.

Second. To protect homeowners from the disastrous impact of a major earthquake by providing low-cost insurance coverage to those who live in earthquake-prone areas.

Third. To protect the Federal Government, insurance industry, and other institutions from sudden and disruptive losses associated with major earthquakes.

Our legislation will empower the Director of FEMA, in conjunction with other agencies in the National Earthquake Hazards Reduction Program [NEHRP], to identify all States and communities in the United States that are at risk from earthquakes, and to establish criteria for reducing casualties and damages from earthquakes. These loss reduction criteria will include not only earthquake-resistant construction standards for new homes, but also mitigation standards for all essential public structures, as well as lifelines such as water, power, communications, transport, and emergency services. Individual earthquake-prone States or communities will use these criteria to develop building codes and land use requirements that are appropriate to their individual level of earthquake risk. Any community that adopts acceptable loss reduction measures will be eligible to participate in the National Earthquake Insurance Program.

Earthquake-resistant construction is not expensive. Most estimates show that seismic safety design for new buildings will increase the construction costs, on average, by less than 1 percent. Furthermore, the greatest additional expense reflects the cost of educating architects and builders; in most cases there is no need for expensive new materials. As the design community becomes more familiar with the techniques necessary for earthquake safety, many construction projects can be made earthquake safe with no appreciable rise in construction costs.

The cost of making old buildings safer is more difficult to assess. For many structures, very simple, inexpensive provisions will be sufficient, such as bracing gas water heaters, or anchoring wood-frame houses more securely to their foundations. Only in the case of seismically hazardous essential public structures, such as hospitals and fire stations, might substantial renovation be required.

The Federal Government will provide earthquake insurance for any community that adopts acceptable measures for reducing damage from earthquakes. All homeowners or home buyers in earthquake-prone areas who finance their homes with federally backed loans will be required to purchase this insurance. Premiums will be deposited into a National Earthquake Insurance fund, from which payments for earthquake losses will be drawn. No Federal assistance or federally backed loans will be available on homes that are in violation of adopted local or State seismic building codes. Furthermore, communities that choose not to adopt adequate building codes and land use planning will be ineligible for Federal assistance and loans for development.

These provisions have the effect of mandating earthquake-resistent construction—for all buildings and facilities, not just private homes—in earthquake-prone regions. The message is simple: The Federal Government should not subsidize the construction of unsafe homes and facilities, and it should not accept the risk associated with such buildings.

The National Earthquake Insurance Program would have the effect of providing affordable insurance for all homeowners who live in earthquake-prone regions. Today, the cost of earthquake insurance is unreasonably high. This is because there are too few policyholders, so insurance companies cannot sufficiently spread the risk. A National Earthquake Insurance Program would lower the price of earthquake insurance, even in areas of high risk. Rates would reflect the type of construction and degree of risk, but old structures would be eligible for lower-than-actuarial rates, in order to keep insurance affordable. Annual premiums for homeowners in low risk, areas would be negligible. Those who live in areas of no known earthquake risk would pay nothing at all.

In addition to insurance for homeowners, this legislation would establish a reinsurance program and fund in order to assure necessary insurance coverage for the secondary results of a major earthquake, such as fire, liability, and workman's compensation. This program will guarantee that insurance companies will be able to pay all claims resulting indirectly from an earthquake, without excessively depleting insurance industry reserves. The reinsurance program would be activated after an earthquake only if the insurance industry sustains losses in excess of 10 percent of the total value of their premiums.

Insurance rates charged to the industry will be determined on a strictly actuarial basis. Premiums will be paid into a national earthquake reinsurance fund, from which reinsurance losses covered by the program will be paid. Should the fund be depleted, the director of the program is empowered to borrow necessary additional funds from the Treasury. These funds will be repaid by future premiums deposited into the reinsurance program.

Many people will look at the teeth of this bill and conclude that they are too sharp, that they pose too serious a threat to communities across the Nation. I can understand this reaction, but urge all observers to do a careful analysis of both my legislation and the real dimension of the earthquake risk before jumping to conclusions. It is important to recognize that local communities will have the responsibility of developing their own approach to meeting the guidelines issued by the Government, that FEMA will have a year after enactment of the legislation to issue thse guidelines, and that communities will get another 18 months after that to develop their mitigation

plan. The additional expense of earthquake resistant construction is far less than some have suggested, while the benefits of such measures must not be overlooked.

I have studied the issue of earthquake insurance at great length, with the help of many outside experts, and have concluded that without appropriate mitigation provisions, a nationwide earthquake insurance program would not adequately protect the national interest, and without a tough enforcement provision, communities will not take the necessary steps to prepare for a major earthquake.

The legislation we are introducing today contains the best mechanism we could come up with to achieve a successful earthquake insurance program. We know that this is only the beginning of the process, and we look forward to discussing this legislation with representatives of the building, banking and insurance industries, as well as city, State, and county officials.

Mr. Speaker, our legislation offers a comprehensive approach to the problems of earthquake hazards and earthquake insurance. We have developed a strategy that provides incentives for earthquake-prone communities to build safer homes, buildings and lifelines, by linking the damage reduction and insurance programs directly to the availability of federally backed loans and assistance for any and all development in earthquake-prone areas. We believe that this program will save the Federal Government billions of dollars, by lessening the immediate impact of major earthquakes, substantially reducing the need for Federal disaster relief, and hastening the recovery process. More importantly, by achieving these goals, the program will save lives and protect the property of the nearly 200 million Americans who live in earthquake-prone regions. we must start preparing for earthquakes now, rather than merely responding to them. The time has come to reduce the disastrous consequences of major urban earthquakes. I urge my colleagues to join with us to cosponsor this important piece of legislation.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. YATES (at the request of Mr. DURBIN), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MACHTLEY) to revise and extend their remarks and include extraneous material:)

Mr. DORNAN of California, for 60 minutes, today and 60 minutes, on April 19, 26, and 60 minutes, on May 2 and 3.

Mr. YOUNG of Florida, for 60 minutes, on April 18.

Mr. BEREUTER, for 5 minutes, today.

Mr. MCEWEN, for 5 minutes, today.

Mr. BURTON of Indiana, for 60 minutes, on April 18.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. WISE, for 5 minutes, today.

Mr. ALEXANDER, for 5 minutes, today.

Mr. LAUGHLIN, for 5 minutes, today.

Mr. WASHINGTON, for 5 minutes, today.

Mrs. LOWEY of New York, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HARRIS, for 5 minutes, today.

Mr. COYNE, for 5 minutes, today.

Mr. DYSON, for 5 minutes, today.

Mr. DONNELLY, for 5 minutes, today.

Mr. HUTTO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. BROWN of California, for 60 minutes, on April 24.

(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. PICKLE, for 5 minutes, today.

(The following Member (at the request of Mr. LAUGHLIN) to revise and extend his remarks and include extraneous material:)

Mr. PANETTA, for 60 minutes, today.

(The following Members (at the request of Mr. BROWN of California) to revise and extend their remarks and include extraneous material:)

Mr. OWENS of New York, for 60 minutes, on April 25.

Mr. JONTZ, for 60 minutes, on April 18.

Ms. LONG, for 60 minutes, on April 18.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. MACHTLEY) and to include extraneous matter:)

Mr. COURTER.

Mr. RINALDO.

Mr. BAKER.

Mr. PURSELL.

Mr. PARRIS in two instances.

Mr. THOMAS of California.

Mr. WHITTAKER.

Mr. DORNAN of California in two instances.

Mrs. ROUKEMA in two instances.

Mr. SOLOMON.

Mr. LEWIS of California.

Mr. ARCHER.

Mrs. MARTIN of Illinois.

Ms. SCHNEIDER.

Mr. VANDER JAGT.

Mr. BROOMFIELD in two instances.

Mr. LENT.

Mr. GEKAS.

Mr. IRELAND.

Mr. MACHTLEY in five instances.

Mr. BLILEY.

Mr. GILMAN in three instances.

Ms. ROS-LEHTINEN in three instances.

(The following Members (at the request of Mr. GONZALEZ) and to include extraneous matter:)

Mr. NEAL of Massachusetts in two instances.

Mr. RAY.

Mr. DINGELL in three instances.

Mr. WEISS.

Mr. JONTZ.

Mrs. COLLINS in two instances.

Mr. JACOBS.

Mr. YATRON.

Mr. BEILENSON.

Mr. TORRICELLI.

Mr. HARRIS in two instances.

Mr. BRUCE in two instances.

Mr. GUARINI.

Mr. STARK in two instances.

Mr. ROWLAND of Georgia.

Mr. DORGAN of North Dakota.

Mr. NELSON of Florida.

Mr. JONES of North Carolina.

Mr. SWIFT.

Mr. SAWYER.

Mr. THOMAS of Georgia.

Mr. LAFALCE.

Mr. SABO.

Mr. HUTTO.

Mr. COOPER.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1781. An act to establish as the policy of the United States the preservation, protection, and promotion of the rights of Native Americans to use, practice and develop Native American languages, to take steps to foster such use, practice and development, and for other purposes; to the Committee on Education and Labor.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1813. An act to ensure that funds provided under section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 may be used to acquire land for emergency shelters.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following date present to the President, for his approval a joint resolution of the House of the following title:

On April 3, 1990:

H.J. Res. 500. Resolution to designate April 6, 1990, as "Education Day, U.S.A."

ADJOURNMENT TO WEDNESDAY, APRIL 18, 1990

Mr. BROWN of Californa. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER pro tempore (Mr. LEWIS of Georgia). Pursuant to the provisions of House Concurrent Resolution 299, 101st Congress, the House stands adjourned until 12 noon, Wednesday, April 18, 1990.

Thereupon (at 5 o'clock and 22 minutes p.m.), pursuant to House Concurrent Resolution 299, the House adjourned until Wednesday, April 18, 1990, at noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2916. A letter from the Secretary of Housing and Urban Development, transmitting the Department's first report on the Supportive Housing Demonstration Program, pursuant to 42 U.S.C. 11387; to the Committee on Banking, Business and Urban Affairs.

2917. A letter from the Attorney General, transmitting the 1989 annual report on recommendations for coordination of Federal juvenile delinquency programs and activities, pursuant to 42 U.S.C. 5616(c); to the Committee on Education and Labor.

2918. A letter from the Secretary of Health and Human Services, transmitting the seventh report on the status of health personnel in the U.S. health professions, pursuant to 42 U.S.C. 292h(d) (1), (2); to the Committee on Energy and Commerce.

2919. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to require the Secretary of Health and Human Services to impose fees under the Federal Food, Drug, and Cosmetic Act for the review of applications for marketing approval for new human and animal drugs, antibiotics, medical devices, biological products, and for other purposes; to the Committee on Energy and Commerce.

2920. A letter from the General Counsel, Federal Housing Finance Board, transmitting a report on the Board's activities under the Freedom of Information Act, during calendar year 1989, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

2921. A letter from the Acting Solicitor, U.S. Commission on Civil Rights, transmitting a report of the Commission's activities under the Freedom of Information Act for calendar year 1989, pursuant to 5 U.S.C. 552; to the Committee on Government Affairs.

2922. A letter from the Secretary of Energy, transmitting the 1989 annual report of the Bonneville Power Administration, pursuant to Public Law 89-448, section 3(a) (80 Stat. 200); to the Committee on Interior and Insular Affairs.

2923. A letter from the Director, Administrative Office of the U.S. Courts, transmitting the interim report on the Demonstration Program of Mandatory Drug Testing of Criminal Defendants, pursuant to Public Law 100-690, section 7304(f) (102 Stat. 4465); to the Committee on the Judiciary.

2924. A letter from the Secretary of Transportation, transmitting the annual report of the Maritime Administration for the fiscal year 1989, pursuant to 46 U.S.C. app. 1118; to the Committee on Merchant and Fisheries.

2925. A letter from the U.S. Trade Representative, transmitting a copy of a report describing petitions filed and investigations conducted concerning certain unfair intenational trade practices, pursuant to 19 U.S.C. 2419; to the Committee on Ways and Means.

2926. A letter from the U.S. Institute of Peace, transmitting the second biennial report of the U.S. Institute of Peace, covering fiscal years 1988 and 1989, pursuant to 22 U.S.C. 4611; jointly, to the Committees on Foreign Affairs and Education and Labor.

2927. A letter from the President, U.S. Institute of Peace, transmitting the audit of the Institute's accounts for the fiscal year 1989 conducted by certified accountants from the firm of Ernst & Young, pursuant to 22 U.S.C. 4611; jointly, to the Committees on Foreign Affairs and Education and Labor.

2928. A letter from the Assistant Administrator, Environmental Protection Agency, transmitting a copy of report entitled "Surveillance and Enforcement of Sewage Sludge Dumping," pursuant to Public Law 100-688, section 1004 (102 Stat. 4150); jointly, to the Committees on Merchant Marine and Fisheries and Public Works and Transportation.

2929. A letter from the Assistant Administrator, Environmental Protection Agency, transmitting a copy of report entitled "Progress in Stopping Ocean Dumping," pursuant to Public Law 100-688, section 1002 (102 Stat. 4148); jointly, to the Committees on Merchant Marine and Fisheries and Public Works and Transportation.

2930. A letter from the Secretary of Energy, transmitting a draft of proposed legislation to withdraw certain public lands in Eddy County, NM, and for other purposes; jointly, to the Committees on Armed Services, Energy and Commerce, and Interior and Insular Affairs.

2931. A letter from the Assistant Secretary of the Interior (Policy, Budget and Administration), transmitting the Bureau of Land Management and the Fish and Wildlife Service reports on the implementation of section 318 of the 1990 Department of the Interior and Related Agencies Appropriations Act through March 1, 1990, pursuant to Public Law 101-121, section 318(h) (103 Stat. 750); jointly, to the Committees on Appropriations, Agriculture, Interior and Insular Affairs, and Merchant Marine and Fisheries.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BEREUTER:

H.R. 4461. A bill to revise the National Flood Insurance Program to provide for mitigation insurance coverage and claims payments to reduce damages to structures suffering severe or repetitive flooding or subject to shoreline erosion, to promote compliance with requirements for mandatory purchase of flood insurance, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BROWN of California (for himself and Mr. BOEHLERT):

H.R. 4462. A bill to require earthquake hazard reduction measures and establish a Federal earthquake insurance and reinsurance program, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. CONTE (for himself, Mr. MINETA, and Mr. WHITTEN):

H.R. 4463. A bill to authorize the Board of Regents of the Smithsonian Institution to plan, design, construct, and equip space in the east court of the National Museum of Natural History building, and for other purposes; jointly, to the Committee on House Administration and Public Works and Transportation.

By Mr. STARK:

H.R. 4464. A bill to amend title XVIII of the Social Security Act to require periodic certification of the qualification of physicians as a condition of payment for physicians' services under the Medicare Program; jointly, to the Committee on Ways and Means and Energy and Commerce.

By Mr. DE LA GARZA (for himself and Mr. MADIGAN):

H.R. 4465. A bill to encourage, promote, and support tree planting and forest improvement projects on non-Federal lands, to authorize the Secretary of Agriculture to establish a rural tree planting program and a community tree planting program, to authorize the President to designate a private nonprofit organization as the National Tree Trust Foundation, and for other purposes; to the Committee on Agriculture.

By Mr. DE LUGO (for himself and Mr. BLAZ):

H.R. 4466. A bill to amend title 32, United States Code, to authorize the Governors of the Virgin Islands and Guam (rather than the President) to appoint the adjutant general for their respective National Guards; to the Committee on Armed Services.

By Mr. DELLUMS (for himself and Mr. MILLER of California):

H.R. 4467. A bill to rename the Ernest Orlando Lawrence Livermore National Laboratory; to the Committee on Armed Services.

By Mr. DONNELLY (for himself and Mr. STUDDS):

H.R. 4468. A bill to amend the Internal Revenue Code of 1986 to modify the employment tax treatment of certain crew members on fishing vessels; to the Committee on Ways and Means.

By Mr. GEJDENSON:

H.R. 4469. A bill to amend title 10, United States Code, to require the Secretary of the Navy to permit and facilitate the construction in U.S. shipyards and related facilities of combatant vessels and components for allies of the United States; to the Committee on Armed Services.

By Mr. WAXMAN:

H.R. 4470. A bill to amend the Public Health Service Act to establish a program of grants to provide preventive health services with respect to acquired immune deficiency sydrome; to the Committee on Energy and Commerce.

By Mr. GEJDENSON (for himself and Mr. MILLER of Washington):

H.R. 4471. A bill to make persons who are nationals of countries that are members of the European Community ineligible to certify products produced outside the United

States for compliance with occupational safety and health standards and requirements established by the Secretary of Labor until the Secretary of Commerce certifies that the European Community is setting product standards and requirements in an open and fair manner and has established equitable rules for the testing and certifying products for compliance with product standards and requirements; to the Committee on Education and Labor.

H.R. 4472. A bill to make persons who are nationals of countries that are members of the European Community ineligible to certify products produced outside the United States of compliance with energy conservation requirements prescribed under the Energy Policy and Conservation Act, until the Secretary of Commerce certifies that the European Community is setting product standards and requirements in an open and fair manner and has established equitable rules for testing and certifying products for compliance with product standards and requirements; to the Committee on Energy and Commerce.

H.R. 4473. A bill to make persons who are nationals of countries that are members of the European Community ineligiible to certify products produced outside the United States for compliance with standards and requirements established by the Food and Drug Administration for medical devices, electronic products, infant formula, animal feeds and drugs, drugs intended for human use, food, and color additives until the Secretary of Commerce certifies that the European Community is setting product standards and requirements in an open and fair manner and has established equitable rules for testing and certifying products for compliance with product standards and requirements; to the Committee on Energy and Commerce.

H.R. 4474. A bill to make persons who are nationals of countries that are members of the European Community ineligible to test or certify products produced outside the United States for compliance with emission standards and requirements issued under the Clean Air Act, until the Secretary of Commerce certifies that the European Community is setting product standards and requirements in an open and fair manner and has established equitable rules for testing and certifying products for compliance with product standards and requirements; to the Committee on Energy and Commerce.

By Mr. ROWLAND of Georgia (for himself, Mr. TAUKE, Mr. DERRICK, Mr. BLILEY, Mr. THOMAS of Georgia, Mr. LEWIS of California, Mr. SOLOMON, Mr. FAZIO, Mr. SMITH of New Hampshire, Mr. BROWN of California, Mrs. PATTERSON, Mr. YOUNG of Alaska, Mr. MATSUI, Mr. SARPALIUS, Mr. KOLTER, Mr. MURPHY, Mr. TOWNS, and Mr. YOUNG of Florida):

H.R. 4475. A bill to amend title XVIII of the Social Security Act to provide relief from certain Medicare regulations relating to physicians services; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. GEJDENSON (for himself and Mr. MILLER of Washington):

H.R. 4476. A bill to make persons who are nationals of countries that are members of the European Community ineligible to test or certify products produced outside the United States for compliance with certain standards and requirements of the Federal Communications Commission, until the Secretary of Commerce certifies that the European Community is setting product standards and requirements in an open and fair manner and has established equitable rules for testing and certifying products for compliance with product standards and requirements; to the Committee on Energy and Commerce.

By Mr. GLICKMAN (for himself, Mr. ECKART, Mr. OLIN, Mr. LEACH of Iowa, Mr. FRANK, Mr. SWIFT, and Mr. WYDEN):

H.R. 4477. A bill to establish a Markets and Trading Commission in order to combine the functions of the Commodity Futures Trading Commission and the Securities and Exchange Commission in a single independent regulatory commission, and for other purposes; jointly, to the Committees on Energy and Commerce and Agriculture.

By Mr. GUARINI (for himself, Mr. ROE, Mr. HUGHES, Mr. PAYNE of New Jersey, Mr. PALLONE, Mr. TORRICELLI, Mr. DWYER of New Jersey, Mr. GALLO, Mrs. ROUKEMA, Mr. COURTER, Mr. SAXTON, Mr. SMITH of New Jersey, and Mr. RINALDO):

H.R. 4478. A bill to amend the Hazardous Liquid Pipeline Safety Act of 1979 to require the Secretary of Transportation to promulgate regulations to ensure the safety of underwater pipelines, and for other purposes; jointly, to the Committees on Public Works and Transportation and Energy and Commerce.

By Mr. HALL of Ohio:

H.R. 4479. A bill to require that reports to Congress by the Department of Agriculture contain any comments of principal investigators outside the Department whose studies were used in such reports about departmental summaries; to the Committee on Agriculture.

By Mr. SWIFT (for himself, Mr. DREIER of California, Mr. MOAKLEY, Mr. BRUCE, Mr. TANNER, Mr. MCCLOSKEY, Mr. BILBRAY, Mr. LEWIS of California, and Mr. CAMPBELL of California):

H.R. 4480. A bill to facilitate the provision of homeowners insurance against the risk of catastrophic earthquakes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DORGAN of North Dakota (for himself, Mr. FLIPPO, Mr. SYNAR, Mr. TAUKE, Mr. PICKLE, Mr. JOHNSON of South Dakota, Mr. JONTZ, Mr. PENNY, Mr. STANGELAND, Mr. VOLKMER, Mr. STENHOLM, Mr. EMERSON, Mr. ALEXANDER, Mrs. SMITH of Nebraska, Mr. LANCASTER, Mr. GRANT, Mr. RAHALL, Mr. POSHARD, Mr. SARPALIUS, Mr. ESPY, Mr. WATKINS, Mr. UPTON, Mr. HARRIS, Mr. SMITH of Texas, Mr. GUNDERSON, Mr. ENGLISH, and Mr. ROWLAND of Georgia):

H.R. 4481. A bill to amend title XVIII of the Social Security Act to equalize the standardized amounts paid to hospitals located in rural and urban areas for the operating costs of inpatient hospital services under part A of the Medicare Program, and for other purposes; to the Committee on Ways and Means.

By Mr. STENHOLM (for himself, Mr. TAUKE, Mr. SYNAR, Mr. ALEXANDER, Mr. BOUCHER, Mr. BRUCE, Mr. COMBEST, Mr. COOPER, Mr. DAVIS, Mr. DEFAZIO, Mr. DORGAN of North Dakota, Mr. EMERSON, Mr. ESPY, Mr. GRANT, Mr. HALL of Texas, Mr. HARRIS, Mr. HATCHER, Mr. JOHNSON of South Dakota, Mr. JONTZ, Mr. LANCASTER, Mr. POSHARD, Mr. RAHALL, Mr. ROWLAND of Georgia, Mr. SARPALIUS, Mr. SLATTERY, Mr. SMITH of Texas, Mrs. SMITH of Nebraska, Mr. STANGELAND, Mr. UPTON, Mr. VOLKMER, and Mr. WATKINS):

H.R. 4482. A bill to amend the Public Health Service Act to establish a program of grants to the States with respect to offices of rural health; to the Committee on Energy and Commerce.

By Mr. DORGAN of North Dakota (for himself, Mr. RICHARDSON, Mr. SYNAR, Mr. TAUKE, Mr. JONTZ, Mr. JOHNSON of South Dakota, Mr. PENNY, Mr. VOLKMER, Mr. STANGELAND, Mr. EMERSON, Mr. LANCASTER, Mr. GRANT, Mr. BOUCHER, Mr. RAHALL, Mr. POSHARD, Mr. ESPY, Mr. SMITH of Texas, Mr. HALL of Texas, Mr. BATES, Mr. TOWNS, Mr. DEFAZIO, Ms. SNOWE, Ms. SCHNEIDER, Mr. SCHIFF, Mrs. SMITH of Nebraska, and Mr. WILLIAMS):

H.R. 4483. A bill to amend title XVIII of the Social Security Act to provide for coverage under part B of the Medicare Program of nurse practitioner and clinical nurse specialist services provided in rural areas; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. BRUCE (for himself, Mr. FALEOMAVAEGA, Mr. POSHARD, Mr. TOWNS, Mrs. COLLINS, Mr. FUSTER, Ms. PELOSI, Mr. FOGLIETTA, Mr. KOLTER, Mr. KILDEE, Mrs. BENTLEY, Mr. ENGEL, Mr. WALGREN, Mr. JOHNSON of South Dakota, Mr. JONTZ, Mr. VOLKMER, Mr. SYNAR, Mr. COOPER, Mr. ALEXANDER, Mr. STANGELAND, Mr. DORGAN of North Dakota, Mr. EMERSON, Mr. ESPY, Mr. SARPALIUS, Mr. BOUCHER, Mr. RAHALL, Mrs. SMITH of Nebraska, Mr. SLATTERY, Mr. GRANT, Mr. WATKINS, Mr. SMITH of Texas, Mr. HARRIS, Mr. HALL of Texas, and Mr. LANCASTER):

H.R. 4484. A bill to amend title VII of the Public Health Service Act to increase the support provided to programs for the training of medical rehabilitation health personnel, to establish a Division of Allied Health Professions within the Health Resources and Services Administration, to initiate a pilot program concerning allied health research, and for other purposes; to the Committee on Energy and Commerce.

By Mr. BRUCE (for himself, Mr. MOODY, Mr. MADIGAN, Mr. RICHARDSON, Mr. WYDEN, Mr. HALL of Texas, Mr. TAUKE, Mr. SYNAR, Mr. WHITTAKER, Mr. SMITH of New Jersey, Mr. KASTENMEIER, Mr. OBERSTAR, Mr. JOHNSON of South Dakota, Mr. GLICKMAN, Mr. HEFNER, Mr. NIELSON of Utah, Mr. SMITH of Texas, Mr. SHAYS, Mr. AKAKA, Mr. ROSE, Mr. KILDEE, Mr. CHAPMAN, Mr. GUNDERSON, Mr. ALEXANDER, Mr. STANGELAND, Mr. CRAIG, Mr. FAZIO, Mr. ROWLAND of Connecticut, Mr. DURBIN, Ms. PELOSI, Mr. MURTHA, Mr. ENGLISH, Mr. PAYNE OF VIRGINIA, Mr. JOHNSTON of Florida, Mr. NAGLE, Mr. MARKEY, Mr. SCHIFF, Mr. SAWYER, Mr. SLATTERY, Mr. YATRON, Mr. ROBERTS, Mr. WILLIAMS, Mr. LIGHTFOOT, Mrs. SAIKI, Mr. PENNY, Mr. COOPER, Mr. EMERSON, Mr. ESPY, Mr. HARRIS, Mr. MAVROULES, Mr. EVANS, Mr. MORRISON of Connecticut, Mr. CROCKETT, Mr. SKELTON, Mr. THOMAS A. LUKEN, Mr. HUTTO, Mr. ROWLAND of Georgia, Mr. SARPALIUS, Mr. RAHALL, Mrs. SMITH of Nebraska, Mr. BEREUTER, and Mr. GRANT):

H.R. 4485. A bill to amend title XVIII of the Social Security Act with respect to payment for certified registered nurse anesthetists under the Medicare Program; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. WYDEN (for himself, Mr. TAUKE, Mr. WALGREN, Mrs. UNSOELD, Mr. BOEHLERT, Mr. SHAYS, Mr. STAGGERS, Mr. MCDERMOTT, Mr. FAUNTROY, Mr. DORGAN of North Dakota, Mr. ATKINS, Mr. JOHNSON of South Dakota, Ms. KAPTUR, Mr. HARRIS, Mr. MARTIN of New York, Mr. LEWIS of Georgia, Mr. GLICKMAN, Mr. LIGHTFOOT, Mr. FROST, Mr. RAHALL, Mr. STALLINGS, Mr. JACOBS, Mr. WOLPE, Mr. JONTZ, Mr. SYNAR, Mr. DEFAZIO, Mr. HATCHER, Mr. MORRISON of Washington, Mr. NEAL of North Carolina, Mr. ROWLAND of Connecticut, Mr. PENNY, Mr. NAGLE, Mr. AUCOIN, Mr. MCNULTY, Mr. MOODY, Mr. WILLIAMS, Mr. NIELSON of Utah, Mr. RHODES, Mr. STANGELAND, Mr. COOPER, Mr. EMERSON, Mr. ESPY, Mrs. SMITH of Nebraska, Mr. WATKINS, Mr. BEREUTER, and Mr. SMITH of TEXAS):

H.R. 4486. A bill to amend title XVIII of the Social Security Act to permit payment under the Medicare Program for services of physician assistants in all settings; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. RICHARDSON (for himself, Mr. COOPER, Mr. SLATTERY, Mr. WAXMAN, Mr. TAUKE, Mr. SYNAR, Mr. ALEXANDER, Mr. BRYANT, Mr. BOUCHER, Mr. DORGAN of North Dakota, Mr. EMERSON, Mr. ESPY, Mr. GORDON, Mr. GRANT, Mr. HARRIS, Mr. JOHNSON of South Dakota, Mr. JONTZ, Mr. POSHARD, Mr. PRICE, Mr. RAHALL, Mr. ROWLAND of Georgia, Mr. SARPALIUS, Mrs. SMITH of Nebraska, Mr. SMITH of Texas, Mr. STANGELAND, Mr. TOWNS, Mr. WATKINS and Mr. WISE):

H.R. 4487. A bill to amend the Public Health Service Act to revise and extend the program for the National Health Service Corps and to establish a program of grants to the States with respect to offices of rural health;

BY Mr. HASTERT:

H.R. 4488. A bill to amend the Internal Revenue Code of 1986 with respect to method of rounding used in adjusting tax rates and certain other amounts for inflation; to the Committee on Ways and Means.

By Mr. HOAGLAND:

H.R. 4489. A bill to amend the Federal Deposit Insurance Act to provide that the liability of certain depository institutions for losses incurred by affiliate depository institutions does not cease after the affiliation ceases; to the Committee on Banking, Finance and Urban Affairs.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1526: Mr. SIKORSKI.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1236

By Mr. DOUGLAS:

Strike all after the enacting clause and insert the following language:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Price Fixing Prevention Act of 1990".

SEC. 2. PROHIBITION AGAINST RESALE PRICE FIXING.

In any civil action based on a claim arising under section 1 or 3 of the Sherman Act (15 U.S.C. 1, 3), and alleging a contract, combination or conspiracy to set, change or maintain prices, the fact that the seller of a good or service and the purchaser of such good or service entered into an agreement to set, change, or maintain the price (other than a maximum price) or such good or service for resale shall be sufficient to constitute a violation of such section."

SENATE—Wednesday, April 4, 1990

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable CHARLES S. ROBB, a Senator from the State of Virginia.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

The earth is the Lord's, and the fulness thereof; the world, and they that dwell therein.—Psalm 24:1.

O beautiful for spacious skies,
For amber waves of grain,
For purple mountain majesties
Above the fruited plain!
America! America!
God shed His grace on thee,
And crown thy good with brotherhood
From sea to shining sea!

O beautiful for pilgrim feet,
Whose stern impassioned stress
A thoroughfare for freedom beat
Across the wilderness!
America! America!
God mend thine every flaw,
Confirm thy soul in self-control,
Thy liberty in law!

("O Beautiful for Spacious Skies," Katharine L. Bates, 1893, Samuel A. Ward, 1882, verses 1 and 2.)

Gracious Father in Heaven, forgive our failure to be good stewards of the land You gave us. Renew us in our dedication to this stewardship. In the name of the Lord of Life. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, April 4, 1990.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable CHARLES S. ROBB, a Senator from the State of Virginia, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. ROBB thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Without objection, the time of the two leaders is reserved.

In my capacity as a Senator from Virginia, I suggest the absence of a quorum. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of morning business not to extend beyond 11 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

LITHUANIA'S QUEST FOR FREEDOM

Mr. D'AMATO. Mr. President, one of the most moving speeches that this Senator has ever heard was given on November 15, 1989, by a gentleman who demonstrated what courage and the fight for freedom means. That gentleman was Lech Walesa. In his speech before the Congress, Lech Walesa recalled the decade of the Solidarity movement, when as a young worker in the shipyards of Gdansk, as he said, he leaped over the wall to join his comrades. He recalled that there were warnings and condemnations that accompanied the rise of Solidarity. Those were not warnings, Mr. President, that came from the Soviets. They went something like this: "What are those Poles up to? They're mad. They're jeopardizing world peace and European stability. They should be quiet. They shouldn't get on anybody's nerves."

Walesa gave us a message. He said those people who enjoyed freedom had it. They were condemning us to a quiet fate, a fate of being dominated, that we should have no freedom so that they could enjoy tranquility, normalization of relations, and that by the Poles standing up for freedom and calling out for it, somehow that might jeopardize peace.

A decade later the naysayers are saying the same thing about Lithuania's quest for freedom. Why, they are concerned about their stability, their tranquility, the movement toward democracy for which they hope. But yet the illusion is somewhat clouded by reality, by the Soviet tanks rumbling into Lithuania, by the expulsion of the free press.

By the way, Mr. President, let me suggest what a travesty, the great media of the world, particularly those that come from democracies which protect the right of free speech. They have an obligation to recount the facts as they take place. They are like little puppy dogs. They go out without even a whimper. The Soviets tell them, "Out of Lithuania," and out they go. Maybe they are afraid they will lose access to other areas, whether it be in the Soviet or some other place, maybe under the guise of saying they are acting responsibly, not to inflame the situation. They do not know what that means, by the way, "inflaming the situation."

We are saying to people, we are not going to send guns; we are not sending bombs; we are not sending anarchists but a message of freedom and hope; that we are one with those who crave the right of self-determination; that we are not going to stand by and see a people oppressed.

We should be saying to Mr. Gorbachev very clearly, "If you want to talk about peace, then demonstrate it. If you want our credits, if you want our technology, understand that there is a price, and the price is a rather reasonable one, that is, that you do not insulate people; that we are not going to stand aside as if this is going to take place."

It is like the "Wizard of Oz"; we are afraid to look behind the screen to see who is there. I think it is time to show what the real Gorbachev is about. We should not set conditions on what people should do and how long they should wait. That they should wait 5 years for their freedom, imagine that. We have the audacity to suggest what terms and conditions people should have imposed before they have their own freedom, and their inalienable right that we have talked about. I think we have become so blinded by "Gorbymania" that we do not want to distinguish reality from that myth, from that conception. We so desperately want to put aside the fears that come and the anxieties that come as a result of the mindless race toward confrontation, and certainly I want to do that, too. I do not think we should be blinded.

Mr. President, I am going to attempt to go to Lithuania, leaving later today. President Landsbergis has indicated that the Foreign Minister is going to

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

meet me and attempt to see if we cannot get access to Lithuania.

I do not have a Soviet visa. But I do have visa No. 3 that was given by the Lithuanian Republic and issued to me, to have an invitation from the Republic of Lithuania. I will be bringing with me the resolution which this body passed as it relates to Lithuania to demonstrate our solidarity and our encouragement of a movement as a peaceful movement. I underscore that peaceful movement in the resolve and determination that people have the right to freedom and independence.

It seems to me that those who say we should be quiet, we should be circumspect, we should not be seen as the Lithuanian struggle for democracy, are suggesting that we give tacit approval to the Soviet occupation, domination, use of threats and fear, and intimidation. Let the record say very clearly when you send tanks in, when you occupy buildings, when you close the borders down, when you move the press out, that is certainly use of force and may be more in the factor of psychological warfare, but it certainly is a demonstration that I do not believe the United States should be quiet and silent about nor should our Western Allies.

I hope, and I do believe, that our President will indicate to the Soviet Foreign Minister very clearly in his visit here that there will not be the so-called move toward normalization that they seek; there will not be the credits they have been asking for; there will not be better trade unless and until the Soviets give to the Lithuanian people the freedom and the independence that they are entitled to under God's law, and yes, under the law that we have recognized for this past 50 years.

Mr. President, I think it is important to show the world that the message of freedom is a message of hope, and that the United States stands committed with the people and the inalienable rights of the people of Lithuania to that freedom.

Thank you, Mr. President. I yield the floor.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MOVEMENT ON DEFICIT REDUCTION

Mr. KOHL. Mr. President, it is budget season again. And in the great tradition of all budget deliberations, deadlines have already been missed.

But there has also already been some important movement on the budget. I shall take a moment to comment on some of those developments.

In the Washington Post last Friday, the distinguished assistant Republican leader, Senator SIMPSON, made a commonsense call for straightforward deficit reduction.

Last Thursday, the distinguished chairman of the Senate Budget Committee introduced a strong budget resolution to kick off his committee's deliberations.

Finally, Senator KENT CONRAD along with a bipartisan group of Senators sent a letter to the President and the congressional leadership urging a cooperative effort to craft a meaningful deficit reduction package.

I come here today to salute these efforts. I also take this opportunity to urge that we do whatever we can to convert this grassroots momentum into substantive, face-to-face meetings. Let us start talking to each other directly instead of through editorials, RECORD statements and letters.

Senator SIMPSON's editorial pointed to the Rostenkowski deficit reduction plan as a solid step that we should carefully consider. Like my friend from Wyoming, I have trouble with many parts of it.

But the point is not the problems I have with the plan. The point is that the Rostenkowski proposal sets the standard to which all other proposals must meet.

Having read the editorial, I then opened the RECORD and saw that the chairman of the Senate Budget Committee has taken up this challenge. Senator SASSER last week introduced Senate Concurrent Resolution 110.

This excellent proposal represents a strong plan under which we can achieve real deficit reduction. Like the Rostenkowski plan, Senator SASSER's bill uses honest economics, avoids short-term tricks and calls for sacrifice on all parts of the budget. This is a recipe for serious progress.

Finally, Senator KENT CONRAD convened an off-the-record meeting of 20 Senators and the Director of the Office of Management and Budget. The meeting was aimed at getting us off the dime with respect to the budget stalemate.

The participation in his meeting cut across party and ideological lines. No matter what your political bent, everyone there knew that we had to do something about the deficit and that nothing serious can be done unless we do it together.

Senator CONRAD has now followed up that meeting with a letter to the President and the congressional leadership. I sincerely hope that his call is heard.

Mr. President, it appears to me that everyone knows where we have to go. Senators SIMPSON and SASSER have shown that they can stand the heat of the kitchen. Senator CONRAD has given voice to the grassroots concerns.

We now need to talk to each other and to the White House so that we achieve a bipartisan package for deficit reduction.

Obviously, there is room for movement on all sides. We should seize the opportunity and get this deficit reduction burden behind us. Only then can we go forward with the many other demands of governing this great country.

Mr. President, I ask unanimous consent that the editorial appearing in Friday's Washington Post by Senator SIMPSON be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

OUT OF THE DISMAL DEFICIT SWAMP

(By Alan K. Simpson)

There is a specter haunting Congress; the specter of honest deficit reduction.

It is separating those who "talk the talk" from those who "walk the walk." Danny Rostenkowski (D-Ill.), chairman of the House Ways and Means Committee, has dared to speak the unspeakable: that our monstrous deficit can be eliminated only with some real discomfort—for every one of us. For many in Congress, this is the most terrifying and stultifying of thoughts. People in discomfort are simply not as keen on reelecting incumbents.

The federal deficit can be compared to a huge, dark chasm that widens every year. We must bridge it now if we are ever to reach long-term fiscal stability.

In effect, Rostenkowski has suggested throwing out a kind of "rope bridge" over the other side. Everyone in the old campground will have to contribute an old shirt or two or a couple of worn-out pairs of pants if it's going to be long enough. Rostenkowski has challenged us to either come up with a better way of getting across, or "fork over," or watch our children and grandchildren tumble into the widening maw.

We could simply accept at face value the plan he put forth. Or we could tell Rosty not to covet our old togs, then make a noose out of his own rope and string him up with it.

Unfortunately, the latter option is precisely what many seem to want to do. Every element of his plan—and core of any serious deficit reduction plan—is going to be political quicksand to various members of Congress. Rostenkowski really stuck his neck out; the temptation to hack at it is undeniably tough to resist. Freeze Social Security COLAs for one year? You bum! Increase gasoline taxes? Whoa! Place all tax cuts on the back burner? Gadzooks!

My friend Senator Daniel Patrick Moynihan criticized Rostenkowski's plan because it would not balance the budget without considering the Social Security surplus ["It's a Matter of Trust, Rosty," op-ed, March 22]. But we will never even approach that distant obstacle until we get over the foothills by balancing the unified budget.

Moynihan's plan would move us directly away from the verdant hills and right into the swamp, by increasing the deficit further through the reduction of Social Security payroll taxes. The logic cited; it would

"force" the government into making the "tough choices" necessary to reduce the deficit. Gad! What more inducement do we need than what we have right now? Adding pressure doesn't solve a single problem. Congress has not been ashamed or pressured into making any "tough choices" by $3.1 trillion dollars of debt and the Gramm-Rudman-Hollings law. Will the extra dose of "good" debt cause a revolution in our collective budgetary conscience? I sure doubt it.

Moynihan's article implies that in the '80s some sinister villains in the Treasury Department conspired to "raid" our Social Security reserves. But the truth is our Social Security surplus has been mandated by law for 50 years to be used to buy Treasury bonds and similar issues.

The true problem lies with that huge existing deficit. The Social Security reserves have bought Treasury bonds that have then financed only consumption, not savings. The "power of the purse" behind the reality resides cozily right here with us in Congress.

Rostenkowski's proposal is to attack our government's absence of spending restraint with a plan. Moynihan's is merely to expose it—moreover, to expose it by exacerbating it! Pat would shift the burden of meeting the baby boom's Social Security obligations onto the spindly shoulders of some future generation in the hope that by doing so we will inspire in ourselves the decency not to saddle them too with an ever-growing federal deficit. Sure.

I'm not endorsing all elements of Rostenkowski's proposal. But we should all endorse and admire the spirit in which it was made and contribute some spirit and energy of our own. It's so easy to be a critic. It's flashier to chop a plan to shreds than to create a new one. So I offer a humble challenge of my own and commend it to Republicans and Democrats alike; those who stand ready to rip apart and ridicule this proposal must be prepared to offer a thoughtful substitute—"a better one," in Rosty's terms, in what it really, and clearly and painfully does for deficit reduction. If we confine the next rush of dialogue to improving the Rostenkowski challenge instead of undermining it, we then stand a better chance of bequeathing a fiscally stable government to those who follow us.

Mr. KOHL. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TEXTILE, APPAREL, AND FOOTWEAR TRADE ACT OF 1990

Mr. HOLLINGS. Mr. President, today, I, along with my senior colleague Senator THURMOND, and Senator MITCHELL, Senator DOLE, Senator SANFORD, Senator HELMS, Senator FORD, Senator LOTT, Senator MIKULSKI, Senator HEINZ, Senator HEFLIN, Senator BREAUX, Senator COCHRAN, Senator BUMPERS, Senator COHEN, Senator BYRD, Senator D'AMATO, Senator DECONCINI, Senator HATCH, Senator DIXON, Senator KASTEN, Senator DODD, Senator BURNS, Senator FOWLER, Senator ROTH, Senator GORE, Senator INOUYE, Senator RUDMAN, Senator JOHNSTON, Senator SPECTER, Senator LEAHY, Senator WARNER, Senator METZENBAUM, Senator MURKOWSKI, Senator JEFFORDS, Senator NUNN, Senator MCCONNELL, Senator PRYOR, Senator REID, Senator RIEGLE, Senator ROCKEFELLER, Senator SASSER, Senator SHELBY, Senator SIMON, Senator MOYNIHAN, Senator SARBANES, Senator PELL, Senator BURDICK, Senator KENNEDY, Senator LEVIN, Senator LAUTENBERG, Senator BRYAN, Senator DASCHLE, Senator KERRY, and Senator LIEBERMAN, some 55 cosponsors in all, Mr. President, am introducing a new textile, apparel, and footwear trade bill. The bill expresses our commitment to the economic security of this country.

For the last 15 months, textile industry leaders have been meeting with the administration to try to reach agreement on some proposal to stem the flood of imports. While they were meeting, imports went up 12.7 percent and the textile and apparel trade deficit reached $26.5 billion. Again, in January of this year, imports were up almost 10 percent. The textile industry is suffering: Profits are down 71 percent, new orders are down 9 percent, shipments are down 4.5 percent, and inventories are up 7 percent. With those kinds of figures, you can expect we have had some job losses and plant closings. In 1989:

Springs closed a plant in Gaffney, SC, with a loss of 220 jobs;

Pendleton closed a plant in Sellersville, PA, loss of 100 jobs;

Parkdale Mills, Belmont, NC, 115 jobs;

The Bibb Co., Roanoke Rapids, NC, 90 jobs.

Burlington, Dalton, GA, 50 jobs; and

Hartex in El Paso, TX, 400 jobs.

In 1990, closings have begun to accelerate. Last Tuesday, we lost 800 jobs in the Carolinas, we closed 2 plants and cut employment in half in another. Also:

Hart Wool in Holyoke, MA, 50 jobs;

Levi Strauss in San Antonio, TX, 1,100 jobs;

Piedmont Industries in Greenville, SC, 225 jobs;

Health-Tex in Guin, AL, 225 jobs;

Farah in El Paso, TX, 150 jobs; and

VF Corp. in Guntersville, AL, over 450 jobs;

Springs Industries, Anderson, SC, 400 jobs.

For comparison's sake, let us look at how the European Community and the United States have fared under the Multifiber Arrangement. The European Community started the decade with a $5 billion deficit in textile and apparel trade. The United States had a $4.7 billion deficit. In 1986—the latest figures I have—the European Community had a deficit of $1 billion. In contrast, the United States had a deficit in 1986 of $21.2 billion. And, of course, we had a $26.4 billion deficit this year. What accounts for this difference? The willingness of the European Community to vigorously use the Multifiber Arrangement to control their imports and our unwillingness to do so.

As I think about working with, yet, another administration on textile and apparel trade, I feel like Yogi Berra must have felt when he said, "It's déjà vu all over again." My association with this issue goes back over three decades and encompasses the administrations of eight Presidents.

During the Eisenhower administration, I testified as Governor of South Carolina before the U.S. Tariff Commission and took the textile industry's case to the President. Promises were made, but relief did not follow.

During the Kennedy administration, the President made good on his campaign pledge to me that he would negotiate fair treatment for the textile industry. Under the Civil Defense Mobilization Act, a formal determination was made that textiles ranked second, only to steel, in their importance to our national security. President Kennedy followed up by negotiating a seven-point accord governing trade in cotton textiles.

In 1968, along with Senator Cotton of New Hampshire, I sponsored a textile bill that passed the Senate only to die in the House. In 1978, both Houses passed a textile bill by substantial majorities, only to be vetoed by President Carter. We continued to press the case, and in 1979, the Carter administration issued a white paper on textiles which led to more vigorous enforcement of our trade agreements and stabilization of textile imports.

However, in the 1980's, the Reagan administration's hands-off, see-no-evil policy of inaction and nonenforcement unleashed a flood tide of textile and apparel imports. The Congress passed two textile bills during the Reagan administration. Each time President Reagan vetoed the overwhelming will of the Congress. The Reagan administration's record was one of broken promises and cavalier indifference to the textile industry.

And now we have spent 15 months on the promises of the Bush administration. It is time to quit talking and take some action. Under the Constitution, we have a responsibility to regulate commerce with foreign nations and we should fulfill that responsibility. Let us state again our present position. During the 1980's, imports grew on average 12 percent a year, while our domestic market grew only about 1 percent a year, so our industry lost 11 percent market share annually this decade. If that trend continues, Mr.

President, we will not have a textile industry left in the year 2000.

The U.S. industry heretofore has invested heavily, over $18 billion in the last 9 years, $2 billion a year; and productivity has increased 4 percent a year, almost twice that of all manufacturing.

However, if we do not establish an effective import policy, no one in his right mind is going to continue that investment. The investment will wane, and productivity will drop. And we will come around here and say, "Well, we have to get more productive; we have to get more competitive."

The truth of it is, when we have no industry left at the end of the century, people will be blaming the loss of productivity on our workers, but that really will not be the case. It will be the lack of political productivity on behalf of us here in Government.

The bill we are introducing here today is very similiar to the bill this body considered in 1988. The bill will impose global quotas on textiles and apparel with 1 percent growth annually, freeze footwear imports at the 1989 levels, provide for a quota auctioning pilot program in 1991 for one-fifth of the imported textiles and apparel, and give increases in quotas to countries who increase their purchases of U.S. farm products.

There are two changes. Products of Canada and Israel are exempted from the bill. We have free-trade agreements there and we want to honor those. And the Caribbean Basin Initiative countries are guaranteed their 1989 market share.

The CBI imports alone amounted to 11 percent of all apparel imports last year, so we have taken care of all considerations and concerns that we have had on the House and the Senate side. We have taken care; we are living in the real world. We all want to begin developing the CBI. We have guaranteed them their percentage and any that may be negotiated by the administration under the global policy.

I think it is an outstanding bill that has been gotten together by our industry, both management and labor. We are now at the crossroads. The real question is whether or not this industry shall persist as an industry on its own. We need a sound, effective trade policy.

I urge my colleagues to support the bill. I am delighted to yield to my distinguished senior colleague, the Senator from South Carolina.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 2411

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Textile, Apparel, and Footwear Trade Act of 1990".

SEC. 2. POLICY.

The policy of this Act is to—

(1) relate the growth of textile and clothing imports to the growth of the domestic market in order to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and clothing manufacturers, and loss of job opportunities for United States textile and clothing workers; and

(2) maintain a viable United States nonrubber footwear industry by preventing further damage to United States nonrubber footwear manufacturers and loss of job opportunities for United States nonrubber footwear workers.

SEC. 3. FINDINGS AND DETERMINATIONS.

(A) FINDINGS.—The Congress finds that—

(1) with respect to textiles and textile products—

(A) the current level of imports of textiles and textile products from all sources, more than 165 countries, reached nearly 12.1 billion square meter equivalents in 1989, an increase of 13 percent over 1988 imports; this level of imports is 3 times the level of imports in 1980, a rate of increase that was not foreseen when the United States granted trade concessions benefiting foreign suppliers of textiles and textile products, and represents over 1.4 million job opportunities lost to United States textile, apparel, and fiber workers;

(B) imported textiles and textile products contain five million bales of cotton which is equivalent to 40 percent of annual cotton production in the United States; eight out of every ten bales of cotton contained in imported textiles and clothing are foreign grown cotton; sustained massive increases in imports of cotton textile and clothing products are causing a declining market share for domestic cotton producers, depressed prices, and an average annual market revenue loss of over $1,000,000,000; another result is that a market development program voluntarily funded by United States cotton producers actually benefits foreign growers; finally, as imports of textiles and clothing increase, domestic cotton acreage is shifted to produce other agricultural products which are already in oversupply thereby adding to the problems of United States agriculture;

(C) imports of textiles and textile products made of wool have nearly doubled since 1980, creating major disruptions among domestic wool products producers of United States produced raw wool; because import penetration in the domestic wool textile and clothing market is nearly 70 percent, it is critical that action be taken to halt further erosion of the domestic industry's market share;

(D) imports of textiles and textile products made of manmade fiber and competing fibers, other than cotton or wool, have more than doubled since 1980 resulting in substantial reductions in domestic manmade fiber production capacity and job losses;

(E) the textile and clothing trade deficit of the United States exceeded $26,000,000,000 in 1989, an increase of 8 percent over 1988, and accounted for 21 percent of the Nation's overall merchandise trade deficit;

(F) import growth of clothing and clothing fabrics has averaged 10 percent annually since 1973; over the same period, the domestic market for clothing and clothing fabrics has grown only one percent annually; the result is that import penetration in the domestic clothing and clothing fabric market has more than doubled in the last 10 years, reaching a level of 58 percent in 1989;

(G) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products competitive with those imported have been seriously damaged, many of them have been forced out of business, have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to the Federal and local governments;

(H) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring new measures;

(I) unless the import growth rate of textiles and textile products is slowed to the long term rate of growth of the United States market, plant closings and job losses will continue to accelerate, leaving the United States with reduced competition benefiting domestic consumers and leaving the Nation in a less competitive international position;

(J) a strong, viable, and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States; and

(K) actions taken by the United States under the Arrangement Regarding International Trade in Textiles of December 20, 1973, as extended (commonly referred to as the "Multi Fiber Arrangement" or "MFA") have failed to avoid disruptive effects in the textiles and textile products markets in the United States; and

(2) with respect to nonrubber footwear—

(A) nonrubber footwear imports in 1988 reached a level of 860 million pairs; this volume of imports is 2.25 times that of 1981, the year that import relief for the nonrubber footwear industry terminated, and is 2.1 percent above 1985 levels, the year in which the International Trade Commission issued its third finding that the domestic nonrubber footwear industry has been seriously injured by increased imports;

(B) since 1981, import growth of nonrubber footwear has averaged more than 11 percent per year, gaining market share at the expense of the domestic industry; in 1981, import penetration of the domestic nonrubber footwear market was 51 percent; by 1989, import penetration reached 80 percent;

(C) as a direct result of imports, domestic nonrubber footwear production has declined, reaching 226 million pairs in 1989, a production level matched only during the Great Depression in the 1930's;

(D) domestic nonrubber footwear employment has declined significantly since 1981 and is down 45 percent from 1981 levels and 19.3 percent from 1985 levels; and

(E) domestic nonrubber footwear production facilities are closing at an alarming rate, with over 408 factory closings since 1981, of which 21 closing occurred in 1989 alone.

(b) DETERMINATIONS.—Congress determines that, for the foregoing reasons—

(1) textiles and textile products are being imported into the United States in such increased quantities and under such conditions as to cause or threaten serious injury

to producers of textiles and textile products in the United States, and

(2) nonrubber footwear is being imported into the United States in such increased quantities and under such conditions as to cause or threaten serious injury to products of nonrubber footwear in the United States, within the meaning of article XIX of the General Agreement on Tariffs and Trade.

SEC. 4. LIMITS ON IMPORTS.

(a) CALENDAR YEAR 1990.—Notwithstanding any other provision of law—

(1) the aggregate quantity of textiles and textile products, from all countries, classified under a category that is entered during calendar year 1990 shall not exceed an amount equal to 101 percent of the aggregate quantity of such products classified under such category, from all countries, that entered during calendar year 1989, and

(2) the aggregate quantity of nonrubber footwear, from all countries, classified under a nonrubber footwear category that is entered during calendar year 1990, and during each calendar year thereafter, shall not exceed an amount equal to—

(A) the aggregate quantity of nonrubber footwear classified under such category, from all countries, that entered during calendar year 1989, and

(B) in the case of high priced nonrubber footwear, notwithstanding subparagraph (A), the aggregate quantity of high priced nonrubber footwear classified under such category, from all countries, that entered during calendar year 1989.

(b) GROWTH ADJUSTMENT.—For calendar years after 1990, the aggregate quantity of textiles and textile products, from all countries, classified under each category that may be entered during each such calendar year shall be increased by an amount equal to one percent of the aggregate quantity that could be entered under such category during the preceding calendar year. If the aggregate quantity that could be entered under a category for a calendar year after 1990 is reduced under section 10(b), then in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 10(b) in previous calendar years.

(c) EXCEPTIONS.—

(1) The limitations in this Act on the aggregate quantity of articles of textiles and textile products that may be entered during any calendar year do not apply to articles of that kind that are the product of any insular possession of the United States if the articles are—

(A) exempt from duty under general headnote 3(a)(iv) of the Harmonized Tariff Schedule of the United States; and

(B) manufactured or produced in such possession by individuals who are either—

(i) United States citizens;

(ii) United States nationals; or

(iii) permanent residents of such possession in accordance with its laws.

(2) Notwithstanding any other provision of law, the aggregate quantity of sweaters that are—

(A) made of cotton, wool, or manmade fibers; and

(B) assembled in Guam from otherwise completed knit-to-shape component parts; and that may be entered—

(i) during calendar year 1990, may not exceed 168,162 dozen; and

(ii) during any calendar year after 1990, may not exceed the aggregate quantity that is authorized to be entered under this paragraph during the preceding calendar year, increased by one percent.

(3) The limitations in this Act on the aggregate quantity of textiles and textile products that may be entered during any calendar year do not apply to articles that are the products of Canada or Israel. In the case of Canada, such articles are textiles and textile products produced in Canada in accordance with the rules of origin in the United States-Canada Free-Trade Agreement. In the case of Israel, such articles are textiles produced in Israel and textile products assembled in Israel from fabric or yarn produced in the United States or Israel.

(4) The amount of textiles and textile products classified under each category entered during calendar year 1990, and during each calendar year thereafter, from beneficiary countries under the Caribbean Basin Initiative shall equal the quantity of such products of such countries classified under such category that entered in 1989 and any increases that the President shall negotiate or allocate within the limits of section 4(a)(1).

(d) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations as may be necessary or appropriate for the efficient and fair administration of the provisions of this Act, including regulations governing entry, or withdrawal from warehouse, for consumption of the products covered by this Act. Such regulations shall provide for reasonable spacing of imports over the calendar year.

(e) ALLOCATIONS FOR CERTAIN COUNTRIES.—Regulations may be prescribed under subsection (d) only if such regulations ensure that—

(1) an amount of the limitation imposed by this section on the aggregate quantity of textiles and textile products classified under each category entered during calendar year 1991 and during each succeeding calendar year (hereafter in this subsection referred to as the "applicable year") is allocated to such products of each country to which the total quantity of United States agricultural products exported on commercial terms during the calendar year preceding the applicable year exceeds the total quantity of United States agricultural products exported on commercial terms to such country during the calendar year before the calendar year preceding the applicable year; and

(2) the amount of textiles and textile products classified under each category entered during the applicable year that is allocated to each country under paragraph (1) exceeds the quantity of such products of such country classified under such category that entered during the calendar year preceding the applicable year.

SEC. 5. TARIFF COMPENSATION.

(a) COMPENSATION.—

(1) The President may (A) enter into trade agreements with foreign countries or instrumentalities to grant new concessions as compensation, to the extent required under international trade agreements of the United States, for the import limits imposed under section 4 of this Act to maintain the general level of reciprocal and mutually advantageous concessions under such agreements; and (B) proclaim such modification or continuance of any existing duty on textiles and textile products and on nonrubber footwear as the President determines to be required or appropriate to carry out such agreements.

(2) No proclamation shall be made under paragraph (1) decreasing any rate of duty to a rate of duty which is less than 90 percent of the existing rate of duty.

(3) Before entering into any trade agreement under this subsection with any foreign country or instrumentality, the President shall consider whether such country or instrumentality has violated trade concessions of benefit to the United States and such violation has not been adequately offset by the action of the United States or by such country or instrumentality.

(b) STAGING REQUIREMENTS.—The aggregate reduction in the rate of duty on any article which is in effect on any date pursuant to subsection (a) shall not exceed the aggregate reduction which would have been in effect on such date if a reduction of one-fifth of the total reduction under subsection (a) had taken effect on the effective date of the first reduction proclaimed to carry out such trade agreement, and at one-year intervals after such effective date.

(c) PROHIBITION.—Except as provided in subsection (a) and notwithstanding any other provision of law, the President may not enter into trade negotiations with any foreign country or instrumentality with respect to duties on textiles and textile products and on nonrubber footwear and may not decrease, or propose a decrease, in any such duty by any means, including an implementing bill under section 151 of the Trade Act of 1974 (19 U.S.C. 2191) or a proclamation.

SEC. 6 ANNUAL REPORT.

Not later than March 15, 1991, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this Act during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 4. All departments and agencies shall cooperate in preparation of this report, as requested by the President.

SEC. 7. REVIEW.

The Secretary of Commerce shall commence, ten years after the date of enactment of this Act, a review of the operation of this Act. The Secretary shall consult representatives of workers and companies in the textiles and textile products and nonrubber footwear industries, the United States Trade Representative, the Secretary of Labor, and other appropriate Government officials. Within 6 months after the commencement of the study, the Secretary shall submit to the Congress the findings of the Secretary.

SEC. 8. AUCTION OF IMPORT LICENSES.

(a) IMPORT LICENSES.—Notwithstanding any other provision of law, the Secretary of the Treasury shall establish and implement a pilot program for the issuance and sale to United States companies at public auction of import licenses applicable to categories of textiles and categories of textile products.

(b) IDENTIFICATION OF CATEGORIES SUBJECT TO LICENSES.—The categories of textiles, and the categories of textile products, to which the import licensing program under this section applies shall be selected by the Secretary of the Treasury, in consultation with the Secretary of Commerce. Such selection shall be made so that—

(1) the number of categories of textiles so selected shall, in the aggregate, account for the volume of imports equal to no less than 20 percent of the value of textiles entered; and

(2) the total number of categories of textile products so selected shall, in the aggre-

gate, account for the volume of imports equal to no less than 20 percent of the value of textile products entered.

(c) AUCTIONING OF IMPORT LICENSES.—

(1) Each import license to be issued and sold pursuant to this section shall be sold by the Secretary of the Treasury at a public auction held no earlier than 15 days after the date on which notice of such auction is published in the Federal Register.

(2) By on later than the date that is 60 days after the date of enactment of this Act, the Secretary of the Treasury shall prescribe regulations under which auctions shall be conducted under paragraph (1). Such regulations shall provide for—

(A) the auctioning of quotas, on a historical basis, among retailers, importers, and manufacturers of textiles and apparel;

(B) the transfer of auctioned import licenses among importers; and

(C) a means of ensuring that on person obtains undue market power in the markets of the United States through the use of auctioned import licenses.

(3) The Secretary of the Treasury is authorized to prescribe, on an expedited basis, such regulations supplementing the regulations prescribed under paragraph (2) as are necessary to address factors involved in conducting the sale by auction of import licenses for any article that are unique to such article.

(d) DEPOSIT OF REVENUES.—Any revenues from the sale of import licenses under this section shall be paid into the general fund of the Treasury of the United States.

(e) DURATION.—The import licensing program under this section shall begin on January 1, 1991, and end at the close of December 31, 1991.

(f) REPORT.—Not later than March 31, 1992, the Secretary of the Treasury, in consultation with the Secretary of Commerce, shall report to the Congress on the administration of the import licensing program under this section and the advantages and disadvantages of auctioning import licenses demonstrated by the program.

SEC. 9. DEFINITIONS.

For purposes of this Act—

(1) The term "textiles and textile products" includes, but is not limited to, all articles covered by a category.

(2) The term "nonrubber footwear" means nonrubber footwear articles classified under items 6401.92.30, 6401.99.80, 6402.11.00, 6402.19.10, 6402.30.30, 6402.91.40, 6402.99.05, 6402.99.10, 6402.99.15, 6404.11.20, 6404.19.15, 6404.19.25, 6404.19.30, 6404.20.20, 6404.20.40, 6403, 6405, 6406.10.05, 6406.10.10, 6406.10.20, and 6406.10.45 of the Harmonized Tariff Schedule of the United States (as in effect on January 1, 1990) and includes, but is not limited to, all articles covered by a footwear category.

(3) The term "category" means each of the following:

(A) each category identified by a three-digit number in the Department of Commerce publication entitled "Correlation: Textile and Apparel Categories with Harmonized Tariff Schedule of the United States", dated 1990, and in any amendments to such publication correcting clerical errors or omissions;

(B) each subdivision of a category described in subparagraph (A) with respect to which the United States has (i) an agreement with any country on the date of enactment of this Act limiting exports of textiles and textile products to the United States that includes a specific limit on such subdivision, or (ii) taken unilateral action to limit products from any country entered under such subdivision;

(C) a category consisting of the manmade fiber products not covered by a category described in subparagraph (A) and classified under chapters 54, 55, and 56 of the Harmonized Tariff Schedule of the United States; and

(D) a category consisting of the products not covered by a category described in subparagraph (A) and classified under items 6215.10.00.408 and 6117.20.00.405 of the Harmonized Tariff Schedule of the United States.

The Secretary of Commerce shall determine, after consultation with the United States Trade Representative and the United States International Trade Commission, whether comparable subdivisions described in subparagraph (B) are consistently defined; if the Secretary determines that such subdivisions are not consistently defined, then the Secretary shall prescribe by regulation an appropriate definition of the category covering such comparable subdivisions.

(4) The term "nonrubber footwear category" means each of the following:

(A) men's leather;
(B) men's vinyl/plastic;
(C) men's other;
(D) women's leather;
(E) women's vinyl/plastic;
(F) women's other;
(G) juvenile leather;
(H) juvenile vinyl/plastic;
(I) juvenile other;
(J) athletic leather;
(K) athletic vinyl/plastic;
(L) leather work footwear;
(M) vinyl/plastic work footwear;
(N) miscellaneous leather footwear;
(O) miscellaneous vinyl/plastic;
(P) miscellaneous other;
(Q) leather slippers;
(R) vinyl/plastic slippers; and
(S) other slippers.

(5) The term "high priced nonrubber footwear" means nonrubber footwear with a customs value of $2.50, or more, per pair.

(6) The term "country" means a foreign country, a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship, political entity, or foreign trade zone, whether affiliated with the United States or not, that is outside the customs territory of the United States.

(7) The term "duty" includes the rate and form of any import duty, including but not limited to tariff-rate quotas.

(8) The term "existing" means the nonpreferential rate of duty (however established, and even though temporarily suspended by Act of Congress or otherwise) set forth in the General subcolumn of rate of duty column 1 in chapters 1 through 96 of the Harmonized Tariff Schedule of the United States existing on the day before the date of enactment of this Act.

(9) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

SEC. 10. EFFECTIVE DATE.

(a) IN GENERAL.—Except as provided in subsection (b), the provisions of this Act shall apply to textiles and textile products and nonrubber footwear entered, or withdrawn from warehouse, for consumption on and after the date of enactment of this Act.

(b) CALENDAR YEARS 1990 AND 1991.—The Secretary of Commerce shall prescribe by regulation the aggregate quantity, if any, of textiles and textile products and of nonrubber footwear that may be entered under section 4(a) under each category and each nonrubber footwear category during the period beginning on the date of enactment of this Act and ending on December 31, 1990. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products or of nonrubber footwear entered under a category or nonrubber footwear category after December 31, 1989, and before the date of enactment of this Act exceeds the quantity permitted entry for such products under such category during calendar year 1990 under section 4(a), then the limit that would otherwise apply under section 4(b), in the case of textiles or textile products, or under section 4(a), in the case of nonrubber footwear, for such category for calendar year 1991 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 4(b), or section 4(a), as appropriate, for such category for calendar year 1991, then the limit for such category for calendar years after 1991 shall be reduced until such excess is accounted for.

The PRESIDING OFFICER (Mr. LIEBERMAN). The senior Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I rise today, along with Senator HOLLINGS and other Senators to introduce legislation that will significantly strengthen and promote enforcement of our textile and apparel trade laws and agreements. I am very pleased that this measure, the Textile, Apparel, and Footwear Trade Act of 1990, has already attracted strong bipartisan support. Many of my Senate colleagues have signified their dedication to the continuation of a viable American textile industry and are joining us today as original cosponsors of this important legislation. Identical legislation is also being introduced today in the House.

Mr. President, a viable textile and apparel industry is absolutely essential to the economy and national security of this Nation. While this industry has suffered many hardships and textile imports have increased dramatically, this industry still employs nearly 1.8 million Americans. Currently, one out of every seven people employed in South Carolina works in the textile and related industries.

If the current trend of increased imports continues, the resulting job losses will cause harsh economic problems to the people who depend on the textile and apparel industry for their livelihood. Over 350,000 jobs have been lost in the textile industry during the last 5 years. In South Carolina, since 1979 we have lost 40,000 jobs. Since the record employment level of 2.5 million employees in 1973, this industry has lost 700,000 jobs. According to the U.S. Department of Labor, South Carolina lost 2,600 textile jobs during 1989. This year is starting off with another drop in textile employment. Several companies have already announced that 700 South Carolinians

will soon lose their jobs. This trend cannot be allowed to continue. The decline of this industry will be felt throughout our economy as supporting and related industries also begin to suffer.

Those who lose their jobs will be forced to spend the years of savings they have accumulated, turn to unemployment compensation for subsistence, and search for employment in other industries where they most likely will not have the needed skills. This situation will be specially difficult for older textile workers who are close to retirement age.

In addition to its economic importance, the textile industry is also significant to the defense and national security of our Nation. We cannot allow ourselves to become dependent upon foreign countries for the basic defense requirements of our Armed Forces. While most people think of uniforms and footwear as textile industry products used by the military, many other needed products originate from this industry. Some of the other textile products the military uses are tents, canvas, ammunition powder bags, and parachutes. It does not make good sense to transfer production of these items to foreign countries and then rely on them in times of international crisis to provide us with these essential items.

Mr. President, the growth in textile and apparel imports during the last several years has not come about due to a lack of effort on the part of the domestic industry. In fact, the American textile and apparel industry is one of the most modern and productive in the world.

Management and labor have worked hard to modernize, compete, and survive. Nevertheless, imports have continued to grow. Textile and apparel imports now account for 59 percent of the U.S. market share. In 1989, 12.1 billion square meters of textiles and apparel were imported into the United States. This is a 13-percent increase from 1988 levels. Textile imports accounted for 21 percent of the merchandise trade deficit in 1989 and were valued at $26.5 billion. This is 5½ times the $4.7 billion value of the textile trade deficit in 1980.

The textile industry has continued to suffer from the increased imports because the American industry is not competing with foreign countries on an equal basis. If they did, then the U.S. textile and apparel industry could compete with that of any other nation. However, the domestic textile industry cannot be expected to compete, nor should it have to, with foreign industries that are heavily subsidized by their governments.

Developing countries have provided low interest, subsidized loans for capital formation and expansion within their textile and apparel sectors. Favorable tax treatment, as well as other incentives for exporting textile and apparel products, has been created by foreign countries. They have fostered and protected their own industries and markets through currency manipulation and trade restrictions.

Another factor with which the American companies cannot compete is the relative wage rate. China is reportedly paying very low wages to the textile workers there.

Wage rates in most major textile and apparel exporting countries are still far below the American minimum wage rates.

Furthermore, many foreign textile and apparel businesses operate free of the health and environmental regulations that we believe essential to the protection of our workers and environment. These costs are not incurred by foreign manufacturers.

Mr. President, the legislation we are introducing today is designed to promote orderly growth of world trade in textiles and apparel products. This would be accomplished by establishing import growth rates. Under the provisions of this bill, 1990 textile and apparel imports will be based on 1989 imports. During 1990, imports will be allowed to increase 1 percent over the level imported last year. For subsequent years, textile and apparel imports will be allowed to increase by no more than 1 percent over the preceding year.

In regard to quotas, they are established on each category of textiles and textile products from all sources. Therefore, this legislation does not discriminate against any one country. Establishment of global quotas gives the administration maximum flexibility in implementing the requirements of this legislation.

This bill also includes several other important features. This legislation does not mandate rollbacks and can be implemented without rollbacks of current import levels. The President may grant compensation in the form of reduced tariffs to foreign countries as a result of the import limits. However, the President cannot reduce the tariff rate by more than 10 percent of its current level and any reduction must be staged equally over 5 years.

Additionally, the Secretary of Commerce will be responsible for issuing regulations governing the entry of textile and apparel imports, including regulations requiring reasonable spacing of imports during each year. After 10 years, the Secretary will be required to review the impact of this legislation and report the findings to Congress.

This legislation is also consistent with the General Agreement on Tariffs and Trade article XIX, since it includes a congressional finding of injury to the domestic industry, global quotas and authorization to negotiate compensation.

Mr. President, this bill is the result of a cooperative effort on the part of the textile and apparel industry, Members of Congress, and others concerned about the continuation of a viable domestic textile and apparel industry and shoe industry. I believe the Textile, Apparel, and Footwear Trade Act of 1990 is a sound measure that will ensure strict enforcement of our existing laws and agreements.

It is evident that the textile and apparel import deficit problem will not solve itself. Unless we take prompt action, it is possible that within 10 years we may not have a domestic textile and apparel industry.

I strongly urge my colleagues give this measure their most careful consideration and to join in working toward its swift enactment.

Mr. THURMOND. I yield to the Senator from North Carolina.

Mr. HELMS. Mr. President, I am going to seek the floor in my own right, particularly on a vital piece of legislation like this. Both of the Senators from South Carolina have alluded to a key point: The need to establish a level field for our textile industry. Let me read just an excerpt or so, if I may, I say to the Senator, from the Journal of Commerce. Two stories, Mr. President.

The first is dateline Hong Kong.

The battered textile industry in Taiwan is getting a substantial boost from the government in a bid to recover lost export ground. * * * Labor costs in Taiwan rose 21% in the 12 months between the spring of 1988 and the spring of 1989 to US$3.56 an hour.

South Korea's costs rose 25%, but were still lower at US$2.87. Hong Kong's 11% increase put its average hourly cost at US$2.44. The study shows U.S. industry costs at US$9.71 an hour.

It goes on and on, telling how the Government is propping up the textile industry in Taiwan. So much for Taiwan.

China—and bear in mind they use slave labor in China to manufacture textiles that are coming into this country to compete with our textile mills. Dateline Hong Kong, again, and the headline on this is "China To Boost Funds for Textile Mills."

State-owned textile factories in China will be given top priority for funds and raw materials next year, and are being urged to redouble their export efforts, a government minister said. * * *

Textiles and garments are China's No. 1 foreign exchange earner, accounting for about one-fourth of all exports. The United States is the biggest single customer.

Mr. President, these are just highlights. I am going to ask unanimous consent in a moment that the entirety of both these articles be printed in the RECORD.

It goes on to quote the Chinese Textile Minister:

Ms. Wu promised state companies, which she described as the backbone of the indus-

try, preferential treatment in allocation of quotas, yarns and cloth and capital.

All that Senator HOLLINGS has said, all that Senator THURMOND has said, all that this Senator has said, all that the other 52 cosponsors of this bill have said is, let us have a level playing field for the workers of the United States. I commend the two Senators on the remarks they have made, and I thank the Senator for yielding.

Mr. THURMOND. Mr. President, I say to my colleague that textiles rank second to steel in importance to our national defense. We cannot take the chance of having our textile mills closed. If an emergency or war came, where would we be? We cannot depend on foreign countries to supply these necessary items. We need these industries here at home producing these goods. It is highly important we do that.

It is just not fair. It is not fair to the workers of this country to have foreign governments subsidize their industry to come here and compete, and especially when they pay very low wages, below minimum wages in most cases. So I say this bill is needed. It has been needed for a number of years.

We are just asking the Congress to pass a bill to put us on a level playing field with foreign countries. This bill allows the import markets to grow by 1 percent per year. That is what this bill calls for. What is wrong with that? What is unfair about that? The workers of this country are entitled to a level playing field. They do not have it now. I hope this bill will provide it, and I hope the Congress will pass this legislation.

Mr. HELMS. Mr. President, I ask unanimous consent that the articles from the Journal of Commerce be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Journal of Commerce, Dec. 22, 1989]

TAIWAN TO AID MODERNIZATION OF AILING TEXTILE INDUSTRY

(By P.T. Bangsberg)

HONG KONG.—The battered textile industry in Taiwan is getting a substantial boost from the government in a bid to recover lost export ground.

Taiwan's rag trade is suffering, along with other industries, from high wages and a strong currency. These factors are making products less competitive on world markets.

The government's Industrial Development Bureau intends to allocate NT$2.5 billion (US$100 million) in a five-year project to upgrade design and production technology.

Its hope is to boost exports to US$20 billion a year by the turn of the century, roughly double the current level.

A recent study by New York-based management consultancy Werner International said textile labor costs in Taiwan rose 21% in the 12 months between the spring of 1988 and the spring of 1989 to US$3.56 an hour. South Korea's costs rose 25%, but were still lower at US$2.87. Hong Kong's 11% increase put its average hourly cost at US$2.44. The study shows U.S. industry costs at US$9.71 an hour.

Textiles and garments in Taiwan rank second after electronics as an export-earner, accounting for 17.5% of all overseas sales. The United States is the largest single market.

Officials in Raipei said the money also will be used to improve the local investment climate and to help some 250 firms train about 1,000 employees in the use of new technology for the industry.

Shipments of garments and textiles to the United States and most of Western Europe are constrained by quotas.

Hong Kong and other big textile producers have sought to offset this disadvantage by moving up-market to high value-added products, adopting more automation to cut staff costs and setting up manufacturing offshore.

Taiwan's industry now appears to be adopting a similar strategy. The development agency laid stress on the need to create better-quality and more-fashionable designs and to devote more resources to research and development.

Some Taiwanese textile companies already have moved to Thailand and the Philippines, where costs are considerably lower and quotas more liberal because of these nations' less-developed status.

Others opted for China, a strong competitor, where costs are even lower.

[From the Journal of Commerce, Dec. 22, 1989]

CHINA TO BOOST FUNDS FOR TEXTILE MILLS

HONG KONG.—State-owned textile factories in China will be given top priority for funds and raw materials next year, and are being urged to redouble their export efforts, a government minister said.

Plans also include the export of more than finished garments, knitwear and decorative fabrics, Textile Minister Wu Wenying told an industry meeting this week in Beijing.

Textiles and garments are China's No. 1 foreign exchange earner, accounting for about one-fourth of all exports. The United States is the biggest single customer.

Ms. Wu called on companies to explore new overseas markets as a way to increase exports in the face of quotas in much of the developed world and stiffer competition from other suppliers.

With about 70% of the wool China uses being imported, "Expansion of exports has become urgent to make the industry balance foreign exchange expenditure with income," she said.

The minister also repeated an earlier suggestion that domestic demand won't grow greatly next year over this, meaning that more products will be available for export.

Ms. Wu promised state companies, which she described as the backbone of the industry, preferential treatment in allocation of quotas, yarns and cloth and capital. In return, she called for better quality control.

Imports of all kinds are becoming a headache for China, which faces hefty debt repayments in the next decade. Tighter controls have been put on a number of industrial imports and tariffs raised on others.

Ms. Wu acknowledged that raw materials will remain in short supply.

To overcome this, she urged coastal regions to form cooperative ventures using imported goods to make finished products, rather than exporting raw materials. The latter, of course, is easier and quicker since no processing is involved.

It theoretically also should make quality less of a problem, though Hong Kong buyers have recently complained about the standards of cloth and yarn from Shanghai and other centers.

Mr. SANFORD. Mr. President, as a representative of the more than 350,000 textile and apparel workers in North Carolina, I take great pride in the introduction today of the Textile, Apparel and Footwear Trade Act of 1990. I thank my colleague, Senator HOLLINGS, for his leadership on this issue and pledge to him and the textile and apparel workers in North Carolina that I will do all that I can to see that we finally get enacted a long overdue worldwide quota system for textiles and apparel.

North Carolina is the largest fiber, textile, and apparel State in the country. We are proud of our record, proud of this industry and determined to enact legislation that establishes a fair trade policy for this essential segment of our economy.

A compelling case for a textile bill was made long ago, but the legislation passed by the Congress in 1987 suffered an untimely death at the hands of President Reagan. We were told then that we didn't need a textile bill, that imports were declining, that the administration's policy of negotiated bilateral agreements would solve everything.

Nothing could be further from the truth. Textile and apparel imports last year reached an all time high. The current level of imports of textiles and textile products from all sources, more than 165 countries, reached nearly 12.1 billion square meter equivalents in 1989, an increase of 13 percent over 1988 imports. This level of imports is 3 times the level of imports in 1980. If our current textile policy was truly effective, we would never see that level of import growth in an area in which the demand in this country for textiles and apparel has been growing at only 1 percent per year.

Indeed, it was in 1980, when he was running for President, that Ronald Reagan promised the 2.2 million textile and apparel workers of this country that if elected, he would restrict the amount of growth in textile and apparel imports to the amount of growth in the domestic market for these products. Despite that promise and repeated assurances made since then, textile and apparel imports have soared, while the domestic demand has remained stable at a 1-percent growth level.

Textiles and apparel now account for almost one-quarter of this country's entire trade deficit. Since 1980, imports have virtually doubled their stake in the apparel and apparel fabric market, as they hold over 55 percent

of a market in which they controlled only 28 percent just 8 years ago. We now import $2.3 billion more in textiles and apparel than we export, despite the heroic achievement of American textile makers, now the most efficient in the world. Indeed, rather than sit back and watch this tide of imports from low-wage or managed trade countries wash over them, our textile and apparel industry invested over $19 billion in new capital spending to modernize their plants. Our industry now has the lowest work time per product of any country in the world.

This flood of imports effects much more than just the textile and apparel plants in my State. It effects our entire Nation—from cotton and wool producers to footwear makers; 8 out of every 10 bales of cotton contained in imported textiles and clothing are foreign grown cotton; import penetration in the domestic wool textile and clothing market is nearly 70 percent, to the tremendous detriment of our wool growers. The picture of our footwear industry is even bleaker. Import penetration has risen from 51 percent in 1981 to 80 percent in 1989. As a direct result of these imports, domestic nonrubber footwear production has declined, reaching a level matched only during the Great Depression in the 1930's.

We cannot let this invasion of foreign textiles continue, as this industry is far too vital to the American economy. With 2.2 million workers, the U.S. textile and apparel industry has more employees than our steel and auto industries combined, and serves as America's largest manufacturing employer of women and minorities.

Contrary to what many opponents would say, this legislation does not cut back textile imports, nor does it ignore certain key trading partners. Rather than cut imports, it slows their expansion to 1 percent per year—the historic growth rate of the U.S. market. This is only fair. It gives imports the right to grow only as fast as the domestic market has typically grown—not the right to capture an ever increasing share of our market at the direct expense of the U.S. textile and apparel workers.

Moreover, it recognizes the special trading relationship that we have with Canada, Israel, and the countries of the Caribbean Basin. It exempts Canada and Israel, with whom we have free trade agreements from the bill, and guarantees the CBI countries a minimum of their current 11-percent market share.

The bill also gives our textile and apparel workers the right to a level playing field. Throughout the world, many of the governments of the major textile exporters assist their textile and apparel industries through subsidies and trade policies to protect these industries from imports. Just last year, for example, the Government of Taiwan announced a $100 million 5-year project to upgrade its textile industry. The stated goal of this government subsidy is to increase exports to the United States to $20 billion. The U.S. industry should not be expected to compete with subsidized industries throughout the world. We must enact a new textile policy that gives them a fair opportunity to compete.

We do need a textile bill and we need it now. The Reagan-Bush administration broke its promise to the textile and apparel workers of this country. It is time we kept that promise.

TEXTILE, APPAREL, AND FOOTWEAR ACT OF 1990

Mr. COHEN. Mr. President, I rise today to join in introducing the Textile, Apparel, and Footwear Act of 1990. Its purpose is to protect the U.S. textile and footwear industries from further decimation and job losses caused by unfair foreign competition. The bill seeks to achieve this goal through the imposition of global quotas on textile and footwear imports. As a cochairman of the Senate Footwear Caucus, I am sure that this legislation will provide necessary and important relief for the beleaguered U.S. footwear and textile industries.

The evidence is clear—the U.S. textile and footwear industries are under siege by foreign competitors. Since 1980, the U.S. trade deficit for the textile and apparel industries surged from $4.6 to $26.5 billion—a nearly sixfold increase. Likewise, by 1989, import penetration of the domestic nonrubber footwear market reached an incredible 80 percent. These industries are not suffering because they lack skilled workers, modern technology, or the business savvy to compete internationally. Plants are closing and men and women are losing their jobs because the United States has for too long tolerated textile and footwear imports from countries who do not reciprocate our open market policies or who seek to gain an unfair advantage through excessively low wages.

All things being equal, U.S. companies can compete against any others in the world. But things are not equal. The U.S. footwear and textile industries are at a distinct competitive disadvantage with respect to their foreign competitors. The Pacific Rim countries who dump billions of dollars worth of footwear and textile goods every year into the U.S. market are the very ones who routinely close their doors to U.S. companies hoping to make a sale overseas. I constantly hear horror stories from sophisticated, forward thinking companies who are unable to penetrate foreign markets, not through poor planning or inadequate market research, but as a result of artificial barriers deliberately erected by protective governments. For instance, while the Maine shoe industry was being decimated by cheap imports, a small, innovative manufacturer of slipper socks in Lewiston, ME, was holding a sizeable order from a major Japanese department store. Yet, neither the manufacturer, nor I, nor the Japanese buyer could convince the Japanese Government to grant an import license for the items. Needless to say, it is time for the United States to stand up for its industries and demand a level playing field.

The devastating effects caused by the avalanche of footwear and textile imports have been especially acute in Maine. Since 1980, over 7,000 Maine shoe workers have lost their jobs and over 30 plants have been forced to shut their doors. Likewise, the dramatic increase in textile and apparel imports has caused intolerable market disruption, numerous plant closings, and thousands of job losses since 1980—all this despite significant capital improvements to the plants. Currently, there are about 15,000 Maine people directly employed by the footwear and textile industries whose jobs are in jeopardy if reasonable limits on imports are not imposed.

The domestic textile and footwear industries cannot be blamed for losing market share to foreign competitors which are subsidized by their governments and which pay their workers only a fraction of the prevailing U.S. wages. During my tenure in Congress, I have had innumerable conversations with shoe and textile workers in Maine, and it's clear to me that the only thing that these men and women want is the opportunity to make shoes, sweaters, coats, and blankets free from unfair foreign competition. They ask for nothing more—they deserve nothing less.

The legislation we introduce today is an important step in protecting the U.S. industries from suffering further damage from the onslaught of unfair foreign competition. It is not intended to undermine the spirit of free trade, but to demand the practice or reciprocal trade. The United States must demand that its trade policies be reciprocated by our trading partners. The United States cannot afford to open its doors wide in the name of free trade while our foreign competitors slam the door in our face whenever it suits their economic interests.

Mr. President, we must commit ourselves to the development and implementation of rational controls over our economic borders which will provide our domestic industries a fair opportunity to compete. This legislation is an important step in assuring our textile and footwear industries a brighter future, and I urge my colleagues to join in supporting the measure.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

The Chair recognizes the Senator from Alaska [Mr. MURKOWSKI].

Mr. MURKOWSKI. Mr. President, I ask unanimous consent to proceed for 5 minutes as in morning business.

Mr. WARNER. Mr. President, reserving the right to object, and I certainly will not object, because I will be participating with the floor managers on the Executive Calendar momentarily. I just wonder if the Senator from Alaska will allow this Senator to speak for 10 seconds with respect to the comments made by my distinguished colleagues regarding the textile bill.

Mr. MURKOWSKI. I will be happy to do so.

Mr. WARNER. I myself, with the distinguished Senators, have been working on this legislation for years. I stop and think about how proud Americans wear the label "Made in America." That means the hands of Americans, from the textile mills through the finishing plants, have fabricated these garments. I think that Americans join with us in this effort to preserve this industry, which has been with us since the very first days when the Pilgrims landed in the United States.

I thank the Chair.

EXTENSION OF MORNING BUSINESS

The PRESIDING OFFICER. Without objection, the time for morning business is extended for 5 minutes. The Senator from Alaska is recognized to speak for that period of time.

LITHUANIAN SELF-DETERMINATION

Mr. MURKOWSKI. Mr. President, on March 2 the Senate unanimously agreed to a resolution calling on our President to take all appropriate and feasible steps to support Lithuanian self-determination and also to urge that the Soviet Union refrain from exercising political, economic, and military pressure on Lithuania. We will recall, Mr. President, that that resolution passed 93 to 0.

Mr. President, we stand by the people of Lithuania and their desire for independence. The United States has never recognized the 1940 Soviet annexation of Lithuania.

Last week, I had the opportunity to visit the Soviet Embassy and expressed these sentiments to the Soviet Ambassador. I made clear to him my conviction that the only way the current crisis can be resolved is through peaceful negotiation. Soviet military pressure, such as the seizure of the four young men and others from the military hospitals last Tuesday, serves no constructive purpose in the current atmosphere.

Mr. President, one of our own members, Senator D'AMATO from New York, is leaving this evening to attempt to visit Lithuania. I think it is fair that we recognize the significance of the longstanding U.S. congressional support for Lithuanian self-determination and it is important that Congress be able to observe firsthand the developments that are occurring in Lithuania at this crucial time.

Our diplomats have been expelled; the Polish-Lithuanian border has been closed. As a consequence of efforts made by Senator D'AMATO and his office, invitations were extended by the Government of Lithuania to visit that country. I had the opportunity and pleasure of receiving one of those invitations as well as Senator D'AMATO.

Mr. President, it is interesting to note that on approximately April 2, a written invitation was received by both Senator D'AMATO and myself from the President of Lithuania, President Landsbergis. On April 2, Monday, visas were issued by the Government of Lithuania to Senator D'AMATO and myself. I noted that I had visa No. 4.

The difficulty, Mr. President, is that the Soviets closed the border into Lithuania from Poland early last week and as a consequence my office has been advised by the Soviet Embassy it is very unlikely the Soviets will issue visas to either one of us. I checked as early as 9 this morning with the Soviet Embassy and our calls have not been returned. My personal observation was that it was very unlikely that the visas would be granted.

As a consequence, I have decided not to make the attempt to travel to Lithuania at this time. But I think it is noteworthy that, indeed, Senator D'AMATO will be leaving tonight. He will be met in Warsaw by a representative of the Lithuanian Government. They will drive some 200 miles from Warsaw to the Lithuanian border and an attempt will be made to utilize a Lithuanian visa to enter that country.

Mr. President, one would wonder the merits of the pace at which a resolution of the Lithuanian situation might occur. I participated in a press conference with my colleague, Senator D'AMATO, last week. Senator D'AMATO expressed the best answer to the question, "Why now?" It is simply, "Why not now"—best expressed by Lech Walesa as he reflected his moments of anguish during the time that he provided the leadership to Solidarity in Poland. This was expressed in his speech at a joint meeting of Congress on November 15, where he reflected that 9 years ago in August 1980, there began the emergence of self-determination in Poland. The statement was that the people felt so strongly, they were jumping at the fences, they were tearing down the walls and they were doing it because freedom is a human right. He also expressed that in those days, in the beginning, there were warnings, there were admonitions and even condemnations: What were the Poles up to? Were they mad? Were they jeopardizing world peace and European stability? They ought to stay quiet.

Mr. President, we know the outcome of the Solidarity movement in Poland, and I think that spirit is evidenced by Senator D'AMATO's commitment to proceed. The Soviets may turn back Senator D'AMATO and his colleagues from Lithuania at the border. But his journey reflects the commitment of what our democracy is all about, the reality that we shall not succomb to restrictions at borders when it is the spirit of democracy that inspires what we are doing and when what we are doing is right and what the people of Eastern Europe are striving for. What they are striving for is an open society and the freedoms that we enjoy in the West.

It is my sincere hope that Senator D'AMATO's trip is successful and in the spirit of the resolution passed by the Senate, that his is indeed a worthwhile mission. Senator D'AMATO will carry my personal expression of support to the Lithuanians, and it is my hope that the mission will be fruitful. As soon as the Soviet Union issues me a visa, I intend to accept the invitation of the President of Lithuania to visit that country. We look forward to hearing from our colleagues upon his return.

I thank the Chair. I thank my colleagues for the additional time allowance given to me.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,845th day that Terry Anderson has been held in captivity in Beirut.

UNITED NATIONS CONVENTION ON THE CHILD

Mr. MOYNIHAN. Mr. President, today I join as a cosponsor of Senate Resolution 231 offered by Senator BRADLEY concerning the United Nations Convention on the Rights of the Child. The resolution calls upon the administration to seek the advice and consent of the Senate concerning ratification of the convention. The United States supported this convention at the United Nations, but the administration has not submitted it to the Senate.

The convention addresses a matter of great import. Around the world children are subject to exploitation

and abuse. It is fitting that the United Nations has attempted to establish universal standards prohibiting such abuse. This is an issue on which we should all be able to agree. Indeed. I understand that the convention was adopted unanimously in the General Assembly last November.

Mr. President, I know that the convention covers a broad array of topics. It will require close scrutiny. The rights of children are already addressed by a large number of Federal and State statutes and we must analyze the extent to which they may differ from the provisions of the convention. We must also assure ourselves that the Senate agrees with the full range of protections offered by the convention, for once ratified, the convention will become, under the Constitution, the supreme law of the land. However, this process of evaluation cannot begin until the administration seeks the advice of the Senate.

SENATE CONCURRENT RESOLUTION 106—RELATIVE TO JERUSALEM

Mr. SHELBY. Mr. President, I rise today to express my strong support for Senate Concurrent Resolution 106 which the Senate agreed to by voice vote on March 22. This concurrent resolution expressed the sense of the Congress in acknowledging Jerusalem as the eternal capital of the State of Israel. The measure further stated that the Congress strongly believes that Jerusalem must remain an undivided city in which the rights of every ethnic religious group are protected.

The issue of Jerusalem has come to the forefront as the result of remarks concerning Israeli settlements in Jerusalem by President Bush during a recent press conference. It is my understanding that the President has now made it absolutely clear that the administration's longstanding policy on Jerusalem has not been altered.

However, I believe that it was necessary for Congress to reaffirm its view on Jerusalem. We have taken that step through the unanimous adoption of this measure. I only regret that I was not able to add my name as a cosponsor of Senate Concurrent Resolution 106. The quick adoption of this resolution, while serving as a forceful affirmation of Congress' support of Jerusalem as the eternal capital of Israel, did not allow for all Senators who have consistently endorsed this policy to become part of the process.

Mr. President, the importance of the city of Jerusalem to the major religions of the world cannot be overstated. However, it was only through the reunification of Jerusalem in 1967 that the sites sacred to Judaism, Christianity, and Islam have been protected and open to all. Clarification of United States policy on a United Jerusalem, serving as the eternal capital of Israel, was necessary. The Senate took this step through the unanimous adoption of Senate Concurrent Resolution 106.

CLEAN AIR ACT AMENDMENTS OF 1989

Mr. HEFLIN. Mr. President, as we continue the debate on S. 1630, I would like to turn the focus toward rural America. The impact which this legislation may have on farmers and some agribusinesses who rely on the use of certain chemicals and practices is of great concern to me. I am referring mainly to the air toxics and nonattainment provisions in the bill. For example, it is important that EPA concentrate its regulatory efforts on those situations that post a real problem and avoid imposing any unwarranted and costly burdens on our Nation's farmers. EPA should carefully determine whether and to what extent agricultural chemicals are creating a problem and avoid imposing any unnecessary regulations.

I understand that in making regulatory determinations under the new urban and area source provisions of section 112 and the provisions relating to ozone precursors from consumer products, that pesticide applications may come under EPA review and regulation. If or when this occurs, the resulting regulations should take into consideration the benefits of agricultural pesticide applications. And where the law allows the cost of controls to be considered, any loss in benefits associated with restrictions on pesticide use should be considered.

Furthermore, only those pesticide emissions contributing directly and significantly to either the urban ozone or urban air toxics problem should be regulated. Moreover, credit should be given for previous reductions in levels. And since the use of agricultural chemicals is regulated by EPA under the authority of FIFRA the office of pesticide programs should be directly involved In the development by EPA of any regulations of air emissions from the use of agricultural chemicals.

I am especially concerned about the impact of the bill on cottonseed crushing and cotton ginning operations. For example, when EPA begins to develop control technique guidelines pursuant to the PM-10 provision it should take into account the unique difficulties of regulating fugitive emissions from agricultural production practices. It should also identify reasonably available control measures that do not unduly burden agricultural producers and regulate only those agricultural production practices that have a direct impact upon PM-10 emissions in nonattainment areas. Future restrictions must serve long-term goals and be technologically and economically feasible. They should not become obsolete in the short-term. No industry can afford to spend millions of dollars on controls and then be required to replace them again with the latest technology.

Furthermore, though the bill language recognizes the differences between new and existing facilities, when regulations are written they should reflect the differences between types of production processes, technical differences, and the cost of controls. This is essential since facilities, such as cotton gins and cottonseed crushing operations, vary widely among themselves in terms of age and production practices.

It is also important to recognize that assessing risk is an inexact, and changing, science. In today's world, the ability of science to detect potential hazardous chemicals has vastly outstripped its ability to evaluate the risk of these chemicals. We must continue, however, to find the correct balance between risk and regulation. We must combine quantitative risk assessment with other scientific knowledge such as metabolism, and pharmacokinetic behavior of the toxic agent in order to define residual and unreasonable risk. The analysis should include the most appropriate science and risk models and leave the final determination to the scientists who have the background and expertise in that field.

In summary, let us proceed deliberately but cautiously with whatever we do here today so that a reasonable approach is taken. I am not suggesting that we do not regulate agricultural, cottonseed crushing, and ginning operations to the extent that they reasonably need to be regulated. However, it is my hope that we take a realistic and responsible approach to these very complex issues which affect our Nation's farmers, agricultural businesses, and the air we breathe.

DR. CLOTILDE P. GARCIA TO BE AWARDED SPAIN'S QUEEN ISABELLA MEDAL OF MERIT

Mr. BENTSEN. Mr. President, on May 16, 1990, Dr. Clotilde P. Garcia of Corpus Christi, TX, will be awarded Spain's Queen Isabella Medal of Merit. The award will be presented by His Majesty the King Juan Carlos I of Spain at the Texas Gala Historical Reception in her honor. I rise today to congratulate Dr. Garcia, and to add my voice to the list of those celebrating her achievements.

Dr. Garcia has enriched the lives of the people of Nueces County in countless ways. She is a physician and surgeon, and has devoted substantial efforts to helping the poor and disadvantaged. She is an educator, who served as a regent board member of Del Mar College for 21 years, and

founded a program to help in the education of underprivileged children. And Dr. Garcia is a historian, founder of the Spanish American Genealogical Association and rediscoverer of Texas' "Last Frontier Spanish Colonial Genealogy and History."

In 1984, Dr. Garcia's accomplishments were acknowledged when she was named to the first Texas Women's Hall of Fame. I am pleased to see that this great Texan is so obviously worthy of recognition that other nations would honor her, as well. I know my Senate colleagues join me in recognizing her on this special occasion and in sending our regards to her and her many friends who will gather in Corpus Christi for this memorable event.

IN HONOR OF S. DOUGLASS CATER

Mr. WIRTH. Mr. President, Doug Cater recently announced his resignation after 8 years as the distinguished and extremely successful president of Washington College. It has been a labor of love, to prove that a small college of excellence can survive—and he did it. While the citizens of Maryland thank him, so do all of us who believe that one of our country's greatest strengths is our diverse system of higher education.

Defying the odds, Doug Cater has redone this splendid little institution, the 10th oldest college in the country, with a revamped campus, a renewed board of directors, a bank account enriched by $43 million, and most important, a recommitted sense of pride and mission for the importance of education for our Democracy.

Mr. President, following are a few of the tributes written to the service and dedication of Doug and Libby Cater which I ask be printed in the RECORD. I am proud of the job they have done, and proud to call them friends.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Evening Sun]

CATER'S LEGACY

Washington College was completing two proud centuries as a small liberal arts college on Maryland's Eastern Shore when Douglass Cater came there as president in 1982, but the future was not bright. In seven years, $41 million was raised, declining enrollment was reversed and Washington College now has a secure place in the state's pantheon of higher education—thanks largely to Cater's tireless efforts even at a time when he was often beset by health problems.

But in focusing on Cater's service to Washington College we should not forget his even larger role in national education policy, which is substantial and lasting. It was 25 years ago this year that Cater went to the White House as President Lyndon Johnson's education adviser; in that role he shaped and guided major federal involvement in higher education. As one of the chief architects of the National Defense Education Act which extended federal loans and grants to all promising high school graduates, he prepared all colleges—private and public alike—for the coming wave of baby boomers to get a decent education.

That is indeed a remarkable success story, but now small colleges like Washington are confronting a wholly different problem: Having geared up for increased enrollments, having met the baby boom challenge superbly, they confront declining enrollments for most of the decade to come.

Survival of these colleges will depend upon whether we can fashion sound educational policies at all governmental levels and sound administration at the local college level. In a life devoted to education, Douglass Cater showed us that we can do both. This example will stand like a lighthouse in the stormy weather to come for higher education in America.

CATER ESTABLISHED BASIS FOR REALIZING VISIONS

Whether you love him or hate him—and unless you're brain dead, you have a definite opinion about him—there's no denying that Douglass Cater has Done Great Things for Washington College.

What Cater found in 1982 was a small, independent, institution struggling to stay small and independent, lacking in a number of basic elements necessary for survivial. Underenrolled, financially unstable, apparently stagnant, this school had but a leg to stand on.

OK, OK, you say, Cater raised a lot of money for Washington College. Big deal.

It's more than money. It's ideas. By raising the College's profile, finances, enrollment, and credibility, Douglass Cater has returned the ability to imagine great things to the College community; arguably, you and I would never have known nor cared about Washington College if not for the high visibility he brought to this school.

Indeed, Cater has pursued his own visions for Washington College with great passion, and several of his expectations have been realized. He has implemented innovated curricular programs such as the Freshman Common Seminar and the President's Forum, and honors seminar courses. The sophomore writing obligation he instituted has not been an overall success, but now has been revamped into a more workable format. Additionally, faculty salaries have improved, and the College is attracting students of high academic profiles.

Perhaps the most controversial of his visions is the Master Plan, the project he has fought hard to see to its completion. It looks as if it's finally coming together.

The buildings that constitute the Master Plan will certainly stand as a Cater legacy, tangible representations of his accomplishments from 1982-1990.

For years, however, certain members of the College community—be they in the minority or otherwise—have damned the Master Plan, especially since construction began on the Casey Academic Resources Center. No one seems to know exactly what it's for, other than to provide a formal entrance to the College.

Opponents of the Plan say that pretty landscaping and big, impressive buildings have taken precedence over academics.

This may be true. Seniors in the upper academic echelons of their high schools want to come to Washington College; are our academics challenging enough to meet the rising standards of incoming freshmen?

We will soon enter a new era, and it's time to decide where we're headed. A search committee is in the works to attract candidates for president, and that committee will include student representatives, which by no means implies that two students should make such an important decision for the entire student body.

It is every student's obligation to voice his or her notions of who our next president should be: do we need another Douglass Cater or is it time to shift priorities? At any rate, Cater has laid down superb groundwork for realizing whatever visions are in store for Washington College.

DOUGLASS CATER AND WASHINGTON COLLEGE

(By H. Hurtt Deringer)

I am become a name,
For always rooming with a hungry heart
Much have I seen and known, cities of man
And manners, climates, councils, governments,
Myself not least, but honored of them all,—
—Ulysses Tennyson.

Seven times a week I walk by the calming influcence of the Hynson-Ringgold House.

Douglass Cater, the man who resides there, is stepping down as the president of Washington College.

Monday marked the beginning of the 1989-90 academic year. It was tinely and with an appropriate touch of drama, that the note came that Douglass Cater would retire at the conclusion of the academic year.

The Caters—Libby and Douglass—bring a unique style to the Hynson-Ringgold House and Washington College. It is an exciting, colorful style sparked by Libby Cater and steered by Douglass Cater—flowered with interesting people and events.

To Washington College, they bring renewed vigor for growth, coupled with the preservation of the idea of a small college.

I presonally am sad to see the end of the Cater era at Washington College. He was a journalist at heart, relished the role of editor and knew the pressure of deadlines. I greatly appreciate his openess and fairness toward me and this newspaper.

Objectively, it was time for him to go. Although a Douglass Cater at 50 percent is the equivalent of many, many men at full throttle—the "bourne of Time and Place" was taking its toll.

Here was a man who at 20 was a member of the OSS in World War II. At 27 he was Washington editor of The Reporter and at 41 special assistant to the President of the United States, Lyndon Baines Johnson.

At 45 he was a visiting scholar at the Brookings Institute and at 47 he was setting up the programs for the Aspen Institute. At 53 he was vice chairman of The Observer, London's oldest weekly newspaper.

On February 21, 1982 he was named the 23rd President of Washington College. His inauguration took place on October 16, 1982.

He leaves with Washington College at an exciting juncture in its long history—an ambitious master plan to enhance the campus and its buildings, to provide more student scholarships and financial aid and to increase faculty salaries.

The ceiling on full-time enrollement, the college says, is just under 850. Let this be true.

This is all-important. Those were not idle words that Felix Morley said to president Daniel Z. Gibson at his inauguration 38 years ago. Douglass Cater chose to repeat them at his inauguration seven years ago:

"It is your amusing opportunity to make a small college great by keeping it small. In doing so you will be swimming upstream. You will have to struggle against the trend of the times. Fortunately, on the Eastern Shore, that is not so difficult . . . Shoremen are conscious that the tide flows in, as well as out. Here, at Washington College, I think that one might work back to the wellsprings of our greatness as a people. Let the big universities train the atomic scientists and develop technicians for the alphabetical agencies. The role of the small college is re-discovery. Its course is upstream—toward the source."

Louis L. Goldstein, chairman of the Visitors and Governors, has announced that David T. McLaughlin, Washington College trustee and former president of Dartmouth College, will chair the search committee. Another excellent choice is that of W. Jackson Stenger, alummus, former trustee and Kent County native, as executive secretary.

The committee will be comprised of administrators, faculty, student leaders and alumni.

It is very important that the committee be aware of the close ties of Washington College with the concerns of the Chestertown and Kent County communities. The concerns of those communities—civically, socially, economically and politically—need to be represented in the search for a new president.

Why? Because more than any other institution in Kent County, Washington College represents a guiding force for the ideals of a civilized society.

The president of Washington College is more than a college president. That individual represents not only a person to look up to, to a person "running a college," but he or she has a greater role.

In flush times and in bad times—that human being represents a wise and sensitive individual also concerned with our democratic ideals and our world.

S. 1630, CLEAN AIR ACT AMENDMENTS OF 1989

Mr. SANFORD. Mr. President, last night was an historic occasion for the U.S. Senate. By a vote of 89 to 11, the Senate passed the first comprehensive revision of the Clean Air Act by this body in 13 years. To say that this has been a long, arduous process would be a great understatement. There has been a tremendous amount of work on this legislation by the Environment Committee, the leadership, and many other Senators. S. 1630 may not be a perfect bill, but it is a very good bill, and I believe the final vote reflects that.

There is no question, Mr. President, that a substantial strengthening and rewriting of the Clean Air Act is long overdue. We have known for many years that the current clean air statute simply was not getting the job done. It is true that we have made some progress since 1970 in cleaning up our air. Lead emissions have been reduced by over 90 percent. Smaller reductions have occurred in emissions of the sulfur and nitrogen oxides that contribute to acid precipitation; the volatile organic compounds that contribute to urban smog; and other pollutants. But we are nowhere near where we ought to be. S. 1630, for the most part, will make sure we get there.

Mr. President, our cities were supposed to be in compliance with health-based standards for pollutants like ozone and carbon monoxide over a decade ago, under the Clean Air Act of 1970. Incredibly, over 100 million Americans, in over 100 metropolitan areas, breathe air that still does not meet those standards. Ozone and carbon monoxide pose unacceptable health risks to our citizens, and we have learned that ozone may be damaging at even lower levels than we originally thought. We have learned as well that ozone is probably causing billions of dollars of damage to crops every year; and that even low levels of ozone can damage forests.

We know that sulfur emissions have resulted in a tremendous deterioration in visibility at our national parks, including the Great Smoky Mountains National Park in my State of North Carolina. These same emissions are contributing to acid rain, which is continuing to cause unacceptable damage to lakes and streams, wildlife, buildings and monuments, and possibly even human health. We have learned that the nitrogen oxide emissions which contribute to acid rain are probably causing unacceptable nutrient loading in our coastal waters as well.

Mr. President, another area which is not adequately covered by current law is the depletion of the stratospheric ozone layer. We are in the process of reducing chlorofluorocarbon emissions by 50 percent, as required under the Montreal protocol. Thanks to a recent scientific studies, we now know only too well that those reductions are not enough. A total phaseout of CFC emissions is needed, together with restrictions on halons, methyl chloroform, carbon tetrachloride, and even the new HCFC's which will replace the old CFC's.

We need a new permitting and enforcement system to ensure that the Clean Air Act works as planned. Such a system is needed both to provide the proper regulatory tools for the EPA, and to provide certainty and a minimum of confusion and paperwork for the businesses that must comply with the act. We also need better monitoring and modelling tools so that we can measure the progress that is being made at any given time.

Finally, Mr. President, we need to recognize that perhaps the greatest failure of all in the current Clean Air Act is its performance with respect to air toxics. This is a matter of critical importance to North Carolina. There are hundreds of toxic air pollutants that are emitted in quantities that pose unacceptable risks to human health. Yet EPA is currently regulating just seven of these pollutants. Our data base on toxic emissions has been poor, but I have seen no evidence that these emissions have decreased to any noticeable extent since the passage of the original Clean Air Act. In fact, these emissions have probably increased in many areas. This is simply inexcusable. There is no other way to put it.

S. 1630 will address these problems. It will ensure a reduction of 10 million tons in the sulfur dioxides that cause acid rain and decrease visibility. It will bring most of our cities in compliance with ozone and carbon monoxide standards within the next 5 to 10 years. It will phase out use of the substances that are causing great damage to the ozone layer. It will cause substantial reductions in emissions from automobiles, and will help reconcile the automobile with the environment and enhance energy security by promoting the use of clean alternative fuels such as ethanol. Last, but certainly not least, the bill will require reductions of 90 percent or more in emissions of 191 toxic air pollutants, with further reductions assured such that no person will be exposed to an unacceptable health risk.

Mr. President, none of these actions should surprise American industry. A strong bill was needed in the early 1980's just as much as it is now. Unfortunately, the occupant of the White House at the time had other ideas. It was even suggested that we ought to weaken, not strengthen, the Clean Air Act. It was suggested that we study problems and then study the studies. Well, Mr. President, there have been a great many studies in the past few years and they have tended to confirm one simple proposition—that our air is nowhere near clean enough. When our cities are blanketed by smog; visibility at the Grand Canyon is so poor that we cannot see across it; toxic air emissions are uncontrolled; and forests are dying, we do not need studies to tell us we have a problem. We can see it with our own eyes.

I do not want to downplay the need for scientific studies as the foundation for sound environmental policy. It is very important to make sure that legislation which must necessarily impose some economic costs will do the job we want done, and will provide benefits with a reasonable relation to costs. So studies that will help structure legislation are one thing. Using studies as an excuse for inaction, when all the world knows action is needed, is quite another.

Many may argue that this bill is too tough; that it imposes excessive costs; or that some scientific detail is needed on some problem before it can be ad-

dressed through legislation. I believe that the bill now before us does a pretty good job of following the present scientific knowledge, and achieving necessary environmental goals at a reasonable cost. For those who argue this bill is too costly, I might point out that many legislative proposals introduced throughout the 1980s were much less stringent than this bill. Had those proposals not been fought to the death by industry and the administration, we might have a less costly proposal enacted into law. Nonetheless, I want to make clear that I think this bill is needed; that the goals it sets are largely appropriate; and that the methods of achieving those goals have generally been crafted in a thoughtful manner so as to minimize unnecessary costs.

Mr. President, this bill is hundreds of pages long. It has hundreds of substantive provisions. Any bill of this complexity, or any bill for that matter, is not going to be perfect. But it has been insistence on perfection, and refusal to accept less than 100 percent of what various parties want, that has killed clean air legislation so many times in the past. Thankfully, to the benefit of both the present and future generations, outstanding leadership from a number of Senators has removed the roadblocks and resulted in a bill that does the job that must be done.

I have heard a lot of criticism of various aspects of this bill. Those criticisms have been about evenly divided between those who think this bill is too weak and those who think it is too strong. That may be a pretty good sign that we have things about right.

Mr. President, for those who believe this bill is somehow too weak, I would simply ask that they look carefully at what the bill will actually do. I have heard it suggested that this bill is somehow weaker than the President's bill. I have even, incredible as it may seem, heard it implied that this bill is unacceptable and is even weaker than current law in some substantive way. Nothing could be further from the truth, and I do not see how anyone who has actually read and studies this bill could suggest otherwise.

Although S. 1630 is considerably stronger than the President's clean air legislation, I want to recognize that the President has clearly done a great deal to break the logjam that prevented passage of legislation earlier. His proposal was certainly a constructive effort and served as a good starting point for this legislation. The President's acid rain proposal was particularly strong, and that should be commended. There were a great many other elements in the President's bill that are reflected in S. 1630. The President's willingness to spend a great deal of time and energy on responsible clean air legislation was a welcome change from the previous administration. While I strongly disagreed with some aspects of the President's clean air legislation, the White House had many good suggestions, and we should acknowledge that.

Nonetheless, it is clear that S. 1630 has improved on the President's bill in many areas. It will require much stronger and more predictable controls on facilities emitting toxic air pollutants. It contains extremely tough provisions designed to protect the ozone layer—an issue not addressed by the President's bill. It will require much tougher tailpipe standards on automobiles; tougher nitrogen oxide controls from powerplants; and faster and greater reductions in emissions of pollutants causing urban smog.

For those who wish to compare S. 1630 with current law, I would suggest that even a cursory review of the bill makes it obvious that the legislation is orders of magnitude stronger than current law. There is simply no comparison.

Under current law, we have virtually unrestricted emissions of air toxics. Under this bill, we will reduce emissions of 191 substances by at least an order of magnitude, and will go even further so as to ensure that no individual is subject to a risk of greater than 1 in 10,000 as a result of toxic emissions. Those risks will be lowered to 1 in 1 million—less than the risk of being struck by lightning—for most facilities on an achievable schedule.

Under current law, we have 101 areas that still fail to meet health-based standards for ozone and carbon monoxide after 20 years of effort, and it is difficult to measure whether we are making progress or not at any given time. Under this bill, a whole host of measures will be required—from inspection and maintenance programs to controls on refueling emissions to reasonably available control technology on all major emission sources—together with monitoring, modeling, and percentage reduction requirements that can tell us if the job is getting done. We have also provided for a range of tough sanctions that EPA can and will use, rather than the current-law all-or-nothing approach which guaranteed that sanctions were unlikely to be imposed.

Under current law, there is no requirement that acid rain be addressed. I think virtually everyone agrees that this bill is very tough on acid rain. Under current law, CFC emissions must be reduced just 50 percent. This bill requires a total phaseout. I could go on and on, Mr. President—the point is that any claims that this is a weak bill simply do not hold water.

There is one area, however, where I did believe the substitute amendment before us needed particular strengthening. That is the provisions designed to reduce automotive emissions. It is true that the substitute will require the nationwide imposition of stringent California standards over the next few years, reducing emissions of various pollutants by 36 to 60 percent. It is also true that the substitute actually strengthened the committee bill in one sense by adding reformulated gasoline and alternative fuel provisions. But I became convinced that we would have to go even further for two reasons: first, to guarantee that our cities would be brought into compliance with air-quality standards as soon as possible; and second, to avoid the imposition of less cost-effective controls on small businesses in order to meet those standards.

For this reason, I am pleased that we were able to adopt the Daschle amendment last week. By requiring more stringent standards for reformulated gasoline, we will improve the quality of our Nation's air, and will do so in a way that will help avoid imposing additional burdens on small business. We will also be promoting energy independence by encouraging the use of clean, domestic fuels such as ethanol and ETBE. Expanded use of ethanol blends, I might add, would be likely to benefit North Carolina farmers as well as North Carolina's environment.

Mr. President, it is with considerable reluctance that I voted against one or two strengthening amendments to this bill as I did for all weakening amendments. I was forced to vote against some amendments that had some merit because I believed, along with many of my colleagues, that these amendments were not only deal breakers but bill killers. If any such amendment was passed, we would have faced considerable delay on the bill and might have jeopardized its passage into law. We worked too long and hard on this very important legislation to take these kind of risks.

The Wirth-Wilson amendment was one vote that was particularly difficult. The Senators from Colorado and California worked very hard for the strongest possible provisions with respect to mobile source emissions. I found many aspects of their amendment very attractive. In fact, even after passage of the Daschle amendment—which was similar to a key component of Wirth-Wilson—I still believe some improvements in this title may be possible.

However, there were other substantive aspects of this very comprehensive amendment that I found troubling. Perhaps more importantly, I became convinced that adoption of the amendment would have had very serious implications for the chances of expeditious action on the bill. In essence, Senators were asked to revisit what was clearly the most controversial section of the bill in terms of goals and

costs, a section that perhaps more than any other was responsible for the protracted negotiations in the first place.

Senators were not being asked to merely go part way back to the stronger and more costly mobile source provisions in the committee bill. In fact, adoption of the Wirth-Wilson amendment would have meant completely throwing out the results of the mobile source negotiations; going back to the more controversial provisions in the committee bill—and going well beyond that by adding extensive new alternative fuels and reformulated gasoline provisions. So, while there were many components of the amendment that had merit, it was clear that its adoption would have engendered extremely strong opposition from both the White House and many of my colleagues. I have great respect for the thoughtful leadership on many environmental issues that the Senator from Colorado and the Senator from California have provided, so it was with some reluctance that I decided I could not support their amendment in the situation we faced.

Mr. President, while we have responsibility to set tough environmental goals and make certain those goals will be met, we also have a responsibility to consider the economic effect of this legislation. I do not want industry to close down, workers to loss their jobs, or jobs to go to other countries. We have fought hard to keep the tough environmental standards in the bill intact. Yet at the same time, I have worked with the managers of this bill to ensure that, having set those tough standards, we provide the most cost effective means possible of achieving them.

One lesson that we have learned from the Clean Air Act of 1970 is that the command and control approach to environmental regulation does not work very well, especially after the easiest emission reduction measures have already been put in place. We can't expect to get results by simply loading businesses and industries with regulation upon regulation, and prescribing increasingly detailed measures to the point where every adjustment of a nut or bolt is explicitly treated in legislation. If we try to tell industries exactly how to get where we want them to go, we are likely to meet far more resistance and impose far more costs than are necessary. This approach leads to unnecessary delay and litigation. It may benefit the lawyers, but it is not the best approach for either the environment or the economy.

It makes much more sense to prescribe exacting performance standards, but allow some discretion as to exactly how those standards will be met. It makes more sense to harness market forces to provide economic incentives and disincentives that encourage environmentally responsible behavior. This approach encourages innovation and technological improvement, and it ultimately encourages expeditious compliance at reasonable cost. Certainly, we need tough enforcement mechanisms and monitoring requirements to make certain that emission reductions occur on schedule, and we cannot allow market forces or flexibility to be used as an excuse to create loopholes. However, when provisions have been crafted that ensure that performance standards must be met by a date certain, it is good common sense to allow businesses to figure out how to reach those standards in a way that minimizes costs.

Mr. President, there are some aspects of this legislation that may still be viewed as command and control. For example, we prescribe in considerable detail measures that ozone nonattainment areas must adopt. However, we have nearly two decades of experience in trying to control ozone and we have a pretty good idea of what works and what does not work. In this case, it would be very difficult to argue that the specific measures we have prescribed are not necessary. In fact, these measures were largely based on the recommendations of the very state and local air quality agencies to whom we are prescribing.

On the other hand, Mr. President, there are a great many provisions in this bill that do attempt to harness market forces to benefit the environment. The allowance system for sulfur oxide emissions is one good example. The credit system for reformulated gasoline is another. In the air toxics title, performance standards will be set based on maximum achievable control technology, but industry will be free to use other options to meet those standards. Offsets may be used in the reduction of volatile organic emissions, and improvements have been made to ensure that the offset provisions will result in more environmental protection than have past attempts to use this tool.

I am particularly pleased, Mr. President, that the Senate adopted my amendment to encourage voluntary reductions of toxic air emissions. This is a good example of the use of incentives to benefit both the environment and the economy. If businesses make substantial emission reductions earlier than they are required to do so by law, they will be rewarded. In this manner, successful innovation will be encouraged; pollution will be reduced more quickly; and compliance costs will be minimized.

Mr. President, I strongly support this clean air bill because it creates tough and necessary environmental standards and generally provides for the attainment of these standards with the least possible economic effect. In this way, S. 1630 was painstakingly balanced to ensure that protection of the environment does not occur in a way that needlessly sacrifices economic growth. This bill will clearly provide benefits that far outweigh its costs, in my view. It is very difficult to place a value on the protection of a forest; on restoring a scenic vista; or even on saving human lives. This bill will save lives, and it will protect and preserve a host of environmental values for future generations. That is simply a matter of good stewardship for the planet we live on.

But even in terms of those benefits that can be valued in dollars and cents, this bill will be worth the costs. By cleaning up urban smog and toxic emissions, we will save Americans billions of dollars in health care costs each year. By reducing regional haze, ozone, and acid rain, we will benefit tourism-based economies; restore valuable recreational opportunities; and eliminate billions of dollars worth of damage to forests, crops, and buildings annually.

Mr. President, this is landmark legislation that will provide benefits for many generations to come. It would be impossible to adequately recognize the monumental labor that has gone into this bill. However, I would particularly like to commend the majority leader, the distinguished Senator from Maine, for his outstanding leadership on this legislation. The Senator from Maine has for many years been second to none in his concern for the environment, and in his demonstrated skill in acting on behalf of the environment.

The distinguished Republican leader, Senator DOLE, has also played a key role in this legislation and offered many constructive suggestions throughout the lengthy process that finally resulted in the passage of this bill. The floor managers, Senators BAUCUS and CHAFEE, did a remarkable job of sheperding this bill through that process. In doing so, the Senator from Montana and the Senator from Rhode Island demonstrated considerable knowledge about a seemingly endless number of highly technical matters in one of the most complex pieces of legislation we are likely to see for some time in this body. They have done outstanding work.

Many other Senators, both on and off the Environment Committee, made important contributions to this legislation. As one who has been particularly interested in the air toxics provisions of this bill, I know that Senators DURENBERGER, LAUTENBERG, and BREAUX devoted countless hours to this legislation. There are doubtless many others who have done likewise. Finally, I would like to commend the Environment Committee staff, who went far beyond the call of duty in

their efforts to develop the best possible clean air legislation.

Mr. President, as Earth Day approaches, we need to instill a new environmental ethic of stewardship and environmental responsibility. I cannot think of a better signal that this body can send to the American people than the strong commitment to environmental protection embodied in this bill. This legislation will provide clean and healthy air to the people of our Nation no matter where they live. We need to pass on to our children an environment that is at least as healthy as the environment we inherited from our parents. S. 1630 represents a giant step toward achieving that goal.

TRIBUTE TO DR. HARRY GUFFEE, WILLIAMSON COUNTY, TN

Mr. SASSER. Mr. President, I rise today to pay tribute to Dr. Harry Guffee, a native of Williamson County, TN.

In honor of the many contributions made by Dr. Guffee to his community and fellow citizens, Williamson County is designating May 5 through May 12, 1990, as Dr. Harry Guffee Week.

The entire week will be filled with tributes to Dr. Guffee, a retired surgeon who has endeared himself to three generations of Williamson Countians with his rugged practicality, Western-style charm, and compassionate bedside manner.

The annual Rotary Rodeo in Franklin, TN, on May 4 and 5, will be dedicated to Dr. Guffee, who is one of the founders of the popular event—billed as the largest outdoor rodeo east of the Mississippi River.

Later that week, on May 10, Williamson Medical Center, another institution Dr. Guffee helped found, will honor the doctor with a banquet attended by his colleagues in medicine and by friends, government officials, and other dignitaries. One of the evening's presentations to Dr. Guffee will be a scrapbook filled with letters from people whose lives he has influenced.

Dr. Guffee, born Feburary 19, 1913, in southern Williamson County, did his premedical and medical studies at Vanderbilt University in Nashville, TN, finishing in 1939. After completing his internship at Nashville's General Hospital in 1941, Dr. Guffee began his private practice in Williamson County. It was interrupted, however, by World War II.

Dr. Guffee was assigned to an Army Special Medical Unit and a blackout express convoy making trips to the front lines in Europe to treat injured and wounded soldiers

He was a prisoner of war, captured at Normany Beach, and was one of only 32 in the 3,500-member 84th Divison to survive the invasion. Later, he was instrumental in setting up hospitals for survivors of German concentration camps, including Dachau.

When he returned home, Dr. Guffee helped establish the Dan German Hospital in Franklin and, in 1959 was one of the charter medical staff members at Williamson County Hospital. He served as chief of staff there from 1962 to 1970.

Dr. Guffee retired from medicine in 1979. In 1985, he was appointed a lifetime honorary staff member of Wiliamson Medical Center, which replaced the old hospital facility.

During his 40 years in medicine, Dr. Guffee delivered 4,342 children, many in backwoods cabins, some in sterile hospital suites. He was never concerned about his patients' ability to pay, and many times rode horseback into the rural areas of the country to make house calls.

Even after he retired, Dr. Guffee kept up with his aging patients. On one of his rounds at a nursing home, a post-retirement patient confessed to never paying for the delivery of her child. "How old is your baby now?" Dr. Guffee asked. "Forty," the woman replied, insisting on paying the $44 debt.

Commenting later on his faith in his patients to pay what they could, Dr. Guffee said: "Country people are special. They'll pay you one way or the other, no matter how long it takes them."

In addition to his extensive medical career, Dr. Guffee is involved in civic affairs. He was the first president of the Franklin Jaycees, is a charter member of the Franklin Rotary Club, and led the effort to establish the annual Rotary Club Rodeo in Franklin.

Dr. Guffee is a former president of the Tennessee Medical Association, and served on the board of trustees at Battle Ground Academy in Franklin, his high school alma mater. He has also served as an elected member of the Franklin Ninth Special School District.

Aside from medicine and civics, Dr. Guffee's interest is in horses and riding. He served as vice president of the National Cutting Horse Association and served longer than anyone on its board of directors. The trophy room in the barn on his College Grove, TN, farm is filled with silver-trimmed prize saddles and ribbons from cutting horse competitions. He has also been a regular competitor in the annual Rotary Club Rodeo.

He is married to the former Dorothy Brade. They have four children: Harry Guffee, Jr.; Johnny Guffee; Dottie Guffee Morton; and Betty Guffee Barringer.

I join Dr. Guffee's countless friends in Williamson County and all across Tennessee in extending my sincere thanks and best wishes to a truly outstanding native son.

FERC REGULATORY INCENTIVES FOR CLEAN COAL TECHNOLOGY

Mr. SANFORD. Mr. President, I am pleased that the Senate last night adopted my amendment to the clean air legislation with respect to clean coal regulatory incentives through the Federal Energy Regulatory Commission. This is a modest amendment designed to address, at least in part, certain concerns that have been raised with regard to provisions in the substitute which would establish a Regulatory Incentive Demonstration Program for certain utilities that install clean coal technologies. These provisions would enable the Federal Energy Regulatory Commission to grant incentive rates of return, favorable amortization periods, and other incentives to a limited number of units who choose to use such eligible technologies.

I wish to make it clear that I support the use of clean coal technologies. We have invested considerable sums in researching and developing new techniques which have the potential to both substantially reduce air emissions and increase generating efficiency, and I hope that such technologies will play an important role in U.S. electric generation in the future. I certainly have no problem with the concept of regulatory incentives for such technologies.

However, some concerns have been raised with respect to the FERC regulatory incentives program established in the substitute amendment. First, it will obviously apply only to that small portion of electric rates which are established by FERC for wholesale power sales—which would include the sale of bulk power to this country's rural electric and municipally owned systems. Rates for other types of sales, which comprise 80 percent of the total sales within the country, are only subject to State utility commission regulation and will not be affected. I would note that the substitute includes language to encourage State commissions to adopt similar incentives. This will of course be a matter for State commissions to decide.

Unfortunately, if a State commission does not provide for regulatory incentives similar to those that FERC will be granting, certain types of utilities may not have access to any CCT regulatory incentives. In addition, rates to retail consumers of rural electric and municipally owned systems who buy power from a unit which has been granted FERC regulatory incentives will be higher than those for the retail customers of the generating utility for electricity generated from the exact same facility. As a result, a rate disparity would occur between these two groups of retail consumers. Co-ops or municipals purchasing power from a utility receiving the FERC regulatory

incentives would thus be placed in a price squeeze situation, where passing through the increased costs of purchased power would put them at a competitive disadvantage; while failure to pass through such costs might not be economically feasible.

Mr. President, my amendment attempts to address these concerns in a modest fashion by requiring FERC, to the extent practicable, to select for regulatory incentives clean coal projects located in States where State commissions have considered the possibilities mentioned above, and have established a level playing field with respect to clean coal regulatory incentives. If a State has addressed the price squeeze problem and has established clean coal incentives of their own, units in that State will be more likely to be selected for FERC regulatory incentives. To the extent that applications for FERC incentives greatly exceed the number of units which FERC is allowed to select, the amendment will ask FERC to select projects in States which have established that level playing field.

The amendment is not intended to in any way limit the effects of the FERC regulatory program which was negotiated as part of the substitute. It is simply intended to take a step toward encouraging a system where both Federal and State regulatory incentives for clean coal are fair to all parties.

Mr. President, I would like to express my appreciation to the distinguished floor managers, Senators BAUCUS and CHAFEE, for their assistance with this matter.

TRIBUTE TO DR. JAMES YEN

Mr. D'AMATO. Mr. President, I rise today to pay tribute to Dr. James Yen, who passed away in Manhattan on January 17, 1990. The contributions of Dr. Yen to the fight against illiteracy, poverty, and despair in China, the Philippines, and other nations are vast and worthy of our recognition.

Dr. "Jimmy" Yen was born in China on October 16, 1893, and was educated in the traditional aristocratic Chinese fashion. After his graduation from Yale in 1918, Dr. Yen volunteered to assist the Chinese Labor Corps, a group of laborers brought from China to France during the Second World War to perform a variety of tasks for the Allies. While in France, Dr. Yen began to teach the illiterate and homesick Chinese coolies to write and read letters from home. His success with the education of the coolies—and his subsequent invention of a simplified vocabulary of Chinese characters—began a distinguished career that would always be characterized by his efforts to assist others.

At the close of World War II, Dr. Yen, in cooperation with the YMCA of the United States, began to expand his literacy program with innovative yet simple farming techniques in the county of Ding Xian, China. As with all of his projects, Dr. Yen soon experienced considerable success and attempted to apply his method to other regions. He was instrumental in the creation of "barefoot doctors," who were taught simple medical procedures such as the disinfection of wounds to prevent infection. These barefoot doctors would then instruct members of their own and other communities in similar procedures.

Dr. Yen's programs and sojourns throughout China and the Philippines eventually culminated in his founding of IIRR, the International Institute of Rural Reconstruction. Through this organization, Dr. Yen sought to train members of different communities the modern farming methods and other general skills that would improve overall living conditions. As with his other programs, Dr. Yen tried through IIRR to improve standards of living at the grassroots level. His principal aim was to teach the poor to want to help themselves, not to merely educate them.

During the course of his life, Dr. Jimmy Yen was honored with nine honorary degrees, the Order of the Quetzal in Guatemala, and the Order of the Golden Heart in the Philippines. He also received the Ramon Magsaysay Award, which is the Asian equivalent of the Nobel Prize, and the Eisenhower Medallion of People to People International in recognition of his "exceptional contributions to world peace and understanding." Dr. Yen was also honored with a 1987 Presidential End Hunger Awards Lifetime Achievement Citation for "more than 60 years of work toward developing and disseminating a sustained, integrated program to overcome the root causes of hunger and poverty in the Third World."

Today, Dr. Yen's brainchild, the IIRR, serves nearly 40 countries, and his invaluable work is continued through the efforts of affiliated organizations.

Thank you, Mr. President.

METAL CASTING COMPETITIVENESS RESEARCH ACT—H.R. 1243

Mr. SHELBY. Mr. President, I rise today to thank my colleagues for supporting the Metal Casting Competitiveness Research Act. I especially would like to thank my friends Senators HEFLIN, JOHNSTON, FORD, and MCCLURE for their leadership on this proposal. The committee and office staffs of the various Senators' offices should be commended also. This was truly a joint effort that will benefit American industry.

Over the years, due to increased foreign competition, the U.S. foundry industry's competitive edge has been reduced. For example, in 1981 there were 4,400 foundries in the United States employing 400,000 production workers. Today, there are only 3,700 foundries employing 216,000 people. Since 1971, half of the U.S. foundries have closed. The total number of tons of metal casting the United States is producing has declined from 20 million tons in 1966 to 11 million tons today. This situation is due in large measure to our foreign competitors' financial investment in their respective metal casting industry. Consequently, countries like Canada and West Germany have made technological leaps to the economic detriment of the American foundry industry.

However, the United States, through innovative and imaginative measures has continued to excel. The legislation before you creates an environment where American ingenuity can thrive. The pairing of significant interest by the Federal Government with the substantial interests of academia and private enterprise can remove any economic disparities that currently exist.

Importantly, Mr. President, is the willingness of the metal casting industry to take the lead. From the beginning, the industry has been more than willing to meet its financial obligations. In this regard, I believe the industry is unique. It is willing to provide not only significant funds, but also it will provide, among other things, the use of facilities, equipment and engineers.

Through joint Federal, private, and university funded research projects the U.S. foundry industry can regain its leadership position. The encouragement and maintenance of a technically advanced U.S. metal casting industry is essential to the competitiveness of virtually all American industry.

Passage of the Metal Casting Competitiveness Research Act is a further initiative on the part of the U.S. Congress to implement progressive and significant legislation that will strengthen our economic position vis-a-vis our foreign competitors.

Mr. President, I once again thank my colleagues for their assistance in moving this legislation forward.

Mr. JOHNSTON. Mr. President, the Committee on Energy and Natural Resources has enthusiastically and unanimously recommended that the Senate pass the Department of Energy Metal Casting Competitiveness Research Act of 1990. I thank Senator SHELBY for introducing this legislation and Senator HEFLIN's exemplary efforts in guiding the bill through our committee.

While on its face this legislation may appear to deal only with one industry, in fact, it will affect the entire U.S. manufacturing industry. Ninety percent of all manufactured goods use

metal castings. Improvements in the metal casting process improves the quality of the goods and directly lowers the cost of finished goods. Better goods at lower costs make for more competitive products for all American industries.

Improvements in metal casting technology will also reduce our energy consumption. The metal casting industry annually consumes over 250 trillon Btu's of energy each year. At a time when we rely on imports for one-half of our oil, more energy efficient processes are sorely needed.

This legislation will result in improvements to metal casting technology by creating a metal casting competitiveness research program within the Department of Energy. The Secretary of Energy will be required to solicit and select proposals on a competitive basis to conduct metal casting research.

To be selected, each proposal must meet certain requirements. For example, the applicant must already have the research facilities in place to apply. Each proposal must demonstrate industry support, contain a cost sharing commitment, set out a management plan, state the cost of the proposal and state how technology will be transferred to industry.

Testimony before our committee was unanimous in establishing the need for metal casting research, and that it should come through joint Federal and private research efforts. American metal casting industries lack the resources to individually perform the necessary research to remain competitive. Ninety-four percent of American foundries employ less than 250 people. Profits are low because of high capital costs and vigorous competition. In fact, foreign competition has caused half of all U.S. foundries to close.

This country lags significantly behind the research efforts of other countries. Virtually every foreign foundry the American metal casting industry competes with benefits from large, government-sponsored centralized research programs. Numerous examples were given to the committee of foreign competitors having developed technology this country is years away from developing.

The importance of research in metal technology has not gone unnoticed by Congress. The Steel and Aluminum Energy and Technology Competitiveness Act of 1988 was passed to improve the industrial competitiveness and energy efficiency of the American steel, aluminum, and copper industries. While many research benefits have already resulted from this act, little has been done in the area of metal casting research. This legislation expands our research efforts and creates a focused metal casting research and development program within the Department of Energy.

The committee believes that the investment this legislation makes in the metal casting industry will be repaid many times over. Better metal casting technology will reduce energy consumption, lower costs and improve the quality of castings. This specifically makes the American metal casting industry more competitive and, thus, American industry as a whole more competitive.

Mr. HEFLIN. Mr. President, I am delighted that the Senate has passed H.R. 1243, as amended. Although there are a few differences between the House- and Senate-passed versions of this bill, I believe that they can be worked out in very short order so that we can send a compromise to President Bush for his signature.

Mr. President, it is virtually undisputed that foreign competition has hurt the American metal casting industry to the extent that it is no longer competitive in the international marketplace. Certain foreign trade practices, a loss of American technological advantages, a lack of superior and adequate metal casting research and development, a lack of resources to conduct the research needed to acquire a competitive edge internationally, and a lack of an adequate supply of university-trained engineers with degrees in metal casting technology research all have contributed to the demise of the U.S. metal casting industry during the last 20 years.

The U.S. metal casting production has declined from about 20.85 million tons in 1966 to approximately 11.65 million tons today. Also, over the last two decades, tens of thousands of American workers have lost their jobs due to the closing of more than half of U.S. foundries.

Virtually every metal manufactured product imported into or exported from the United States requires castings in its assembly or manufacture. The roughly 3,700 remaining U.S. foundries produce annually approximately 21 billion dollars' worth of products and only employ a paltry 260,000 workers. In my home State of Alabama there are nearly 100 foundries—most of which are small, family owned businesses. They produce over 1 billion dollars' worth of cast products every year, with all casting technologies represented among its foundries. They employ approximately 18,000 workers.

Mr. President, both the House- and Senate-passed versions of H.R. 1243 intend to create a new DOE program designed to establish a few national metal casting research centers or institutes at educational institutions. Their purpose for creation will be to advance metal casting technology and research and transfer the technology to industry. In the process, it is our intent to train students to become engineers in metal casting technology research who will be able to move directly into industry upon graduation.

Mr. President, it is absolutely important that I point out that the funds authorized in this bill will come from reallocation of existing DOE funds. Also, I would also like to note that this legislation does not make any changes in existing law.

Finally, Mr. President, I would like to thank the chairman of the Senate Energy Committee, Senator JOHNSTON, and the ranking minority member, Senator MCCLURE, for the extraordinary personal attention that their staff gave to H.R. 1243, as amended. I would also like to congratulate Senator RICHARD SHELBY and Congressman CLAUDE HARRIS of Alabama for having the foresight to introduce this bill in both Houses of Congress.

ACKNOWLEDGING PRESIDENT GEORGE BUSH'S SPEECH ON AIDS

Mr. HATCH. Mr. President, last Thursday, President Bush delivered one of the most compassionate speeches on AIDS that I have ever heard to the National Leadership Coalition on AIDS. This speech reflects the President's humanitarian response to those with AIDS and their families. Clearly, the President understands the suffering caused by AIDS.

Mr. President, I ask unanimous consent that the text of the President's speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

TEST OF REMARKS BY THE PRESIDENT TO THE NATIONAL LEADERSHIP COALITION ON AIDS

I am delighted to be here with you, the leaders who guide American business as it helps those suffering with HIV and AIDS. You make our hearts glad. And you make your country proud.

Other generations have faced life-threatening medical crises, from polio to the plague. This virus is our challenge. Not a challenge we sought. Not a challenge we chose. But today our responsibility is clear: We must meet this challenge. We must beat this virus. For whether talking about a nation or an individual, character is measured not by our tragedies—but by our response to those tragedies.

And for those who are living with HIV and AIDS, our response is clear: They deserve our compassion. They deserve our care. And they deserve more than a chance—they deserve a cure.

America will accept nothing less. We are slashing red tape. Accelerating schedules. Boosting research. And somewhere out there, there's a Nobel prize—and the gratitude of planet Earth—waiting for the man or woman who discovers the answer that's eluded everyone else.

We pray that day will come soon. But until that day—until this virus can be defeated by science—there's a battle to be waged by society.

Because in 1990, the most effective weapon in our arsenal against AIDS is not just medication, but also education.

Our goal is to turn irrational fear into rational acts.

Every American must learn what AIDS is and what AIDS is not. And they must learn now. You in this room already know. The HIV virus is not spread by handshakes or hugs. You can't get it from food or drink, coughing or sneezing, or by sharing bathrooms or towels or conversation.

The transmission of HIV is as simple as it is deadly. In most cases, it's determined not by what you are—but by what you do—and by what you fail to do.

Let me state it clearly: People are placed at risk not by their demographics, but by their deeds—by their behavior.

And so it is our duty to make certain that every American has the essential information needed to prevent the spread of HIV and AIDS. Because while the ignorant may discriminate against AIDS, AIDS won't discriminate among the ignorant.

Like many of you, Barbara and I have had friends who have died of AIDS. Our love for them when they were sick and when they died was just as great and just as intense as for anyone lost to heart disease or cancer or accidents.

Probably everyone here has read the heartbreaking stories about AIDS babies and those infected by transfusions. When our own daughter was dying of leukemia, we asked the doctor the same question every HIV family must ask—why—why this was happening to our beautiful little girl. And the doctor said: "You have to realize that every well person is a miracle. It takes billions of cells to make a well person. And all it takes is one cell to be bad to destroy a whole person."

In this Nation, in this decade, there is only one way to deal with an individual who is sick. With dignity, compassion, care, confidentiality, and without discrimination.

Once disease strikes—we don't blame those who are suffering. We don't spurn the accident victim who didn't wear a seatbelt. We don't reject the cancer patient who didn't quit smoking. We try to love them and care for them and comfort them. We do not fire them, or evict them, or cancel their insurance.

Today I call on the House of Representatives to get on with the job of passing a law—as embodied in the Americans with Disabilities Act—that prohibits discrimination against those with HIV and AIDS. We're in a fight against a disease—not a fight against people. And we won't tolerate discrimination.

The disease is attacking our most precious resource—our people, especially our young. The statistics are numbing. You heard them this morning. But just look at the amazing quilts hanging here today. They prove that no one is a statistic. Every life has its own fabric, its own colors, its own purpose, its own soul. And like the quilts, no two are alike.

When Barbara and I left Washington for Christmas, our last stop was a clinic up at NIH. We were impressed by the determination of the people there—the doctors, nurses, and health care workers—and especially the brave people who are living with HIV. We learned a lot about caring, a lot about family, and a lot about hope. We saw the face of humanity in the face of AIDS.

You, too, are in a powerful, unique position to influence the response to HIV and AIDS. Washing our hands of it won't help solve this problem, but rolling up our sleeves will.

The roster of participants at this Conference is an honor roll. Allstate sponsored a landmark conference on HIV and work. Fortune magazine launched a survey on C.E.O.'s response to HIV. General Motors pledged to conduct an education program. Others are fighting the spread of HIV by fighting to keep schools and workplaces drug-free. This is America responding to a crisis. This is America at its best.

This epidemic is having a major impact on our health care system. The Federal response is unprecedented. In 1982, we knew little about AIDS—and spent only $8 million. But this year I have asked Congress for almost $3.5 billion to battle HIV—money for basic research, for HIV treatment and education, for protecting civil rights.

From Seattle to Boston, from Dallas to Detroit, Federal grants have helped coordinate the efforts of care providers, business and community organizations to set priorities and pool resources to meet the treatment needs of people with AIDS.

We've initiated clinical trials for promising new therapies for HIV, expanded the availability of experimental drugs. Approved three new therapies that for the first time offer help to HIV-infected people before they become sick with AIDS. We've started a toll-free number where HIV patients and doctors can get state-of-the-art information on new treatment; worked with the P.T.A. to distribute hundreds of thousands of copies of the "AIDS Prevention Guide" for use in schools and families nationwide.

And our $10 billion war on drugs is also a war on AIDS. IV drug use now accounts for some of the fastest growing infection rates—afflicting Americans that are often among those least able to get adequate medical help.

America has the most sophisticated health care system in the world, but it is not without its problem. We face many challenges. Our system depends on private insurance and individual payments, as well as government programs. AIDS magnifies the challenges, including the challenge of expanding access, bringing costs under control, and overcoming obstacles to quality care. With these concerns in mind, I asked Dr. Louis Sullivan to lead a cabinet-level review of health care in the 1990's, and businesses like those you represent must play a major role in helping improve our Nation's health care system.

The crisis is not over. We report tens of thousands of new cases every year. And many predict we can expect to continue to do so in this decade, and even into the next century.

And yet, "where there is life there is hope." There are hopeful signs. To begin with, we can be encouraged by the news that current projections of the infection rate will not be as high as we thought just a year ago.

My Administration recently acted to extend AZT coverage to help HIV-infected people not yet sick with AIDS. All 50 states now provide Medicaid coverage for AZT treatments. Thanks to these actions, more and more people will be able to live and work with HIV. Keep them in your workforce—as I know many of you are already doing, as leaders in this effort. They can serve many, many more productive years with no threat to you, your other workers, or your companies. It will reduce costs for everyone. And it's the right thing to do.

The pace of progress is promising. The HIV virus has been identified, isolated, and attacked with experimental treatments in a span of less than 10 years. The normal centuries-long evolution of disease and treatment compressed into a decade.

And this race against time has produced an explosion in knowledge and basic understanding about the nature of disease and immunology. Like the unexpected technological boons from Apollo's race to the moon, some physicians predict the race to cure AIDS may even lead to a cure for cancer.

Dollars spent for AIDS research are dollars spent for the better health of all Americans. AIDS research strikes at the heart of many human health problems from infectious disease to aging and cancer. It includes research on a class of viruses now increasingly believed to be the cause of not only AIDS, but also incurable diseases like muscular dystrophy, multiple sclerosis and at least two forms of leukemia.

We're on a war-time footing at NIH and CDC—the Centers for Disease Control. Tonight, like every night, the lights will burn late in Bethesda and Atlanta, as a group of American pioneers work to solve this problem. If they do—I should say, when they do—it will be one of the greatest things our Nation would do for the world.

We're going to continue to fight like hell. But we're also going to fight for hope. America has a unique capacity for beating the odds—and astounding the world.

During my own childhood, the silent, whispered terror was a mysterious killer called polio. Like HIV, the virus ignored class distinctions and geographic boundaries. Monday would come, and kids who'd been in school on Friday were simply never seen again. Theaters were closed, summer camps, swimming pools.

As with AIDS, there was a lot of ignorance. Thousands of stray cats and dogs put to death. Kids sleeping with camphor inhalers. At least one town was fumigated with D.D.T.

There were terrifying outbreaks in the teens, in the thirties, in the fifties. A cure was so far distant the expert refused to speculate. And then, suddenly, it was over. The dreaded iron lung, unused, cluttering hospital hallways. Children again growing up in a world without fear.

Many comparisons have been made to epidemics past—cholera, small pox, yellow fever—none of them perfect. So let me boil down the lessons of polio to two: There was a lot of ignorance—let's learn from that. And in the darkest of hours—hope came unexpectedly, powerfully and with finality. Let's work hard to see that day come to pass.

Together, we will make a difference, for those with HIV and AIDS—and for all Americans.

THE PRESIDENT'S ADDRESS ON AIDS

Mr. KENNEDY. Mr. President, I am pleased to join with my friend and colleague from Utah [Mr. HATCH] in commending President Bush for his eloquent remarks last week to the National Leadership Coalition on AIDS.

The President spoke about care and compassion for people with HIV disease and reaffirmed the fundamental importance of reaching out to those in need. After citing examples of the broad involvement of persons and organization's throughout the country in battling the epidemic, he said, "This

is America responding to a crisis. This is America at its best."

For those Americans who have been grieving in secret—the President's words have kindled fresh hope. I look forward to working closely with him in the months ahead to make this hope a reality.

FED CHAIRMAN'S TESTIMONY ON CFTC/SEC CONTROVERSY

Mr. DIXON. Mr. President, last Thursday, the Securities Subcommittee held a hearing on issues related to our equities and futures markets. Among the distinguished witnesses at that hearing was the Chairman of the Federal Reserve Board, Alan Greenspan.

Now, Chairman Greenspan's testimony received a lot of press attention. In fact, his recommendation to transfer jurisdiction over stock index futures from the Commodity Futures Trading Commission to the Securities and Exchange Commission was the lead in many stories, even though the recommendation was a very tentative one, even though it was carefully hedged, and even though the Fed Chairman took great pains to point out that the Federal Reserve Board was divided on the issue, and took no official position.

Many of Chairman Greenspan's other comments, although equally or even more important to Congress as it considers what, if anything, to do in the stock market and futures area, did not get as much attention. I do not want to take a lot of my colleagues' time, so I will point to just two significant comments.

First, on the issue of margins and volatility, Chairman Greenspan said:

The Board, as best I can judge, is unanimous on the question that the appropriate margins for stock index futures and for stocks should be prudential only. . . . Had we found such a relationship [between margins and volatility], I suspect we would be arguing that margins should be constructed in a manner which picked up not only prudential requirements but also an element of additional margin which would act to presumably suppress the degree of volatility in the system. All of the analytical tools we have brought to bear have failed to find any such relationship. As a consequence of that, we are unanimous on the issue that prudential margins are the realistically sole purpose of putting margins in place.

The Chairman and the entire Federal Reserve Board of Governors therefore made it absolutely clear that they do not believe that there is a relationship between the margins on stock index futures contracts traded on futures exchanges and volatility in the equities markets.

The Chairman's response to the last question Senator DODD, who chaired the hearing, asked just before the hearing ended, was perhaps even more significant. Senator DODD asked about the consequences of Congress failing to act on legislation to address stock and futures issues, and what dangers we would face if we failed to act. Fed Chairman Greenspan responded that:

On the issue of the change in structure which I would personally recommend, which is not a huge change but I think a desirable one, were that not done, I do not think that we leave the structure in total at risk. I think it will be more difficult to resolve certain issues, but I would scarcely want to argue that action is mandatory because if action fails that the system would be put in jeopardy. I don't believe that.

I think that if there is a major market reaction, it is likely to occur with or without changes that we're talking about and I'm not certain the extent to which the types of changes we're talking about would make all that much substantial difference in how the particular market break worked its way through the system.

I did not read in any account of the hearing that the Chairman of the Board of Governors of the Federal Reserve System had said that any legislation transferring some futures jurisdiction to the Securities and Exchange Commission, or any legislation that changed futures margins, would not make much difference in any future crash, but that, of course, is exactly what he did say.

I think that my colleagues deserve to see all of the Chairman's comments. His testimony was very thoughtful, and he is not either a potential winner or loser in any jurisdictional turf war. I therefore ask unanimous consent to include a copy of the Federal Reserve Board Chairman's testimony at this point in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY BY ALAN GREENSPAN

Mr. Chairman, members of the subcommittee, it is a pleasure to appear on this panel this morning to discuss issues involving the regulation of securities markets. While your committee is addressing a broad range of matters in this area, you have asked me to focus on whether the existing split regulation of equities and index futures may have contributed to market volatility, interfered with the process of innovation, or led to enforcement problems. You also have asked for comment on certain proposals for regulatory consolidation. I would like to focus my remarks on three major issues: first, the adequacy of margin requirements on stock index futures as a prudential safeguard and the impact of existing margin-setting procedures and other differences in regulation on market volatility; second, existing impediments to innovation; and third, whether there is a need to modify the existing regulatory system for stocks and stock derivatives. My evaluation will be done against the objective of a regulatory structure that, while limiting risks to the system, results in highly efficient and innovative U.S. financial markets that can compete effectively in the global marketplace.

As I will discuss in more detail, the Board does not believe that the existing division of regulatory authority has increased volatility in the securities markets, nor in this regard is it a threat to the capital formation process. We continue to view the primary purpose of margins to be to protect the clearing organizations, brokers, and other intermediaries from credit losses that could jeopardize contract performance. While we think that federal oversight of margins is appropriate for prudential purposes, there are different views among Board members on whether that authority is best vested in the Commodity Futures Trading Commission (CFTC) or the Securities and Exchange Commission (SEC).

On the broader issue of consolidating jurisdiction for stocks and stock index futures (or all financial futures) in one agency, there are good arguments for and against such a consolidation and, accordingly, differences of views on whether such consolidation would, on balance, be beneficial. We believe some changes to the existing regulatory system are necessary to avoid the prospect that jurisdictional disputes among regulators will impede innovation in our financial markets, but consolidation of jurisdiction is not necessary to achieve this objective.

FEDERAL MARGIN REGULATION

A prominent area of disagreement among those interested in the smooth functioning of our capital markets has been the appropriate level of margins for stock index futures and the need for federal authority over such margins. In part, these disagreements reflect different views as to the purposes of margins and the appropriate objectives of federal margin regulation. Accordingly, at the outset I would like to clarify the position of the Board of Governors on these issues.

We continue to believe that the primary objective of federal margin regulation should be to protect the financial integrity of market participants and thereby ensure contract performance. Margins should be adequate to protect clearing organizations, brokers, and other lenders from credit losses arising from changes in securities prices. As such, they are one important element of a package of prudential safeguards, including capital requirements, liquidity requirements, and operational controls, aimed at limiting the vulnerability of the financial markets to losses or disruptions arising from the failure of one or more key participants. The failure of, or even the loss of public confidence in, a major intermediary in any of the stock, futures, or options markets could immediately place significant strains on other markets, their clearing systems, and on our nation's payment system.

The Board remains skeptical, however, of whether setting margins on stock index futures at levels higher than necessary for prudential purposes will reduce excessive stock price volatility. We, too, are concerned about what seems to be a higher frequency of large price movements in the equity markets, but we are not convinced that such movements can be attributed to the introduction of stock index futures and the opportunities they offer for greater leverage. Although available statistical evidence on the relationship between margins and stock price volatility is mixed, the preponderance of that evidence suggests that neither margins in the cash markets nor in the futures markets have affected volatility in any measurable manner. Moreover, we are concerned that raising maintenance margins on stock index futures to levels well above those necessary for prudential purposes could substantially reduce futures market liquidity or drive business offshore.

Thus, in the Board's view, the critical question is whether margins on stock index futures have been maintained at levels that are adequate for prudential purposes. Although no futures clearing house has ever suffered a loss from a default on a stock index futures contract, certain actions by futures exchanges and their clearing houses in recent years raise questions about the adequacy of futures margins from a public policy perspective. Specifically, we have concerns about the tendency for these organizations to lower margins on stock index futures to such a degree in periods of price stability that they feel compelled to raise them during periods of extraordinary price volatility. While such a practice has heretofore protected the financial interests of the clearing houses and their members, it tends to compound already substantial liquidity pressures on their customers, on lenders to their customers, and on other payment and clearing systems. In the Board's view, somewhat higher margin levels on stock index futures would obviate the need to raise them in a crisis and thereby reduce concerns about the reliability of our market mechanisms, especially clearing and payment systems, in times of adversity.

The Board believes that federal oversight is appropriate to ensure that margins on stocks and stock index futures are established at levels that are adequate under a wide range of market conditions. Futures self-regulatory organizations (SROs) should continue to have primary responsibility for developing and refining margin policies. But the appropriate federal agency should have both the authority to initiate changes in margins on stock index futures and the authority to veto changes proposed by the relevant SRO. That authority should not be limited to emergency authority such as the CFTC currently has over futures margins.

Either the CFTC or the SEC could play this role. The principal argument in favor of assigning oversight responsibility for stock index futures to the CFTC is that it has overall responsibility for prudential supervision of futures exchanges and clearing organizations and futures commission merchants (FCMs). Assignment of oversight responsibility to the CFTC would avoid certain regulatory burdens and potential conflicts that could arise if responsibility for critical aspects of prudential oversight of such entities were divided between the CFTC and SEC.

The principal argument for assigning oversight responsibility for stock index futures margins to the SEC is that it would foster consistency of margins in the stock and stock derivative markets. The Board believes that margins in these markets should be consistent in the sense that they provide comparable protection against adverse price movements. The degree of protection provided by margin requirements depends on the magnitude of potential future price volatility. Although studies of past price movements can shed light on potential movements in the future, the forecasting of future volatility necessarily involves elements of judgment. Because different agencies are likely to come to different judgments, there is a case to be made for having only one regulator with margin authority over all the equity products markets to achieve consistency of margins across these markets.

On balance, the Board does not see a clear basis for choosing between CFTC and SEC oversight of stock index futures margins. The Board feels strongly, however, that authority should not be given to the Federal Reserve because it does not have overall prudential responsibility for any of the futures commission merchants (FCMs), broker/dealers, or clearing organizations that margins are intended to protect. The existing margin authority for stock and stock options assigned to the Board under the Securities Exchange Act of 1934 should be transferred to the SROs and the SEC.

ISSUES OF REGULATORY JURISDICTION

The question of regulatory responsibility for margins is one element of the broader question of regulatory jurisdiction over futures and options markets. In light of the strong linkages among the markets for futures, options, and their underlying instruments, some have argued that the division of oversight responsibilities among agencies may impede the effective regulation and supervision that is essential to ensure sound and efficient financial markets.

One particular concern relates to volatility. It is frequently argued that leveraged trading in stock-index futures and options, encouraged by low margin requirements on derivative products, has led to increased volatility in the prices of the underlying stocks. More generally, it has been suggested that other inconsistencies in market mechanisms involving, for example, circuit breakers and short-selling rules, contribute to market instability. It is feared that increased price volatility, in turn, will reduce the attractiveness of equity markets and could impede the capital formation process. These concerns have prompted calls for one regulator who will take steps to remove inconsistencies that may contribute to sharp price swings.

The Board does not share the view that split regulatory authority over equity instruments has in any meaningful way contributed to volatility. As I noted earlier, we have found no substantial evidence linking margin levels to price volatility in the cash or the index-product markets. Nor have studies revealed a clear understanding of how circuit breakers and other market rules affect price movements in the different markets.

In a more fundamental sense, we believe that it is counterproductive to lay blame on one sector, in this case the market for stock index derivatives, for the increasing occurrence of wide and rapid price swings in equity markets. Rather, the volatility we observe reflects more basic changes in economic and financial processes prompted by technological advances and the increasing concentration of assets in institutional portfolios. The delegation by the public of the management of a large proportion of its assets to professional managers through pension funds and other institutions and the desire of these managers for low-cost methods to manage risk and adjust portfolios has spurred growth in the new instruments; improvements in telecommunications and computer technology mean that information on economic fundamentals will be received and translated by these managers more quickly into market prices. To the extent that price movements reflect these basic forces, efforts to restrain valatility by imposing more restrictions on particular markets or instruments could have unintended effects, resulting in significant costs on the system and a shifting of transactions activity offshore.

A second issue frequently raised in evaluating the adequacy of our current regulatory system concerns product innovation. Many of the new products being developed on futures and options markets are not easy to classify. They have important similarities to, or are otherwise linked to, a variety of existing instruments subject to different regulators; and, as a consequence, various uncertainties and frictions have emerged about the appropriate exchanges that should trade these instruments and the agencies that should provide regulatory oversight. One recent example involves the "index-participation" or IP contracts that were introduced by several of the stock exchanges, approved by the SEC for securities trading and, in essence, disapproved when the courts ruled that IPs were futures products subject to the exclusive jurisdiction of the CFTC and could not be traded off of exchanges regulated by the CFTC.

Under the Commodities Exchange Act (CEA), any commodity contract with an element of futurity cannot be entered into except on a CFTC-regulated exchange. Moreover, this act defines the term "commodity" very broadly to include not only physical commodities, like corn and wheat, but intangible contractual interests, including financial instruments. This restriction, when interpreted broadly, serves to discourage the development of new financial products that might be offered outside of the futures exchanges and tends to stifle the innovation process. In a very general sense, all financial instruments have an element of futurity in them, in that their value depends on future events. We believe the CEA can be modified in ways that preserve the public safeguards that motivated this provision, while preventing conflicts in this area from having to be dealt with by the courts and without impeding the process of innovation in equity and other instruments. Such modifications might include an exemption for transactions subject to other regulatory safeguards, sophisticated trader exemptions, or more stringent fraud liability.

ALTERNATIVE REGULATORY STRUCTURES

As I have noted, a case can be made for having only one federal agency with oversight authority over margins in the equity and equity derivative markets. This case rests not on the issue of volatility but on the fact that setting prudential margins requires judgments concerning potential future price volatility in the linked markets for stocks and derivative products. One regulator would provide a single view of potential future violatility in these markets and thereby foster consistency of margins across the various segments of the equity markets. Others would go further and transfer all regulatory authority over stock index futures and options on such futures to the SEC. This is one of the possibilities recently identified by Treasury Secretary Brady.

This alternative would help achieve consistent prudential regulation across these tightly linked markets for equity instruments. However, such a measure would result in two regulators of futures exchanges and futures clearing houses, and hence would still require a considerable amount of coordination of the part of the SEC and CFTC. One must recognize that stock index futures are but one of many futures contracts offered by these organizations—indeed, only one of many financial futures contracts. Should losses from stock index futures trading—to be subject to SEC regulation under this alternative—jeopardize the financial integrity of clearing organization or futures brokerage firm (FCM), it would threaten contract performance on all of the futures traded by the entity, includ-

ing tangible commodity futures. Similarly, a failure in the commodity futures markets could, because of the effects on the clearing organizaton or brokerage firm, have consequences for the equity markets. In another area, many exchange rules related to trading and clearing cut across a wide range of contracts rather than being specific to stock index contracts, and close coordination between the SEC and CFTC would be important in evaluating such rules.

Thus, the SEC would have an important interest in other aspects of futures market regulation while the CFTC would continue to have a strong interest in the regulation of stock index futures. The logic of transferring stock index futures to the SEC because of their tight linkage to the cash market suggests that futures contracts on other instruments also might be regulated differently. That is, Treasury futures would be regulated by the Treasury and Eurodollar and foreign currency futures by the Federal Reserve. Such a change, however, would increase the regulatory fragmentation in the securities markets and would not appear to be a particularly useful realignment. Consequently, the benefits of transferring regulatory jurisdiction to the SEC for purposes of achieving more consistency of regulation across equity instruments must be balanced against these drawbacks, and there is scope for legitimate differences of view on whether such a measure would be a net improvement.

Secretary Brady also has suggested much more far-reaching measures to deal with the jurisdictional issue—the transferring of all financial products to the SEC or the merging of the two agencies. We would urge caution in considering these alternatives. A full merger of the two agencies would avoid many of the problems just mentioned about overlapping jurisdiction in the regulation of exchanges and clearing houses, and the transfer of all financial instruments to the SEC might be accompained by the separate clearing of all financial futures subject to only one regulator. However, these resolutions would concentrate a great deal of regulatory authority over the financial system in a single agency and this has been a concern of Congress for a long time. In addition to the potential management difficulties of a larger organization, there is the risk that bureaucratic inertia in a larger agency could be an impediment to the process of innovation. We should not lose sight of the fact that under the existing system of split jurisdition over financial instruments, our financial markets have been the most innovative in the world, with many of the new products spurred by the introduction of index futures and other futures.

THE D&H RAILROAD

Mr. SPECTER. Mr. President, I am constrained to speak at this time because there are imminent developments with the D&H Railroad Co., which is nearing the end of a complex bankruptcy proceeding.

Mr. President, very briefly, I will supplement my written statement by saying I am joining as cosponsor on Senate bill 2210, introduced by the distinguished Senator from New York, Senator D'AMATO, which would call for procedures to eventuate in the Interstate Commerce Commission which might compel the granting of certain trackage of Conrail between Harrisburg, PA, and Hagerstown, MD, for use by the D&H Railroad.

This is a complex matter. I enter into it with reluctance because both Conrail and the D&H Railroad are constituent companies. For a Pennsylvania Senator, it is very much like getting involved in a dispute between two of my sons, Shanin and Stephen. The time has come when I think I must take a position because the D&H is facing critical dates on April 6, which is Friday of this week, and April 12. We are going to be in recess, probably, after tomorrow.

Mr. President, I have worked extensively on this matter, as have my colleagues. We had a meeting in Senator D'AMATO's office where we met with the chief officials of Conrail and the Canadian and Pacific Railroad. I made a trip to Taylor, PA, on Monday of this week and talked to the president of D&H Railroad. I talked to the shippers. I talked to the receivers. I talked to the people, the men and women, who will lose their jobs and the considerable number that might or will lose their jobs if the D&H is dismantled. The question pending is whether they will be sold as an entity or whether they will be dismantled. I think it is very important that D&H be sold as an entity.

I have worked extensively with Mr. James Hagen, chief executive officer of Conrail, who has been very cooperative. I talked to him repeatedly. In a conversation last Friday, Mr. Hagen told me that there was a possibility that the Canadian Pacific would make another offer which would be acceptable. I talked to him again on Tuesday, yesterday, to find that that is not likely. It may well be that D&H can be sold as an entity, but perhaps at a lesser price than if they had this special trackage from Conrail. If they can be sold, even if it is at a lesser price without the trackage, then I would think that would be the desirable alternative, rather than to compel Conrail to give up trackage.

But if, in the long run, the Interstate Commerce Commission concludes that is necessary—and that is why I am joining on this legislation, because it is very important that competition be maintained—D&H should be maintained as an ongoing railroad, not only for the employees in Pennsylvania, for the shippers and receivers in Pennsylvania and in the entire Northeastern part of the United States, but in order to maintain active competition, which is why the Delaware & Hudson Railroad was set up, to be a competitor of Conrail.

Mr. President, the promotion of competition and free trade has long been the standard for public policy in the rail industry. The Regional Rail Reorganization Act of 1973 which created the Consolidated Rail Corporation [Conrail] provided that a competitive structure be maintained. It was the concern at that time that competition in the Northeast be preserved. The final system plan of 1976 for the Northeast provided the Delaware & Hudson Railway Co. as Conrail's main competitor. Today, the Delaware & Hudson operates approximately 1,600 miles of track in northern Pennsylvania and upstate New York, and is considered the last major rail competitor for Conrail in the Northeast.

Currently, however, the Delaware & Hudson is in bankruptcy court, awaiting a purchaser that can guarantee the financial viability of the line in the future. It is reported that the groups that have considered purchasing the Delaware & Hudson have concluded that unless additional trackage rights are allotted to the railroad, any future line will suffer a history similar to the Delaware and Hudson. Even after infusions of over $100 million by the State of New York and the Federal Railroad Administration, it is obvious that the D&H route structure, as currently designed is flawed.

The Canadian Pacific Railway has nearly put a deal together that provides for the purchase of the Delaware & Hudson. The deal, however, is contingent upon a corrected route structure for the Delaware & Hudson line. That corrected route structure is subject to Conrail negotiating the provision of certain trackage rights between Harrisburg, PA, and Hagerstown, MD. Negotiations with Conrail have proven to be less than fruitful to date, placing the Congress with the responsibility that it placed upon itself years ago when it saw the need for continued competition in the rail industry.

Shippers in the region are concerned that a lack of competition, or a Conrail monopoly of interstate traffic in the Northeast, will result in an increase in transportation costs for shippers. Also, several shippers in Pennsylvania have indicated that there will be no service for them if the D&H line is not sustained, and that in many cases, they will have to relocate or rely strictly on more expensive modes of transportation. In addition, many shippers in the Philadelphia region have been seeking better rail connections to the north, specifically Canada, and to the south. Under the Canadian Pacific's plan for purchase, these connections will be served. However, as I have already stated, this desired result is contingent upon an agreement with Conrail.

The number of Delaware & Hudson railroad jobs in the region, specifically some 150 D&H employees in the Commonwealth of Pennsylvania, strengthens the call for the continuation of the Delaware & Hudson line. For these reasons, I am cosponsoring the bill introduced by my colleague from

New York, Senator ALFONSE D'AMATO to instruct the Interstate Commerce Commission to provide two competitive freight routes in the Northeast.

It can be argued that Conrail is conducting itself in the best interest of its shareholders. If one considers the history of the railroad industry, the Federal Government through the Federal Railroad Administration and the Interstate Commerce Commission long has been involved. Granted, the Staggers Act and the Conrail Privatization Act significantly limited the Government's extensive involvement, but it was the intent of Congress in the 1970's to preserve competitive rail service in the Northeast. The loss of the Delaware & Hudson Railroad is a loss of the little competition remaining in the Northeast.

Mr. President, without the trackage rights between Harrisburg and Hagerstown, no successor to the Delaware & Hudson can be successful. In response to these concerns, the Governors of Pennsylvania and New York have appealed to Conrail for their assistance. Similarly, on December 21, 1989, I wrote to Conrail's Chairman Jim Hagen urging his consideration of the request of the bankruptcy court's trustee for trackage rights.

A response to my letter dated January 3, 1990, expressed Conrail's reluctance to negotiate the trackage rights without adequate compensation. Thus far, Conrail considers none of the offers made for the trackage adequate compensation. However, trackage rights for this connection are necessary to guarantee competition and free trade.

Again, on February 23, 1990, I wrote to Mr. Hagen urging reconsideration of Conrail's position in this matter. In that letter, I mentioned the long involvement Congress has had with Conrail. I indicated that I had been asked to cosponsor legislation to compel Conrail to allow the D&H successor to have trackage rights to Hagerstown, but I expressed to Mr. Hagen that I thought it was preferable for the parties to work out a solution without congressional intervention. Since that time, I have met with Mr. Hagen and his associates on two occasions to urge a private agreement.

Conrail was created with the infusion of $7 million in Federal subsidies and has been exempted from many Federal regulations in an effort to make it profitable. When Congress passed the Conrail Privatization Act of 1986, it established a private corporation that has succeeded beyond our greatest expectations. Today Conrail boasts a positive cash-flow with little corporate debt. Most recently, I took the lead in the Senate as Congress again moved to protect Conrail from any attempts of a takeover by allowing Conrail to declare dividends and make stock purchases.

Mr. President, I worked very hard to keep Conrail out of the hands of the Norfolk Southern Railroad, because I believe such an acquisition would destroy rail competition in the Eastern United States. Now, I am placed in the anomalous position of supporting legislation to retain competition in the face of Conrail's refusal to grant trackage rights to the D&H and its successor. At this time, however, I feel there is no other alternative. Therefore, I ask unanimous consent that my name be added as a cosponsor of S. 2210.

Now Congress must move, to ensure that healthy competition exists in the Northeast. We should act to ensure the existence of a line that will not need future Federal assistance to guarantee free trade. Therefore, I urge the support of my colleagues for this important legislation.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired. The Chair recognizes the Senator from North Carolina [Mr. HELMS].

EXTENSION OF MORNING BUSINESS

Mr. HELMS. Mr. President, I ask unanimous consent that I may be permitted to proceed as in the morning hour for about 5 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. I do not object. I simply ask my friend to extend in his request the time for morning business by 10 minutes. I would like to introduce a bill and it will take about 4 or 5 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. I so modify my request.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered. Morning business is extended for 10 minutes.

THE TEXTILE INDUSTRY

Mr. HELMS. Mr. President, during the Christmas holidays of 1988 I had a telephone call from the then President-elect of the United States. He was at that time, of course, the Vice President of the United States. We exchanged pleasantries, and then we proceeded to get down to brass tacks on two or three issues.

I asked him if, as a favor to me, he would meet with two or three Senators, whomever would be in town, and one or two representatives of the textile industry to discuss textile legislation. We set a date, and we met in the Vice President's ceremonial office just across the lobby from this Chamber. We had a delightful conversation, and I was impressed with the President-elect's knowledge of the subject.

We wanted a dialog with President Bush and others in the administration regarding the problems faced by the domestic textile/apparel industry. We since have had numerous meetings and discussions leading up to the negotiations now taking place in the Uruguay round of GATT.

Mr. President, in the past few weeks, I have received notice that Milliken & Co., one of the most advanced textile companies in the world, is closing a plant in Robbins, NC, laying off 235 workers. Milliken & Co. also is eliminating 129 jobs in Spartanburg, SC, all due to the uncontrolled flood of imports. Then there is another plant based in Greensboro, in my State, North Carolina, that will shut down its American spinning plant which is situated in Greenville, SC, and that will eliminate 450 jobs.

The important thing to remember about all of this is that these layoffs do not affect merely the 800 people who lose their jobs. These layoffs affect 800 families.

If colleagues want to raise questions about the issue of so-called free trade, I want them to go with me to North Carolina and explain to these 800 families what "free trade" means.

I have already in a colloquy with Senator THURMOND talked about what our competitors overseas, including Communist China, are doing in the manufacture of textiles which they are shipping into this country in a virtual deluge.

We have worked with the administration time and time again. I have been down to the White House so many times on this question that I am going to have to buy a new set of tires.

So I think we have a pretty good understanding going with the administration. What I want to do is work with the administration, get a bill passed which will help the administration in the Uruguay round. It will demonstrate the feelings of this administration about this very severe problem.

Last night a clean air bill was passed, which is going to add to the difficulties of not only textiles and furniture and other industries but all across the country. Little business and big businesses are going to be burdened with additional problems in terms of competition.

So I say again, what we are talking about is a little understanding for the American workers in textiles. I feel that way about every other industry. I hope we can reach an accommodation with our colleagues, and with the administration, and get this problem solved.

Mr. President, as a result of our meetings with President Bush, John Sununu, and Carla Hills, I believe the administration has developed an enhanced appreciation for the situation that our domestic textile industry faces. That was indicated in February when the administration included in its GATT proposal the framework for a global quota system, which would serve as a transition for the eventual inclusion of textiles under GATT. A global quota system is precisely what the industry has been proposing for years.

Mr. President, I am pleased that our discussions that began last year have convinced the administration of the importance of establishing a global quota system. Nevertheless, we were unable to receive the assurance we needed that this global quota proposal would not be bargained away for other trade concessions. That is why this legislation is necessary. We cannot afford to wait and take a chance that nothing will be done to address the problems facing the domestic industry.

I have supported the administration's attempts to mitigate the effects of textile imports by fighting foreign barriers and encouraging the domestic industry to increase its competitiveness. We must continue in our efforts to keep world markets open. But we have made little progress in that regard, and U.S. antidumping and countervailing duty laws have proven inadequate as a means of offsetting the competitive advantages enjoyed by other countries as a result of government subsidies, export strategies, and import barriers.

The textile/apparel industry has made tremendous steps to increase its productivity. In fact, the productivity for the textile industry has increased at twice the rate of all manufacturing over the last decade. Nevertheless, the evidence is irrefutable: Imports have continued to grow at an alarming rate and capture more of the domestic market.

Mr. President, the Mulitfiber Arrangement [MFA] has not been effective in slowing the growth in imports. For example, under the MFA from 1982 to 1986, U.S. imports accelerated to an average rate of increase of more than 18 percent. During the same period, the rate of import growth into the EEC actually declined, and the growth rate in Japan remained essentially unchanged.

In addition, Mr. President, imports increased significantly from Communist bloc countries. For example, in 1986, the United States imported 383,000 square yard equivalents [SYE] from the Soviet Union and 805,000 SYE from Iran; in 1987, we imported 24,000,000 SYE and 3,015,000 SYE, respectively.

Mr. President, some of my very good friends in the Senate oppose this legislation because they say it is contrary to their philosophy of free trade. That is a term that is thrown around often in Washington. But what does it really mean to the hundreds of thousands of men and women textile workers?

I have a videotape in my office that was made a few years ago by a British journalism team who visited several textile plants in Thailand. It shows young girls working 12 to 15 hours a day, 7 days a week. They do not go to school, and many spend the night on the floor of the textile plant. That is just one example in one country.

In China, the conditions in textile plants are even worse. In fact, there is increasing evidence coming to light of the extent to which China uses forced and convict labor in its textile and other industries.

Almost all other developed countries control textile imports to an extraordinary degree, leaving the U.S. market as the world's dumping ground. These countries often use specific exporting strategies that consist of the use of cartels and government subsidies.

On the contrary, in the United States, our industries face strict wage and hour restrictions, clean water and clean air requirements, complex tax laws, and a host of other Government mandates that add significantly to the cost of production. Last night the Senate passed more Clean Air Act amendments that, when enacted, will force more textile workers out of work and will add even more to the cost of doing business in this country.

Mr. President, more than 10 percent of the entire U.S. manufacturing work force is employed by the textile/apparel manufacturing industry. It is the largest industrial employer of women and nimorities. The industry has led the world in modernization. Yet, we continue to see more and more jobs lost to foreign competition.

The facts are irrefutable that our relatively efficient domestic industry is being displaced by less efficient, government-subsidized foreign firms. We must address this situation based on a realistic assessment of our national interests, not on some vague philosophical debate about free trade versus protectionism.

I thank the Chair. I yield the remainder of my time.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. WILSON. I thank the Chair.

(The remarks of Mr. WILSON pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired. Time for morning business is now closed.

EXECUTIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now go into executive session to consider the nomination of Timothy Ryan of Virginia to be Director of the Office of Thrift Supervision.

The PRESIDING OFFICER. The nomination will be stated.

DEPARTMENT OF THE TREASURY

The assistant legislative clerk read the nomination of Timothy Ryan, of Virginia, to be Director of the Office of Thrift Supervision.

The Senate proceeded to consider the nomination.

Mr. RIEGLE addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Michigan [Mr. RIEGLE].

Mr. RIEGLE. I thank the Chair.

Mr. President, we are starting discussions this morning on this nomination. There is no time agreement in place. I envision that this debate will last 2 or 3 hours. That is an estimate. It will depend of course on how many Members want to speak on either side of the issue.

So I ask Members as we commence this debate if they have a desire and intention to participate in the debate that they plan to so indicate so we can have some sense as to how long we might go, and we can make sure that we plan in a manner where we can accommodate all speakers who want to be heard today.

The nomination of Timothy Ryan to be Director of the Office of Thrift Supervision poses a very complex question, I think, for the Senate. That is evidenced by the closeness and narrowness of the vote that was cast in the Senate Banking Committee. The nominee was reported out favorably by a vote of 11 to 10, which obviously indicates a sharply divided opinion in the committee.

That sharp difference of opinion really is based on the question of the qualification, the proper qualification, of this candidate for this particular position. As I will enumerate in my opening remarks, the person who takes this particular job gets two other jobs with it. It is a three-in-one job situation, and that is a very important consideration that Senators will want to weigh before they make their judgment on this issue.

I want to give some background as to how this nomination has come before us, because the procedure has been most unusual because of the conditions that are attached to it. It was only about 12 days ago that we knew this nomination was coming to the Senate. The nomination papers arrived on Friday, about 12 days ago, and shortly thereafter, a letter was ad-

dressed to me by Secretary of the Treasury Brady.

I want to read that letter into the RECORD, because it becomes a very important part of the foundation of events that have taken place since that time.

Secretary Brady wrote as follows:

DEAR MR. CHAIRMAN: I am writing to request expedited, favorable consideration of Timothy Ryan, the President's nominee for Director of the Office of Thrift Supervision (OTS).

Our request for expedited action stems from recent court decisions in which injunctions have been entered against OTS based on Constitutional arguments. In order to avoid any delay or uncertainty in forging ahead with the critical work of OTS under the 1989 FIRREA legislation, an OTS Director, nominated by the President and confirmed by the Senate needs to be on the job. This is the fastest and surest way that Congress and the Executive Branch can address the current uncertainty.

I know that working together we can and will address this situation, and I thank you for your cooperation and assistance.

Sincerely,

NICHOLAS F. BRADY.

I think we have had an exceptionally good working relationship with the Treasury Department and administration since the beginning of this Congress and since the time I have assumed the chairmanship of the Senate Banking Committee. Prior to today, we have taken up and confirmed, very rapidly, 29 different nominees sent up by the administration that required handling and confirmation by our committee. In fact, we handled 2 yesterday, so the total is now 31. All of that has been done without a hitch.

So when this request came from the Secretary, we responded immediately, as we properly should have, and I said to the Secretary that we would move with all deliberate speed. We, thereupon, cleared out the committee schedule for the subsequent week, and scheduled Mr. Ryan in for his nomination hearing last Wednesday. Then, after taking up the nomination on Wednesday, again using expedited procedures, per this request from the Secretary, I scheduled a committee markup that involved setting aside the normal rules of procedure so that we could have a vote on the nominee in committee last Friday, which we did. The vote reported him favorably by a margin of 11 to 10. Then, I asked the leadership that, upon the disposition of the clean air legislation which was scheduled through Monday and late into last evening, the immediate next order of business be the matter of the Ryan nomination coming to the Senate floor. This again, was in keeping with the request of the Secretary and my commitment to him that we would move this as rapidly as possible.

When we were first presented with this nomination 12 days ago, this nominee was essentially unknown to most of the members of the committee, not a person with whom we had familiarity. One or two members on the committee had an association stretching back over the years. But for the rest of the committee, this person was unknown to us. We endeavored under these expedited procedures to try to assess this nominee and to understand the qualifications and backgrounds and viewpoints that this particular nominee would have, as quickly as we could, given this request that we move at top speed.

I must say, very frankly, that when the nomination came up, I began with the presumption that this would be a nominee that I would support and would have the committee's support. But as I began to examine the background qualifications, I was really taken aback by the fact that there was no relevant background qualification that one would expect to see for a job of this enormous consequence and magnitude at this time—again, bearing in mind it is really three jobs in one. In fact, in combination, I think it is the single most important job in the country today involving direct supervisory and financial management responsibility.

The absence of professional background and qualification in that area was really quite a surprise. The committee began to take note of that and to try to fathom the meaning and consequence of that. Mr. Ryan then came before the committee. In their opening remarks, members focused on the issue of his basic qualification and training and appropriateness to this assignment. Very considerable reservation was expressed by a number of committee members. We then got into the cross-examination and testimony of the witness in the confirmation hearing. And at that point I must say—and the record is there for all to read; we have included it in the committee report—the nominee just did not demonstrate any clear grasp of the issues involved, a point of view about those issues, or give the sense of knowledge and direction that one would expect for someone qualified and able to assume this job. That was very disquieting and very disturbing—it was to me and to others on the committee. They, I am sure, will state that for themselves later, as they did that day.

We were finding ourselves in an unusual situation regarding an enormously important job and being asked to respond very quickly to a nominee about whom very little was known; and finally, upon examining the qualifications of the nominee, it looked to this Senator, and to a number of others, as if we had a real mismatch. Whatever experience and qualifications he might have, whether in labor law or ERISA background work, there was nothing in his background really suitable and logical to fit the requirements of the job that he was being asked to take on.

In the course of the nomination hearing, a number of questions were asked about that and he, to his credit, was very candid and direct in his responses to us. I acknowledge that; I did then and I do now. He indicated that he had not sought the job, that he was a draftee, and that he, himself, was surprised that he had been asked to take this job, and it happened quite rapidly. I think it all happened within roughly a month's period of time. He had not even imagined that he might be under consideration for a job like this; and then, bang, he found he was, and the next thing is, events were moving very quickly. He was the choice of the administration, and under the expedited circumstances he was finding himself being moved very rapidly through the confirmation process.

In fairness to the Senate, I think we all need to understand, Mr. President, the circumstances that attached to this nomination, because they are unusual by their very nature, they are extraordinary by their nature, and that is why we have had to set the rules aside in a number of cases even to bring the matter to the Senate floor this quickly. But I gave my word to the Secretary of the Treasury that I would do that, and I keep my word.

Let me just talk a little bit about this three-jobs-in-one issue, because it is very important for everyone to understand. Let me start with the principal job that he is being asked to take, and that is the Director of the Office of Thrift Supervision. This is a big, big job, and very difficult in today's circumstances. You will recall that in the savings and loan reform legislation of last year we made many changes. We cracked down very hard on abusive practices in the industry, but we also changed the regulatory structure itself. Prior to that legislation there was a three-person board, the Federal Home Loan Bank Board, which was the agency that oversaw the whole thrift industry and the FSLIC was the insurance arm of that agency. And we consolidated those three people, that board of three persons, into a single person, the Director of the Office of Thrift Supervision.

Instead of having a blend of three professional judgments and three people requiring Senate confirmation that would create a body of knowledge and a body of professional capability there, we consolidated those three positions into one, into a Director of the Office of Thrift Supervision, and that is now the job that we are filling for the first time.

We have not been asked previously in this body under the new arrangements to consider anyone for confirmation to that job. So, it being a

newly reconstituted and greatly enlarged job, that is the task that is before us and that is the job to which Mr. Ryan has been nominated by the administration.

An enormous responsibility now falls on the shoulders of that single individual who has to run that whole show as the executive officer of that agency. That agency now has I believe in excess of 3,000 employees, and they are adding people because they have an enormous task to deal with all of the problems in the savings and loan industry.

The 2,513 savings and loan organizations in the country today, that are not under conservatorship, collectively have assets that total over $1 trillion—that is $1 trillion—and in this town you know we often talk in terms of billions. We do not so often talk in terms of trillions. But in this case this one individual will have direct and unilateral operating authority over an industry with assets totaling $1 trillion; obviously a lot of money and a lot of responsibility in a deeply troubled industry.

In addition to that, the second job that Mr. Ryan or whoever is confirmed would take on is member of the Board of Directors of the Federal Deposit Insurance Corporation. This also is a very major assignment because Federal deposit insurance is the Government's guarantee behind the insured deposits of banks and savings and loans. The Government guarantees are having to be applied against the losses that accumulate in the savings and loan system. They have also had to be applied against losses that are occurring in the commercial banking system. We are hearing about them with greater frequency because of the falling level of asset values, real estate values particularly, foreign loans, other things, that have put real stress on the commercial banking system. So running the FDIC is a very major responsibility.

Fortunately, we have on that FDIC board a person of very substantial long-term financial experience, William Seidman. Let us hope he stays a long time, because he is a heavyweight in terms of the background that he brings to the assignment that he now has, but I do not know that he or others like him are found in numbers or are going to be around forever. That does not diminish in any way the role on the FDIC that Timothy Ryan or any other nominee to be Director of OTS would have to carry and discharge on that board. It is a major assignment, with enormous policy implications for the country. It, by itself, is easily a full-time job, and at the minimum it seems to me you would want someone with top-level financial managerial and policy and practical experience over a period of many years.

Timothy Ryan does not bring those kinds of qualifications.

The Federal Deposit Insurance Corporation today has direct supervisory authority and responsibility for over 13,188 commercial and savings banks with assets out there totaling nearly $3.6 trillion. All of that, by the way, is backed by Federal deposit insurance, which means you and me as American taxpayers, because if the thing goes off the rails and into the ditch we are going to be asked to pick up the tab again, as we have in the savings and loan situation.

So the second of the two jobs carries with it direct responsibility over nearly $3.6 trillion in assets that are supported by Federal Government guarantees and ultimately the American taxpayer.

The third job, if those two were not enough, is to join the Board of Directors of the Resolution Trust Corporation. This is the organization that has been newly established, also in last year's law, to collect the assets from institutions that have gone into default. As those assets accumulate they have to be dealt with, managed, and at some point along the way disposed of to try to recover their value.

At the present time there are assets from 400 different institutions that have come under the reach of what we call the RTC, the Resolution Trust Corporation, and their assets total $171 billion.

That is an awful lot of money. I mean it is more money than can really be comprehended in a meaningful way, although it starts to sound small when you put it beside trillion dollar financial responsibilities.

If you add up these three different major policy and decision roles that this nominee would take on, it is a combined total of about just short of $5 trillion in financial responsibility. It is incredible. We have never had anything like this before because we have a new structure and we have these outstanding problems.

I think I can say accurately on behalf of the members of the Senate Banking Committee that this is an unprecedented situation that we have all had to struggle with this. It has been a very difficult process to try to decide what is an appropriate match of training, experience, and expertise to this enormous set of job responsibilities that we have created.

Someone might say, well, maybe you are trying to give someone too much work. Maybe it should not be that way. Maybe you should not have a situation where if you get the one job you get the other two with it. Maybe that is too much. That may be so, but that is the way the law reads today, so we have to work against that reality.

But it does raise the very profound question of what constitutes sufficient qualification for that package of three jobs, starting with the direct sole responsibility for the Office of Thrift Supervision.

(Mr. SHELBY assumed the chair.)

Mr. RIEGLE. I think by any standard or definition, this is an enormous job and set of responsibilities. You want somebody of towering capacity, somebody of exceptional experience and background. At a minimum, you want somebody who has a well-established reputation as an expert in finance, who has worked on complex financial issues, who understands how financial institutions work, who would have presumably some sense of the regulatory structure and all of the broad policy questions that are going to be presented and have to be dealt with in each of these three settings.

If you were looking for such a person, you would say, it seems to me, as you look across a country of 240 million Americans, let us find an individual of exceptional background and experience. Let us find somebody who is a financial professional, not necessarily out of the savings and loan industry, but maybe out of a major corporation; maybe somebody who has been out in the private sector and in government service before and gone back; maybe somebody who was a corporate treasurer, a corporate comptroller of a major Fortune 500 firm who may have retired recently at 65, who is vital and who is prepared to come in for a year or year and a half or 2 years to give extraordinary service to the country in as demanding a financial job as we have in the country today.

There are any number of places to look for people who are bona fide, top-level financial experts in this country. They are not a handful in number. We have a lot of people in this country with years of experience and decades of ability and accomplishment that are well-known who would not be names that would come as a surprise to people, but would be people who, on their face, were so well prepared and so solid that you would repose your confidence in that person and say "I know that person is up to the level of this extraordinary job."

That has been our concern. And for me, that is the only concern: Does this candidate bring the necessary qualifications, experience, know-how, proven ability on these kinds of issues to be equal to that task in a crisis situation.

That is the nature of the job and its requirements. Now let us look at his qualifications.

He is a younger man. And that is good because he is energetic. In meeting and talking with him, I find him to be a likeable person and a person who is eager to go to work. But in terms of his professional background, this is a person whose background is essentially in labor law, particularly in the

ERISA requirements of the law. He is a member of a law firm, and a significant law firm, but he is not the managing partner of the law firm.

If you start to look for the experience on financial policy issues at a high level or other kinds of experience with major managerial responsibility—experience suggesting that he would be able to step in tomorrow and manage in excess of 3,000 employees in a field quite unfamiliar to him—then by his own acknowledgment in the record in the committee hearings, that is asking too much. It is asking too much of him.

He may be a good soldier in the sense that if he is drafted and pulled in and asked to do this job, he may be willing to say, "I will give it my best shot," but I think our obligation goes beyond that, and, quite frankly, I think the administration has an obligation that goes beyond that to search, and find someone of outstanding background to come forward and take these jobs.

I will say as a compliment to the administration, that we had two nominees yesterday that we conducted hearings on in the Senate Banking Committee to go on the RTC oversight board, two public appointees who I think are people of exceptional qualification. My hat is off to the administration for having identified those two individuals. We are going to vote on those individuals this week. I hope to get them up here on the Senate floor before the week is out and have them confirmed and in their jobs. They measure up, they bring the requisite qualifications. Good people can be found, but it takes a lot of work. You cannot settle for something less than what you need for the task at hand. Unfortunately that is what has happened here.

In the committee report, and I recommend it to my colleagues, we have printed here verbatim Mr. Ryan's background as he has submitted it to us. He has done various things—and you should read through them—and presumably he has done them well. But virtually nothing is there with respect to the top-level financial know-how and experience and high-level managerial capability and practice that we would expect to see for the scale of the task that I have just recently outlined here, which includes the job at OTS and the two related job assignments that go with it.

As it began to dawn on many of us on the committee that we had a nominee that did not appear properly qualified for this job, we then began the questioning of that witness in the committee. And again, my mind was open at that time, because I did not know what my ultimate judgment would be until we got through that hearing and we had a chance to reflect on his performance in that setting.

Nomination hearings are very important hearings. We accord them great importance, and we spent a lot of time at it. I think he will indicate he was treated with great courtesy by me, which is my practice. But at several points, Mr. Ryan himself candidly confessed the legitimacy of the concern that we had over his inexperience with financial institutions. He said, among other things, and I quote him here:

> To be quite frank with the entire panel, I was surprised when I received the call, just as those of you who are on the panel here, you've looked at my background.

He went on to say:

> I think the questions that have been raised by really all the panel members are the same questions I would raise if I was sitting in your seat. Are you qualified? This is a very tough job. Can you do it?

Even members of the committee who ended up voting for his nomination expressed during that hearing their very real concern about his lack of experience in financial services at a high level.

After President Bush introduced FIRREA—and we brought that bill through here with essentially all the major structural provisions intact—he said that we have to assure the taxpayers that they will never again—that was the key phrase, and that is a quote—be called on to bail out the industry.

And Secretary Brady himself echoed that theme in presenting the legislation to the committee on February 22, 1989.

He said the following:

> Never again should a Federal deposit insurance fund that protects depositors become insolvent. Never again should insolvent federally insured depository institutions remain open and operate without sufficient private risk capital. Never again should risky activities permitted by individual States put the Federal deposit insurance fund in jeopardy.

He said:

> Never again should fraud committed against financial institutions or depositors be punished as if it were a victimless white-collar crime.

Finally—and this is the Secretary of the Treasury speaking for the President as we set out to write this legislation last year—he said:

> Never again should the Nation's savings and loan system, which is important to our commitment to available, affordable housing, be put in jeopardy.

He was questioned about that, by me and by others. How important was this industry? Did they want to maintain it? How important was this commitment to housing?

Regarding his ability to articulate positions and policy arguments related to those central goals built into the law at the request of the administration and affirmed by the Congress, when asked specific questions about the key aspects of that legislation, I think at a minimum we ought to expect a knowledgeable response, a focused response, a meaningful response by somebody who is going to take the job.

Let us go down through it, because we asked the questions on those specific points. On the Secretary's comment, "Never again should nine Federal deposit insurance funds that protects depositors become insolvent," we asked: "What are your thoughts on deposit insurance reform? Do you think any is needed?"

Here was his answer:

> I know that the Treasury is right now in the process of collecting comments from various interest groups as to what should happen with the depository insurance system. And, I would await such judgments and review of those documents * * * I have no specific view as to should there be modifications. My only view is that we are looking, ultimately, at taxpayer funds.

Well, I can tell my colleagues this. That is a central issue, not only with respect to the job over at the OTS, but, remember, this person goes on the Federal Deposit Insurance Corporation Board.

The second point was: "Never again should insolvent federally insured depository institutions remain open without sufficient private risk capital." This is a centerpiece of the legislation, relating to one of the worst abuses. We put a stop to those abuses in the law. But when another Senator questioned Mr. Ryan about his views on capital standards, the nominee was unable to state a clear opinion. The question was asked by a Senator in the hearing: "Should there be any weakening of thrift capital standards?" Because a lot of people want to weaken them because they cannot meet the standards that are in the law. They would like the standards taken down and take us back in the direction of the problem we are trying to get out of.

Mr. Ryan said, "I probably do not have a view on that subject right now." Well, capital is right at the heart of the questions of whether or not we are going to solve this problem and solve it properly. To come in and not have some kind of an informed view on this was very disquieting.

My colleagues might say that he had not had long to think about this and he did not even know he was going to be considered, so this came as a great surprise to him. All of that is right. But that is why normally, in a situation like this, we would want somebody with a body of experience and a body of knowledge and a body of background practice, who comes in as a certifiable expert in high-level financial questions and affairs. Because then somebody is in a position to be able to express a professional view and, in fact, to be able to express, one would hope, an independent view.

This job, because its definition in law, requires independent judgment. It means you just cannot pick up the phone, if you have this job, and call somebody else in the Government and say, by the way, I do not know much about this issue, I have never dealt with this issue before, I have not thought much about it, it is now right in front of me for decision and what do you think I ought to do about it?

Well, somebody else somewhere else may have an opinion. But that is not what this job requires. This job requires that this person have an opinion and be in a position to exercise independent judgment. That is why some significant basis of relevant experience, I think, is a minimum standard that has to be in place here.

Another one of the Secretary's points: "Never again should the Nation's savings and loan system, which is important to our commitment to available, affordable housing, be put in jeopardy." This is maybe as key a point as any. The Director of OTS needs to understand where the thrifts fit into the American financial system and have a vision for the future of the thrift industry.

In testifying before the committee, Mr. Ryan repeatedly made it clear that he had no such understanding or vision, and he was asked this question directly. Another Senator said, "Do you think there is a need for a specialized thrift industry to promote housing?" Mr. Ryan said: "I have been asked the question during the past 3 weeks, whether I have a view on should there be a thrift industry. And I do not have a view on that right now." He does not have a view right now as to whether there should even be a thrift industry, quite apart from the fact that that is the centerpiece of the law that the President asked us to pass, articulated as the central reason for the law, and we have written the law toward that goal.

I was taken aback by that answer. So I interjected at that point. It is in the minutes of the hearing. I said, "Wait a minute. Did I hear that right, that you don't have a view as to whether or not there should be a thrift industry?"

And he responded by saying, "I have no view as to whether the thrift industry should move forward or not move forward, Senator."

Well, I like the candor. But that is not sufficient to outweigh the lack of a point of view or the lack of a substantive foundation from which to derive a point of view. This is really not the job for on-the-job training, not when you have $5 trillion at risk; $1 trillion of it under his sole executive responsibility.

Let me give my colleagues another one. The question came up about who should regulate the sale of securities by thrift institutions and whether it should be the SEC or the Office of Thrift Supervision. This is a very important question. He was asked, "You know that some stand-alone thrifts offer their own securities. You are familiar with that? * * * Who, in your opinion, should, if this is a stand-alone thrift—not a holding company, but a stand-alone thrift—who ought to be regulating those securities?"

Mr. Ryan: "I have no view on that right now, Senator. I have not given that any thought. I have not looked at pluses, minuses."

He goes on in that vein. And the same thing with respect to other questions. I could take the rest of the day here going down through these. But listen to this one on independence, which, as I say, the law specifically requires. When we asked him a question about his independence and the responsibility to be an independent regulator, he was asked by one of the Senators, who would he rely on for advice and counsel? And his answers were that he would rely on the Treasury Secretary and on the Deputy Treasury Secretary, who are fine men and certainly places where one might get advice. But in that context, for someone running an independent agency that has been tucked in under the umbrella of the Treasury Department, he needs to assert clearly and strongly his independence from those very individuals.

Not that he does not listen to them, not that they are not colleagues. But if you are starting out without any real background and experience and you are looking for insight and guidance in order to carry out your independent role in that job, that is really not the proper place to look for it. I say that with no disrespect to those men, but, once again, it violates and cuts against the very independence question and issue that is set out by law.

Why is that important? We just had had a veryl distinguished person—I might say to the Senator from Virginia—a fellow named Mr. Kearney, who was serving over at the Resolution Trust Corporation. He came in as the executive officer there with a distinguished background and had all of the prerequisites that we would hope to see, of somebody with years of experience at high level finance and so forth. He got into the job. He was there 2, 3, 4 months—I cannot give the precise amount of time—and he suddenly resigned.

It was a great shock. As we tried to piece together what had happened, it is clear that he resigned because he was not given the independence to do the job. And because he is a professional, he was asked to come in and exercise independent judgment. When he found he was not given that latitude, he could not function properly, and he left. That did not happen 10 years ago or 5 years ago. That just happened.

So when those of us raise this concern about independence, it is not out of thin air. It is because we have seen some instances that put that into serious question. Once again, you come back to the issue of qualification. You have to rely on the nominee. You have to make a judgment about the nominee himself. Is this a person who, by training and experience, is equipped and ready to be able to exercise independent judgment? Not that he might not want to, not that it might not be his desire to, but if he lacks the training and the experience and the qualifications, is he able to, even if he can ward off pressures from any other direction?

I might say, as the Senator from Virginia knows, we have talked about that this very morning. The Senator and I met with the nominee this morning to discuss the issues, and one of the issues we discussed was the independence issue because it is a matter of central importance, not just to this Senator as chairman of the committee, but I think to any Senator who studies this issue.

Some are asserting, "look, you have the court case out there, there is a stay in the court case; the stay in the court comes off on the 11th of this month and we are wedged up against that; we have to put somebody in this job right now. So even if you have reservations about qualifications and even if we could not find somebody out there with towering qualifications, we found this guy, here he is, and we need somebody in the job, so take him right now."

You do not take him for just right now, you take him for 5 years because this is a 5-year term. And you put him in three jobs, not just one. It adds up to $5 trillion worth of responsibility, the single biggest financial job in the country today. We are being asked to hurry somebody into that position who has no serious financial background and training that is relevant to these kinds of responsibilities.

I am mindful of trying to meet the other need, the fact that there is the court problem outstanding, We tried to come up with an answer to that because we want to solve the problem, too. So we have drafted a piece of legislation. It is not very long. It is only a page long, and should this nominee be voted down today, we have a legislative alternative that we can offer, and I assume it will be supported by Members on both sides of the aisle, to provide the President with the legal authority under the Vacancies Act to be able to put in place a temporary director of the Office of Thrift Supervision that will stand constitutional muster and, therefore, solve the issue of there being a person in place who has the

full legal authority to be able to act from the minute that person was so designated by the President.

It would be the President's call as to who he might name under that kind of an arrangement, that clearly is a stopgap. But it solves the problem to give us time, should the nomination be turned down today, to find a qualified nominee to come forward and take on this term over the full 5 years.

So there is a way today and tomorrow to answer that problem of the court issue without accepting this nominee. Frankly, it is a much better answer.

As a matter of fact, this vacancy has been known about for about 4 months. This just did not happen that this job became vacant. It has been vacant for quite some period of time. The administration, I think it is fair to say, had time to go out and search this country. Of course, this administration is in a good position to know a lot of the chief financial people in the country and other people in the country. When you go on a talent hunt of that kind, it is not like looking for a needle in a haystack. There are logical ways in which you proceed in that kind of a talent search.

So there was plenty of time, in my view, for somebody of exceptional qualification to be found, but that did not happen. We are now living with the result of that. And somebody who lacks, in my view, adequate qualfication is now before us and we are being asked to shoehorn this particular nominee into place to solve this other problem, and then let us just hope it all works out.

That is what has brought us here. We have tried in every way I know how to be fair in this process. We moved it faster than it has ever moved before. I think the Senator from Virginia, who strongly supports the nominee will attest to the fact that everything we have been asked to do to expedite this nominee we have done. I know of no time when the process has moved any faster to try to accommodate a request coming from the executive branch. I will do the same thing again because I believe that ought to be our attitude. I want to work with the administration; I want to work with this President. I feel very strongly about it. Everything, we have done since I have taken this chairmanship is a reflection of that and I want to do it on a bipartisan basis. I feel very strongly about that, as well. It is easy to feel, if you are somebody in the course of your time in the Congress, who has served both parties. This is my attitude, and that is how I run the committee, as everybody on the committee knows.

So we have an answer here with respect to an ability to enable the President to fill this position, should this nomination go down today. There is an answer for that and people ought not to be stampeded by that argument because that really is a false argument. There is a way to handle this matter in an orderly fashion that I think is a far superior answer in terms of gearing ourselves for the long pull. After all, that is what we are here to do; and that is, to put people in place who are going to be able to perform up to an exceptional standard when matched against the single biggest financial job in the country today that is out there to be done.

I am going to yield momentarily, if I may, to the Senator from Virginia. I just want to make one other closing comment, and that is this. If the Senate confirms Mr. Ryan today, I am going to work with him. And I have said that. The issue I have raised here is an issue I believe has to be raised with respect to qualification. We have our constitutional duty to advise and consent, and that is what we are carrying out here today. It is proper that we do so. Should it be the judgment of the Senate to confirm this nominee, I intend to work with him.

I must say from our personal conversations, I like the nominee, in terms of personal exchanges that we have had. People who know him and have known him for a period of years, whom I respect greatly, one of whom is seated here, the Senator from Virginia, thinks he is an exceptionally able person, while—my words not his—he may not have the background in this area, there are others around who know him personally who feel he is capable of doing very good work.

In any event, the issue I raise is in no way personal. It is an issue of qualification when matched against the extraordinary nature of the needs attached to these three jobs at this time. I respect the right of every Senator to make their own judgment on this. And that is the great beauty of the Senate, that every Senator has to decide for himself or herself.

One of the most important individual decisions that any of us makes relates to the nominees that come before us for confirmation. They are never easy. When there is a question, you agonize over it because you want to be fair; you want to do the right thing; you want to discharge the obligation of judgment as best you can.

I have attempted to do that, and I think my colleagues on the Banking Committee on both sides of this issue, obviously, are closely divided. When you have a one-vote margin, it shows this thing cuts right through the center of the judgment of the committee in terms of the suitability of this nominee. I ask the Members of the Senate to evaluate the facts that I have and others will put forward in deciding that this was not a nominee that ought to go forward into these positions.

Mr. President, if I may, Senator WARNER and I spoke earlier.

Mr. GARN. Mr. President, if I could, we had originally thought——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator?

Mr. RIEGLE. Let me yield the floor. I will be prepared to seek the floor again when Senator GARN finishes.

Mr. GARN. Mr. President, originally we discussed Senator WARNER would follow Senator RIEGLE. However, we have gone back to the original order, and I will give my initial comments and then Senator WARNER will follow at a later time.

Mr. President, I rise in support of this nomination. I feel, on the general subject, a great deal of frustration, however, in dealing with the savings and loan crisis because as I read the press reports and comments on the floor, and on the floor of the House, and general discussion around the country, it would seem that some think this is a crisis of the last 2½ years. There seems to be very little understanding of the overall nature of the problem and how long it has been building.

I think most of the experts would agree that it started back in the 1970's, and I am certainly not going to go into detail on that, the interest rate mismatches, the 21-percent prime in the late 1970's and thrifts that had lots of 5-, 6-, 7-, and 8-percent mortgages for 30 years and were paying 17 percent to try to attract deposits. You did not have to be too bright to figure out you cannot do that for very long, borrow money at 17 percent and loan it at 8 or 9 for 30 years and stay in business.

So there are a lot of very difficult choices that were not made over the years. The Senate over and over again has tried to have financial modernization legislation and has passed it overwhelmingly, by as much as 90 something to 2, the Proxmire bill in 1988. Unfortunately, the House of Representatives has never seen fit over nearly two decades now to go along with changes that could have averted this crisis.

There is certainly enough blame to go around, for administrations, for Members of Congress, both the Senate and the House. I think we have focused entirely too much on trying to find blame, scapegoats, rather than addressing the problem. I think it should be evident when we come to the floor with deadlines like we have now that we simply have not done our work for a long, long period of time.

Having said all of that, I compliment the chairman of the Banking Committee for moving expeditiously to this nomination. We have waited, and I have been critical of the administra-

tion myself for not getting a nominee up here sooner.

I recognize the difficulties of finding someone to take a job that has been so maligned and been made so difficult over the last few years. So when you talk to people and ask them to come into this type of a situation that is a crisis and involves billions and billions of dollars of taxpayers' money, it is not easy to find the type of people you want, who are willing to make very large personal and financial sacrifices to take the job.

I can remember several years ago, when John Shad was nominated to be Chairman of the Securities and Exchange Commission. During his hearing, I questioned his judgment when I found out that to avoid any possibility of conflict of interest he had to sell stock that cost him $2 million in capital gains taxes, in order to accept an $80,000-a-year job. That is either incredible dedication or incredible stupidity; I choose to think it was dedication. In any event, that was several years ago, but it does require great sacrifice for people of talent and ability to come and take that job.

That is certainly true in Mr. Ryan's case. He will make an enormous financial sacrifice in his career and practice of law to take this position. I admire his willingness to do it. He was a draftee. He did not seek the position.

But we are finding that we are setting up such standards in this body, totally beyond the issue of this particular OTS job. I am not sure of the quality of people we will be able to attract not only because of the personal and financial sacrifice, the living in the fishbowl, the difficult decisions to be made, but the new ethics climate that we are creating.

I made the comment in the committee that I am not sure we could confirm anybody to positions except Mother Teresa. I thought that was a safe comment. Yet in the press yesterday I read where Senator GARN was wrong because the writer of this article said I should have known that Mr. Keating had given thousands and thousands of dollars to Mother Teresa and her causes and, therefore, she obviously could not be approved for this position because she has ties to Mr. Keating.

So I do not know. Maybe I cannot find anybody in that particular situation, the perfect individual. This is a job that a few years ago simply was not known. People did not know what it was. It certainly was not a highlight. Most of the nominees that came before the Banking Committee in the 15 years I have been in this job, through four Presidents, were usually approved by unanimous consent on this floor with no debate whatsoever, until it became a highlighted position because of all of the details.

So with that background, let me respond to a few of the comments my distinguished friend and chairman from Michigan has made. Again I compliment him on the speed of the hearings and the speed of the markup because of the difficulties of the court-imposed deadlines. The chairman and I have been friends for the last 15 years. We have worked together on this committee. When I was chairman, he was very helpful to me, and we have had a very fine, nonpartisan relationship. I state that because I do not want to be misunderstood when I disagree on the substance of this nomination.

There is absolutely no question whatsoever that the OTS position is an extremely important position, and I do not mean to minimize that. But, on the other hand, I do not think there is any need to exaggerate the scope of the position. Opponents of this nomination in the Democratic views have made the assertion that the Director of the Office of Thrift Supervision position is a $5 trillion job by adding together the aggregate assets of all institutions regulated, insured, or under the control of FDIC, OTC, and RTC. After totaling all of these assets, it is stated, and I quote from the report of the committee, "Never before in our national history has so much power and responsibility been consolidated in the hands of a single financial institution's regulator."

That simply is not true. We had the Federal Home Loan Bank Board that did have a three-member board with a chairman that had responsibility not only for all the regulatory functions of the thrift industry, but in addition all of the regional Federal Home Loan Bank Boards, and the Federal Savings and Loan Insurance Corporation. What did we do in FIRREA? We said we are going to have a single chairman, which is correct. But we are also taking away the oversight responsibilities and management of those 12 regional banks. Furthermore, the largest part of the problem is being taken away; FSLIC is being placed under FDIC. So FDIC's responsibilities grew dramatically. The authority and responsibility of the OTS Director were reduced very dramatically from the previous responsibilities of the Federal Home Loan Bank Board.

And furthermore, they were placed under the Treasury Department, not an independent agency anymore. Furthermore, there are no responsibilities for liquidations or mergers at all.

OTS is now responsible for the regulation of some 2,500 thrifts, but it does not have all of these other responsibilities.

My friend from Michigan referred to the No. 2 and No. 3 jobs, and it is true that the OTS Chairman has two other responsibilities with both the FDIC Board and the RTC Board. But certainly it is not fair to include the liabilities and all of the problems of those two agencies as if somehow this were a single regulator because both of those are five-member boards. It is the same board for both. Mr. Seidman is still Chairman of the FDIC. That is his responsibility. This Chairman of OTS will be one of five on these boards.

So, yes, he has some responsibility there, but, certainly, not the total responsibility of the daily operation of the FDIC or the RTC. I know Bill Seidman well enough to know he is not going to let anybody come in and tell him how to run the FDIC. He has been one who has had courage. He is never unwilling to tell us, as an oversight committee, what he thinks on an issue.

So I just want to put that back into context. This is again a very, very important position. I do not want to minimize that. But to say "never before in our national history has so much power and responsibility been consolidated in the hands of a single financial institution regulator," simply is not true.

The Federal Home Loan Bank Board's responsibilities have been diluted and placed under the Treasury. That is another thing that is interesting, the issue of independence. I seem to remember in my advanced middle age—and my memory is not failing me—this Senator opposed both the administration and the committee, and the House of Representatives on this issue of placing OTS under Treasury. I made the comments over and over again in the committee, in the markup, on the floor, and in the conference that I thought we ought to keep this as an independent agency, the same as the FDIC so that they were not subjected to any possible political interference with this administration or any other.

I was overwhelmingly opposed. I was defeated. Now I hear all of this talk about independence. I wish I had heard that last summer. I wish my amendments had been accepted. I wish OTS were still an independent agency. I wish we had not created such an incredible, crazy-quilt organizational chart of RTC and an oversight board and Treasury. I would much rather be able to call up an OTS Director, or even a three-member board if we wanted to leave it that way, and say, "What are you doing?" without having this maze of organizational charts placed in between us.

So I want to emphasize again the importance of this position, but it is not nearly as important as it has been indicated.

Also the assertion that the OTS Director carries with it the responsibility of nearly $5 trillion in assets—this includes $3.5 trillion held by 13,188 com-

mercial and savings banks—under the regulatory supervision of the FDIC. The fact is that the FDIC is a supervisor of only 8,000 State nonmember banks with less than $1 trillion in assets. The OCC, Office of the Comptroller of the Currency and the Feds supervise and regulate the other banks insured by the FDIC. Certainly the OTS Director has not been placed on any OCC oversight board.

So again we need to keep that in perspective.

Opponents of Mr. Ryan now state the independence of the office is part of the very fabric of the statutory structure. Mr. Ryan is criticized for stating that he would consult with other financial institution regulators as well as Treasury Department officials for counsel and advice.

Again, I ask if independence is so important, why did not my colleagues support my attempt to keep it totally independent last summer? Also interesting, is the criticism of saying he would consult. I would quote where this is established in the law—"there is established the position of the Director of the Office of Thrift Supervision who shall be the head of the Office of Thrift Supervision and shall be subject to the general oversight of the Secretary of the Treasury."

I oppose that provision, but nevertheless it is there. So I do not think it is fair to criticize him when he said he will consult with them when the law requires that he be under the general oversight of the Secretary of the Treasury.

FIRREA does limit the ability of the Treasury to intervene in specific cases or from requiring prior approval of congressional testimony. The statute clearly contemplated general oversight of the Secretary of the Treasury. The OTS is far from independent. There are many, many statutory provisions that restrict its independence when it was placed in an executive department.

For example, under the Paperwork Reduction Act, OMB must approve all OTS forms. OMB reviews agency regulations under the Regulatory Flexibility Act.

In any case, Mr. Ryan stated that he would consult with Treasury and other regulatory officials. I do not think that shows a lack of independence. I think maybe it shows some common sense when the law places him in that position. Again, I oppose that part of the law.

I specifically questioned him in the committee on his independence, and I will quote the rest of his statement.

> My intention would be to consult not only with the Treasury but other financial service agencies in the Government, which would include the FDIC and the head of OCC. Once a decision has to be made, and if that decision is mine, I will step up and make that decision. You can count on that. I would pledge that to you.

Mr. President, I appreciate the opportunity to clear up that part and bring it back into balance as far as the responsibilities and the issue of independence. But I rise specifically in support of the nomination of Mr. Ryan to be the Director of the Office of Thrift Supervision. This, as I have stated, is an extremely important position.

The Director of the Office of Thrift Supervision has the responsibility of supervising and regulating all of our savings associations, including both Federal and State-chartered institutions. He is the official who must implement the new prudential standards found in the savings and loan legislation passed last year. This individual must determine which savings associations are to be placed in receivership and closed down, and which are capable of surviving and should be saved.

Further, the Director of the Office of Thrift Supervision is also a member of the five-member FDIC Board and RTC Board. Thus, the OTS Director will also have input—and I stress input—into FDIC and RTC decisions, not control over the total of all those assets.

The President after careful consideration selected Mr. Timothy Ryan as his choice to fill this very important position. The committee did not let the urgency of this nomination interfere with its duty to fully consider the qualifications of the nominee who, only after a full and thorough hearing, the committee recommended that the Senate confirm. In taking the action the committee indicated its belief that Mr. Ryan was qualified for this position.

Through his record of public service, and professional achievement, Mr. Ryan has demonstrated that he has the experience, the managerial enforcement skills, toughness, and leadership qualities necessary for this position.

As the Solicitor of Labor, he was responsible for supervising over 1,100 employees, including 600 attorneys. He directed the legal policies and enforcement activities of this Department. The position of Solicitor gave him considerable experience in administering and enforcing a wide range of complex regulatory statutes having wide impact.

During his tenure in the Labor Department, Mr. Ryan earned the reputation of being a tough enforcer. He was especially successful in rooting out corruption in the pension area. Mr. Ryan's public responsibilities include serving as a member of the Overseas Private Investment Corporation, and on the Council of the Administrative Conference.

In the private sector, Mr. Ryan has achieved significant success and is currently a partner on the executive committee of a distinguished national law firm. His areas of expertise include representation of clients in pension matters, one of the more complex areas of regulation and financial law in our legal system.

His particular experience in finance-related matters includes direct involvement in issues relating to mortgage and other asset-backed securities. His practice also involves issues relating to financial guarantee insurance and its relationship to risk-based capital standards applicable in depository institutions.

During the committee hearing on this nomination, Mr. Ryan provided frank answers to all questions asked of him. The hearing record clearly indicates Mr. Ryan's commitment to carry out the course set by the Congress in the FIRREA legislation.

Mr. Ryan also expressed his conviction that any major policy changes that experience dictates should be made would be brought promptly to the attention of Congress.

Mr. Ryan was absolutely clear about several important points. The position of Director of OTS under his tenure would be totally nonpartisan and apolitical.

While he would consult with the other financial institution regulators and the Treasury Department, he promised to make his decisions independently, even if those decisions are not politically popular. He emphasized his commitment to a strong enforcement effort and the development of an aggressive program to root out fraud and abuse and recover funds from wrongdoers. He pledged to devote his full efforts to implementing and enforcing the FIRREA statute through vigorous supervision and enforcement.

The primary criticism raised of this nomination is that Mr. Ryan does not have a background in the financial services industry and that the Director of the Office of Thrift Supervision must be a "bona fide financial professional." However, the Director of OTS is responsible for the overall administration and policy direction of the agency. Mr. Ryan's primary prior experience demonstrates his administrative ability, as well as his capacity to master complex and technical subjects.

The Director will have the benefit of the financial institution expertise in OTS, the Treasury Department, and other financial regulatory agencies at his disposal. In the position for which he is nominated, the ability to manage and utilize such technical experts is much more important than being a technical expert.

The importance of executive skill, rather than technical expertise, has been recognized time and again by Presidents. For instance, Secretary of State Baker, prior to his appointment, was the Secretary of the Treasury.

Joseph Califano was a partner in a Washington law firm and served in the Department of Defense before being appointed Secretary of Health, Education, and Welfare. Elliot Richardson, a distinguished attorney, was Under Secretary of State prior to being appointed Secretary of HEW. He thereafter served in three other Cabinet positions—Secretary of Defense, Commerce, and Attorney General, as well as being Ambassador to Great Britain—during his Government service.

Thus, not only is it not unprecedented, it is not even unusual for a high-level Government appointee to be from outside of the industry or area which he or she is asked to regulate.

I made the comment in the committee that it was certainly not unusual in the private sector, when some company needed a new CEO, to go outside of their company, outside of their industry, in order to hire somebody who had no particular expertise in an area and, yet, had managerial skills.

I read the Washington Post this morning, and I quote:

Who is better for the top job at the world's largest auto company? A homegrown product like Robert C. Stempel or an outsider who would shake up the status quo and bring in fresh, unconventional ideas?

GM gave its answer to that question yesterday when it named as its next chief executive Stempel, a classic organization man who has spent the last 30 years with the company.

But a number of management experts say that may have been the wrong answer. In making the appointment, they said GM may have given up the chance to throw off its hidebound ways and embrace new managerial leadership.

"I would go so far as to raise the heretical idea that they would benefit from not only going outside the company but the industry," said Donald Hambrick, a business professor at Columbia University who specializes in corporate strategy and executive leadership. "They need exciting, radical new ideas for running that place."

I am not here today telling people whether they should go inside or outside to hire. I am making the point that this is not unusual and that management experts often recommend bringing in somebody from the outside.

If there was ever an industry that needs to be shaken up, I think it is fair to say that it is this one. Somebody needs to go in there with a meat cleaver. I asked questions about that. Would he go in and be willing to make tough decisions, rather than go along with what has been going on for too long, with an agency that for too many years was an advocate and friend of the industry. That is not what regulators are supposed to be.

I am the first one to admit, along with my colleague from Michigan, and it comes from the nominee himself, that he does not have extensive experience within the savings and loan industry. But I have also been on this committee for 15 years, when people, for various positions have been nominated, where the committee, both sides of the aisle, through four Presidents, criticized nominees because of their experience and potential conflicts of interest.

There are lots of qualified people who have experience in the industry, but I suspect my colleagues on both sides of the aisle in that hearing would have been very careful, particularly in the situation with all of the disclosures that have been made about fraud and abuse within the S&L industry. He would have been extensively grilled on potential or perceived conflicts of interest.

I wish it were possible to find somebody with extensive experience within the industry, who also had absolutely no perception of a conflict of interest.

My choice at this point, if I have to choose, is somebody who would be a tough regulator, who has proven experience in managing a large department of attorneys, Solicitor of the Labor Department, and who is recommended by so many distinguished people, as shown by the letters that were placed in the RECORD yesterday, that I would opt for that, and I sincerely believe that he would do a very good job.

Finally, it is vital that the Senate act now. The critical enforcement authority of the OTS is being threatened in the courts. This authority is crucial because it empowers the OTS to place thrifts operating with inadequate capital into conservatorship or receivership in order to prevent continued losses.

While the ruling has been stayed, the stay will expire while we are in recess. We have criticized regulators for inaction because of the mounting costs associated with delay.

The President has served up a nominee; the ball is in our court. The time to act is now, and I recommend to all of my colleagues that they vote to confirm Mr. Ryan. I believe that, on the basis of the record, he would do a good job in this position.

Mr. President, following Mr. Ryan's nomination hearing before the Banking Committee, I submitted for the record several questions. Today I received from Mr. Ryan the answers to these questions. I ask unanimous consent that the questions and answers be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

APRIL 4, 1990.

LORY BRENEMAN,
Chief Clerk, U.S. Senate, Committee on Banking, Housing, and Urban Affairs, Washington, DC.

DEAR MS. BRENEMAN: Enclosed are my answers to the questions submitted to me by Senator Garn.

Sincerely,

T. TIMOTHY RYAN, Jr.

ANSWERS TO QUESTIONS FROM SENATOR GARN

Q. 1. During the hearing you indicated some concerns relating to the future of the thrift industry "as we know it today." Please elaborate on this comment.

Answer. I believe the job of Office of Thrift Supervision is to enforce the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) and ensure the safe and sound operation of the thrift industry. Only the market can determine whether the thrift industry will look the same over time under this new set of rules.

The thrift industry has historically served a fundamental role in providing residential mortgages to consumers. However, because of the huge losses suffered by the industry and the taxpayer, last year's thrift legislation changed the basic rules under which thrifts operate—more capital is required; more restrictions have been imposed on risky thrift investments; thrifts initially must pay higher premiums on deposits than banks must pay; and thrifts must maintain a higher percentage of their assets in mortgage-related investments under the Qualified Thrift Lender Test.

These changes and others were designed to protect against another thrift crisis, and I believe that most of them are absolutely crucial to ensuring safe and sound thrift operations—especially the new capital requirements.

But I believe that no one can predict at this time exactly how the industry will adjust to the new requirements. Obviously, the industry is in a difficult transition period, with intense competition coming from several quarters in the industry's fundamental business of mortgage lending. Will the industry stabilize and prosper with its core business? Will more banks acquire thrifts and will more thrifts seek to convert to banks? Will thrifts need to adjust the way they do business in order to compete?

I believe that we simply cannot know the answers to these questions until we know more about how the market reacts to the new law and whether it will drive new mechanisms to make housing available.

But I do know this: the job of the Office of Thrift Supervision is not to promote the industry or ensure its survival at any cost. FIRREA made this point absolutely clear. At the same time, neither is its mission to put the industry out of business. Instead, as mentioned above, its primary concern is the safety and soundness of the industry.

Q.2. The FIRREA legislation requires OTS to apply stringent capital standards to savings associations. In general, these standards may be no less stringent than the standards applied by the Comptroller to national banks. What is your view with respect to the importance of capital in regulating savings associations? Will you implement the standards found in the FIRREA Act?

Answer. I believe that capital is critically important in regulating savings associations. A large part of the problem that led to the thrift crisis was the fact that thrift owners did not have their own money at risk. This created perverse incentives to engage in extremely risky activities in order to gamble their way back to solvency. If they succeeded, they stayed in business and got rich; if they failed, the deposit insurer and the taxpayer were stuck with the losses.

Raising thrift capital standards to levels no less stringent than national bank capital

standards was probably the most important regulatory reform in FIRREA. Only if thrift owners have their own real capital at risk will they regulate their own behavior to take the prudent risks necessary to be profitable without exposing the deposit insurance fund to excessive losses.

If confirmed, I would of course implement both the letter and the spirit of FIRREA's capital standards. As I indicated at the hearing, these standards appear to be tough, but reasonable and necessary.

Q.3. Presently, securities issued by free standing savings and loans are regulated by the OTS, just as securities issued by banks are regulated by the appropriate Federal banking agency. Some have argued that these securities should instead be regulated by the SEC. In your testimony you stated that you have not yet reached a decision on this issue. What factors will you consider in formulating your position on this question?

Answer. I have not taken a final position on this issue because it is exactly the kind of complex question that requires careful study. As you know, there are substantial differences of opinion on this issue.

The SEC has typically argued that principles of "functional regulation" demand SEC regulation. Bank and thrift regulators have traditionally argued that depository institutions are different from other publicly traded companies because of the publicity-sensitive nature of their business and the level of federal supervision to which they are already subject—in these circumstances, they argue, it only makes sense to have one regulator for all fundamental issues who is completely familiar with the institution's activities.

I am not entirely persuaded by either argument, and if confirmed, I intend to take a careful look at these and other relevant issues in reaching a conclusion.

Q.4. Legislation was recently introduced to prohibit the sale of uninsured securities in the lobby of a bank or thrift. Many in the financial services industry feel that this measure is too broad and may interfere with the ability of financial institutions to engage in commonly accepted transactions, such as the sale of mutual funds in lobby space. They argue that disclosure requirements and other safeguards are more appropriate than an outright ban. Others are concerned about the potential for misleading customers who are likely to mistake these products for insured deposits. During the testimony, you indicated that you had not yet reached a decision on this issue. What factors will you consider in formulating your position on this question?

Answer. I believe that there have been obvious abuses in the sale of financial instruments that resemble insured deposits, which clearly need to be addressed. I understand that different versions of legislation have been introduced in the Senate and the House of Representatives, with the OTS also in the process of issuing regulations.

As I indicated in the hearing, I do not yet have a view on which of the different approaches is the correct one. I generally believe that disclosure is the first option that should be carefully examined in circumstances like these. However, more restrictive measures appear to be necessary where debt securities can be easily confused with insured deposits. But I remain concerned about overly broad measures that might needlessly impede the ability of thrifts to raise much-needed capital. These are the kinds of factors that ought to be weighed in any final determination.

Q.5. During the hearing, an issue arose concerning financial guarantees that are backing bonds issued by local governmental units. Please explain how these guarantees affect capital, and whether or not the position you advocated as an attorney would result in lowering capital standards.

Answer. The position I advocated as an attorney would not have lowered capital standards for thrifts. As I explained at the hearing, we asked for parity of treatment between two kinds of capital instruments with equal degrees of risk. I believe that is the correct public policy result, and I do not think it represents a lowering of thrift capital standards.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, first I want to thank the managers of this nomination for the courtesy they have extended the Senator from Virginia throughout this process. I shall return to that later in my remarks.

The Senator from Virginia is going to focus on what he believes is the central issue before the U.S. Senate, as it discharges its constitutional responsibility under the advise-and-consent clause. One word, first: Does this man possess "leadership?" That is what we need to day as we move into the eye of the storm surrounding the savings industry, to offer help, guidance, and make the tough decisions and provide leadership. I believe, unequivocally, that he does have that qualification.

But leadership starts at the top, and that is the President of the United States. This morning I conferred with the President's chief of staff. He advised me that the President is solidly behind this nominee, despite concerns—and legitimate concerns by some Senators—as raised in the press and editorials this morning, about whether or not the President and his administration are trying to distance themselves from the S&L situation.

Quite the contrary. The President is there to provide the leadership from the top. He cannot, nor should his principal deputies in the White House or the Secretary of Treasury, try and micromanage the office to which I hope the Senate of the United States will confirm Mr. Ryan. Instead they have carefully selected an individual who, in their judgment, can provide that leadership, which is so essential.

The Secretary of the Treasury—and it is fortunate that that distinguished American was once a Member of this institution, a former U.S. Senator—along with the President, Tim Ryan, if confirmed by the Senate, and Bill Seidman, Chairman of the Federal Deposit Insurance Corporation, will be a strong working team.

When Tim Ryan came to me some weeks ago and said, "JOHN, I have been asked to look at this opportunity, and I seek your advice," I gave him Seidman's name. He knew Seidman slightly, but I said, "Go talk with him right away, and determine whether or not, if the President nominates you and if confirmed by the Senate, you can work together as a team." And he did that.

He also talked with a number of other leaders in the banking industry and the financial community. Some of their comments have come forward voluntarily and, as stated by the distinguished ranking member, are included in material that I and the ranking member have provided each Member of the Senate. I hope that Senators will find the time, if they have not, to look at that collection of very important contributions from the private sector; acknowledged leaders who repose in Tim Ryan the confidence to have the leadership to carry forward with this position.

Tim Ryan also will consult, as Director of OTS, with the housing industry, the industry that is really in partnership with the savings institution.

So I am confident that Tim Ryan will become an integral member of a team, from the top right on down through to the private sector. He will use his ability as a leader to work as the quarterback in this tough situation.

Mr. President, I also express my appreciation to Members of this body. It has not been an easy task for the distinguished chairman or the ranking member or others to face a controversial nomination. I know without exception that each of the Members of this body I approached, and I think I have approached almost every one, has assured me that they will give a fair and objective consideration to this nomination. That is all that can be asked, and that is all that should ever be committed. And that process started, of course, with the chairman, who eventually reached his conclusion along with his colleagues on the committee.

I thank those colleagues, not members of the committee, who at my request took the time to meet with the Secretary of the Treasury, as well as Tim Ryan. Incidentally Tim Ryan is still available this morning and will be throughout this deliberation for any Senator wishing to consult with him.

So I think that the Senate is proceeding fairly and objectively, and I know we will reach an outcome which in my judgment will withstand public scrutiny and prove that this institution can be fair and objective.

Now, Mr. President, Tim Ryan, the man. I have known him and his wife for nearly 14 years. They are a most unusual couple. They are of a generation that came along in some of the most turbulent years in the modern history of this country. Both of them have gone on to accept leadership positions. I emphasize "leadership positions." Tim Ryan has risen through the ranks of his chosen profession, that of law, to where he is now, one of

the most influential partners of a very large international law firm. Those of us who have been in the practice of law know that that is tough competition, not only to become a partner, but then to go on up and become a member of the executive committee of an important law firm.

No one questions his intelligence. No one questions his judgment. Not one single Senator with whom I consulted questions this man's honesty or his personal integrity.

Therefore, I think while experience in certain technical areas in this industry might well be a helpful part of the portfolio an individual could bring to this office, it is not, as we say in the law, the sine qua non; it is but one of a number of factors.

The paramount factor again I say is the leadership and the ability to take charge of several thousand public servants working in the Office of Thrift Supervision; to provide that leadership and work as a member of the team.

Finally, the individual taking on this responsibility has to be an individual of firmness. We use the word "toughness" back in my State. I think any Member of this body putting himself or herself in the position of this nominee and what this nominee, together with his silent partner, the spouse—have endured would agree they are "tough." Together as a team, they have weathered this storm with strength and conviction. They are ready and willing to take on this responsibility, given that opportunity by the Senate.

I yield the floor.

The PRESIDING OFFICER (Mr. WIRTH). The Senator from Illinois.

Mr. DIXON. Mr. President, I am sure in the course of the day, many will come here to comment upon the nomination of Mr. Ryan to be Director of the Office of Thrift Supervision. I do not know Mr. Ryan. To my knowledge, I have never met him prior to the time that he appeared before the Banking Committee as the nominee of the President of the United States.

So far as I know, Mr. Ryan is a perfectly decent sort of person. I suspect he would be fully qualified for a variety of different posts available in the Government.

But if my dear friend, the senior Senator from Virginia, will indulge me, I would like to enlarge upon a comment that Senator WARNER made, and I wrote it down so that this could be a direct quote, because my friend from Virginia said something I agree with when he said, "Leadership starts at the top—with the President of the United States."

I agree. We are as one.

Mr. President, when I was a kid in grade school, they taught us about the greatest scandal in the history of the country, Teapot Dome. Why, to this day, I bet every kid knows about Teapot Dome. Teapot Dome, Mr. President. Small potatoes, small potatoes, Mr. President.

Then in my developing political career, I remember running for reelection in 1974 for office of State treasurer in my State, a State that can go either way, and elects Repubicans and Democrats to high public office.

Late in the campaign in 1974, I landed in Freeport, in Stephenson County, IL, to make a speech. The fellow at the airport said, "You are wanted on the telephone by the top man in your office, Mr. Callahan," who I am delighted to tell you, Mr. President, is one of the outstanding men in public service in this country, still my administrative assistant, without peer. I went to the phone. He said, "Guess what President Ford just did?" I said, "What?" He said, "He just pardoned Richard Nixon." I said, "I don't need to go make this speech, this campaign is over. Ain't nobody going to win on the Republican ticket in the country this year."

I was wrong, because my friend, the ranking member, who sits there across the aisle from Senator RIEGLE, did win that year despite Watergate.

Watergate—small potatoes; little bitty small potatoes, Mr. President. But now we are going to talk about an Idaho full of potatoes, an Idaho full of potatoes, because we are going to talk about the scandal in this country that is the biggest scandal in the history of America, a scandal, Mr. President, that will cost the people of America twice what the Marshall plan cost, twice what we spent to rebuild the world. These people in the balcony and on the streets all over America are going to pay for the unfolding scandal, the outrage that is occurring in the financial institutions of America—theft, outright fraud, criminality, the stealing of billions, big yachts, fields full of racehorses, huge diamonds.

For 4 months, we waited for the President of the United States, where leadership starts, to send us a man or a woman, and he finally did. He finally did. He finally did. Someone to address this scandal was brought to us.

Mr. President, do you remember Camelot, when a President said, "Ask not what your country can do for you; ask what you can do for your country?" Do you remember Truman who did not care if he had 25 percent approval, unlike the 75 percent of this President, but did it with guts because the country needed it or the world needed it? Remember Roosevelt? You always knew who ran it then. By God, he killed the pigs, they said. But he took the blame for it.

They send us a man, and the defense of this man—and, Mr. President, you are on that committee, were in the committee—we could not find anybody. My God, we cannot find anybody.

Listen to this. Senators who voted for him, my friends. The Senator from New York State: "I am not suggesting that he is the most capable or has the best record in this area. He does not."

The Senator from South Dakota: "I would prefer someone with more experience."

My friend who survived Watergate, a man of the finest political instincts, highly regarded in his State, a man who knows, a man who was a great chairman of the committee, a man whom I revere, the Senator from the great State of Utah: "I, too, would prefer that he had more experience."

Now, the Senator from Texas, who in his wit and intellectual capacity wrote the Gramm-Rudman-Hollings law that controls all we do in the budget, a man who understands finances, says: "He would not have been my choice."

And my friend, CONNIE MACK—I love that name, CONNIE MACK—CORNELIUS MCGILLICUDDY; it would not have been too good on the ballot. He was smart to shorten it to CONNIE MACK.

Mayor Richard J. Daley once said to Adlai Stevenson when he came to him for advice on running for public office. He said, "Mr. Mayor, what should I do?" He said, "Son, don't change your name."

CONNIE MACK: "You do not have the background or the scope of knowledge, if you will, to try to understand what is in fact taking place in the trenches of those financial institutions in this country."

We labored and we have brought forth a mouse.

Has it come to the point where you have to say something against a man to say that he is not the man for the job? I have nothing against this man. I never met this man. I do not know this man. He passed me in the hall this morning. I apologized. I made a mistake and called him Jim. His name is Tim. I do not know him. But he is not the man for the job.

My Lord, he is going to be approved here, he is going to be confirmed, and my friends say, "We couldn't find anybody."

I remember when I was a kid in the Illinois House, Mr. President, 20 some years old, back in the 1950's. They paid us $3,000 a year. A fellow had a salary increase bill in. A fellow from southern Illinois by the name of Paul Powell from Vienna, got up and made a speech against the bill. He said, "If you raise our pay, they will find competent people for these jobs."

Two hundred forty million people in this country. The President—"Leadership starts at the top with the President of the United States," Senator WARNER said the President could not find someone for the job.

What a problem we've got here.

Now, we have a problem here that there is nothing being done about. The record will show I was not for the final bill we passed. It is not a mea culpa when I say it. But the bill is on the books. We ought to be bringing in this cash to try to benefit the American people and get our shop in order. Are we doing it? No. No. Nope.

Does anyone remember the story I told in our caucus on Tuesday? I want to repeat it here on the floor so the country knows. A fellow called me, a personal friend. He said, "Alan, can you help me?" I said, "If I can, I will." "A friend and I are building a shopping center in Florida," he said. "We borrowed $4.5 million from Central Trust. Central Trust went in the trash can, another one of the companies in trouble. We went out to Connecticut and we got a top guy who knows shopping centers who is worth hundreds of millions of dollars, and he is backing us now. We want to buy back everything out of this situation and get this shopping center, which is 95 percent built, in operation before we all go bankrupt. We cannot get the RTC to do anything for us. We cannot get anything done."

I had another fellow come into my office. I can name these names. They are real cases, just recently. Two fellows came into my office that I know are people with all kinds of financial backgrounds in my State and lots of money and ability to get more. They said, "Will you get ahold of someone for us so we can go try to buy some of these savings and loans? We do not want to steal them. We do not want an inside rate. We do not want any political connection. We just want to be able to bid and try to give money to the RTC to put money in there to help solve our problem in the country and, we hope, in time, we will be honest with you, that we can make a dollar or two." There is nothing the matter with that.

Nothing is happening, Mr. President. Nothing is happening. Months have passed. Nothing is happening. The billions and the billions and the billions mount up. The people in this balcony and on the streets of America are going to pay those billions. The administration does nothing. Leadership starts at the top—with the President of the United States.

I am embarrassed to say I did not vote with him, but remember at the beginning of this whole debate when my friend from Nebraska, one of the bright young people in our party, offered an amendment? Many of us have great hopes for what I consider to be a great future for this young man. The Senator from Nebraska came in here, just barely a new Senator, and offered an amendment to try to get independent thought, independent views into the RTC and other things. I think we defeated his amendment. My memory is we somehow accommodated him later. I am not sure. Anyway, I remember that.

At any rate, what did he say at the time? He said that there is more chance for mischief and monkey business and corruption and thievery and fraud in this Resolution Trust Corporation than anything that ever happened in the Government. And he is right. These people are sitting on a pile that is the biggest pile ever amassed in the history of the world, involving all the institutions out there in trouble. Hundreds of billions of dollars—trillions. My friend said $5 trillion all told in this whole ballgame.

I came over here this morning. Everybody is kind of bored by the proceedings. We are going to vote sometime this afternoon. Everybody over here knows they have the votes. I do not have any quarrel with that. That is my understanding of it. And I understand you win some and you lose some. And I understand the power of the Presidency. The President uses it in these situations effectively, for which I give him credit. He is a man, incidentally, who I personally like very much and whom I support not infrequently in this place.

Nobody is very excited about this. When we were considering him in committee and indicated at his hearing that many would reject his nomination, it was buried on an inside page of the Washington Post. Some papers, I think, did not even bother to put anything in but just a little squib.

I am going to tell my colleagues there was a time in this country, in a crisis like this, if you sent us a person like this without any qualifications, at least in the old days under Democrats, it would have been a headline and the country would have risen up in righteous wrath. But, this is not going to be a big story. This is just a little bitty story.

Mr. President, some day there is a story in here. It is the guy who kept on digging and digging through that pile of manure and they said, "What are you doing?" And he said, "Somewhere in there, there is a pony." Somewhere in there, there is pony; somewhere in this is the most shocking scandal that will ever tear the insides of this country out. There is in this, monstrous possibilities.

My friend—and he is my friend—the chairman of the committee, a good man, did the right thing. It took them 4 months to send it here. It took him a couple of days to give it a hearing, because he knew it was serious business.

I am going to be honest about this matter. It is an internal matter that the President knows about. We thought we had the votes to stop the nomination in committee. We thought we had the votes. It was the judgment of the chairman, in his responsibility as chairman, for which I give him the greatest credit, that we ought to do the responsible thing in that connection.

Once we resolved we would kill the nomination in the committee, he said the right thing to do is let the Secretary of the Treasury know, so he can be prepared for it. Maybe they want to bring down the name. Maybe they want to send us another good name. Several of us called the Secretary of the Treasury. I hope the President, who I recognize in the Chair, takes no offense—he was one who called. I called Nick Brady, who is my friend, for whom I have the warmest personal feelings. At least one other man on my side did. We told him what was happening.

The ranking Member on the other side knows, we shared with him the fact, that we decided to decide this in committee and get rid of it. That is what should have happened, in my view. Frankly, that is what should have happened. Then we would have met the time constraints that come up when we run into April 11. They could have sent us a new man.

Incidentally, I am told the fellow in the job now is pretty decent and we could have gotten this resolved in the right way and gone out into the country and found the appropriate person.

Regretfully, that did not occur. And this man is now going to be confirmed. I feel confident that is the case.

My friend, the chairman of the committee, talked about Daniel Kearney. I do not know if he talked about him by name. He quit as the President of the RTC Oversight Board because he felt there was too much internal meddling in the Board, some of it emanating from Treasury.

The potentiality in this whole thing for terrible consequences, Mr. President, I think is beyond doubt.

In a time when no one in the Congress would deny that the biggest problem in the country, that could develop into a major national scandal of the hugest proportions in the history of this country, is out there festering; at a time when nothing is being done to solve the problem, nothing of any consequence; at a time when the jails ought to be full of the rascals—and none yet, that I know of, are eating their bread and drinking their water—they bring us a man whose most common line at the hearings was, "I have no views on that subject."

Mr. President, this giant of a man has no views on deposit insurance reform, no views on capital standards—we spent a session of the Congress in the most divisive, contentious, mean-spirited argumentative exchanges about capital standards—he does not have a view.

He has no views on how to make sure that the bidding process is fair and not subject to political favoritism.

He has no strategy for how to speed up the resolution process. No views on whether we even ought to have a thrift industry, and no views on whether the savings and loan law we passed last August is a sound approach.

And he will be confirmed. I guess, then, I would only like to conclude by saying this. I am saddened. I am not mad at Mr. Ryan. I love all those who advocate him. But I am saddened that we are finally asked to adopt a standard in the world's greatest deliberative body, the Senate of the United States of America, that you better give the job to somebody because you cannot find anybody to take it.

The lowest possible common denominator in public service now has finally been achieved this day by this vote. I shall be privileged to cast a vote against the nominee and to cry out to America and to say to the President of the United States, where leadership starts: We have to do better than this if this country has a great future.

I call upon my colleagues who may still be undecided to think one more time about whether they want to put their imprimatur by a yes vote on coming, finally, to that modest standard. I will vote no, Mr. President. I yield the floor.

The PRESIDING OFFICER. (Mr. WIRTH). The Senator from Utah.

Mr. GARN. Mr. President, I ask unanimous consent that Ruth Amberg be given privilege of the floor during this debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, may I make just one comment? I know exactly how my colleague from Illinois, who is my good friend—and I do not say that because that is what we are supposed to do on the floor. He really is. We have had a good friendship for a long period of time. He made a comment in his remarks about me that I survived Watergate and let it hang at that. I do not want to leave it hang in the RECORD. When Watergate occurred, I was mayor of Salt Lake City. What he meant to say was rather than leave it hanging, I survived the election of 1974.

Mr. DIXON. I do correct the record in that regard.

Mr. GARN. Only two new Republican Senators were elected that year, Senator Paul Laxalt and myself. Although nobody thought anything of it, I did not want my grandchildren to read in the RECORD I survived Watergate.

Mr. DIXON. If my colleague will yield, that is exactly what I meant, and it was meant with the highest personal regard for my colleague. As one of the two, along with the Senator from Connecticut [Mr. DODD] who survived the 1980 Reagan landslide, I have always had the deep sense of affinity toward my friend from Utah, and a great Senator who has left us, the Senator from Nevada, Senator Laxalt, who in their time survived in the election of 1974. The four of us are survivors. It is great to be with him this morning, I say to the Senator, although we still disagree on this issue.

Mr. GARN. I knew my friend meant that, but I did not want to leave it hanging.

Let me make one brief comment. I certainly do not intend to take the time of this body to go back and read from the committee record. I have each of the full quotes that my colleague has stated, and they are accurate quotes of what Mr. Ryan said, but I do believe that are out of context in terms of if people heard his full answer to each of those questions. I will just stipulate that and not go back and read each of those quotes surrounded by the rest of the answers.

I will also certainly say that, quoting me, I did say in the committee, and I said here on the floor today, that I would have preferred somebody with more experience. That is certainly correct. I would, but that ignores the fact—and again I think it takes it out of context—of the ability of someone, who no one has questioned about his ability, his intelligence in his legal practice or the work he did at the Department of Labor.

I think we must emphasize that is the point. Managerial skills, and leadership ability are transferable, as I tried to indicate in other areas. It is not unusual. I have seen nominees come before this committee and many others who have been highly praised when they have had absolutely no experience in a particular area.

That is certainly true of us. We do not face confirmation when we come to the Senate. We face our voters. We go to them and tell them about what we do. It is amazing how many varied backgrounds we have, and yet when we arrive here, we are placed on committees with great responsibility, billions and billions of dollars, and we have no background and expertise in that area at all. Nobody questions that.

I made the comment in the committee that I felt very fortunate that my degree in college was in banking and finance and I was placed on the Banking Committee. I was rather surprised because we make those determinations entirely—entirely—by seniority. I have seen people come here who were farmers and would have loved to have been on the Agriculture Committee, and should be, but they were not placed there because they did not have the expertise, but because of seniority. I have seen ex-military people come and spend years—I remember Barry Goldwater having a lot of experience in military years. I think it took him 12 years of seniority before he could be placed on the Armed Services Committee.

So while the quotas are correct, and I do not dispute them from my friends, I do not think it is fair to indicate this man is not capable or confident. He has performed very well in other areas, and those skills are transferable to a job of this kind.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, the distinguished Senator from Nebraska has been waiting for some time. If he will give me a few minutes, then I will yield the floor.

Mr. KERREY. With pleasure.

Mr. WARNER. Mr. President, I think it is important to address the Senate on the question of qualifications. Several Senators have said, "The man has no serious background in finance." I respectfully dispute those statements.

At this time, I ask unanimous consent that I may print in the RECORD a rather extensive dossier of material consisting of letters from leaders from across America who have had actual hands-on experience with Tim Ryan on matters relating to finance.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MUTUAL OF OMAHA,
Washington, DC, April 2, 1990.

Re T. Timothy Ryan, Esq., Nominee: Director of OTS.

Senator GEORGE J. MITCHELL,
Senator BOB DOLE,
U.S. Senate, Washington, DC.

DEAR SENATORS MITCHELL AND DOLE. As both a close personal friend and business associate of Mr. T. Timothy Ryan, I write on his behalf as nominee for the position of Director of the Office of Thrift Supervision (OTS).

I have known Mr. Ryan for approximately ten years and consider him, without reservation, to be an extremely talented and capable attorney whose legal counsel of our Companies has been consistently of the highest quality. He has exercised excellent judgment on all occasions. I can personally confirm Mr. Ryan's good moral character and can unqualifiedly attest to his strong leadership abilities. I certainly believe that Mr. Ryan's professional knowledge, abilities and atributes qualify him to most capably handle the broad range of complex legal and business issues that the Director of OTS will be required to address.

For the above reasons, I am very comfortable in recommending to you Mr. Ryan as an appropriate candidate for the position of Director of Office of Thrift Supervision.

Sincerely,

WILLIAM W. BAILEY,
Executive Vice President, Mutual of Omaha Companies.

MCLEAN, VA, *April 2, 1990.*

Hon. ROBERT J. DOLE,
U.S. Senate, Hart Senate Office Building, Washington, DC.

Hon. GEORGE J. MITCHELL,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATORS DOLE AND MITCHELL: We write in support of the confirmation of Timothy Ryan to be Director of the Office of Thrift Supervision.

Tim's lack of experience in the financial services industry is certainly a valid consideration. The question the Senate must face is whether Tim's strength of character and general ability outweigh that lack of experience. As those who have known him well for twenty years, we believe they do. As those who have also been involved in the public policy area for many years, we believe that in this type of crisis the ability to manage with discipline and the ability to generate public confidence are far more important that professional experience. Indeed, it seems that some of the most experienced and best known professionals are responsible for many of the problems of the financial services industry.

Financial services is not some occult science. Frank has been able to learn it after thirty years of little other than government experience. The key ingredient is judgment, a quality that seems to have been lacking in some of the most talented professionals. For all his lack of experience, Tim Ryan has judgment.

Frank would observe that he was criticized for lack of experience during confirmation hearings for, among other positions, Director of OEO, Deputy Secretary of Defense, and Under Secretary of HEW. Yet, he was able to learn his responsibilities quickly as a result of his general background in government. Tim Ryan has such a background.

We have full confidence that the Senate will sort out important considerations from sensationalized minor indiscretions committed years ago, but as those who know him well, we would like to go on record as endorsing Tim's strong moral character. He and his wife, Judy, are devoted family people who adhere to the ethical values we all hold dear. Our faith in Tim is such that for the past ten years, he has been the Executor of our estate, should we both die simultaneously. We have three children.

We have full confidence that the Congress will find Tim Ryan a forthcoming and straightforward partner. He is not a game player. On the contrary, he will give it to you as he sees it. That is a quality I know you are seeking.

Our argument is not based on fairness to an individual. Rather, it is premised on what is best for the country. Certainly, you can find someone with more experience. But you will have to search long and hard for someone with Tim's integrity and total commitment to excellence in government.

His prompt confirmation is the best solution to a critical and time-sensitive problem. We strongly urge it.

Sincerely yours,

FRANK C. CARLUCCI.
MARCIA CARLUCCI.

MAIN STREET,
Washington, DC, April 2, 1990.

Hon. GEORGE MITCHELL,
Majority Leader, U.S. Senate, Washington, DC.

DEAR GEORGE: I have known Tim Ryan for 15 years, as a fellow official in The American Council of Young Political Leaders and as a personal friend. We differ markedly on politics, obviously. But I can attest categorically to his integrity, character and commitment to public service.

I cannot pretend to know everything the job of Director of the Office of Thrift Supervision requires, but I know that if intelligence and drive are as central to it as they are to most tasks, Tim Ryan is a fine choice.

Sincerely,

HODDING CARTER III.
President.

REED SMITH SHAW & MCCLAY,
Pittsburgh, PA, April 2, 1990.

Senator GEORGE J. MITCHELL,
Russell Senate Office Building, Washington, DC.

Senator ROBERT J. DOLE,
Hart Senate Office Building, Washington, DC.

DEAR SENATORS MITCHELL and DOLE: As the Managing Partner of Reed Smith Shaw & McClay, I wanted to write you regarding the nomination of our partner, Tim Ryan, for Director of the Office of Thrift Supervision.

Reed Smith has more than 360 lawyers and other professionals practicing in Pittsburgh, Philadelphia, Harrisburg, Washington, D.C. and McLean, Virginia. It is the 30th largest law firm in the United States. Our firm was founded in Pittsburgh in 1877, where it began a tradition of excellence as legal counselors to Andrew Carnegie, Henry Clay Frick and the Mellon Family. We played a significant role in the foundation of the United States Steel Corporation, in the establishment of the National Gallery of Art in Washington, the litigation of the famous 1952 Steel Seizure Case, and the renaissance of Pittsburgh's Golden Triangle, one of the nation's first major redevelopment projects.

In more recent times, Reed Smith was counsel in one of the largest corporate acquisitions in history. We have played a principal role on behalf of the asbestos industry in developing the unprecedented Asbestos Claims Facility. We have taken a leadership position in representing emerging businesses in all their legal needs. Most recently, our firm assisted a major financial institution in developing a state-of-the-art mechanism for disposing of a large portfolio of troubled loans which won praise from Federal regulators.

I mention these examples to you because it is the presence of these traditions and commitment to professional excellence that led Reed Smith in March of 1989 to merge our practice with the practices of Tim Ryan and his other partners at Pierson, Ball & Dowd. Tim Ryan also served as a member of the Executive Committee of Pierson Ball & Dowd during the discussions leading up to this merger so I had many occasions to become acquainted with him. Following the merger, I have learned first hand of Tim's capabilities from his service on the Executive Committee for the entire firm, as well as a member of the Management Group for our attorneys in Washington and McLean, Virginia.

It is not the overuse of well worn phrases to describe Tim Ryan as a man of enormous capabilities, a quick study, candid and forthright in his comments, and committed to high standards of professional excellence. Knowing of the problems which exist in the saving and loan industry today, I have no doubt that an individual with Tim's capabilities and commitment, as well as personal values, is totally suited and qualified for the position for which he has been nominated. I for one, side with those who believe a fresh look, not necessarily encumbered by prior positions and interests is exactly what this situation needs.

I think in his typical open and candid assessment of a situation, Tim has really understated the extent of the experiences that qualify him for this position. Although he may not be as some say, "a banker," you must not overlook his abilities as a lawyer, a leader of a major District of Columbia law firm, and now a member of our firm's Executive Committee, and head of a flourishing employee benefits and legislative practice.

Reed Smith's employee benefit practice focuses on issues that implicate federal, state or local tax law, labor and employment law, fiduciary and trust law, estate planning, corporations, banking, insurance securities regulations and bankruptcy law. We handle every type of employee benefit program from qualified pension and profit-sharing plans (including ESOPs), to welfare plans of all kinds (including those funded through VEBAs), to select group or individual executive compensation arrangements. This includes design, drafting, implementation, funding, amendment, merger or spin-off, and termination. The firm is recognized for our work in the major industrial benefit programs, as well as the employee benefit issues raised by corporate finance, merger, acquisition and shutdown. The merger of our practices in 1989 greatly enhanced our ERISA capability in the fiduciary aspects of employee benefits, including pension trust administration and investment, related activities of a financial services nature, including advice to pension plans, commercial and investment banks, real estate and asset managers on plan asset investments. Tim is a leader in that practice area and an integral part of our national reputation for excellence.

In evaluating Tim's experience, I urge you to look at the broader issues and the depth of the professional and management experience which Tim offers, as well as his pure leadership ability. Speaking on behalf of our entire firm, we strongly urge that his nomination be confirmed.

Very truly yours,

G. DONALD GERLACH.

KLINGENSTEIN, FIELDS & CO., L.P.,
New York, NY, April 2, 1990.

Senator ROBERT DOLE,
U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: I am writing with respect to the nomination of Mr. Timothy Ryan as director of The Office of Thrift Supervision. I have known Mr. Ryan since 1982, when I represented The Federal Court and The Central States (Teamsters) Pension Fund in organizing the return of that Fund to private management.

During the subsequent years, except for the period I served as Under Secretary of the Treasury, I have worked closely with Tim Ryan on various matters concerning The Central States Pension Fund. While that Fund now aggregates some ten billion dollars, and is capably overseen by Morgan Stanley, its history has been complicated and difficult. With a host of earlier legal, financial and conceptual problems, getting The Fund to its present healthy state took enormous effort and skill. Tim Ryan was a key member of the group which accomplished that task.

Since I have been able to observe, and participate in, the process of changing Central States, I can state from first-hand experi-

ence that Tim Ryan contributed leadership, courage and imagination to an effort that involved legalities, political sensitivities and ultimately considerable financial substance. Although he has not been directly involved in banking during his career, his ability to quickly grasp key financial issues and create active solutions was impressive.

From my background knowledge of the thrift problem, and the organizational needs of the Office of Thrift Supervision, I feel Tim Ryan's skills make him an excellent choice for his nominated post. I would recommend him to you most highly.

Sincerely,

GEORGE D. GOULD,
Vice Chairman.

GOLDMAN, SACHS & Co.,
New York, NY, April 2, 1990.

Hon. GEORGE J. MITCHELL,
Majority Leader, U.S. Senate, Washington, DC.

Hon. ROBERT J. DOLE,
Minority Leader, U.S. Senate, Washington, DC.

DEAR SENATORS MITCHELL AND DOLE: We understand that at Senate Banking Committee hearings on the nomination of T. Timothy Ryan to head the Office of Thrift Supervision, questions were raised about his experience in the financial services industry. The purpose of this letter is to inform the Senate of the significant experience Mr. Ryan has had working with Goldman Sachs on financial transactions.

For the past five years, Mr. Ryan has counseled Goldman Sachs on a number of complex financial matters involving pension plan investments. These matters have included: Mortgage-backed and other asset-backed securities; Execution of securities transactions; Real estate investments; Health & welfare fund investments; Foreign exchange transactions; and Foreign futures transactions.

In all these matters, Mr. Ryan has demonstrated a keen intellect, a quick mind, an ability to get things done and impeccable integrity.

If we can be of any further assistance, please do not hestitate to call me.

Very truly yours,

ROBERT J. KATZ.

BOOZ, ALLEN & HAMILTON INC.,
New York, NY, April 2, 1990.

Hon. ROBERT DOLE,
Hon. GEORGE J. MITCHELL,
U.S. Senate, Washington, DC.

DEAR SENATORS DOLE AND MITCHELL: For more than 75 years, Booz, Allen & Hamilton has been in the business of advising its clients—major Fortune 500 corporations worldwide—on leadership and strategy. Through our work with Boards of Directors, Boards of Management, CEOs and foreign governments in organizational planning and restructuring, privatization, executive evaluation and strategy development, we've often focused on the issue of how one selects the right leader to effect change and achieve success. It is in this context that I am writing to you about Timothy Ryan, now being considered for the post of director of the Office of Thrift Supervision.

We believe that there are certain key qualities which are required in a senior executive, qualities which transcend specific industry experience and which, frankly, are far more crucial.

Vision and a clearly-defined sense of purpose. An ability to put the management of the organization in proper perspective, to set the strategy and remain focused while making necessary tactical decisions.

Personal strength and conviction. Having the guts to see the process through to completion.

Intelligence, imagination and sound judgment. An ability to grasp issues and the environment in which the organization is operating quickly and effectively, to focus on priorities, seek and accept counsel, frame a balanced course of action.

Tough-minded and action-oriented. An ability to get things in motion, make tough decisions, stay the course, but flexible enough to adjust/adapt to significant changes and new developments.

Self-confidence and commitment to success. The courage to withstand inevitable criticisms and confidence that one knows what needs to be done.

Management skills. The ability to manage an organization and manage a problem through to resolution and effectiveness.

Communications skills and political sensitivity. The ability to represent the organization publicly, to communicate an understanding and create acceptance of its purpose/actions, together with an understanding of political realities and their impact.

Personal integrity. This, it seems to me, needs no further explanation.

I first met Tim Ryan 15 years ago when, as a young attorney, he worked successfully on some extremely complex legal matters for Booz, Allen. His effectiveness in this role resulted in our entrusting him and his firm with some of our most sensitive and difficult issues. Our association has continued over that period and I have watched his career develop and flourish.

I can say without hesitation that he meets these criteria fully and completely, as an attorney, as a manager of sizeable organizations, as a public servant of consummate effectiveness. I endorse his nomination without reservation and with considerable enthusiasm.

On a personal note, I want to echo the comments of Senator Riegle in deploring the exposure of highly confidential information regarding Tim Ryan. When highly-qualified Americans offer themselves for public service they should not be subjected to such counterproductive and inappropriate activity.

R. MICHAEL MCCULLOUGH,
Chairman and CEO.

WASHINGTON, DC,
April 2, 1990.

Hon. GEORGE MITCHELL,
Hon. ROBERT DOLE,
U.S. Capitol, Washington, DC.

DEAR SENATOR MITCHELL AND SENATOR DOLE: I write to you as a member of the Executive Board of the American Association of Young Political Leaders (AAYPL) where I have come to know and work with Mr. Timothy Ryan, candidate for Director of the Office of Thrift Supervision. As former Assistant Secretary of the Democratic National Committee, I was elected to serve on the board in 1986. Prior to that time, I served with Mr. Ryan, then Chairman of the American Council of Young Political Leaders (ACYPL).

During the years of Mr. Ryan's service as ACYPL Chair, and his continued participation after his tenure, I found him to be a leader who displayed fairness in a structure that prides itself on being strictly bipartisan. As an administrator, he regarded organization and professionalism as priority.

I especially appreciated Mr. Ryan's style of management when it came to the inclusion and participation of women within the ACYPL. An example was Mr. Ryan's concern for male/female balance of participants on overseas exchange programs. Mr. Ryan assured organizational leadership that it was in the best interest of both politcal parties that the United States be represented by introducing its up and coming female politicans to democracies throughout the world. Mr. Ryan also resigned his position on the ACYPL Board of Directors in favor of a woman replacement.

Tim and I have had many a conversation and differing opinions on issues of party politics and presidential candidates. I am however, confident of his management credentials and political savvy.

Sincerely,

SANDRA P. PERLMUTTER.

REED SMITH SHAW & MCCLAY,
Washington, DC, April 2, 1990.

Hon. GEORGE J. MITCHELL,
Majority Leader, Senate, Washington, DC.
Hon. ROBERT J. DOLE,
Minority Leader, Senate Washington, DC.

DEAR SENATORS MITCHELL AND DOLE: At the Senate Banking Committee hearings on the nomination of Timothy Ryan to the Director of the Office of Thrift Supervision, some Senators expressed concern about Mr. Ryan's general ability to handle this job, as well as his experience in the financial services area. The purpose of this letter is to briefly respond to those concerns.

I have worked closely with Tim Ryan for the past six years. During that time, we have represented investment banking and real estate firms on difficult investment and real estate transactions involving pension plan assets. Although he has no direct Thrift Industry experience, Tim has considerable financial services experience which well qualify him for this job.

Tim is exactly the type person the country needs to address the Thrift Industry problems. He's honest, direct and not tied to any of the various constituencies interested in the S&L situation. Quite frankly, we are lucky to have a man of his quality willing to consider this job.

If I can be of any further assistance, please do not hesitate to call me.

Very truly yours,

WILLIAM B. SAXBE,
U.S. Senator, Retired.

ENHANCE FINANCIAL SERVICES, INC.,
New York, NY, April 2, 1990.

Senator GEORGE J. MITCHELL,
U.S. Senate, Washington, DC.

DEAR SENATOR MITCHELL: I write to seek your support of Mr. Timothy Ryan who has been nominated to serve as Director of the Office of Thrift Supervision.

I have come to know Tim Ryan quite well through his service as counsel to the Association of Financial Guaranty Insurors ("AFGI"). AFGI is the trade group to which my company, Enhance Reinsurance Company, belongs and which I serve as Vice Chairman.

I read in the press that Tim Ryan's appointment is objected to because he lacks experience in the thrift industry. This may be true, but let me assure you he has a very sophisticated understanding of other complex financial issues which convinces me he has the requisite intelligence and background to serve most successfully as Director of OTS. For example, he has advised AFGI in matters affecting our industry re-

sulting from the implementation of the Basle Agreement on risk-based capital guidelines for depository institutions. I am aware also of his recognized expertise in the area of ERISA law. In my view, anyone who can master these esoteric subjects can meet the challenges the Director of OTS will confront.

Based on my observation and knowledge of Tim Ryan's legal experience and many fine personal qualities, I respectfully urge you to support his pending nomination.

Sincerely,

WALLACE O. SELLERS.

ENHANCE FINANCIAL SERVICES, INC.,
New York, NY, April 2, 1990.

Senator ROBERT DOLE,
U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: I write to seek your support of Mr. Timothy Ryan who has been nominated to serve as Director of the Office of Thrift Supervision.

I have come to know Tim Ryan quite well through his service as counsel to the Association of Financial Guaranty Insurors ("AFGI"). AFGI is the trade group to which my company, Enhance Reinsurance Company, belongs and which I serve as Vice Chairman.

I read in the press that Tim Ryan's appointment is objected to because he lacks experience in the thrift industry. This may be true, but let me assure you he has a very sophisticated understanding of other complex financial issues which convinces me he has the requisite intelligence and background to serve most successfully as Director of OTS. For example, he has advised AFGI in matters affecting our industry resulting from the implementation of the Basle Agreement on risk-based capital guidelines for depository institutions. I am aware also of his recognized expertise in the area of ERISA law. In my view, anyone who can master these esoteric subjects can meet the challenges the Director of OTS will confront.

Based on my observation and knowledge of Tim Ryan's legal experience and many fine personal qualities, I respectfully urge you to support his pending nomination.

Sincerely,

WALLACE O. SELLERS.

HOLLAND & KNIGHT,
Miami, March 20, 1990.

Senator SAM NUNN,
Senate, Washington, DC.

DEAR SENATOR NUNN: As you are probably aware Timothy Ryan has been nominated for appointment as the Director of the Office of Thrift Supervision by the Bush Administration. This appointment is subject to Senate confirmation.

Tim is an old and close friend in whom I have a great deal of trust and confidence. Tim was the Solicitor of Labor who used his considerable legal skills and powers of persuasion to obtain a significant and binding agreement from the Teamsters Central States Pension Fund in response to your Permanent Subcommittee on Investigations hearings. I worked closely with Tim during that difficult time and I admired his intelligence, judgment, integrity, and forcefulness. In my opinion, second to your efforts with PSI, Tim had a significant impact with respect to cleaning up the Central States Pension and Health and Welfare Funds. I have followed Tim's career through the years and I have been impressed with his many accomplishments and with his significant ability and outstanding legal talents.

Obviously, the thrift industry is in a critical period of restructuring and requires an individual with strong leadership and extraordinary judgment and wisdom. Tim clearly possesses these qualities. I feel comfortable in asking you to review Tim's record and to support this nomination based solely on his exceptional qualifications.

I would be pleased to discuss Tim's qualifications with you. I believe Tim will welcome the opportunity to meet with you to discuss your thoughts, concerns and recommendations regarding the thrift industry. I have enclosed his resume for your review. If I can be of further assistance or if you have any questions or comments concerning Tim, please do not hesitate to contact me. I look forward to seeing you soon in Washington.

Sincerely,

MARTY STEINBERG.

BIOGRAPHICAL SKETCH—TIMOTHY RYAN

Timothy Ryan, a resident of McLean, Virginia, is a partner in the Washington, D.C. law firm of Reed Smith Shaw & McClay. Prior to his return to Pierson, Ball & Dowd—which merged with Reed Smith—in May of 1983, Mr. Ryan was Solicitor of Labor, U.S. Department of Labor. He was appointed to that position by President Reagan and on March 12, 1981 his appointment was confirmed by the Senate. During his tenure at DOL, Mr. Ryan directed an intergovernmental Task Force assigned the task of establishing independent control over the largest Taft-Hartley funds in the country, the Teamsters' Central States Pension and Health & Welfare Funds.

Mr. Ryan is a graduate of Villanova University (A.B., 1967) and American University Law School (J.D., 1973). He is married to Judith Rush Ryan and has a daughter, Kathryn (8 years of age) and a son, Michael (5 years of age).

Mr. Ryan started his legal career as an attorney-advisor to Board Member Ralph Kennedy of the National Labor Relations Board. Thereafter, he was associated with the Baltimore, Maryland law firm of Venable, Baetjer & Howard. In 1976 he served as deputy General Counsel of the President Ford Committee, and in 1980 he was legal Counsel for the Reagan/Bush Transition. Mr. Ryan served as Special Counsel to the George Bush for President Committee in 1988. Mr. Ryan has served as a member of the Council of the Administrative Conference of the United States, Council of the Administrative Conference of the United States, the ERISA Advisory Council, the Overseas Private Investment Corporation and the Program for the Advancement of Commercial Technology in India. He was also a former President and Board Member of The American Council of Young Political Leaders.

Mr. Ryan is admitted to practice law before the United States Supreme Court, the District of Columbia Court of Appeals, the United States District Court for the District of Columbia, the United States Court of Appeals for the District of Columbia and the Seventh Circuit Court of Appeals. He is a member of the American Bar Association and the Federal Bar Association, as well as the Bar Association of the District of Columbia. Mr. Ryan has been named to Who's Who in America and to Who's Who in American Law and listed in The Best Lawyers in America.

WASHINGTON, DC,
April 2, 1990.

Hon. GEORGE J. MITCHELL,
U.S. Senate, Washington, DC.

DEAR SENATOR MITCHELL: I understand that the full Senate will vote on Tim Ryan's nomination to be the Director of the Office of Thrift Supervision later this week. I have known Tim Ryan for ten years, since we worked together on the Carter-Reagan transition. He handled a number of delicate problems during that sensitive period with a spirit of bi-partisan cooperation and good will.

I know him to be a hard-working, honest, intelligent person, with a strong sense of public service. He will be a strong enforcer and a breath of fresh air in the savings and loan industry. Based on my experience, I predict that he will adopt a pragmatic approach to problem solving; he is definitely not an ideologue.

Given the mess that the so-called experts have made of the savings and loan issue, an enforcement-minded pragmatist is probably a better choice than someone who has spent years in the industry. I hope you will keep these thoughts in mind when you cast your vote on Wednesday.

Sincerely,

W. HARRISON WELLFORD.

Mr. WARNER. Mr. President, if I may take a few minutes to read several of these statements. William Bailey, executive vice president, Mutual of Omaha Co:

He has exercised excellent judgment on all occasions. I certainly believe Mr. Ryan's professional knowledge, abilities, and attributes qualify him to most capably handle the broad range of complex legal and business issues that the director of OTS will be required to address.

Frank Carlucci, former Secretary of Defense, who subsequently has dealt with a number of financial organizations states:

We have full confidence that the Congress will find Tim Ryan a forthcoming and straightforward partner.

Hodding Carter III, president, Main-Street Productions, former Assistant Secretary of State under the Carter administration:

I can attest categorically to his integrity, character, and commitment to public service.

George D. Gould, vice chairman of Klingenstein, Fields & Co., a financial firm:

I can state from firsthand knowledge that Tim Ryan contributed leadership, courage, and imagination to an effort that involved legalities, political sensitivities, and ultimately considerable financial substance.

Robert J. Katz, partner and general counsel, Goldman, Sachs, an internationally known financial firm:

For the past 5 years, Mr. Ryan has counseled Goldman, Sachs on a number of complex financial matters including pension plan investments. These matters have included, one, mortgage-backed and other asset-backed securities; two, execution of securities transactions; three, real estate investments; four, health and welfare fund investments; five, foreign exchange transactions, six, foreign futures transactions. In all of these matters, Mr. Ryan has demon-

strated a keen intellect, a quick mind, an ability to get things done, and impeccable integrity.

I could go on and on, Mr. President. We have a very substantial number of these voluntary contributions coming in from individuals who are actively engaged in financial business matters across America. I thank the Chair.

Mr. KERREY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. KERREY. Mr. President, I rise in opposition to this nomination. I do so for reason that are somewhat different than what I have heard thus far today.

First of all, Mr. President, let me say that I am perhaps too junior to be seasoned enough not to be personally weary of having another situation where I am told that unless I vote immediately and make a decision, unless I do something that I consider, in fact, to be wrong that something terrible is going to happen.

I must vote to raise the debt ceiling, last fall, I am told, by $300 billion. Even though we are telling the American people the deficit is only about $100 billion, I am raising the debt ceiling by $300 billion. And I am told that unless I do, terrible things are going to happen, even though the Secretary of the Treasury is permitted to go out to market with some bonds in order to tide things over, in order to sort of make things work.

I am getting weary of that. Perhaps it is as a consequence of only having been around here a short period of time. Perhaps I will get used to it. Perhaps I will get used to being told I must do something quickly even though I think it is wrong, in order to avoid something terrible happening as a consequence.

Mr. President, I believe the key consideration for us should be that this is our responsibility. This is the responsibility of Congress. If you doubt in fact that that is the case, look at the commentators and what they are saying. The commentators are saying that it is the Congress that has the responsibility to deal with the savings and loan industry. So we should not, it seems to me, simply take quick action on this without regard for the personal consequences to us as representatives.

In addition, Mr. President, I have heard this new job described as one having a considerable amount of responsibility. I have heard it debated perhaps it is not something of great responsibility. But one thing I think is not in dispute is that this is, in fact, the greatest financial scandal in American history. Perhaps it is too large for the American people to understand. Perhaps it is because the deposits are fully insured so there will be no significant loss to depositors themselves. There are all sorts of reasons I have heard offered as to why the people themselves are not outraged. But it seems to me it is fair to say it still is the worst financial scandal in the history of the United States of America.

As to who is responsible for it, that is another question. But I would offer at least the observation that most of the commentators appear to be pointing the finger at Congress and saying it is we who are responsible, it is we who are making these decisions.

At this juncture, I must offer this to my colleagues for their consideration. I think it is appropriate for us, without being personal, without meaning for it to be a personal affront, not to trust the people we hire to do the regulating, particularly when it comes to financial institutions. Whether it is Mr. Ryan, who is obviously a friend of many, or whether it is somebody else who we might know and like, it is incumbent upon us and appropriate for us to have a considerable amount of distrust of the judgments they are making. We ought to pursue, based on that distrust, all lines of questioning to make certain that, in fact, these institutions are being regulated properly.

I believe, in fact, it is healthy for us, when entering into consideration of an individual who is going to be given a considerable amount of responsibility to regulate, to begin by saying that there is distrust. The public's perception, I believe, will require us to do that.

The key consideration for me in this entire matter is the policies that this individual will be carrying out. This is not, in the first instance, for me a mangement job. I do not like to frame this argument as being one of, can Mr. Ryan carry out the management responsiblities? The Office of Thrift Supervision will not have a profit, nor does any other section of Government have a profit.

There is no way, in an objective fashion, to evaluate whether this person or that person is a good manager. The argument, it seems to me, will lead us nowhere. This is not, I would argue as well, principally an enforcement. This is, first and foremost, a policy job. This is a policy job where this individual has been given by the FIRREA legislation a considerable amount of latitude to make real policy judgments about what ought to be done in the regulation of our financial institutions.

I listened to the testimony that he gave, and I read the testimony that has been offered. I see a considerable amount of guessing and doubt about what the policy ought to be, how it is that we ought to regulate, what is the purpose of the OTS, what is the objective of the OTS.

Mr. President, I have far too many people in Nebraska who depend upon savings and loans for house loans and home mortgages, far too many people whose jobs depend upon this industry, far too many healthy institutions whose health is jeopardized by the continued operation of those that are unhealthy, far too many individuals with legislative concerns, it seems to me, about the haste with which decisions are being made at the Office of Thrift Supervision, to entrust in this individual's hands the responsibility for making these policy decisions.

Based upon the information that has been provided me to date, it seems to me there is a considerable amount of doubt as to how this individual will regulate. There is a considerable amount of doubt about what his attitude is going to be toward the savings and loan industry, a considerable amount of doubt about what his decisions will produce.

As a consequence of that, Mr. President, I have reached a decision to vote against. It is offered with respect for the Senator from Virginia, who has a great deal of information that he has presented to me. I have met Mr. Ryan. I have no reason to believe that personalitywise or managementwise he could not do the job. But it is the policy considerations that concern me the most.

Finally, Mr. President, I want to offer an observation. It seems to me—though the Congress is unquestionably the one that is writing the laws and deciding how this whole thing is going to be shaped—that this needs as well to be shared by the Bush administration. I do not believe the President has given this his highest consideration, as I believe it ought to be given, in that there is $200 billion allocated over the next 10 years to take care of this bailout.

In terms of spending, it is President Bush's No. 1 spending priority. In terms of resources allocated, it is his No. 1 spending. In terms of the amount of money we are allocating to this bailout, President Bush deserves to be called the savings and loan President—not the environment President, not the education President, not the child care President, not the clean air President, but the savings and loan President. Two hundred billion dollars over the next 10 years are being allocated to this problem and many positions remain unfilled.

The President tells us now after dutiful consideration he was able to come up with this individual, and I trust that he at least gave it some consideration, but I am not persuaded that he gave it the kind of consideration he should have given it, according to the amount of money that is being allocated for this particular situation.

I ask unanimous consent that two items be printed in the RECORD: One, the memorandum opinion that was issued by Judge Royce Lamberth on March 21, and two, a letter from At-

torney General Dick Thornbourgh to Vice President DAN QUAYLE, President of the U.S. Senate, of March 27 also be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[U.S. District Court for the District of Columbia]

(Civil Action No. 90-0482 (RCL))

OLYMPIC FEDERAL SAVINGS AND LOAN ASSOCIATION, PLAINTIFF, *v.* DIRECTOR, OFFICE OF THRIFT SUPERVISION, ET AL., DEFENDANTS

ORDER

For the reasons set forth in the Memorandum Opinion issued this date, it hereby is

Ordered, that plaintiff's motion for a preliminary injunction is granted. Neither the Acting Director of OTS nor any other officer at OTS may appoint a receiver or conservator for Olympic until a new Director is constitutionally appointed. Bond is set at $1,000.

So ordered.

ROYCE C. LAMBERTH,
U.S. District Judge.

Date: March 21, 1990.

MEMORANDUM OPINION

Plaintiff Olympic Federal Savings & Loan Association ("Olympic") filed a motion on March 6, 1990, requesting that the court issue a temporary restraining order ("TRO") and a preliminary injunction ("PI") enjoining the Director of the Office of Thrift Supervision ("OTS") and the Federal Deposit Insurance Corporation ("FDIC") from appointing a conservator or receiver for Olympic. Plaintiff argues the following in support of its motion: first, that both M. Danny Wall, the previous Director of OTS, and Salvatore R. Martoche, the current Acting Director of OTS, were unconstitutionally appointed and therefore have no legal authority to appoint a conservator or receiver; second, that the regulations issued by OTS changing the capital requirements for savings and loans ("S&Ls") were issued in violation of the Administrative Procedure Act's notice and comment requirements and therefore cannot serve as the basis for appointing a conservator or receiver; and third, that the grounds for appointing a conservator or receiver do not exist until the FDIC has reviewed and acted upon Olympic's request for assistance. The court need not address Olympic's second and third arguments at this time because, for the reasons discussed herein, the strong likelihood that Olympic will succeed on the merits of its Appointments Clause challenge alone entitles Olympic to the limited injunction it requests.

I. FACTUAL BACKGROUND

In the late 1970's and early 1980's, the thrift industry was undergoing a crisis of unprecedented magnitude. High interest rates forced most thrifts to pay out more in interest on deposits than they earned on their portfolio of long-term, fixed-rate mortgages. This interest rate spread drove many thrifts into insolvency. Memorandum of Law in Support of Plaintiff's Motion for a Temporary Restraining Order and a Preliminary Injunction (filed Mar. 6, 1990) ("Plaintiff's Initial Memorandum"); see also Defendant FDIC's Memorandum in Opposition to Plaintiff's Motion for a Temporary Restraining Order at 2, 4-5 (filed Mar. 6, 1990) ("FDIC's TRO Opposition").

The thrift industry was regulated at the time by the Federal Home Loan Bank Board ("FHLBB") and its insurance arm, the Federal Savings and Loan Insurance Corporation ("FSLIC"). Faced with a large number of failing thrift institutions, the FSLIC and FHLBB recognized that the FSLIC insurance fund would quickly be exhausted if the government continued to provide financial assistance to all troubled thrifts. Plaintiff's Initial Memorandum at 3; see also FDIC's TRO Opposition at 5. In mid-1981, the FSLIC and FHLBB therefore revised their policies and practices to prevent, or at least forestall, the exhaustion of the FSLIC insurance fund. Plaintiff's Initial Memorandum at 3. They began inducing and arranging supervisory mergers by providing assistance in the form of an intangible asset—"supervisory goodwill"—rather than in the form of cash. Id.

This was accomplished by allowing thrifts to account for mergers using the "purchase method" of accounting. Id. Under this method, the book value of the assets and liabilities of an acquired thrift were adjusted ("market to market") to their fair market value at the time of the acquisition. Id. at 4. The excess in the cost of the acquisition (including any liabilities assumed by the acquirer) over the fair market value of the acquired assets was then separately recorded on the acquiring thrift's books as "goodwill"—an intangible, non-earning asset subject to amortization on a straight-line basis over as many as 40 years. Id. FHLBB's regulations governing the minimum capital requirements for FSLIC-insured thrifts allowed thrifts to include "supervisory goodwill" in capital. Id. at 4-5.

Olympic is the product of a number of mergers consummated betweeen 1982 and 1984. Id. at 7-13. Olympic booked more than $160 million in supervisory goodwill as a result of these mergers. Id. at 13. After the mergers had been completed, Olympic's tangible capital level was a negative $140 million, or negative 25.75 percent of total assets. Id. at 14. Since 1984, Olympic has amortized more than $43 million of its supervisory goodwill. Id.

The thrift industry's problems did not disappear when interest rates began declining in late 1982. Indeed, when President Bush took office in January of 1989 S & L industry remained in a "crisis" situation. President Bush made the S & L crisis a top priority of his new administration. FDIC's TRO Opposition at 5. He submitted to Congress a bill proposing a major restructuring of the way in which the federal government regulates the savings and loan industry. The bill was approved by Congress and on August 9, 1989, President Bush signed the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA") into law. Plaintiff's Initial Memorandum at 15.

FIRREA dramatically changed the regulatory regime which oversees the S & L industry. It abolished the FHLBB and FSLIC and established a new agency—OTS—as an office in the Department of the Treasury. Id. at 15; FDIC's TRO Opposition at 6. It divided regulatory and insurance responsibilities between OTS (the regulator) and the Savings Association Insurance Fund ("SAIF") (the insurer). Defendant Director, Office of Thrift Supervision's Memorandum in Opposition to Temporary Restraining Order at 3 (filed Mar. 6, 1990) ("OTS' TRO Opposition"); FDIC's TRO Opposition at 5-6. It removed from OTS certain powers previously exercised by the FHLBB, but placed OTS in the hands of a single Director rather than a three-person board. OTS' TRO Opposition at 4. It vested in the Director responsibility for issuing S & L charters, reviewing proposed changes in control of thrifts, supervising and regulating federally-insured thrifts, and appointing receivers and conservators for ailing thrifts and their officers. Defendant Director's Opposition to Motion for Preliminary Injunction at 4 (filed Mar. 13, 1990) ("OTS' PI Opposition").

FIRREA provides that the Director of OTS shall be appointed by the President, by and with the advice and consent of the Senate, for a term of five years. FIRREA § 301, 103 Stat. 278. FIRREA also provides that vacancies in the office of Director which occur before the expiration of a term shall be filled by the President, by and with the advice and consent of the Senate. Id. However, FIRREA contains a "grandfather" clause pursuant to which the Chairman of the FHLBB on the date of FIRREA's enactment was statutorily appointed OTS' first Director. Id. By operation of this provision, M. Danny Wall became OTS' first Director. Plaintiff's Initial Memorandum at 16.

Under Mr. Wall's leadership, OTS promulgated new capital regulations in accordance with FIRREA's provisions. Id. at 19; FDIC's TRO Opposition at 8-9. The new capital regulations permit thrifts to include "supervisory goodwill" only to meet "risk-based" capital requirements and only in accordance with a phase-out schedule set forth in FIRREA. Plaintiff's Initial Memorandum at 20.

Olympic does not comply with the new capital requirements. Id. at 23. It is currently operating subject to a number of business restrictions imposed by OTS. Id. at 24. Moreover, because Olympic does not meet the new capital requirements, the Director has statutory authority to take over the thrift by appointing a conservator or receiver and, if necessary, to direct that person to liquidate the thrift. Id.

Recognizing the threat to its continued operations and believing that various statutory, constitutional and other grounds existed upon which it could challenge OTS' acts, Olympic filed its complaint in this case on March 1, 1990. Among other things, Olympic alleged that M. Danny Wall, then Director of OTS, had been unconstitutionally appointed. Complaint, at ¶ 61. Contemporaneously with filing its complaint, Olympic advised counsel for defendants that it intended to challenge the constitutionality of Mr. Wall's appointment. Supplemental Memorandum of Law in Support of Plaintiff's Motion for a Preliminary Injunction, at 2 (filed Mar. 9, 1990) ("Plaintiff's Supplemental Memorandum"). On March 5, 1990, Mr. Wall ceased to be Director of OTS and the President appointed Salvatore Martoche Acting Director of OTS pursuant to the Vacancies Act, 5 U.S.C. §§ 3345-49. OTS' TRO Opposition at 9.

On March 6, 1990, after OTS had refused to assure Olympic that it would not appoint a receiver or conservator and had refused to agree to provide Olympic with notice of its intent to appoint a receiver or conservator, Olympic filed its motion for a TRO and for a PI. Plaintiff's Supplemental Memorandum at 2. Defendants argued in opposition that plaintiff's Appointments Clause challenge had been mooted by Mr. Wall's resignation and that, in any event, plaintiff was not entitled to the extraordinary relief it requested. At oral argument on its motion for a TRO, Olympic countered by arguing that Salvatore Martoche's designation as Acting Director under the Vacancies Act was improper, and that therefore Mr. Wall's resig-

nation had not mooted its Appointments Clause claim. After considering the briefs filed on behalf of all parties and hearing oral argument on Olympic's motion, the court granted Olympic's request and enjoined the Acting Director of OTS from appointing a receiver or conservator for Olympic for ten days, unless he first provided the court and plaintiff's attorney with six hours' notice of his intent to appoint a receiver or conservator. On March 13, after further briefing by the parties, the court heard oral argument on Olympic's motion for a preliminary injunction. For the reasons discussed herein, and pursuant to an order issued this date, the court now grants Olympic's motion for a preliminary injuction prohibiting the Acting Director of OTS or any officer at OTS from appointing a receiver or conservator for Olympic until a new Director of OTS has been nominated by the President and confirmed by the Senate.

II. ANALYSIS

A. Ripeness, Standing, and Jurisdiction

Before the court can reach the merits of Olympic's claim, it must decide whether Olympic's claim is ripe, whether Olympic has standing to challenge the appointments of Mr. Wall and Mr. Martoche, and whether FIRREA precludes this court from hearing Olympic's case.

1. Ripeness

Defendant OTS asserts that the acting Director has not made any decision to appoint a receiver or conservator for Olympic. Indeed, according to OTS it is possible that the Director will never decide to appoint a receiver or conservator for Olympic. As a result, OTS contends, Olympic's challenge is premature.[1]

The court can not reasonably conclude that plaintiff's harm is not sufficiently imminent and concrete to make its claim ripe. "[B]oth the fitness of the issues for judicial decision and the hardship to the parties of withholding court consideration" show that this case merits immediate review. *Abbott Laboratories* v. *Gardner*, 387 U.S. 136, 149 (1967). On the claim currently before the court, Olympic does not challenge a regulation which may never be applied to it or ask the court to intervene in the Director's substantive decision whether or not to appoint a receiver or conservator for Olympic.[2] Rather, Olympic challenges the Acting Director's constitutional authority to act as Director and asks the court to enjoin him from taking a specific and apparently imminent act. The disagreement over Mr. Martoche's legal status is not "abstract," but focuses on legal issues which are clear and events which have already taken place. Cf. *Abbott Laboratories*, 387 U.S. at 148-49 (Supreme Court found case was ripe for adjudication because it presented a purely legal issue and because no further administrative proceedings were contemplated). In addition, plaintiff would suffer serious hardship if this court refused to hear its claim. OTS has made clear that—absent an injunction—at any moment and with no notice to either plaintiff or to the court it may appoint a receiver or conservator, instruct him or her to take control of Olympic's operations, and perhaps begin liquidating the thrift. Once a receiver or conservator is appointed, this court's power to enjoin the receiver or conservator's actions or to remedy any injury to Olympic would be severely restricted. *See* FIRREA § 301, 103 Stat. 292 (restricting court's authority to enjoin acts of receiver or conservator); *Andrade* v. *Lauer*, 729 F.2d 1475, 1496-97 (D.C. Cir. 1984) (de factor officer doctrine limits court's ability to undo prior acts). In light of these facts, the court concludes that Olympic's claim is ripe for judicial consideration.[3]

2. Standing

Defendant FDIC next argues that Olympic lacks standing for two reasons: first, that Olympic lacks Article III standing because its injury—if one exists—will not be redressed by a decision that OTS' two Directors were unconstitutionally appointed; and second, that Olympic lacks prudential standing because it is not within the zone of interests that Congress intended a private party to assert.

a. Article III standing

In order to establish standing to challenge a particualr act or policy, a litigant must "show that he personally has suffered some actual or threatened injury as a result of the putatively illegal conduct of the defendant,' and that the injury 'fairly can be traced to the challenged action' and 'is likely to be redressed by a favorable decision.'" *Valley Force Christian College* v. *Americans United for Separation of Church and State, Inc.*, 454 U.S. 464, 472 (1982) (citations omitted); *Simon* v. *Eastern Kentucky Welfare Rights Org.*; 426 U.S. 26, 38, 41 (1976).

According to the FDIC, Olympic fails to satisfy this test because plaintiff's injury, if any exists, is not likely to be redressed by a favorable decision on its constitutional claim. Defendant FDIC's Memorandum in Opposition to Plaintiff's Motion for a Preliminary Injunction at 3 (filed Mar. 13, 1990) ("FDIC's PI Opposition"). Defendant alleges that plaintiff's ultimate difficulty is its failure to meet legislatively mandated capital standards which must be imposed by whomever is at the head of OTS. Id. Defendant contends that "[p]laintiff's grievance, at bottom, is a fundamental quarrel with Congress' strict mandate of minimum thrift capital," and that "[c]hallenges to the specific officer entrusted to implement that mandate beg the question of the source of plaintiff's ultimate injury—the United States Congress." Id. at 4. The FDIC concludes that because resolution of the Appointment Clause issue will not affect Olympic failure to meet the capital requirements or relieve it from the threat of government intervention, Olympic lacks Article III standing.

Defendant's argument ignores a critical element of plaintiff's claim. In the end, plaintiff clearly hopes to avoid having a conservator or receiver appointed for it. However, this is not all plaintiff seeks. Part of plaintiff's claim is that, under the Constitution and laws of the United States, it is subject to regulation only by individuals with legal authority to act. If this court attempted to appoint a conservator or receiver pursuant to FIRREA, plaintiff clearly could complain that this court has no authority to take such action, for even if grounds for appointment exist, this court simply has no right to exercise the Director's appointment power. This is the essence of plaintiff's constitutional claim: because Mr. Martoche was not properly appointed, he has no more right to exercise the Director's appointment powers than this court does. And this is the injury which a finding for plaintiff on its constitutional claim would redress: the injury which any citizen suffers when its government acts unconstitutionally against it. Even if a receiver or conservator ultimately is appointed, success on plaintiff's constitutional claim would protect its right to demand that those who act against it on behalf of the government do so both lawfully and constitutionally. See *Andrade*, 729 F.2d at 1496 (in many procedural due process cases, graveman of complaint is that government must act in accord with due process principles when it takes action against citizens even if conformance may not change substantive outcome).

The FDIC's argument is flawed for a second reason. According to defendant, it does not really matter who is in the office of Director: Congress has mandated minimum capital requirements, Olympic fails to meet those requirements, and therefore any person acting as Director is equally likely to appoint a conservator or receiver for Olympic. This argument asks the court to assume that both FIRREA's grant of discretion to the Director and the protections conferred by the Constitution are meaningless, for although both affect the process by which the outcome is reached, neither affects the ultimate outcome. The court can not and will not accept this proposition. The court cannot accept it because the court is bound by the Court of Appeals' decision in *Andrade*, 729 F.2d at 1495-96, which explicitly rejects the claim that one cannot maintain an Appointments Clause challenge unless one can show that, had the Constitution's requirements been followed, the outcome would have been different. The court will not accept it because the court absolutely rejects the proposition that the procedural protections conferred by various statutes and by the Constitution are nothing more than hollow gestures at the appearance of democracy. The Appointment Clause subjects the selection process to public scrutiny, thereby affecting who takes office, how they perceive their function, and how they exercise their powers. See *Andrade*, 729 F.2d at 1495 and n. 35 (Appointments Clause gives Congress some control over Executive Branch, within framework of system of checks and balances).

In light of the foregoing, the court concludes that a favorable decision on plaintiff's constitutional question will redress at least one of plaintiff's threatened injuries. The court therefore finds that plaintiff has Article III standing.

b. Prudential standing

Defendant FDIC also claims that this court should refuse to hear plaintiff's case on "prudential standing" grounds because plaintiff has not demonstrated that it is

[1] The court notes that the factual premise for OTS' ripeness argument is seriously undercut by its claim that, "[i]n view of Olympic's precarious financial condition, even a temporary restraint of the Director's authority would pose a grave threat to the public, the federal insurance fund, and the savings and loan industry as a whole." OTS' TRO Opposition, at 41 (emphasis added). If even a temporary restraint poses such a grave threat, presumably there is a strong likelihood that the appointment of a conservator or receiver is imminent.

[2] This fact distinguishes the other cases cited by OTS and make clear that its exhaustion argument, OTS' TRO Opposition, at 11 n. 7, is misplaced.

[3] OTS' argument, though framed in ripeness terms, could also be considered a challenge to Olympic's standing. The same facts which cause this court to believe that adjudication of this lawsuit is not premature cause the court to conclude that Olympic faces a sufficiently direct and imminent threatened harm to have standing. See *Andrade*, 729 F.2d at 1495 (plaintiff has standing if it can assert that it has sustained or is immediately in danger of sustaining a direct injury).

within the zone of interests that Congress intended a private party to assert. FDIC's PI Opposition at 4-8. It states that "Congress could not logically have intended to allow a private party to have standing to assure anything more than that the officer who acts in its regard acts with the independent authority of the Executive Branch and with prior concurrence of the Senate for this position." Id. at 5. The court rejects this claim as well.

The Vacancies Act make clear that Congress is concerned with more than ensuring that only confirmed officers act on behalf of the government. The Vacancies Act allows only confirmed officers to be designated as acting officials; however, it also places strict time limits on the life of a Vacancies Act designation. If the government were correct and the Vacancies Act sought only to assure that acting officers had undergone a confirmation process, presumably Congress would have written a much more generous time limit into the Vacancies Act.

The government also claims that only legislators should be granted standing to challenge unconstitutional appointments. FDIC's PI Opposition at 7. This argument ignores the Constitution's basic purpose. Although the Senate clearly has a strong interest in protecting its role in the confirmation process, the Constitution was not written to protect the interests of the Senate, the Congress, the President, or any other branch or division of government. The Constitution and its system of checks and balances was written to protect the people. The restrictions it placed upon the branches' exercise of power were not designed to ensure the branches' interest in equal power, but to ensure that citizens would not find themselves governed by a single branch which had swept all the government's power into its domain. Thus, entities which will be directly harmed by unconstitutional appointments clearly fall within the zone of interests which the Appointment Clause and the entire system of checks and balances was designed to protect.[4] These entities are routinely permitted to challenge unconstitutional appointments. See *Bowsher* v. *Synar*, 478 U.S. 714, 721 (1986) (Union members who would not receive scheduled increase in benefits have standing to challenge Balanced Budget and Emergency Deficit Control Act of 1985 on ground that it includes unconstitutional appointment provision); *Shoemaker* v. *United States*, 147 U.S. 282 (1893) (affected landowner has standing to challenge appointment of Rock Creek Park commission members); *Andrade*, 729 F.2d at 1494 (employees subject to RIF have standing under both constitutional and prudential standing doctrines to challenge appointment of officials responsible for RIF).

For the foregoing reasons, the court concludes that plaintiff has Article III standing to raise its constitutional challenge and that the court should not refuse to hear plaintiff's claim on prudential grounds.

3. Jurisdiction

Defendants' third challenge is that this court does not have jurisdiction to adjudicate plaintiff's claim or grant plaintiff the relief it requests. According to OTS, FIRREA explicitly prohibits federal district courts from reviewing the Director's decision to appoint a receiver or conservator before the fact and prohibits a district court from enjoining the appointment of a conservator or receiver. OTS' PI Opposition at 3-4; OTS' TRO Opposition at 12-19.

FIRREA provides in pertinent part that:

(E) The Director shall have exclusive power and jurisdiction to appoint a conservator or receiver for a Federal savings association. If, in the opinion of the Director, a ground for the appointment of a conservator or receiver for a savings association exists, the Director is authorized to apoint *ex parte* and without notice of conservator or receiver for the savings association. In the event of such appointment, the association may, within 30 days thereafter, bring an action in the United States district court for the judicial district in which the home office of such association is located, or in the United States District Court for the District of Columbia, for an order requiring the Director to remove such conservator or receiver, and the court shall upon the merits dismiss such action or direct the Director to remove such conservator or receiver. Upon the commencement of such an action, the court having jurisdiction of any other action or proceeding authorized under this subsection to which the association is a party shall stay such action or proceeding during the pendency of the action for removal of the conservator or receiver.

* * * * *

(G) Except as otherwise provided in this subsection, no court may take any action for or toward the removal of any conservator or receiver or, except at the request of the Director, to restrain or affect the exercise of powers or functions of a conservator or receiver.

FIRREA § 301, 103 Stat. 292.

OTS' entire argument on this issue fails to recognize the essence of plaintiff's claim. Olympic does not challenge the grounds upon which the Director will appoint a receiver or conservator; Olympic challenges the Director's constitutional authority to appoint a receiver or conservator.[5] Whether or not the above-quoted passages remove from federal district courts the power to hear pre-appointment challenges on the merits,[6] nothing in these passages limits a district court's power to hear a pre-appointment claim which challenges the Director's constitutional power to appoint a receiver or conservator. As the Court of Appeals for this Circuit has recognized, "Congress has given . . . an awesome amount of control and authority to the [Director]." *Haralson* v. *Federal Home Loan Bank Bd.*, 837 F. 2d 1123, 1127 (D.C. Cir. 1988) (quoting *Biscayne Fed. Sav. & Loan Ass'n* v. *Federal Home Loan Bank Bd.*, 720 F. 2d 1499, 1503 (11th Cir. 1983)). In light of that awesome authority and the irreparable injury Olympic will suffer if it is not allowed to challenge Mr. Martoche's authority until after an appointment is made, see pp. 40-43, infra, it is proper to hear plaintiff's claim at this time. Nothing in FIRREA makes this improper or beyond this court's authority.

Because plaintiff's challenge is ripe, because Olympic has standing to challenge Mr. Martoche's constitutional authority to act as Director of OTS, and because nothing in FIRREA removes this court's general jurisdiction to hear an Appointments Clause challenge, the court may reach the merits of plaintiff's request for preliminary injunctive relief.

B. Plaintiff's Right to Injunctive Relief

In deciding whether to issue a preliminary injunction, a trial court should consider (1) the plaintiff's likelihood of success on the merits, (2) the threat of irreparable injury to the plaintiff in the absence of injunctive relief, (3) the possibility of substantial harm to other interested parties from the injunctive relief, and (4) the public interest. *Foundation on Economic Trends* v. *Heckler*, 756 F. 2d 143, 151 (D.C. Cir. 1985) (citing *WMATC* v. *Holiday Tours*, 559 F. 2d 841, 842-43 (D.C. Cir 1977)); *Virginia Petroleum Jobbers Ass'n* v. *Federal Power Comm'n*, 259 F. 2d 921, 925 (D.C. Cir. 1958).

1. Plaintiff's Likelihood of Success on the Merits.[7]

Plaintiff argues that both the previous OTS Director, M. Danny Wall, and its current Acting Director, Salvatore R. Martoche, were appointed in violation of the Constitution's Appointments Clause. As a result, plaintiff contends that Mr. Martoche may not constitutionally exercise the authority, conferred upon the Director by FIRREA, to appoint a conservator or receiver for it. Defendants respond with four arguments: first, that Mr. Wall's appointment as Director of OTS did not require re-confirmation; second, that Mr. Martoche's designation under the Vacancies Act was proper even if Mr. Wall never constitutionally became OTS' Director; third, that the President had the inherent constitutional authority to designate Mr. Martoche as Acting Director even if he did not have statutory authority to do so; and finally, that Mr. Wall and Mr. Martoche validly delegated their powers to others while acting as de facto officers and that therefore those delegated officials may appoint a receiver or conservator even if Mr. Martoche cannot.

[4] The court need not here decide whether so-called congressional standing, an apparent creature solely of the D.C. Circuit, ever exists.

[5] Although plaintiff's other claims may attack the merits of the Director's decision to appoint, plaintiff's constitutional claim clearly does not. Because the court is relying solely on plaintiff's constitutional claim in granting plaintiff's motion for preliminary injunction, only plaintiff's constitutional claim is relevant in deciding whether FIRREA removed jurisdiction from this court.

[6] Contrary to defendant's assertion, FIRREA does not appear to prohibit pre-appointment review. Subsection G by its terms only prohibits the courts from removing or restraining an appointed conservator; it simply does not speak to pre-appointment actions. Similarly, the legislative history cited by OTS limits only the jurisdiction "to order the removal of a conservator or receiver," OTS' TRO Opposition, at 15, and all of the cases cited by OTS involve post-appointment review. *See, e.g., Yorkridge Calvert Savings and Loan Association* v. *Office of Thrift Supervision*, C.A. No. B-89-3443 (D. Md. 1990) (refusing TRO where receiver had already been appointed); *Haralson* v. *Federal Home Loan Bank Bd.*, 837 F. 2d 1123 (D.C. Cir. 1988) (upholding District Court's refusal of injunction to prevent already appointed conservator from selling plaintiff's assets); *Biscayne Fed. Sav. & Loan Ass'n* v. *Federal Home Loan Bank Bd.*, 720 F. 2d 1499, 1500 (11th Cir. 1983) (reversing District Court's grant of limited injunctive relief against an already appointed receiver), cert. denied, 467 U.S. 1215 (1984).

[7] OTS states that to demonstrate a reasonable likelihood of success on the merits Olympic "must demonstrate that it will probably succeed in proving on the merits that none of the statutory grounds for appointing a conservator or receiver exist." OTS' TRO Opposition, at 21 (emphasis in original). This is incorrect. As to plaintiff's constitutional claim, it must show that Mr. Martoche cannot appoint a receiver or conservator, not that no properly appointed officer could appoint a receiver or conservator. Cf. pp. 11-13, supra.

a. Mr. Wall's appointment

The Appointments Clause of the Constitution provides that:

[The President] shall nominate, and by and with the Advice and Consent of the Senate, shall appoint . . . all other Officers of the United States, whose Appointments are not herein otherwise provided for, and which shall be established by Law: but the Congress may by Law vest the Appointment of such inferior Officers, as they think proper, in the President alone, in the Courts of Law, or in the Heads of Departments. U.S. Const. art II, § 2, cl. 2. As an officer of the United States, the Director of OTS—like "any [other] appointee exercising significant authority pursuant to the laws of the United States"—must be appointed in the manner prescribed by the Constitution's Appointments Clause, *Buckley* v. *Valeo*, 424 U.S. 1, 126 (1976).[8]

Mr. Wall was appointed as OTS' initial Director by operation of section 301 of FIRREA, which provided that the Chairman of the FHLBB on the date FIRREA became effective would become OTS' initial Director and would serve as Director until his term as chairman of the FHLBB would have expired. FIRREA § 301, 103 Stat. 278. Thus, Mr. Wall clearly was not appointed in the manner specified by the Constitution. The Government contends, however, that Mr. Wall's responsibilities as Director of OTS were essentially indentical to (although more limited than) his responsibilities as Chairman of the FHLBB. The government concludes that therefore Mr. Wall's "appointment" as Director did not require re-nomination and reconfirmation. FDIC's PI Opposition at 29-38 (citing *Shoemaker*, 147 U.S. at 282).

In *Shoemaker*, a landowner challenged the act creating Rock Creek Park in Washington, D.C. The act created a commission to select the land for the park, to arrange to have the land surveyed, to determine the amount of compensation due landowners whose land was taken for the park, and to perform certain other duties. Id. at 284-86. The heirs of one of the persons whose land was to be included in the park sought to prevent the land from being taken by raising a number of challenges to the constitutionality of the act and to the validity of proceedings under the act. Id. at 288. Among other things, they challenged a provision in the act which directed that the Chief of Engineers of the United States Army and the Engineer Commissioner of the District of Columbia would serve as two of the five commission members. Id. at 284, 289, 300-01. They argued that, "while Congress may create an office, it cannot appoint the officer; . . . the officer can only be appointed by the President with the approval of the Senate. . . ." Id. at 300.

The Court rejected this argument, holding that:

As, however, the two persons whose eligibility is questioned were at the time of the passage of the act and of their action under it officers of the United States who had been theretofore appointed by the President and confirmed by the Senate, we do not think that, because additional duties, germane to the offices already held by them, were devolved upon them by the act, it was necessay that they should be again appointed by the President and confirmed by the Senate. It cannot be doubted, and it has frequently been the case, that Congress may increase the power and duties of an existing office without thereby rendering it necessary that the incumbent should be again nominated and appointed.

Id. at 301 (emphasis added).

The *Shoemaker* case is distinguishable from this case in two important respects. First, the provision challenged in Shoemaker added certain duties to two offices; it did not confer additional responsibilities on any particular officer. Had the Chief of Engineers of the United States Army or the Engineer Commissioner of the District of Columbia resigned from office after the commission was established, he would no longer have served on the commission—the new Chief of Engineers or Engineer Commissioner would have taken over those duties. Here, however, Mr. Wall was designated the new Director of OTS. Although the position was given to him by virtue of his prior position, it was given to him.

Another important fact distinguishes this case from *Shoemaker*. In *Shoemaker* and the cases which have relied on its reasoning, see FDIC's PI Opposition at 33-34, the duties of one office were supplemented or were transformed. Service on the Rock Creek Park commission because an additional duty of the Chief of Engineers of the Army; the Secretary of Health, Education and Welfare became the Secretary of Health and Human Services. Here, however, two members of the Federal Home Loan Bank Board were removed by operation of FIRREA, and only the third had his responsibilities transferred to OTS. Had OTS been placed under the supervision of a three-person board, this court believes that the government's argument would be correct and that the three former FHLBB members would not have required re-confirmation. However, when Congress decided that only one of the three FHLBB members would have his responsibilities transferred and, moreover, decided specifically which of the three would become the new Driector, it went beyond simply changing the duties of an office and appointed a person to a new post. This difference makes *Shoemaker* inapposite.

Although the Supreme Court's decision in *Bowsher*, 478 U.S. at 714, is not controlling, its holding supports this limit of *Shoemaker's* holding. In *Bowsher* the Court held that "[a] direct congressional role in the removal of officers charged with the execution of the laws . . . is inconsistent with separation of powers." *Bowsher*, 478 U.S. at 723, 730. Congress clearly may abolish officers, thereby effectively removing the officers who hold those offices. Thus, the situation presented herein does not directly violate *Bowsher's* mandate. However, when it abolished one agency and removed its three officers, yet designated one of the three as the head of the newly-created successor agency, Congress exercised the kind of decisionmaking about who will serve in Executive department posts that the Constitution says it cannot. Indeed, the closer the relationship between the functions of the FHLBB and OTS—and thus the more *Shoemaker* is applicable—the more serious the *Bowsher* problem.[9]

For the foregoing reasons, the court concludes that *Shoemaker* does not apply to the facts of this case. As a result, Mr. Wall required re-nomination and re-confirmation before he could constitutionally take office as OTS' Director. Since he was never renominated or re-confirmed, he never constitutionally took office.

b. Mr. Martoche's appointment

After this lawsuit was filed and the day after Mr. Wall's resignation became effective, the President issued the following order:

In accordance with the provisions of section 3347 of title 5 of the United States Code, and as President of the United States, I hereby authorize and direct Salvatore R. Martoche, an Assistant Secretary of the Treasury (Enforcement), to perform the duties of the Office of Director of the Office of Thrift Supervision for the maximum term permitted by 5 U.S.C. section 3348 or until confirmation and appointment of a Director of the Office of Thrift Supervision, whichever is sooner.

OTS' TRO Opposition, at Exhibit E (order directing Mr. Martoche to perform duties of Director). Mr. Martoche has been serving as Acting Director of OTS since March 5, 1990.

Olympic contends that the President's designation of Mr. Martoche as Acting Director pursuant to 5 U.S.C. § 3347 is improper. According to Olympic, section 3347 does not give the President authority to fill a vacancy caused by the resignation of any person other than a constitutionally appointed officer. Because Mr. Wall was never constitutionally appointed Director of OTS, Olympic concludes that his resignation does not fall within the scope of section 3347. The government responds with two arguments: first, that plaintiff's interpretation of section 3347 is incorrect and that Mr. Martoche's designation under that section was proper; and second, that even if the designation under section 3347 was improper, the designation was a proper exercise of the President's inherent powers.[10]

I. Was Mr. Martoche properly designated under the Vacancies Act?

In the Vacancies Act, Congress delegated to the President limited authority to temporarily fill certain vacancies. The Act, 5 U.S.C. § 3345 et seq., provides in pertinent part:

§ 3346. When an officer of a bureau of an Executive department or military department whose appointment is not vested in the head of the department, dies, resigns, or is sick or absent, his first assistant, unless otherwise directed by the President under section 3347 of this title, shall perform the

[8] The government has never contended that the Director is not an officer subject generally to the Appointments Clause. Given the Director's broad discretion to regulate an entire industry and his freedom from intervention by higher-level Executive department officers, any such argument would clearly be wrong.

[9] It does not matter that FIRREA stated that the Chairman of the FHLBB—not Mr. Wallby name—would become OTS' initial Director. The constitutional problem is presented by the fact that Congress decided who would take over as OTS' Director and, whether it named that person by job title or by function, Congress named that person. Moreover, it does not matter that the President's proposee bill included a provision to make Mr. Wall OTS initial Director. The President and the Congress, whether alone or together, cannot decide to circumvent the Constitution's requirements.

[10] Defendants initially stated that Mr. Martoche's designation was performed solely under the Vacancies Act. See, e.g., OTS' TRO Opposition at 9, 24-25; OTS' PI Opposition at 2-3, 12. Moreover, neither defendant has proffered that the President did in fact intend to exercise his inherent powers when he appointed Mr. Martoche as head of OTS. However, since the defendant agencies have no authority to limit the President's exercise of his constitutional authority, the court will assume that the President intended his words "as President of the United States" to invoke any inherent appointment authority which he has.

duties of the office until a successor is appointed or the absence or sickness stops.

* * * * *

§ 3347. Instead of a detail under section 3345 or 3346 of this time, the President may direct the head of another Executive department or military department or another officer of an Executive department or military department, whose appointment is vested in the President, by and with the advice and consent of the Senate, to perform the duties of the office until a successor is appointed or the absence or sickness stops. This section does not apply to a vacancy in the office of Attorney General.

Olympic's argument, briefly stated, is as follows: Section 3347 provides an alternative way in which the President may fill vacancies under section 3345 and 3346, but does not itself authorize the President to fill vacancies. Therefore, the President can fill a vacancy under section 3347 only if it is the type of vacancy described in section 3345 or 3346. Section 3345 applies when the head of an Executive agency (other than the General Accounting Office) or military department dies, is sick, or is absent, and thus is inapplicable in this case. Section 3346 applies "[w]hen an officer of a bureau of an Executive department or military department, whose appointment is not vested in the head of the department, dies, resigns, or is sick or absent." Because Mr. Wall never constitutionally became an officer, his resignation does not constitute the resignation of "an officer of a bureau of an Executive department." As a result, neither section 3345 nor section 3346 authorized the President to temporarily fill the office of Director following Mr. Wall's resignation. Since the President lacked statutory authority to appoint Mr. Martoche and since the President did not appoint him in the manner specified by the Appointments Clause, Mr. Martoche's appointment is invalid and—like Mr. Wall before him—Mr. Martoche is without constitutional power to take any action as Director of OTS.

The court, after careful review of the relevant statutes, historical references, and cases, has determined that plaintiff's interpretation is correct. Section 3347 is by its terms available to the President "[i]nstead of a detail under section 3345 or 3346." Section 3346 by its terms gives the President authority to appoint an interim replacement "[w]hen an officer of a bureau of an Executive department . . . dies, resigns, or is sick or absent." Although defendants contend that "officer" as used in section 3346 does not mean "constitutional officer," this court does not agree. 5 U.S.C. § 2104 provides in pertinent part that:

(a) For the purpose of this title, "officer", except as otherwise provided by this section or when specifically modified, means . . . an individual who is—

(1) required by law to be appointed in the civil service by one of the following in an official capacity—

(A) the President;

(B) a court of the United States;

(C) the head of an Executive agency; or

(D) the Secretary of a military department.

Section 3346 does not "otherwise provide" a meaning for the term "officer," and therefore pursuant to section 2104 this court must construe that term to mean "constitutional officer" (i.e., an officer selected by the President with the advice and consent of the Senate or an officer whose appointment was delegated by Congress to the President alone, to the head of a department, or to the Judiciary). See also H.R. Rept. No. 1389, Enactment of Title 5, United States Code, Entitled "Governmental Organization and Employees", 89th Cong., 2d Sess. 67-68 (1966) (in discussing changes made to U.S.C. § 3332, committee stated that "[t]he term 'officer' is coextensive with and substituted for 'Each individual appointed hereafter as a civil officer of the United States by the President, by and with the advice and consent of the Senate, or by the President alone, or by a court of law, or by the head of a department' in view of the definition of 'officer' in section 2104.").

The government argues that section 2104's definition of officer is forward looking. Focusing on the language which defines an officer as an individual "who is . . . required by law to be appointed," the government contends that section 2104 does not require that the resigning officer was appointed, just that he was required to have been appointed. Thus, the government concludes, section 2104 does not require that Mr. Wall's appointment was constitutional, just that he occupied the position of an officer of the United States. This argument not only misreads the plain language of section 2104, it would unacceptably broaden the President's authority under the Vacancies Act. In effect, the government's argument would mean that the President could unconstitutionally "appoint" an "officer," have him resign, and then use the Vacancies Act to fill the post for up to 120 days. The court cannot allow the government to use the fact that the initial Director was unconstitutionally appointed to bootstrap its way into a Vacancies Act designation, for this violates both the terms and the spirit of the Vacancies Act. Instead of accepting the interpretation urged by the government, the court interprets section 2104 as meaning that to become an officer, one must satisfy the basic legal requirement for taking office: i.e., to take office, one is required to be appointed.

In a similar vein, the government argues that whether or not Mr. Wall ever became a de jure officer, he was a de facto officer and thus an "officer" who "resigned." FDIC's PI Opposition at 19-20, 25. The court rejects this argument as well. The de facto officer doctrine works to protect the public interest by validating prior acts of persons performing the duties of an office under color of title. See *Andrade*, 729 F.2d at 1496 and cases cited therein. However, despite its name, it does not transform the non-officer into an officer. Moreover, allowing the President to invoke the Vacancies Act whenever a de facto officer resigns would potentially allow the same kind of bootstrapping discussed above.[11] For these reasons, the court refuses to hold that the de facto officer doctrine transformed Mr. Wall into an officer and made the Vacancies Act available upon his resignation.[12]

The government next argues that even if the term "officer" as used in section 3347 means constitutional officer, the statute should be interpreted as giving the President authority to fill vacancies, however created. The court is not free to do this. The statute clearly states that it applies "[w]hen an officer . . . dies, resigns, or is sick or absent." Although defendants' argument is certainly logical, it is up to Congress—not this court—to decide the conditions under which the President may designate temporary replacements. Had Congress wanted to give the President general power to fill vacancies, it could have done so by wording the statute differently. The strict time limits placed upon life of a Vacancies Act designation clearly threaten that, in some instances, there will be no way under the Vacancies Act to appoint an interim official. However, a court would not be free to ignore these limits in order to avoid finding that an agency had no chief officer. Similarly, this court can not ignore the statute's clear provision detailing when the President may exercise Vacancies Act powers in ordrer to avoid finding that OTS has no Director. Congress has been on notice for more than 100 years that the Vacancies Act has generally been interpreted as giving the President authority to designate officers *only* when the statute's express terms are satisfied. For example, a 1909 Attorney General opinion concluded that the President could *not* make a Vacancies Act appointment where the vacancy was caused by the retirement of a bureau chief. 27 Op. Atty. Gen. 337, 345

[11] As plaintiff points out, a useful analytical device is to strike the unconstitutional provision from FIRREA and then see if the Vacancies Act would be available to the President. It would not: the Vacancies Act by its terms is not available to fill initial vacancies. 5 U.S.C. § 3345 *et seq.; Department of Energy—Appointment of Interim Officers*, 2 Op. O.L.C. 405, 407 (1978); *Matter of Department of Energy—Acting Officials' Status and Authority*, Op. No. B-150136 (May 16, 1978) (unpublished opinion of Comptroller General). The fact that an unconstitutional provision was included in FIRREA, and that Mr. Wall took office pursuant to that provision, should not render the subsequent acts more constitutional than they would have been absent the initial unconstitutional provision.

[12] The government offers two related arguments in its attempt to validate Mr. Martoche's appointment, which warrant only brief treatment. First, the government argues that because Mr. Wall was the de facto Director, the de facto officer doctrine validates his act of resigning and transforms his resignation into the resignation of an officer. The fallacy of the government's claim illustrated by applying it to a different set of facts. Under the government's reasoning, it would appear that one could not challenge any unconstitutional appointment because the officer's act of taking office would validate his status as an officer: by taking office and calling himself an officer, the person would become an officer. This is obviously wrong. The de facto officer doctrine validates acts upon which the public reasonably has relied. It does not change the fundamental nature of the act or transform the actor into something he is not.

Second, the government alleges that plaintiff cannot challenge the de facto acts of Mr. Wall and Mr. Martoche because it has failed to satisfy the two requirements announced in *Andrade*. OTS' TRO Opposition, at 27-29. The court rejects this claim for two reasons. First, Olympic is not asking this court to invalidate any of either Director's past acts, and therefore the de facto officer doctrine does not bar plaintiff's request. Second, plaintiff does meet *Andrade's* two requirements: it brought its lawsuit before the Acting Director appointed a receiver or conservator, and it notified OTS of its constitutional challenge before filing its lawsuit and in time for OTS to voluntarily refrain from acting against plaintiff. *See Andrade*, 729 F.2d at 1499; *see also Andrade* v. *Regnery*, 824 F.2d 1253, 1256 (D.C. Cir. 1987) (filing of underlying lawsuit provides adequate notice of Appointments Clause challenge). The fact that Olympic participated in proceedings before OTS in the fall of 1989 without challenging Mr. Wall's appointment, FDIC's PI Opposition at 23, does not matter; until OTS threatened plaintiff with immediate, irreparable harm, Olympic did not have standing to bring its challenge. (Indeed, defendants' contend that even now Olympic does not have standing. The government's simultaneous assertion that Olympic's challenge is both too early and too late is rejected.)

(1909). The Attorney General observed that "no provision is made in any of [the Vacancies Act] sections for temporarily filling a vacancy caused by the retirement of the chief of a bureau." He concluded that "if the vacancy be caused by the retirement of the incumbent, Congress having made no provision for the temporary discharge of his duties, the Bureau remains without a head until the place is filled [by the President by and with the advice and consent of the Senate]." Id. at 345, 346.[13] But see 19 Op. Atty. Gen. 500 (1890) (Vacancies Act permits temporary appointment to replace retired officer even though its terms technically only reach death, resignation, absence, and sickness). The same year, the Attorney General considered the Vacancies Act's provision allowing the President to designate "any other officer in either department" and concluded that only an officer actually holding an office in a department may be designated under the Act. 28 Op. Atty. Gen. 95, 97 (1909). He stated that "[i]t is not sufficient that [the designated person] has been appointed an officer by the President, by and with the advice and consent of the Senate; he must hold an office in a department which is established by law." Id. Almost twenty years earlier, the Attorney General has considered the provision allowing "the assistant or deputy" of a chief or other officer to act in the chief or officer's stead when they are absent. 19 Op. Atty. Gen. 503, 504 (1890). The Attorney General decided that "expression 'the assistant or deputy of such chief or of such officer,' can only refer to assistants or deputies whose appointment is specifically provided for by statute." Id. at 504. As a result, he concluded that an officer of the Navy, detailed and assigned by the Secretary of the Navy as an assistant to the chief of a bureau, could not act in the chief's place under the Vacancies Act because there was no specific provision for the assignment of assistants to chiefs of bureaus from commissioned officers of the Navy. Id. at 503, 504. More recently, the Comptroller General considered the Vacancies Act and concluded that "by its terms, [the Act] clearly contemplates the vacating of an office by the person occupying the position as a condition precedent for the application of its provisions. Since none of the five offices [at issue] were previously occupied, it would appear that the Vacancies Act would have no application." *Matter of Department of Energy—Acting Officials' Status and Authority*, Op. No. B-150136 (May 16, 1978) (unpublished opinion). Two days later, the Attorney General agreed with this conclusion. *Department of Energy—Appointment of Interim Officers*, 2 Op. O.L.C. 405, 407 (1978) ("[t]he existing procedures provided for in the Vacancies Act . . . were not adapted to initial vacancies in a newly established department"); 411 ("[w]e have read the opinion of the Act Comptroller General dated May 16, 1978. . . . We agree with it to the extent that it concludes that the Vacancies Act is inapplicable to the situation at hand). Moreover, the Attorney General concluded that the Vacancies Act did not permit the President to designate as initial Department of Energy officers ex-officers of DOE's predecessor agency because, when the predecessor agency was abolished, those persons ceased to be officers. Id. at 407. Thus, the Attorney General expressly rejected a broad, ends-oriented reading of section 3347 which would have permitted the President to designate the most qualified persons, who had previously been nominated by the President and confirmed by the Senate for virtually identical positions, as interim DOE officials. Id.

The above opinions are of course not binding precedent. However, they are useful for two purposes. First, these opinions show that the Attorney General and other senior government officials have, for the last 100 years, interpreted the Vacancies Act as giving the President authority to make interim appointments only when the express conditions of the Act are satisfied. As defendants point out, the Attorney General is charged with responsibility for ensuring that only lawfully appointed officials act on behalf of the United States, and consequently his interpretation of law on this subject is entitled to great deference. OTS' PI Opposition at 15 n.9. Second, these opinions show that Congress has been on notice for more than a century that the Vacancies Act is generally strictly and narrowly interpreted. If Congress intended the Act to serve a more general purpose—to allow the President to fill any vacancy, however created—as the government contends, Congress has had ample opportunity to amend the statute to give effect to the intent.

The government argues that FIRREA itself represents Congressional support for a broad interpretation of the Vacancies Act. According to the government, "the obviously disastrous effects [a narrow reading] would have on Congress' legislative efforts to salvage the thrift industry itself suggests the unlikelihood that Congress could have intended plaintiff's interpretation of the Vacancy Act." FDIC's PI Opposition at 9; see also id. at 11. However, the Vacancies Act was enacted long before FIRREA and thus Congress' goals in enacting FIRREA are irrelevant in interpreting the Vacancies Act.

Not only does FIRREA not support the government's broad interpretation of the Vacancies Act, it argues against that interpretation. FIRREA specifically provides that "[a] vacancy in the position of Director which occurs before the expiration of the term for which a Director was appointed shall be filled in the manner established in paragraph (1) [appointment by President, by and with advice and consent of the Senate], and the Director appointed to fill such a vacancy shall be appointed only for the remainder of such term." FIRREA § 301, 103 Stat. 278. The court cannot accept the government's claim that this provision "is boilerplate language of the kind that exists in countless statutes" and that it was included "merely to provide a method by which a permanent replacement for the Director may be appointed when the incumbent leaves before the end of his term." FDIC's PI Opposition at 10 n.8 (emphasis in original). If this were true, the portion of the provision requiring Senate confirmation would have no effect: the Vacancies Act allows only for temporary designations, and FIRREA mandates that the Director must be appointed with the advice and consent of the Senate. Thus, even without FIRREA's vacancy provision, permanent replacements would have to be appointed with the advice and consent of the Senate. If the vacancy provisions means only that permanent replacements must be appointed with the Senate's consent, as the government contends, then it means nothing.[14] The court will not interpret the vacancy clause in a way which renders all or a portion of it meaningless. See OTS' PI Opposition at 13 n.7 (both FIRREA and Vacancies Act should be interpreted such that neither is rendered superfluous) (citing *Watt* v. *Alaska*, 451 U.S. 259, 267 (1982)).[15] As a result, the court finds that the vacancy clause is evidence that FIRREA did not envision, and that in enacting FIRREA Congress did not desire a broad, results-oriented interpretation of the Vacancies Act.[16]

For all of the foregoing reasons, the court concludes that the Vacancies Act should be interpreted as authorizing the President to designate an acting officer only when a prior, constitutionally appointed officer dies, resigns, or is sick or absent. As a result, in light of the court's conclusion that Mr. Wall never constitutionally became the Director of OTS, see p. 23, supra, the court

[13] In the case under consideration by the Attorney General, the President retired the officer after concluding that he was no longer fit to perform his duties. The Attorney General distinguished this from the case where an incumbent resigns, finding that the latter "implies the consent of the incumbent to the giving up of the office and does not include the compulsory retirement of an officer by reason of disability to perform the duties of the office." 27 Op. Atty. Gen. at 345. This distinction is at least as fine as the one urged by plaintiff, i.e., that if Mr. Wall was never constitutionally appointed he was not an "officer" under the Vacancy Act.

[14] The other half of the vacancy clause, which provides that a replacement Director shall serve only the remainder of the prior Director's term, would have meaning under the government's interpretation.

[15] The government argues that to apply the FIRREA provision in this circumstance "would suggest that Congress wanted vacancies in the office to continue until confirmation of a successor, even though Congress was so concerned about a temporary period without a Director that it designated the specific person who would be the first Director of OTS, and provided that he would immediately assume the office of Director," The legislative history nowhere states that the Wall provision was included to avoid a temporary initial vacancy. Indeed, various portions imply that this was not the reason FIRREA specified that Wall would be the OTS' first Director. See, e.g., H.R. Rept. 54, part 1, 101st Cong., 1st Sess. 425 (1989) (House Committee on Banking, Finance, and Urban Affairs would have deleted provision making Wall OTS' initial Director due to Wall's failure to effectively execute his responsibilities and to assist Congress in its effort to examine S & L crisis, and would have prohibited any FHLBB member from becoming Director without formal nomination and confirmation); 135 Con. Rec. S4240-47 (debate responding to proposal to remove provision appointing Wall as OTS's initial Director focused exclusively on Wall's qualifications and fairness of "removing" him mid-term, but did not mention need to avoid temporary vacancy). Moreover, FIRREA's history is replete with references that Congress must take a more responsible and active role in overseeing the thrift industry. See, e.g., S. Rep. No. 19, 101st Cong., 1st Sess. 3-5 (1989) (Senate Committee on Banking, Housing, and Urban Affairs discussed prior abuses and stressed need for diligent committee oversight of thrift industry). These statements support the conclusion that Congress was more concerned with temporary losses of its oversight power than with temporary vacancies, and that it included the vacancy clause to ensure that no person would act as Director who had not been subjected to Senate scrutiny.

[16] The court need not conclusively determine exactly what FIRREA's vacancy provision means and whether it preempts the Vacancies Act with respect to the position of Director of OTS. The court has concluded that the Vacancies Act cannot be used to justify Mr. Martoche's appointment, and therefore there is no conflict in this case. The discussion of FIRREA's vacancy clause is intended solely to further illuminate why the court believes that it would be inconsistent with the Vacancies Act and not in furtherance of FIRREA's goals for the court to interpret the Vacancies Act in the manner requested by the government.

finds that Mr. Martoche's appointment was not authorized by the Vacancies Act.

ii. Did the President have inherent authority to appoint Mr. Martoche under the facts present in this case

The FDIC argues that, even if the Vacancies Act did not confer on the President the authority to designate Mr. Martoche, the President has inherent authority to appoint officers and that he properly exercised that authority in this case. FDIC's PI Opposition at 25-29. To accept this argument, the court would need to ignore a prior decision of this Circuit's Court of Appeals as well as the more than 100 years unchallenged use of the Vacancies Act.[17]

In *Williams* v. *Phillips*, 482 F.2d 669, 670 (D.C. Cir. 1973), the Court of Appeals for the District of Columbia Circuit refused to stay the District Court's order enjoining the Acting Director of the Office of Economic Opportunity from taking any further action as Acting Director of OEO pending appeal of that order. The District Court had concluded that "in the absence of . . . legislation vesting a temporary power of appointment in the President, the constitutional process of nomination and confirmation must be followed." *Williams* v. *Phillips*, 360 F. Supp. 1363, 1371 (D.D.C. 1973). The District Court had squarely rejected the argument, now made in this case by the FDIC, that the President has authority to make temporary appointments pursuant to his Article II, § 3 obligation to "take Care that the Laws be faithfully executed." Id. at 1368-69. While the Court of Appeals did not unequivocally affirm the District Court, it did state that the President's inherent power to appoint, if it exists at all, is limited. *Williams*, 482 F.2d at 670-71.

The following circumstances, taken together, cause this court to conclude that the appointment of Mr. Martoche was not a proper exercise of whatever limited power the President may possess. First, the government has not argued that any emergency existed beyond the general emergency which exists whenever a regulatory body charged with important function is left without its primary officer. If this were enough to create an emergency and justify appointments outside the Vacancies Act and the Constitution, the protections afforded by the Act and the Constitution would quickly be lost. Second, if any emergency did exist it was the result not of unforeseen circumstances, but of FIRREA's unconstitutional attempt to appoint Mr. Wall as OTS's initial Director. The Constitution surely is not served if its avoidance creates in the President powers which he otherwise would not have. Third, unlike the situation present in *Williams*, the Vacancies Act does generally apply to vacancies in OTS. Where Congress has delegated to the President limited power to fill the kind of vacancy at issue, and where that power was not sufficient to permit the attempted designation, the Court should not broaden Congress' delegation by invoking an undefined and generally unrecognized Presidential power. For these reasons, the court believes it would be improper under *Williams* to find that the President's designation of Mr. Martoche was a permissible exercise of this inherent authority.

Moreover, if the court were to find that the President had the inherent authority to designate Mr. Martoche Acting Director of OTS, then the Vacancies Act would be an unconstitutional limitation on the President's constitutional powers. See *Williams*, 360 F. Supp. at 1369. The court is not inclined to hold that the Vacancies Act, relied on by all branches of the government for more than 100 years, see Plaintiff's Post-Argument Memorandum in Support of Motion for a Preliminary injunction at 16-19 (filed Mar. 15, 1990) ("Plaintiff's Post-Argument Memorandum"), is and always has been unconstitutional.

For the foregoing reasons, the court finds that if the President has any inherent authority to appoint temporary officers, his authority is limited and the circumstances which would permit its use were not present in this case. The court therefore concludes that Mr. Martoche was not validly appointed.

c. May other OTS officials exercise the director's power to appoint a receiver or conservator pursuant to previous delegations of authority

Defendants finally argue that, even if Mr. Martoche cannot exercise the powers of the Director, both Mr. Wall and Mr. Martoche delegated their authority to other officers within OTS. According to OTS, these delegations are past acts which should be recognized under the de facto officer doctrine and therefore the delegatees can now exercise all the powers of the Director.

Assuming these delegations were otherwise proper, each of the Directors could not delegate more authority than he himself had. In light of the court's conclusion that neither Mr. Wall nor Mr. Martoche were ever constitutionally appointed Director of OTS and therefore never exercised their powers excepts as de factor officers, at most they were able to delegate de factor authority. As a result, none of their subordinates' future acts are protected from judicial scrutiny under the de facto officer doctrine. The fact that the delegations are past acts does not bring the delegatees' future acts within the doctrine's protection. Accordingly, because Mr. Martoche cannot constitutionally appoint a receiver or conservator for Olympic, neither can any of his subordinates.

For the foregoing reasons, the court concludes that Olympic has a strong probability of success on its claim that neither Mr. Wall nor Mr. Martoche were constitutionally appointed Director of OTS and that therefore neither they nor any of their subordinates may constitutionally appoint a receiver or conservator for Olympic.

2. Plaintiff's Irreparable Injury

Despite defendants' arguments, plaintiff will clearly suffer an irreparable injury if its request for injunctive relief is not granted. If a receiver or conservator is appointed, there is a reasonable probability that Olympic will be destroyed or fundamentally altered. See Plaintiff's Post-Argument Memorandum at 25-31.[18] OTS contends that it will get fair market value for any assets sold and that therefore Olympic will not be harmed by liquidation. OTS' PI Opposition at 25-26. However, this agrument ignores two important considerations. First, receiving the fair market value for a business' assets is not necessarily adequate; the destruction of the business is itself an irreparable injury. See e.g., Youngstown Sheet & Tube Co. v. Sawyer, 343 U.S. 579, 585 (1952) (seizure and government operation of ongoing business were bound to result in damages of such a nature as to be difficult, if not incapable, of measurement); WMATA v. Holiday Tours, 559 F.2d 841, 843 (D.C. Cir. 1977) (destruction of a business is an irreparable injury).[19] Olympic's owners have not chosen to liquidate the thrift, and the government has no right to impose this choice upon it. The fact that Olympic may soon fail even without government intervention does not transform its immediate destruction at OTS' hands into an insignificant intrusion. As the Court of Appeals has made clear, one is injured when the government improperly takes away a right, whether or not the end result is inevitable. See Andrade, 729 F.2d at 1494-96. Second, if OTS agrees not to assert the de facto officer doctrine in a post-appointment challenge, it is highly unlikely that the receiver or conservator could get fair market value for Olympic's assets. Any possibility that this court would order OTS to undo the transactions entered into by the receiver or conservator would increase the level of uncertainty associated with any sale and ensure that any buyer would discount the price he would otherwise pay for Olympic's assets.

If OTS and FDIC will not or can not waive the right to assert the de facto officer doctrine in a post-appointment proceeding, Olympic's injury would be compounded because it would permanently lose its right to challenge Mr. Martoche's authority to act as OTS' Director. If a receiver or conservator is appointed and that appointment is then validated under the de facto officer doctrine, Olympic's constitutional claim would be moot and Olympic would forever be barred from challenging the manner in which the government took away its business. *Andrade*, 729 F.2d at 1497.[20] This additional injury—the permanent loss of the right to challenge the constitutionality of Mr. Martoche's appointment and authority to regulate Olympic—renders FIRREA's judicial review provision inadequate.

3. The Harm to Defendants and to Others

Defendants do not assert that they will be directly harmed should the court issue the injunction requested by plaintiff. Rather, defendants' harm flows solely from their inability to protect the public interest should the Director be enjoined from taking cer-

[17] Olympic argues persuasively that the Constitution itself makes clear that the President does not have any inherent power to appoint officers without the advice and consent of the Senate. Plaintiff's Post-Argument Memorandum in Support of Motion for a Preliminary Injunction at 13-15 (filed Mar. 15, 1990). The court need not decide whether this is true because the circumstances of this case make it clear that, if such power exists at all, it was not available to the President under the facts present herein.

[18] The government argues that a receiver or conservator, if appointed, would not necessarily liquidate Olympic. FDIC's PI Opposition at 46-47. However, in light of OTS' refusal to promise not to liquidate Olympic, this assertion does not render Olympic's injury arguments untenable.

[19] Contrary to the government's argument at the hearing on plaintiff's motion for a PI, the Supreme Court's finding of irreparable injury in Youngstown did not solely depend on the uncertainty that plaintiff would be entitled to recover the value of property taken for a public use. See 343 U.S. at 585.

[20] The court is not convinced that OTS and FDIC can promise not to raise the de facto officer doctrine in subsequent proceedings. The doctrine is designed "to protect the public by ensuring the orderly functioning of the government despite technical defects in title to offices." OTS' TRO Opposition, at 26 (citing State Dental Council and Examining Board v. Pollock, 457 Pa. 264, 318 A.2d 910, 913 (1974)) (emphasis added). If innocent parties enter into transactions with Olympic's conservator or receiver, it might be improper to ignore their plight and attempt to undo what the conservator or receiver had done under color of law.

tain actions. Similarly, the harm to others is solely a harm to the public and, specifically, to the taxpayers. As a result, the portion of the court's analysis focusing on harm to defendants and to others is treated in the next section.

4. The Public Interest

The government claims that Olympic's "precarious financial condition and the risk of enormous loss to the federal insurance fund" make clear that an injunction would not serve the public interest. OTS' Preliminary Injunction Opposition, at 26. They have argued that, should the court issue the injunction requested by plaintiff, the court will subject S & L depositors, the thrift industry, and the nation's entire financial system to extraordinary and unreasonable risks. FDIC's TRO Opposition at 34.

Olympic has not asked this court to issue a sweeping injunction prohibiting the Director from taking any action against any S & L. Rather, it has requested that the court enjoin the Director from appointing a receiver or conservator for Olympic until it decides the merits of this action. The court does not believe that Olympic, if given the relief it requests, poses a serious threat to the public interest and the Savings Association Insurance Fund. Certainly there is some danger associated with allowing any at-risk thrift to continue operating. However, a number of facts minimize the risk presented by Olympic. First, OTS has never alleged that Olympic's officers are engaging or have engaged in any affirmative misconduct. Rather, OTS attributes Olympic's poor operating results to a high level of non-earning assets and nominal interest margins. OTS' TRO Opposition at 7. Second, although Olympic has failed to make its operations profitable, it has managed to remain marginally profitable by engaging in certain nonrecurring actions. OTS' TRO Opposition at 7. Third, Olympic's troubles do not appear to be anything new. Although its performance may be deteriorating, OTS' TRO Opposition at 7, both Olympic and the thrifts it acquired between 1982 and 1984 were in poor financial health at the time of the acquisitions. See OTS' TRO Opposition at 7 (although FHLBB approved the mergers proposed by Olympic, it recognized that Olympic's prospects for a return to viability were tenuous). Fourth, Olympic is currently operating—and notwithstanding the PI will remain operating—subject to a number of restrictions on its business operations. See OTS' TRO Opposition at 39 and Exhibit D. These restrictions, previously imposed by OTS, should help to prevent plaintiff (and consequently the SAIF) from suffering any sudden catastrophic losses. Finally, it appears that OTS itself has decided that Olympic does not pose such a serious, immediate threat that it should be subjected to OTS' full range of supervisory powers. On February 12, 1990, the District of OTS permitted Olympic to make several categories of loans without individual OTS approval, notwithstanding OTS' normal policy of requiring approval of each new loan. OTS' TRO Opposition at 8.[21]

The court stresses that it is neither closing the door on OTS nor making any finding beyond the specific facts of this case. The court's conclusion that Olympic is entitled to the injunctive relief it requests depends not only on the conclusion that plaintiff has shown a strong likelihood of success on the merits and an irreparable injury. The injunction depends, in the end, on as a finding that these factors outweigh the public interest in protecting the Savings Association Insurance Fund against future losses. If conditions at Olympic should change—if, for example, there were a run on the thrift or if OTS discovered that Olympic's managers were looting the thrift's assets—OTS could come to the court, present those facts, and seek to dissolve the preliminary injunction. Contrary to OTS' assertions, OTS' TRO Opposition at 38-39, 42, Olympic has not requested, and this court is not issuing, an order invalidating Mr. Wall and Mr. Martoche's past acts or enjoining OTS from exercising any of its supervisory and regulatory powers other than its power to appoint a receiver or conservator for Olympic until a new Director is properly appointed. Although this may lead to a great deal of litigation and place OTS' operations in some confusion, the clear violation of plaintiff's constitutional rights and the public's interest in protecting the Constitution outweigh these harms to the public interest.

III. CONCLUSION

For all of the foregoing reasons, and pursuant to the order issued this date, Olympic's motion for a preliminary injunction is GRANTED. The government's only specific request for bond was in the amount of Olympic's total deposits—approximately $835 million. OTS' PI Opposition at 26-27. This is clearly excessive. Bond is therefore set at $1,000.

ROYCE C. LAMBERTH,
U.S. District Judge.

Date: March 21, 1990.

OFFICE OF THE ATTORNEY GENERAL,
Washington, DC, March 27, 1990.

Re Litigation Challenging Appointment of M. Danny Wall, Director, Office of Thrift Supervision.

Hon. DAN QUAYLE,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: I am writing to notify you that in appealing the grant of a preliminary injunction in *Olympic Federal Savings and Loan Ass'n* v. *Director, Office of Thrift Supervision,* No. 90-5085 & 90-5086 (D.C. Cir.), the Department of Justice has determined not to defend the constitutionality of that portion of section 301 of the Financial Institutions Reform, Recovery and Enforcement Act of 1989, Pub. L. No. 101-73, 103 Stat. 183 ("FIRREA"), that designated then-Chairman of the Federal Home Loan Bank Board, M. Danny Wall, to be Director of the Office of Thrift Supervision ("OTS"). *See* 103 Stat. at 278.

The *Olympic Federal* case involves a challenge to the enforcement of the capital requirements imposed by FIRREA on savings and loan institutions. In seeking a preliminary injunction against the appointment of a conservator or receiver, plaintiff chiefly contended that the Office of Thrift Supervision could not act against them because Director Wall was appointed without having been nominated to that post by the President and confirmed by the Senate as contemplated by the Appointments Clause. U.S. Const., Art. II, § 2, cl. 2.

Mr. Wall resigned effective March 5, 1990, at which time the President appointed Salvatore R. Martoche to be Acting Director. Nonetheless, on March 21, 1990, the district court issued a preliminary injunction on the ground that neither Mr. Wall nor Mr. Martoche were validly appointed to head the office of OTS Director.

The government is appealing the grant of the preliminary injunction on the grounds that Mr. Martoche was validly appointed. However, we have determined not to argue on appeal that the statutory designation of Mr. Wall as OTS Director conformed with the dictates of the Appointments Clause.

Similar challenges to Mr. Wall's authority to appoint a conservator and to any future actions against the various thrifts have been raised in several other suits in district court.[1] Such actions can only be taken by Mr. Martoche or his successor. Our arguments, therefore, will be similar to those we are raising in the appellate court in *Olympic,* and will not include the broader argument regarding Mr. Wall's appointment as OTS Director.

Sincerely,

DICK THORNBURGH,
Attorney General.

Mr. KERREY. I urge my colleagues to read both documents, particularly those who are prepared to vote for, particularly those who are sensing that maybe we should give this just a bit more time. I offer this as only one example of the kind of confusion that I believe exists and I believe exists as a consequence of the President not giving this domestic priority the kind of attention it deserves.

The administration's lawyers in the Treasury Department drafted the section in the original bill, S. 413, that provided Mr. Danny Wall would be able to continue to serve as the chief regulator of the savings and loan industry without having to come back to the Senate for reconfirmation.

Now the administration's lawyers in the Justice Department in the letter I referenced earlier have informed the President of the U.S. Senate that they will not defend the constitutionality of the section of the bill that gave Mr. Wall his new job.

Technically, the administration has ceded its argument that the holding of a prior case applied to Mr. Wall taking his job at OTS. The Justice Department will only argue that the President had authority to appoint Mr. Salvatore Mortoche as an acting director of OTS, and it seems to me, Mr. President, it is a reasonable question for all Members of Congress to ask that if

[21] The court also notes that, at the hearing on plaintiff's motion for a temporary restraining order, it responded to OTS' ripeness argument by asking whether OTS would agree to provide the plaintiff and the court with six hours' notice before appointing a receiver or conservator. OTS refused, effectively forcing this court to address the merits of plaintiff's claim. Having refused to exercise its discretion and thereby having forced an immediate challenge, OTS is in a weak position when it now asks the court to exercise the court's discretion and ignore plaintiff's clear right to a preliminary injunction.

[1] *See American Heritage Bancorp. et al.* v. *Director, Office of Thrift Supervision, et al.,* C.A. No. 90-0350 (D.D.C., filed February 15, 1990); *Franklin Savings Ass'n* v. *Office of Thrift Supervision,* Civ. No. 90-4054-S (D. Kan.); *Imperial Corp. of Am.* v. *Office of Thrift Supervision,* Civ. No. 90-0369K (BTM) (S.D. Cal.), and one in Oregon. *Ben Franklin Savings & Loan* v. *Office of Thrift Supervision,* C.A. 90-279-FR (D. Or.).

the administration's lawyers are correct, why did they not tell anybody about their concerns about the constitutionality of this section?

The Attorney General of the United States testified before the Senate Banking Committee that when FIRREA was introduced and he did not raise this concern at that time. It seems to me that the administration did not respond in as quickly a fashion as they should have to a legitimate concern raised on behalf of the Olympic Savings by a previous member of the Reagan administration given the responsibility for this precise area of constitutional law.

I have concluded, as I said, that I believe we should not confirm Mr. Ryan in this particular position.

I believe he has been entirely too vague and too uncertain as to what the policy will be under his hand as to the kind of regulation that he will put in place, as to the kind of discretion that he will use, and as to what the outcome of the savings and loan industry will be as a consequence.

But I have also concluded that, if we are to resolve all of the matters that surround the savings and loan problem and the FIRREA legislation, the executive branch is going to have to come forward much more aggressively and with much more interest. The President of the United States himself is going to have to get much more personally involved in this situation. Otherwise I believe it will continue to worsen, the taxpayers will be required to spend even more than they are currently being asked, institutions will be closed too slowly, communities will suffer as a consequence, and in the end you and I will be back and our colleagues will be back revisiting this matter time after time after time.

I yield the floor.

Mr. RIEGLE. Will the Senator yield for a comment before he yields the floor?

Mr. KERREY. Yes.

Mr. RIEGLE. It is an important point he raised and I wanted to draw his attention to an area of the committee report. He has addressed the question of this constitutional court issue that we are wedged against in terms of the presumed urgency of acting now on this nomination.

If the Senator will look on pages 36, 37, and 38 of the committee report, on March 23, we had David Mullins in as a nomineee to go on the Federal Reserve Board. David Mullins is one of the top people over at the Treasury Department and was a principal architect if not the principal architect of the savings and loan package that the Senator referred to that was presented on February 22, 1989 by the administration.

I asked Mr. Mullins about this very question.

I will read part of it. In the cross-examination on the lower part of page 37—"I am raising a different point. I am raising a point with respect to the Director of OTS. And the fact that the recommendation of the administration, as I read this language, makes it very clear that you envision that the sitting chairman of the Federal Home Loan Bank Board would serve to the end of the term." You are not saying that you do not remember that, are you?

"You know, Mr. Chairman, I think that was the proposal."

Then I continued, "So I take that to mean it was my assumption then and it is my assumption now that it was the intention the administration had. Am I correct in that?

"Yes, Mr. Chairman.

"Because that issue"—I continue—"because that issue has come up in terms of where the idea came from, and it came right out of your bill, not out of your proposal."

Mr. Mullins: "Yes, Mr. Chairman. All the leadership of the FDIC and the bank board would have gone past, through the bill in a stated place." All of that leads up to this key point with respect to the legal issue.

I then said, "I take it that question would not have arisen in that drafting group of which you were a part as to whether or not a legal challenge could later be made with respect to the confirmation process. Do you recall it ever coming up?"

Mr. Mullins said very directly: "Well, I think it probably was considered, Mr. Chairman, and looked into, but I thought people did not feel that it was a serious possibility because you took an existing agency, took away some of its subsidiaries and passed it over through the bill and I think it was looked at, the issue was looked at; but I think the conclusion was that we thought we were on solid ground.

"Did it relate also I suppose to the fact that you were bringing that office in under"—then he interrupts, "Treasury Department," and I said "Yes, the Treasury Department." He said, "Yes, Mr. Chairman."

So we do not have to guess about this because we just had a cross-examination on the record, under oath, within a matter of the last 10 days from one of the principal if not the principal architects of the bill. So that is where it all comes from.

Clearly they thought at the time there was a legal foundation. As the Senator says, the later documentation seems to suggest they have backed away from that. But all of that is an important part of the history that now puts us up against that presumed deadline.

I do not think we ought to deal on that basis. That is why we drafted this legislative initiative that, should the nominee go down, will give the President the authority and the power to put in an acting director until such time as another nominee could be found. We think we have a good remedy should it be needed.

Mr. KERREY. If I can respond, I appreciate the Senator providing that additional detail. I will see how this vote is going to break out; it will break out Republican versus Democratic.

The point I am genuinely trying to make is that this is a legislative branch versus executive branch issue. We have responsibilities on the legislative branch. They have responsibilities on the executive branch. We were asked to pass this legislation quickly and I believe did so. The Senator and the ranking member worked very hard, produced almost to the letter the legislature that the President asked for.

It seems to me that the record is clear that they have not responded in kind. There are many positions still left unfilled. The Senator said he hoped the RTC oversight board public members are confirmed, and it has been almost a year now since that legislation was passed.

There was no public representation on that board.

Mr. RIEGLE. The Senator is right on that.

Mr. KERREY. I urged my colleagues in the Senate, both Republicans and Democrats, to consider our legislative responsibilities and asked the question: Is the executive branch living up to their part of the bargain?

I urged my colleagues to read this document, this memorandum of opinion that was issued by Judge Lambert. You will see in this thing not failure on the part of the legislative branch to exert their oversight. The failure on the part of the executive branch is simply one example of the sort of thing that I see throughout all of this. That causes me considerable concern.

As I look at the votes, I guess I would expect this individual to be confirmed. My concern is we are seeing this as a Democratic-Republican fight and not as an instance for us to ask ourselves a question—what is the legislative responsibility of this matter?

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The distinguished Republican leader.

Mr. DOLE. Mr. President, I guess you could say, "What a difference a day makes." Yesterday we were all here embracing each other on the great bipartisanship of the clean air legislation. Today we are lining up pretty much along party lines.

But I liked yesterday better when we had a big policy issue. We debated it, we compromised our differences, and in the final analysis 89 to 11 was the vote on the clean air bill.

I do not know what has happened in 24 hours, but it seems the bipartisan-

ship has fallen apart. In fact, if you read the newspapers, it appears that the majority on the committee decided before the hearing to reject the nominee, which may be a first.

Mr. President, we are all familiar with the savings and loan screwup. It is real to everybody here and it is real to everybody in our States. In 1989, the industry had its worst year of losses, totaling $19.12 billion. The thrifts in Kanasas were hard hit, too, losing almost $606 million.

According to the most recent estimates, the RTC, the Resolution Trust Corp., now owns 26,800 homes, 772 office buildings, 158 hotels, 205 resorts, 51 restaurants, 236 industrial facilities, and 43 mines. These numbers are staggering and they are probably even higher. The RTC holds 37 properties in my hometown of Russell, KS, and it is not very big. So I can certainly understand those who say the RTC is fast becoming the Nation's biggest landlord.

So we all have a vested interest in ensuring that we solve the problem and that we solve it quickly.

We should all have a vested interest in seeing to it that we have a new Director of the OTS, and it should be someone with requisite experience and a commitment to taking on this enormously difficult task.

I have said repeatedly during the past several months that the savings and loan disaster probably is going to be an issue in the elections in 1990 and 1992 and beyond, not just for the House and Senate, but probably at the top level itself. And, probably, it deserves to be an issue.

I think the American people have a right to have the issue debated, if we can do it in an objective way. The taxpayers who have to pick up the tab in this country certainly ought to understand where we all are on this issue and what we are doing about it, rather than just criticizing whomever might be in charge. Criticizing is the easiest thing to do.

The chairman of the Banking Committee said that the directorship of the OTS is one of the toughest financial jobs in the country. He said that the job requires someone with considerable financial skills. I could not agree more.

I do not think you have to be a thirft insider, a so-called thrift expert, to take on the job of overseeing the savings and loan industry. Let us face it, it was the insiders, the so-called thrift experts, who got us where we are today, drowning in a cesspool of unbridled greed and fiscal irresponsibility.

It was the experts who told us that there should be no limitations whatsoever on broker deposits. It was the experts who argued that State-chartered thrifts should be permitted to engage in an unlimited array of speculative activities. It was the experts who said there was no constitutional problem if the Director of the Federal Home Loan Bank Board stayed on as Director of the OTS.

It was the experts who gave us the rosy scenario and assured us that the thrift industry in the 1980's was "doing just fine, thank you."

Some of these so-called experts are still in the industry running successful thrifts. Some have left the industry after running their thrifts into the ground. Some of the experts are under indictment or in prison, charged with ripping off their depositors and milking the taxpayers out of billions of hard-earned dollars.

And some of the experts happen to be Members of Congress, who spent all of 1986 studying the President's $15 billion FSLIC recapitalization plan, only then to reject the plan in favor of a watered-down $5 million Band-Aid version. Had we adopted the President's plan in 1986, we might not be in the shape we are today.

It was the same experts in Congress who throughout the eighties rejected bill after bill that would have given the Federal banking and thrift regulators greater enforcement powers; it was the same experts in Congress who yelled a loud "no" at the Bank Board when the Board asked Congress for the authority to limit the type of direct investments that a thrift could legally make.

So much for the experts. I think all of us know expertise is one thing, but common sense and good judgment and being tough-minded are something else. And if we have learned anything, we have learned that expertise and good judgment are not always a package deal.

I did not know Tim Ryan before this nomination. He may not have been my choice. Maybe I would have found somebody else. Maybe there is somebody just waiting to be called. But I understand nobody called in asking for the job.

Maybe there is someone out there who understands everything that we want them to understand, real or imagined, and maybe that person would still be on the stand in a hearing week after week trying to explain all of his or her alleged conflicts of interest. And, yes, there are probably people in this country who are more technically qualified than Jim Ryan to handle the OTS job's enormous responsibilities.

On the other hand, Tim Ryan's record in Government is a pretty good one. It suggest that he is fully capable and fully qualified to be Director of the Office of Thrift Supervision. If you are going to measure somebody, you have to see what they have done, not what they have said or who they have criticized, but what did this man or this women—Democrat, Republican, independent or whatever, in or out of politics—do in the job he or she had?

Well, Jim Ryan had a pretty good record at the National Labor Relations Board and as Solicitor General of the Labor Department, and now as an outstanding member of the bar here in Washington, DC. He is an acknowledged expert in pension matters. He has represented clients on complex financial issues involving banking regulations, on mortgage- and other asset-based securities, and he has demonstrated that he can be effective in managing an organization as complex as the OTS.

Earlier, somebody said that the Directorship of OTS is just a big policy job. There are a lot of people over there, 3,500, and there are a lot of experts and a lot of people with technical qualifications. Do not just take my word for it. The distinguished Senator from Virginia just quoted a number of outstanding businessmen who know Tim Ryan, who know him well, and say without hesitation that he meets the criteria fully and completely. As an attorney and as a manager, he has done things the right way.

So it just seems to me that you can have your experts, and you can have your thrift insiders, but I will put my money on someone who is independent from the S&L industry. I will put my money on someone who is an enforcement-minded lawyer and a tough-minded pragmatist like Tim Ryan.

Let us not forget that Congress has an oversight role to play here. Congress will have the opportunity to review Tim Ryan's job every week. We will have the opportunity to review his performance. If Tim Ryan fails the job test, if he cannot perform, then the President and Congress should ensure that he is removed from the Director's chair and removed without delay. We are not powerless around here.

I am certain that if the Congress in its oversight role finds that someone is not doing his job at the OTS or elsewhere in Government, we can have an impact on what happens to that person. We owe that much to the American people.

During the Banking Committee hearings, my friend and distinguished colleague from Ohio [Mr. METZENBAUM] raised a number of so-called conflict-of-interest allegations. I have had the opportunity to review these allegations, and I must say that they are about as significant as a clipped toenail.

Allegation number one concerns Mr. Ryan's representation of the National Maritime Union. After he completed his tour of duty as Solicitor General of the Labor Department, Mr. Ryan represented the union's executive board in an internal grievance proceeding.

Mr. Ryan was concerned about the appearance of a possible conflict. He himself was concerned about the appearance of a possible conflict. So what did he do? He obtained a written opinion from a senior career ethics officer in the Department of Labor which stated that his conduct was beyond reproach. I repeat, beyond reproach. So much for that allegation.

Allegation number two concerns his role as counsel to former Senator William Saxbe in the Central States Pension Fund reorganization. In this instance, Mr. Ryan obtained a 60-page written opinion from the Covington & Burling law firm, as well as a written district court opinion, all affirming that he did nothing wrong by advising Bill Saxbe and that he acted in accordance with the highest ethical standards.

Mr. President, I ask unanimous consent that both of these opinions be printed in the RECORD immediately following my remarks, along with today's editorial in the Wall Street Journal, which I think deserves reading.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF LABOR,
Washington, DC, March 27, 1990.

BART A. DZIVI,
Counsel, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Washington, DC.

DEAR MR. DZIVI: In accordance with your request to Mr. Seth Zinman, our Associate Solicitor responsible for ethics matters, I am enclosing a copy of his memorandum of May 25, 1984 to Ronald J. St. Cyr, an affidavit of T. Timothy Ryan, Jr., a legal memorandum prepared by the firm of Pierson, Ball, and Dowd, and other related materials.

As you will see, the memorandum concluded that there had been no conflict-of-interest with respect to Mr. Ryan's involvement in this internal union election matter, which did not involve contact with the Department of Labor.

I am pleased to be able to provide you and the Committee with a copy of these materials. Our memorandum was prepared to provide legal advice to clients within the Department of Labor and therefore reflects the lawyer-client relationship. For this reason, I request that every effort be made to avoid publication of this memorandum beyond the Committee membership and appropriate Committee staff.

With best regards,
Sincerely,

ROBERT P. DAVIS.

Memorandum for: Donald J. St. Cyr, Deputy Assistant Secretary for Labor Management Relations.
From: Seth D. Zinman, Associate Solicitor for Legislation and Legal Counsel.
Subject: Conflict-of-Interest Issue—T. Timothy Ryan, Jr.

You have asked this Office to review documents relating to certain activities of former Solicitor T. Timothy Ryan, Jr. and to provide you with an opinion as to whether or not these documents indicate the existence of a conflict of interest. Mr. Ryan and his law firm are currently engaged in representing the National Maritime Union (NMU) in an internal union election proceeding.

I have examined a legal memorandum of January 16, 1984 by an attorney in the law firm of Pierson, Ball and Dowd and an affidavit of the same date prepared by T. Timothy Ryan, Jr. It appears from the information contained in the documents you sent us that Mr. Ryan's current activities would not constitute a violation of the post-employment conflict-of-interest laws. If Mr. Ryan should in the future engage in representational activities before any court or federal agency concerning matters arising out of the election, conflict-of-interest issues under the statute could arise. The Pierson, Ball and Dowd memorandum discusses the applicability of the D.C. Code of Professional Responsibility. Any such issues would be outside the scope of my memorandum, which will deal exclusively with the applicability of the conflict-of-interest laws.

At the outset, it should be noted that as a former "senior employee," Mr. Ryan is subject to stricter post-employment restrictions than are most former federal employees. For instance, under 18 U.S.C. 207(c), a former senior employee is barred for one year from communicating in any way with his or her former agency to influence it on a matter of pending agency business. In paragraph 11 of Mr. Ryan's affidavit of January 16, 1984, Mr. Ryan states his intention that he "would not represent the NMU before the Department of Labor * * * until one year has elapsed since his departure from government service."

In addition to the one-year cooling-off period applicable to former senior employees, Mr. Ryan's conduct would also be subject to the post-employment restrictions applicable to all other former employees. Under 18 U.S.C. 207(a) he is barred forever from representing anyone else before any court or federal agency regarding a particular matter involving specific parties in which he was personally and substantially involved while serving in the government.

Thus, there are two reasons why the statutory provisions described above do not appear to be applicable. First it does not appear from the documents that Mr. Ryan has engaged in any representational activity with respect to the NMU election before any court or federal agency. Second, it does not appear from the documents that he had any personal and substantial involvement in matters related to the NMU election while he was Solicitor. This is consistent with the recollections of Solicitor Francis X. Lilly (who served as Mr. Ryan's deputy) and of Associate Solicitor John Depenbrock.*

In situations in which there was no personal and substantial involvement in a particular matter, a former employee would still be restricted from engaging in certain representational activities with respect to matters that were pending within his or her official responsibility during the employee's final year in office (18 U.S.C. 207(b)(i)). Like the restriction discussed in the previous paragraph, the "official responsibility" restriction applies to representational activity before the courts or federal agencies, but it lasts for only two years after the employee's responsibility terminates.

As indicated above, it does not appear from the documents that Mr. Ryan has engaged in any representational activity before the courts or federal agencies regarding the NMU election. As noted above, however, there is some indication in paragraph 11 of the affidavit that he may wish to engage in such representational activity on behalf of the NMU before the Department or the courts after the one-year senior employee bar lapses (after April 30, 1984). Such a future activity on his part would not be consistent with the statute if these representational activities occurred in connection with a particular matter which was under his official responsibility as Solicitor.

In paragraph 8 of Mr. Ryan's affidavit, he indicates his belief that the current NMU election matter, with which he is involved, was not pending within his official responsibility while he was Solicitor. This view is also reflected at pages 6, 8, and 9 of the law firm memorandum. However, Mr. Depenbrock recalls that early in 1983, Mr. Ryan was still Solicitor, there were discussions concerning issues involved in the then-upcoming NMU election between his staff and staff from your Office. From information contained in the attached memoranda written by Mr. Klise and Mr. Comer of your staff, dated March 7, and March 8, 1983, respectively; these discussions focused on the validity of the 1983 NMU election in light of an amendment to the NMU Constitution. The amendment dealt with the qualifications needed to run for union office. It would have changed the NMU's former requirement that a candidate have five years of service to a requirement of three years of service within the preceeding six years. The amendment was apparently adopted by the NMU convention, but it had not been ratified. It appears that the NMU had suggested that a ratification referendum be held shortly before the 1983 NMU election.

The issue discussed at that time were under Mr. Ryan's official responsibility, even though there is no indication that he participated personally. It therefore appears that if the NMU election issues discussed in early 1983 were determined to be a part of the same matter as those involved in Mr. Ryan's current NMU activities, the official responsibility restrictions would prevent him from representing the NMU in this matter before the courts or federal agencies for two years following his departure from the government. Despite the absence of formal Departmental proceedings during Mr. Ryan's tenure as Solicitor, the proceedings might well be determined to be the same matter in which Mr. Depenbrock was involved. As I have indicated, in such a case, Mr. Ryan would be barred for 2 years from engaging in representational activities before courts or federal agencies.

Should Mr. Ryan desire in the future to engage in such representational activity with respect to the NMU election within the 2-year period, it would then be necessary to make a determination as to whether the issues pending in Mr. Depenbrock's office constituted a part of the current NMU election matter, or were a different matter.

*A former senior employee is also barred for two years from aiding or assisting someone in representational activity by being personally present before a court or federal agency, with respect to a particular matter in which he or she was personally and substantially involved (18 U.S.C. 207(b)(ii)). The apparent absence of such personal and substantial involvement by Mr. Ryan in the NMU election while he was Solicitor would presumably make this prohibition inapplicable here.

[In the Matter of the Appeal of Richard A. Anson, Robert Conception, Reverend George Albert, Enrique Quintero, Albert Jackson and Kirby Smith McDowell from the Results of the 1983 National Maritime Union Election of Officers]

NATIONAL MARITIME UNION'S MEMORANDUM OF POINTS AND AUTHORITIES IN OPPOSITION TO OBJECTION BY COUNSEL FOR ALBERT JACKSON TO PARTICIPATION BY T. TIMOTHY RYAN, JR., IN THIS PROCEEDING

I. INTRODUCTION

By letter dated December 16, 1983 to Ned R. Phillips, counsel for Albert Jackson (Arthur L. Fox, II) responded to a request for answer to interrogatories and raised a number of concerns regarding the instant proceedings. Among Mr. Fox's concerns was his objection to the participation of a number of attorney's including T. Timothy Ryan, Jr., in this proceeding.

Mr. Fox has not formally moved to disqualify Mr. Ryan as attorney for the National Maritime Union of America ("NMU") in this proceeding. Moreover, Mr. Fox's letter is extremely vague as to the nature of the "very serious ethical problems" which, he claims, are raised by Mr. Ryan's participation in this proceeding. The letter cites no legal authorities to support Mr. Fox's conclusion, provided no specific facts upon which he bases his concern, and furnishes no analysis showing why Mr. Ryan should not participate in this proceeding.[1] Despite the apparent carelessness with which Mr. Fox has assembled and levelled these allegations and despite the lack of any factual or legal basis for Mr. Fox's objection to Mr. Ryan's participation, a response to such allegations is warranted to preserve and maintain the integrity of the legal process.

Accordingly, in this memorandum, NMU will review the background of this proceeding, will examine the various constraints on Mr. Ryan's post-governmental employment, and will show why those constraints are inapplicable to the instant proceeding.[2]

II. FACTUAL BACKGROUND

A. Background of this proceeding

This proceeding is conducted in accordance with Article 12, Section 18 of the Constitution of the NMU. It is an internal union appeal before three duly elected Judges of Election and the independent, impartial organization designated by the National Council of the NMU—the Honest Ballot Association. President at the hearing is the Honorable Marvin Schwartz, selected by the Judges of Election and the Honest Ballot Association to conduct the hearing.

Mr. Ryan is a partner in the law firm of Pierson, Ball & Dowd which was retained by the NMU in October of 1983 to counsel and advise the union during this proceeding. In addition, the firm has agreed to represent the NMU formally during the internal union appeal. Should further representation be necessary either administratively before the United States Department of Labor, or in litigation involving the election results, the firm will continue to represent the union. Mr. Ryan's participation in this matter, however, will be in accordance with the controlling authorities governing his post-governmental employment. These authorities are examined in this memorandum and are the basis for the representations made by Mr. Ryan in the attached affidavit which he has prepared and signed.

B. Facts relating to Mr. Ryan's government employment

The facts as they pertain to Mr. Ryan's prior employment in the government and to his current involvement as counsel for the NMU in this proceeding are set forth in detail in Mr. Ryan's attached affidavit. A summary of those facts, however, provides a necessary perspective for review and application of the various restrictions on post-governmental employment.

Mr. Ryan served as Solicitor of the United States Department of Labor from March 12, 1981 until April 30, 1983.[3] Effective May 1, 1983, he became a partner at Pierson, Ball & Dowd, the Washington, D.C. law firm with which Mr. Ryan had been affiliated prior to his governmental service.[4]

At the time Mr. Ryan re-joined Pierson, Ball & Dowd, he and other attorneys at the firm reviewed the various post-governmental employment restrictions on Mr. Ryan. This review was undertaken prior to Mr. Ryan's commencing any work at Pierson, Ball & Dowd.[5] Thus, Mr. Ryan was and is fully aware of the nature of those restrictions.[6]

Specifically, both Mr. Ryan and Pierson, Ball & Dowd conluded, prior to representation of the NMU in this proceeding, that Mr. Ryan was not disqualified from participating in that representation.[7] Although the reasons for this legal conclusion are discussed later in this memorandum,[8] it should be mentioned that this conclusion was based not just on an analysis of the employment restrictions applicable to Mr. Ryan. In addition, Mr. Ryan reviewed pertinent union documents and contacted the Associate Solicitor of Labor (Seth Zinman), who is the alternate Agency Ethics Official, to determine whether the Department of Labor had any objections to Mr. Ryan's representation of the NMU in this proceeding. Mr. Zinman raised no concerns with this representation and, in particular, saw no problems with it in terms of the Ethics in Government Act (18 U.S.C. § 207 *et seq.*).[9]

After Mr. Fox objected to Mr. Ryan's participation, Mr. Ryan again contacted an official of the Department of Labor, Deputy Solicitor Francis X. Lilly, and asked Mr. Lilly to review the Department's files to determine whether Mr. Ryan had had any personal and substantial involvement in this matter while he was Solicitor of Labor. Following his review, Mr. Lilly verbally assured Mr. Ryan that the Department's records did not reflect any personal and substantial involvement in this particular matter by Mr. Ryan while he was Solicitor of Labor.[10]

In sum, the facts demonstrate no basis for Mr. Fox's objection to Mr. Ryan's participation in this proceeding. Mr. Ryan was not involved in this matter while he was Solicitor of Labor, and he had no official responsibility for it during that time. Indeed, the facts show that this particular matter did not even arise while Mr. Ryan was Solicitor of Labor. Equally as important, Department of Labor officials were contacted on this point both before and after Mr. Fox's objection, and they have not expressed any reservations or concerns about Mr. Ryan's representation of the NMU in this proceeding.

LEGAL ARGUMENT

A. The District of Columbia Code of Professional Responsibility does not prohibit Mr. Ryan's participation in this proceeding

Disciplinary Rule ("DR") 9-101(B) of the District of Columbia Code of Professional Responsibility states:

"A lawyer shall not at any time accept private employment in connection with any matter in which he or she participated personally and substantially as a public officer or employee, which includes acting on the merits of a matter in a judicial capacity."

As is evident from the facts and from Mr. Ryan's affidavit, Mr. Ryan did not participate[11] at all—let alone participate "personally and substantially"—in this matter[12] while he was Solicitor of Labor. Indeed, the election campaign from which this matter arose commenced after Mr. Ryan left the position. Thus, this "matter," as it involves the parties and issues posed here, did not even exist while Mr. Ryan was Solicitor of Labor. Accordingly, Mr. Ryan's participation is not barred by the District of Columbia Code of Professional Responsibility.

B. The Ethics in Government Act and regulations do not preclude Mr. Ryan's participating in this proceeding

The Ethics in Government Act (18 C.F.R. § 737.1 et sec.) contain four different types of restrictions on Mr. Ryan's post-government employment. Each of these restrictions is analyzed in the sections which follow.

---

[1] The substance of Mr. Fox's objection to Mr. Ryan's participation appears as follows at page 2 and 3 of the December 16, 1983 letter:

"Not only do I object to your [Mr. Phillips'] playing any role in the proceeding, I also object to participation by other attorneys. For example, I understand that Mr. Ryan, the former Solicitor of Labor, is conducting the hearing and I would assume that he will draft a recommended decision for the Judges of Elections. In the first place, Mr. Ryan's involvement in what will likely become a preliminary phase of a Labor Department proceeding raises very serious ethical problems, particularly given the fact he was Solicitor at the time the Labor Department first became actively involved in the NMU election.

"Undoubtedly, it is hoped that despite the NMU's blatent violations of law, Mr. Ryan will nonetheless prepare a written opinion minimizing, if not whitewashing, these violations, and that both the Judges of Election and his former subordinates at the Labor Department will defer to his judgment." (bracketed material added).

[2] This memorandum responds to Mr. Fox's December 16, 1987 letter only insofar as that letter raised objections about Mr. Ryan's participation in this proceeding. The memorandum is not addressed to the variety of other objections posed by Mr. Fox is his letter.

[3] Affidavit of T. Timothy Ryan, Jr. ("Ryan Affidavit") at ¶ 2.

[4] Id. at ¶ 3.

[5] Id. at ¶ 6.

[6] Id. at ¶ 5.

[7] Id. at ¶ 7.

[8] See pp. 7-10, infra. See also Ryan affidavit at ¶ 8.

[9] Ryan Affidavit at ¶ 9.

[10] *Id.* at ¶10. It should be mentioned that Mr. Ryan's contacts with officials of the Department of Labor concerning the applicability of post-governmental employment restrictions are entirely permissible. 18 U.S.C. § 207(i); 5 C.F.R. § 737.11(h).

[11] The definitions section of the District of Columbia Code of Professional Responsibility defines "participate" to include: "any action, directly or indirectly, through decision, approval, disapproval, recommendation, the rendering of advice, investigation or otherwise."

[12] "Matter" is defined by the District of Columbia Code of Professional Responsibility to encompass: "any judicial or other proceeding, application, request for ruling or other determination, contract, claim, controversy, investigation, charge, accusation, specific party or parties."

1. Permanent Bar on Certain Appearances

Mr. Ryan is permanently barred from representation of any private parties in any forum of the United States of the District of Columbia with regard to any "particular matter involving a specific party or parties" with which he was personally and substantially involved while Solicitor of Labor. 18 U.S.C. § 207(a); 5 C.F.R. § 737.5. For the same reasons described in conjunction with DR 9-101(B), this provision does not forbid Mr. Ryan's participation in this proceeding. Mr. Ryan was in no way involved in this matter while he was Solicitor of Labor and, moreover, this matter did not even arise until after he had left that position.[13]

2. Two-Year Bar on Certain Appearances

Mr. Ryan is also barred for a period of two years after leaving the Department of Labor from representing any private party in any forum of the United States or the District of Columbia with regard to any "particular matter involving a specific party or parties" where the matter was actually pending under his official responsibility within one year prior to his termination. 18 U.S.C. § 207(b)(3)(i); 5 C.F.R § 737.7.

This prohibition is also inapplicable to Mr. Ryan in the present proceeding because it involves a particular matter which was not under Mr. Ryan's official responsibility while he was Solicitor of Labor. As emphasized before, the particular matter involved here—the dispute arising from actions during the NMU election of officers—did not arise until after Mr. Ryan left that position.

3. Two-Year Bar on Certain Assistance

As a "former senior employee" of the Department of Labor, Mr. Ryan is barred, for a period of two years after his departure, from assisting in the representation of any private party in any particular matter in which he participated personally and substantially while Solicitor of Labor. 18 U.S.C. § 207(b)(3)(ii); 5 C.F.R. § 737.9. Again, this prohibition does not apply to Mr. Ryan's participation in this proceeding. As emphasized previously, Mr. Ryan did not participate in this particular matter while Solicitor of Labor, and it did not even arise until after he had left that position and returned to private practice.

4. One-Year Bar on Contacts

As a "former senior employee" in the Department of Labor, Mr. Ryan is also prohibited for one year after leaving that employment from having any representational contact with the Department of Labor on any particular matter. 18 U.S.C. § 207(c); 5 C.F.R. § 737.11.

This prohibition does not preclude Mr. Ryan's participation of the NMU in this proceeding because representational contact by Mr. Ryan on behalf of the NMU with the Department of Labor is not involved, required, or contemplated in this proceeding.[14] Equally as important, Mr. Ryan has stated, in his affidavit, that, in the event this proceeding is completed and an appeal to the Department of Labor is lodged before the lapse of the one year period, he will not participate in that appeal until the one year period has elapsed.[15]

IV. CONCLUSION

For the reasons expressed above, the objection raised by Mr. Fox regarding Mr. Ryan's representation of the NMU in this proceeding is totally without merit and should be rejected.

Respectfully submitted,

PIERSON, BALL & DOWD,
Attorneys for the NMU.

Dated: January 16, 1984.

AFFIDAVIT OF T. TIMOTHY RYAN, JR.

CITY OF NEW YORK,
State of New York, ss:

T. Timothy Ryan, Jr., being duly sworn, deposes and states:

1. My name is T. Timothy Ryan, Jr., and I am a partner in the law firm of Pierson, Ball & Dowd, Washington, D.C.

2. From March 12, 1981 until April 30, 1983, I served as Solicitor of the United States Department of Labor.

3. I joined Pierson, Ball & Dowd as a partner effective May 1, 1983.

4. Pierson, Ball & Dowd has been retained by the National Maritime Union ("NMU") to represent it during the processing of election challenges lodged by certain recently defeated candidates for union office. Along with various other attorneys at Pierson, Ball & Dowd, I have been assigned the responsibility of representing the NMU during the course of the internal union appeal process.

5. As discussed in more detail in the memorandum accompanying this affidavit, I reviewed and was fully aware of the various restrictions imposed on my post-governmental employment under the Ethics in Government Act (18 U.S.C. 207) and regulations (5 CFR 737.1 et seq.) and the District of Columbia Code of Professional Responsibility (Disciplinary Rule ("DR") 9-101(B)).

6. Along with other attorneys at Pierson, Ball & Dowd, I conducted this review of post-governmental employment restrictions prior to undertaking any work, including work for the NMU, after becoming a partner at Pierson, Ball & Dowd.

7. For the reasons described in greater detail in the accompanying memorandum, both the law firm of Pierson, Ball & Dowd and I concluded, prior to representation of the NMU in this particular matter, that neither the firm nor I was precluded from representation of the NMU in the instant proceeding.

8. The conclusion discussed in paragraph 7 was based on several facts. First, while I was Solicitor of Labor, I did not participate in any way in the particular matter involved in the instant proceeding. 18 U.S.C. 207(a); 5 CFR §§ 737.5 and 737.9; DR9-101(B) of the District of Columbia Code of Professional Responsibility. Indeed, the union election campaign at issue in this proceeding spanned the period May, 1983-September, 1983. As noted in paragraph 2, I left the position of Solicitor of Labor effective April 30, 1983—i.e, before the instant matter or proceeding even arose. Second, for the same reasons just mentioned, the particular matter involved here was not under my official responsibility, and I did not participate in it while I was Solicitor of Labor. 13 U.S.C. 207(b); 5 CFR 737.7. Finally, my representation of the NMU in this proceeding did not and does not involve, require, or contemplate any written or oral communication by me to the Department of Labor, any court or other federal agency, including the District of Columbia, on behalf of the NMU. 18 U.S.C. 207(c); 5 CFR 737.11.

9. Following Pierson, Ball & Dowd's retention by the NMU and a review of pertinent union documents, including recent issues of the internal union newspaper, The Pilot, I contacted Seth Zinman, the Associate Solicitor of Labor for Legislation and Legal Counsel, who is the alternative Agency Ethics Official for the Department of Labor, to ascertain whether the Department of Labor had any objections to, or concerns about, my representation of the NMU in the instant proceeding. He responded that, from what he had been told by me as set forth above in Paragraph 8, he did not see any problems with this representation by me of the NMU as far as the Ethics in Government Act is concerned.

10. Following my receipt of the letter dated December 16, 1983 from Arthur L. Fox, II, Esquire to Ned R. Phillips, Esquire, I contacted Francis X. Lilly, Deputy Solicitor of Labor. I asked Mr. Lilly to review any pertinent files within the Department of Labor for the purpose of determining whether, contrary to my own recollection, I had had any involvement in this particular matter while I was Solicitor of Labor. After his review, Mr. Lilly orally informed me that the records of the Department of Labor did not reveal that I had any personal and substantial participation in this particular matter while I was Solicitor of Labor.

11. It has been and remains both my intention and that of Pierson, Ball & Dowd to ensure compliance in all matters in which I am involved, including this particular matter, with all strictures governing my post-governmental employment. Accordingly, I will not be involved in any phase of this proceeding in which my involvement would constitute a violation of these restrictions, and I have also informed the NMU. For example, if an appeal were taken to the Department of Labor from the instant proceeding within one year of my departure from the Department of Labor, I could not and would not represent the NMU before the Department of Labor in such an appeal until one year has elapsed since my departure from government service.

T. TIMOTHY RYAN, Jr.

DEPARTMENT OF LABOR,
Washington, DC, March 13, 1984.

Memorandum for: Richard G. Hunsucker,
From: Ronald J. St. Cyr,
Subject: Memorandum of March 5, 1984 re N.M.U.

I have reviewed the legal memorandum prepared by the outside law firm and the affidavit attached to your memo of March 5, 1984 and have concluded that the best judge of whether a conflict of interest exists is the Department's Ethics Officer, i.e. The Solicitor. In light of the fact that the Ryan affidavit indicates discussion between him and Frank Lilly, I think it appropriate to have someone else take an initial look at this issue and Frank Lilly did not disagree with that thought.

I am, therefore, referring your subject memorandum along with its attachments and a copy of this memo to Mr. Seth Zinman, the Department's alternate designated Ethics Official, for his opinion.

Thank you for calling this matter to my attention.

---

[13] The terms "particular matter involving a specific party or parties" and "participate personally and substantially" are defined in 5 C.F.R. §§ 737.5 (c) and (d), respectively. Those definitions are similar to the definitions, discussed above, which are contained in the District of Columbia Code of Professional Responsibility.

[14] Ryan Affidavit at ¶ 8.

[15] Id. at ¶ 11

DEPARTMENT OF LABOR,
Washington, DC, March 13, 1984.

Memorandum for: Seth Zinman.
From: Ronald J. St. Cyr, Deputy Assistant Secretary for Labor Management Relations.
Subject: Conflict of Interest Issue.

Would you review the attached documents and provide me with your opinion as to whether a conflict of interest exists in this matter.

Thank you in advance for your immediate attention.

MARCH 17, 1983.

To: NMU File.
From: Michael Klise.
Subject: Amended Qualifications for NMU Office.

BEA (W. Comer and M. Klise) met with NMU Counsel Ned Phillips (3/4/83) at his request to discuss an unspecified problem NMU was having with its current election. At the meeting, Phillips outlined the problem as follows:

Prior to the October 1980 convention, Article IX, Section 1 of the NMU Constitution required candidates for national office to have 5 years continuous good standing and 3 years employment over an unspecified period. The 1980 convention approved a resolution amending that provision to require 3 years continuous good standing, and 3 years employment within the past 6 years. New constitutions containing the amended rule were printed and distributed, and the union and apparently most candidates have until recently been proceeding under the assumption that the new rule was valid for the 1983 election. However, it has now been pointed out to Phillips by certain candidates that under Article XXVI, Section 2 of the constitution, amendments pertaining to candidacy qualifications must be ratified by a referendum vote of the membership—something which had not been done in the case of the amendment here. NMU wants to postpone the election, put the amendment to a vote, and then hold the election using the newly adopted 3-year, 3-in-6 qualification. Phillips' main concern is whether LMSA considers the 3-in-6 qualification reasonable, inasmuch as we raised that issue in Item 4 of our 2/7/83 review of the NMU Constitution.

Phillips said that approximately 60 percent of the membership would satisfy the 3-in-6 rule; that only 5 out of about 100 prospective candidates had been disqualified as a result of the new rule, none of whom would have been eligible under the old rule; and that the highest annual turnover rate—about 20 percent—occurs in the lower echelons of shoreside employment. He furnished certain statistics to support the union's position (attached). He also pointed out that the union interprets a year of qualifying seaside employment for candidacy to mean 360 days, including leave; a year for pension credit to mean 280 days; and a year for candidacy in shoreside employment to mean 220 days. Finally, he said that if the referendum passed, the balloting period for the election would be delayed from April-May 1983, as currently scheduled, to May-June 1983; if the referendum failed, new nominations would be required, and an additional 2-month delay would be necessary. The incumbent officers' current 5-year terms expire in late May or early June 1983.

BEA advised Phillips that before the question of the reasonableness of the 3-in-6 requirement can be reached, its applicability to the instant election must be established. Phillips said NMU's position was that if the new rule is not approved in the referendum, the old role would remain in effect. We advised him of the Department's policy that where a candidacy qualification is found invalid, that qualification is waived, and no other qualification may be substituted. We noted that applying the old rule could improperly disqualify candidates who had been relying on the more liberal 3-year good standing requirement, and that applying the new rule retroactively would also create problems if the more restrictive employment requirement disqualified members who would previously have been eligible. Finally, we pointed out that postponing the election would cause the incumbents' terms to exceed the 5-year statutory limit, and that Title IV violations might also arise from the union's practice of computing seaside employment on a 360-day year while using a 220-day year for shoreside jobs.

Phillips indicated that he was aware of the problems, but that he was interested primarily in obtaining the Department's position on the 3-in-6 employment requirement. We advised him that the reasonableness of a requirement depends on the total circumstances surrounding its application, and not merely on an estimate of the percentage of members who would be adversely affected. Phillips wanted a written statement of our opinion on the new rule, and we advised him that if he would consolidate his statistics and incorporate them into a letter to the LMSE Director, we would provide a written reply based on that letter.

Towards the end of the meeting, Phillips briefly commented on some of the items in BEA's reviews of the NMU Constitution and the Honest Ballot Association (HBA) Rules for the NMU Election. In response to his comments, BEA emphasized three points: (1) HBA is an agent of NMU, and NMU, not HBA, is ultimately responsible for insuring compliance with Title IV; (2) in making its 401(c) distributions of campaign literature by means of placing the literature in the recreation room of a ship, NMU risks violating the statute in that the literature might be deep-sixed before it actually reaches the members; and (3) restricting each candidate to a single observer per polling place may deprive him the right to observe the polling activities effectively. A full summary of Phillips' comments on the review lists appears in a separate memorandum.

BEA briefed the Director of the 3, 3-in-6 requirement 3/4/83 and discussed it with him again 3/8/83, focusing on the rule's retroactivity. The decision reached was that the rule's retroactive effect would defeat its validity in the 1983 election pursuant to 29 CFR 452.54. BEA then met SOL (Depenbrock, Boetticher, Garson, and Dubin), who concurred with the LMSE position. Phillips called BEA 3/8/83 shortly after the SOL meeting, and the Department's position was conveyed to him.

MARCH 8, 1983.

To: NMU File.
From: Walter W. Comer.
Subject: NMU 1983 Election.
Ref: 3/7/83 Memo to File.

Comer and Klise conferred with LMSE Director concerning the NMU plan to conduct a referendum to validate the 3-3 & 6 officer candidate qualification and then proceed, on a 11-day delay basis, with the 1983 election of NMU officers.

It was pointed out that the 3-3 & 6 provision was adopted at the NMU Convention in October 1980, and the 1983 election commenced in January 1983. If the provision in question is considered to become effective as of October 1980, which is questionable in light of the fact that it will not be ratified until March of 1983, it would be defective because its application in the 1983 election would be retroactive and therefore in conflict with 452.54 and previous court and administrative election cases. That being the case, a referendum could not possibly cure the defective provision.

Hunsucker agreed and suggested that SOL concurrence should be obained before alerting NMU officials. He immediately arranged for a conference with ASOL Depenbrock. (See 3/9/83 memos to NMU File.)

Immediately following the meeting with SOL and the call from Helene Boetticher, NMU Counsel Ned Phillips called to advise that S-T Candidate Cribbins' qualifications had been reviewed and he was found to be eligible. I then notified Phillips of the results of our discussions with the LMSE Director and SOL. I made it clear that NMU had to make the ultimate decision to continue the referendum and election or reschedule the entire election. Phillips said he preferred cancelling the election in progress, conducting the referendum for prospective application of the 3-3 & 6 provision and rescheduling the entire election, using the 5 & 3 qualification provision now in place. He said he would so advise his clients. He aslo asked for written confirmation of the Director/SOL position in this matter.

I also suggested that, in the referendum, NMU members should be notified as to the factoring criteria that will be used to calculate the 3 years of working at the trade under the 3-3 & 6 rule. Phillips said that would be done.

[In the U.S. District Court for the Northern District of Illinois, Eastern Division]

(Civil Action No. 78 C 342)

RAYMOND J. DONOVAN, SECRETARY OF LABOR, PLAINTIFF, *v.* FRANK FITZSIMMONS, ET AL., DEFENDANTS

ORDER

Application having been made by William B. Saxbe, Independent Special Counsel appointed by the Court pursuant to the Consent Decree of September 22, 1982 (the "Consent Decree") herein, for leave to employ the law firm of Pierson, Ball & Dowd as counsel, it being Mr. Saxbe's intention in connection therewith to affiliate himself with said law firm in an "of counsel" capacity; and

It appearing that T. Timothy Ryan, Jr., one of the partners in the law firm of Pierson, Ball & Dowd, is ethically disqualified under DR 9-101(B) of the District of Columbia Code of Professional Responsibility from participating in the provision of professional advice or assistance as to some matters to Mr. Saxbe in his capacity as Independent Special Counsel by reason of Mr. Ryan's former responsibilities during the period March 12, 1981 through April 30, 1983 as Solicitor of Labor, United States Department of Labor; and

It further appearing that, by reason of the aforementioned disqualification, the arrangements proposed with respect to Mr. Saxbe's employment of Pierson, Ball & Dowd and his affiliation with that firm as "of counsel" will include provisions for screening Mr. Ryan from any participation in matters as to which he is or may be disqualified by reason of his former responsibilities as Solicitor of Labor; and

It further appearing that said proposed arrangements include provision for Mr.

Ryan to furnish professional advice and assistance to Mr. Saxbe with respect to one subject matter as to which he had no significant contact in his capacity as Solicitor of Labor, namely withdrawal liability problems affecting the Teamsters' Central States, Southeast and Southwest Areas Pension Fund; and

It further appearing that said proposed arrangements include procedures by which additional subject matters as to which Mr. Ryan would not be disqualified from providing professional advice and assistance to Mr. Saxbe may be identified; and

Notice and opportunity for comment having been given to the Department of Labor and all parties to this proceeding concerning the said application and the materials submitted in support thereof, to-wit affidavits of Dean Burch and of Mr. Ryan, a supporting memorandum of Covington & Burling, and a proposed form of order; and

The Court having duly considered the application [and comments submitted by parties to this proceeding], Now therefore, it is

1. *Ordered,* That the application of Independent Special Counsel for leave to retain Pierson, Ball & Dowd as attorneys is approved, subject to the arrangements regarding such employment described in the application of Independent Special Counsel and the affidavits of Dean Burch and of T. Timothy Ryan, Jr. attached thereto; and it is

2. *Further ordered,* That the proposed employment of Mr. Ryan to provide advice and assistance to Independent Special Counsel with respect to withdrawal liability problems affecting the Teamsters' Central States, Southeast and Southwest Areas Pension Fund is approved, the Court having specifically concluded that the fact that the position of Independent Special Counsel was created by the Consent Decree does not render every action of the Independent Special Counsel the same "matter" as the Consent Decree inself within the meaning of DR 9-101(B) of the District of Columbia Code of Professional Responsibility; and it is

3. *Further ordered,* That the procedures for identifying additional subject matters as to which Mr. Ryan is not disqualified from providing professional advice and assistance to the Independent Special Counsel, described in paragraph 9 of the affidavit of Mr. Burch, are also approved.

JAMES B. MORAN,
U.S. District Judge.

WILLIAM B. SAXBE,
Columbus, OH, August 1, 1984.

Re application of Independent Special Counsel in *Raymond J. Donovan,* Secretary of Labor, v. *Frank Fitzsimmons, et al.,* Civil Action No. 78 C 342, for Leave to Employ Attorneys and for Other Relief.

Hon. JAMES B. MORAN,
U.S. District Judge, U.S. District Court for the Northern District of Illinois, Eastern Division, Chicago, IL.

DEAR JUDGE MORAN: As I have previously mentioned to you, it is my intention to become affiliated as "of counsel" with the Washington, D.C. law firm of Pierson, Ball, & Dowd, and in addition to enter into arrangements by which that firm will provide me with legal assistance and advice in connection with the discharge of my duties as Independent Special Counsel.

The purpose of this letter is formally to request the Court's approval of the latter arrangements, pursuant to Section V.B. of the Consent Decree of September 22, 1982, which created the position of Independent Special Counsel. I submit herewith, in support of this application, (1) an affidavit of Dean Burch, chairman of the Executive Committee of Pierson, Ball & Dowd; (2) an affidavit of T. Timothy Ryan, Jr., a partner in that law firm; (3) a memorandum of the law firm of Covington & Burling; and (4) a proposed form of order. I have this day caused to be mailed, by first class mail, postage prepaid, to counsel for the Department of Labor and for each of the other parties in *Donovan* v. *Fitzsimmons* copies of this application and of each of the attachments thereto, together with a brief covering memorandum of which a copy is enclosed herewith. I respectfully suggest that the Court not act upon this application until after August 15, 1984, so as to allow the parties to the proceeding to file comments on my application if they wish to do so; and I have specifically called this opportunity for comment to the attention of the parties in my covering memorandum.

The elaborate form of this application reflects the fact that Mr. Ryan was, during the period March 12, 1981 to April 30, 1983, Solicitor of Labor in the United States Department of Labor, and as a result is ethically disqualified under the District of Columbia Code of Professional Responsibility from participating in certain aspects of my work as Independent Special Counsel. By reason of that disqualification, Mr. Ryan must be screened from participating in, and from sharing in fees generated by, such work in order to avoid the imputation of his disqualification to other lawyers in the firm and to me in my capacity as "of counsel" to the firm. The arrangements for which the Court's approval is sought would include such necessary screening of Mr. Ryan.

Those arrangements also contemplate that Mr. Ryan will not be screened from all matters relating to the Independent Special Counsel, but on the contrary will be available to advise and assist me on one category of matters—problems of withdrawal liability affecting the Teamsters' Central States, Southeast and Southwest Areas Pension Fund—and other categories of matters to be established in the future. I request that the Court specifically approve these aspects of the proposed arrangements. Such approval would require that the Court be satisfied that there is no comprehensive ethical bar preventing Mr. Ryan from furnishing any assistance or advice whatever to me in my capacity as Independent Special Counsel. If there were such a comprehensive bar, it would presumably rest on the basis that, because the position of Independent Special Counsel was created by the September 22, 1982, Consent Decree, anything done by Independent Special Counsel is the same "matter" within the meaning of the pertinent ethical provision, DR 9-101(B) of the District of Columbia Code of Professional Responsibility, as that in which Mr. Ryan participated personally and substantially in his former capacity in the negotiation and drafting of the Consent Decree. I submit, however, for reasons explained more fully in the attached memorandum of Covington & Burling (in part IV), and I respectfully request the Court to determine, that not everything that the Independent Special Counsel does is automatically the same "matter" as the Consent Decree.

Assuming that there is no such overriding disqualification of Mr. Ryan, then I believe that he would be disqualified from providing legal advice or assistance to me as Independent Special Counsel (and correspondingly required to be screened from such activities of other lawyers in the firm of Pierson, Ball & Dowd) only if the subject of the advice and assistance were one with which he had contact in his capacity as Solicitor of Labor, either by reason of having personally and substantially participated in the same matter in that capacity, or by reason of his having confidential information relating to the matter arising from that former position. The single subject area in relation to the Central States Pension Fund on which it is contemplated that Mr. Ryan will initially be free to provide me advice and assistance—namely, withdrawal liability—is, as Mr. Ryan's attached affidavit makes clear (in paragraph 7), one as to which he and the Department of Labor are satisfied that he had no prior involvement or confidential information. As Mr. Burch's affidavit further makes clear (in paragraph 9), the procedures applicable for identifying the future subject areas on which he may assist me contemplate a similar determination by Pierson, Ball & Dowd in consultation with the Department of Labor.

I respectfully request that the Court, after consideration of this application and the materials submitted in support hereof, and of comments, if any, that may be filed by August 15, 1984 by the Department of Labor or other parties to the *Donovan* v. *Fitzsimmons* case, enter an order giving its approval to the proposed arrangements in substantially the form of the proposed order attached hereto.

Very truly yours,

WILLIAM B. SAXBE.

MEMORANDUM

To: Counsel for all parties in *Donovan v. Fitzsimmons,* Civil Action No. 78 C 342 (N.D. Ill.).

From: William B. Saxbe, Independent Special Counsel,

Date: August 1, 1984.

As the attached materials reflect, I am today applying for the Court's approval of arrangements under which I would become "of counsel" to the Washington, D.C. law firm of Pierson, Ball & Dowd and would seek the advice and assistance of that firm in my capacity as Independent Special Counsel.

In my attached application to the Court, I have suggested that, before the Court acts on my application, the parties in this proceeding should be given until the close of business on Wednesday, August 15, 1984 to file comments, if they so desire, concerning my application.

AFFIDAVIT OF DEAN BURCH

CITY OF WASHINGTON,
District of Columbia, ss:

I, Dean Burch, being duly sworn, depose and say;

1. I am a partner in the law firm of Pierson, Ball & Dowd and Chairman of its Executive Committee. I have been authorized by the members of the firm to submit this statement pursuant to Disciplinary Rule ("DR") 9-102(C) of the District of Columbia Code of Professional Responsibility (the "Code").

2. On May 1, 1983, Mr. T. Timothy Ryan, Jr. joined Pierson, Ball & Dowd as a partner. Mr. Ryan had previously been an associate with Pierson, Ball & Dowd but left the firm in February, 1981 to become Solicitor of Labor, United States Department of Labor.

3. When Mr. Ryan returned to Pierson, Ball & Dowd in May 1983, the firm—as is its standard practice whenever a former government employee becomes affiliated with it—reviewed the prohibitions and strictures placed on Mr. Ryan as a result of his government employment. In particular, we examined the Code and pertinent federal statutes and regulations, 18 U.S.C. § 207 and 5 C.F.R. § 737.1 *et seq.,* and legal authorities relevant thereto. At that time, a memorandum summarizing these restrictions was circulated to all personnel in the firm. In that memorandum and in another memorandum circulated shortly thereafter, all personnel were also apprised of those pending matters in the firm from which Mr. Ryan was and would continue to be screened in order to comply with DR 9-102(B). Finally, in that memorandum, all office personnel were informed of the specific steps being taken to screen Mr. Ryan from particular cases, the requirements of the screening process, and the fact that the list of matter from which Mr. Ryan was screened would be supplemented if circumstances changed (*e.g.,* if the firm were retained to work on a particular matter in which Mr. Ryan was disqualified).

4. Pierson, Ball & Dowd was recently approached by Mr. William B. Saxbe about the possibility of his becoming "of counsel" to the firm and the firm's furnishing assistance to Mr. Saxbe in his role as Independent Special Counsel appointed pursuant to the consent decree dated September 22, 1982 in *Donovan* v. *Fitzsimmons,* Civil Action No. 78 C 342 (N.D. Ill.) (the "Consent Decree"). At that time, the firm conducted another review of the Code and the pertinent federal statutes and regulations. It conducted this review because, while he was Solicitor of Labor, Mr. Ryan personally and substantially participated in that litigation, including negotiation of the Consent Decree.

5. Subsequently, Pierson, Ball & Dowd and Mr. Saxbe decided to retain the services of another law firm, Covington & Burling, to provide assistance and advice concerning the application of the Code and the pertinent federal statutes and regulations in the event Mr. Saxbe became "of counsel" to Pierson, Ball & Dowd and Pierson, Ball & Dowd furnished advice and assistance to him in his role as Independent Special Counsel. Among other things, the firm sought Covington & Burling's advice regarding: (a) the applicable standards for determining whether or not Mr. Ryan was disqualified from particular matters on which Mr. Saxbe in this role as Independent Special Counsel might seek the firm's assistance and advice, (b) the procedure by which these determinations should be made, and (c) the screening procedures to be applied in those matters in which the disqualification of Mr. Ryan called for his screening. The legal analysis provided by Covington & Burling is contained in its memorandum submitted with this affidavit. The partnership of Pierson, Ball & Dowd has authorized me to state that the firm has reviewed and concurs with the analysis in Covington & Burling's memorandum and that the firm will follow the procedures, described in this affidavit, which have been established as a result of that analysis.

6. It is intended that Mr. Saxbe's arrangement with Pierson, Ball & Dowd will be as follows: Mr. Saxbe will become "of counsel" to the firm and will be available to provide advice and assistance on an "as needed" basis to firm clients. As specified in the Consent Decree, Mr. Saxbe will continue to be paid directly by the Central States, Southeast and Southwest Areas Pension Fund (the "Central States Pension Fund") for his services as Independent Special Counsel.

Payments to Mr. Saxbe for his services as Indpependent Special Counsel will be made solely to Mr. Saxbe and will not be shared with Pierson, Ball & Dowd. The firm will, subject to the restrictions and limitations specified in this affidavit and Mr. Ryan's accompanying affidavit, provide such advice and assistance to Mr. Saxbe in his capacity as Independent Special Counsel as he deems necessary. The firm will, subject to a monthly ceiling, reimburse Mr. Saxbe's necessary business expenses, including office space and secretarial and other support and logistical services for Mr. Saxbe in his homes in Mechanicsburg, Ohio and Delray Beach, Florida, as well as in Washington, D.C. In addition, the firm will remunerate Mr. Saxbe on the basis of a formula or amount to be specified in a written agreement between Mr. Saxbe and Pierson, Ball & Dowd, which formula or amount will relate solely to Mr. Saxbe's work for firm clients and to work that he may bring to the firm other than work relating to his position as Independent Special Counsel.

7. Consistent with the firm's own past practices, Pierson, Ball & Dowd and Mr. Saxbe will, prior to Mr. Saxbe's joining the firm as "of counsel" and the firm's undertaking any work for him in his capacity as Independent Special Counsel, take the following steps with respect to all of the particular matters on which the firm will provide assistance and counsel to the Independent Special Counsel;

(a) Each distinct matter or category of matter on which Mr. Saxbe as Independent Special Counsel contemplates seeking the assistance of the firm will be identified and assigned a separate client account number to be used for client billing and file purposes.

(b) As to each of these distinct matters or categories of matters, the firm will utilize the same procedures that it employs in reporting and establishing new client accounts and new accounts for existing clients. These procedures include:

(i) a description of the particular matter for which the firm has been retained; and

(ii) review of the report by specified members of the Executive Committee to assure that the fee arrangement is acceptable and that no conflict of interest exists.

(c) As to each distinct matter or category of matter on which a client account number is established, Mr. Ryan will be screened from that matter or category of matter except for:

(i) work involving matters or issues pertaining to withdrawal liability affecting the Central States Pension Fund (if the Court's approval is obtained pursuant to the application filed by the Independent Special Counsel); and

(ii) assuming, again, Court approval of the application of the Independent Special Counsel, other matters on which, in pursuant to the procedures described in paragraph 9, below, it is subsequently determined that Mr. Ryan is not disqualified from providing advice and assistance to the Independent Special Counsel

(d) The firm will circulate an "All Personnel" memorandum listing the matters and identifying those particular matters from which Mr. Ryan will be screened.

(e) In the memorandum described in subparagraph (d), all personnel will again be apprised of the nature of screening required—namely, that Mr. Ryan will not be given or have access to our records or those of the Independent Special Counsel on those particular matters; that Mr. Ryan will not have—with firm personnel, clients, or any other parties—any discussions on, conversations about, or consultations regarding the firm's or the Independent Special Counsel's work on these particular matters; and that Mr. Ryan will not work on or have any other form of involvement in our work with the Independent Special Counsel on those particular matters.

(f) The client accounts on which Mr. Ryan is screened from our work for the Independent Special Counsel will be administered by, and the firm's work on these matters will—at least initially—be the responsibility of, Mr. John R. Erickson, a partner in the firm.

(g) The firm's file personnel will prominently mark each file in each matter from which Mr. Ryan is screened with a stamp indicating that Mr. Ryan is screened from that particular matter and summarizing the substance of such screening as described in paragraph 7(e), above. Such files will be "color coded" for easy identification and will be separately maintained from other files to which Mr. Ryan may have access.

(h) The screening memoranda described in and issued pursuant to paragraphs 7(a) and (b), above, and required under paragraph 9(c), below, will be permanently and prominently displayed on a bulletin board in the firm's file room.

(i) The Court, the Department of Labor, and all other parties to the proceeding entitled *Donovan* v. *Fitzsimmons*, Civil Action No. 78 C 342 (N.D. Ill.) will be furnished with lists of both the matters from which Mr. Ryan is screened and the matters from which he is not disqualified.

(j) As new matters arise on which the Independent Special Counsel seeks the firm's advice and assistance, the same procedures described in this paragraph will be applied and Mr. Ryan will be screened from those matters unless a determination is made, pursuant to paragraph 9, below, that Mr. Ryan is not disqualified from providing advice and assistance to the Independent Special Counsel.

8. In addition to applying the screening procedures described in paragraph 7 of this affidavit, Pierson, Ball & Dowd will ensure that Mr. Ryan will not share in any fees received with respect to matters as to which Mr. Ryan is screened. Partnership compensation at Pierson, Ball & Dowd is not based upon any mathematical formula or computation premised on numerical shares. Instead, at the end of the partnership year and after financial data for that year are compiled, the firm's Executive Committee devises a schedule representing the proposed share for each partner in the firm's profits. In devising this schedule, which is later submitted to the partnership for approval, the Executive Committee reviews a number of factors, some of them subjective, others objective. These factors include: (1) the number of billable hours compiled by each partner, (2) client generation, supervision, and maintenance, (3) the quality of the work performed by the partner during the fiscal year, (4) work performed on the firm's behalf (e.g., recruitment), and (5) the extent to which the partner supervises the work of other partners and associates. Basically, the Executive Committee seeks to determine each partner's contributions to the firm's profitability and success based on his or her actual performance. To ensure that Mr. Ryan is screened from any share of any fees generated by matters undertaken on behalf of the Independent Special Counsel on which Mr. Ryan is screened, the firm will take the following steps at the end of each fiscal year: (1) establish a ratio representing the overall percentage of profit on all revenues received; (2) apply that ratio to the revenues received on all matters other than those on which Mr. Ryan has been screened; (3) determine the distribution for each partner from the profits on these matters; (4) apply the same profit ratio to the revenues received on all matters from which Mr. Ryan has been screened on the basis of the criteria normally applied as described above; and (5) distribute the profits as to those matters from which Mr. Ryan has been screened to each partner other than Mr. Ryan on the basis of his or her proportionate participation in the firm's profits on matters from which Mr. Ryan was not screened, but with such proportion calculated on the basis of the profits distributed to partners other than Mr. Ryan.

9. Mr. Ryan will, subject to the Court's approval of the application filed by the Independent Special Counsel, furnish the Independent Special Counsel with advice and assistance involving matters or issues pertaining to withdrawal liability affecting the Central States Pension Fund. If the Court approves the Independent Special Counsel's application, Mr. Ryan will also provide advice and assistance to the Independent Special Counsel on those matters on which, after application of the following procedures, it is determined that Mr. Ryan is not disqualified and need not be screened:

(a) As to each matter, the partner in charge of firm ethics, Mr. Joel M. Hamme or his successor, will initially determine after consultation with Mr. Ryan, and the firm will decide, whether Mr. Ryan must be screened under the Code. This decision will be based on two principal inquiries: whether Mr. Ryan participated personally and substantially in the particular matter while he was Solicitor of Labor and, if not, whether he possesses confidential information pertaining to that particular matter as a result of having been Solicitor of Labor. If either of these inquiries is answered in the affirmative, Mr. Ryan will be disqualified and screened from work performed by the firm for the Independent Special Counsel on that particular matter.

(b) As to any matter on which the firm concludes that Mr. Ryan is not disqualified and may provide advice and assistance to the Independent Special Counsel, the firm will—prior to Mr. Ryan's working on that particular matter—notify the Department of Labor and obtain its determination that Mr. Ryan was not involved in the subject area in relation to the matter in question while at the Department of Labor and does not possess confidential information as a result of having worked there.

(c) In the event it is determined that Mr. Ryan must be screened as to any matter, the firm will follow the procedures described in paragraphs 7 and 8 above with respect to that matter.

(d) As stated in paragraph 7(i) above, the Court, the Department of Labor, and all other parties to the proceeding entitled *Donovan* v. *Fitzsimmons*, Civil Action No. 78 C 342 (N.D. Ill.), will be furnished with any supplementary lists of both the matters from which Mr. Ryan is screened and the matters from which he is not disqualified.

10. Upon the basis of its own independent determination as well as the advice of Covington & Burling, Pierson, Ball & Dowd believes that the relationship of Mr. Saxbe with the firm, including his "of counsel" status with the firm and the firm's assistance and counsel to Mr. Saxbe as Independent Special Counsel, fully complies, under the circumstances described above, with the requirements of the Code and the pertinent federal statutes and regulations.

DEAN BURCH.

AFFIDAVIT OF T. TIMOTHY RYAN, JR.

CITY OF WASHINGTON,
District of Columbia, ss:

I, T. Timothy Ryan, Jr., being duly sworn, depose and say:

1. I am a partner in the law firm of Pierson, Ball & Dowd. I have been a partner in the firm since May 1, 1983; from August of 1978 to February of 1981, I was an associate with the firm.

2. I am submitting this affidavit pursuant to Disciplinary Rule ("DR") 9-102(C) of the District of Columbia Code of Professional Responsibility (the "Code") and in contemplation of Mr. William B. Saxbe, Independent Special Counsel appointed pursuant to the consent decree dated September 22, 1982 in the case entitled *Donovan* v. *Fitzsimmons*, Civil Action No. 78 C 342 (N.D. Ill.) (the "Consent Decree"), becoming affiliated with Pierson, Ball & Dowd as "of counsel" and Pierson, Ball & Dowd furnishing advice and assistance to Mr. Saxbe in his role as Independent Special Counsel.

3. From March 12, 1981 to April 30, 1983, I was Solicitor of Labor, United States Department of Labor. In that capacity, I served as chief legal officer of the Department of Labor and was officially responsible for all government litigation under the Employee Retirement Income Security Act ("ERISA"). I also chaired an inter-agency litigation task force aimed at coordinating governmental activities involving the Central States, Southeast and Southwest Areas Pension Fund (the "Central States Pension Fund"). Furthermore, I participated personally and substantially in the negotiation of the Consent Decree referenced in paragraph 2 above.

4. As recited in paragraph 3 of the accompanying affidavit of Mr. Dean Burch, when I returned to Pierson, Ball & Dowd in May 1983, the firm reviewed the restrictions placed on me as a result of my governmental employment, examined hte relevant legal authorities concerning those restrictions, and circulated memoranda to all personnel regarding the matters on which I would be screened and the procedures for screening.

5. As explained in paragraph 4 of Mr. Burch's accompanying affidavit, Pierson, Ball & Dowd has discussed with Mr. Saxbe the possibility of an "of counsel" relationship with him and the firm's furnishing assistance and counsel to Mr. Saxbe in his role as Independent Special Counsel appointed pursuant to the Consent Decree. Because of Mr. Saxbe's status as Independent Special Counsel and because of my personal responsibilities as described in paragraph 3 of this affidavit while I was Solicitor of Labor, the firm conducted another review of the Code and the pertinent federal statutes and regulations.

6. As described in paragraph 5 of Mr. Burch's accompanying affidavit, Pierson, Ball & Dowd and Mr. Saxbe subsequently retained Covington & Burling to provide advice and assistance as to the application of the Code and the relevant federal statutes and regulations in the event Mr. Saxbe became "of counsel" to Pierson, Ball & Dowd and the firm furnished advice and assistance to Mr. Saxbe as Independent Special Counsel. The legal analysis provided by Covington & Burling is contained in its memorandum submitted with this affidavit. As noted in the accompanying affidavit of Mr. Burch, the firm has reviewed and concurs with this analysis, and I will follow the procedures discussed in Mr. Burch's affidavit and established as a result of that analysis.

7. In accordance with paragraphs 7 and 9 of Mr. Burch's accompanying affidavit, I understand that I will be screened from all work performed by Mr. Saxbe as Independent Special Counsel or by the firm for him in his capacity as Independent Special Counsel, with the following two exceptions. (A) If the Court approves the accompanying application of the Independent Special Counsel, I may provide advice and assistance to the Independent Special Counsel on issues pertaining to withdrawal liability affecting the Central States Pension Fund—an area as to which I am confident, and the Department of Labor concurs, that I had no personal and substantial participation or confidential information while I was Solicitor of Labor. It is, accordingly, an area as to which I understand that I would be disqualified only if all work for the Independent Special Counsel were treated as the "same matter" as the Consent Decree for purposes of DR9-101(B). (B) If the Court approves the accompanying application of the Independent Special Counsel, I may also provide advice and assistance to the Independent Special Counsel on additional maters as to which, after application of the procedures described in paragraph 9 of Mr. Burch's accompanying affidavit, it is determined that I am not disqualified and need not be screened. I further understand that, under the Code, the determination of whether or not I am disqualified and must be screened from work performed by the firm for the Independent Special Counsel will be based on two principal inquiries: (1) whether I participated personally and substantially in the particular matter while I was Solicitor of Labor, and (2) whether I possess confidential information pertaining to that particular matter as a result of having been Solicitor of Labor. If either of these inquiries is answered affirmatively, I will be disqualified and screened from work performed by the firm for the Independent Special Counsel on that particular matter.

8. I will adhere to the procedures established with respect to the particular matters from which I will be screened involving the work of the Independent Special Counsel. The screening procedures are described in detail in paragraphs 7 and 8 of the accompanying affidavit of Mr. Burch. Thus, it is my understanding that, with respect to matters from which I am screened, I will not seek or be given access to our records or those of the independent Special Counsel; I will not have—with firm personnel, clients, or any other parties—any discussions on, conversation about, or consultations regarding the firm's or the Independent Special Counsel's work on those particular matters; I will not work on or have any other form of involvement in the firm's work with the Independent Special Counsel on those particular matters; and, finally, I will not share in any fees generated by work on those particular matters from which I am screened.

9. As explained in the accompanying affidavit of Mr. Burch and the accompanying memorandum of Covington & Burling, the procedures explained and statements made here are designed to assure that the contemplated arrangement does not result in any violation of the Code or pertinent federal statutes and regulations.

T. TIMOTHY RYAN, Jr.

COVINGTON & BURLING,
Washington, DC, August 1, 1984.

MEMORANDUM

Proposed Association of William B. Saxbe as Of Counsel to the Firm of Pierson, Ball & Dowd, and Employment of the Firm by Mr. Saxbe in His Capacity as Independent Special Counsel Appointed by the Northern District of Illinios to Assist Its Oversight of the Teamsters' Central States, Southeast and Southwest Areas Pension Fund

INTRODUCTION

Mr. William B. Saxbe is Independent Special Counsel, appointed as such by the United States District Court for the Northern District of Illinois pursuant to a Consent Decree entered in the case of *Donovan* v. *Fitzsimmons*, Civ. Action No. 78 C 342 (N.D. Ill. Sept. 22, 1982) (the "Consent Decree"), whose charge is to assist the Court in its oversight of the Teamsters' Central States, Southeast and Southwest Areas Pension Fund (the "Central States Pension Fund"). Mr. Saxbe proposes to become "of counsel" to the law firm of Pierson, Ball & Dowd, and to retain the firm to provide him professional advice and assistance in his capacity as Independent Special Counsel. It is necessary that the arrangements for association of Mr. Saxbe with Pierson, Ball & Dowd take due account of the fact that one of the members of the firm is T. Timothy Ryan, Jr., who, during the period from March 12, 1981 to April 30, 1983, was Solicitor of Labor in the United States Department of Labor. In that capacity, Mr. Ryan had, *inter alia*, various responsibilities relating to the Central States Pension Fund, including personal and substantial participation in the drafting and negotiation of the Consent Decree that created the position of Independent Special Counsel now held by Mr. Saxbe.

The arrangements by which the proposed assocation of Mr. Saxbe with the firm of Pierson, Ball & Dowd will be governed are described in affidavits of Mr. Dean Burch, chairman of the Executive Committee of Pierson, Ball & Dowd, and of Mr. Ryan, in each case bearing the date July 31, 1984 (the "Burch Affidavit" and the "Ryan Affidavit," respectively), which accompany this memorandum. Salient features of those arrangements are that, with specified exceptions, Mr. Ryan will be screened from participation in, and from sharing in fees generated by, work done by or for Mr. Saxbe as Independent Special Counsel; that, subject to prior Court approval, there will initially be one category of matters as to which Mr. Ryan will not be screened and will be called upon to provide advice and assistance to Mr. Saxbe; and that, again subject to prior Court approval, there will be a procedure for the identification of additional specific categories of matters as to which Mr. Ryan will not be screened but may provide advice and assistance to Mr. Saxbe. Mr. Saxbe will make application to the United States District Court for the Northern District of Illinois for the necessary approval of the arrangements.

We have been asked by Mr. Saxbe and by Pierson, Ball & Dowd for advice as to the applicability to these circumstances of 18 U.S.C § 207 (1982) (sometimes hereinafter the "Act") and the Code of Professional Responsbility (1983) as promulgated by the District of Columbia Court of Appeals (the "Code"). This memorandum summaries the advice we have furnished in response to that request.

We have concluded, as explained in part I (pages 4-9) below, that none of the prohibitions of the Act is applicable to the circumstances here in question, principally because Mr. Ryan's providing assistance to Mr. Saxbe as Independent Special Counsel would not involve his acting on behalf of a person other than "the United States," within the meaning of the Act. We have further concluded, however, as explained in part II (pages 9-17), that Mr. Ryan's assisting the Independent Special Counsel would nonetheless constitute "private employment" within the meaning of DR 9-101(B) of the Code, so as potentially to bring the prohibitions of that and related provisions into play.

We have therefore considered whether Mr. Ryan should be disqualified from participating in every matter in which the Independent Special Counsel is involved, either on the ground of a supposed "appearance of impropriety" under Canon 9 of the Code (part III, pages 17-24), or on the ground that everything the Independent Special Counsel does is the same "matter" as the Consent Decree because that decree created the post of Independent Special Counsel (part IV, pages 25-43); concluding in each instance that there is no such blanket disqualification applicable to Mr. Ryan.

We have further considered (part V, pages 43-50), whether there are any categories of matter as to which Mr. Ryan is not ethically disqualified from providing assistance to the Independent Special Counsel, concluding that there are some such matters, of which the determining characteristics are (1) that Mr. Ryan did not participate personally and substantially in them when he was Solicitor of Labor; and (2) that he does not have any confidential information with respect to them.

Finally, we have evaluated the procedures proposed to be employed from the screening of Mr. Ryan, for notice thereof to appropriate parties, and for identifying matters as to which he need not be screened (part VI, pages 51-58), and have concluded that they satisfactorily meet applicable requirements.

Footnotes at end of article.

I. THE PROHIBITIONS OF 18 U.S.C. § 207 WOULD NOT APPLY TO MR. RYAN'S ASSISTING THE INDEPENDENT SPECIAL COUNSEL, BECAUSE SUCH ASSISTANCE WOULD NOT INVOLVE HIS ACTING ON BEHALF OF A PERSON OTHER THAN THE UNITED STATES WITHIN THE MEANING OF THAT STATUTORY PROVISION

18 U.S.C. § 207 imposes on certain former government officers four post-employment bars: (1) a lifetime bar (imposed by section 207(a)) against a former government officer representing any other person (except the United States) in connection with a particular matter involving a specific party or parties in which he participated personally and substantially while in government; (2) a two-year bar (imposed by Section 207(b)(ii)) against the former officer assisting others, by his presence, in making appearances with respect to matters as to which he is permanently barred; (3) a one-year bar (imposed by Section 207(c)) against representational contact with the officer's former department or agency on any particular matter; and (4) a two-year bar (imposed by Section 207(b)(i)) against representational contacts in particular matters involving a specific party or parties over which the former officer had official responsibility while in government.

Even if the Act were applicable to the arrangements under consideration here, these provisions would have little practical impact on Mr. Ryan, for the lifetime bar of section 207(a) is encompassed in the broader prohibition of DR 9-101(B) of the Code, as is the two-year bar imposed by section 207(b)(2); [1] and the one-year bar of section 207(c) has by now lapsed with respect to Mr. Ryan. Thus the only prohibition that would require separate consideration in the event the Act were applicable would be the two-year bar of section 207(b)(1) against representational contacts regarding matters that were under Mr. Ryan's "official responsibility" while he was Solicitor of Labor, for that two-year period still has nine months to run.

However, it appears quite clear that not even the two-year statutory bar on representational contacts regarding "official responsibility" matters would be applicable to advice or assistance rendered by Mr. Ryan to Mr. Saxbe in his capacity as Independent Special Counsel,[2] for all of the prohibitions of the Act apply only to a former government officer acting on behalf of "any other person (except the United States)," and the regulations promulgated by the Office of Government Ethics define the term "United States" as used in the Act to include "any department, agency, *court*, court martial, or any civil, military or naval commission of the United States, the District of Columbia, *or any officer or employee thereof,*" 5 C.F.R. § 737.3(a)(1) (emphasis added). Thus, none of the prohibitions of the Act apply to a former government officer representing, as a private practitioner, an officer or employee of a federal court on a matter in which he was involved while in government service. We think there can be little doubt that this limitation in the Act's coverage would apply to Mr. Ryan's acting on behalf of Mr. Saxbe.

The position of Independent Special Counsel and the mandate upon the incumbent in that position to oversee the affairs of the Central States Pension Fund were created by Section V of the Consent Decree. According to that part of the Consent Decree, the Independent Special Counsel is appointed by, and reports to, the United States District Court for the Northern District of Illinois. His function, generally stated, is to "further the objectives of this Consent Decree," and more specifically, to "serve the Court by assisting in identifying any problems or issues that may arise in connection with the Pension Fund's peformance of the undertakings in this Consent Decree," giving "special attention . . . to compliance with the fiduciary responsibility provisions in part 4 of title 1 of ERISA and with conditions contained in determination letters issued by the Internal Revenue Service." [3]

Mr. Saxbe has informed us that he considers himself, as Independent Special Counsel, to be an agent of the United States District Court for the Northern District of Illinois, with a relationship to the Court similar to that of a special master or a trustee in bankruptcy. Mr. Saxbe's characterization of his role appears to be well-rounded. To be sure, according to the provisions of Section V of the Consent Decree, the Independent Special Counsel is paid by the Central States Pension Fund, but such payments, being required by court order, do not give the Fund any influence or control over him. That the Independent Special Counsel does not have an attorney-client relationship with the Fund is made clear by the provisions of Section V that, although, the Independent Special Counsel is given visitatorial rights with respect to the Fund, all his records are in turn to be freely accessible to the Department of Labor, and that "[n]o attorney-client or other privilege shall be applicable to any communication between the Independent Special Counsel and the Pension Fund, or its administrators, fiduciaries, officers, trustees, custodians, counsel, agents, employees, advisers, providers of goods or services, consultants, represntatives in any capacity, or persons who serve in any capacity that involves decisionmaking authority or custody or control or the moneys, funds, or assets of the Pension Funds."

The Independent Special Counsel makes his reports to the Court (with copies to the Fund and the Secretary of Labor). His function is "to serve the Court." The Court alone has authority to expand his "powers, duties and responsibilities." In these circumstances, Mr. Saxbe is surely an officer of the Court within the meaning of the pertinent regulation. *See* Letter Opinion of the Office of Government Ethics 82x21 (December 28, 1982) (holding that appointment of a former officer of the Executive branch by a federal district court as a special representative of the court or of the judge in the same matter in which he had participated while in government would not be in violation of the Act because it was covered by the phrase "except the United States").

Thus we conclude that the Act does not in itself have any direct application to the circumstances here under consideration, and the remainder of our analysis will be concerned with the substantive provisions of the Code. It is nonetheless the case that the Act has some pertinence for this discussion, because the regulations and decisions of the Office of Government Ethics under the Act interpret, among other things, the key statutory term "particular matter involving a specific party or parties," and the term "matter," in the Code, is defined to have the same meaning as the corresponding, more elaborate term in the Act. Both the Act and the Code also use the identical phrase "participated personally and substantially." Thus, authoritative interpretations of the statutory terms are illuminating in exegesis of the Code as well, as the D.C. Bar Legal Ethics Committee has held even before the Code was amended to bring it into correspondence with the Act. *See* D.C. Bar Legal Ethics Committee Op. 26 (1977).

II. MR. RYAN'S ASSISTING THE INDEPENDENT SPECIAL COUNSEL WOULD NONETHELESS CONSTITUTE "PRIVATE EMPLOYMENT" WITHIN THE MEANING OF DR 9-101(B), SO AS POTENTIALLY TO BRING THE PROHIBITIONS OF THAT PROVISION INTO PLAY

The principal possible source of disqualification of Mr. Ryan requiring consideration for present purposes is Disciplinary Rule ("DR") 9-101(B) of the Code, which provides that "[a] lawyer shall not at any time accept private employment in connection with any matter in which he or she participated personally and substantially as a public officer or employee. . . ." The term "matter" is defined as: includ[ing] any judicial or other proceeding, application, request for ruling or other determination, contract, claim, controversy, investigation, charge, accusation, arrest or other particular matter involving a specific party or parties.

Canon 9 (definition b) (1983). Where DR 9-101(B) disqualifies an individual lawyer, DR 9-102(A) imputes that disqualification to partners, associates and "of counsel" colleagues of the lawyer unless screening and notice requirements specified in DR 9-102(B) and (C) are satisfied.

Consideration must also be given to the possible application of Canon 9 itself, which asserts that "A lawyer should avoid even the appearance of professional impropriety" (a matter dealt with in part III, at pages 17-24, below), and to the possible applicability of DR 4-101, imposing on a lawyer the obligation to preserve the confidences and secrets of a client, including a former client (which is discussed in part V.B at pages 45-50 below). The provision of principal interests, however, is DR 9-101(B); and as to that provision, the threshold question is whether Mr. Ryan's providing advice or assistance to the Independent Special Counsel would constitute "private employment" within the meaning of that provision. The point deserves particular attention since, as noted in the preceding part of this memorandum, the statutory analog of the Code provision is not applicable to the circumstances here in question.

The Code does not define the term "private employment," and the term does not appear to have been interpreted by the Legal Ethics Committee of the D.C. Bar or by the District of Columbia Court of Appeals. However, there is significant authority of other courts and ethics committees indicating that Mr. Ryan's employment by Mr. Saxbe would be "private employment" notwithstanding the public nature of Mr. Saxbe's position.

In *General Motors Corp.* v. *City of New York*, 501 F.2d 639 (2d Cir. 1974), the court approved the granting of a motion to disqualify a private practitioner, formerly employed by the federal government in a matter, from subsequently representing the City of New York in the same matter. The court, in an opinion by Chief Judge Irving Kaufman, concluded that the lawyer's retention by the City constituted "private employment" within the meaning of DR 9-101(b) in the ABA's Code of Professional Responsibility, despite the fact that "the keeper of the purse" was a government entity. *Id.* at 650. It was sufficient that the lawyer and his firm had an "opportunity to earn a substantial fee" for his services. *Id.*

Citing *General Motors* a year after it was decided, the ABA's Committee on Ethics and Legal Responsibility stated in its Formal Opinion 342 (1975) that "[a]s used in DR 9-101(B), 'private employment' refers to employment as a private practitioner" as distinguished from "change from one salaried government position to another." *Id.* at 6. The committee's rationale was that: If one underlying consideration is to avoid the situation where government lawyers may be tempted to handle assignments so as to encourage their future employment in regard to those matters, the danger is that a lawyer may attempt to derive undue financial benefit from fees in connection with subsequent employment. *Id.*

A similar view was implicit in *Armstrong* v. *McAlpin*, 461 F. Supp. 622 (S.D.N.Y. 1978), *aff'd*, 625 F.2d 433 (2d Cir. 1980) (en banc), *vacated on other grounds*, 449 U.S. 1106 (1981). In that case, a former SEC attorney was assumed to be disqualified, and was therefore screened, from representation by his law firm of a court-appointed receiver whose mission was to recover the assets of a company that had violated the federal securities laws. The issue in the case was the adequacy of the screening as a means of avoiding imputation of the individual lawyer's disqualification to his firm, and because the disqualification was assumed, the courts did not address the issue of whether it was required. Underlying the assumption that disqualification of the individual lawyer was appropriate, however, there was necessarily the assumption that employment by the court-appointed receiver was "private employment" within the meaning of the Code.[4]

Some support for a contrary conclusion, that Mr. Ryan's employment by Mr. Saxbe would not be "private employment" within the meaning of DR 9-101(B) may be drawn from the Act and, perhaps, the ABA's Model Rules of Professional Conduct.

As discussed in the preceding part of this memorandum, the permanent bar against representational activities raised by 18 U.S.C. Section 207(a), which is the analogue in the Act of DR 9-101(B) in the Code, does not apply when a former government employee represents the "United States" as a private practitioner. Insofar as Section 207(a) of the Act may be persuasive as an analogy in interpreting DR 9-101(B), it tends to indicate that Mr. Ryan's employment by Mr. Saxbe would not be "private employment" within the meaning of the disciplinary rule.[5] Moreover, there is some inherent appeal in the proposition that the Act seems to embrace: if the federal government in any of its branches (including a court) desires the services of a lawyer who once served it in a matter as an employee in the Executive branch, but who now is in private practice and does not desire to resume civil service, the government should not be foreclosed from engaging that lawyer in the same matter.

The Model Rules of Professional Conduct adopted by the American Bar Association in August 1983 could be read to reach the same result as the Act. Rule 1.11 of the Model Rules, which would supplant DR 9-101 and DR 9-102, provides, with an exception, that "a lawyer shall not represent a *private client* in connection with a matter in which the lawyer participated personally and substantially as a public officer or employee" unless the lawyer is screened and notice of the screening is given. ABA Model Rules of Professional Conduct Rule 1.11 (August 1983) (emphasis added). The comment following Rule 1.11 states, in part, "When the client is the agency of one government, that agency should be treated as a private client for purposes of this Rule if the lawyer thereafter represents an agency of *another* government, as when a lawyer represents a city and subsequently is employed by a federal agency." (Emphasis added.) This could reasonably be read as implying that a lawyer's subsequent representation of a different agency or branch of the *same* government does not precipitate the screening and notification requirements of Rule 1.11; and such a reading would have some persuasive weight in interpretation of the corresponding provisions of the Code. That weight would not be substantial, however, for the import of the comment to Rule 1.11 is by no means clear.[6] Moreover the Model Rules have not yet supplanted the Code in the District of Columbia, and they are principally useful as authority as to what the ethical restrictions ought to be, and not necessarily as to what they now are under the Code.[7]

Although there are thus grounds for arguing that employment of Mr. Ryan by Mr. Saxbe should be treated as employment by the United States and not as "private employment" within the meaning of DR 9-101(B), we conclude that the weight of authority is distinctly to the opposite effect. It appears that under DR 9-101(B) the critical test is the nature of the lawyer's present practice situation—*i.e.*, private practitioner compensated by client fees or a law firm salary, as opposed to civil servant compensated by public salary—and not the character of the client, which is the test under the Act and arguably under the Model Rules. If the former test is the applicable one, as we conclude it is, the conclusion is inescapable that Mr. Ryan's employment by Mr. Saxbe would be "private employment," because there is no question that Mr. Ryan is a private practitioner.

III. MR. RYAN SHOULD NOT BE COMPREHENSIVELY DISQUALIFIED FROM PARTICIPATING IN EVERY MATTER IN WHICH THE INDEPENDENT SPECIAL COUNSEL IS INVOLVED ON THE GROUND OF A SUPPOSED "APPEARANCE OF IMPROPRIETY" UNDER CANON 9

The next major issue to be addressed is whether Mr. Ryan should be considered disqualified from participation in every matter involving Mr. Saxbe as Independent Special Counsel, by reason of Canon 9's exhortation that "A Lawyer Should Avoid Even the Appearance of Professional Impropriety." If the answer is affirmative, then there is no need to delve into the more particularized analysis called for by consideration of the individual Disciplinary Rules under Canon 9.[8]

We note preliminarily that as a matter of strict analysis, it can be forcefully argued that the exhortation of Canon 9 regarding avoidance of the appearance of impropriety should not be used alone as a ground for decisions as to disqualification. It appears to us to be a point of fundamental significance that the reference to appearance of impropriety appears in Canon 9 and not in any Disciplinary Rule, for the Code's Preliminary Statement makes clear that the Canons, the Ethical Considerations and the Disciplinary Rules that together comprise the Code are intended to serve different roles, with the Canons stating "axiomatic norms" or "general concepts," the Ethical Considerations being "aspirational in character," and only the Disciplinary Rules being "mandatory in character" and thus offering specific definition as to what is ethically permissible and what is not.[9] See D.C. Bar Legal Ethics Comm. Op. 82 (1979) (a majority of the Ethics Committee is of the view that "conduct which does not violate a Disciplinary Rule cannot properly be characterized as 'unethical' "); Op. 101 (1981) (holding Canon 9 not independently applicable); *but see* Op. 48 (1978) (seemingly indicating a willingness on the Committee's part to hold Canon 9 applicable of its own force to a situation where a private attorney was appointed to the Human Rights Commission and the question posed concerned the extent to which he could continue to handle cases before the Commission).

It must be recognized that "appearance of impropriety" alone has been used as a basis for disqualifying lawyers or firms from participation as counsel in litigation, even where no Disciplinary Rule was found to apply, *e.g.*, *Alpha Inv. Co.* v. *City of Tacoma*, 536 P.2d 674 (Wash. Ct. App. 1975); *General Motors Corp., supra.* However, the trend appears to be away from such holdings. Thus, in *Ah Ju Steel Co.* v. *Armco, Inc.*, 680 F.2d 751, 754 (C.C.P.A. 1982), the court stated:

An appearance of impropriety, such as may arise when a former government attorney who had access to confidential information in a matter appears in connection with that matter in private practice, has also in the past been used as an independent basis for disqualification, quite apart from whether a disciplinary rule has been violated. *General Motors Corp.* v. *City of New York*, 501 F.2d 639, 649, 652 (2d Cir. 1974). As the court below appreciated, however, the trend is now away from disqualification based solely on an appearance of impropriety and towards disqualification only when continued representation will taint the underlying trial especially where, as here, the appearance of impropriety is not very clear.

To similar effect, the Second Circuit has stated since the *General Motors* decision that "the possible 'appearance of impropriety is simply too slender a reed on which to rest a disqualification order . . . particularly . . . where . . . the appearance of impropriety is not very clear'." *Amstrong, supra*, 625 F.2d at 445. We deem it of some significance that the ABA's Model Rules of Professional Conduct have eliminated the term "appearance of impropriety" altogether, in favor of setting forth "more specifically the circumstances in which for public confidence in government necessitates disqualification of a government lawyer." ABA Commission on Evaluation of Professional Standards, Proposed Final Draft, Model Rules of Professional Conduct, Comment on Rule 1.11 at 76-77 (May 30, 1981).

Even if it is not likely that Canon 9 would be invoked as a ground of disqualification, however, it may be useful to view the circumstances here under discussion from the point of view of the "axiomatic norm" stated by Canon 9 simply because by reason of its breadth and inherent subjectivity it would be most likely to be invoked as a ground of public criticism, if there were such criticism, of the arrangements between Mr. Saxbe and Pierson, Ball & Dowd. Turning, then, to such a view, we note that the Legal Ethics Committee of the D.C. Bar has stated in its Opinion 98 (1981) that the test that applies in determining whether there is an "appearance of impropriety" is whether "a reasonably informed member of the bar, or of the public, would view [the employment in question] as improper," bearing in mind that: It may be that *some* element of the bar or the public would view the proposed [employment] as involving an appearance of impropriety; there are those who

perceive appearances of impropriety in almost any professional activity by attorneys. However, an attorney's conduct need not be governed by "standards which can be imputed only to the most cynical members of the public." [Citing *Woods* v. *Covington County Bank*, 537 F.2d 804, 813 (5th Cir. 1976).] (Emphasis in original.)

Chief Judge Irving Kaufman observed in *General Motors Corp., supra*, that "[t]he standard that [Canon 9] sets—*i.e.*, what creates an appearance of evil—is largely a question of current ethical-legal mores." 501 F.2d at 649.

We think that the most useful way to apply an analytical, rather than wholly subjective, approach to Canon 9 is to consider the particular kinds of improprieties that might be thought to be entailed by the arrangements under consideration, and to attempt to assess what a rational and reasonably informed observer would think about the likelihood that one or another of those improprieties was in fact involved. For such an analysis, there is readily at hand authority identifying the substantive evils against which the particular Disciplinary Rules under Canon 9 relating to former government lawyers are intended to guard. The Legal Ethics Committee of the D.C. Bar has identified three purposes of DR 9-101(B): (1) "[T]o prevent the appearance that a lawyer in public employment may have been influenced in his actions as a lawyer by the hope of later personal gain in private employment rather than by the best interests of his public client" (D.C. Bar Legal Ethics Comm. Op. 16 (1976)); (2) "to prevent the appearance that a lawyer may be utilizing for the benefit of a private client confidential information obtained in a prior attorney-client relationship with a public agency having interests in conflict with those of his private client" (*id.*); and (3) to prevent "switching sides" (D.C. Bar Legal Ethics Comm. Op. 98 (1980)).[10]

Applying for foregoing considerations to the circumstances here, we conclude that Mr. Ryan's employment by the Independent Special Counsel—who is the appointee, and agent, of a United States court—should not be reasonably viewed as amounting to a switching of sides from his representation of the United States while Solicitor of Labor. The facts that Mr. Saxbe's becoming of counsel to the firm, and his arrangements for assistance from the firm, will not have been undertaken unless the Court approves them, will underscore the fact that there has been no "treacherous" changing of sides. Nor would such employment of Mr. Ryan reasonably appear to present any likelihood of his using secrets and confidences of the Department of Labor adversely to its interests, because it is unlikely that Mr. Ryan has any confidential information pertinent to such employment, and because the arrangements are such as to provide specific assurance that Mr. Ryan will not be involved in any matter as to which he does possess confidential information.[11]

If the third purpose sought to be served by DR 9-101(B), "prevent[ing] the appearance that a lawyer in public employment may have been influenced in his actions as a lawyer by the hope of later personal gain in private employment rather than by the best interests of his public client," were thought to be offended in this case, it would be by an appearance that Mr. Ryan had created the position of Independent Special Counsel in the Consent Decree with a view to the possibility that he would later profit from it. While it must be acknowledged that the question is necessarily a subjective one, we think that such an appearance does not reasonably arise here. In light of the history of the Central States Pension Fund, the creation of the position of Independent Special Counsel with the breadth of authority that the Consent Decree confers on him clearly served (and continues to serve) the government's, and the public's, interest, and there is no basis for thinking that Mr. Ryan's role in its creation was intended to serve any other, ulterior, purpose; or indeed to think that Mr. Ryan ever considered, in September 1982 when the Consent Decree was entered, that he might be asked in the summer of 1984 to provide professional assistance to the Independent Special Counsel.

Thus, we conclude that the Independent Special Counsel's retention of Mr. Ryan to provide him professional advice and assistance would not in itself present an appearance of impropriety violative of Canon 9.

IV. THE FACT THAT THE POST OF INDEPENDENT SPECIAL COUNSEL WAS CREATED BY THE CONSENT DECREE DOES NOT RENDER EVERY ACTION OF THE INDEPENDENT SPECIAL COUNSEL THE SAME "MATTER" AS THE CONSENT DECREE, SO AS TO REQUIRE THAT MR. RYAN BE DISQUALIFIED FROM PARTICIPATING IN EVERY MATTER IN WHICH THE INDEPENDENT SPECIAL COUNSEL IS INVOLVED

Critical to the application of DR 9-101(B) is the question whether a given "matter" in connection with which a former government lawyer's private employment is contemplated is the same "matter" in which the lawyer participated personally and substantially while in government. Thus, in identifying matters in which Mr. Saxbe is involved as Independent Special Counsel from which Mr. Ryan would be disqualified and must therefore be screened, the fundamental question as to each matter in which Mr. Saxbe is involved will be whether it is the same as any particular matter in which Mr. Ryan participated personally and substantially while Solicitor of Labor.[12]

It will be helpful background for the discussion in both this part of the memorandum and the next to set out the terms of the Consent Decree in some detail, and to consider as well the nature of the Independent Special Counsel's activities; and then to discuss the pertinent authorities with respect to meaning of the key term "matter."

A. The Consent Decree and the Activities of the Independent Special Counsel

Section I of the Consent Decree requires that the fund and all of its "fiduciaries," "trustees," "officers," "agents," and others who assist it "shall operate in full compliance with ERISA" and with any relevant determination letters issued by the Internal Revenue Service.

Section II preserves the preexisting arrangement by providing that a "Named Fiduciary" of the Fund is to have "exclusive responsibility and authority to control and manage all assets" of the Fund, to appoint and replace its investment managers, and to allocate available investment assets among different types of investments and investment managers. This section describes in detail the authority of the Named Fiduciary, its qualifications, and those of the investment managers that it is authorized to appoint. This section also sets out a procedure for terminating the Named Fiduciary.

Subsection II.B.4 of the Consent Decree refers to the Decree's Exhibit, an "Investment Policy Statement" prepared by the Equitable Life Assurance Society of the United States to take effect on June 1, 1981, and, in the words of the Consent Decree, "setting forth the currently short-term and long-term investment objectives and policies of the Pension Fund." We understand that Mr. Ryan did not have any involvement in the preparation of Equitable's Investment Policy Statement, but Subsection II.B.4 of the Consent Decree, in which he did participate personally and substantially, implicitly adopts the Investment Policy Statement by providing that:

> The attached investment policy may only be changed by the named fiduciary, after consultation with the board of trustees of the Pension Fund, and such change shall be reported immediately to the Independent Special Counsel . . . and to the Secretary.

Any such change shall not remain in effect for more than 90 days except with leave of Court for good cause shown. . . .

Section III of the Consent Decree provides procedures for management of assets of the Fund held for benefits and administrative expenses. Section IV provides for the automatic removal of convicted persons from positions related to management of the Fund.

Section V establishes the position of Independent Special Counsel and define his mandate and authority. The Independent Special Counsel has "full authority to examine the future [*i.e.*, from September 22, 1982, forward] activities of the Pension Fund." He has "full access to all documents, books, records, personnel, files, and information of whatever type or description in the possession, custody or control of the Pension Fund." All persons connected with the Fund are required "to cooperate fully with the Independent Special Counsel in the performance of this duties and responsibilities." The Fund's board of trustees and its committees must give him notice and an agenda of all meetings and permit him to attend any of them. He may attend any other meeting involving the Fund's management.

The Independent Special Counsel must permit the Secretary of Labor to examine any documents, notes or records that he prepares or compiles in the exercise of his duties. The Secretary and the Fund receive copies of the reports that the Independent Special Counsel makes to the Court. The powers of the Independent Special Counsel do not supplant the powers or responsibilities of any officer or employee of the United States.

Section VI requires the Fund to cooperate with the Secretary of Labor in the prosecution of that part of *Donovan* v. *Fitzsimmons* not settled by the Consent Decree and in other circumstances when he exercises his enforcement responsibilities under ERISA. Sections VII to IX are housekeeping items providing for notice and entry of judgment and stating that the Court will retain jurisdiction to supervise the Fund's management for at least 10 years, after which the Fund may petition for dissolution of the Consent Decree, and that the decree will be dissolved after 15 years unless the Secretary of Labor shows a need to extend it.

Mr. Saxbe has informed us that, in his view as Independent Special Counsel, the fundamental correctives required to rectify the management of the Central States Pension Fund have been administered and are taking hold; that litigation instituted to punish lawbreakers affiliated with the Fund, to remove them from positions of influence or authority, and to recover the

assets of the Fund squandered or unlawfully used by them is winding down; and that an increasing portion of the time of the Independent Special Counsel will be taken up with issues concerning the prudent business management of the Fund and not related to the sort of improprieties associated with the Fund that gave rise to *Donovan* v. *Fitzsimmons* and the Consent Decree. We have been told that such issues include withdrawal liability problems, potential actuarial problems resulting from a dwindling membership, numerous potential problems raised by uncertainties in the many complicated provisions of ERISA that have not been judicially construed, and problems related to management of litigation arising not from criminal or wrongful behavior but rather from business disputes which naturally arise where such an unusually large agglomeration of capital is involved. The significance of these changes of emphasis in the work of the Independent Special Counsel, for present purposes, is that they represent a turning away from problems, and solutions (such as the Consent Decree) relating to the Central States Pension Fund with which Mr. Ryan was concerned as Solicitor of Labor, and an increasing focus on kinds of matters that the Fund would have to deal with whether or not it was subject to the Consent Decree.

B. Authorities

Turning now to the meaning of the term "matter," as used in DR 9-101(B), we note the following statement by the D.C. Bar's Legal Ethics Committee on the subject of whether a present matter is the same as one in which a former government employee participated personally and substantially:

Determining what is the same matter is, in our view, an essentially factual and pragmatic inquiry. . . . There may be for various technical reasons, all sorts of separate proceedings, civil or criminal, conducted under different docket numbers in the same or different forums, which all arise from a single set of underlying facts, circumstances or transactions. In our view, it is the factual relationship between various proceedings or claims which determine[s] whether they constitute the same matter. . . . [This committee has consistently taken a broad, fact-based approach to defining the term 'matter' in DR 9-101(B)].

D.C. Bar Legal Ethics Comm. Op. 98 (1980). In the opinion from which this statement is taken, the Committee concluded that a lawyer who in the capacity of a government lawyer had represented the defendant in a criminal proceeding would be employed in the same particular matter if he were to represent the same person as plaintiff in a civil action for wrongful conviction in that proceeding.

In another opinion, the Committee said: [T]he very close relationship between basic facts, pertinent principles, and interested parties suggests that we have here the same "matter" within the meaning of DR 9-101(B). The test used for joinder under the Federal Rules of Civil Procedure also offers some guidance and leads to a similar conclusion. Rule 20 permits persons to join together in a single action if they claim a right to relief "in respect to or arising out of the same transaction, occurrence, or series of transactions or occurrences . . . ." Although we do not suggest that the test under DR 9-101(B) is quite this sweepig, that inquiry may help determine when formally separate undertakings or proceedings constitute essentially the same "matter."

D.C. Bar Legal Ethics Comm. Op. 84 (1980). There, the Committee concluded that a lawyer who had participated personally and substantially as a government employee in a proceeding against Company X involving the antitrust laws could not be employed by Company Y to bring a private antitrust action against Company X. The conclusion was easily reached because in the government's proceeding, Company Y had "bec[o]me embroiled . . . as a non-party witness and source of information." *Id.* (footnote omitted).

In determining whether the same particular matter is involved in both a lawyer's private employment and his prior Government employment, the Committee has considered the purposes of DR 9-101(B), as discussed above at pages 21-22: to prevent "switching sides;" to prevent misuse of confidential information; and to discourage government lawyers from handling their public responsibilities in such a way as to encourage their own future employment.

Judicial interpretations of DR 9-101(B) have generally been based on a "same facts" test. For example, in *Committee for Washington's Riverfront Parks* v. *Thompson*, 451 A.2d 1177 (D.C. 1982), the District of Columbia Court of Appeals declined to disqualify an attorney representing a group in submitting a specific design for a development project on the Georgetown waterfront. The attorney had formerly represented the City in participating in the creation by a task force of development plan guidelines for the area. However, the court held that the particular facts involved in the consideration of the specific design were significantly different from those upon which the task force work had been based. *Compare Taxpayers, Homeowners & Tennants Protective Ass'n* v. *Haber*, 634 F.2d 182 (5th Cir. 1981) (former city attorney who had advised city on all aspects of a redevelopment plan could not later represent private clients in challenging transaction that was part of the plan).

In the *General Motors* case, the court held that an action filed in 1972 by the City of New York alleging that General Motors had violated Section 2 of the Sherman Act was the same particular matter as an action brought by the United States in 1956 against GM under Section 2 and settled by Consent Decree in 1965, where "virtually *every* overt act of attempted monopolization alleged in the City's complaint is lifted *in haec verba* from the Justice Department complaint." 501 F.2d at 650 (emphasis in original). The court disqualified from representation of the City in its 1972 action the lawyer who had signed the complaint on behalf of the United States in 1956. *See also, Flushing Savings Bank* v. *Ahearn*, 96 A.D.2d 826, 465 N.Y.S.2d 574 (1983) (former prosecutor who had investigated loan sharking charges concerning mortgage could not represent residents in later foreclosure action involving that mortgage); *Commonwealth of Pennsylvania* v. *Eastern Dawn Mobile Home Park, Inc.*, 405 A.2d 1232 (Pa. 1979) (former prosecutor who investigated and compromised complaints against a mobile home park was disqualified from representing the park in defending against new complaints of a similar nature).

Often, such factual analysis involves a "transactional" approach to the definition of "same particular matter," as in *Flego* v. *Philips, Appel & Walden, Inc.*, 514 F. Supp. 1178 (D.N.J. 1981), where the court held that a former government attorney who had investigated complaints about certain transactions by a broker could represent private clients in a suit against the same broker involving different transactions. Similarly, in *United States* v. *Smith*, 653 F.2d 126 (4th Cir. 1981), the court held that a government prosecutor who had obtained the conviction of an individual several years earlier for a violation of a gambling statute could, as a private practitioner, defend him against charges of later violations of the same statute, but the former prosecutor could not represent the gambler in proceedings to revoke the probation that resulted from his earlier conviction.

In a case not yet definitively disposed of, the District of Columbia Court of Appeals and the D.C. Bar's Legal Ethics Committee have wrestled with the question of the criteria to be applied in determining whether two proceedings are the same "matter" for purposes of DR 9-101(B). *Brown* v. *District of Columbia Board of Zoning Adjustment*, No. 13670 (D.C. Court of Appeals, panel decision, July 15, 1983). The issue there was whether two former attorneys for the District of Columbia (one of them the former Corporation Counsel) should be disqualified from representing a developer in a matter before the Board of Zoning Adjustment where they had participated substantially on behalf of the City on two earlier zoning questions concerning the same piece of property. Although there were some issues in common between the zoning questions as to which the attorneys had represented the City and those on which they sought to represent the developer, there were substantial differences in the particular facts and legal arguments involved. A majority of the court in the panel decision found that both the earlier and the later questions involved the issue of the "rentable space" available in the property, whether "upstairs" in one instance or "downstairs" in the other, and that these issues were the same "matter" within the meaning of DR 9-101(B). Slip op. at 20. The dissenting judge took a narrow view of the term "matter," emphasizing as the central purpose of the same matter requirement the prevention of misuse of confidences. Slip op. at 31-34. The District of Columbia Court of Appeals has agreed to rehear the case en banc, and the D.C. Bar's Legal Ethics Committee has, by direction of the court, submitted a brief as amicus curiae on the issue of what constitutes the same "matter." The Committee's brief proposes that two matters should be considered the "same" if (1) the same parties are involved, (2) the same property is involved, and (3) the two matters involve a "single objective." Brief of Amicus Curiae Committee on Legal Ethics of the District of Columbia Bar, January 30, 1984. As of this writing the case has still not been decided.[13]

Armstrong, supra, requires particularly close consideration. That case concerned a former government lawyer, one Altman, who had participated in an SEC investigation of, and overseen the bringing of an action by the SEC against, "Clovis McAlpin and various other individual and institutional defendants . . . alleg[ing] that McAlpin and the other defendants had looted millions of dollars from . . . the Capital Growth companies." 625 F.2d at 435. That action resulted in an injunction against those companies' violating the securities laws and the appointment of a receiver "to protect the interests of shareholders in the . . . companies." *Id.* The receiver retained Altman's law firm as litigation counsel, to represent him in "[o]ne of [his] principal tasks," litigation "to recover all moneys and property misappropriated by defendants,"

Id., some of whom had fled to Costa Rica. Altman was assumed to be disqualified from any participation in the firm's activities as litigation counsel for the receiver, and so was screened from the representation from the very start.

Armstrong was one of the suits brought by the receiver with Altman's firm as his counsel. The defendants, some of whom had been defendants in the SEC's initial suit, moved to disqualify the law firm on the ground that the screening of Altman did not suffice to avoid imputation of his admitted disqualification to the firm. The District Court held the screening to be effective to avoid imputation of Altman's disqualification. The Second Circuit, in its initial decision by panel, reversed, 606 F.2d 28 (1979). Upon reconsideration en banc, however, the court affirmed the trial court's decision upholding the effectiveness of screening as a means of avoiding imputation of an individual lawyer's disqualification, by reason of former government service, to the lawyer's firm, 625 F.2d 433.

The interest of the *Armstrong* case, for present purposes, lies not in its holding as to the effectiveness of screening,[14] but rather in what it may imply as to the disqualification of the former government lawyer. Unfortunately, the three reported decisions in the matter do not have much to say upon that point. The disqualification of the former government lawyer was not ordered by the court; instead, it had been suggested by the lawyer's new firm, which undertook to screen him from its representation of the receiver. The disqualification had been approved by the SEC even though it saw "no adverse interests between litigation counsel and the Receiver on the one hand, and the SEC on the other, and no appearance of impropriety," 461 F. Supp. at 623, and it was apparently endorsed by the court of appeals, which observed that the former government lawyer "was concededly disqualified from participating in the litigation under Disciplinary Rule 9-101(B) . . ." 625 F.2d at 442. Insofar as the case is instructive, this is so not because of any explicit reasoning in the courts' several decisions but because of the factual circumstances of the case, which were assumed by all concerned to require disqualification of the individual lawyer. We compare those circumstances with those here under consideration at page 40–42 below.

As we have noted (page 9 above), regulations and decisions interpreting the Act have some relevance to interpretation of its analogue under the Code. The regulation implementing the term "particular matter involving a specific party or parties" in the Act—to which the term "matter" in the Code is defined as having identical meaning—provides that:

> The requirement of a 'particular matter involving a specific party' applies both at the time that the Government employee acts in an official capacity and at the time in question after Government service. The same particular matter may continue in another form or in part. In determining whether two particular matters are the same, the agency should consider the extent to which the matters involve the same basic facts, related issues, the same or related parties, time elapsed, the same confidential information, and the continuing existence of an important federal interest.

5 C.F.R. §737.5(c)(4) (1984). An example illustrates the way this rule might be applied:

> *Example 1:* A Government employee was substantially involved in the award of a long-term contract to Z Company for the development of alternative energy sources. Six years after he terminates Government employment, the contract is still in effect, but much of the technology has changed as have many of the personnel. The Government proposes to award a 'follow-on' contract, involving the same objective, after competitive bidding. The employee may represent Q Company in its proposals for the follow-on contract, since Q Company's proposed contract is a different matter from the contract with Z Company. He may also represent Z Company in its efforts to continue as contractor, if the agency determines on the basis of facts referred to above that the new contract is significantly different in its particulars from the old. The former employee should first consult his agency and request a written determination before undertaking any representation in the matter.

Id. The Office of Government Ethics has said that the Act's bar against representation of private interests in the same particular matter in which there was involvement as a government employee "is concerned with . . . switching sides on [a] particular matter or attempting to gain a benefit for a party adverse to the Government." (Letter opinion 80x9, November 24, 1980.)

In the relevant opinions of the Office of which we are aware (and which address, in the main, questions related to government contracts), the Office has applied a fairly restrictive interpretation of the term "particular matter." For example, the Office has concluded that contracts for each of four phases of the comprehensive program to provide a foreign government with 60 military planes and spare parts, ground support equipment and pilot training for those planes were separate particular matter even though the manufacturer of the planes was designated as the sole source of at least one later phase (Letter opinion 80x4, June 13, 1980). In another case, where an agency's contracts for services with a service vendor were renewed each year but with changes in the rates to be paid and benefits to be provided, each year's renewed contract (although apparently with the same vendor) was considered a separate particular matter. (Letter opinion of October 21, 1980).

C. Analysis

With such illumination as is cast by these authorities, we now turn to consideration of whether *any* task undertaken by or for the Independent Special Counsel would be the same particular matter as the Consent Decree (in which Mr. Ryan unquestionably participated), simply because that position was created by the Decree. If so, Mr. Ryan would have to be screened from every activity of Mr. Saxbe as Independent Special Counsel and of Pierson, Ball & Dowd acting on Mr. Saxbe's behalf—the same result as would be reached if it were determined that there was an "appearance of impropriety" under Canon 9, albeit a result reached by a somewhat different approach.[15]

The *Armstrong* case (discussed at pages 12 and 35–37 above) can be viewed as providing support for such a comprehensive disqualification. There, as here, the person for whom the professional employment in question was to be undertaken was in a position created by court decree: in that case the receiver, and in the present instance the Independent Special Counsel. Both positions were created, moreover, in the course of litigation and in the interest of furthering a purpose for purposes of the litigation. And in *Armstrong* the lawyer was deemed disqualified, and screened, for *all* the activities of his firm on behalf of the receiver.

We think, however, that the circumstances of the *Armstrong* case are different from those here under consideration, in important respects. The responsibilities of the court-appointed receiver in *Armstrong*, or at least those of the counsel whose employment was there in issue, involved a single narrow purpose—litigation to recover the assets of the Capitol Growth Companies that had been misappropriated—which was a central aspect of the original action by the SEC, in which the individual lawyer in question had clearly participated personally and substantially. Disqualification there clearly was an all-or-nothing issue; and the result, given the centrality of the matter, had to be disqualification. The Independent Special Counsel, in contrast, is concerned with, and seeks counsel on, an array of issues; and while all of them have some relationship to the Consent Decree inasmuch as the reason for the existence of Independent Special Counsel is to assist in the implementation of the Consent Decree, still only some of his activities are central to the Decree, and others—an increasingly large proportion—are no more than tangential. The essential point in *Armstrong*, in our view, was not the identity of the client—namely, the court-appointed receiver—but rather the nature of the work that was to be done for him.

A helpful perspective from which to view the question whether the Independent Special Counsel's participation in matters that are in themselves different from the Consent Decree constitute the same particular "matter" as the Consent Decree, for purposes of DR 9-101(B)—because he derives his authority to participate in them from the Consent Decree—may be provided by considering what the situation would be if Pierson, Ball & Dowd were asked for advice and assistance by general counsel to the Central States Pension Fund (or if general counsel to the Fund were to become "of counsel" to the firm). The work of general counsel would presumably deal in some respects with the Consent Decree, and clearly as to these there would be a bar to Mr. Ryan's participation, requiring screening of him if the firm itself (and the of counsel lawyer) were not to be disqualified by imputation. On the other hand, insofar as the ongoing work of the Fund's general counsel did not deal with matters in which Mr. Ryan had had personal and substantial participation, there should be no bar merely because he had been involved in litigation in which the Fund was a defendant. We do not think that the fact that it is not general counsel for the Fund but instead the Independent Special Counsel who is here involved, and the fact that the position of the Independent Special Counsel itself was created by the Consent Decree, should change this analysis.

Having thus stated our view, we must also acknowledge that the question is a close one, and one on which there is not, so far as we have been able to discover, any decisional authority on point, or close to it. (As we have pointed out, the case closest factually to the circumstances here presented is *Armstrong*—but we think that case distinguishable, and the point of pertinence here was not discussed in any of the three opinions in that case.) In these circumstances, we deem it to be of considerable moment that this issue be presented to, and satisfactorily resolved by, a suitably authoritative forum before Mr. Ryan undertakes any professional work on behalf of Mr. Saxbe as In-

dependent Special Counsel. The Court that appointed the Independent Special Counsel, and to which he reports, is obviously such a forum.

V. MR. RYAN MAY PERMISSIBLY FURNISH ADVICE AND ASSISTANCE TO THE INDEPENDENT SPECIAL COUNSEL WITH RESPECT TO SPECIFIC MATTERS WITH WHICH HE HAD NO RELEVANT CONTACT AS SOLICITOR OF LABOR

Assuming that our conclusion described in the preceding part of this memorandum—that the mere fact that the Consent Decree created the position of Independent Special Counsel does not make every activity of the Independent Special Counsel the same "matter" as the Consent Decree for purposes of Dr 9-101(B)—is correct, then a more particularized analysis of the activities and concerns of the Independent Special Counsel will be required to differentiate between those that should be treated as requiring Mr. Ryan's disqualification and screening, and those that should not. Such an analysis will not be required as to every category of task that may be undertaken by Pierson, Ball & Dowd on Mr. Saxbe's behalf, after Mr. Saxbe joins the firm as of counsel, since the proposed arrangements for Mr. Saxbe's affiliation with the firm, as reflected in the Burch and Ryan Affidavits, provide that Mr. Ryan will initially be disqualified and screened from all such matters save the single category of withdrawal liability problems affecting the Central States Pension Fund, with that single exception being subject to prior approval by the Court. The proposed arrangements also contemplate, however—again, subject to prior Court approval—the establishment of procedures under which additional categories of tasks may be identified, as to which Mr. Ryan would not be required to be screened.

In this part of the memorandum, we will address the considerations that in our view would justify the initial exception for withdrawal liability problems, and that would have to govern the decision as to whether there were any additonal matters on which Mr. Ryan would not be disqualified. The considerations, in each case, are two: (1) is the matter one in which Mr. Ryan participated personnally and substantially while he was Solicitor of Labor?; and (2) is it a matter as to which Mr. Ryan possesses confidential information arising from his former position?

A. Personal and Substantial Participation

The determination of whether a particular area of activity involves a matter in which Mr. Ryan participated personally and substantially will commence with and largely turn upon the Consent Decree. Thus, any task that requires interpretation of the Consent Decree, or that looks to modification of it, would appear to be the same matter as the Consent Decree for purposes of DR 9-101(B), and so a matter on which Mr. Ryan would be disqualified. In our view, however, the fact that the Central States Pension Fund is required by Section I of the Consent Decree to obey ERISA does not raise an obstacle to Mr. Ryan advising the Independent Special Counsel on application of ERISA to the Fund, since the requirement of the Consent Decree adds nothing to the obligations preexisting under federal law. By the same token, Mr. Ryan's advising Mr. Saxbe with respect to withdrawal liability problems effecting the Central States Pension Fund under ERISA would not involve a subject that is the same "matter" as the Consent Decree.

The particularized analysis must also consider whether a given subject matter involves personal and substantial participation by Mr. Ryan while Solicitor of Labor with respect to something other than the Consent Decree: as would be the case, for example, in the event that it related to other litigation in which Mr. Ryan had participated. If so, then that would be a ground independent of the Consent Decree for disqualifying Mr. Ryan from assisting the Independent Special Counsel. Again, with respect to the particular category of withdrawal liability problems, as to which it is proposed that Mr. Ryan will be able to advise and assist Mr. Saxbe, it is our understanding that both Pierson, Ball & Dowd and the Department of Labor are satisfied that Mr. Ryan was not involved in such questions insofar as they relate to the Central States Pension Fund while he was Solicitor of Labor.

B. Confidential Information

The other question that will require consideration, as to any matter on which it is contemplated that Mr. Ryan might furnish assistance to Mr. Saxbe, is whether Mr. Ryan possesses any confidential information with respect to that matter, arising from his service as Solicitor of Labor. The source of possible disqualification on this ground is DR 4-101 of the Code, relating to client confidences and secrets. This provision reads in pertinent part as follows:

DR 4-101 Preservation of Confidences and Secrets of a Client.

(A) "Confidence" refers to information protected by the attorney-client privilege under applicable law, and "secret" refers to other information gained in the professional relationship that the client has requested to be held inviolate or the disclosure of which would be embarrassing or would be likely to be detrimental to the client.

(B) Except when permitted under DR 4-101(C), a lawyer shall not knowingly:

(1) Reveal a confidence or secret of his client.

(2) Use a confidence or secret of his client to the disadvantage of the client.

(3) Use a confidence or secret of his client for the advantage of himself or of a third person, unless the client consents after full disclosure.

(C) A lawyer may reveal:

(1) Confidences or secrets with the consent of the client or clients affected, but only after a full disclosure to them.

(2) Confidences or secrets when permitted under Disciplinary Rules or required by law or court order.

If, as to any matter on which Mr. Saxbe may seek his advice or assistance, Mr. Ryan is in possession of confidential information relating to such matter which he received while he was in government and which is still confidential, then absent consent of the Department of Labor to disclosure or use of such confidential information he would be subject to the restrictions imposed by DR 4-101 and subject to possible disqualification on this ground.

In fact, the possibility that Mr. Ryan will possess confidential informaton of the Department of Labor relevant to a matter in which Mr. Saxbe is involved appears to be slight—particularly if it is a matter in which Mr. Ryan did not participate personally and substantially while he was in the Department. We are informed by Mr. Ryan that, with the exception of a single category of information that would have no discernible effect as respects his ethical obligations here under discussion,[16] he is not aware of having any information regarding the Central States Pension Fund, or any proceedings relating thereto, which is confidential. While he was Solicitor of Labor he did possess some confidential information on such subjects, essentially consisting of information as to the government's expectations and intentions with respect to litigation or possible litigation. Any such information, however, now is either no longer confidential in nature, having been communicated to the interested adverse parties; or else moot, because the proceeding to which it related has been terminated or was never commenced.

Nevertheless, the question of possible confidences or secrets must be considered because the possession of such informaton with respect to a former representation may disqualify a lawyer from taking on a new representation to which the information is relevant. Indeed, in cases in which DR 4-101 is the only relevant restriction upon a lawyer's undertaking a subsequent representation, courts, have created a "substantial relationship" test, not expressed in the disciplinary rule itself, that where applicable bars the lawyer's undertaking the subsequent representation upon the basis of a presumption that in the particular circumstances client confidences of secrets are possessed, and a further presumption that they will be misused in a way that DR 4-101 forbids, arising from the relationship between the two representations. The test was explained in *Silver Chrysler Plymouth, Inc.* v. *Chrysler Motor Corp.*, 518 F.2d 751, 754 (2d Cir. 1975).

This Circuit has . . . adhered to the rule enunciated by Judge Weinfeld in *T.C. Theatre Corp.* v. *Warner Bros. Pictures, Inc.*, 113 F. Supp. 265, 268 (S.D.N.Y. 1953), that "where any substantial relationship can be shown between the subject matter of a former representation and that of a subsequent *adverse* representation, the latter will be prohibited." An as to proof, Judge Weinfeld continued: "the former client need show no more than that the matters embraced within the pending suit wherein this former attorney appears on behalf of his *adversary* are substantially related to the matters or cause of action wherein the attorney previously represented him, the former client" (p. 268). This case was the genesis of the now so-called "substantially related" test. (Emphasis added.)

As the underscored language in this passage emphasizes, the "substantial relationship" test applies only in circumstances where there is material adversity of interest between the successive representations.

We do not believe that there is need to give separate consideration to the possible application of the substantial relationship test to Mr. Ryan, as respects his prior services as Solicitor of Labor and his prospective representation of Mr. Saxbe, for two reasons. One is that an element of that test is material adversity of interest; and we think that element would not exist between Mr. Ryan's previous client, the Department of Labor, and his proposed subsequent client, the Independent Special Counsel. The other is that an appropriate identification of the same "matter(s)" in which Mr. Ryan previously participated personally and substantially should serve to prevent Mr. Ryan's participation in any work for the Independent Special Counsel from which he would be disqualified by application of the substantial relationship test.[17]

The procedures to be followed with respect to the affiliation of Mr. Saxbe with

Pierson, Ball & Dowd are such as to provide reasonable assurance that in any instance where even though Mr. Ryan was not personally and substantially involved in a matter he nonetheless possesses confidential information with respect to the matter, that will be treated as a ground for disqualification, whether it is technically such or not, and Mr. Ryan will be screened with respect to such matters. (*See* Burch Affidavit, paragraph 9; Ryan Affidavit, paragraph 7). It seems clear that this procedure should adequately deal with possible concerns under DR 4-101.[18]

VI. THE PROCEDURES PROPOSED TO BE EMPLOYED FOR SCREENING OF MR. RYAN, FOR APPROPRIATE NOTICE THEREOF TO INTERESTED PARTIES, AND FOR IDENTIFYING MATTERS AS TO WHICH HE NEED NOT BE SCREENED, ARE SATISFACTORY

A. Screening and Notice

The Code provides, in DR 9-102(A), that the personal disqualification of a lawyer raised by DR 9-101(B) is imputed to any partner, associate or lawyer with and of counsel relationship to the disqualified lawyer except as provided in DR 9-102(B) and (C). DR 9-102(B) provides that the imputed disqualification "shall not" apply "if the personally disqualified lawyer is screened from any form of participation in the matter or representation as the case may be, and from sharing in any fees resulting therefrom." Thus, DR 9-102(B) appears to raise at least a strong presumption against an argument that no screening procedure, however, carefully constructed and conscientiously observed, can prevent imputation of a former government lawyer's disqualification to all other lawyers in his or her firm.[19] The Code, however, does not prescribe a screening procedure.

Judicially approved standards for screening do exist, however. In the en banc decision of the Second Circuit in *Armstrong* v. *McAlpin, supra,* the court found adequate, at least to avoid tainting ongoing litigation, a screening procedure by which the former government lawyer "is excluded from participation in the action, has no access to relevant files and derives no remuneration from funds obtained by the firm from prosecuting the action. No one at the firm is permitted to discuss the matter in his presence or allow him to view any document related to this litigation, and [he] has not imparted any information concerning Growth Fund to the firm." 625 F.2d 442.

In *Kesselhaut* v. *United States,* 555 F.2d 791, 793. (Ct. Cl. 1977), the following procedure was determined to be adequate:

"[The former government lawyer] is to continue to have no connection with the case, all other attorneys are not to discuss it with him and are to prevent any case documents from reaching him, the files are to be kept in a locked file cabinet, the keys controlled by Messrs. Altman and Krug and issued to other attorneys, clerks and secretaries only on a 'need to know' basis. . . . When screening is used, it must, as here, be specific and inflexible."

The court quoted this standard in *Sierra Vista Hospital, Inc.* v. *United States,* 639 F.2d 749, 753 (Ct. Cl. 1981), applied the standard to the facts before it, and found that the screening procedure employed were adequate.

In *Central Milk Producers Cooperative* v. *Sentry Food Stores, Inc.,* 573 F.2d 988, 991 (8th Cir. 1978), a private antitrust action alleging price-fixing and monopolization of milk that followed a government antitrust action against the same parties, the court, taking account of the facts that opposing counsel had agreed to the screening procedures at issue and that there was no allegation of actual impropriety, approved a screening procedure that "include[s] not allowing [the former government lawyer] to work on any milk-related matter; he may not discuss the cases with anyone employed by [his firm]; he may not answer any inquiries from any litigants in the milk cases; and all documents and correspondence are screened to avoid inadvertent violation of these screening procedures."

Pierson, Ball & Dowd, through the affidavits of Messrs. Burch and Ryan, has represented that it will observe certain procedures in screening Mr. Ryan from participation in all matters involving the work of the Independent Special Counsel, except for specifically identified categories of matters as to which it is affirmatively determined that he is not disqualified. In making this determination, Pierson, Ball & Dowd will consult with the Labor Department in accordance with the procedures set forth in Paragraph 9(b) of the Burch Affidavit.

The procedures that Pierson, Ball & Dowd intends to employ to screen Mr. Ryan from involvement in matters as to which he is disqualified are described in paragraph 7 of the Burch Affidavit. The procedures include provision for the establishment of separate cases files, with the files color coded and stamped with a warning legend and appropriate memoranda to all firm personnel cautioning that Mr. Ryan is to have no access to the files and that there are to be no discussions with him regarding their contents. We consulted with Pierson, Ball & Dowd in their development of these procedures, and we believe that, conscientiously applied, they will satisfy, in the circumstances here presented, the requirement of screening stated in DR 9-102(B).

The procedures intended to ensure that Mr. Ryan will not participate in fees generated by the matters from which he is screened are described in paragraph 8 of the Burch Affidavit. In substance they provide that the firm's profit on work performed for Mr. Saxbe as Independent Special Counsel, insofar as it relates to matters from which Mr. Ryan is screened, will be put in a separate pool from its profits from all other matters, and that Mr. Ryan will share as a partner only in the latter pool, while all other partners will share in both. We note that these procedures may be more restrictive than DR 9-102(B) requires, in preventing Mr. Ryan from sharing at all in the fees generated by work from which he is screened, rather than simply preventing his receiving compensation that is directly related to those fees.[20] In our view, however, the procedure that Pierson, Ball & Dowd proposes to implement is appropriate, and, indeed, is the one that is most likely—no procedure being certain—to remove the possibility of violation of the requirement that Mr. Ryan be screened from participation in the fees.

It is obvious that any screening procedure, however carefully constructed, might be violated by unethical lawyers. To ensure observance of screening procedure, DR 9-102 appears to place primary reliance—properly and, indeed, unavoidably in our view—on the integrity of the lawyer who is screened and his colleagues, both of whom are required by DR 9-102(C) to declare (the colleagues speaking through one representative) that they will honor the procedures. We have every confidence in the integrity and the conscientiousness of Mr. Ryan and of his colleagues at Pierson, Ball & Dowd.

Only brief consideration need be given to the requirements of DR 9-102(C) with respect to notices to the interested government agency and to other parties in pertinent litigation. DR 9-102(C) provides:

When any of counsel lawyer, partner or associate of a lawyer personally disqualified under DR 9-101(B) accepts employment in connection with the matter giving rise to the personal disqualification, or when the fact and subject matter of such employment are otherwise disclosed on the public record, whichever occurs later, the following notifications shall be required: (1) The personally disqualified lawyer shall file with the public department or agency and serve on each other party to any pertinent proceeding a signed document attesting that during the period of his or her disqualification the personally disqualified lawyer will not participate in any manner in the matter or the representation, will not discuss the matter or the representation with any partner, associate, or of counsel lawyer, and will not share in any fees for the matter or the representation. (2) At least one affiliated lawyer shall file with the same department or agency and serve on the same parties a signed document attesting that all affiliated lawyers be screened from participating in or discussing the matter or the representation and describing the procedures being taken to screen the personally disqualified lawyer.

The Burch and Ryan Affidavits contain the substance of the two documents called for by this provision, with the exception that they do not include specific identification of the matters as to which Mr. Ryan is to be screened. These affidavits will have been served upon the Department of Labor and all other parties to *Donovan* v. *Fitzsimmons;* and the lists of matters undertaken by Pierson, Ball & Dowd for Mr. Saxbe as Independent Special Counsel as to which Mr. Ryan is screened, as well as those as to which he is not, when established, will similarly be served upon such parties. Notice will also be given to the same parties when any new matter, of either category, is thereafter identified. (Burch Affidavit, paragraphs 7(i) and 9(d).) We do not doubt that these measures will fully satisfy the requirements of DR 9-102(C).

B. Identification of New Matters

It is also contemplated that, subject to Court approval, a procedure will be established for identifying additional categories of matter on which Mr. Ryan need not be screened but may provide advice and assistance to Mr. Saxbe as Independent Special Counsel. The procedures are as follows. As to each such matter, it will be necessary that a determination be made by the firm, in consultation with the Department of Labor, that the matter is not one as to which Mr. Ryan (a) participated personally and substantially while Solicitor of Labor, or (b) has any confidential information resulting from his former government service. (Burch Affidavit, paragraph 9(b); Ryan Affidavit, paragraph 7.) In the event that it is determined that there is a matter as to which Mr. Ryan need not be screened, then notice will be given of that matter to other parties to *Donovan* v. *Fitzsimmons,* just as such notice will be given with respect to the identification of additional matters as to which Mr. Ryan is screened. (Burch Affidavit, paragraphs 7(i) and 9(d).) We observe that notice to potentially interested parties as to matters with respect to which a former government lawyer is *not* disqualified and screened does not appear to be required by

DR 9-102(C), which explicitly refers only to matters as to which the lawyer is disqualified.[21] Thus, the proposed procedures go beyond what is literally required. We have no doubt that the procedures are satisfactory to meet the requirements of DR 9-102(C).

CONCLUSION

As has been explained, we do not believe that the Act has any application to the proposed affiliation of Mr. Saxbe with Pierson, Ball & Dowd, or to Mr. Ryan's relationship to work performed by Pierson, Ball & Dowd on Mr. Saxbe's behalf; but it is clear that DR 9-101(B) of the Code, and in consequence the related provisions of DR 9-102(A), (B) and (C) do have some application, as may also DR 4-101. The procedures proposed to be employed by Mr. Saxbe, by Pierson, Ball & Dowd, and by Mr. Ryan to deal with these ethical provisions appear to us to be entirely satisfactory.

COVINGTON & BURLING,
By David B. Isbell.

FOOTNOTES

[1] The sweep of the Code is broader than that of the Act in the important sense that, to the extent DR 9-101(B) of the Code applies, it prohibits all forms of "private employment" by a former government employee, whether advisory or representational, while the Act prohibits only representational contacts with agencies or courts of the United States and the District of Columbia. Moreover, when DR 9-101(B) raises a personal bar against private employment by the former government employee, that bar is imputed to his firm pursuant to DR 9-102(A) unless the former government employee is screened from the matter and notice given to the screening, pursuant to DR 9-102(B) and (C). By contrast, there is no imputation of the disqualifications under the Act, and thus no requirement for screening.

[2] We understand that it has been Mr. Ryan's consistent practice to check with the Department of Labor before undertaking any representation with respect to any matter that might have been under his "official responsibility" while he was Solicitor of Labor, and to refrain from representational contacts with respect to such matters until the two-year period of the statutory bar will have run.

[3] "ERISA" is the Employee Retirement Income Security Act of 1974, 29 U.S.C. § 1001 *et seq.* (1979).

[4] Other judicial decisions not directly relevant to the circumstances under consideration here reflect an expansive treatment of DR 9-101(B)'s term "private employment." For example, in Telos, Inc. V. Hawaiian Telephone Co., 397 F. Supp. 1314, 1317 (D. Hawaii 1975), the court rejected a former government lawyer's suggestion that he could avoid the requirements of DR 9-101(B) and represent a concededly private client by continuing his representation without compensation. The court said that "there are benefits other than fees that may be derived from prosecution or defense of a private action. It is not unknown in the practice of law for an attorney to volunteer his services in a case in order to establish or promote his reputation and exposure as bases for future gain." In Flushing National Bank V. Municipal Assistance Corp., 90 Misc.2d 204, 397 N.Y.S.2d 662, 667-68 (1977), the court followed similar reasoning in holding that a former associate of a private law firm retained by a governmental corporation could not subsequently represent, on a "pro bono" basis, in adverse, concededly private party in the same matter. It is interesting that the court described the lawyer as a "public employee," apparently within the meaning of the term "public employment," in DR 9-101(B), during the time that he was working as a private lawyer for a governmental corporation.

[5] "[T]he personal disqualification of the former government lawyer contained in DR 9-101(B) is essentially the ame disqualification required by the federal conflict of interest statute, 18 U.S.C. § 207(a)." Civiletti, "Disqualifying Former Government Lawyers," 7 *Litigation* 8, 9 (1981). See also D.C. Bar Legal Ethics Comm. Op. 98, n.4: "Section 207(a) does contain provisions similar in effect to DR 9-101(B)." There are, however, authorities that emphasize that the Code should be construed substantially more broadly than the Act. In United States V. Miller, 624 F.2d 1198, 1201 (3rd Cir. 1980), the court said: [18 U.S.C.] § 207 is not a comprehensive code of professional conduct; it is a criminal statute. . . . [N]othing in the statute . . . prevents former employees of the federal government to standards more demanding than the minimal requirements of the criminal law.

Similarly, the Second Circuit has said: [T]he Code of Professional Responsibility is not designed for Holmes' proverbial "bad man" who wants to know just how many corners he may cut, how close to the line he may play, without running into trouble with the law. . . . Rather, it is drawn for the "good man," as a beacon to assist him in navigating an ethical course through the sometimes murky waters of professional conduct.

General Motors Corp., supra, 501 F.2d at 649.

[6] It is quite possible that the quoted passage in the comment was drafted simply to address the *General Motors* case (discussed at page 11 above), and not to express a position one way or the other on the question whether a different agency or branch of the same government in which a lawyer was formerly employed is a "private client" within the meaning of the Rule. Since the comment makes clear that "private client" may mean a governmental agency, moreover, it may be read as supporting the treatment of another agency or branch of the *same* government as a private client.

[7] The Model Rules were drafted with "an overriding concern . . . that every concept be rooted in law. . . . Any yet, [they] . . . are not simply a restatement of the law of professional conduct. [In their drafting, the goal] was to produce standards bottomed on the law as it is but facing the future of a rapidly expanding and changing profession." ABA Commission on Evaluation of Professional Standards, Proposed Final Draft, Model Rules of Professional Conduct, Chairman's Introduction (May 30, 1981).

[8] The result of an affirmative determination as to appearance of impropriety would be the same as that which would follow from a determination that anything that Mr. Saxbe did as Independent Special Counsel was the same "matter" as the Consent Decree (in which Mr. Ryan unquestionably participated personally and substantially) on the grounds that the position of Independent Special Counsel was created by the Consent Decree: this question is dealt with in Part IV, at pages 24-42, below. However, the angles of approach are different: in dealing with the present question, what is required is a largely subjective application of a very general phrase, with little guidance from authority; in dealing with the scope of the term "particular matter," the language requiring interpretation and application is more specific, and there is substantial authority to guide the analysis. Still, the analysis of each question has some relevance to that of the other.

[9] Ethical Consideration 9-3 also uses the phrase "appearance of impropriety," in the following context: "After a lawyer leaves judicial office or other public employment, he should not accept employment in connection with any matter in which he had substantial responsibility prior to his leaving, since to accept employment would give the appearance of impropriety even if none exists." [Footnote omitted.]

[10] In its Opinion 111 (1982), the Committee cited with approval the statement by the ABA Committee on Ethics and Professional Responsibility, in its Formal Opinion 342, p. 3 (1975), of the evils that DR 9-101(B) is intended to prevent: "The policy considerations underlying DR 9-101(B) have been thought to be the following: the treachery of switching sides; the safeguarding of confidential governmental information from future use against the government; the need to discourage government lawyers from handling particular assignments in such a way as to encourage their own future employment in regard to those particular matters after leaving government service; and the professional benefit derived from avoiding the appearance of evil."

[11] This subject is more fully treated in the discussion of the possible application of DR 4-101 in Part V.B of this memorandum, at pages 45-50 below.

[12] For the purpose of this analysis it is of no moment whether Mrs. Saxbe in fact seeks the assistance of Mr. Ryan or any other lawyer at Pierson, Ball & Dowd on any such matter with which he is involved. It is clear that Mr. Saxbe's joining Pierson, Ball & Dowd as of counsel would require the screening of Mr. Ryan even if Mr. Saxbe did not get advice or assistance from Mr. Ryan or any other lawyer in the firm. According to the pertinent part of DR 9-102(A): "If a lawyer is required to decline or to withdraw from employment under DR 9-101(B), on account of personal and substantial participation in a matter . . . no . . . lawyer with an . . . of counsel relationship to that lawyer, may accept or continue such employment except as provided in (B) and (C) below [for screening of the personally disqualified lawyer]."

Thus, Mr. Saxbe would be barred from undertaking certain duties within his mandate as Independent Special Counsel to the extent that those duties involved particular matters involving specific parties in which Mr. Ryan participated personally and substantially so Solicitor of Labor, unless Mr. Ryan were screened from those matters.

[13] In a recent decision not yet reported, Judge Harold Greene of the United States District Court for the District of Columbia looked carefully at DR 9-101(B) as it applied to a lawyer representing a plaintiff airline in an antitrust suit against other airlines. Certain of the defendants sought to disqualify the lawyer on the ground of the lawyer's prior government service in matters relating to airlines in several capacities, in both the United States Department of Justice and the Civil Aeronautics Board. Laker Airways Ltd. v. Pan American World Airways, C.A. No. 83-0416 (D.D.C. June 26, 1984). Issues as to both whether the same "matter" was involved, and if so whether the lawyer participated "personally and substantially" in it were presented. After discussing both the policy purposes underlying DR 9-101(B) and the particular facts of the case before it, and taking a relatively narrow view of the term "matter," the court denied the motion to disqualify.

[14] DR 9-102(B), which is unique to the District of Columbia, prescribes that screening can be effective in such a case. The Disciplinary Rules applicable in *Armstrong* had no corresponding provision.

[15] *See* the discussion of "appearance of impropriety" in Part III at pages 17-24, above.

[16] Mr. Ryan does have certain confidential information relating to tax returns of certain individuals having a relationship to the Central States Pension Fund, which information Mr. Ryan learned in his official capacity for law enforcement purposes as authorized by Section 6103 of the Internal Revenue Code, 26 U.S.C. § 6103 (1982). That provision prohibits (with certain exceptions not here applicable) a recipient of such information, on pain of criminal penalty, from disclosing such information to any other person. Since the statutory prohibition on disclosure of this information is more comprehensive (as well as more severe) than any conceivably applicable ethical one, we do not believe that there could be a presumption that the information would be misused such as is involved in the "substantial relationship" fact discussed at pages 48-49 below, so as to make possession of this information a ground for disqualification.

[17] In the *Brown* case, *supra*, both the majority and the dissent in the Court of Appeals panel, and in addition the D.C. Bar's Legal Ethics Committee in its *amicus curiae* submission, in effect treated the phrase "substantially related," as used in the "substantial relationship" cases applying DR 4-101, as being synonymous with "same matter" for purpose of DR 9-101(B).

[18] It may be noted that the analogue of DR 9-101(B) in the ABA's Model Rules would deal explicitly with certain kinds of confidential information possessed by former government lawyers:

Rule 1.11 Successive Government and Private Employment

(b) Except as law may otherwise expressly permit, a lawyer having information that the lawyer knows is confidential government information about a person acquired when the lawyer was a public officer or employee, may not represent a private client whose interests are adverse to that person in a matter in which the information could be used to the material disadvantage of that person. A firm with which that lawyer is associated may undertake or continue representation in the matter only if the disqualified lawyer is screened from any participation in the matter and is apportioned no part of the fee therefrom.

(e) As used in this Rule, the term "confidential government information" means information which has been obtained under governmental authority and which, at the time this Rule is applied, the government is prohibited by law from disclosing to the public or has a legal privilege not to disclose, and which is not otherwise available to the public.

ABA Model Rules of Professional Conduct (August 1983).

[19] Some courts have taken that position. See Cheng v. GAF Corp., 631 F.2d 1052 (2d. Cir. 1980), *vacated on other grounds*, 450 U.S. 903 (1981) (in which the individual lawyer's disqualification arose from knowledge of the confidences and secrets of the adversary of his new firm's client, not from prior government employment); In re Asbestos Cases, 514 F. Supp. 914 (E.D. Va. 1981), *aff'd without opinion by an equally divided court sub nom.* Greitzer & Locks v. Johns-Manville Corp., 710 F.2d 127 (4th Cir.) (en banc), *cert. denied*, 459 U.S. 1010 (1982) (where a lawyer had participated personally and substantially in the defense of the United States in product liability actions regarding asbestos brought in federal court in Norfolk and in the coordination of all asbestos actions in which the United States was named or became a party, and while those actions were pending, switched sides by joining a six-person law firm that represented plaintiffs in asbestos cases in the Norfolk court and other courts). In neither case was there an applicable provision like DR 9-102(B), specifically contemplating screening as a means of avoiding imputation of an individual lawyer's disqualification.

[20] Rule 1.11(a)(1) and (b) of the ABA Model Rules of Professional Conduct require that the former government lawyer "is apportioned no part of the fee" from matters as to which he or she is disqualified—a requirement that is presumably no different in substance from DR 9-102(B)'s requirement that the lawyer be "screened . . . from sharing in any fees resulting therefrom. The comment to this Model Rule states:

Paragraphs (a)(1) and (b) do not prohibit a lawyer from receiving a salary or partnership share established by prior independent agreement. They prohibit directly relating the attorney's compensation to the fee in the matter in which the lawyer is disqualified.

[21] The notice requirement in the Model Rules' analogue to DR 9-102(C) is narrower than that provision as respects parties to whom notice must be given (being limited to the government agency and not including parties to pertinent litigation), but apparently somewhat broader as to substance. In pertinent part, the provision reads:

Rule 1.11 Successive Government and Private Employment

(a) . . . No lawyer in a firm with which that lawyer is associated may knowingly undertake or continue representation in such a matter unless:

(2) written notice is promptly given to the appropriate government agency to enable it to ascertain compliance with the provisions of this rule.

ABA Model Rules of Professional Conduct, Rule 1.11(a) (August 1983).

[From the Wall Street Journal]

SENATE S&L COP-OUT?

On Monday, former federal banking official William Isaac called the S&L mess "the largest bailout in the history of the world." Today, the Senate, the World's Greatest Deliberative Body, may well vote the biggest copout since it violated the U.S. Constitution to slam former Senate employee Danny Wall into a top job in the thrift bailout.

A federal judge ruled recently that the Senate's Wall maneuver skipped the Constitution's clearly stated appointments requirement. A nomination hearing for Mr. Wall would have risked airing questions and unflattering publicity about some of the Senators who've been carrying water for Charles Keating, the S&L financier.

The Bush administration has nominated a Washington lawyer named Timothy Ryan to take over the headless octopus called the Office of Thrift Supervision. Last Friday, the Senate Banking Committee cleared Mr. Ryan by an 11 to 10 vote, and his nomination may come before the Senate for a full vote today. Senate Banking Chairman Don Riegle, who was on the losing side of the committee vote, now is attempting to defeat the nomination on the floor. He is arguing that a leaked FBI report about Mr. Ryan's flirtation with drugs 20 years ago isn't an issue. "Competence" has become the Senate Democrat's rallying cry. We think the leaked drug report deserves some further reflection.

Mr. Ryan's voluntary admission to the FBI was leaked to NBC within hours of the Democrats' loss on the committee vote. Senator Riegle quickly put out a pro forma statement about not condoning the leak of raw FBI files, but all Senators will have to evaluate for themselves, etc. etc. Meanwhile, every subsequent story on Mr. Ryan's nomination has had to mention the drug-use incident.

The fact is, win or lose on the Senate vote, the leak means that Timothy Ryan's professional and personal life in Washington forever will have this tin bell dragging behind it. Mr. Ryan agrees to serve his government by taking a truly awful assignment, and in return gets this nightmare. But we're not too surprised that Senator Riegle would yawn at a breach of FBI confidentiality. This is the same Senate that held a linen handkerchief to its nose while raw FBI data engulfed a former colleague, Senator John Tower.

Congress however, does try to defend those who reside within its walls. Recall the tumult over the false leak suggesting that Rep. William Gray's office was involved in a criminal investigation. Under a stern request from Senate Judiciary Chairman Joseph Biden, the Justice Department committed 11 FBI agents who spent a total of 385 days unsuccessfully trying to find the leaker.

How many qualified men or women, in the wake of the Ryan FBI leak, will now consent to subject themselves to this milieu, especially if Mr. Ryan is defeated? We frankly had thought that the appointment of Mr. Ryan, a Beltway insider, was itself a sign that people beyond Washington were refusing offers to serve. It now appears that Congress will let the political dogs loose on anyone beyond its own doors. Again, it was Danny Wall, former Banking Committee Chairman Jake Garn's aide, who slipped through the normal confirmation process.

Senate Majority Leader George Mitchell now talks of "widespread concern" over Mr. Ryan's qualifications. We are beginning to wonder if indeed Congress doesn't have cause to worry about Mr. Ryan's skills. He is a lawyer and his federal expertise is in enforcement. Not being part of the cozy, S&L-Congressional old-boy network, he obviously doesn't have to worry about whom he offends in the thrift business because it isn't likely that he'll ever be looking for a job with them. His most noteworthy asset is his independence.

Anyway, wasn't it the "experts" who got the country into this $200 billion hole? Congress voted the deposit insurance limit up to $100,000, which put it way out of Mom and Pop's league and into the hands of the high flyers. The S&L "experts" then put billions of dollars into doomed and wild projects, and the system is now in the tank.

Maybe somewhere out there in America is the one "expert" who can rescue Washington from its past follies with the thrift system. But he isn't coming to Washington; he has read how the city devours its own and he is fleeing from it.

In the final analysis, the Senate vote on the nomination should be viewed as a vote on the fundamental seriousness of the Senate's commitment to a solution. If, however, the Senate's vote rolls the thrift supervisor's job into limbo, President Bush should consider taking control of the situation by making a recess appointment. Without resolve by some responsible Washington party, the S&L crisis is going to turn into another American quagmire.

(Mr. BRYAN assumed the chair.)

Mr. DOLE. Mr. President, in fact, Tim Ryan should be commended, not condemned, for his work in the Central States matter. He should be commended, not condemned for helping to put a multibillion pension fund back on firm financial footing. And he should be commended for receiving not one, but two, written opinions to establish and clarify the ethical basis for his assistance to former Senator Saxbe.

Finally, allegation No. 3 concerns Mr. Ryan's representation of the National ESOP Association while he was a member of the ESOP subcommittee of the Labor Department's Advisory Council. Mr. Ryan was advised that he could not do both, that he could not represent the ESOP Association and sit on the Advisory Council at the same time.

So what did Tim Ryan do? He did what is right. He did what he ought to do. He takes the ethics advice and promptly resigns from the Advisory Council.

And I might add that the Advisory Council's ESOP subcommittee has never met once, not once. So one has to wonder whether a real conflict of interest ever existed in the first place.

Some say, well, it is no problem if they vote the nominee down. We will get another one. Somebody will walk by. Tourists are around. Maybe we can pick one out. These critics leave the impression that it is easy to reach out, touch someone, and get a nominee. But then you have to have the FBI check and go through all the other checks that take week after week after week. It is not easy for the President to go out and find another nominee.

It is very difficult, as my colleagues know, to get an FBI clearance. It is getting more and more difficult around here to even have an FBI report. Somehow someone will see that the report gets leaked to the media.

It takes awhile for someone who has been nominated to get prepared, physically and emotionally, to run through the congressional gauntlet, particularly when leaks from FBI files seem to be more the rule than the exception.

We cannot sit around and wait for the RTC to speed up the asset disposition process. And notwithstanding the legislation that the distinguished chairman has prepared, we cannot wait for the court of appeals to overturn the Olympic Federal decision, which placed the actions of the current OTS Director in a cloud of legal doubt.

I think that is why it is important we confirm this nomination. It should

not be partisan. It ought to be nonpartisan.

I have a sneaking suspicion that much of this debate is not really about Tim Ryan. It may be an exercise in political self-protection, and it may be about writing the opening chapter in who is really to blame for the savings and loan mess.

Hardly a day goes by when a zinger, a squawk, or some other critical comment is not launched at the FDIC, or the RTC, or the OTS, from the cozy Halls of Congress. This is not surprising. It is very easy to sit back and play bash the regulator. We have all done it. I am guilty myself. It is easy to go after the regulator.

Sometimes we criticize the regulator because we should do it. Do not misunderstand me. Congress is not powerless. And we represent the people who send us here.

I will give you an example. Congress bashed Danny Wall and the Bank Board in 1988 when the Board cut some last minute deals to salvage certain large institutions in the Southwest. And despite all the bad press and all the criticism from Congress, these deals look pretty good in retrospect.

The congressional headhunters were at it again when they criticized the FDIC for taking some responsible risks and adopting the accelerated resolution program and the open thrift assistance program.

Now we have another congressional cluster bomb dropped on the head of the nominee, the OTS nominee, Tim Ryan.

People who have met with Mr. Ryan, I think, have been satisfied. Now I recognize that he did not have the answer to every question the Senator asked and he really did not have that much time to study up on all the answers. But, again, I go back to where I started. If you want some expert, someone who can answer all these questions, someone who will not say "I do not have a view," then I guess you may have a problem with the nominee.

But I think the American people should know that Congress has been part of this S&L problem, too. It would seem to me, if I were on the other side, I would want to confirm Mr. Ryan and, if it did not work, then I would say, "We told you so."

The last time I read, the confirmation process is supposed to occur in the Senate, not in the committee. I heard the distinguished Senator from Illinois [Mr. DIXON] say we should have killed this in the committee. The Constitution does not say that a Senate committee can confirm or reject nominees. That is a practice I hope we do not start. But it has been increasing in the past several years.

I would just say, finally, that not too many Americans are willing to turn their lives inside out, particularly to take on a thankless job like Director of OTC. This man did not ask for the job, but when he was asked by the President to serve, he said, "yes." Is he to be penalized because he said "yes?" He put his professional and personal reputation on the line. It is an immensely difficult task, and I think he deserves to be confirmed.

I would like to make one final point, not about Tim Ryan, but about the process itself. We have all heard about the leak from the FBI files. I think the leak was certainly inappropriate, and probably unethical. I just hope that sooner or later we are going to realize, whether Republicans or Democrats, that a nominee is not a criminal suspect on trial but the considered choice of an elected President.

I note in today's paper that the distinguished Senator from Delaware, Mr. BIDEN, talked to Attorney General Thornburgh concerning leaks surrounding the Bill Gray investigation. I think Attorney General Thornburgh properly responded by saying, "We are going to review the case."

These days, after someone has made an allegation, you can spend the rest of your life trying to put out the fire. Ray Donovan said after acquittal in the trial, after months and months of allegations and attacks by the liberal media, he said, "Where do I go to get my reputation back?"

We owe the nominees, whether Democrats or Republicans, some respect. We should not be using FBI files just as an excuse to smear someone. We are all in public life. We know what it is like when someone starts a story or someone starts a rumor. We are all suspect in the eyes of some.

Mr. President, if we want to succeed, if we want the S&L crisis to be met head on, let us give Tim Ryan a chance. Has he done anything not to deserve a chance? He did not solicit the job. In public service or anything else, when you are asked to do it, you do it, unless there is some compelling overriding reason.

So I want to say, as I close, I congratulate the chairman on the speedy hearings. He did not wait. He did not delay the confirmation.

I hope we reach into our hearts and take a look at this person and understand what he has done. His record has been good.

What he may have done 17 years ago is public, and it ended 17 years ago. If he is to be held up to that standard, then we are going to wipe out a generation of men and women who are about that age, who may have experimented at one time or another with some type of drug. Keep in mind that in an earlier generation, it may have been some other vice. And in a future generation it may be something else.

So I hope there is still time for bipartisanship in the debate that follows. Perhaps we can end up as we did yesterday, together up in the press gallery, Republicans and Democrats. Perhaps we can have Republicans and Democrats saying that we worked together to produce the right result.

Admittedly, clean air legislation is a little different than a nominee, but I still believe the same spirit is here today.

Mr. RIEGLE. Will the Senator yield?

Mr. DOLE. Yes.

Mr. RIEGLE. I listened with great care, and I have great respect for what the Senator says. I have great respect for the minority leader, and I am actually sympathetic to a number of the points he raised here. I want particularly to associate myself with his last remarks just prior to his closing comment here.

I want to join him in the strongest possible way in condemning any release of material in FBI files on anybody at any time. There is no excuse for it. There is no justification for it. I do not think there is any basis on which it can be condoned. I condemn it and I did when I learned about it. I object to it strongly. I think it is improper.

I also feel, as he has expressed, and associate myself with his comments, that this nominee has publicly indicated what the history was in his own case back, I think, as the Senator said, 17 years ago. Every Senator has to make his own judgment. I made mine. I do not think that has any part, speaking for myself, in the consideration of the fitness of this nominee, and particularly so, given the review of his professional and personal life since that time. As a matter of fact, Senator WARNER and I met this morning with the nominee together to discuss that issue and also just the independence issue.

I think Senator WARNER feels as I do, and as the minority leader has just expressed. I think this issue has arisen in this has just expressed. I think this issue has arisen in this context. It might have arisen any other time in any other context. This is as good a time as any to deal with it head on. I think it is very appropriate that these comments be made and that we make a record here that will be in place in terms of other situations that might come down the track.

Mr. DOLE. Mr. President, I thank the distinguished chairman. I need to go to the Judiciary to introduce a nominee at 2:30. I have not collected his FBI files.

But I certainly agree with the Senator from Michigan. I think we all share that view. I hope that this, whatever happens, will not recur. I thank the chairman.

Mr. WARNER. Mr. President, we thank the distinguished Republican

leader for coming forth and speaking in such a courageous manner on behalf of this nominee.

Mr. President, there was a most unusual occurrence this morning. Mr. Ryan was in my office and not more than 30 minutes before the scheduled time in which this debate was to take place, we received a call from the distinguished chairman of the committee, the Senator from Michigan, inviting the two of us to come over. To me, it will be one of those moments I will always remember in my Senate career, because I recognize the two of us had to take different positions today on the floor of the Senate.

But, first, the chairman said to Tim Ryan, If it is the will of the Senate that you take this responsibility in accordance with the request of the President of the United States, then you are going to have my full support and we going to work together as a team to address the many problems, because this industry is important to America and I—the chairman—"working with you, want to help this industry."

We covered the problems of the FBI matter and basically agreed that the consideration of that, although important to the Senate, should be saved for another day.

Second, we covered the question of the use of controlled substances by Mr. Ryan, something that he has fully disclosed in his own statement publicly on March 30 quite apart from the FBI documentation. To clarify one point that was of concern to the chairman and indeed other Members of the Senate, was his reference to possibly using a controlled substance "once, perhaps twice." This occurrence took place on one evening, not sequentially with a separation of time.

Admittedly, he said it was a mistake, a mistake. But he felt it was important to be totally honest. I have the form here, the form requiring the information. The forms now require 20 years of life history as opposed to 5. This candid admission goes to the character of the man, together with his wife, recognizing the importance of the position which he is about to assume, subject to the confirmation of the Senate.

So I thank the chairman for making that meeting possible. And Mr. Ryan likewise thanks him for making that meeting possible.

Mr. RIEGLE. I thank the Senator from Virginia. I think it also should be said, in the spirit of the comments of the minority leader, I think it is very widely shared here that events that may have occurred in someone's life at some distant point, in this case 17 years ago, for which he himself has expressed a regret and wishes were not so—I mean people cannot have the whole rest of their lives carried out under some kind of a shadow or a cloud because of that. I do not know how situations like this are best handled. Under some circumstances, sometimes they just roll into play and you have to deal with it as it is.

But again, I think we ought to look at this candidate based on his qualifications, based on what he brings to the job. As the Senator says, he and I have a disagreement on that, but we do not have a disagreement with respect to these other issues, and it is important that we lay that out.

Mr. WARNER. Mr. President, I thank the chairman again.

As I stated earlier, Mr. Ryan and his wife are part of a generation who are coming forward now to take on positions of major responsibility in Government, in the private sectors, in their communities. It would be a mistake for America to write off those persons—hopefully few in number—who may at one or more times many years ago experimented with controlled substances, but then had the courage and the tenacity to reject them thereafter and subsequently work within their community and to help others not make the same mistake. To me it would be a bad policy to write them off without carefully studying each case. We would indeed discourage qualified individuals from even thinking of stepping forward to accept positions of leadership. The FBI form for potential Presidential nominees is quite intimidating. Here is a man who faced it and faced it honestly. I hope other members of this generation who have capabilities come forward into leadership positions, be it private or public, and show the same measure of courage.

We have to examine each case on its own merits. We cannot condone the use of these substances in any fashion, but should look at each case. And where up front, honestly, a person makes the disclosure and is willing to subject himself and his family to continued scrutiny, public or otherwise, somehow it seems to me that it shows a measure of their courage and ability to take on tough jobs. And that, in many respects, is the case we have at hand.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin [Mr. KOHL] is recognized.

Mr. KOHL. Mr. President, there is something suitably symbolic about the nomination of Tim Ryan to head the Office of Thrift Supervision. It mirrors all the mistakes that created the S&L mess. It is yet another quick fix to a problem that cries out for a long-term solution, and I believe that is wrong, and I therefore cannot support Mr. Ryan's nomination.

Mr. Ryan is by all means a fine, decent human being. When I met with him earlier this week I found him to be sincere, well meaning and intelligent. At the same time, everyone agrees that he has no special expertise or knowledge about the thrift industry.

When I met personally with him I was struck by his inability to formulate any vision of where he wanted the thrift industry to be next year or 5 years from now. This, even though the Director of the Office of Thrift Supervision has the explicit responsibility for guiding Federal policy toward the thrift industry.

So there we have it, Mr. President. A well-meaning person with no evident experience or background or vision to deal with this problem. Is this not, Mr. President, the approach that got us into the S&L trouble to begin with? Like everyone else I condemn the crooks who fraudulently stole money from their depositors but I generally do not find much fault with the S&L industry. They simply went as far as the regulations or lack of regulations allowed them.

Where I do find fault, however, is in the Government that stuck its head into the sand instead of taking the tough measures that were needed. This problem was allowed to fester for years. Strong action taken early could have nipped the entire terrible problem that is now upon us in the bud. But those actions were not taken and every taxpayer in the land will yet pay as much at $4,000 for that mistake.

We have created a financial crisis of unprecedented proportions that has many, many years to go before it is completely resolved. So, onto this stage the administration now sends us Tim Ryan.

Mr. Ryan has at least one thing going for him, he is not associated with any of the mistakes of the past. His lack of experience and expertise does mean that he was not involved in any of the policies which helped produce his problem. But he does not have the background or the experience to suggest or implement any of the ways to get us out of this mess.

I cannot imagine why the administration did not nominate a person with experience and knowledge of the thrift industry. The fact that this was a vacancy to fill did not take them by surprise. They have known about it for several months. They could have done better. They should have done better. I just plain do not believe the suggestion that they could not get a more qualified person to agree to serve.

But the administration did delay, and they did not get a qualified candidate. Now they tell us that we have to vote for Mr. Ryan or the world will end. Well, let me make two points about that.

First, when I discussed this nomination with Secretary Brady I was told we had to confirm Mr. Ryan because of the court cases challenging the le-

gality of the actions of the OTS. There are, however, other ways to fix this problem, as we know. We need not rush to judgment in order to deal with that problem. We need not settle for second best, in order to avoid the worst case.

But, second, keep in mind that we are asking the head of the OTS to review, in the next few weeks, over 1,000 decisions which were made by his or her predecessor. Mr. Ryan, as bright as he is, simply does not have the knowledge or the background or the experience to analyze and make those decisions. If we rush to confirm him now, we will force him to rush to make judgments he simply is not qualified to make.

So it comes down to this. For me, I admire Mr. Ryan but I cannot vote to confirm him. He is simply not qualified to manage an S&L individually, much less to regulate the entire industry. If we reject his nomination we will be saying that we are not going to settle for quick fixes any more. We want the S&L mess addressed, not just managed. Mr. Ryan cannot do that and our country deserves somebody who can.

The PRESIDING OFFICER. The Senator from Alaska [Mr. MURKOWSKI] is recognized.

Mr. MURKOWSKI. I thank the Chair.

Mr. President, much has been said about the nominee, Mr. Tim Ryan. First of all, I would like to advise my colleagues, in case they might have forgotten, I am not a member of the Banking Committee. However, I did spend in my non-Senate life, 25 years in commercial banking, 25 years of competing in a marketplace where S&L's played a very prominent, positive, meaningful role providing low-interest rate long-term mortages for America's hombuyers.

The question we have before us is the qualifications of one Mr. Tim Ryan. This Senator would suggest that, as a lawyer for the last 16 years, a member of a prominent firm, a Solicitor for the Department of Labor, a professor of law at Georgetown University, and in his capacity at the Department of Labor having an oversight of some 600 attorneys, that these indeed are qualifications for this position.

There are those who suggest that, because of his lack of expertise in finance, in the thrift institutions in particular that somehow he is not qualified.

I think it is fair to say as we examine this reality, that the qualifications listed before us will not exempt us from the risk associated with any nominee being appointed for a responsible position, and this, as the Director of the Office of Thrift Supervision, is certainly a responsible position. It is probably the hottest seat in Washington, DC.

I think it can be suggested that as a consequence of lack of experience in the thrift industry, that had we had somebody with exactly those capabilities, there would have been suggestions that somehow he had a conflict of interest because of that intimate knowledge. The question before us is based on the responsible and reasonable qualifications of Tim Ryan. Is he up to the task ahead?

I think it is quite reasonable to assume that he is. Obviously he has the confidence of the Secretary of the Treasury. He has the confidence of our President. And there is a practical aspect of American business that suggests that you hold those at the very top positions responsible for their appointments, and it is of course appropriate that the Senate address these as well. That is what we are doing.

But what I am suggesting to my colleagues is that we are not simply going to take the risk out of the nominee. It is appropriate that we examine his qualifications. This Senator is satisfied that these qualifications are quite reasonable, that the nominee is quite responsible and capable of making the tough decisions that are going to be necessary for the head of the Office of Thrift Supervision.

As we go about selecting a new Director of the OTS, I suppose it is appropriate that we all reflect on the real causes of the thrift crisis. What got us into this hole? I think Pogo may have said: "The enemy is us." That is probably more true than any other evaluation of just how we got into this hole.

I believe there are two main causes of the crisis. One is certain aspects of deregulation. When Congress deregulated the thrift industry, I feel, the writing was on the wall. It did not take a financial genius to see that the thrifts, with the long-term fixed rate mortgage portfolios were destined to fail when they lost control of their short-term cost of funds.

One of the first rules of corporate finance is never borrow short and lend long. The thrifts were totally unprotected from wildly fluctuating interest rates.

Mr. President, I ask unanimous consent to have printed in the RECORD a question and answer from a Time magazine article dated April 9, 1990. It took place in an interview by a Time correspondent, Margaret Carlson, with Mr. Charles Keating.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Q. But with these direct investments you were trying to have it both ways: you stood to make a lot, but if the investment went sour it was the taxpayer who bore the risk.

A. Mortgages are risky too. Let's say you have a billion dollars out in home loans, and the average rate on those home loans is 5%. But then rates go up and you have to pay more to attract deposits. So all of a sudden you're paying out 8%, but you're still catching 5% coming in. That loan's bad right now. You're out of business. There's no way you can ride that out.

Mr. MURKOWSKI. I refer to one specific question to substantiate my contention that indeed deregulation played a major role in the failure of the thrifts.

The question was asked of Mr. Keating: "But with these direct investments, you were trying to have it both ways: You stood to make a lot, but if the investment went sour, it was the taxpayer who bore the risk."

Mr. Keating's reply: "Mortgages are too risky."

I think what he really meant to say was on mortgages, the return is too low.

He goes on to say:

Let us say you have a billion dollars out in home loans and the average rate on those home loans are 5 percent. But then rates go up and you have to pay more to attract deposits. So all of a sudden you're paying out 8 percent, but you're still catching 5 percent coming in. . . .You're out of business. There's no way you can ride that out.

Mr. President, I contend that the deregulation of interest rates created an environment for people like Charles Keating to operate in. They had a fixed-rate mortgage portfolio in those institutions. They generated a rate of return to solicit new deposits and maintain those that they had for going out to other institutions that were paying higher rates. In order to attract and maintain a positive yield on that deposit base, they had to make speculated investments—junk bonds, speculative real estate, and so forth. They had to do that to generate income to pay to attract and maintain deposits because they were paying higher rates.

But they had a fixed-rate, long-term mortgage portfolio that they could not do anything about, and they were competing with commercial banks that had short-term portfolios, short-term bond investments, short-term investments as a whole; that as they matured, they could go out and get higher returns to pay higher rates brought about by deregulation.

I do not know where all the advisers were at the time we looked into the merits of deregulation on the thrifts. But I can tell you, as one who competed in that marketplace, it was common discussion among commercial bankers that the thrifts were going to go through a very difficult period of readjustment in competing in a marketplace that was unregulated, in their ability to continue to maintain their deposit base when rates were off and, among many who were familiar with the difficulties of providing new services, such as checking accounts and other services that the thrifts were al-

lowed to go into after deregulation and the inability to contain the cost of providing those services, that it would be a very difficult time. I do not think anybody dreamed to the extent that we would see the deterioration of the thrift system as a consequence of deregulation.

I bring this out in some detail as one who was involved, again, in a competitive position to simply try and explain to my colleagues perhaps not quite as familiar and a little more inclined to generalize on how such a thing could happen, and perhaps my explanation will be of some help.

The second point I think deserves examination, Mr. President, is the question of regulatory oversight. Were weak regulators a major cause of the crisis? I do not know. Perhaps the regulators chosen were too close to the thrift industry. Maybe they were not tough enough. Clearly, we need regulators who will stand up to industry and political pressures to protect the interest of American traxpayers.

I do not know that regulators have a wide authority. They can issue cease-and-desist orders against boards of directors. The implications of that, as a board of directors, is certainly significant and it has criminal penalties that go with it. So as we reflect on the causes of this crisis in the thrift industry, it is fair to say that the regulatory oversight was clearly lacking and bears a reexamination as we attempt to fix this tremendous drain on the American taxpayer.

Much has been said, again, about the process we are in today. The opposition to the nomination has been mentioned by some of our colleagues across the aisle. The question of partisan politics has been raised from time to time. Perhaps this is an opportunity to take our President to task to some extent. Our President certainly is experiencing unprecedented popularity. I do not know whether Tim Ryan is a pawn in a political game or not. Others have suggested that Mr. Ryan is not one of the boys in the S&L industry. The opposition perhaps wants one of their cronies to continue to play a role in the regulatory process.

I think we all agree the American taxpayer has paid enough for the S&L debacle. I think it is time to bring in outside regulators who have the capability of making decisions and will make some waves. It would be my suggestion that after Mr. Ryan is confirmed that he make his tough decisions up front.

The American public must know the full extent of the S&L bleeding, when it is going to stop, and how much it is going to cost the taxpayers. We are continually exposed to the realization that there are more losses ahead. I believe that Mr. Ryan is up to the task of meeting with other regulators to see how deep the hemorrhage is. I believe he has the experience and capability as a manager to walk into this situation and basically make two policy commitments: One is to support his field regulators in their efforts to enforce existing regulations; and the other is to determine how deep the hemorrhage is, identify it, and say this is the extent that the American taxpayer is going to be subjected to—and no more.

So, Mr. President, I think as we address the nominee before us, we should recognize that this man has gone through a difficult process already. The question of leaks of an FBI report is something that is probably more a reflection and a condemnation of this body, than of Mr. Ryan. It is probably appropriate that each of us reflect on the difficulty of a nominee who is required under oath to tell the truth but is of the assumption that the truth will be kept within the confines of certain restrictions. Unfortunately, that has not been the case in this instance.

I think the nominee, Mr. Tim Ryan, meets reasonable and responsible qualifications. As a consequence, he should be confirmed by this body. I thank the Chair.

I yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I know there are anxious Senators who desire to speak on both sides, but for the moment I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CONRAD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CONRAD. Mr. President, it was 8 months ago today—on August 4, 1989—that I stood on this floor with seven of my colleagues to oppose the final dimensions and outline of the S&L bailout bill. At that time, I told my colleagues that I was profoundly disturbed by the nature of that compromise, and I was personally convinced that it would not minimize the cost to America's taxpayers; it was poorly structured, and would not solve the problem.

Mr. President, I have become even more disturbed as the fiasco has unfolded. The administration's attempt to implement this cleanup has been a complete disaster.

A number of weeks ago, I met with a person who is one of the most knowledgeable individuals in the private sector with respect to what is happening with the S&L bailout. He has had hundreds of employees doing due diligence work on institutions around the country, and he told me:

> Senator, this bailout is going to cost not the $50 billion, not the $100 billion, not the $150 billion that you were told, it is going to cost $300 billion to $500 billion.

As we watch this unfolding disaster, the administration has failed test after test with respect to the implementation of that cleanup legislation. They have not been able to attract and retain experienced, qualified leaders; a top official has resigned, taking his top deputy with him. Other key positions remain unfilled. When Daniel Kearney, the Director of the Resolution Trust Corporation, resigned, he intimated he was unable to work independently.

In January, the President submitted his budget without honestly indicating the amount of working capital necessary for the ongoing cleanup. More importantly, the President failed to indicate how that money would be raised. Top administration officials have differed over the basic policy questions regarding the Government's takeover policy, the sale of seized assets, and the future of the thrift industry. The political questions of how the ongoing cleanup appears seem to be dominating the current discussion.

Finally, Mr. President, the delays in the cleanup are intolerable. It has taken 3½ months to find a replacement for the top job for the cleanup. Now the administration is demanding immediate action on this nominee. Meanwhile, the cost of the cleanup grows and the public is largely in the dark about what is occurring.

Mr. President, we are truly in the midst of an administration leadership vacuum in the cleanup operation.

The stakes are extraordinarily high. In 1989, the thrift industry experienced record losses—$19 billion. In the last quarter of 1989, thrifts were losing $30 million a day. Over the course of this cleanup, the Government will be forced to make policy decisions in which tens of billions of our taxpayers' dollars hang in the balance.

As I indicated earlier, analysts are now predicting that this bailout may cost from $300 to $500 billion. Let us put that in perspective. The price of this bailout is the single biggest nonappropriations expenditure ever considered by Congress. That is what we are facing.

Now the administration comes forward with this nominee. I had no view on this nominee until I reviewed the transcript and began looking at, number one, the qualifications of this individual for this job, and, number two, his specific responses to questions. I am appalled at what I see, absolutely appalled.

Mr. President, this man has virtually no experience in the financial services industry. He is an outstanding lawyer. As far as I know, he is an outstanding person. That is not the question. This man has no direct experience in the financial services industry. And this is the biggest financial services industry job anywhere in America, anywhere in the world.

Secretary Brady suggests that maybe having no experience is good, that this man would be untainted. Goodness me, goodness me. If we were the board of directors of a major financial services company and we were seeking a new chief executive officer, would anyone seriously suggest that we seek out someone who has no experience in the financial services industry? What is going on around this town? What is happening to basic good judgment?

This makes no sense. If there ever was a case of the emperor having no clothes, this is it. The President has sent us a nominee for the most important financial industry job we have ever had in this country, and the man has no experience? I honestly do not know how this can be taken seriously.

I have to wonder, have we taken leave of our senses? We ought to be seeking out the person in this country with the greatest experience in the financial services industry. That is what we ought to be doing. There is no question about it.

(Ms. MIKULSKI assumed the chair.)

Mr. CONRAD. But, the transcripts from Mr. Ryan's confirmation makes clear that the administration did not propose an experienced nominee. When I was reading this transcript, I noticed that this nominee, who again I state clearly is an outstanding lawyer, with a very distinguished career at the Labor Department and his law firm, is plainly unqualified for this important position. Mr. Ryan himself admitted that he was surprised to have gotten the call from the administration. Let me just read from the transcript. He says:

To be quite frank with the entire panel, I was surprised when I received a call.

It seems to me, Madam President, we should be having somebody take over this job—a job that is among the most critical in our Nation's history with respect to the financial services industry—we ought not to be having a man who was surprised when he got the call. We ought to be getting a person whom everyone in this country would recognize immediately as an expert in the financial services industry, and who is without question a person of unparalleled experience and ability.

That is not what we have. Madam President, I went through the record. I went through and looked at the responses to specific questions. I looked at the reaction of Senators, even Senators who voted for this man.

Senator MACK:

What concerns me, frankly, is that under the very difficult circumstances, you do not have the financial, you do not have the background or the scope of knowledge, if you will, to try to understand what is in fact taking place in the trenches of those financial institutions in the country.

Senator SHELBY, who also voted for him:

After looking into your background, some of which I did not have yesterday, and I did have a nice conversation with you, it appears to me that you would certainly be a candidate for Secretary of Labor, or something like that, based on your experience and background.

However, it is very troubling to me that you have hardly any, if not inadequate experience, in dealing with financial institutions.

Madam President, the transcript goes on. The Senators started asking specific questions of this nominee. Senator CRANSTON asks:

What are your thoughts on deposit insurance reform?

The answer:

I have no specific view as to whether there should be modifications.

Senator WIRTH asked him a series of questions. He asked him:

Should there be any weakening of thrift capital standards?

A pretty basic question, a pretty important question, a question we have debated here on the floor. What was the response of the nominee?

I probably do not have a view on that subject right now.

Well, Madam President, I do not know what could be a more basic question than the question of capital standards. We have had to wrestle with that right here on the floor of the Senate repeatedly, and yet this nominee for the top job has no view.

It goes on and on, Madam President. Senator CRANSTON:

Do you think there is a need for a specialized thrift industry to promote housing?

The answer of the nominee:

I do not have a view on that right now.

Then the Chairman interceded and said:

Did I hear that right, that you do not have a view as to whether or not there should be a thrift industry?

The answer of Mr. Ryan:

I have no view as to whether the thrift industry should move forward or not move forward, Senator.

On and on it goes, Madam President. Questions on the most basic issues confronting those who would run the S&L bailout—and an appalling lack of views on the issues by the nominee.

Madam President, that is not good enough. That is not good enough. We have a solemn commitment to the taxpayers of this country to make certain that each and every dollar that goes into the bailout of the S&L industry is wisely spent, is carefully spent, and goes to solving the problem.

Our first responsibility ought to be to put someone in charge who is clearly qualified by experience and background to be number one, to be the person with the day-to-day responsibility of running this cleanup of the S&L mess.

Madam President, Mr. Ryan does not fill that bill. By his own admission, he does not have the experience, he does not have the knowledge of the basic issues, and he ought not to be confirmed.

If politics were taken out of this and the U.S. Senate were asked: Is this the person, the one who ought to have one of the critical jobs to determine the economic future of this country? Would Mr. Ryan be the one who would be advanced? I think not. Clearly, Mr. Ryan would not be in the running.

Madam President, this body ought to act decisively. First of all, we ought to reject this nominee. Then, Madam President, I believe we ought to devote all of our attention to monitoring the ongoing cleanup of the S&L's. I believe we should enpanel a special investigatory body to oversee this entire unfolding fiasco. We ought to put together the best Members of this body, the ones with the greatest expertise on these issues, these financial issues, and we ought to charge them with full-time monitoring of the S&L cleanup.

Obviously, those who have special knowledge, members of the Banking Committee, ought to be involved. But frankly this goes beyond the Banking Committee. This goes to the fundamental soundness of the American economy. We ought to put our best and wisest heads together to have a complete review of where we are and where we are going.

Madam President, there are many other things that are the business of the Senate. We have budget negotiations, farm bill considerations, and we have just finished the clean air bill. I am certain that all of us would like to come to this floor today and be able to put in a statement, and say amen, now we have a good person. Let us go forward; let us back him. And let us hope we get on with the S&L cleanup.

Madam President, in good conscience, in reviewing the record of this man and reviewing the transcript of the hearing, I am compelled by conscience to stand on this floor and oppose this nominee. It is nothing personal; I do not know the man. I never met the man.

Again, he is clearly a fine lawyer, and no doubt an outstanding person. But he is also clearly not qualified for the position to which he has been appointed.

On that basis, Madam President, I will oppose his nomination.

I yield the floor.

Mr. GRAHAM addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. GRAHAM. Thank you, Madam President.

Madam President, I come to the floor this afternoon with no joy. I come as a person from an executive background who had the responsibility of nominating——

Mr. WARNER. Madam President, will the Senator yield? We are not able to hear very well. I am sure the Senator's remarks would be of interest to the Sentate, as well as to many others.

I thank the Senator.

Mr. GRAHAM. Thank you very much, Senator. I hope they will be of interest and illumination.

Madam President, I come to the floor of the Senate today with no joy. As an executive in my previous capacity, I had the responsibility of making several hundred appointments. I have some appreciation of the challenge which any executive has in persuading, recruiting, selecting, and recommending individuals for difficult positions.

I also have had some experience about the responsibility of an executive who then must educate, must give confidence to, and ultimately persuade another branch of government to confirm those executive decisions.

My presumption, Madam Pesident, is the correctness of an executive appointment. I believe that considerable weight should be given to the fact that the President of the United States has placed his personal reputation behind this nominee.

Madam President, I believe that it is fair to say that the position that I have just stated is one which is broadly shared. As witnessed by the activities of the Senate Banking Committee and the full Senate during the last decade, the predecessor of the Office of Thrift Supervision was the Federal Home Loan Bank Board. During the administration of President Reagan, from 1981 through 1988, there were a total of eight individuals who were nominated for positions on the Federal Home Loan Bank Board. One person was nominated and subsequently withdrew. Of those eight individuals who came before the Senate for confirmation, in every instance, from Richard Pratt, on April 8, 1981, through Roger Martin, July 30, 1987, in each instance those Presidential nominees were confirmed. The U.S. Senate has not had a history of antagonism toward the President's selections in sensitive financial regulatory positions.

Second, Madam President, I come to the floor today with no joy because I believe it is so critical that, as we face this issue, we do so as a nation united, we do so with a sense of bipartisanship, we do so with the recognition that there must be a leader, but that that leader deserves the support of a broad base of Americans.

One of my father's favorite political figures, a Senator who represented the State of my father's birth and the State of our chairman, was Senator Arthur Vandenberg. Arthur Vandenberg was Republican leader in the U.S. Senate during the most difficult years of our Nation's history, in the period prior to, during, and after World War II. It was through the cooperation and establishment of a bipartisan environment and context that much of those things which today we are taking such pride in, such as establishing the Marshall plan, establishing the Truman plan, a strong defense against the advance of communism, and it was the ability to create that bipartisan atmosphere with a leader who could then assert a strong national position that has brought us to the happy results that we celebrate in 1990.

Madam President, we need to have that same sense of bipartisanship, of context with a leader, as we face what will be the "World War II of American economic issues." This debacle of the savings and loan industry is an economic crisis, the likes of which our Nation has never seen before, in its severity, in its downward spiral, and in its ripping effect on the confidence of the American people toward their political leadership.

I ask unanimous consent to have printed in the RECORD a column which appeared in the Washington Post Sunday April 1, 1990, by George Will, entitled "Policy by Polls."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 1, 1990]

"POLICY BY POLLS"

(By George F. Will)

Perhaps Rep. Harold Rogers, the Kentucky Republican, was just joking in the robust, exaggerating tradition of America's middle border. Let us assume so, for his sake. Otherwise he becomes one more reason to doubt Republican's seriousness. What he said was:

"Every statesman in the world over the last four decades, from Churchill to Reagan, has attempted—with millions of troops and trillions of dollars—to free up Eastern Europe * * * and to no avail, until the first year of the Baker administration at State."

That scrumptious specimen of the post hoc ergo propter hoc fallacy (the rooster crows and the sun rises, therefore the crowing caused the sunrise) was contained in a Los Angeles Times report on how bullish Washington is about Secretary of State James Baker. The report contained another illuminating passage.

The scene was a breakfast table around which sat Baker and some congressmen, two of whom, both Democrats, asked: If the Cold War is over, why does the budget not reflect that fact, particularly regarding increased aid for the new democracies in Eastern Europe and poor Third World countries?

According to the Times, "Baker's hazel eyes narrowed. His honeyed voice went cold." And his dehoneyed voice said: "You want to go out and argue for higher taxes to pay for foreign aid? Try that argument out in your district, congressman."

Such swaggering "realism" sends shivers of admiration through some Washingtonians. But the important issue is not whether the congressman can afford, politically, to take that position regarding foreign aid, or whether the country can afford, economically, the aid. Rather, the crucial question is whether the country can afford to have a government that thinks so much the way Baker does.

Baker reflects the president, and policy-by-polls reflects thinness of beliefs. So does the hitching of U.S. foreign policy to foreign personalities, as in U.S. dithering about Lithuania, an unseemly policy of solicitousness for Gorbachev, whose survival is the president's only clear foreign-policy aim. More "realism."

Recently Washington went into one of its periodic seizures of loopiness, and this time the great question of the hour concerned the presidential epidermis: who gets under George Bush's skin. No one does, said Himself, through clenched teeth, when asked specifically about Rep. Richard Gephardt (D-Mo.), the House majority leader. But Gephardt clearly did, by saying things like:

"Harry Truman lived by Sam Houston's maxim: 'Do right, risk consequences.' The maxim of the Bush administration seems to be, 'Do polls risk nothing.'" Truman, Gephardt notes, launched Point Four and the Marshall Plan (the seed of containment, which preceded Baker's thrilling dissolution of communism) when a Gallup Poll showed only 14 percent support for foreign aid.

Americans had long deferred purchases of houses, cars, even clothes, and had shed blood on the soil of nations then seeking aid. And Truman was then more unpopular than Nixon was to be during Watergate. But he would not be a president who "thinks he is too big to do the necessary persuading," so he deserved to be reelected, and was.

Today's popularity-hoarding president may yet learn that such political parsimony is false economy. Speaking of which . . .

We are in the midst of (although perhaps not yet even halfway through) the costliest debacle in the history of American governance. The savings-and-loan scandal is another black hole swallowing a share of our children's standard of living. New losses are much larger than even recently predicted. The eventual cost is unknown (estimates range from $300 billion to $500 billion), but three things are known.

We know that in this decade alone the bailout will, as Sen. Lloyd Bentsen (D-Tex.) says, cost more than will be spent on highways or on the war on drugs or on preschool education.

We know that this diversion of capital from more productive uses will, like the Reagan-Bush deliberate deficits, lower the standard of living, economic and cultural, of coming generations.

And we know that one reason so many billions are hemorrhaging away is that the Bush administration is saving a few millions by scrimping on FBI agents and Justice Department investigators and prosecutors.

The S&L crisis is complicated, silent and slow-motion. It is the sort of murky mess about which there is no focused public opin-

ion. So no polls tell the Bush administration to behave properly. So it doesn't.

Mr. GRAHAM. If I can quote a few paragraphs from that column, Mr. Wills states:

We are in the midst of (although perhaps not yet even halfway through) the costliest debacle in the history of American governance. The savings-and-loan scandal is another black hole swallowing a share of our children's standard of living. New losses are much larger than even recently predicted. The eventual cost is unknown (estimates range from $300 billion to $500 billion), but three things are known.

We know that in this decade alone the bailout will, as Sen. Lloyd Bentsen (D-Tex.) says, cost more than will be spent on highways or on the wear on drugs or on preschool education.

We know that this diversion of capital from more productive uses will, like the Reagan-Bush deliberate deficits, lower the standard of living, economic and cultural, of coming generations.

And we know that one reason so many billions are hemorrhaging away is that the Bush administration is saving a few millions by scrimping on FBI agents and Justice Department investigators and prosecutors.

The S&L crisis is complicated, silent and slow-motion. It is the sort of murky mess about which there is no focused public opinion. So no polls tell the Bush administration to behave properly. So it doesn't.

Madam President, my final source of lament is that I recognize that the action which is likely to be taken today will represent a turning point. It is going to be a nominee likely to be confirmed by the narrowest margin. That action is going to indicate that the opportunity to have an Arthur Vandenberg-Harry Truman alliance to solve this problem is going to be much less likely, more difficult. We, therefore, will not have the context of a bipartisan alliance. We will, however, I suggest, have a clear leader, a person who is now assuming responsibility for this crisis and who will be held accountable for its outcome. That leader is the Secretary of the Treasury.

I am going to comment in a few moments but why I think this nomination has been made. What the consequence of this nomination, if it is confirmed, is going to be is that there will be now, without question, a spotlight of attention on one American who is assuming responsibility for this crisis. I wish him well. Our Nation cannot afford for him to do less than well. It is a responsibility he has decided to shoulder, without the benefit of a Vandenberg environment of bipartisanship.

Madam President, the severity of this situation, as Mr. Will has indicated with such eloquence in his comments, is hard to understate. Let me just give a few statistics from the testimony of Chairman Seidman, Chairman of the FDIC, before the Senate Banking Committee on January 31 of this year. He stated that currently there were 333 failed savings and loan institutions, slightly more than 10 percent of those in existence prior to the commencement of this crisis, which represents $136 billion in assets.

Mr. Seidman pointed out that institutions likely to fail were 225 to 295, with $160 to $200 million in assets. There are a number of distressed institutions, according to Mr. Seidman, 295 to 325, seriously undercapitalized, with $185 to $200 billion in assets. Madam President, that gives you some sense of the extent of the challenge of the crisis that lays before us.

In response to this challenge the administration—the President, Secretary Brady—recommended that there be new institutional structures which could respond to this crisis. And the Congress largely accepted those recommendations and last year created a new position, the position that had not existed previously in American financial regulation, the Director of the Office of Thrift Supervision.

The person who holds this position of Director takes on not one but several responsibilities. He will be the top thrift regulatory. He will have the sole responsibility for regulating all savings and loan institutions. Previously that responsibility had been vested in three individuals who serve as the Federal Home Loan Bank Board, now consolidated into a single individual.

The Director will also sit on the Federal Deposit Insurance Corporation, where he will be one of five individuals overseeing the insurance program not only for the savings and loan industry but also for every commercial bank in the United States.

And finally, he will serve as one of the five members of the board of directors of the Resolution Trust Corporation, a corporation which will eventually handle the disposition of hundreds of billions of dollars of properties, whose decisions will probably have more to do with how much your home in Baltimore is worth, how much a particular community will have available for economic growth, than any other group that has ever been constituted in this Nation.

What is the conclusion of this definition of the job of the Director of the Office of Thrift Supervision? The conclusion is we do not have any time for a rookie at this time. There is no time for a learning curve. There will be no spring training for this job. Opening day will be the first day on the job.

Madam President, this nominee, by his own acknowledgment, is not an expert in financial institutions.

I assume that he has positive qualities, qualities claimed by those who know him and by the administration which has nominated him. If so, it is possible that with a 6-month apprenticeship he could learn the job and develop the qualities necessary to be an effective independent regulator.

But due to the enormous pressures which he will find on the first day, within the first hour of assuming this position, there is no time for a 6-month apprenticeship on this job.

It is interesting to contrast how this position is being treated as was another financial crisis. What we would have a few years ago thought was deserving of a major chapter in a book on American economic crisis, which now unfortunately has paled as a result of some subsequent crisis, was the decline of Constitutional Illinois Commercial Bank. We all remember well the trauma that that decline caused among financial institutions and within the general citizenry.

Madam President, when we had the decline, the conservatorship of Continental Illinois, who do you think was put in to operate that institution? Was it determined appropriate to get someone who was without knowledge of financial institutions or financial matters so that they would be pure, not tainted? Was it considered to be appropriate to get someone who maybe brought the enthusiasm of the beginner to this task? Was that who we thought was the appropriate person to respond to that, what by today's standard would be a medium financial crisis?

No, Madam President. The answer was, in fact, not to send a person but rather to send a team of two persons. Who were the two people that were selected as being appropriate to deal with the Continental Illinois crisis? John Swearingen, the chairman of Standard Oil of Indiana, and Bill Ogden, the vice chairman and chief financial officer of Chase Manhattan Bank. Those were the two people who were considered to be necessary and appropriate to deal with a significant crisis, but a crisis which is overwhelmed, which is placed in the shadows by the severity and the complexity of the challenge which the new Director of the Office of Thrift Supervision will accept.

Having said those comments about the nature of the position and the nature of the qualifications of Mr. Ryan, a question which comes to mind is why has the administration done this? Why did they not select a John Swearingen or a Bill Ogden or a person of that background, of that degree of public confidence building to assume this position?

Several answers have been suggested. Some officials within the administration advance the curious viewpoint that it is Mr. Ryan's lack of background in the financial world which is his greatest asset because he would come to the job with a blank slate. Madam President, I say that is like saying that you are about to undergo complex surgery, but the job is so demanding, so complicated, that we want a person who has never operated before.

Madam President, I point out that this nominee was asked in the Banking Committee about his thoughts on the future of the thrift industry. In response, Mr. Ryan said, "I have no view as to whether the thrift industry should move forward or not move forward."

Madam President, we need a person of vision, a person who brings a sense of judgment to this job, a person who can, with the highest level of credibility, rebuild the shattered confidence of the American people. We need someone who can be a navigator, who can recommend course corrections as we attempt to reach our designation of resolution of this serious crisis.

A second rational for this appointment has been that the field of persons available was so shallow, we were so bereft of candidates that we must accept anyone who is willing to be nominated. I reject that out of 240 million Americans that we cannot find an American of patriotism, judgment, background, and commanding presence who would be willing to respond to the call of the President of the United States to assume this responsibility.

Just to mention a few places that you might consider for such a list, all 50 States have a regulatory system for their financial institutions. There are men and women who have served with experience and distinction in positions, none of which are of the scale of this, but who would have basic concepts as to how to respond to this crisis.

Madam President, the individual who is in the job now, a gentleman who I do not know, but who has been highly applauded for his actions under very stressful circumstances, would himself have been a candidate that I suggest would have been enthusiastically approved by the Banking Committee and by the Senate. If it is necessary to select an intelligent generalist, there are intelligent generalists. A man who I did not know prior to his current service, who I came to know and admire, is the current Secretary of the Department of Transportation, Mr. Sam Skinner. Mr. Skinner, is an intelligent generalist. If a person of that obvious competence had been nominated again, he would have been confirmed with enthusiasm.

Therefore, Madam President, I am left with a third answer to the question of why this nominee. And my answer is that I believe that a basic premise of this legislation has been found to be so unacceptable to the administration, so repugnant in terms of its policy implications, that by this nomination a clear signal is being sent that it is being rejected. What is that principle. It is the principle that although the Congress accepted the Secretary of the Treasury and the President's recommendation to place the Office of Thrift Supervision under the Secretary of the Treasury for supervisory purposes, it was the intention of the Congress to maintain the Director of the Office of Thrift Supervision as an independent regulator. The statute that was passed by the Congress last year stated autonomy of the director. The Secretary of the Treasury may not intervene in any matter or proceedng before the Director of the OTS unless otherwise provided by law.

That frankly, Madam President, was not as strong as I would have liked. I agreed with the position taken by the ranking minority and former chairman of the Banking Committee, the Senator from Utah who would have preferred, as I would have preferred, a clearly independent Office of Thrift Supervision, not under the umbrella of the Treasury. Unfortunately, Senator GARN and others, such as myself, who supported that position did not prevail. 0

But the language that did prevail was a clear indication that we felt it was important to maintain an independence of perspective. This is not just a matter of public administration of interest only to those who draw organizational charts, Madam President. The reason it was considered to be critical to maintain some independence is because there has been a history of antagonism between those institutions responsible for housing and the Treasury.

Housing, Madam President, more than any other activity in this country, is sensitive to the cost of money. Therefore, it has been a key function throughout the 50-year history of a strong Federal role in housing to try to keep the cost of housing, and particularly the cost of financing housing, as affordable as possible, so that millions of American families would have access to a home in a decent community. As a result of that, we are the best housed society in the history of the Nation.

Throughout most of that 50-year period, during both Democratic and Republican administration, there has been a tension with the Treasury whose macroeconomic perspectives and responsibilities have frequently run in conflict with the goal of affordable housing. I believe that what we are seeing now is the final triumph of the Treasury over the goal of an affordable home in a quality neighborhood for the families of America.

I asked Mr. Ryan a question during the hearing, Madam President, which I have found in the past to be illuminating. And that is when you get into a tough problem, when you have to seek advice and counsel, who do you talk to? Who do you find to be someone whose judgment in which you are prepared to rest considerable confidence? I asked that question of Mr. Ryan and this was his answer:

> I would say at the top of the list would be Chairman Seidman. * * * I would like to add also, I have been very, very impressed with the willingness of Secretary Brady and the Deputy Secretary, Mr. Robson, to meet with me, to discuss anything I would like to discuss at any time, just as the members of this panel have expressed.

Madam President, it concerns me, when asked who you would go to for counsel and advice, that two of the three people are from the very institution from whom you are supposed to be independent. That sends a clear signal to me that we are about to have a single leader of this enterprise, and that leader is the Secretary of the Treasury. I believe that housing for American families will suffer as a result of that decision.

Madam President, in conclusion, we stand at a critical turning point in the most serious economic crisis in our Nation's history. It is a time in which I think we need a broad avenue of common understanding and bipartisan support. We need placed on that avenue individuals of unimpeachable character, judgment, wisdom, of the ability to rally the American public to accept very difficult decisions, including, as Mr. Will has suggested, a decline for the next generation in our standard of living as we make the difficult diversions of resources to pay for this crisis.

I do not believe that Mr. Ryan meets those standards. He certainly does not meet them on April 4, 1990. Therefore, Madam President, I will vote not to confirm Timothy Ryan as Director of the Office of Thrift Supervision.

Should he be confirmed, I wish him well, and so do all Americans. He will need all of the good wishes, prayers and support that he can achieve. I wish the Secretary of the Treasury well as he accepts the responsibility.

I wish it could have been otherwise. I believe it could have been otherwise. I believe that when, not the current chapter 9 or 10, but the chapter 25 or 30 of this circumstance is written that it would have been a happier chapter had it been otherwise. But should this nomination go forward to confirmation, so be it.

Madam President, I urge all of my colleagues, whatever the result of this, to try to bind ourselves together to see our responsibility as Americans, to see our responsibility to rebuild the confidence of the American people in their political leadership, the essential commitment to what is in their interest and the willingness to make the difficult decisions to move through this crisis, a crisis for which there will be few heroes and many victims.

Should Mr. Ryan be confirmed, I urgently hope that he will be a hero and will not add to the already too long list of victims of this financial disaster.

Mr. WARNER. Will the Senator yield for a question?

Mr. GRAHAM. Yes.

Mr. WARNER. First, I thank the Senator that he hopes he will be a hero, and I presume he would predicate that hope on the man who has a job to do and his qualification to do that job.

My question goes to the following: OTS has the basic responsibilities of setting the standards and enforcing standards. Mr. Ryan, in his various capacities at the Department of Labor, was noted for his ability to enforce the laws of the Department of Labor.

I bring to the Senator's attention page 22 of the report filed by the majority, signed by the Senator, in which the report states, "With respect to his commitment,"—his, being Mr. Ryan—"to pursue the perpetrators of thrift fraud, we do believe Mr. Ryan has demonstrated the comprehension and vision we believe a nominee should have."

So I point out to my good friend, does he concur in that finding in the report?

Mr. GRAHAM. First, as to the premise, Vince Lombardi was an outstanding football coach and demonstrated great ability to rally his players to high levels of success. I do not believe, however, that if Vince Lombardi had been nominated to be Director of the Office of Thrift Supervision that we would have looked at his football record as being conclusive as to his ability to carry out this task. The fact that you have been successful—and I will assume without further analysis the premise of your statement that he was successful in his previous position as lead attorney in the Department of Labor—that fact does not mean that he would now be able to transfer immediately that success to the responsibilities of the Director of the Office of Thrift Supervision.

Second, as to seeking out those who have committed criminal acts that contributed to this, that is a very important function. I am pleased that Mr. Ryan is prepared to give his full support to that. I would point out that that is primarily a responsibility of the Department of Justice, not the Director of the Office of Thrift Supervision.

I hope that one of the first steps that he would take as the Director, after he emerges from this mass of decisions that he is going to have to make the first day on the job, would be to place a call to the Department of Justice and maybe read to them the appropriate sentences from Mr. Will's column in which he stated: "And we know that one reason so many billions are hemorrhaging away is that the Bush administration is saving a few millions by skimping on FBI agents and Justice Department investigators and prosecutors." Mr. Will is right. Mr. Ryan, should he have the opportunity, would do the President and the Nation a good service by pointing that out to the Department of Justice and the President.

Mr. WARNER. Madam President, I thank my distinguished colleague. I had the privilege of knowing Mr. Lombardi. I have spent a great deal of time in this area. I am a fan of the Washington Redskins.

If the Senator wants to put two names together, and it is Vince Lombardi and Timonty Ryan, as George Will described, who some think is the Oracle of Delphi, well and good. I just cite the majority committee report which states, "With respect to his, Timonthy Ryan's, commitment to pursue the perpetrators of thrift fraud, we do believe Mr. Ryan has demonstrated the comprehension and vision we believe a nominee should have."

I thank the Chair and thank the Senate.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. Madam President, I am here in support of the nomination. I have been listening to the debate on this subject. The debate seems to have cast a good deal more heat than light on the problem that we really confront here today.

I think the problem that we confront is not just the issue of whether this nominee is the best candidate for this job. Certainly, we can disagree on that issue. But, we can agree that America is facing the single largest financial disaster in our Nation's history.

I do not think any Senator with respect to any nominee can be certain that the President's choice is the absolute "best." Best is a subjective word. We can probably each think in our own minds of somebody who might be better. But we can be certain that as this debate rages on, the savings and loan industry is racking up losses at the rate of almost $30 million a day. That is more than $1 million every hour.

We can debate the importance of this nominee's job. But we should be debating, also, how well Congress has done its job. As the cleanup of the thrift industry drags on, I think we should ask ourselves, "Has Congress done everything it can to speed things up? Have we given the Resolution Trust Corporation all the tools it needs?" Have we in Congress taken every step possible to reduce the cost to the taxpayer? Let us debate these questions.

I asked the question, "Have we done all we can to reduce the cost of this crisis?" I am going to give a direct answer, Madam President. The answer is "No." Let me provide just one example.

Last year, during the debate on the savings and loan bill, I sponsored an amendment designed to significantly reduce the cost of this bailout. The amendment put the taxpayers of this country at the head of the line in getting money back from crooked S&L managers and others who stole federally insured deposits. The amendment gave the Resolution Trust Corporation a priority in court when it sued to recover money from those who treated a federally insured thrift like a personal piggy bank. When it came to digging into the pockets of crooked management, my amendment said: Let the taxpayers reach in first.

Madam President, when the Resolution Trust Corporation takes over an insolvent S&L, it will sue to recover the losses from officers, directors, and others. However, today, shareholders and other creditors can race to the courthouse before the Resolution Trust Corporation. They can then get a judgment against these crooks. They can take all the money out of the pockets of these crooks and wring their wallets absolutely dry. When the RTC shows up, all that is left is an empty bag. Even if the race to the courthouse is a tie, shareholders' claims will compete with the Resolution Trust Corporation for the limited amount of money that can be gotten back.

What my taxpayer priority amendment ensured was quite simply that taxpayers always win. They deserve to win. Under this provision, when others race into court, the Resolution Trust Corporation can put these other claims on hold. This would allow the Resolution Trust Corporation to collect on its claims first on behalf of the taxpayer. Once the RTC recovers its losses, others can divide up what is left.

Madam President, this provision, I am pleased to say, was adopted here in the Senate, but it was rejected during the course of our conference with the House of Representatives. It, therefore, has not become law. It ought to be law. I want to take this occasion to put my colleagues on notice that the Senate not only needs to revisit this issue, but we will revisit this issue, and soon.

The Banking Committee is holding a series of oversight hearings on the pace and cost of dealing with the S&L crisis. There are already indications that there are elements of the S&L bill that was passed, not yet a year ago, that may be hampering, not helping, the Resolution Trust Corporation to do its job.

I, for one, am convinced there is certainly more than one change that needs to be made. I intend to pursue any legislative recommendations from the Resolution Trust Corporation which are needed either to help the RTC do their job or to protect the taxpayers.

So, before we spend any more time debating other jobs, it is this Senator's view, Madam President, the Congress should be certain that we have done our job. And, our job is to clean up this mess as quickly and as cheaply as possible.

I hope that the energy that is expended here today on this nomination is just a small fraction of the energy that we will expend in the future, as a Senate, and as a committee, to make sure that the costs of the resolutions that must be done are minimized to the very greatest extent that we human beings here in this legislative body can devise.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Madam President, as a number of my colleagues have already commented in the course of the debate, it is given on both sides of the aisle that there really is no more critical issue that faces the country right now in economic terms than the savings and loan crisis.

I have listened carefully to the comments, both within the Banking Committee, as well as on the floor.

I have commented to the very distinguished Senator from Virginia and my good friend that if ever I am in need of an ally, I would certainly want to have him on my side and fighting for me because he does it well and knows how to do it. On this nomination, however, I guess we just agree to disagree.

Last year, the savings and loan industry had, as we know now, as a matter of record, the worst year ever in its history; losses of over $19 billion. That is a loss of nearly $6 billion more than the year before. There were 485 institutions that had losses from operations of $2.6 billion in the last quarter alone. Now we are being told that it may cost an additional $200 billion to close the ailing S&L's and protect depositors. That is just those that we decided to close.

There is, obviously, enormous concern about S&L's that are supposedly healthy. It has been reported that in the fourth quarter alone, 581 institutions that had not been scheduled for Government seizure had a total loss of $1.3 billion. As each day passes, we know that this bailout process is dragging on and it is costing the American taxpayer more and more dollars.

Madam President, we expedited this process last year. We were asked by the President to expedite it and, indeed, the Banking Committee moved as rapidly as possible.

I must say that months have dragged on since then, that positions have not been filled, that we have not even been asked to confirm individuals for the important posts that were created in order to expedite this bailout.

It was my perception and the perception of colleagues at the time—I remember being here at 2 or 3 in the morning last summer when this bill was passed where many of us were looking for a way to vote against it because we thought it was not the kind of structure that in and of itself lent itself to the best form of bailout. And, indeed, as we come here today to debate the extraordinarily important position of the head of the OTS, we find that the RTC itself is woefully underfunded and the entire savings and loan bailout bureaucracy is plagued by a lack of coordination and in-fighting. There are disputes over how to raise the working capital, and these disputes have dragged on for months. There are turf struggles going on and there is significant red tape that has discouraged investors from purchasing S&L's. Perhaps worst of all, a number of positions remain unfilled.

Madam President, it is hard to describe the degree to which some of us feel this particular position is elevated in importance as a consequence of that list that I just enumerated of problems within the bailout process. I do not have to review, obviously, the importance of the OTS chief regarding the commensurate duties as a member of the board of the FDIC, the RTC, and so forth.

It seems to me that if you have a crisis as significant as this one is—this is the largest expenditure by the President of the United States in budget terms. We have not passed a program, with the exception of individual budget sections, if you divide the budget of the United States up so you have the defense budget of some $290 billion, or you have the entire entitlement section of our budget. Those are the only two gross expenditures that even come close to the magnitude of expenditure we are discussing here.

We are not just talking about it in the normal course of business in this country. We are talking about it under extraordinary circumstances where businesses are failing, banks are failing, people's jobs are being lost, and all the time the American taxpayer is being called on to finance the bail out to a tune of billions of dollars more than people ever anticipated.

We are talking about the soundness and safety of our own economy. And have we turned to a Walter Wriston or to a Bill Simon or to countless other extraordinary people in finance and in troubleshooting and in making large institutional decisions? No; we have turned to somebody whose total managerial experience is summed up as the solicitor of the Labor Department, and a member of a committee that manages a large law firm.

I find it absolutely extraordinary, just as a matter of common sense, that that is the best the President of the United States can find to deal with one of the most significant issues this country faces right now. It is not a question of whether or not Mr. Ryan is an honorable fellow or whether or not he is qualified. There are countless positions in Government for which he is qualified, countless positions in Government for which this Senator and many others would readily and quickly vote for him as a matter of confirmation. But how can you take the most significant economic issue that we face and have somebody who is going to come in and begin a $30 million-a-day job training program, the most expensive job training program I think on an individual basis ever created in the history of this country.

I cannot believe they could not find somebody with the experience and skill in finance and other matters that totally avoids any problems of conflict of interest in order to deal with this issue.

If anybody wants to look for the real evidence that lays open the question of whether or not this fellow is prepared for this job, you do not have to look to words of Democrats or Republicans who might oppose him. You can look to his own words, to his own hearing, and to the answers he gave to questions.

I know some of those answers have already been discussed on the floor today, and I am not going to go through every single one of them. But consider one as essential as the one on capital standards. One of the things that we discussed at great length was what the capital standards should be: Weaker, softer, stronger? Do you give these banks more time? Do you not? How much is fair? We decided on tough capital standards, standards that we knew would close certain thrifts in this country.

Mr. Ryan was asked: "Do you think there should be any weakening of the thrift capital standards?" And his answer was:

> I probably do not have a view on that subject right now. My sense is that the system that is set up, although it appears to many to be very tough, appears to be reasonable.

So here is a man who does not have a view as to what capital standards ought to be even though that those standards are integral to the very system he has been nominated to clean up.

On housing and the savings and loan industry, Senator CRANSTON asked him: "Do you think there is a need for a specialized thrift industry to promote housing?" His answer was:

> I believe there will always be a need or someone to offer residential mortgages. I'm sure that service will come from some part of the financial services industry. I've been asked the question during the past 3 weeks whether I have any view, and I do not have a view on that right now.

So he has no view on the subject of housing in the thrift industry. The chairman questioned him further on

that. On oversight of the sale of securities, Senator WIRTH asked him:

You know that some stand-alone thrifts offer their own securities. You are familiar with that. Who, in your opinion, should, if there is a stand-alone thrift—not a holding company but a stand-alone thrift—who ought to be regulating those securities?

Mr. RYAN. I have no view on that right now, Senator. I have not given that any thought. I have not looked at the pluses, the minuses. I have not looked at the issue. So, unfortunately, I just do not have a view on that.

Obviously, no one is going to be able to accuse Mr. Ryan of being too opinionated in coming to this job. The fact is he does not have views on the basic issues that confront this industry. And it is not, Mr. President, just an issue of financial experience. It is not even having the requisite management experience which permits you to approach this in a way that would remedy some of those other obvious gaps in opinion.

I mentioned the two management positions. He is not the managing partner of his law firm. He is on a committee that manages a law firm. As a lawyer who has managed a large law firm; that is, a district attorney's office, I have to tell you I think there are very different management skills necessary in the management of that kind of organization or similar organizations and what you are looking for with respect to this particular financial crisis.

Mr. President, I would like to share a couple of quick other responses, and then I will yield the floor.

Mr. Ryan suggested that over the last few weeks he has spent a lot of time trying to educate himself on this. He was asked by the chairman of the committee, Senator RIEGLE, regarding his experience, and he said, and I quote from page 66 of the committee testimony:

I can tell you that in the last 4 weeks I have spent an enormous amount of time trying to educate myself, and hopefully I will give you a glimpse today I am a quick learner.

Mr. President, this is a crisis involving billions and billions of dollars, and the American people do not deserve someone who is coming to the job with 4 weeks of reading and educating in order to qualify for it.

He was asked by Senator RIEGLE whether he was fully qualified for the job. I am reading partway into his answer. He says:

Absolutely.

But then he says:

I don't think I would say it with the same conviction 3 weeks ago.

So here is a man who could not have said 3 weeks ago that he is prepared to deal with the Nation's number one crisis, but after talking to a few people, he is prepared to come in and deal with it.

I asked him what he would do about the immediate outflow of deposits from the savings industry, which is a major problem, and he said:

Well, my intention during the first week after I am confirmed, should I be confirmed, would be to ask the district directors from around the company—

I believe he means country—

to come in and spend time with me. I would like to review with them.

So we are going to have a process of review while we go through a process of learning. The outflow of deposits should be one of the issues most rapidly addressed by somebody who knew what they were doing.

Finally, Mr. President, as we all know, this is going to be the largest real estate holding and transaction company in the United States—massive of real estate to deal with, massive workouts.

Mr. Ryan was asked about his experience with workouts, and I quote from page 150:

And at least by experience with workouts in troubled real estate, which as I said before is limited, but I've had a glimpse.

So, Mr. President, the question is whether the Senate is prepared to turn over to an individual who has had a glimpse of major responsibility as a member of the board of the RTC and as the thrift supervisor for an industry, the entire life cycle of what today has become a process of troubled real estate workouts.

I really believe, Mr. President, that the President of the United States could have done better. I believe that the Senate has a responsibility to see to it that we do better, and I hope that the Senate will reject this nominee.

I yield the floor.

PROVIDING FOR ADJOURNMENT OF THE HOUSE AND A RECESS OR ADJOURNMENT OF THE SENATE

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Senate, as in legislative session, proceed to the immediate consideration of House Concurrent Resolution 299, an adjournment resolution now at the desk.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

A concurrent resolution (H. Con. Res. 299) providing for adjournment of the House from April 4, 1990, to April 18, 1990, and a recess or adjournment of the Senate from April 5, 1990, or April 6, 1990.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 299) was agreed to.

Mr. RIEGLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. FOWLER). The Senator from Pennsylvania, Mr. SPECTER.

Mr. SPECTER. I thank the Chair.

Mr. President, I support the nomination of T. Timothy Ryan, Jr., to be Director of the Office of Thrift Supervision.

The situation is at a critical stage, Mr. President, with a decision by the U.S. District Court for the District of Columbia holding unconstitutional the current appointee for the position. I believe it is important for the Senate to act promptly and confirm Mr. Ryan. I believe Mr. Ryan to be qualified to hold this position.

I have followed the events before the Banking Committee. Since I do not serve on that committee, I decided to have a meeting with Mr. Ryan to review his credentials and to talk to him about his own background in the position and how he would handle the position. Based on that meeting, which occurred earlier today, and my discussion with my colleagues who know Mr. Ryan and who serve on the committee, it is my judgment that Mr. Ryan is qualified for the position.

I note that Mr. Ryan has an excellent academic background, a graduate of Villanova University, a graduate of American University Law School, that he has worked in the profession, that he has held positions in very prominent law firms, is now a partner in Reed Smith Shaw and McClay, that he has an outstanding work record as a lawyer, that he served as Solicitor for the U.S. Department of Labor, that he was an adjunct professor at Georgetown University Law School, that he took on key responsibilities in the Bar Association, where he was the vice chairman of the administrative law section, that he has written extensively on legal subjects, and that he served as a member of the Overseas Private Investment Corporation.

To review Mr. Ryan's résumé, for a man of 44 years, it is obvious that he is highly intelligent, that he is a well-qualified professional, and that he is a doer.

When I took a look at some of his activities as they related to the financial and commercial world, I noted that he has 10 years of experience in providing advice to investment management, investment banking, commercial banking, trust departments, and to large pension plans. While I did not discuss with him in detail the specifics of the job for which he is being

considered, it was my judgment that he had the kind of background which gave him sufficient familiarity with these issues that he could pick them up.

As I have stated earlier, I believe it is obvious that Mr. Ryan is a doer. He has done a great deal in his professional life, and I believe he can tackle the issues at hand and do a job.

When I heard some of the questions raised about lack of answers, I do not consider it to be an infirmity at all that a nominee is not in the position to answer a great many policy questions at this time. The question is whether he has the background and capacity to move and to respond to these issues.

Mr. President, I was especially impressed with his legal writings, because, having written some for the legal journals myself, I know that it is time consuming, it is technical, it requires a good bit of work, and it is the sign of somebody who is willing to exert himself or herself. He has written a series of articles, one on conveyancing of urban transportation properties, a second as a coauthor on obligations of government contractors with respect to disabled veterans, a third on hepatitis as an occupational hazard for health care personnel, a fourth on the solicitor's views of the Labor Department on widely divergent subjects, which I think shows the capacity to tackle complex subjects and to do a job.

Mr. President, one of the attributes that I found in Mr. Ryan that I consider expecially important is a commitment to do a job on criminal prosections for those who have committed fraud or otherwise violated criminal laws of the United States. And from all indications, the industry is rampant with such matters.

Mr. Ryan is a litigator. He has been in court a great deal. He already has plans for retaining experienced criminal lawyers to pursue this line. I believe it to be a very, very important line.

It seems to me that criminal prosecutions ought already to have been brought in this field. I asked Mr. Ryan whether any had been, and he said he knew of none, but some were in process. I believe that when you deal with white-collar criminals in savings and loan—that is a field uniquely suited for the occurrence—and when violators are prosecuted, convicted, and imprisoned, it tells other would-be violators that crime does not pay.

I think back to the criminal prosecutions of the antitrust laws many years ago when Judge Gainey, operating out of the U.S. District Court for the Eastern District of Pennsylvania, imposed criminal sentences on the antitrust violators. It has a very profound effect. I believe that tough criminal prosecutions in this line would similarly have a profound effect.

Mr. Ryan committed himself to undertaking that with determination and with gusto. I think that his background as a lawyer, as a litigator, puts him in a very good position to do just that.

It is worth noting that there are some civil remedies that Mr. Ryan would be able to undertake without reference to the Department of Justice, where he could control them, perhaps some civil remedies under RICO, where there could be very a strong litigation showing which might establish the factual basis and a very prompt line for criminal prosecution.

Mr. President, there is one other aspect of the Ryan nomination which I think is worthy of comment. That is the information relating to his having accurately and truthfully answered questions about prior marijuana use and the use of cocaine on one or two prior occasions. I have noted these reports in the media, and I asked Mr. Ryan about them. He responded that the information was called for by the questionnaire, and he answered the questions factually and truthfully, which is important evidence of character. He said, beyond answering the questions in the questionnaire, he then took the matters up with the White House because the whole matter was on a fast track. He wanted to be sure that they knew about it so that, if they had any reluctance in proceeding with the nomination, they could act on it.

Beyond indicators of character, Mr. President, I think that it is important that a focus of attention be made on this, as expected, so that there is a public judgment that occasional marijuana use in the far distant past and a concession of having used cocaine once or twice is not a disqualifier.

I note that the National Institute on Drug Abuse conducted a survey which resulted in an estimate that some 65 million Americans have tried marijuana and 21 million more have used cocaine at least once in their lives.

It would be preferable, Mr. President, in an ideal world that people not use marijuana, which is against the law, people not use cocaine, which is against the law, but it is an unpleasant fact of life that there are millions who have. I do not think it is realistic or fair or just to have an absolute disqualifier from public trust positions because of that.

This matter came into public view in 1987, when Judge Ginsberg, of the Court of Appeals for the District of Columbia, was nominated to the Supreme Court of the United States. There was a question about marijuana use.

Speaking for myself, I was sorry that Judge Ginsberg withdrew from consideration on that. I am not sure how that would have come out. But I think it might well have been that he would not have been disqualified on the basis of that aspect, although it was different with Judge Ginsberg. It was perhaps more frequent. It was at a later stage in his life when he was a professor of law. So it might have been at a different point.

But I think this nomination of Mr. Ryan gives us an opportunity for this public comment, and I compliment the administration and the President for being willing to take on a tough issue like this one and to put the imprimatur of the nominator that this is not a disqualifier. I think that this has very important ramifications for the future.

Mr. President, I have attempted to be brief although I do not know that any other Senators are waiting to speak.

Mr. WIRTH. Mr. President, we are moving in on a vote here, and I guess the vote will end up to be about 60 votes for and 40 votes against. It may be a little closer than that.

You might wonder why is it that many of us opposing the nomination are appearing to stand up and talk about it since it is a foregone conclusion, or appears to be. I think for many of us it is absolutely imperative that we do everything that we can to make sure that the American public understands what is going on here. The American public ought to be watching this, and I think they are.

The American public ought to be aware of what has gone on, as described accurately this afternoon, the most extraordinary financial problem this country ever faced, and the greatest financial scandal we have ever faced, costing $1,000 a person, at least. More than Marshall plan, probably twice the amount of the Marshall plan, for which we get nothing but a lot of reclaimed shopping centers; more than is being spent on highways and infrastructure in the next decade.

This is an enormous problem and the public ought to know as much about it as possible, and they ought to know the disgrace we are about to perpetrate this afternoon on the floor of the Senate. We are being asked to confirm somebody who has no expertise in this most important problem facing the country. Quotes have been made over and over and over again on the remarkably lukewarm reception of Mr. Ryan, who I am sure is a perfectly nice fellow. I shook his hand on the way in the committee room. I have not met him otherwise. But the reaction to him on the committee was about as lukewarm as any response I have seen in 16 years on Capitol Hill.

We have heard today rationales as to why to vote for him; because he is a good lawyer. Well, it is nice to have a good lawyer, but this job is not one

which requires somebody who is a lawyer, whose job it is going to be the administrator of tens of hundreds of billions of dollars of assets and deal with complicated problems concerning financial institutions.

We have been told to vote for him because he is honest. Do people expect we are going to have dishonest candidates brought forward by this administration? Anybody that the administration comes up with would be honest. I am sure they would not make the argument, vote for him because he is dishonest, or do not vote for him because he is honest. Certainly that is not a fundamental argument.

Vote for him because he is not an expert. That was the thrust of about 20 minutes of argument, because look what they brought us. Vote for him because he is not an expert. What are we coming to at a time when this is the single most important issue that we are facing?

The purpose of all of this debate is not to cast blame in this or point fingers. There is plenty of time for that. As Senator GRAHAM of Florida so accurately pointed out we are in chapter 4 or 5 in a 30-chapter book. This will go on for a long period of time, and we are not here today to talk about blame. There is a lot of blame and a lot of rationale for this.

What happened when the price of money was deregulated in the 1970's? Then Garn-St Germain came along in 1982. Regarding interpretations of the legislation, how Garn-St Germain was carried out by the regulators, a point was made at great length and eloquently by Senator GARN. There was a laxity in the mid-to-late eighties. The Reagan administration was scrambling to get out of town in 1988, before the roof fell in. There are going to be all kinds of areas where we can point fingers. That is not the issue here. The issue is not to point fingers.

The issue is to try to resolve this issue and there ought to be a sense of urgency. To stop the hemorrhaging that is going on, we have to have a sense of urgency, and where is it? The S&L legislation was passed rapidly by the U.S. Congress of the request of the administration. It was passed in August 1989. The appointment that we are considering here has been vacant since early December 1989.

I suggest to you that one of the problems that we are seeing here, among many in this appointment, is a very clear lack of urgency and lack of sense of direction by the administration in dealing with this terrible crisis.

For example, this job has been open since Danny Wall told the administration on the first or second of December that he was going to resign. We did not get a nominee or a suggestion of a nominee until 10 days ago, which the chairman of the Banking Committee moved right away. It took 3½ months to send a name up for the most important job in finance institutions in the country.

What are other examples of that lack of urgency? The Federal Housing Finance Board, whose job is twofold: One, to oversee the 12 Federal Home Loan Banks and second, to administer an affordable housing program. The Board was created in the administration's legislation which we passed in August.

That Federal Board has five members, but no member has been appointed. The Board had an Acting Director, and the administration announced that the Acting Director was not going to have the job. What is going on there? Lack of urgency? Absolutely.

Regional advisory committees. Under the legislation, Mr. President, a number of regional advisory committees were required, and how many of those regional advisory committees spots have been filled? I bet we cannot name two, Mr. President. Maybe five, but I would be surprised.

The whole pattern of how the administration is dealing with this issue is one of, I would say delinquency. Certainly, no urgency and no sense of crisis regarding what the American people are going to be paying for this crisis.

The final insult in all of this is that the American people know something is wrong out there. There has been criminal wrongdoing. The American people know that. We all know that.

The question is, how are we going to unearth it, find it and make sure, as Senator DIXON said earlier, that the people who were the perpetrators of this criminal activity are involved with bread and water and not savings and loans. What do we find the administration is doing? I will quote from the American Banker of the 27th of March.

In the stinging indictment of the government's efforts to clean up the savings and loan industry, Representative Doug Barnard of Georgia, criticized the Bush administration's decision to spend only $50 million to investigate the S&L fraud, instead of allocating the $75 million mandated by Congress under the thrift bailout law.

I ask unanimous consent the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From American Banker, Mar. 27, 1990]

BARNARD BLASTS ANTIFRAUD EFFORT

In a stinging indictment of the government's efforts to clean up the savings and loan industry, Rep. Doug Barnard Jr., D-Ga., criticized the Bush administration's decision to spend only $50 million to investigate S&L fraud, instead of allocating the $75 million mandated by Congress under the thrift-bailout law.

"This question of spending another $25 million must be weighed against the hundreds of billions of dollars that the S&L debacle will cost the taxpayers," Mr. Barnard said at a hearing of the consumer affairs subcommittee of the House Government Operations Committee.

Mr. Barnard said the lack of funding has meant that 1,298 cases involving fraud and embezzlement of amounts exceeding $100,000 are inactive because the Justice Department lacks personnel to carry out the investigations.

Justice Department spokesman Douglas Tillett responded by saying that $50 million was handed over to the department in December, "and since then we've put every nickel into the field." He also said it was "a little naive" for Mr. Barnard to expect a significant number of arrests by March.

Mr. WIRTH. Given that the administration has the resources to go in and investigate this, and in the most insulting way they are coming back and saying, we are not even going to allocate the resources for the FBI investigation of these activities. Again, there is no sense of urgency.

Mr. President, I suggest to you that what is going on here, and what is going on with this particular appointment, is a pattern of what we are seeing too much of in the last year and a half. The administration has a concern not about governing, a concern not about the stuff of Government, a concern not about taking care of their constitutional responsibilities, and getting them fulfilled to meet the needs and fears of the American people, but rather a process of getting reelected. That process of getting reelected is obviously being successful and high in the polls, but it is hard to see any substance involved in that.

Let us contrast this time, which is a time of enormous watershed in our Nation's history, let us contrast it with the previous watershed time. We have just had some remarkable events around the world. The Berlin Wall has fallen. Central and Eastern Europe are moving toward democracy very, very rapidly. There are forces at work in the Soviet Union. It is slowly but surely changing its character and falling apart as an empire, as it was known in the last 45 years. There are extraordinary changes in South Africa and an amazing election in Nicaragua. This is a time of huge watershed in the Nation's history that comes with great opportunities.

When was the last time we had an opportunity like this? The last time was shortly after the Second World War, another major watershed in our Nation's history in which the country faces a whole series of new challenges.

Harry Truman and the people around him faced the new challenges and had a couple of choices. They could have governed by poll. They could have said what we are going to do is take a poll of what the U.S. role around the world is going to be and act on that poll and done a popular thing when this question faced them, what we are going to do in terms of our presence around the world and

then take into consideration the threats from the Soviet Union from 1945 through 1948. For a war weary United States that would have been the easy thing to do. Take a poll: Should we keep a presence around the world or should we bring the troops home? I bet you the overwhelming poll of the American people was bring the troops home. But a policy of containment was forged by Truman, Acheson, and company and it was successful, but it took political courage.

A similar sort of thing happened with the Marshall plan. We could have taken a poll in 1947 that said: Are we going to help rebuild Europe? Are we going to help the vanquished? Are we taking scarce national treasury from a country war weary and invest that back in Europe? If Harry Truman and company took the poll for the express purpose of getting reelected, overwhelmingly that poll would also have said do not make that investment.

We kept the commitment around the world. We made that investment and the return to the American people has been beyond our wildest dreams. Courageous steps were taken doing the right thing in terms of governing and the right thing in terms of meeting our responsibilities.

We are at another watershed today in 1990. The changes that I enumerated earlier are familiar to all of us. You just watch television every night. There is one remarkable happening after another. The opportunities and challenges we now face going into the last decade of the millenium in the opportunities and challenges we now face suggest also are going to demand a kind of courage, a kind of conviction, and a kind of direction, not a kind of poll-taking approach to American Government.

Look at the issues that we face. We are burdened by this extraordinary debt. Are we going to have the courage to belly up to it or are we going to sweep that under the rug and pretend it is not there?

Pretending it is not there, the President told us in his State of the Union Message if we follow the current economic course the deficit would go away in 3 or 4 years. If the deficit goes away in 3 or 4 years, with the current economic policies, ALAN DIXON is going to vote for this nominee.

It simply is not going to happen. We have to focus as has been said by a number of members of the Budget Committee not to read my lips but to admit the fact that we have a $300 billion budget debt and we are going to have to admit that, face it, take the appropriate steps that have to obtain on revenues and entitlement reform. It is not going to be done if we take a poll. There is not a constituency out there for it. It has to be courageous leadership, and the President has to do the right thing and not focus on the reelection process.

A similar phenomena is happening on the environment. The world is changing. National security is now defined in relationship with the environment, not a relationship with the Soviet Union. That is going to demand significant and courageous decisions, not poll taking.

Education investment in the young: The fact is we are going to have to do that or our competitive position around the world is going to continue to erode. That demands investment and tough decisions, not poll taking.

We must move the defense budget. It is now $300 billion a year. The norm since the Second World War had been about $220 to $225 billion a year. That is a cold war norm. We are now at $300 billion, and the cold war is over.

The suggestion to you is we ought to learn a little bit from history and bring the deficit down despite the pressure not to do so.

I am a firm believer that this President has very good instincts, but the agenda is a political one on polls, getting reelected, fiddling while Rome burns, and this is a perfect example of that.

We are about to appoint someone who does not know anything about this, a perfectly affable person, I am sure, a good politician. These are nice things to have, but not someone who is going to have the toughness or exhibited any sign that he knows anything about this industry and the decisions that are going to have to be made.

Earlier this afternoon the minority leader—I was in the chair at the time—said that it had been alleged that the majority on the Banking Committee had decided before the hearing what the decision was going to be on Mr. Ryan. He said that is a first.

That is just an incorrect statement. I can assure you that the members of the Banking Committee, nobody I knew of ever heard of Mr. Ryan. We went in there fully prepared to have a capable candidate come up and answer a variety of questions and move through with the sense of urgency I think that is shared by almost everyone on the Banking Committee. We sat and listened not prejudging the situation.

I will tell you the enthusiasm of members of that committee started high, saying we are going to move, we are going to confirm the administration appointee. The enthusiasm started up high here and you could feel the air go out of the balloon as the hearing went on.

And what did we get? When he was asked, I asked him about capital standards. No single item is more fundamental to the decisions made by the S&L industry. Capital standards mean the people who own and run the S&L have capital of their own at risk. One of the problems that existed before was there were a whole variety of S&L's operating effectively with little or no private capital at risk at all. If people do not have private capital at risk they can use anybody's money and responsible behavior does not follow. Strong capital standards were essential, a fundamental piece of the administration bill, the bill that passed the Congress.

I asked Mr. Ryan what his opinion of the capital standards was. He said, "I have no view at this time." I am surprised at that, in fact because he had been a lawyer for a group that had an interest in the capital standard rules. He obviously knew about capital standards in his activity as a lawyer, but told us he had no view at this time.

I asked him about stock offering by an independent thrift institution, a very important issue. The question is who is going to regulate the sale of stock by those independent institutions. Should it be the office of Comptroller of the Currency, the OTS, or the Securities and Exchange Commission, or who should it be? "I have no view at this time," Mr. Ryan said.

Deposit insurance reform: We now have deposit insurance for $100,000 for everybody who puts deposits in a federally insured institution. Should this be reformed, a lower amount, or should it be limited to one account. There were a whole series of questions about deposit insurance reform going directly to the role of the U.S. Government and financial institutions. "I have no view at this time," Mr. Ryan told us.

Is the S&L legislation sound, the nominee was asked. Is the legislation that was put forward by the administration and passed by the Congress sound? Again, no view.

Senator CRANSTON asked him if there was a special role in the saving and loan industry for housing. Was there a special preference that ought to be given to housing? It is my understanding that one of the central reasons for the whole existence of the S&L industry is housing. Mr. Ryan told us that he did not have any view of this at the time.

The question is what does he have a view of. Certainly not this institution. Certainly not the institutions of the savings and loans.

No qualifications, through, and through. What we are getting is fundamentally a good politician, probably a good lawyer, probably honest, but the question is what should we be getting. That question was asked by some people on the other side. What should we be asking for. It seems to me that we ought to be asking for the most distinguished, hard-nosed, experienced individual in the area of very compli-

cated financial institutions that we can find.

Why is that experience necessary? You are getting into some extraordinary complex and difficult decisions, and you do not put somebody in there for whom the on-the-job training program is going to go into effect the minute he is confirmed.

For example, I do not think any Member of this body would assume that someone just out of law school would be asked to argue the most important case in front of the Supreme Court. You would want someone who had been through a great deal and could read the situation. On a very delicate operation that one might have performed on a member of your family you would not want someone who is doing an internship in medical school. Not a chance. You would look for the best, most experienced surgeon that you could find.

And none of us as politicians, and this institution is filled with very able, very experienced politicians, none of us would ask for someone to come in and try to carry the load of a piece of legislation in here based upon being, say, a high school senior class president.

You would not ask someone with that kind of experience to come here on the floor and deal with some of the very difficult issues and politics that have to be dealt with here. You would look for somebody with experience and judgment. You would want somebody who could read situations rapidly.

All of us have had this experience. You know who comes into the door. You could see which issues are real and are not real and learn and get better as you go along. You learn and get better as you go along as a lawyer or doctor. That ought to be the case here. We ought to be looking for—and certainly they are out there; we know they are out there—somebody of very real experience to whom we can entrust this extraordinarily difficult problem.

The American public, as I started my comments, the American public has a right to expect us to do the very best, has a right to expect us to confirm somebody if they meet the standards required in this legislation. And I think the American public will be measuring us, in part, by the decision that we make here today.

You can see what the conclusion is. I understand where the votes are. But I think this is, at this time in our Nation's history, at this time on this particular problem, somebody like the nominee who has no experience in this area is a convenient individual for the administration to appoint, but certainly not the kind of distinction that is necessary and certainly not operating with the sense of urgency that this problem needs.

I urge my colleagues to view this vote very, very carefully. This is also one that is going to be coming back to all of us. As Senator GRAHAM has said, we are in an early chapter in a long, long book. But it is going to be a very, very important one. A "no" vote on Mr. Ryan gives us the opportunity to put in the middle of this book a man of real distinction and real judgment which is what we ought to have.

I am only sorry we have gotten to this point. I have great respect for the Secretary of the Treasury. The legislation they sent down was right. But this is a very real mistake, and I urge my colleagues to vote no.

I yield the floor.

Mr. ADAMS. Mr. President, I was not going to speak on this matter, but, after listening to some of the comments and having been one of those who started this deregulation fever in Washington, DC, as a Secretary of Transportation, I feel a responsibility to explain my opposition to the nomination of Timothy Ryan to head the Office of Thrift Supervision.

I think, from reading through his materials, that this is a very fine, young man, and I believe I would vote for him for Secretary of Labor. He has had some experience in that area and he has had certainly an opportunity to learn some things in the Overseas Private Investment Corporation.

But last night I was advised, after I had met with the chairman, to read through the materials. So I read through the materials that had been prepared by the committee and by Senator GARN. And I just want to take a minute to discuss them.

After I had read through these, I handed the materials to my wife and I said, "Well, why don't you look at this? I have to go out for a few minutes and I will be back, and tell me what you think." She is a women of very few words. But she handed it back to me as I got back into the office, and she said, "Well, I think he is a fine, young man, and I know that a number of people have called you and a number of your friends have called you, and he has been an associate in a number of law firms. But," she said, "his answers read like the political version of the fifth amendment."

I thought about that, and I thought of the political version of the fifth amendment. So I went back and I read it again. And that is the problem that I have. Responses such as "I have no specific view" and "I probably do not have a view on that subject right now" and "I have no view as to whether the thrift industry should move forward or not move forward" are the warning signals that Mr. Ryan will be in over his head from day one. Mr. President, the taxpayers of this country deserve the very best person the President could find. Sadly, President Bush apparently did not even try. We are left with Mr. Ryan, a man with no discernible qualification for this incredibly sensitive post. I urge my colleagues to vote not to confirm this nominee. It just puts us in a position, Mr. President, that we are being asked to vote on someone with the hope that there may be a backup system for him.

I think the honorable Senator from Virginia is correct when he says that this is a very fine, young man. And if there is enough backup system for him, things may work out for him if he is confirmed. But I just wonder about why, with the availability of people in this city—and I will just mention some who have pulled out some of these financial institutions, like David Maxwell at Fannie Mae. He took over that institution. I have known David a long time. He has an instinct, as was said by Senator WIRTH, for seeing a situation and knowing whether or not there is something wrong. Or Felix Rohatyn, if you want to go to another area.

But one thing that bothers me, Mr. President, about putting in people who lack experience in the regulatory area, is that my experience—and I have had some bitter experiences in the regulation system of this Government—is that people better know what they are doing.

The second kind of golden rule I have always believed in, is that the Government should regulate money. Every other government in the world does. Every time we do not regulate the manner in which money is handled, we get into trouble. In this case, we have gotten into enormously big trouble because we deregulated these savings and loans, and we did not regulate some of their competitors so that they could stay in the business of financing housing for a lot of people who could not otherwise afford it.

These were specialized institutions set up during the Depression to handle housing in this country when commercial banks wanted to do other things. Instead, we moved these people out and let them do other things. We removed their protection as to what they had to pay for money. And now we have a situation where an awful lot of people got into these institutions and got into an awful lot of trouble. Some may have gotten in trouble on the basis of fraud, some incompetence. But we are about to put a very nice, young man—and I, too, agree with Senator WIRTH, I think he will probably be confirmed—into trying to bring us out of a trillion dollar problem.

We need somebody in there who has the abilities to look at a deal and determine whether or not it is a good one. Somebody is going to have to dispose of assets. Somebody is going to have to look at asset formation that has been done. I do not know how

many people I have had call into my office recently who are from various kinds of development groups in this country who really want to know what OTS is going to do. Some of them made offers on some of these properties that are sitting out there. We either could take a terrible loss on these properties or we could come out in not such bad shape.

So I just feel that maybe we need a little more than someone who is very sincere, who has been an associate in three different law firms, who has held some good political positions, and who I think is an honest person, but somebody whose answers rise a little higher than saying, "I don't know" or as I said before, the answers that read like the political version of the fifth amendment.

Mr. President, I am going to oppose Timothy Ryan. If they wanted to send him up here for another position, I certainly would be one that would be willing to listen to his qualifications. As I say, he happens to have great experience either in the Overseas Private Investment Corporation or in the Department of Labor. But to put him in charge of a brandnew organization with incredible exposure I think is something that we in the U.S. Senate should not do. If he is confirmed today, I wish him success. It is our responsibility to give advice and consent, however, and I think we should withhold it in this particular case and have the President send us up another individual.

I thank the chairman for the time, and I yield the floor.

The PRESIDING OFFICER. The chairman of the committee, the Senator from Michigan.

Mr. RIEGLE. I think we are near the end of this debate, and I want to make a few closing observations, if I may.

This has been a very important debate. This will be a debate that will be looked at beyond today, because it will have an enduring importance for several reasons.

I want to touch on two or three points that I think need to be referenced from earlier in the debate, and then I want to try to sum up the reasons why I think this nomination ought not to be confirmed.

Earlier today my good friend and colleague from Utah made an observation in passing. In a sense this is extraneous but it was introduced in the course of the discussion with respect to the decision that was made to select a new CEO at General Motors, a corporation well known to me and headquartered in my State. I think General Motors made an excellent choice, if I may just express a personal judgment, in picking Robert Stempel to take that position.

But my colleague, Senator GARN, quoted a few of the quotes from the news stories today with reference to whether General Motors ought to take somebody from within the company or outside the company and so forth. There were a lot of different views on that. But there was one very important quotation, an observation made about this by an outside party that I thought was particularly significant, and that was by Ross Perot. Ross Perot, as everybody knows, is an entrepreneur of some very considerable accomplishment and color.

His observation, in finding that Bob Stempel had been named CEO of General Motors, was as follows:

"This is too good to be true. This is an all car-maker team. It's a terrific day for General Motors and a terrific day for the country," said Texas billionaire H. Ross Perot, who at one time had an investment in the company and was bought out.

I only say that because it ought to be in the RECORD. It will not be juxtaposed to the earlier comment that was made, but I think that was a very fine choice. It is really separate and apart from whether promotion from within or without is particularly relevant to the case that we have before us here, but I thought it ought to be said.

With respect to another point that was made, about other relevant examples of complicated financial workout situations where huge sums of money were at stake and are at stake where you need the most competent kinds of people with top-level financial experience to deal with them, a reference was made to the collapse of the Continental Illinois Bank.

That is a case that will ring some bells with almost everyone here because it was a major bank that went into great difficulty. They had to send somebody in to fix the problem, to figure it out, and to correct it.

As was said earlier in debate, the decision was made not to just send one person but to send two. Who was sent? The former chairman of the Standard Oil Co. of Indiana, an enormous worldwide company. A person from the top job with the heaviest kind of international and top-level business and financial experience, John Swearingen, was sent in to figure out what to do in the case of a single bank. But they did not just send him. They sent somebody along with him, a fellow named Bill Ogden, who was the vice chairman and the chief financial officer of the Chase Manhattan Bank.

Why was that done that way? Because there was a special problem, very difficult to solve, and the decision was made to take two experts with top-level financial experience and management and savvy and professional standing to go in and to work that problem through. And they did and they were successful.

When they moved on, they were replaced by a fellow named Ted Theobald, who came over, having been the vice president of Citibank, the largest bank in our country.

So that was an example, a problem of almost microscopic size—it was huge, but it was tiny in comparison to the size of the disaster in the savings and loan industry as a whole which is, of course, the job we are talking about now with respect to Mr. Ryan's suitability.

I can see why people of the caliber that I have just cited might have been nominated to come in now to work out the problem of an entire industry, of literally several hundreds, in fact thousands of institutions across the country that now have to be looked after. It is an enormous workout situtation, many orders of magnitude higher than the case of this individual situation, the Continental Illinois.

In the case, people of towering experience and capacity and proven ability were asked to do it, and they did it. In this case we have a person, as the record today lays out from A to Z, with virtually no relevant experience of the kind that is called for by this kind of an industrywide workout situation.

In order to really make the point, I want to give two or three other illustrations. We have in the savings and loan area something called the southwest plan which was an effort to go down and sort out the problems of just a handful of institutions in trouble in a part of the country.

The man who was picked to do that is a fellow named Bill Gibson, who came from the Chase Bank, who had also before that served in Smith Barney in a top-level position. Before that he had been in the First Republic Bank and had also served at the Continental Bank. So here was a person with a very substantial professional track record over a long number of years who was called in because he obviously had the competence.

It was the case of four Texas S&Ls, four of the worst offenders, Vernon, Commodore, United, and San Jacinto. In that case a man named Larry Connell, who had previously served as the chairman of the National Credit Union Administration, and another person of top level experience, proven experience, was called in to manage a tiny slice of this problem.

There are other examples in the private sector. The Mellon National Bank got into trouble. Who did they ask? They asked a man named Hugh McColl, who had been the chairman of the board of the North Carolina National Bank, to come in and unravel that situation.

There was another case with the NCNB Bank in Texas where a fellow named Frank Cahouet, who had previously been CEO of the Crocker National Bank and the chief operating

officer of Fannie Mae, again top-level financial experience, was brought in to work out that situation. And the list goes on.

What we have here is a situation where we do not have just one or two institutions in trouble. We have the whole country's worth of institutions in trouble, and we are going to put one person in charge of all that who does not have an iota of the kind of relevent experience that I have just cited of the experts who were called in to unravel individual problem situations of the kind I have just cited.

Mr. GARN. Will the Senator yield for just one comment on this? Because it is very relevant and I will be very brief.

I do not dispute what the Senator from Michigan is saying. But the law specifically requires that we appoint a head of this. And it is simply not possible to bring in those type of people in an entire workout. These people were paid very high salaries in the private sector and they did not require confirmation.

I do not dispute one word the Senator is saying, but we do not have that leeway. It would not be possible to bring outsiders in when we are required to fill this position because of a court case and constitutional requirement to do so.

Mr. RIEGLE. I thank my colleague for making that point because there is that difference, and I appreciate his conceding my point about the level of expertise required to do these kinds of workout situations. But the point is this: We now have this extraordinary crisis situation that is industrywide and nationwide, and we need someone of towering experience and background and reputation to come in and handle this unique assignment.

And it is very tough. There are a lot of reasons why somebody might look at it and not be much inclined to take it. But that is where leadership comes in. This issue is extremely large and there are many hundreds of billions of dollars at stake of taxpayer money that is going to come right out of the pockets of the people of this country and right out of their futures, money that otherwise could go for college educations or health insurance or housing down payments, to buy a house or any other thing you want to think about.

If this job is not done well, the cost to the taxpayer is going to be higher, and that is why we need the best possible person we can lay our hands on to do this job. When somebody says to me the Secretary of the Treasury, or even the President of the United States, cannot find, identify, and then persuade a person of this kind of exceptional qualification to step forward as a matter of extraordinary national service and to step into a difficult job and do it at the direct request of the top leaders of this Nation, to say that we cannot find anybody with those kinds of superb qualifications who is willing to serve, I just do not think is true. I do not accept that.

It is beyond my experience in the time that I have been in public life, and this is my 24th year in the Congress. I know people have come forward, not just in that time period, but throughout the 200 years of the history of this country. Part of the obligation of leadership is to find and motivate good people to serve. The bigger the problem, then the bigger the person that has to be matched to the job.

So we need top-flight talent in this situation. It is just that simple. We have not been offered that. We have heard a lot of reasons—frankly, a lot of them, I think, are excuses—as to why we have to take somebody who is clearly unqualified for the job. People say we have to take them because: "that is the best we can do"; "We do not have enough time"; "we cannot find anybody"; "the job is too tough"; or "it does not pay enough". I do not buy that.

I do not think the American people are going to buy it because it is their future that is on the line here. The money that may be wasted or squandered by poor decisions and work that is not up to the highest standard because of lack of experience and lack of knowledge and lack of training is going to come right out of their hide.

So I think they have a right to expect something more than that. I think they do expect something more than that. For them to simply say "that is the best we can do," that is just not an adequate answer, and it is not fair. It is not fair to them; it is not fair to the future; it is not fair to the problem. I do not even think it is fair to the nominee.

There is nobody in this country any more surprised than he was when the finger fell on him 3 weeks ago to ask him to come and do this job. He was very frank to acknowledge in the committee his lack of experience in this kind of financial problem solving. It is on the record. He said it. I applaud him for saying it. He was candid in that respect, but that does not fill in the deficiency. That does not make him able to do the job. We need somebody who is very able to do the job.

That is why in these other problems, complex in this same way only much smaller, we went out and found, both in the public sector and the private sector, people who were topnotch talents to come in and do the job. It is the lamest of excuses and arguments to say we really could not find anybody else.

I want to say something about the vote that is upcoming because we have had a good debate. We heard people on both sides of the issue. The administration, to its credit, has mounted a full court press. They worked this issue very hard. I think almost every Senator has been called upon and called by any number of people to try to persuade them to go along with this nomination.

I can tell my colleagues this: If a fraction of the time had been spent finding a fully qualified nominee that has been spent trying to push this nominee through, they would have found one and we would have one, and it would sail on through here in the Arthur Vandenberg spirit that was referenced earlier. I happen to feel strongly about that, because I hold the very seat he held when he was here.

Bipartisanship comes easy to me. I have served on both sides of the aisle, as my colleagues know. That is why of the 31 nominees we have been asked to handle so far in this administration—we confirmed 29 and we have 2 we are going to report out in the next couple of days and we are going to move through here before this week is out—this is the first one where there has been a dissent. This is a dissent on merit. It is a dissent on qualification and on the fact that this is the wrong person for this job, in terms of qualification.

I want to say one other thing to Senators before they vote. I respect profoundly more than I can easily say in words the importance that each Senator attaches to a confirmation vote. These are highly individual decisions. We all look at it in a different way.

I do not think one Senator can really say to another Senator, I hope you will do this or that. I think we can express our view; we can state it. But I think each Senator has to be seen as in a situation where they properly should and will make their own individual judgment on this situation.

That is how I feel, and everybody sees the confirmation process differently. But I want to file this note, and I hope everyone will remember it: I think this nomination really matters, and I think this vote really matters. We have not been asked to confirm anybody before for this job because the job has changed under the law since the last time we would have been asked to confirm anybody. The job has become much bigger, much more complicated.

We used to have a three-person board. Now one person is the Director of the OTS, and we have added two other jobs to it. In combination, as I said before, there is nearly $5 trillion of regulatory oversight involved in these three positions that this nominee will get.

It is an enormously important vote. It is going to be a vote that counts more because we now, I think, see it in the full light of day. This industry is

in crisis. I think in times past, we knew there were problems. I speak broadly now of the country and the Congress, but I am not sure until even the last year that the full scope and magnitude of the crisis has been seen for what it is. We did not have a legislative proposal to deal with it until March of last year asking for $50 billion to deal with it. That is just a small part of what it is going to take to deal with the whole problem over a period of the next 30 years.

So this is a huge task, and this is a big job. Therefore, this vote is a very important one.

I know some Senators have said to me, and I am paraphrasing, but somehave said to me: We agree with a number of the points you have made. We are very concerned about the lack of qualification. This looks like an awfully light candidate, given the scale of the job, but we feel the pressure of the court case and we feel that we have to do something. The administration is putting on the full court press, and we are not sure we want to accept the responsibility of turning somebody down even if it is somebody who does not really look fully up to speed, because here is that court case out there and we will look as if we are not responding adequately.

I understand that pressure. I urge Members not to be persuaded by that kind of pressure. We are selecting somebody for a 5-year term, and if it takes us a little bit longer to find somebody who is fully qualified, that will be the best time we spend. It will be a great favor to the President of the United States, as it will be to the whole country and will reflect, I think, credit on the Senate as a whole.

If we get rushed into accepting a nominee that on his face lacks the basic appropriate qualification for this assignment, we will have made a mistake. Sometimes we do that. Sometimes we get hurried into things. It took the administration a long time to send the nomination up here. They wanted it expedited. We expedited it. They want a decision right now. We are going to give them a decision right now. If this nominee is to go down, I have a piece of legislation right here that we can pass so we are in a position to be able to take and give the President the authority to put somebody in on a temporary basis until they can mount another search and find somebody fully qualified. So we have an answer to that problem.

I hope that Senators will take that extra minute or two of reflection on this, because this vote counts. This is a candidate that is not qualified properly for this position.

It is just that simple. I wish that were not the case, but it is the case and we ought to see it the way it is.

Mr. GARN. Mr. President, I have a long list of points I would normally make in rebuttal because I do disagree with my good friend and chairman. Let me just simply say that I do believe Mr. Ryan is qualified. He will confound many of his critics, and they will come back to eat some of the words they have said today. With that I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. CONRAD). Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Utah has the floor.

Mr. GARN. I yield to the Senator from Virginia.

Mr. WARNER. Mr. President, I, too, join in stating that the schedule of Senators precludes any further remarks on this nomination. I am privileged to participate in this floor debate on this nomination. I started with the understanding the Senate would be fair and objective, and I conclude with that understanding. I thank the Chair.

Ms. MIKULSKI. Mr. President, I rise to oppose this nominaton.

I do not believe that Mr. Ryan has the qualifications and experience to be the Director of the Office of Thrift Supervision.

This is a job that requires an absolutely top flight appointment, and Mr. Ryan does not meet that appropriately high standard of management expertise.

The Director of this office will manage nearly $5 trillion in assets. The Director will be responsible for a thrift industry that loses almost $30 million a day.

More importantly, Mr. Ryan would be charged with protecting the savings of millions of individual Americans. Many of whom have the bulk of their savings in thrift institutions. We owe these people the very best person we can find.

Yet Mr. Ryan has no experience in the thrift industry. His experience is mostly in labor law both in private practice and the Department of Labor.

We are not talking about a minor or even medium-sized agency with limited jurisdiction or responsibility here. The Office of Thrift Supervision has responsibility for regulating 2,500 savings and loan institutions in this country, of which roughly 700 of these are losing money.

Proper supervision of the Office of Thrift Supervision is critical not only to the budget of the United States, but to lifetime savings and hope of millions and millions of Americans.

We need the very best we can get to run this agency. Mr. Ryan is not that person.

Mr. BRADLEY. Mr. President, today Senators are being asked to give their advice and consent to the nomination of Timothy Ryan to direct the Office of Thrift Supervision.

I did not support the President's plan to bail out the savings and loan industry. I believe when I voted against it and I am more convinced today that the proposal obligates American taxpayers to pay hundreds of billions of hard-earned taxes without the slightest notion of what kind of a banking or financial institution system we wanted to have when we were done. I expressed concern that the $50 billion promised as the cost of a final solution to the S&L problem was merely the first downpayment—without a resolution in sight.

Everything that has happened since then only confirms my apprehension.

Even though I believe the bailout plan—under the best of circumstances—will be very costly with a success unlikely, the only chance it has is if it is led by a tough minded administrator. The director of OTS has to have a clear idea of where he or she wants to lead us. That requires expertise and solid knowledge about how financial institutions function. It requires a vision of how OTS should reshape the savings and loan industry and how S&L's fit in with other financial institutions in the future.

Mr. President, I do not doubt Mr. Ryan's honesty or his character. I also do not believe he is incompetent. But the job of heading the OTS requires much more. Mr. Ryan's experience is limited essentially to being a competent attorney who had a brief stint in the Labor Department. There are many important positions in government that someone who is a competent attorney can handle, but this job requires more. Mr. Ryan seems to have done an acceptable job as counsel to the Labor Department, but that job, unlike the director of OTS did not require great administrative skill. Finally, none of his experience gave him, based on his testimony before the committee, any real knowledge of the thrift and banking industries. In short, the present nominee does not have sufficient background or qualifications for what is one of the most powerful financial positions in government.

I would like to give Mr. Ryan and the President the support they are seeking. But the potential cost is far too high. I cannot sanction such an enormous risk to the taxpayers with someone at the helm who appears not to know where he's going. I cannot give my consent to Timothy Ryan.

Mr. PELL. Mr. President I am voting against confirming the nomination of T. Timothy Ryan, Jr., to be Director of the Office of Thrift Supervision.

It is critically important that this office be filled by a person with a record of extensive experience and strong leadership in the financial world.

The collapse of the saving and loan industry is one of the greatest finan-

cial disasters in the history of the United States. The Office of Thrift Supervision was established by the Congress to halt the avalanche of savings and loan failures that threatened the savings of innocent Americans who deposited their savings in these institutions. The Office of Thrift Supervision was established to protect the taxpayers of the United States who faced the responsibility to paying savings despositors whose money had been guaranteed by the U.S. Government.

The costs to the taxpayers of rescuing the savings invested in the failing savings and loan institutions is now estimated to exceed $200 billion. The institutions now continue to lose an estimated $30 million a day that ultimately will have to be paid by the taxpayers.

It will be the job of the new Director of the Office of Thrift Supervision to rescue the savings of Americans at the least cost to the taxpayers. This will be one of the most demanding and difficult tasks ever undertaken by a Federal Government regulator. Accordingly, the new Director should be one whose qualifications, experience, and abilities are beyond question.

Regrettably, I have concluded that Mr. Ryan does not meet these high standards. In fact, it is conceded by Mr. Ryan and his supporters that he has no extensive experience in finance. His principal experience has been as a labor lawyer. According to press reports, the administration submitted Mr. Ryan's name because it had been unable to find a better qualified candidate willing to accept the appointment. That is just not an acceptable excuse. It is the responsibility of the White House to find a fully qualified person to fill this position and I suggest the administration turn its full abilities and energies to doing just that.

It was this administration that proposed to the Congress the plan to rescue the depositors in the savings and loan institutions. I voted for the administration's proposal to create the Office of Thrift Supervision. I did so at considerable political risk, knowing that in a political campaign there would be those that would accuse me of supporting a bailout of crooked bankers, even though the proposal really is for a rescue of depositors. I was willing to take that risk because I believed and I still believe our Government has a responsibility to savings depositors who trusted the Federal Government's guarantee. Having taken that risk, however, I am not willing to entrust the direction and management of this huge responsibility to an unqualified candidate.

Mr. President, this position is just too important to the taxpayers of the United States to be entrusted to one unfamiliar with the complexities of the financial industry in the United States, and with the history of the savings and loan crisis.

For this reason I shall vote against confirming the nomination. I urge the President to promptly submit a qualified nominee.

Mr. DURENBERGER. Mr. President, today we have a chance to take another important step in the long journey to return the savings and loan industry to solvency. If we reject the nomination of T. Timothy Ryan to be Director of the Office of Thrift Supervision, we effectively shoot the S&L industry's recovery in the foot. Ryan's rejection ensures that the already herculean task before the OTS will grow even more expensive and unmanageable than it is today. If we accept Ryan's nomination, we will hopefully get the S&L recovery back on track. I believe the choice is clear, and urge my colleagues to join me in supporting this nominee.

I don't believe any of us envy the task that awaits Mr. Ryan at the Office of Thrift Supervision. The cost of the S&L bailout is now estimated as high as $2,000 for every American taxpayer, and this figure has been moving higher and higher with each passing quarter. Anyone who takes this position is going to be under intense scrutiny by the press, public, and Congress. We crucially need a competent public servant as the Director of OTS to give that agency guidance and direction in these crucial months of the bailout.

Some of my colleagues claim that Timothy Ryan is not the ideal candidate for this position but, quite frankly, I do not believe there are any ideal candidates that exist for this position. It will be a thankless job that very few public servants would want. In Timothy Ryan we have an enthusiastic professional with a strong record in regulation, administration, management, and law. Timothy Ryan is adaptable, and is untainted in any way by ties to the S&L fiasco. It is clearly an industry that needs fresh faces and new ideas. Timothy Ryan offers both.

The administration searched hard for 3 months to fill this job before nominating Timothy Ryan. I believe this search has been very successful, and known that it is time we start focusing on cleaning up this industry. The most positive step we can take today toward that end, is to approve the nomination of Timothy Ryan.

Mr. BOND. Mr. President, I rise in support of the Ryan nomination. This debate is the sort of exercise in passing the buck that causes Americans to hold Congress in contempt. Congress, which bears much of the responsibility for the creation of the S&L mess in the first place and for the cumbersome and unwieldy structure set up by FIRREA, now has been busily looking for ways to blame the whole problem on the Bush administration.

This morning's Washington Post observed that "The Senate is occupied mainly with blame shifting." It is precisely this blame shifting and grandstanding by Members of Congress that has made it so difficult for the President to recruit someone for this job. Most professionals in the financial services field know that the Director of OTS will be blamed for all of the problems resulting from the enormous task OTS faces in shutting down hundreds of bankrupt S&L's. Why should someone agree to take this thankless task, be vilified by Congress, and then be unable to accept another job in the financial services industry for 2 years after leaving OTS? I don't know where Senators have gotten the idea that candidates are lining up to take this job.

We need to think carefully about what we in Congress are doing with this whole nomination and confirmation process. In our zeal to remedy past abuses, we are driving good people away from Government service. The postemployment restrictions make it very difficult to recruit individuals from within an industry for high office. In addition, executive branch officials have to deal with increasingly rancorous and high-handed second guessing from Congress. I am not questioning Congress' legitimate interest in oversight of executive branch activities but I am concerned about the lack of civility with which differing views are expressed. We need to look carefully at the nomination and confirmation process to make sure that it really works to give us the best people.

The Senate should defer to the President and Secretary Brady's judgment and confirm Tim Ryan. He has experience in government and sound management skills. His lack of experience in the financial services industry may well turn out to be an asset because independent, objective judgment is just what is needed to make the tough decisions on the future of the thrift industry. I encourage my colleagues to vote "yes" on this nomination.

Mr. BYRD. Mr. President, I oppose the nomination of Mr. T. Timothy Ryan for the post of Director of the Office of Thrift Supervision [OTS].

The legislation enacted by the Congress last year to rescue the savings and loan industry established the position of Director of OTS as the most powerful regulator of financial institutions in our country's history. The responsibilities of the OTS Director are awesome, and it is critical that the right person be placed in the job.

The OTS Director will be the chief watchdog of the 2,600 savings and loan institutions in this country—800 of

which I understand are currently losing money, and it will be his job to implement last year's complex and far-reaching bailout bill.

The OTS Director also will serve as a member of the Board of Directors of the Federal Deposit Insurance Corporation [FDIC], which, in addition to being caretaker of the deposit insurance funds of the entire banking industry, also regulates over 7,900 State-chartered commercial banks. Great care and expert leadership on the part of the FDIC must be employed to maintain the integrity of the deposit insurance system and to prevent future failures in our commercial banking system.

Additionally, the OTS Director will be a member of the Board of Directors of the Resolution Trust Corporation [RTC], the agency established by Congress to dispose of the assets of the failed savings and loan institutions. The cost of this crisis continues to mount, at the rate, according to most experts, of $30 million a day, and it is estimated that the eventual price tag for rescuing failed thrifts will be from $300 to $500 billion.

Clearly, the individual charged with the above duties and responsibilities must be a very experienced and qualified financial expert who can step quickly into this complex situation and, without on-the-job training, begin immediately to resolve the dangerous problems he or she will face.

Mr. Ryan's background consists primarily of pension and labor law in the private sector, and a tour of duty as Solicitor of the U.S. Department of Labor from 1981 to 1983. I understand that he has received good marks from those involved with him in these endeavors.

But, Mr. President, in my view, experience in labor and pension law does not, by itself, qualify one to handle the massive technical financial problems which await the new OTS Director. And a short stint as Solicitor at Department of Labor would not of itself provide the kind of management experience needed to take aggressive control of the huge network of people and institutions for which the OTS Director is responsible.

Mr. Ryan, himself, in testimony before the Senate Banking Committee, admitted that he has no background in financial institutions and that he was surprised when he was selected.

Mr. President, in dealing with Presidential nominations during my 32 years in the Senate, and under Presidents of both parties, I have, in most instances, believed that a President has the right to select those who will serve in his administration.

But the nomination which is before us today holds special significance. We are faced with a financial crisis of immense proportions, which will have long lasting effects on our economy. There is simply too much at stake to place anyone other than a thoroughly qualified and experienced person as Director of OTS. The decisions which are made by the new Director, the quality of his management skills, and the scope of his vision as to the future of our Nation's financial institutions will have a profound effect, not only on the final price tag which the American public must pay to resolve the crisis, but also on the eventual integrity of our entire financial system.

Unfortunately, while I am sure that Mr. Ryan has many fine attributes, I do not believe that he possesses the admittedly extraordinary qualifications which are needed. It would be my hope that his nomination will be defeated and that the President will send to the Senate a nominee who can truly help lead the way to renewed health of our financial institutions.

Our Nation can afford no less than the best.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Timothy Ryan, of Virginia, to be Director of the Office of Thrift Supervision? On this question, the yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] is necessarily absent.

The result was announced—yeas 62, nays 37, as follows:

[Rollcall Vote No. 56 Ex.]

YEAS—62

Armstrong	Gramm	Moynihan
Baucus	Grassley	Murkowski
Bentsen	Hatch	Nickles
Bond	Hatfield	Nunn
Boren	Heflin	Packwood
Boschwitz	Heinz	Pressler
Breaux	Helms	Reid
Burns	Hollings	Robb

Cranston	Kohl	Simon
Daschle	Lautenberg	Wirth
DeConcini	Leahy	
Dixon	Levin	

NOT VOTING—1

Matsunaga

So the nomination was confirmed.

Mr. RIEGLE. Mr. President, I ask unanimous consent that the President be notified of the Senate's decision.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, I ask unanimous consent to proceed for 5 minutes as in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CLEAN AIR ACT

Mr. GORTON. Mr. President, last night this body passed, overwhelmingly, the Clean Air Act Amendments of 1989. This Senator first spoke on S. 1630 on January 30 of this year. The debate in which we have engaged since that date has been extensive, stimulating and at times emotional. Last night I joined with 88 other Senators in supporting the final comprehensive package so diligently composed by the Environment and Public Works Committee, the leadership, and the administration.

I especially commend President Bush. He provided the leadership that sparked this powerful debate. Although the Senate passed S. 1630, we have not yet closed the book. The House continues to mark up its version of the Clean Air Act and then we will conference. I urge the House and administration to work in a timely fashion so that we can have a new Clean Air Act before we adjourn this Congress.

This legislation, Mr. President, requires an across-the-board cut in pollution. It will reduce sulfur dioxide, carbon monoxide, air toxics and others. As a result, we will improve air quality, our vistas and skylines will be more clear, and our national parks will remain panoramic scenes of nature's perfections.

The importance of clean air, of achieving the goals I have listed, led to last night's overwhelming vote to impose new regulations and requirements on polluters. We have delayed 13 years the improvement of clean air regulations addressing health and environmental safety concerns caused by industrial and auto pollution. That is much too long a period.

Like any major legislation, this bill is a web of compromise. As a result of the legislative process, I respect and support the outcome.

I believe, however, that clean air requirements must be balanced with the prospective economic impact that these regulations will have on American businesses. S. 1630 provides stricter pollution controls while permitting American industries time to implement those controls.

During consideration of S. 1630, one of the strongest debates was on an amendment offered by myself and the distinguished Senator from Illinois [Mr. DIXON]. Our amendment addressed the concern expressed by American industry—that the Clean Air Act would have a detrimental economic impact on them, forcing operations out of the United States. Twenty of my colleagues came to the floor during a 4-hour time period to speak on this question. Although my amendment was narrowly tabled, Senator DIXON and I began an important and long-lasting debate. We will revisit this issue.

S. 1630 will have a major economic impact on our industries. My amendment addressed the concern of global pollution and competitiveness. Our industries should not be crippled as a result of American pollution controls. Clean air, however, also should not be sacrificed to protect polluting industries. Instead, we must ensure that our foreign competitors make clean air a priority and implement comparable pollution controls on their industries.

The entire body of the Senate has succeeded, Mr. President, in completing a uniquely crafted piece of legislation. We will not see the health and environmental results of this work for another decade. Until that time, American citizens will be paying for cleaner air, a responsibility I believe they wish to impose on themselves.

I am proud to have played a part in this monumental piece of legislation, and I thank the leadership for bringing the issue before the Senate.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Mr. President, I ask unanimous consent to address the Senate as if in legislative session for 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

A PERSONAL MESSAGE FROM LITHUANIA

Mr. SIMON. Mr. President, I had a visit this afternoon from Dr. Nijole A. Remeikis, who is on the University of Illinois faculty, who has just returned from Lithuania. She met with President Landsbergis when she was in Lithuania and she conveyed this letter to me which she says is the essence of his views, which he wanted to convey to the Members of the Senate.

Let me just read what she says is the essence of his views:

Contrary to many opinions in the West only a strong stand by western democracies for Lithuania's independence can assist President Gorbachev in dealing with Soviet hard liners, Mr. Gorbachev and even most of those hard liners know very well the importance of western assistance for the reform program. The Lithuanian government is ready to negotiate on virtually all questions except independence itself and recognize Soviet interests. Consequently the Lithuanian government is very anxious to hear from the western democracies their commitment to incidence which was reasserted by a freely elected parliament of Lithuanian. President Landsbergis, therefore, requests all those in position to denounce the use of force, the overt threat of force and to recognize the true will of the Lithuanian people.

I ask unanimous consent, Mr. President, to print her letter to me, the statement that is included here, as well as the statement by the President of Lithuania, in response to the statement of President Gorbachev. It is a letter to President Gorbachev that had the OK of the Parliament of Lithuania. I ask unanimous consent to print both in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A MEMORANDUM OF A PERSONAL MESSAGE OF PRESIDENT VYTAUTAS LANDSBERGIS TO MEMBERS OF U.S. GOVERNMENT

[March 28, 1990 in the Supreme Council of Lithuania]

I have just returned from Lithuania, where I personally met with President Landsbergis. He has requested me to convey his views concerning the negotiations with President Gorbachev for recognition of Lithuania's independence to members of the U.S. Government.

This is the essence of his views:

Contrary to many opinions in the West, only a strong stand by Western democracies for Lithuania's independence can assist President Gorbachev in dealing with Soviet hardliners. Mr. Gorbachev, and even most of those hardliners, know very well the importance of Western assistance for the reform program. The Lithuanian government is ready to negotiate on virtually all questions, except independence itself, and to recognize Soviet interests. Consequently, the Lithuania government is very anxious to hear from the Western democracies their commitment to independence, which was reasserted by a freely elected Parliament of Lithuania. President Landsbergis, therefore, requests all those in position to denounce the use of force, the overt threat of force, and to recognize the true will of the Lithuanian people.

NIJOLE A. REMEIKIS, D.D.S.,
University of Illinois, Chicago.

MIKHAIL GORBACHEV,
President of the USSR, The Kremlin, Moscow.

YOUR EXCELLENCY: The Presidum of the Supreme Council of the Republic of Lithuania has received and considered your communication regarding the current status of Lithuania, and in particular your belief that the re-establishment of Lithuania's de jure independence would have ruinous effects for the people of Lithuania, the Soviet Union, and its policy of perestroika. The leadership of the Supreme Council of the Republic of Lithuania wishes to assure you that Lithuania has absolutely no desire to harm the U.S.S.R. or your policy of perestroika. Indeed, it is due to your strong leadership that the peoples of the U.S.S.R. have begun to enjoy greater freedoms and legal rights. The people of Lithuania have observed with admiration your public commitment to the rule of international law, the United Nations organization, and a common European home. In recent years, the people of Lithuania have witnessed approvingly the U.S.S.R's denunciation of the invasions of Afghanistan in 1979 and Czechoslovakia in 1968, Soviet willingness to withdraw troops from Czechoslovakia and Hungary, and Soviet readiness to accept democratic governments in Poland, East Germany, Czechoslovakia, Romania, Bulgaria and Hungary.

Most significantly, the people of Lithuania have appreciated your courage in denouncing the consequences of Josef Stalin's domestic and foreign policies. It is with this recent historical record in mind, therefore, that the Lithuanian people come to the last major international crime of Stalin—the annexation of the three independent Baltic states recognized by the USSR in 1920. This conclusion was reached openly more than once over the last few years. No attempt was made to hide this fact from the government of the USSR or the various Soviet republics. Indeed, on August 23, 1989, a vast human chain of more than a million people clearly demonstrated the desire of the Baltic people for a restoration of Baltic independence in a peaceful and democratic manner.

Today, with overt Soviet military pressure increasing on Lithuania, and our young men being taken from their homes and Red Cross shelters for conscription into the Soviet army, the people of Lithuanian and their government again request that the government of the USSR agree to talks with Lithuanian representatives on the wide range of issues facing the Soviet and Lithuanian peoples. The Supreme Council of Lithuania has asserted that the basis for re-establishment of Lithuania's independence is the de jure continuity of the Lithuanian state pursuant to international law, and the December declaration by the Second USSR People's Deputies as to the invalidity of the 1939 Molotov-Ribbentrop Pact, condemning the resulting policy of ultimatums and violation of international law. However, the Presidium of the Supreme Council of the Republic of Lithuania's March 21, 1990 telegram to the Supreme Soviet of the USSR also noted the constitutionality of the March 11, 1990 declaration of the re-establishment of Lithuanian independence under the terms of the USSR Constitution.

The government of Lithuania has taken notice of your reference to a willingness by the government of the USSR to enter into discussions regarding the validity of Lithuania's declarations and decisions from a Soviet constitutional perspective. A general discussion of your appeal will begin today, and a respresentative sent by you could also participate, who would be able to present the position of the Soviet government in a more comprehensive manner. Please be assured that Lithuania's representatives are ready to enter into talks and discussions on any level with the USSR government or its representatives at any time to discuss Lithuania's legal status from a Soviet constitutional and international legal perspective. We earnestly hope that the USSR govern-

ment will agree to begin negotiations on the basis of mutual respect and cooperation.

By order of the Presidium of the Supreme Council of the Republic of Lithuania.

VYTAUTAS LANDSBERGIS.

Mr. SIMON. Mr. President, finally, what is needed in that area today is, first, for the Soviet leaders to talk to the leaders of Lithuania. Under the present structure, Lithuania has three Vice Presidents, one of those Vice Presidents has been in Moscow for several days but has been unable to have any kind of serious discussions with anyone in the Soviet Government.

Second, we ought to make very clear to Foreign Minister Shevardnadze and to others that the use of force would cause a serious disruption in relations between the United States and the Soviet Union.

Third, we can say that we will at the earliest appropriate time recognize the Government of Lithuania. We have never recognized the occupation. We have resisted that from day 1 as we should have. There is a reluctance on the part of the President to enter into full diplomatic relations right now but we can come very close to that.

Let me add I think it is important that the President and Congress be in concert on this, though for that to happen, the President has to be firm in his leadership.

Finally, I would hope we would make clear that we feel it is in everyone's best interest for journalists to have access to the country of Lithuania, and that our interests is not simply Lithuania but also Latvia and Estonia.

I know that the feeling on what is happening in Lithuania is not simply the feeling of Lithuanian-Americans. It is a feeling of all Americans, and the President should convey that very, very clearly to the Soviet leadership.

Mr. President, I see my colleague from Missouri is here and my colleague from Delaware is here as well seeking the floor.

I certainly yield to my very senior colleague from Delaware.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. Mr. President, I thank my colleague from Missouri who is anxious to seek the floor as well. I will be very brief.

EXECUTIVE SESSION

Mr. BIDEN. Mr. President, based on a unanimous-consent agreement yesterday, we agreed that we would spend a total of no more than 20 minutes equally divided on the Sweet nomination. I now ask unanimous consent to proceed to Executive Calendar 681, the nomination of Robert Sweet.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

DEPARTMENT OF JUSTICE

The legislative clerk read the nomination of Robert W. Sweet, Jr., of Virginia, to be Administrator of the Office of Juvenile Justice and Delinquency Prevention.

The PRESIDING OFFICER. Under the previous order, debate on the nomination is limited to 20 minutes, equally divided and controlled by the Senator from Delaware [Mr. BIDEN] and the Senator from South Carolina [Mr. THURMOND].

The Senator from Delaware is recognized.

Mr. BIDEN. Mr. President, this is a very important nomination because it is a very important office. Although there will be no request for a rollcall vote that I am aware of, we did vote in the Judiciary Committee on Mr. Sweet. He passed through the Judiciary Committee over my objection, on a 9 to 5 vote. I voted no. The reason I did was not because Mr. Sweet is not a fine individual. He is. But the Office of Juvenile Justice and Delinquency Prevention can and must play a key role in addressing such issues as drug abuse, child abuse, gang violence, and the crisis facing our juvenile justice system itself.

I feel strongly, Mr. President, about this office, because I have personally invested a lot of time and energy in this office since it was created, as an initiative of former Senator Birch Bayh. I believe it has been significantly underutilized during the Reagan years, and I am afraid that this administration's budget requests and attitude toward the office continue to reflect that it is a very low priority. In fact, juvenile justice and the whole question of juvenile deliquency, gang violence, and drug abuse among our young should be the cutting edge of our attack on the drug and crime issue in this country.

I feel so strongly about this issue that for each of the past 10 years I fought the efforts of Presidents Reagan and Bush to abolish or dramatically reduce this office. Every year President Reagan came in and said, "Boom, no office. Get rid of it. Just abolish it completely."

I also feel that next to the drug director's office there is no office that I have frankly invested more energy in attempting to shape.

Perhaps more important, I have proposed in recent months several new programs that would give the office a greater role in fighting drug abuse, gang violence, gang activity, and child abuse among our young.

I proposed an amendment approved by the Senate last year to double the size of this office and to create new programs to combat gang violence, drug abuse, and drug trafficking among juveniles. I have also proposed legislation to expand the offices anti-child abuse programs.

So we are at a time when we need a strong committed leader for the Office of Juvenile Justice and Delinquency Prevention.

Mr. President, I have been very impressed by the endorsements Mr. Sweet has received from many of my colleagues, and I especially am impressed by the strong testimony of Senator HUMPHREY from New Hampshire. In the case of my colleagues, it means a lot when we have people we respect suggesting that a nominee, notwithstanding the lack of obvious experience is warranted the job and will be an effective Administrator.

But after listening to my colleagues pleas as to the abilities of this man, I then listened to Mr. Sweet himself for several hours in the nomination hearing. I found the nominee, as I said, to be an honorable and intelligent man. But, nevertheless, I voted against the nomination because I have serious concerns about his experience in the area of juvenile justice. The Juvenile Justice Act requires that the administrator of this office to be drawn from among those individuals with experience in juvenile justice programs, and I believe Mr. Sweet is demonstrably lacking in that experience.

Second, I am not convinced the nominee is firmly committed to the purposes and mission of this office. I understand the nominee is in a difficult situation and is trying to convince us that he supports this Office. Taking issue with the President on these issues is obviously something not to be done at nominating hearings.

But after listening to his testimony as a whole, I still came away with doubts about his commitment to the office. Mr. President, as a consequence, I, and a number of colleagues, voted against him.

I hope, at a minimum, that the nominating process in the Judiciary Committee has made the nominee painfully aware how important some of us think the office is. I want him to know, since clearly in fact he will be confirmed today, that he will receive strong, strong support from me and my colleagues on the committee and many in the Senate if he is willing to go to bat for that agency. The agency that once was a $72 million Agency has now been cut to $7.5 million to do all the things that we just mentioned. Mr. President, it is not capable of doing its job with that kind of a budget.

Mr. President, I want my colleagues to be aware that this office is going to rise in its significance because of the matters it deals with. I sincerely hope Mr. Sweet is chastened by the knowl-

edge that there are those of us who want very much to see that agency work and function. We are prepared to give him additional help.

Mr. HUMPHREY. Mr. President, I want to focus the Senate on the pending nomination, that of Robert Sweet to be Director of the Office of Juvenile Justice and Juvenile Delinquency Prevention.

I regret that I was not here today to listen to the remarks of the chairman of the Judiciary Committee. I regret it, first, because I wanted to congratulate him for the fairness and the objectivity and the business-like atmosphere in which this nomination was considered by the committee, notwithstanding some fairly incendiary statements made on the part of a few groups who oppose the nomination.

I want also to commend the chairman for his longstanding championing of the programs that fall under this office. At times he and a few of his allies have been lone voices in the wilderness. I hope that day has now passed.

Mr. President, I have known the nominee, Robert Sweet, both on a personal and professional level, for a dozen years or more, and I am personally convinced, as I have expressed to my colleagues, that Bob Sweet is going to do an outstanding job in that office, if confirmed, as he has done an outstanding job elsewhere, and that, as has been in the case in the other offices he filled, he will very soon lay to rest the concerns of most of those who opposed him. I point out that many fine groups supported the nominee, such as the Boys Clubs of America, for example, and I will get to that in due course.

I think it is clear from Bob's résumé, from his life, that he has a very deep and sincere commitment to the youth of our country, their development, their education, and to ensuring that they become productive contributing, responsible citizens.

Every position which Robert Sweet has occupied in the private sector or the public sector has had some bearing on the development of youth.

Upon graduation from college Bob Sweet first taught school. During that period of time, may I point out, after hours, on a volunteer basis, he tutored children with learning disabilities. After that, after the period of time as a teacher, he represented textbook distributors and suppliers of scientific equipment for classrooms.

When his own children were in school, Bob served as the president of the Parent-Teachers Association in a town where he resided, Dublin, NH. He served for 7 years as a member and for the final 2 of those 7 years as the chairman of the school board of a large regional school system. He served for 10 years in New Hampshire on the Governor's Commission on Education.

For 10 years he served as a volunteer in a youth camp which served teenagers from troubled backgrounds.

He began his service in Washington in 1981 when he was appointed special assistant to the Assistant Secretary of Education for Elementary and Secondary Education. In 1982 he was promoted to the position of Deputy Director of the National Institute for Education, the research arm of the Department of Education, which institute at that time had a budget of $53 million and a staff of 250 employees.

After a while the Director of that Institute parted and Bob was named the Acting Director. He expressed an interest in being considered as the permanent Director but the President chose someone else.

After that, when the new Director came in, for reasons I think we can all understand, he decided it was time to move on. But before leaving the Department of Education he was offered a promotion with a pay raise by the Secretary of Education into a position with primarily administrative responsibilities, and being a man who likes policy, again something we can all understand, here he chose not to accept that offer and instead accepted an offer in the White House.

And before I recite that segment of his biography, I want to point out that during his tenure at NIE, in November 1982, Secretary Bell sent a note to Bob Sweet, a handwritten note by the way, so we know it was not boilerplate from some staff person, saying "I just finished reading the 1982 accomplishments of NIE and you should feel quite proud of this, Bob. I was impressed. I appreciate all you do to support our endeavors here in the Department."

Bob moved over to the White House. He first accepted the position in the White House Office of Policy Development. He first served as a senior staff member for education in the Office of Policy Development. His responsibilities there included, among other things, responsibility for policy relating to disability programs.

There were people who criticized his selection for that position, but he disarmed those critics as I believe he will disarm the more reasonable of the critics of his current nomination, and I think that point of view is underscored by the testimony of Robert Muller before the Judiciary Committee.

Mr. Muller is a member of the National Council on Disability and he wrote to the committee saying that "Bob was deeply admired by all Americans with disability and colleagues alike while serving the President."

In 1985, when the White House Domestic Policy Council was created Bob was promoted to Deputy Executive Secretary. There he formulated a role formulating the President's drug policies and also served as chairman of the Working Group on Parental Role in Education, whose report was issued by Secretary Cavazos last year.

He was a member of the White House Working Group on the Family. He worked on the child obscenity amendments which the Congress adopted 2 years ago. And in addition to all of that, he was the Domestic Policy Council's liaison with the Department of Justice.

Finally, Mr. President, I want to note Bob's depth of knowledge and special interest and dedication to the problem of illiteracy among youth. There is a very, very high striking correlation between illiteracy and juvenile delinquency. It is not surprising that some 75 percent of juvenile delinquents are illiterate. Therefore, his interest and expertise in that area I think will serve him well.

Finally, I would comment on the charges some raised that the nominee is not qualified according to the statutory criteria. In fact the criteria are not perfectly clear. But if you want to read them very, very narrowly so as to exclude a candidate, you could exclude just about anybody if you want to read them narrowly enough.

In fact, the chairman, Senator BIDEN, noted that during the hearings by asking the rhetorical question: "Where do we find somebody we could not disqualify on these very grounds?" In fact the responsibilities of the Office of Juvenile Justice and Juvenile Delinquency Prevention are very broad, not just justice but juvenile delinquency prevention, and that is a goal and a quest to which the nominee has devoted his entire life.

I find it hard to give much credibility to those who think or suggest that he is unqualified for the office.

In any event, Mr. President, the nominee was sent to the floor by a vote of 9 to 5 by the Judiciary Committee notwithstanding an effort by certain groups to block the nomination. There is no organized opposition on the floor, no opposition to speak of. I understand the chairman of the committee expressed continued doubt about the qualifications but the nomination was reported 9 to 5 and I know of no intent on the part of any Senator to seek to block the nomination or to defeat the confirmation by the Senate.

I urge the Senate to confirm the nominee. I feel very strongly that he will do an outstanding job and that Senators will be well compensated for their confidence. I thank the Chair.

Mr. THURMOND. Mr. President, I rise today to voice my support for Mr. Robert W. Sweet, Jr., President Bush's nominee, to be the Administrator of the Office of Juvenile Justice and Delinquency Prevention.

Mr. Sweet was nominated on October 13, 1989, and a hearing was held on his nomination on March 1, 1990. Following his hearing, the Judiciary Committee voted 9 to 5 to favorably report Mr. Sweet's nomination to the full Senate for confirmation.

Upon reviewing Mr. Sweet's qualifications, I found that his experience will serve him well in the position for which he has been nominated. He began his professional career in Maine as a high school teacher. In 1972, he was appointed to serve on the Governor's Commission on Public Education for the State of New Hampshire. This same year, Mr. Sweet was elected school board representative where he served until 1978.

During 1981 and 1982, Mr. Sweet served as a special assistant at the U.S. Department of Education. From March until June 1982, he served in the position of Deputy Director of the National Institute of Education [NIE], and from June until January 1983, he was the Acting Director for NIE. From January until March 1983, he served as Executive Director of the National Council on Educational Research. In March 1983, he joined the White House where he served until 1985 as a senior staff member in the Office of Policy Development. His service with the White House continued when in December 1985, he was appointed as Deputy Executive Secretary of the Domestic Policy Council.

The Judiciary Committee has thoroughly reviewed his record. During Mr. Sweet's confirmation hearing he responded to numerous questions. His responses demonstrated that he has a true sensitivity and willingness to understand the needs of this Nation's youth. At his hearing, Mr. Robbie Callaway, Director of Government Relations for Boys Clubs of America, testified in support of Mr. Sweet's nomination. Mr. Callaway stated:

I was impressed with Mr. Sweet. The argument over semantics about whether he qualifies as is written in the Juvenile Justice Act is an argument over semantics * * * Bob Sweet meets the qualifications. We find Bob Sweet to be open, accessible, and willing to consider opposing viewpoints, which is what that office needs.

Mr. President, Mr. Sweet has demonstrated that he has the ability and knowledge to serve as Administrator of OJJDP. He possesses the attributes of manager and mediator, along with the ability to exercise the good judgment required to serve in this important position. For these reasons, I support the nomination of Mr. Sweet and urge my colleagues to also support his nomination.

Mr. ARMSTRONG. Mr. President, for the past 7 months Bob Sweet has been on the staff of the Senate Republican Policy Committee. Because of his expertise in education, his interest in the problem of illiteracy and the consequences of illiteracy for the young people of America, we asked Bob to prepare a policy paper titled "Illiteracy: Incurable Disease or Education Malpractice." This paper has now been distributed to well over 10,000 individuals including Governors, State legislators, educators, and interested citizens. The flow of letters and calls back to the committee from teachers, legislators, parents, and others tells me not only that Bob's work is first rate, but that he is in tune with real, not academic, concerns about problems young people face in this country.

Many of our young people are dropping out of school or never learning to read while they are in school, and many of these children end up on the streets of our cities, go on to a life of crime or enter the work force as illiterates, without the educational qualifications to get a decent job.

I know that Bob cares very deeply for the youth of America. And I know he will carry his commitment to eliminate illiteracy to his new responsibilities at the Department of Justice. Although the statistics on juvenile delinquents are incomplete, the evidence to date shows that up to 75 percent are illiterate, and nearly as many are school dropouts.

The Juvenile Justice and Delinquency Prevention Act emphasizes the importance of prevention as a way to reduce juvenile crime. Certainly teaching children to read won't cure the problem of juvenile deliquency totally, but if we can provide the tools of learning to young people who otherwise wouldn't have a chance to succeed, and will likely end up in the adult court system, our efforts will be worth it.

In considering the juvenile justice system, our attention is usually directed to the institutions—courts, judges, probation officers, juvenile homes—through which the law is applied to children charged with unacceptable behavior. But according to the Institute of Judicial Administration and the American Bar Association Juvenile Justice Standards Project, "the school is also an important part of the system of juvenile justice."

Bob has the background as an educator, parent, and for the past 8 years public servant to do an outstanding job as Administrator for the Office of Juvenile Justice and Delinquency Prevention.

While I am sorry to see Bob leave the staff of the Senate Republican Policy Committee, I am delighted he is taking on this new challenge. I know he will bring to the new job the same dedication, talent, and energy he demonstrated in his work with us.

Mr. KERRY. Mr. President, I wish to express my opposition to the nomination of Robert W. Sweet, Jr. as Administrator of the Office of Juvenile Justice and Deliquency Prevention.

The chairman and ranking members of the Judiciary Committee graciously permitted me to participate in the hearings regarding this nomination. As a former prosecutor who received substantial justice assistance funding in the mid-1970's, I know from personal experience how critical this relatively small Federal office can be in helping States respond to the problems posed by juvenile offenders.

At the outset of my participation in the hearings, I stated three areas of concerns about this nomination: Mr. Sweet's lack of background in juvenile justice; his record at the National Institute of Education, where he was fired by his superior, Secretary Terrell Bell; and his substantive views regarding juvenile justice.

Over the course of questions from the chairman of the committee, Senators SIMON, KOHL, GRASSLEY, SPECTER, and me, Mr. Sweet was given numerous opportunities to answer these questions. Based on the record from the hearing, which largely consists of Mr. Sweet's own testimony, I was forced to conclude that Mr. Sweet's testimony raised such serious questions about each of these areas that he should not be confirmed.

I will summarize below what I believe is the case against confirming Mr. Sweet, with references to the page numbers from Mr. Sweet's testimony.

A. SWEET'S LACK OF EXPERIENCE

The Administrator of the OJJDP has the responsibility to develop and implement juvenile deliquency policies and programs consistent with the provisions of its enabling legislation; he coordinates juvenile justice policies and programs among federal agencies; administers formula grants to the states to promote deinstitutionalization and separation of juvenile offenders; and conducts research and demonstration projects including law-related education, restitution, violent juvenile offender programs, and education, prevention and treatment services aimed at combating juvenile gangs.

The Act establishing the Office of Juvenile Justice and Delinquency Prevention requires that the OJJDP be headed by an Administrator who has "experience in juvenile justice programs." Mr. Sweet's resume shows no such experience; his testimony confirms his lack of such experience.

In his opening statement, Mr. Sweet described his background for the position of OJJDP Administrator as being "concerned about young people all my life." (25) In response to a question from Senator Simon about his participation in programs most relevant to the mission of OJJDP, Mr. Sweet recounted his experiences at summer camp programs primarily directed at children who had no contact with the criminal justice system. (28) Mr. Sweet testified that his "background has been in education, has been in reviewing or developing programs to provide kids the opportunity to learn to read." (37) Mr. Sweet said that his further relevant experience amounted to his management of the research agenda of the National Institute of Education during his

tenure there under Secretary Terrell Bell. (29)

Mr. Sweet confirmed that he had never published any articles regarding juvenile justice, never undertaken any research regarding juvenile justice, and never had any direct experience with any program currently administered by OJJDP. (53-54)

Mr. Sweet testified that his participation while at the White House in a working group on "the role of parents in educating their children," of which the then Administrator of OJJDP was a member, constituted this total experience with OJJDP. (54)

At no other point in the record did Mr. Sweet provide information indicating other experience in the area of juvenile justice.

On the basis of this testimony, I conclude that Mr. Sweet does not have the requisite experience to meet the statutory criteria established for the Administrator.

B. SWEET'S REMOVAL BY SECRETARY BELL AT THE NIE

Mr. Sweet's sole previous position at a federal agency, and one analogous to the OJJDP position, was as Deputy and then Acting Director of the National Institute of Education, positions which Mr. Sweet held for about a year before he was fired by President Reagan's Secretary of Education, Terrell Bell. According to a published memoir of Secretary Bell, Sweet had undertaken a series of actions which had throughly disrupted the Department. Press accounts characterized Sweet's actions as an "end-run" around his superiors, which directly resulted in his removal. (51, 96, 97)

During the hearing, I gave Mr. Sweet an opportunity to provide the Committee with an alternative explanation of his removal at NIE.

Mr. Sweet testified that he was removed because of conflicts with a "new director" at NIE, and that his record at NIE was "a good one," and offered no further rebuttal of Bell's account. (98)

The Senate ought not confirm a person as Administrator of OJJDP when the person's sole previous employment by a federal agency was so disruptive that his superiors had to force his removal.

Mr. Sweet's testimony did not rebut the other information on the public record stating that his presence at NIE was disruptive. The Senate should not take the risk that Sweet's NIE experience would be repeated at OJJDP. Accordingly, Mr. Sweet's nomination should not be confirmed on this second ground.

C. MR. SWEET'S SUBSTANTIVE POSITIONS

As defined by the office's enabling legislation, the Juvenile Justice and Delinquency Prevention Act ("the JJDPA"), the OJJDP's goals are:

1. To give a high priority to preventing juvenile delinquency;

2. To divert status offenders from the juvenile justice system into community-based programs;

3. To give greater attention to serious youth crime within the juvenile justice system;

4. To provide community based treatment for youth offenders as an alternative to custodial incarceration; and

5. To improve the quality of treatment of juveniles in the juvenile justice system.

Obviously, the Administrator of the Office of Juvenile Justice and Delinquency Prevention should be a person committed to the goals of that office, as defined by statute.

During his testimony, Mr. Sweet made clear that his own interests focused solely on a narrow area solely relevant to the first of the five goals. He demonstrated little knowledge of the other four areas, and made statements suggesting that he does not recognize or understand fundamental facts regarding juvenile delinquency which would be essential knowledge for an Administrator.

In response to questions by the Chairman, Mr. Sweet said he believed there were two aspects to his job as Administrator:

"One is . . . the necessity of our Nation returning to a strong family unit everywhere. That is, the strength of our Nation is the strength of our families . . . on the other hand, we can support programs that provide services and help to children in need." (42-43)

Mr. Sweet testified that following confirmation, he would undertake a review of all programs currently funded by OJJDP and would be an advocate "for those that are effectively doing the job." He refused to specify which programs currently supported he would eliminate. (72) Later, in response to written questions from me, Mr. Sweet stated that he is "not aware of any specific program funded by OJJDP that should not have received funding [in the past]." (Sweet Responses to Questions, March 7, 1990)

During his testimony, Mr. Sweet did specify his support for a few programs, amounting to a small fraction of OJJDP's mandate: "national juvenile judges," "juvenile corrections personnel training, "law related education," and "Boys Clubs." (73) He testified that as Administrator he would also support "drug education programs" (77) and literacy programs to train teachers to teach juvenile offenders how to read (80). In response to written questions, Mr. Sweet reaffirmed that it would be his intention as Administrator at OJJDP to focus the office on combatting illiteracy. (Sweet Responses to Questions, March 7, 1990)

As William W. Treanor, Director of the American Youth Work Center in Washington noted in his testimony, most of the areas to which Mr. Sweet would direct OJJDP's efforts are already being funded by much larger Agencies, such as the Office of Substance Abuse Prevention and the Family Youth Service Administration. (128)

By contrast, Mr. Sweet's testimony showed little regard for the greater proportion of the programs funded today by OJJDP. Regarding the federal role in providing alternatives to incarceration for juvenile offenders, which today constitutes 70 percent of the funding for the program, Mr. Sweet testified that he believed that this "program had essentially been completed, that States in fact were in compliance in general with that provision, and that [funding for it by the federal government] was no longer necessary." (62-63)

In response to a question from Senator Specter, Mr. Sweet testified that separating juveniles from adult offenders was "accomplished now by State requirement." (87)

In fact, as the Chairman noted, at least 32 states were not in compliance with standards requiring them to provide alternatives to incarceration for juveniles as recently as 1988, according to an OJJDP report. (63)

In response to a question from the Chairman, reiterating a question earlier asked by Senator Specter, "are you committed to fighting for funding to the tune of $72 million," the current level of funding for the OJJDP, Mr. Sweet testified: "No." (108-109)

Mr. Sweet also professed ignorance of important portions of the OJJDP mandate. For example, in response to a question by Senator Specter, Mr. Sweet testified that runaways are "one of the big problems that we face, particularly in cities, and that there are no places for them. I can't say that I have studied it in depth, but it is, again, part of this whole issue that I hope to become more acquainted with." (89)

In short, Mr. Sweet's testimony demonstrated a relative indifference to the programs and policies that are at the heart of juvenile justice and delinquency prevention, including removing juveniles from the adult prison population.

At a time when much of our Nation is at risk from juvenile crime, with violent crime increasing as a result of juvenile involvement in crack cocaine and other narcotics, Mr. Sweet's approach to juvenile justice is naive at best, and in any case, not congruent with the statutory requirements of the position to which he has been nominated.

In summary, the record before the Senate does not justify the confirmation of Mr. Sweet to this position.

The problems of the 700,000 or so juveniles who will be arrested this year, and the nearly 100,000 juveniles who are incarcerated nationally, merit the nomination of an individual who has more to offer them than good intentions, a belief in strengthening the family, and a program to cure illiteracy.

Although I recognize that Mr. Sweet will be confirmed and I am not objecting to a voice vote on the nomination, given the Judiciary Committee's vote on Mr. Sweet, I believe he is not the right person for this job. Accordingly, I have opposed this nomination.

I do wish Mr. Sweet the best in the performance of this job and hope that he will do much to dispell my concerns in his handling of this position following confirmation.

Mr. DOLE. Mr. President, I rise today in support of the President's nomination of Robert Sweet, Jr., to be Administrator of the Justice Department's Office of Juvenile Justice and Delinquency Prevention [OJJDP].

Without a doubt, the OJJDP is one of the most important offices within the Justice Department. As the office chiefly responsible for assisting the States in their efforts to remove juveniles from adult jails, the OJJDP is on the frontlines in our Nation's war against drugs, against child abuse, and against the deep-rooted societal problems that lead to the tragedy of juvenile delinquency.

During the past several months, we have heard a lot about Mr. Sweet's so-called lack of qualifications for the Administrator's job.

Mr. President, this criticism is misplaced, and in fact, it is unfair.

A former high school teacher, a school board member, an educational textbook salesman and consultant, a member of the New Hampshire Governor's Commission on Public Educa-

tion, and a husband and father of five lovely children, I suspect that Mr. Sweet knows something about juveniles. And I suspect that he knows something about what it takes to keep our children out of jail, off the streets, and on the right track to be productive and contributing members of society.

A native of New Hampshire, Mr. Sweet also has some important Washington experience, most notably as a member of the White House Domestic Policy Council and as a senior staff member of the Department of Education's Office of Policy Development. I am certain that this experience will serve Mr. Sweet very well and will enhance his effectiveness in the Administrator's job.

Mr. President, I am proud to support this nomination, and I urge my colleagues to do so as well.

Mr. GRASSLEY. Mr. President, I rise to support the nomination of Robert Sweet, Jr., to be the Administrator of the Office of Juvenile Justice and Delinquency Prevention.

Mr. Sweet's nomination hearing before the Senate Judiciary Committee shed some needed light on his qualifications to manage this important office within the Department of Justice.

Mr. Sweet has spent many years being concerned—as both a parent and in his professional life—that young people develop into contributing members of society.

Mr. Sweet has been a teacher; he has volunteered to work with children with disabilities; he has served as president of his local PTA; he has been a member and chairman of his regional school board in New Hampshire; and he has served on the Governor's Commission on Education in New Hampshire.

During his service in Washington, Mr. Sweet has continued his devotion to our Nation's youth by serving in various positions in the Federal Department of Education.

As a member of the President's Domestic Policy Council, Mr. Sweet served as the council's liaison to the Department of Justice.

While a member of the Domestic Policy Council, Mr. Sweet was involved in the formulation of the President's antidrug policies, along with research into the parents' role in educating our youth.

As a member of the White House Working Group on the Family, Mr. Sweet was actively involved in proposing amendments to the original Child Protection and Obscenity Enforcement Act, which was ultimately enacted into law in 1988.

Mr. Sweet is also an author of the study entitled: "Illiteracy: Incurable Disease or Education Malpractice?" This study is timely, considering that some 75 percent of juvenile delinquents are illiterate.

Mr. President, Robert Sweet is not a "member of the club."

As the director of government relations for the Boys' Clubs of America, Robbie Callaway, noted in his testimony before the Judiciary Committee, he does not know Mr. Sweet personally or professionally.

But during a 3-hour session with Mr. Sweet, Mr. Callaway came away "impressed with his, Mr. Sweet's, answers, his attitude, and his general approach to juvenile justice, delinquency prevention, and the American family."

Mr. Callaway also introduced Mr. Sweet to the members and staffs of the Boys' and Girls' Clubs of Philadelphia, and Wilmington, DE.

Mr. Callaway reported to the Judiciary Committee that Mr. Sweet was subjected to intense grilling by "three of the best local program operators, according to Mr. Callaway, in the Nation."

Mr. Callaway informed the members of the committee that Mr. Sweet impressed these folks so much that they volunteered to write strong letters of support for Mr. Sweet.

Mr. President, much has been made of Robert Sweet's alleged lack of specific experience in the area of juvenile justice and delinquency problems.

As Mr. Callaway pointed out to us during his appearance before the committee, the American Bar Association's Juvenile Justice Standards Project discusses juvenile justice in this way:

> Attention is directed more broadly to the conditions and circumstances that will bring about fair and decent treatment of children, including the satisfaction of basic human needs for love, care, food, and shelter.

They continue:

> A just world for children in America's society certainly depends upon the child's family life and his or her life in school. The school is also an important part of the system of juvenile justice.

Those experienced in the ways of inside-the-beltway Washington know that criticism of an executive branch nominee usually means that vested interests may find their position in jeopardy.

As I said during Mr. Sweet's nomination hearing, I believe it is the right of any individual or organization to criticize the given nominee of a given administration.

However, I also believe that it is incumbent upon the Members of the Senate to thoroughly and objectively investigate a given nominee—and not just adopt the position of his or her critics.

I believe that if my colleagues are honest and objective in their assessment of Mr. Sweet's background and experience, they will agree with me and conclude that he is the right person to become the next administrator of the Office of Juvenile Justice and Delinquency Prevention.

I urge my colleagues to support Mr. Sweet's nomination for this position.

Mr. RIEGLE. Am I correct in understanding the Sweet nomination is ready to be acted upon?

The PRESIDING OFFICER. The Senator is correct. That is the pending business.

All time having expired, the question is, Will the Senate advise and consent to the nomination of Robert W. Sweet, of Virginia, to be Administrator of the Office of Juvenile Justice and Delinquency Prevention.

All those in favor, signify by saying aye; those opposed nay.

So the nomination was confirmed.

Mr. RIEGLE. Mr. President, I move to reconsider the vote.

Mr. HUMPHREY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order the President is notified of the nomination.

Mr. KOHL. Mr. President, today the Senate voted to confirm Mr. Robert Sweet to head the Office of Juvenile Justice and Delinquency Prevention.

This office oversees the major Federal Justice Program serving 700,000 young people a year. It is the best opportunity we have to save some kids from a life of crime and violence. I have therefore considered this nomination very carefully.

I still have concerns about Mr. Sweet's qualifications and background. While he has experience as a teacher, textbook salesman, and White House policy analyst, this may not be the right type of experience for the Director of a program serving high risk young people. And I remain concerned about reports that Mr. Sweet injected politics into the research process during his tenure at the National Institute on Education. Research and demonstration projects are too important to be selected on the basis of ideology.

But I was impressed by Mr. Sweet's sincerity. He displayed an earnest desire to help young people—during his hearing and in his meeting with me. For that, he is to be commended. I am going to be watching carefully to make sure he fulfills his promises.

Mr. DANFORTH. Mr. President, I ask unanimous consent to proceed as in legislative session morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE RULES, SENATE ETHICS, AND THE RYAN NOMINATION

Mr. DANFORTH. Mr. President, I rise to discuss a matter that I would just as soon not discuss. It is one of the hard things that I have had to do

in the time that I have served as U.S. Senator because it raises fundamental questions about Senate rules and Senate ethics. I do not rejoice in doing that at all. I have enjoyed, during my time in the Senate, a very fine relationship with Senators of all political persuasions, and I cherish that relationship very, very much.

But there are circumstances of values and of principals that arise, and when they do, I think that there is a duty to speak and to act.

So I rise to discuss a matter that to me has been extremely serious and extremely troubling. It has to do with what appears to be a leak or leaks from the Senate to the national press of a matter that was in or may have been in the FBI file of the nominee who was just confirmed.

Mr. President, my reconstruction of the facts is as follows: Around 6 p.m. on Friday, March 30, an ABC News White House reporter informed Alixe Glen, of the White House press office, that ABC News had been told by a Senator and two Senate staff aides that Mr. Ryan's FBI report includes information relating to occasional drug use two decades ago. ABC News withheld its report on this information while seeking White House comment.

On that same evening, Friday, March 30, the NBC Evening News included a report by Andrea Mitchell on the Ryan nomination. Near the end of that report, Andrea Mitchell stated:

> In addition to Ryan's lack of experience, Senators told NBC News they are troubled by information in his FBI file—occasional use of cocaine two decades ago.

Around 7:30 or 8 p.m. on Friday, March 30, the ABC News White House reporter once again told Alixe Glen, of the White House press office, that the information on drug use by Mr. Ryan contained in the FBI report was provided to ABC News by a Senator and his two staff aides.

Rule XXIX of the Standing Rules of the Senate applies to executive sessions. Paragraph 3 of rule XXIX states:

> All confidential communications made by the President of the United States to the Senate shall be by the Senators and the officers of the Senate kept secret.

Paragraph 6 of rule XXIX further states:

> Wherever, by the request of the Senate or any committee thereof, any documents or papers shall be communicated to the Senate by the President or the head of any Department relating to any matter pending in the Senate, the proceedings in regard to which are secret or confidential under the rules, said documents and papers shall be considered as confidential, and shall not be disclosed without leave of the Senate.

During the debate on the Tower nomination last year, there was a question about whether information from an FBI report on a nominee was a confidential communication subject to rule XXIX. In response to the parliamentary inquiry by Senator DOLE, The Presiding Officer stated:

> The FBI report is a document that has been given to the Congress in such confidentiality, and the confidentiality must be abided.

The Presiding Officer went on to quote from paragraphs 3 of rule XXIX.

Paragraph 5 of rule XXIX establishes the seriousness of this rule of confidentiality:

> Any Senator or officer of the Senate who shall disclose the secret or confidential business or proceedings of the Senate shall be liable, if a Senator, to suffer expulsion from the body; and if an officer, to dismissal from the service of the Senate, and punishment for contempt.

The conversation between the ABC News reporter and the White House press office, together with the report of NBC News that same evening, constitutes sufficient credible information to suggest that a serious violation of Senate rules has been made by a Member of the Senate and/or Senate staff. Accordingly, I am requesting that the Senate Select Committee on Ethics instigate a preliminary inquiry of this matter.

Mr. President, why is this a serious matter? I think that it is self-evident that it is. It is a serious matter because, if true—and I do not prejudge the truth; there is some hearsay involved in this information—but, if true, this would constitute a direct violation of Senate rules. I think it is particularly important because it causes severe damage to a man, a human being, and to his family.

I spoke yesterday with Mr. Ryan on the telephone, and he said to me, "I have an 8-year-old daughter and I'm concerned about how I deal with this." It damages that individual, and I would ask, to what possible end? For what conceivable purpose? What end could be served by this disclosure to network news?

The President stated several weeks ago, to the best of my recollection, having read the newspaper article, that as far as the administration was concerned prior drug use was not a disqualification, and my guess is that virtually every Member of the Senate, if told that 19 years ago somebody has used drugs, would discount that and would not consider that a cause for disqualification.

It is interesting that during the debate on the floor of the Senate today this issue, at least to my knowledge, was not even raised, which would further confirm in my mind that as far as the confirmability of a nominee is concerned, this is not considered to be an impediment. So why, Mr. President, was it done? Why, if it was done, would somebody try to peddle to the network news information that is contained, or may be contained, in an FBI report?

I think it is serious also because of the effect this has on future nominees and on the search of this administration and future administrations for suitable people to hold confirmable positions.

I guess almost everybody has some dark little secret way back in his or her past. All of us know the great care that the FBI takes in interviewing sometimes dozens of people, even for the most ordinary job, jobs that have nothing to do with national security. Sometimes the FBI interviews two, three, or four dozen people to try to find out all there is about the potential nominee. And they ask all kinds of questions of the candidate.

I believe that if matters are allowed to stand as they are now, the message to people who are interviewed by the FBI is that if you tell the truth, if you are absolutely honest, if you do not commit perjury, if you do not lie, then watch out because the information that you tell about yourself and your background and your family, sometimes sensitive, embarrassing information, can become public. And in this case, Mr. President, became public not in a whisper campaign, not something that was just whispered in some hallway somewhere, but what is disclosed to the FBI can find its way onto network news.

I cannot tell any committee how to do its work, but I think that this matter deserves priority consideration because it does not just reflect on one person or a few staffers. It really reflects on the Senate, and it does real damage to this Government and real damage to this country, and we have to stop it. We cannot stop it if we sweep it under the rug.

So, Mr. President, I can tell you I have not enjoyed this, and I do not enjoy anything that could conceivably be called tattling to the Ethics Committee or to anybody else. But this leak, if it was a leak, is an absolutely awful precedent. I do not think we can ignore it. So I raise the issue for the Senate.

I yield the floor.

The PRESIDING OFFICER (Mr. SIMON). The Senator from Arizona is recognized.

Mr. McCAIN. Mr. President, I would like to make a few brief remarks concerning not so much the issue that was just raised by my friend and colleague from Missouri, who, of course, speaks in very persuasive and eloquent tones, but I am concerned about the situation that exists where individuals' lives and families are subjected to terrible experiences which, frankly, they neither warrant nor deserve.

May I begin by saying, Mr. President, I do not know Mr. Ryan. I had never met him in my life. I had never

had any contact with him of any kind. The first time I had ever heard Mr. Ryan's name was when I was notified, as was everyone else, that he was the President's nominee for this very difficult and, indeed, challenging, to say the least, position. But by accident, Mr. President, last night I was getting on the subway to come over for a vote, and our colleague from Virginia, Senator WARNER, and an individual got on the subway. He introduced himself to me as Mr. Ryan. I shook hands with him and wished him luck. And as the subway was proceeding, I said to him, "This must be very difficult for your family."

Mr. Ryan responded that his 8-year-old daughter had come home from school that day absolutely devastated by hearing the information which had been circulated in the media, the result of a confidential FBI report that Mr. Ryan had engaged in the use of illegal substances.

Mr. President, I think all of us who are parents grieve for a parent who is faced with that kind of a situation, particularly under the circumstances, as I understand them, that Mr. Ryan provided this information with the assurance that that information would be kept confidential. What an individual chooses to disclose or discuss with his family is certainly a private matter and, who knows, perhaps at some point in time Mr. Ryan would have liked to have discussed the entire issue of drugs and the evils that that terrible scourge inflicts on our society. I do not believe any parent, much less Mr. Ryan, would like to have his daughter receive that kind of information in that fashion.

So my heart goes out to Mr. Ryan, Mr. President, and his family at this very difficult time. But perhaps more importantly, I would ask my colleagues what effect can this have—and I remind my colleagues this is not the first time that FBI information has been leaked to the public and to the media—what effect does this kind of tragic event have on men and women who we might ask to serve in different capacities in the Government of the United States who have to undergo FBI investigations.

Mr. President, does this mean that the individual lies under oath in order to conceal this information from being made public, or does it mean that individual gives this information to the FBI knowing that if his nomination is surrounded by sufficient controversy that information will become public knowledge? If those are the only two choices I think it is going to be extremely difficult if not impossible to obtain the services of high quality men and women in the service of the United States of America.

Mr. President, I think it is one thing to read in the media of some information that has been leaked. We all know that this town to a large degree functions by the business of leaking. But I think the events that we saw take place in the case of Mr. Ryan, are something else. I believe it is up to all of us to try to see that there is never a repetition of this kind of episode not only for the benefit of the individual but for the benefit of the institution, and the benefit of the Government of the United States.

So, Mr. President, I hope that in closing all of us will extend our sympathy to Mr. Ryan and his family, and at the same time resolve that we will never see this kind of incident take place again.

I yield the floor.

Mr. RIEGLE. Mr. President, I want to say a couple of things with respect to this. I heard the comments of the Senator from Missouri and the Senator from Arizona. This matter was discussed in part today on the floor in colloquy between Senator DOLE and Senator WARNER and myself. So with reference to a point earlier that the Senator from Missouri made as to whether or not this issue had arisen on the floor today, in fact it had, and was discussed I think appropriately at that time. I would refer him to that part of the RECORD once the RECORD is printed tomorrow.

With respect to the basic point that has been raised, I very strongly agree with the point that has been made and so stated earlier today and in fact stated 2 or 3 days ago. I condemn and I think every Senator must condemn the release of any confidential information that was contained in an FBI report. That is a fundamental issue, and there is no question about it.

When information came out, and I have no knowledge myself of how that would have occurred, that was my instantaneous reaction, and I made a public statement to that effect at the time. I repeated it today on the floor, and I repeat it again now.

So there should be no question about that. As a matter of fact, when the issue arose in terms of members of the committee on both sides of the aisle having access to the information, that request was made to the White House because of the information that was in the file being of the sort that we know it to have been. The information was made available to the committee members on a confidential basis for their assessment and for their evaluation.

I would not try to characterize any member's reaction to it. I think every member looked at it and drew their own judgments and conclusions with respect to it.

I say that I heard all of the debate today. I did not hear anybody raise that issue as a substantive matter with respect to the suitability of this nominee to otherwise be eligible for this job.

Mr. McCAIN. Will my friend from Michigan yield for a moment?

Mr. RIEGLE. Very briefly.

Mr. McCAIN. I would like to reiterate my statement to my friend from Michigan. I make no allegations, and point no fingers, I grieve for the situation.

Mr. RIEGLE. I understand. I appreciate that point. I think it is a point that needs to be made. I made this point 2 or 3 days ago in a press release immediately after the information was made public because I was very troubled and disturbed about it, and I am now. I think the rules are absolute in that respect.

I will relate my impression of how this matter began to gain the kind of intense curiosity from the press that it did. I have discussed this as well publicly in the debate. I have discussed this with Senator WARNER in meeting with the nominee himself earlier this morning when the three of us met. When we were in the course of the discussion leading up to the vote in the committee 2 days ago on the Ryan nomination, Senator WARNER, who, of course, has been a very strong and persuasive advocate in behalf of Mr. Ryan, asked to come to the committee and actually participate in the debate leading to the vote on the nomination. We accorded him that privilege. It is somewhat unusual to have that happen, but he had earlier appeared during the nomination hearing itself and we try to make that accommodation to any Senator.

I will describe the scene. The committee room was packed. I think there were eight or nine cameras, various television networks and so forth in the back of the room. In the course of Senator WARNER's comments, and I have asked that the transcript if it is printed be brought over so I can refer to it directly. So I want the Senator from Missouri to understand that I am responding here from memory. So I want to see the actual written words on paper. I do not have those in front of me.

But in the course of Senator WARNER's comments in behalf of the nominee he made a reference to the extraordinary courage or forthrightness of the nominee, in effect bringing forward information about his personal history in some manner of words that were chosen would have been difficult for him to do. And I think very clearly to those of us on the committee this was a reference to the material that was in the FBI file. In that setting it was I detected immediately of great interest to the press in the room as to what that referred to because it was obviously a reference if you will to something that would seem to have a materiality to it.

I have said this at other places, and I have said it to Senator WARNER. I do

not say this in a disparaging way but the Senator has raised a very important question and it deserves a very specific, detailed response. So to the extent I can at this point tell the Senator what I know, so as part of this RECORD, it should be so.

In any event, following that comment which you could sort of detect immediate reaction with the very large press, what is that all about, and I think that sort of set the press off to a hunt with what that may have been—some sort of a veiled reference to.

Then following that point as best my memory recalls it, by Senator WARNER, which had in a sense touched on something, Senator GRAHAM from Florida as he I recall asked, inquired, if Members of the Senate as a whole would have access to the same material that members of the committee had access to.

So these things followed one after the other. In my response at that time was I felt that all information that had been made available to the members of the committee should obviously likewise be made available to the Members of the Senate. And that was it. We moved on from that point, and shortly thereafter I think the vote came.

I think it is fair to say that engendered a terrific press curiosity. I remember as I was coming over a press person coming up to me, and my saying, look, you have heard what I have to say, and I was on my way to something else. That was it.

I cannot enlighten the Senator beyond that, although I can give him one other piece of information that may relate to this. I had another Senator say to me, I cannot recall right now who that was, I will try to do that; that, as they were coming into the committee room that day, they overheard members of the staff, staff people, as I understood it, and this is a recollection, something I cannot put names on now. They overheard staff members of the Treasury Department standing in the hallway talking to other members coming into the room about this very issue. That is secondhand, and I cannot, from memory, tell you who it was that would have said that to me. Somebody said that to me. It may or may not be an accurate account. You know as much as I know with respect to this issue.

With regard to the discussion on the floor earlier today, I think it was made very clear that matters contained in FBI files are privileged information, are not to be released, and I made my own comments with respect to my understanding of the events in the past with respect to this nominee and expressed my own view as to why I thought they, speaking as one Senator, ought not be part of the evaluation of the suitability of this candidate.

In any event, that is as much as I can provide in the way of enlightenment on the situation to the Senator.

Mr. DANFORTH. Well, I appreciate the chairman's explanation. It also is a very strong statement about the impropriety of what happened.

I want to, again, quote what Andrea Mitchell said on NBC News last Friday night. She said:

> In addition to Ryan's lack of experience, Senators told NBC News they are troubled by information in this FBI file—occasional use of cocaine two decades ago.

In other words, the statement that Andrea Mitchell made on television was that NBC News was told by Senators, plural, and that they are troubled by information in his FBI file.

Further, the specific comment was made by Andrea Mitchell that what they were troubled by was something very concrete, very specific, "the occasional use of cocaine," a specific kind of drug, at a specific point in time, two decades ago.

Similarly, I spoke with Alixe Glen of the White House today, and her statement is that, a reporter, a White House ABC News reporter, visited her in her office and said that ABC news had been told by a Senator and two Senate staff aides that Mr. Ryan's FBI report includes information relating to occasional drug use.

So, granted, this White House statement, at least coming from me, constitutes hearsay or double hearsay. But the statement is, for whatever its evidentiary value, that the FBI report was leaked by a specific Senator and by two Senate staff aides. In other words, it was not just said as part of the general noise level around the hearing room.

All I know is what I read to the Senate. I do not know anything else. But I do know that these statements are specific statements, not general statements, and that if they are true—and I do not purport to judge the truth of them; that is what committees are for, not me. The last thing I am is some kind of investigator. I do not claim to be that, I do not see myself in that role, and I do not like this. I think that is what committees are for, and I really think that it is important that the facts be ascertained and that appropriate action be taken, whatever the facts are and whatever action is appropriate.

It would appear from the clear reading of the rules that the action is exceptionally dramatic. I am told that the first person ever expelled from the Senate was expelled for a violation of the forerunner of this particular rule.

So I thank the Senator for his explanation. I also thank the Senator for his understanding and for his general comments.

Mr. WARNER. I ask unanimous consent that the Senator from Virginia might proceed for not more than a minute and a half with reference to a unanimous-consent request for purposes of putting something in the RECORD.

The PRESIDING OFFICER (Mr. DODD). Without objection, it is so ordered. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, I was not present on the floor and just was told excerpts from a colloquy that occurred here earlier with reference to the subject of the FBI report and my name was invoked and the fact that I had the opportunity to speak to the Committee on Banking in the course of its markup session.

Earlier today I was given by committee staff a copy of a transcript which purports to be the transcript of a portion of that meeting wherein I was granted the privilege to address the committee by the distinguished chairman.

Mr. President, I can only say about the FBI report question: I never asked to see the report; I have never seen the report.

I ask unanimous consent that my statement before the Banking Committee—I have no way of authenticating the accuracy of it—it is a transcript—be included in the RECORD right behind the statements by the chairman with reference to the Senator from Virginia.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

> The CHAIRMAN. Let me just say that normally, at least within my memory on the Committee, when we have gone into a markup situation or we are going to report out a nominee, we normally retain our discussion within the Members of the Committee. We have got an extraordinary situation that Senator Warner, who came and introduced the nominee, who is not a Member of our Committee, has a very strong feeling about it and he has asked if we would allow him to make a brief personal comment on this matter. I am prepared to do that, and I would ask, without objection, that Senator Warner have the opportunity to make a comment.
>
> Is there objection?
>
> [No response.]
>
> The CHAIRMAN. Hearing none. Senator Warner.
>
> Senator WARNER. Thank you, Mr. Chairman. I appreciate the courtesies that you and each Member of this Committee on both sides have extended me in this most unusual hearing.
>
> I would like to summarize very briefly this Senator's view of the process in which we now find ourselves, and how I, were I in your position, would try and resolve this decision.
>
> It seems to me in every human being there are three characteristics that we must look for to take on a heavy responsibility:
>
> One, is he or she intelligent? And there has been no question—I followed this Committee's proceeding carefully—no question about this man's intelligence. He has risen in a profession which is highly competitive to a position of responsibility in a very

large, major international law firm in which he is considered one of the four or five individuals bringing in the greatest amount of business and overseeing the operations of that firm.

Second, is the man honest? And that is so important in today's problems. Gentlemen, there is no question that has been raised about his honesty in this Committee. For others, this Committee possesses information, knowing full well that he had the courage to disclose everything about his life. To me, that puts the imprint of unquestionable honesty on this individual.

The third qualification is: Has the man or the woman got the toughness, the firmness, the judgment to make difficult decisions? I stayed with him last night, consulting with him and with others way into the evening, and quite obviously I had to advise him, as did others, that this was going to be a very close vote this morning; that there would be a thorough discussion, as there has been; and if this Committee were to vote him to the Floor, he could expect a very intense debate on the Floor.

Now he could have, I think with complete dignity, slipped away quietly into the evening and written that three-paragraph letter to the President, to the leadership and the membership of this Committee, and said, obviously he accepts the judgment of many, and that is it. It is a one-day story, and he resumes his life and goes on.

Well, he turned to me and he said: What is your recommendation? You know this institution. Now put yourself in that spot. We all come up here. We take pleasure in it. We sit with our nominees, take our pictures, it makes good reading back home, very often. But then there comes this unsual case when you have got to give that individual your best judgment, recognizing that the President of the United States has made a decision that he wants this individual; that the Secretary of the Treasury—one of our own colleagues, not just another Secretary, but a former United States Senator whose judgment we respected throughout his career here in this institution—I looked him in the eye and I said, "go for it." Because this question is so important that it needs the judgment of the full United States Senate, as provided by the Constitution.

The Constitution does not say "a" committee makes the decision. It says "the Senate." I said that I have been here long enough to know that there are instances where we have partisan differences from time to time, but the complexity of this segment of the financial industry is so intense, so complex, that you would be doing a service to the Nation and to the Senate and to the Presidency to have it fully discussed from the Floor of the United States Senate and to have the minds of all 100 Senators focused on this problem.

He consulted with his wife, and we talked again this morning and it was his unequivocal decision to go for it. I hope that within the judgment of this Committee there are sufficient votes to allow the Senate as a whole to address this nomination in the context of the seriousness of the problem in this segment of our financial community.

Thank you for the courtesy.

The CHAIRMAN. Thank you, Senator Warner.

Senator DODD. Mr. Chairman, I would ask unanimous consent that the statement I have be included in the RECORD.

The CHAIRMAN. Senator Dodd has asked unanimous consent to insert a statement in the RECORD, and we shall do so at this point.

[The prepared statement of Senator DODD follows.]

The CHAIRMAN. Senator Graham.

Senator GRAHAM. Mr. Chairman, I would like to ask a question. If this Committee does send this nominee to the Senate Floor, would all Members of the Senate have access to the same information that Members of this Committee have had access to, information which for some of us have been a factor in our decision?

Mr. RIEGLE. Mr. President, I normally do not object. But I would ask unanimous consent to proceed just briefly to respond to what the Senator said because it is an important record that we are attempting to establish. We have been working on it all day long in one form or another.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. RIEGLE. I think the Senator from Virginia finished. I seek the floor in my own right.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. I ask unanimous consent to proceed for 3 minutes with respect to this subject matter just raised by the Senator from Virginia.

The PRESIDING OFFICER. Is there objection?

Mr. WARNER. Mr. President, reserving the right to object, and I shall not object, then I ask for an additional 3 minutes following the comments from the Senator from Michigan.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. We may need more than that. But in any event, let me say that what occasioned this was a statement made earlier by the Senator from Missouri on his concern about information in the FBI file having been made public.

The Senator knows my view on that. I have stated it very forcefully, about the propriety of protecting that information. I made a very strong statement about it.

In any event, in the comment to him, I was going back to the session in our committee where we were approaching the vote and the markup, and I made a reference to a comment that the Senator from Virginia had made. As he recalls, he came in and made a very forceful case in behalf of Mr. Ryan.

And on page 52 of that transcript, I made a general reference because I did not have the material in front of me then and I do now, and I take it the Senator has a copy in his hand as well.

I just read from page 52. The Senator had spoken here first of all about the nominee's intelligence. Then he says:

Second, is the man honest? And that is so important in today's problems. Gentlemen, there is no question that has been raised about his honesty in this Committee. For others, this Committee possesses information, knowing full well that he had the courage to disclose everything about his life. To me, that puts the imprint of unquestionable honesty on this individual.

Now, that is obviously a reference to something, I mean a very——

Mr. WARNER. Mr. President, I will be happy to answer what the reference is to. The Senator may go ahead and finish his statement.

Mr. RIEGLE. In any event, I made the observation earlier—I need to continue on down to finish reciting the Senator's comment. He then went on to say:

> The third qualification is: Has the man or the women got the toughness, the firmness, the judgment to make difficult decisions? I stayed with him last night, consulting with him and with others way into the evening, and quite obviously I had to advise him, as did others, that this was going to be a very close vote this morning; that there would be a thorough discussion, as there has been; and if this Committee were to vote him to the Floor, he could expect a very intense debate on the Floor.
>
> Now he could have, I think with complete dignity, slipped away quietly into the evening and written that three-paragraph letter to the President, to the leadership * * *.

And then I am going to come down here because there is one other line I was looking for here.

Well, it comes on down through the remainder of page 53. We will put all of this in the RECORD so it is there in its full context. It comes down on to page 54 where you conclude or near your conclusion when you say:

> He consulted with his wife, and we talked again this morning and it was his unequivocal decisions to go for it.

I ask unanimous consent to proceed for 2 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. And a like amount of time for the Senator from Virginia.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. In any event, after making that comment, with whatever he may have had in mind with respect to this point about his honesty and presenting information that was in the possession of the committee and the courage to disclose everything, then that was followed by Senator Graham inquiring, immediately following the comments of the Senator from Virginia: "If this committee does send this nominee to the Senate floor, would all Members of the Senate have access to the same information that members of this committee have had access to, information which for some of us has been a factor in our decision?"

And my clear sense at the time was that that remark by Senator GRAHAM following the remarks of the Senator from Virginia, I took to be—just giving the Senator my judgment, having sat there, speaking for myself—I took his comment to be a reference back to

what the Senator from Virginia had previously said.

In any case, I said to Senator DANFORTH earlier on the floor, as I was sitting there chairing that discussion, I sensed and detected a real quick sense of strong interest in what the Senator might be referring to by that whole bank of press people that were across the back of the room.

Mr. WARNER. I was there right there. No one made inquiry.

And I further ask unanimous consent to place in the RECORD a document which I have in mind, namely a very voluminous questionnaire known as Standard Form 86 filled out by the nominee—he said he only had one night in which to do it—and in which there were many, many questions in which he fully disclosed everything about his life.

And when the questionnaire is read in the context of what is said here, I think it is quite clear what this Senator had in mind. And having not seen the FBI report before this statement by the Senator from Virginia, nor have I seen it since, I do not think there is any basis on which to implicate the Senator from Virginia in whatever discussions are taking place about the FBI report.

The PRESIDING OFFICER. The Chair would inform the Senators the time of the Senator from Michigan has expired.

The Senator from Virginia may continue.

Mr. WARNER. Mr. President, I will be happy to yield the balance of my time. I think I should like to put in the RECORD both the transcript of the hearing, in which I was present and made four or five points with the consent of the members of the committee, for which I express my profound appreciation, and I made the statement that he had the courage to disclose everything about his life.

I shall put in, Mr. President, following my statement, or I think I would put it in at the end of the colloquy so as not to break the sequence, the second document which would be an insertion by the Senator from Virginia, a copy of the Standard Form 86 in blank from that is filled out by persons who are being considered for positions of this high importance.

That would give some understanding as to what I was referring to at the time this reference was made.

Mr. RIEGLE. Mr. President, if the Senator would yield.

The PRESIDING OFFICER. The Senator from Virginia has time and may yield to the Senator.

Mr. RIEGLE. Will the Senator yield?

Mr. WARNER. Yes.

Mr. RIEGLE. I wish to add a comment or two here. In terms of my response to Senator DANFORTH, I just again say to the Senator from Virginia—he and I know each other very well—I am not attempting to impute any different meaning to what he would have said that day and what he had in mind with the remarks that he made.

I can tell you this because I was there and I was paying attention when that comment was made——

Mr. WARNER. Which comment?

Mr. RIEGLE. The comment on page 52.

> Gentlemen, there is no question that has been raised about his honesty to this committee. For others, this Committee possesses information, knowing full well that he had the courage to disclose everything about his life.

Mr. WARNER. And that is for other Senators who were not present in the hearing.

Mr. RIEGLE. All I am saying is that when that statement on page 52 was made, it carried an implication. We all remember very well the facts about our own biography. That does not require any special courage or mean that the committee somehow possesses information that maybe others do not possess.

I think, unwittingly as it may have been, that statement on page 52 carried, at least in the impression of this Senator who was there, an intense——

Mr. WARNER. Unwittingly on whose part; "unwittingly" refers to whom?

Mr. RIEGLE. I take no quarrel with what the Senator from Virginia's intention was or to what his reference was. But, I say that, taking what you just said is your intention, I think that that comment, unwittingly by the Senator from Virginia, carried a message or an insinuation to the press that I do not think the Senator intended to in terms of what he is now saying. But, I think it had that effect.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. RIEGLE. I ask unanimous consent that the completed basic statement received by the committee concerning Mr. Ryan's background be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. RIEGLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. RIEGLE. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. With respect to this discussion that Senator WARNER and I have had very late in this session, I want to just clarify that there are three items of information that we receive on nominees in the Banking Committee. We get a basic statement that is called Statement for Completion by Presidential Nominees, which is essentially a résumé of Government experience, previous jobs, published writings, et cetera, which we received from Mr. Ryan and which is printed in the committee report. We made this committee report a part of the RECORD in full earlier, so that information is there.

We also receive a second report that is a financial disclosure report which is available to the committee for review, which we do not make a part of the RECORD but assess and draw what conclusions we feel are needed from that.

And then finally, the third item that is available to the committee, on any nominee, is the FBI report which is available to the chairman and the ranking member, and under exceptional circumstances can be made available to all the members of the committee, which in this particular case it was.

We do not receive any other information beyond those items. Senator WARNER and I have been going over some of the other confidential disclosure forms that the White House has respective nominees fill out apparently for internal review within the White House itself prior to the decision to go forward with the nomination. They are in a format I have not seen before. Of course they are not documents that are available to our committee because they are not prepared for our use.

So I hope that provides some measure of clarification to what is or is not available, and what we have had available to us in this particular instance.

Mr. WARNER. Mr. President, when I made reference in the committee hearings to the fact that this individual, as do all individuals applying for this type of job express, as I said here, to me that is the question of courage. I was referring to documents which I have seen on several occasions in connection with my work on the Armed Services Committee and other areas. It is referred to as standard form 86 entitled "Questionnaire for Sensitive Positions." It is accompanied by a document from the Office of the President-elect entitled "Personal Data Statement."

Anyone looking at these will see the magnitude, the depth, and the breadth of the questions asked of individuals. It probes into every facet of their personal life, that of their family and the like. This is what I had in mind when I made reference to the fact of courage, and I felt very honestly it was a measure of courage to put down his complete family history of himself and others.

These two documents are the ones that the Senator from Virginia asks unanimous consent to have printed at the end of this colloquy.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibits 2 and 3.)

Mr. RIEGLE. I think this is an important statement because I think what Senator WARNER just referred to, these other documents which I have not seen before, are apparently the internal working documents that the White House has and prepares as they are screening the nominee internally. Of course, that information does not then make its way into the committee.

So again just coming back to my earlier reference to the statement on page 52 of the transcript of the markup, the only information that we had of a biographical sort in the committee was publicly available. That would be this biographical summary sheet printed in the report, and which had earlier been made available to the press and was generally known.

To come back to this question of what piqued the interest of the press, I think the basic submission of the nominee's background information was so innocuous on its face and just a standard resume—the document that I have referred to that we printed in the report and which had been made available to the press—this set of comments on pages 52 to 55 while not intended to do so, I think conveyed a meaning to the press that there was something more here that was out of sight but was significant. The press's question would have been: What information does the committee possess that is not out there?

Why would it have taken any particular courage because, obviously, the standard information in the resume is sort of garden variety information.

So I must say I think this sort of gets to the bottom of what the Senator may have had in mind, but I think it had the effect in that situation of suggesting to that very large press corps that there was something more here they ought to go hunt for.

Mr. WARNER. I cannot account for what may be in people's minds. I have a record here of what this Senator said in the course of the committee markup. I have now put documents in the RECORD which refers to what I had in mind. I only say to my friend from Michigan that I do not know quite how this question about the use of FBI material arose I know Senator NUNN and I are very careful in our committee, the Armed Services Committee about how we handle FBI material. He is chairman, and I as ranking member examine it. If there is occasion we feel that there was instances of factual information which might be of importance to other members in reaching their deliberations, we take it upon ourselves to inform the members. But our committee has guarded the confidentiality of such documents.

I am not a part of this debate on the FBI documents in this case. But what concerns me is Senators may be forced to go to the extremes of just saying we are not going to involve the use of the FBI but we will simply take the list of questions that the FBI propounds, propound them anew for the first time in the course of the hearings, and take these questionnaries which I have now put in the RECORD which elicits every single facet of a person's personal life.

Therefore, a nominee sitting before a congressional committee would expect in the future if we go to that process to be asked the same questions as propounded by others who are involved in the nomination process in the executive branch.

Mr. RIEGLE. Exactly, if the Senator will yield, the witnesses at that point are under oath. They have to take the oath before they begin the questioning period and the nomination hearing. So if an effort were used as the Senator suggested to go right down their confidential information format, I do not propose that we do that because I think that is an unworkable situation.

Mr. WARNER. it certainly poses problems. We have the broader question here, and I think we addressed this today, of a generation of individuals coming forward now reaching that maturity and level of experience where they are taking up major positions of responsibility, both in the private sector and the Government.

I think these questions are important to evaluate individuals, to have these answers, and the private sector likewise is going into a similar set of inquiries. We just do not want to frighten off people who may have made a mistake early on in life and then thereafter feel that they can no longer step forward and offer themselves for public service.

That concerns this Senator. I think each case must be examined. We certainly in no way condone the use of controlled substances which is the issue that prompted this debate. On the other hand, somehow we have to established a policy of how we deal with it when the matter comes before the Senate in connection with its advice-and-consent procedure.

Mr. RIEGLE. If the Senator will yield further, there was another document that we were looking at a minute ago.

Mr. WARNER. That is the document that I sent to the desk.

Mr. RIEGLE. Could I have that for 1 minute? I have not seen that document before.

Mr. WARNER. It is a standard form, I am told.

Mr. RIEGLE. It is used I take it for the internal use of the White House. But, in any event, it answers the question that came up in the debate earlier today on this instance where there was confusion. I think now we have the answer off standard form 86. I gather the Senator asked unanimous consent to make this form a part of the RECORD.

Mr. WARNER. That is correct.

Mr. RIEGLE. On page 7 of this form——

Mr. WARNER. It is document 86.

Mr. RIEGLE. Standard Form 86, "Questionnaire for Sensitive Positions." But with respect to a series of questions here, in this time period, as to how far back these questions go in time, there are a series of issues that relate to whether a person has ever been—these are very serious matters, and they have no relationship to this case. So I just separate it out.

Mr. WARNER. For the record, you are referring to a blank form.

Mr. RIEGLE. I am referring to a blank form. But the form for example proposes a series of standard questions. "Have you ever been arrested, charged or convicted of a felony offense," for example? Then later on down here, 23(d), "Have you ever been arrested, charged or convicted for any offenses related to alcohol or drugs?"

Then it lays this out in terms of the time period. Where did we find that particular phrase? This is under a category where it says "Has any of the following happened to you in the last 15 years?"

So they are asking the nominess as of the date this is filled out to go back and do an assessment of the last 15 years, and in that category fall arrests, charges or convictions to a series of things relating to explosive charges, firearms, criminal offense, alcohol, drugs, what have you.

Then down in the next category, this is a form that we do not see up here. I am seeing it for the first time this evening. It says your involvement with alcohol, dangerous drugs, including marijuana and cocaine.

Then it asks about a series of questions, and it says "Do you now use or within the last 5 years have you used alcoholic beverages, habitually, to excess?" That is one question, "Yes or no."

Then it says "Have you now, do you now use or supply or within the last 5 years have you supplied, used or supplied marijuana, cocaine, narcotics, hallucinogenics or other dangerous illegal drugs?" And then there is a yes or no.

From our earlier colloquy today, it may have been that in filling this form out in haste, the nominee in reading down here, because there is a lot of fine print, would have taken the 15-year reach back requirement up above for that set of questions and would have applied that 15-year period to the second level of questions which in fact go back 5 years.

When we had our colloquy earlier today, we were under the impression that perhaps the requirement on how

far back one goes had been changed. As we read standard form 86—if this is in fact an up-to-date form—that question, with respect to use as apart from conviction, reaches back 5 years and not 15 years. So I think we will take the time to say that, if that is the official policy—and one would assume it is if this questionnaire being used—then our current understanding of how form 86 is being applied, is different than our supposition earlier in the day when we did not have standard form 86 in front of us.

Mr. WARNER. Well, Mr. President, neither of us know precisely whether this version of standard form 86 was used by the nominee. It was provided to the Senator from Virginia as an example of the volume of material that a nominee must provide. So I think we should be very cautious. We do not know whether that is the precise form used by the nominee that was the subject of the Senate consideration today, but it is marked standard form 86: "Questionnaire for Selected Sensitive Positions." It is very detailed and requires a divulgence of a tremendous amount of personal details. That is the type of information to which the Senator from Virginia was referring, which in his judgment required the courage of both the husband and the wife and others to bring forth that information. I wish to clarify that. That is in reference to my statement to the committee.

Mr. President, in no way am I trying to condone what happened in this case. I join the chairman in saying that it is a very serious matter and one that should be the subject of careful consideration by the Senate, because we have to adopt a policy to give, I think, some protection to nominees and those being considered under the advise and consent clause of the Senate. We are dealing with lives, not only of the nominees but, as I said earlier, the silent spouse, be it a man or woman; and the children also are involved so often in these family cases.

It requires great care, and I hope out of this unfortunate episode is derived a policy which clarifies this situation such that it will not happen again, and we can accord the protection that these families deserve.

Mr. RIEGLE. The Senator and I share the same view on that matter.

Mr. WARNER. Mr. President, I ask unanimous consent that a document entitled "Instructions for Completing Standard Form 86, the Questionnaire for Sensitive Positions" be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 4.)

Mr. WARNER. This document contains the instructions actually followed by Mr. Ryan and clarifies the questions involving the periods of 15 years, 5 years, and since 18 years.

Mr. President, I yield the floor.

EXHIBIT 1

APPENDIX A.—STATEMENT FOR COMPLETION BY PRESIDENTIAL NOMINEES

Name: Ryan, Jr., Thomas Timothy.

Position to which nominated: Director, Office of Thrift Supervision. Date of nomination: 3/22/90.

Date of birth: 6/13/45. Place of birth: Washington, DC.

Marital status: Married. Full name of spouse: Judith Rush Ryan.

Name and ages of children: Kathryn—8, Michael—5.

Education: Institution, dates attended, degrees received, dates of degrees.

St. Anthony's High School, 1959-1963, diploma, 1963.

Villanova University, 1963-1967, A.B., 1967.

American University Law School, 1970-1973, J.D., 1973.

Honors and awards: List below all scholarships, fellowships, honorary degrees, military medals, honorary society memberships, and any other special recognitions for outstanding service or achievement.

Urban Mass Transportation Fellowship.

Army Commendation Medal.

Department of Labor—Special Recognition Award.

Memberships: List below all memberships and offices held in professional, fraternal, business, scholarly, civic, charitable and other organizations.

Organization, office held (if any), dates.

Program for the Advancement of Commercial Technology, Member, 6/87—present.

Georgetown University Law Center, Adjunct Professor, 9/79—9/83.

American Bar Association, Administrative Law Section, Election Law Section, Vice Chairman, 6/80—6/81.

Dean's Advisory Council, American Univ. Law School, Chairman/Member, 1/85—present.

D.C. Bar Association, Member, 8/74—present.

American Council of Young Political Leaders, President/Board Member, 1/81—2/90.

Presidential Transition Found, Federal Bar Association, Secretary; Director, Member, 11/80—present, 8/74—2/90.

Employment record: List below all positions held since college, including the title or description of job, name of employment, location of work, and dates of inclusive employment.

5/83—Present; Partner, Reed Smith Shaw & McClay, including Pierson Ball & Dowd, Washington, DC.

3/81—4/83; Solicitor of Labor, U.S. Department of Labor, Washington, DC.

11/80—3/81; Legal Counsel, 1980 Presidential Transition Office, Washington, DC.

9/78—11/80; Associate, Pierson, Ball & Dowd, Washington, DC.

12/76—9/78; Associate, Loomis, Owen, Fellman & Coleman, Washington, DC.

10/75—12/76; Deputy General Counsel, President Ford Committee, Washington, DC.

11/74—10/75; Associate, Venable, Baetjer & Howard, Baltimore, MD.

8/73—11/74; Attorney-Legal Assistant, National Labor Relations Board, Washington, DC.

9/72—6/73; Fellow, Urban Transportation Institute, Washington, DC.

6/71—6/72; Law Clerk, Department of Transportation, Washington, DC.

3/70—6/71; Law Clerk/Messenger, Hogan & Hartson, Washington, DC.

8/67—3/71; Ammunition Officer, U.S. Army, Ft. Belvoir, VA, and Taegu, Korea.

Government experience: List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or positions.

U.S. Army—1967-1970.

Legal Assistant, National Labor Relations Board—1973-74.

Secretary, Board of Visitors, George Mason University—1979-82.

Solicitor of Labor, Department of Labor—1981-83.

Member, Oversees Private Investment Corporation—1981-83.

Member/Counsel, Administrative Conference—1981-85.

Member, ERISA Advisory Council—1985-86.

Published writings: List the titles, publishers and dates of books, articles, reports or other published materials you have written.

Conveyancing of Urban Transportation Properties, 1973 (NTIS).

Co-Author, "Obligations of Government Contractors with Respect to Disabled Veterans, Veterans of the Vietnam Era and Handicapped Individuals, Equal Employment Practice Guide, FBA, 1978 and 1979.

Co-Authored, "Hepatitis B; An Occupational Hazard For Health Care Personnel, Health Matrix, Vol. II, No. 4, p. 3, 1985.

"The Solicitor's View of the Labor Department," Labor Law Developments 1982, 28th Annual Institute, Southwestern Legal Foundation, Dallas, TX.

Political affiliations and activities: List all memberships and offices held in and services rendered to all political parties or election committees during the last 10 years.

Committee to Re-elect the President—Advance Man—1972.

President Ford Committee—Deputy General Counsel—1976.

Warner for Senate Committee—Counsel—1978, 1984, 1990.

Baker for President—Special Counsel—1980.

George Bush for President—Special Counsel—1988.

Political contributions: Itemize all political contributions of $500 or more to any individual, campaign organization, political party, political action committee or similar entity during the last eight years and identify the specific amounts, dates, and names of the recipients.

I don't remember whether they are over $500 or not, but I have contributed to the Republican Party and candidates. Most frequently, the Republican National Committee, the Republican Party of Virginia, and John Warner for Senate. I have also made in kind contributions of time to all political committees for which I have worked over the years.

Qualifications: State fully your qualifications to serve in the position to which you have been named.

Question. State fully your qualifications to serve in the position to which you have been named.

Answer. I believe that my experience of almost two decades in managing large organizations and serving clients as a practicing attorney well qualifies me for the position of Director of the Office of Thrift Supervision.

I have been a practicing attorney for nearly seventeen years, with considerable legal experience both in the private and

public sectors. My most recent Federal appointment took place in 1981, when President Reagan, with the advice and consent of the Senate, appointed me to the position of Solicitor of Labor. In that position, which I held until 1983, I was responsible for all the legal activities of the Labor Department, its legislative program, and served as legal advisor to the Secretary of Labor. As Solicitor, I had ultimate responsibility for the management and direction of approximately 600 attorneys in one of the largest Cabinet departments, including broad-scale delegated litigation efforts in Washington and 16 field offices pertaining to the vast array of statutes administered by the Labor Department.

I have also had several appointments to various advisory boards and councils, including my service as President and a Member of the Board of the American Council of Young Political Leaders; Chairman and Member of the American University Law School Dean's Advisory Council; a member of the Oversees Private Investment Corporation; the Program for the Advancement of Commercial Technology in India; and as a member of the Administrative Conference of the United States and its Board of Directors (Council).

In addition, I have had extensive involvement with the transition efforts of several Administrations and election campaigns. In 1976, I served as Deputy General Counsel of the President Ford Committee, and in 1988, I was Special Counsel to the George Bush for President committee. In 1980, I served as Legal Counsel for the Reagan/Bush transition team.

As to my private sector experience, I have been associated as a partner with Reed Smith Shaw & McClay (including Pierson, Ball & Dowd which merged with the firm) since 1983. At present, I am a member of the firm's Executive Committee. The clients of this national law firm include many of the major corporations and financial institutions in America. My activities at the firm have included representation of clients in the ERISA fiduciary and litigation areas as well as general Washington representation for various clients in multiple business sectors.

Future employment relationships: 1. Indicate whether you will sever all connections with your present employer, business firm, association or organization if you are confirmed by the Senate.

Upon confirmation, and prior to taking office, I will withdraw from Reed, Smith, Shaw & McClay, the law firm in which I am currently a partner. My withdrawal will be in accordance with the firm's partnership agreement and, other than the continued maintenance of my retirement account as part of the firm's retirement plan and my right to receive an amount equal to the sum of my capital account and my partnership share calculated as of the date of withdrawal. I will completely sever my relationship with the firm. I do, however, intend to remain a limited partner in M&M Partnership, in which, along with approximately 150 members of the firm, I have an interest in an office building in Pittsburgh, PA.

2. As far as can be foreseen, state whether you have any plans after completing government service to resume employment, affiliation or practice with your previous employer, business firm, association or organization.

No specific plans.

3. Has anybody made you a commitment to a job after you leave government?

No.

4. Do you expect to serve the full term for which you have been appointed?

Yes.

Potential conflicts of interest: 1. Describe any financial arrangements or deferred compensation agreements or other continuing dealings with business associates, clients or customers who will be affected by policies which you will influence in the position to which you have been nominated.

Pursuant to partnership agreement, I will receive capital account and partnership share calculated on service performed through date of departure from the firm.

2. List any investments, obligations, liabilities, or other relationships which might involve potential conflicts of interest with the position to which you have been nominated.

None.

3. Describe any business relationship, dealing or financial transaction (other than taxpaying) which you have had during the last 10 years with the Federal Government, whether for yourself, on behalf of a client, or acting as an agent, that might in any way constitute or result in a possible conflict of interest with the position to which you have been nominated.

Representation of the Association of Financial Guaranty Insurors on risk-based capital guidelines issued by federal regulators. Accordingly, I will recuse myself from any involvement in any issues involving credit enhancement through the use of insurance.

4. List any lobbying activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation at the national level of government or affecting the administration and execution of national law or public policy.

INTELSAT—on general matters affecting international communications.

Contel ASC—on Commercial Space Launch Act.

On labor legislation introduced by the Reagan Administration while I was Solicitor of Labor.

Periodic contact on behalf of the firm client Securities Industry Association on various issues. None recently.

5. Explain how you will resolve any potential conflict of interest that may be disclosed by your responses to the above items.

While I do not believe that any of my financial interests would conflict with my duties, should such a potential conflict arise, I will promptly advise the Department's ethics officials and take whatever action is deemed appropriate.

Civil, criminal and investigatory actions: 1. Give the full details of any civil or criminal proceeding in which you were a defendant or any inquiry or investigation by a Federal, State, or local agency in which you were the subject of the inquiry or investigation.

None.

2. Give the full details of any proceeding, inquiry or investigation by any professional association including any bar association in which you were the subject of the proceeding, inquiry or investigation.

None.

EXHIBIT 2

OFFICE OF THE PRESIDENT-ELECT,
Washington, DC.

From: C. Boyden Gray.
Subject: Personal Data Statement.

As part of the clearance procedures for your prospective nomination, please answer all of the following questions (please do not respond "not applicable" or "N/A" if your response is "no" or "none"). For questions 6-11, inclusive, please supply information as it pertains to you, your spouse, and any relatives living in your immediate household. In addition, in responding to the other questions, please supply any information regarding your spouse or relatives that you deem to be relevant. Your responses to this questionnaire, which is not subject to public disclosure, will remain confidential.

Because your nomination cannot be finalized until all necessary reviews have been completed, please supply this information at your earliest convenience.

If you have any questions or need assistance in responding to this questionnaire, please do not hesitate to contact this office. Thank you for your cooperation.

1. Full name.

2. Current position and business address and telephone number.

3. Home address and telephone number.

4. Position for which you are being considered.

5. Name of person to contact (if other than yourself, with regard to clearance matters, and home and office telephone numbers for that position.

6. The names of all corporations, firms, partnerships or other business enterprises, and all nonprofit organizations and other institutions with which you are now, or during the past five years have been, affiliated as an officer, owner, director, trustee, partner, advisor, attorney or consultant. In addition, please provide the names of any other organizations with which you were affiliated prior to the past five years that might present a potential conflict or appearance of conflict of interest with your prospective appointment. (Please note that in the case of an attorney's client listing, it is only necessary to provide the names of major clients.)

Those organizational affiliations that you plan to continue during your Government service should be noted with an asterisk.

7. All your interests in real property, other than a personal residence, setting forth the nature of your interest, the type of property and the address.

8. The names of any debtors, setting forth the amount owed to you and any additional information deemed relevant to explain the transaction. You need not include loans to your spouse, dependents, or siblings for nonbusiness purposes. Please exclude all debts under $5,000.

9. List direct involvement through contracts, provision of consulting services, *etc.*, that you or your current business has with the Federal government. Please specify the agency or agencies involved.

10. Any employee fringe benefits you are now receiving and would desire to retain during your government service.

11. Have you or any firm, company or other entity with which you have been associated ever (1) registered as an agent of a foreign principal; (2) requested and received an exemption from such registration requirements; or (3) acted as an agent of a foreign government? If so, please give full details (*e.g.*, date of registration, request for exemption, or notice provided to the Secretary of State concerning service as an agent of a foreign government; name in which filing was made; name of foreign principal; identity of country involved; and, if applicable, date representation was terminated).

12. Have you ever been publicly identified, in person or by organizational membership,

with a particularly controversial national or local issue? If so, please describe.

13. Please list all published books or articles you have authored, co-authored or edited. If any of these publications are particularly controversial.[1] Please describe.

14. Have you ever submitted oral or written views to any government authority (executive or legislative) or the news media on any particularly controversial [1] issue other than in an official government capacity? If so, please describe.

15. Have you ever had any association with any person, group or business venture that could be used, even unfairly, to impugn or attack your character and qualifications for this position?

16. Do you know anyone who might take any steps, overtly or covertly, to attack your appointment? If so, please identify and explain the basis for the potential attack.

EXHIBIT 3

[Standard Form 86, Revised October 1987, U.S. Office of Personnel Management, FPM Chapter 736]

QUESTIONNAIRE FOR SENSITIVE POSITIONS

(Read this information carefully. Follow the instructions fully or we cannot process your form.)

Why do we need the information you will give us and how will we use it?

The U.S. Government has conducted background investigations for over 50 years. It does this to establish that people who want to be employed by the Government are suitable for the job and that they, along with people who will work for the Government under contract, are eligible for any required security clearance. We use the information from this form primarily as the basis for an investigation that will be used to determine your qualifications and suitability for a particular job or eligibility for a clearance.

Asking you for this information is in compliance with the Privacy Act of 1974. The information you give us is for Official Use Only; we will protect it from unauthorized disclosure. We may share some information with Federal and other sources to get additional information about you. We may also give some of the information to Federal, State, and local agencies checking on law violations or for other lawful purposes.

Giving us the information we ask for is voluntary. However, we may not be able to complete your investigation, or complete it in a timely manner, if you don't give us each item of information we request. This may affect your employment or clearance prospects.

What authority do we have to ask you for the information requested on this form?

The U.S. Government is authorized to ask for this information under sections 1303, 1304, and 3301 of title 5 of the U.S. Code; section 2165 of title 42, U.S. Code; Executive Order 10450; and parts 5, 731, 732, and 736 of title 5, Code of Federal Regulations. We ask for your Social Security number to keep our records accurate, because other people may have the same name and birthdate. Executive Order 9397 also asks Federal agencies to use this number to help identify individuals in agency records.

What is the investigative process?

The information you provide on this form is confirmed by investigation. The type of investigation done depends on the level of sensitivity of the position you are seeking or now hold. The information obtained in an investigation comes from records and people. Sensitive positions require an investigation that relies more on an Investigator interviewing people who know you.

Many investigations include an interview with you as a normal part of the investigative process. This Personal Interview is the first step in the investigation, and is conducted under oath or affirmation. It provides you the opportunity to update, clarify, and explain more completely information on your form, which often helps to complete your investigation faster. If your investigation requires a Personal Interview, you will be contacted in advance by telephone or mail to arrange a time and location for the interview. It is important that the interview be conducted as soon as possible after you have been contacted. Postponements will delay the processing of your investigation. Declining an interview may result in your investigation being canceled.

You will be asked to bring identification with your picture on it, such as valid State driver's license, to the Personal Interview. There are other documents you may be asked to bring to verify your identity as well. These include: documentation of any legal name change; Social Security card; and/or birth certificate.

Documents that verify any significant claims or activities may also be requested; for example: alien registration; naturalization certificate; originals or certified copies of college transcripts or degrees; high school diploma; professional license(s) or certificate(s); military discharge certificate(s) (DD Form 214); marriage certificate(s); divorce papers; tax returns; passport; and/or business license(s).

You also may be asked to bring documents that pertain to information provided in your answers to questions on the form or other matters requiring specific attention. These matters include: termination or discharge from employment; delinquent loans or taxes, bankruptcy, judgments, liens, or other financial obligations; agreements involving child custody or support, alimony, or property settlements; and arrests, convictions, probation and/or parole.

Who makes a final determination?

Final determination on your suitability for employment and/or your being granted a clearance is the responsibility of the OPM or the Federal agency that requested your investigation. You may be provided the opportunity to personally explain, refute, or mitigate any information before a final decision to made.

How is this form organized?

This form has two parts. Part 1 asks for background information, including where you have lived, gone to school, and worked. Part 2 asks about your activities and such matters as firings from a job, a police record, and questions about your association with certain organizations. In answering Part 2, you should keep in mind that your answers to any of the questions alone may not disqualify you from a sensitive position.

What are the penalties for inaccurate or false information?

The U.S. Criminal Code provides that knowingly falsifying or concealing a material fact is a felony which may result in fines of up to $10,000, or 5 years imprisonment, or both. In addition, Federal agencies generally fire or disqualify individuals who have materially and deliberately falsified these forms, and this remains a part of our permanent record for future placements. Because the position for which you are being considered is a sensitive one, your trustworthiness is a very important consideration in deciding your suitability or eligibility for security clearance. Your prospects of employment are better if you answer all questions truthfully and completely than if you falsify or omit any of the information. In the course of an interview with a Federal official you will have adequate opportunity to explain any information you give us on the form and make your comments part of the record.

How is this form filled out?

1. Follow the instructions of the person who gave you the form. Find out how many copies of the form you are to turn in. You must sign and date, in ink, the original and each copy you submit.

2. Before you leave the office, look the form over and ask for continuation sheets (SF86A) if you think you'll need them. If you had more than 5 residences or 5 employments/self employments/unemployments in the past 15 years, or you have attended more than 2 schools, you will need a continuation sheet(s). The spaces provided on pages 6 and 9 are to be used to continue your answers to other questions. If additional space is needed, use a blank piece of paper. Each blank piece of paper you use must contain you name and Social Security number at the top of the page.

3. Type or legibly print your answers. We cannot accept your form if it is not legible.

4. You must use the State codes (abbreviations) listed below when you fill out your form.

Alabama	AL
Alaska	AK
Arizona	AZ
Arkansas	AR
California	CA
Colorado	CO
Connecticut	CT
Delaware	DE
Florida	FL
Georgia	GA
Hawaii	HI
Idaho	ID
Illinois	IL
Indiana	IN
Iowa	IA
Kansas	KS
Kentucky	KY
Louisiana	LA
Maine	ME
Maryland	MD
Massachusetts	MA
Michigan	MI
Minnesota	MN

American Samoa	AS
Trust Territory	TT

[1] Reference to "particularly controversial" is intended to focus on issues that could be used, even unfairly, against you.

5. The 5-digit postal ZIP codes are needed to speed the processing of your investigation. The office that provided you with the form will assist you in completing the ZIP codes.

6. Whenever "City (Country)" is shown in an address block, also provide in that block the name of the country when the address is outside the United States.

7. When providing dates, you may use numbers 1-12 to indicate months if you don't believe you have enough space to write the month; and for the same reason, for year you may show the last two numbers in the year. For example, June 8, 1967, could be shown as 6/8/67, or January 1984 could be shown as 1/84.

If you have any questions, call the office that gave you the form. Be sure to sign and date the certification statement on page 9 and complete the release on page 10. Any forms that are not completed according to these instructions will be returned. This will delay the processing of your case.

[Standard Form 86 not reproducible in the RECORD.]

EXHIBIT 4

[It is imperative that the following instructions be read and followed prior to completion of background forms for your prospective appointment]

INSTRUCTIONS FOR COMPLETING STANDARD FORM 86

"QUESTIONNAIRE FOR SENSITIVE POSITIONS"

As a prospective Presidential appointee, it will be necessary for you to provide additional information to that requested on the Standard Form 86 (SF-86). It is essential that all information be provided in as much detail as requested in order to ensure that the FBI is able to conduct a thorough and complete investigation. Ambiguous and incomplete information will impede the investigation and will cause valuable time to be lost in the appointment process.

GENERAL INSTRUCTIONS

—The form and all attachments must be typed. A continuation sheet is provided on page however, if additional space is needed to continue your answers, you may attack additional sheets of plain bond paper to supplement your answers. Before each answer identify the number of the question.

Do not abbreviate the names of cities. The inclusion of zip codes is particularly helpful.

Be specific; exact and complete dates, names, addresses, and explanation of answers will be helpful for the expeditious handling of the investigation. When you have completed the form, please review it for thoroughness and continuity.

The original SF-86 and three machine copies, all with original signatures, are acceptable as the four copies required for submission.

SPECIFIC INSTRUCTIONS

8. Citizenship: If you or your spouse are naturalized citizens, provide the date, place and U.S. District Court where you or your spouse were naturalized. If naturalized by derivative, provide above-mentioned information concerning parents. If your spouse is not a U.S. citizen or naturalized citizen, please give details as to status as well as date and place of entry.

9. Where You Have Lived: Although the SF-86 asks for your residence for the past 15 years, ensure all residences since your 18th birthday are included.

If a residence is in an apartment complex, include the name of the complex and the specific unit number. If the residence was leased or rented, include the name of the individual in whose name the rental agreement or lease was established. Lastly, include the full name and complete birth dates of all current cohabitants.

11. Your Employment History: Although the SF-86 asks for your employment and military history for the past 15 years, you must list all employment since your 18th birthday.

Provide complete addresses (street/city/state/zip code) for each employment and job description listed. If a government employment or employment by some other large organization is to be listed, indicate the department, bureau, division and section, or specific subdivision.

If you are a member of a military reserve component or National Guard unit, list the organization, its location, the names of your immediate officer and telephone number, if known.

Include all periods of unemployment and self-employment. Provide names, complete addresses and telephone numbers of persons who can verify periods of unemployment or self-employment, to include individuals employed by you, landlords, friends, cohabitants, competitors, or clients.

12. People Who Know You Well: Please provide complete home and business addresses (including name of business), and home and business telephone numbers. Use only individuals currently residing in the continental United States.

17. Your Relatives: Although the SF-86 requests only the country of birth, also provide the city and state or city and country.

If relatives reside overseas, please indicate whether or not they are with the military. Provide their complete address, including city and country. Do not list APO or FPO address.

22. Your Employment Record: If you have ever been denied employment while undergoing or upon completion of a background investigation or polygraph examination, please identify prospective employer and date and reason for voluntary withdrawal from consideration.

24. Your Involvement with Alcohol and Dangerous Drugs: Although the SF-88 requests information within the last 5 years, list use since 18 years of age. If you have ever abused any legal or prescription drug to the point of dependency, also list. In addition, list treatment for drug or alcohol dependency, including such groups as Alcoholics Anonymous (AA).

26. Your Medical Record: Please give details of any psychological/psychiatric treatment, other than marriage counseling.

28/29. Your Financial Record: If a collection procedure has ever been instituted against you by Federal, state of local authorities, please give full details. If you received financial aid during college, state whether or not any such obligations have been satisfied.

If you have any questions, please call Jane Dannenhauer at 202/456-2345 (White House Security Office).

Return the completed forms to: Diana O. Kendrick, Executive Assistant to the Counsel to the President, 2nd Floor/West Wing, The White House, Washington, DC. 20500.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, I ask unanimous consent to proceed for 5 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

LITHUANIA

Mr. GORTON. Mr. President, over the course of the last 50 years, since the dark cloud of Soviet oppression drifted over them, the people of Lithuania have proven that although notions of democracy and individual freedom may be suppressed they can not be eradicated. The people of Lithuania have staked their lives on their quest for liberty and self-determination. The United States has never recognized the legitimacy of the annexation of the Lithuania; we must not waiver in our support for these brave people at this crucial moment.

This is emphatically not an internal matter for the Soviet Union, as its spokesmen assert.

With all Americans I fully support the goal of returning freedom and independence to Lithuania. Last week, this body unanimously passed a resolution in support of self-determination for Lithuania and calling for a halt to the tactics of intimidation being used by the Soviet Union.

So far, this message has fallen on deaf ears. The Soviets continue to wage a war of intimidation; military convoys continue to rumble through Vilnius and planes streak overhead. The border with Poland has been closed, two opposition newspapers have been banned and foreign journalists have been expelled. Already the first drops of blood have been shed as Soviet troops stormed hospitals where Lithuanian deserters from the Soviet Army had taken refuge.

Together with several of my colleagues I sent a letter to President Bush last week urging him to make clear to the Soviets that there will be serious repercussions to United States-Soviet relations if they resort to force. There must be no misunderstanding on the part of the Soviet Union: If it resorts to force to quell the independence movement in Lithuania, it will pay a high price. The reforms that President Gorbachev has instituted and the new political and economic relationships between our two nations that he has so carefully orchestrated over the past several years may well collapse. His image as a great reformer will be cancelled by his repression of freedom loving people seeking only to build upon the foundation of his rhetoric.

Mr. President, this Nation made a serious mistake in trying to placate the repressive Beijing regime. Our efforts have been spectacularly unsuccessful and it would be folly indeed to repeat that error with Moscow on the subject of Lithuania, Estonia, and Latvia.

Stephen Vincent Benét once wrote a short story entitled: "Freedom's a Hard Bought Thing." But the love of freedom, once lit in the mind of a man or woman anywhere, American or East

German, Lithuanian or Chinese, can never be put out. The Soviets may be able to deny the fruits of liberty to the Lithuanian people, but they cannot both crush Lithuania and claim a true reform of their own society with the help and encouragement of the American people.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. RIEGLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. RIEGLE. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

TOWARD A PEACEFUL SOLUTION IN LITHUANIA

Mr. PELL. Mr. President, I wish to express my deep concern about the current situation in Lithuania. Ever since that republic declared its wish to be independent on March 11, Soviet officials have continually assured us that force will not be used to resolve the situation there. These assurances have come from every level of the Soviet Government.

Despite these assurances, however, the Soviet government has escalated its efforts to pressure the Lithuanians to rescind their declaration. The press carries daily stories of parades of armored vehicles through Vilnius, of Lithuanian draft resisters being seized by force, of Lithuanian government buildings and newspaper printing facilities being taken over by the armed troops and of similar threatening actions by Soviet authorities. Moreover, the Soviet Government has expelled foreign diplomats and journalists from Lithuania, and has intermittently closed telephone and telex communication with Lithuania.

In sum, the Soviet Union has attempted to isolate and intimidate Lithuania, and has instituted measures there that very much resemble martial law. This pattern of coercion has characterized Soviet relations with the Baltic States since their forced incorporation into the Soviet Union 50 years ago. Speaking from my experience as the Baltic desk officer in the State Department many years ago, this pattern of coercion is a strong reason for Lithuania's discontent with its status as a Soviet republic. And it is partly for this reason that they are determined to regain the independence that they lost 50 years ago.

If President Gorbachev is genuinely committed to a peaceful negotiated resolution of this problem, as I believe he is and or he has indicated, I commend to him the auspices of the International Court of Justice, as suggested by my distinguished colleague from New York [Mr. MOYNIHAN]. Any further use of force in Lithuania can only exacerbate tensions there. It would also call into question Mr. Gorbachev's commitment to peaceful change and could reverse the progress that has been made in improving East-West relations during the past few years.

The people of Lithuania are bravely resisting intense pressure from Moscow, and they deserve the support of all Americans. The Lithuanian Government has offered to negotiate the terms of its independence, but so far Moscow has turned a deaf ear to the Lithuanians. Lithuanian independence poses no threat to the Soviet Union. In fact, Lithuanian independence presents an opportunity for the Soviet leadership to remove a particularly noxious legacy of its Stalinist past—the purchase of Lithuania from Hitler and the forcible incorporation of this proud nation into the Soviet Union. I urge Mr. Gorbachev to seize the opportunity to free Lithuania.

I ask unanimous consent that a recent article from The Providence Journal regarding the Lithuanian community in Rhode Island be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Providence Journal-Bulletin, Mar. 30, 1990]

LITHUANIA'S DEFIANCE SPARKS HOPE AMONG R.I. COMMUNITY

(By Lee Dykas)

PROVIDENCE.— Lithuania's move toward independence from the Soviet Union has excited hope among the Lithuanian-Americans in Rhode Island, and to Father Al Klimanskis, pastor of St. Casimir's Lithuanian Roman Catholic Church on Smith Hill, "it's simply a miracle of Providence."

He said the Lithuanians "are a stubborn people, proud of our heritage. Throughout our whole history, we have had much adversity to overcome. The Russian regime of the last 50 years has not been different. But as in the past, Lithuanians have preserved their language and their religion."

The drive for independence is "an answer to millions of prayers. It's unbelievable, the popping out of freedom everywhere," he said after the 6 o'clock Mass last night.

The parish has a number of Lithuanian members, and the priest who celebrated last night's Mass, Father Richard Repsys, grew up there.

"We believe the world will understand the Lithuanians, and we believe that all this (resolution of the confrontation with the Soviets) will not take too long," said Father Repsys, a Marian priest who has been living in Chicago for the last year.

Lithuania, a nation of less than 4 million people, will not be intimidated, he said. "Lithuanians are not afraid of tanks. We have lived with them for more than 50 years."

Tension between the Soviet Union and the Republic of Lithuania, which recently sought to declare its independence, intensified during the last week as Soviet tanks rolled through Vilnius, the capital, on what were called schedule maneuvers.

Anne Johnson of Providence, who has visited Lithuania twice, the last time 10 years ago, and who hopes to visit again, said, "Freedom is popping out like popcorn throughout Eastern Europe.

"The United States has always recognized Lithuania as a free and independent nation, but I'm disappointed that President Bush hasn't made a strong statement of support, and I hope he comes around soon," said Matthew Kairys of North Providence.

His wife, Aklona, said Lithuanians "need the moral support of the world."

Mary Willis of North Providence has been circulating a toll-free telephone number among Lithuanians, asking them to call and add their names to a telegram asking Mr. Bush to extend formal recognition of Lithuania.

"I'm happy the Lithuanians have started this ruckus," and people who want to help should call 1-800-257-4900, then ask for Hotline 9654, to add their names to the telegram."

Connie Valiuskis of Barrington, a native of Lithuania, said, "The Russians should realize that it's to their advantage to let Lithuania go. The Lithuanian people are very sympathetic to the Russian people and to (President Mikhail) Gorbachev; and if the Lithuanians are free, it will benefit the Russians. The Lithuanians are very productive; they could, as they have in the past, help the Russians to get on their feet."

She visited the Soviet Union and Lithuania two years ago, she said, and found that everyone, even the Russians, call Lithuania and Estonia and Latvia the " 'little America' of the Soviet Union because of the attitude the people have toward freedom."

SOUTH DAKOTA COMMUNITY FIGHTS DRUG AND ALCOHOL ABUSE

Mr. PRESSLER. Mr. President, my home State of South Dakota currently is involved in a community project that is a good example of how rural communities are addressing the drug and alcohol abuse problem. The community's cooperation in this endeavor has been truly remarkable.

The need for better substance abuse programs is undisputed. According to a 1985 South Dakota High School senior survey, over 57.1 percent of South Dakota teenagers were classified as heavy drinkers (drink five or more alcoholic drinks at a time). The national average is only 37.0 percent.

An Adolescent Substance Abuse Prevention [ASAP] program was created 4 years ago by Pam Teaney-Thomas in Rapid City, SD. This nonprofit organization was founded on the idea that the community needed better coordination of adolescent drug and alcohol prevention services.

Members of ASAP became aware that the Pennington County, SD, Ju-

venile Detention Center [JDC] had become overcrowded to the point that its occupants were sleeping on mattresses on the floor. Many of these adolescents were waiting for the opportunity to enroll in a drug or alcohol treatment program. Responding to the concerns of the Juvenile Detention Center, the Pennington County Commission appointed a Juvenile Detention Center Advisory Board. The members of that board include business people, law enforcement personnel, service providers, and educators. It was apparent to everyone involved that ASAP and the Juvenile Detention Center had many inssues in common.

The County owned a building that had been used to house work release prisoners but no longer was needed for that purpose. It was surplus county property that could be made available to ASAP. The city of Rapid City determined that it owned surplus land on which this building, the county's building, could be located. The ASAP and JDC then began contacting other agencies in the State that might be interested in developing chemical dependency rehabilitation programs. A number of local architects volunteered their time. Engineering firms did soil samples. Local businesses spontaneously donated money. And, the Pennington County commissioners agreed to lease the building. Before long, the Transitional Care Facility for Children was established.

Since the establishment of this facility, the generosity of South Dakotans has continued. The Nemo Job Corps agreed to do the internal remodeling and lay the block foundation. Local merchants have agreed to furnish windows, doors, foundation materials, plumbing, electrical and other supplies.

KKLS/KKLM agreed to a stint in which its announcer, Steve Burger, was placed in a coffin, from which he would broadcast 48 straight hours to raise additional funds for the ASAP project. I was honored to participate in that broadcast, commending the community of Rapid City for its efforts and pledging my personal contribution. I strongly believe in this project.

The grand opening of the facility is scheduled for this summer. Barbara Bush has been invited to join in the community's celebration, and I also encourage our colleagues to attend this grand opening.

Widespread community involvement and cooperation at the grassroots level is the first, and biggest, step toward becoming a drug-free Nation. The work of ASAP in establishing the Transitional Care Facility in Rapid City will be accomplished without any tax dollars. I am proud to say that community involvement and fellowship is alive and well in South Dakota. We can win the war on drugs with the kind of spirit and determination displayed by my fellow South Dakotans.

I ask unanimous consent that an article from the Rapid City Journal be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JAIL ANNEX SOON MAY PROVIDE SHELTER FOR KIDS FIGHTING DRUGS

(By Debra Holland)

An old county jail annex soon will provide shelter to Rapid City youths entering or leaving drug treatment.

Supporters say the community funded project will help adolescents ages 12 to 18 avoid returning to lifestyle of drugs and alcohol.

The Rapid City Adolescent Transitional Care Home may open this summer if supporters can raise upwards of $100,000 in cash and materials needed to finish the project.

The home located at the southeast corner of Cherry Avenue and St. James Street, is the brainchild of Adolescent Substance Abuse Prevention, Inc. (ASAP) and the Pennington County Juvenile Detention Center Advisory Board.

Black Hills Special Services Cooperative which has run special school and residential programs for youths in the northern Black Hills for 10 years, will oversee programs at the home.

The center will have a capacity of 18 beds. Five beds will be reserved for emergency care of for those youth who, through no fault of their own, have no other place to stay. The remainder will be for those entering or leaving inpatient drug treatment.

The group home will take some of the pressure off the Pennington County Juvenile Detention Center, said its director, Barb Van Eckeren.

Currently the JDC is a catchall for juveniles who either have committed a crime or have no other place to go. Van Eckeren said that recently a 15-year-old girl was brought to the JDC because her mother had kicked her out of the house. She had not committed a crime, yet she had no relatives in the community and no place to go.

"JDC is not appropriate for some of these youth," said Pennington County Sheriff Don Holloway. "JDC was set up and designed as a hard lockup. With this new facility, we will have a place to take them without locking them up."

But locking up youths who have committed no crime can be devastating said 7th Circuit Judge Merton Tice, an advocate for the transitional home.

"There are times when police have literally driven kids around for hours because there was no place for them to go," he said. "These runaways or castouts are not criminals, but we do not have resources to place them. This (the youth care home) gives us space and time to find appropriate resources for the kids."

Foster homes had been an alternative for youths who had no place to go, but Tice said the State Department of Social Services foster homes in the Black Hills often were filled.

Most teens who are ordered to treatment for alcohol or drug abuse must now go to the Human Services Center in Yankton for that treatment. Once they return to their home in the Black Hills they tend to return to the same group or habits that got them in trouble in the first place, said Pam Teaney-Thomas, ASAP president and drug abuse prevention coordinator for Rapid City Area Schools.

"As classroom teacher 10 years ago I realized the frustration and anger I felt when a child goes through treatment and is put right back in the environment which caused the problem," she said. "The relapse rate is incredible." Without the transitional care home, Rapid City does not have the resources to decompress youths back into the community, Tice said. "We must work with the family when the child is returned," he said.

"Working with the family strengthens their understanding of the nature and dynamics of abuse and how they can be a resource toward their recovery. Oftentimes they expect the child to come back cured. No one is cured. There is a lot of work that has to be done, and the family is the most important unit."

It also is important to help youths find new friends upon their return, Tice said.

"The chemically dependent child has developed in a group of those who have been using," he said. "It is important to develop a new circle of friends of those who are no longer using."

Tice commended the community for pulling together to meet the needs of its youth.

"It's exciting to see Rapid City getting together to provide this desperately needed service for kids," he said.

CLEAN AIR ACT AMENDMENTS OF 1989

Mr. BENTSEN. Mr. President, the Senate took a bold leap forward in cleaning up the environment yesterday. This legislation, the first of its kind in 13 years, marks a significant departure from the "do-nothingism" mentality on the environment. It is a good, tough, sensible bill. I am pleased to support it.

The public debate on clean air has been conspicuous in its absence of partisan demagoguery. No Senator has accused another of being in favor of "dirty air." Because no one is. We all have a stake in clean air, for the sake of our children and grandchildren, and for our own sakes.

There has been some criticism that this bill is not as tough as it could be, and there are still others who say that the bill is to tough on industry and business. These are extremes. The rhetoric they espouse is not helpful to us, except perhaps it tells us that maybe the Senate has been wise. We have certainly tried.

There are many of us who have tried to keep the bill alive by supporting the agreement. We have had to cast some votes we might not have cast if circumstances were different. That is the price of leadership and responsibility. I say to those who criticize this bill that they are free to do so, but the criticism is misplaced. Yes, the bill is a compromise. All legislation embodies compromise. That is the essence of public service in a democracy. That's why we are now on the verge of passing the first clean air bill from the Senate in 13 years. Had we assumed a

posture of "no bill unless it is a perfect bill" we would still be at square one. When it comes to legislating, perfect is the enemy of the good, and I am no enemy to what is good for this country, for the environment, and for Texas.

In that regard, this bill is good for Texas. Modifications to the nonattainment and air toxics sections of this bill will serve to reduce the economic impact on industry and small business in my state. Some of these changes were essential. The alternative fuels section of the bill will open new markets for Texas natural gas. The bill establishes a National Air Toxics Research Center to be based in Houston with research to be conducted there by Texas medical Center professionals. Special attention is devoted to the unique circumstances facing the city of El Paso. It is an international city, bordering an area in Mexico with substantial pollution problems. The bill provides an opportunity for El Paso to demonstrate compliance with air quality standards and seeks to go to the source of the problem and authorize the EPA to work with Mexico to get control of its air pollution problem.

For all of the good this bill contains for Texas, we still have some tough and painful medicine to take.

Texas is a large state with a substantial industrial base. It has petrochemical plants, an assortment of manufacturing facilities, utilities, petroleum refineries, oil and gas operations, and thousands of smaller businesses which will be impacted by this bill. With that enviable industrial base comes its problems, especially environmental problems. Texas leads the nation in the level of emissions for hazardous air pollutants. That is not a distinction we are proud of, but it is one we don't have to maintain. Likewise, Texas has more ozone nonattainment areas than any other State: Houston, Dallas, Beaumont-Port Arthur, and El Paso. They will have to strengthen programs to reduce pollution under this bill. Mobile source emissions, in Texas exceed stationary source emissions in some areas.

These are problems that can't be swept under the rug. They can't be ignored by changing the subject to job loss and economic impact on industry. While these are very weighty considerations and I listen to them, they are not the only ones we should factor into the equation. Now, there has been a lot of talk about the impact of this legislation on jobs, and that if this bill passes thousands of jobs will be lost. I have heard these predictions before. They are mainly leveled by those who have to pick up part of the cost of environmental or social legislation. What a bill will cost and who will pay for it are legitimate questions to ask. So is this one: if we fail to address our clean air problems who will pay the health costs of inaction?

In that regard, over 120 million American citizens live in communities that do not meet current air quality standards. The American Lung Association reports that this situation carries a health price tag in excess of $100 billion annually. Even if health costs are just half that figure or even one third of $100 billion, that price tag still exceeds the Administration's price tag of the bill. The American Lung Association reports further that the annual health costs of motor vehicle pollution in Texas alone totals at least $271 million. It is higher in some other states; lower in others. These costs are mind-numbing. So when we discuss the costs of this legislation, all costs should enter the equation.

Similarly, the job creation potential of this legislation is underestimated. Environmental legislation drives improved pollution control technology. New markets for this technology will be developed because of it. We can't overlook that fact.

I'd like to speak to one last issue, Mr. President. Some of my colleagues from the Midwest have suggested that they can't support this bill because of the unfairness of the acid rain title. Tax incentives have been sought. Special treatment is expected. In support of this position, they have cited Texas as the No. 1 State for sulphur dioxide emissions. Facts are facts. That's true. What my midwestern colleagues fail to mention is that the acid rain title is aimed principally at trying to reduce sulphur dioxide emissions from utility plants. Other sections of the bill—nonattainment, air toxics, mobile sources—will help to reduce industrial emissions overall.

Compliance fuel and scrubber technology will reduce sulphur dioxide pollution from utility plants that cause acid rain. Here, Texas has a record that they envy.

Texas is a clean State. It consumes over 11 percent of the Nation's coal, but has only 3 percent of the emissions. Of the 33 units in operation in Texas, over 13 of them have scrubber systems installed and 16 of them use compliance fuel. By any yardstick, that's good record, and it's getting better.

Despite this record, Texas will be penalized under the allowance system more than it should be. We have been able to correct the allowance formula from what it was originally, but it does not give Texas its due based on its record as a clean State. I doubt Ohio, Pennsylvania, and Illinois can make the claim about their utility plants. So when my colleagues from Midwestern States, some of which have not taken the steps to install scrubber technology in its plants, speak of fairness, they should consider responsibility as well. The "polluter pays" principle is one that makes sense.

Mr. President, we have a ways to go before this bill is enacted into law. The House of Representatives has yet to report a bill out of committee. I believe the House will act and we will go to conference on a clean air bill. It will take time and compromise. I am hopeful that the President will sign a clean air bill before Congress adjourns. That will be a great victory for us, for Texas, and for millions of Americans.

I am pleased to have voted for this bill.

ANNIVERSARY OF THE FOUNDING OF JOINT CENTER FOR POLITICAL STUDIES

Mr. MOYNIHAN. Mr. President, today we mark the 20th anniversary of the founding of one of our finest policy research institutions, the Joint Center for Political Studies. The Joint Center's excellence is not in small measure the leadership of its President for 18 years, Mr. Eddie N. Williams.

After a distinguished career in public service: First, as a Staff Assistant for the U.S. Senate Committee on Foreign Relations and later, in various posts as a Foreign Service reserve officer at the Department of State, Mr. Williams took over the presidency of the Joint Center for Political Studies in 1972. Under his leadership, the Joint Center has contributed much to our collective understanding of the effects of our policy decisions on poor families. I remember with particular gratitude Mr. Williams' contributions to the debate on the Family Support Act. His insights were invaluable.

I congratulate Mr. Williams and the Joint Center on this milestone. This is an occasion to celebrate an extraordinary institution and a not less exemplary President. I ask unanimous consent that an article written by David Broder for the Washington Post commemorating the anniversary of the founding of the Joint Center be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 4, 1990]

PRESIDENTS, RACE AND POLITICS

(By David S. Broder)

By his presence, a president of the United States testifies to the importance of any occasion. So it is tonight when President Bush attends a dinner that marks the 20th anniversary of one of the nation's most useful, if unheralded, institutions: the Joint Center for Political Studies.

It was created, at the urging of black intellectuals and activists, to serve as a research and training center for those who were leading the transition from the civil rights struggle to political power. When it started, there were about 1,200 black elected officials in the country. Today there are six

times as many including the man who is tonight's honoree, Virginia Gov. L. Douglas Wilder Jr. (D).

Many have contributed to the success of the JCPS. Social psychologist Kenneth B. Clark and Chicago publisher-politician Louis Martin saw the need for a think tank oriented to issues in the black community and to the black men and women who were moving into positions of local elected leadership, many without any real experience or training for their tasks. The Ford Foundation provided the initial financing, and now businessmen such as Xerox's David Kearns, chairman of this year's dinner, play a vital role.

But JCPS is, to a remarkable degree, a reflection of the man who has headed it for the last 18 years, Eddie N. Williams, whose unique qualities were recognized two years ago by a MacArthur Foundation Fellowship.

Williams probably has taught me as much about politics as anyone I've ever known. When I went to see him a few days before the dinner, I did not come away empty-handed.

First off, he said, JCPS is changing its name to become the Joint Center for Political and Economic Studies. It reflects the reality of its scholarly agenda—and an important shift in American society.

"There's more to be done in the political-governmental world, of course, Williams said, "but the rights of minorities have been established, and I see no turning back. And blacks are involved in a strategic way in our politics—both as voters and officeholders.

"But as the nation itself becomes more focused on the economic challenge at home and abroad, blacks must become increasingly knowledgeable and sophisticated about economic issues. More and more, black goals will have to be achieved by strategies aimed at others as well. We have always focused on building coalitions across racial lines, but now that involves not just mobilizing public opinion and political action, but mastering economic data. We need to understand, for example, how education and training programs affect the labor market, because the quality and availability of labor are vital to involving corporate America in the effort."

Economics also holds the key, Williams said, to the future of the increasingly divergent sectors of black America—the growing middle class and the tragically persistent underclass. More than others, blacks' situation depends on government policy. The impending shrinkage of the armed services will narrow a path to economic security for many minorities. The expension of Head Start can be a liberating force for many from stunted family backgrounds.

Williams is not ignoring the racism that persists in American society. He speaks of it with barely suppressed anger. Looking at the upsurge of racial incidents on campuses and in cities, Williams said, "I have to wonder if the whole period of the Reagan administration did not allow the genie of racism to escape the bottle."

But Bush—who as vice president accompanied his wife to a previous JCPS anniversary banquet, where Barbara Bush was being honored for her work on illiteracy—has changed the atmosphere, Williams said, "His persona is different, and he has shown a readiness Reagan never did to use the White House to speak out against racism and for fairness in American society."

"For years I've said that although partisanship is an intensely personal decision, it is increasingly clear that black political influence would be substantially enhanced if black voters would achieve a more balanced partisan alignment. But for years, the Republicans did not offer a very hospitable environment."

Bush has what Williams called "an enormous oppurtunity to change that," eepecially with the post-civil rights generation of younger blacks persistently showing less attachment to the Democratic Party.

But the visible success blacks are achieving as Democrats—with Wilder as the first elected governor, mayors in predominantly white cities from New York to Seattle and Ron Brown in the chairmanship of the national Democratic Party—tends to solidify blacks' allegiance to the Democrats. Williams argues that a breakthrough for Republicans will come only "when they permit not just the safe and comfortable blacks to take part in their deliberations, but those who will put the same kind of demands on their coalition that black activists put on the Democratic Party."

"It would be better for both parties, and for America," Williams said, "if those strains were more equally shared." Given all that has happened in the 20 years that tonight's dinner celebrates, it's not impossible that Williams' wish may also come true.

UNITED STATES IGNORES CHANGES AT UNESCO

Mr. MOYNIHAN. Mr. President, I have just confirmed with the State Department that the United States has decided not to rejoin Unesco at this time. While I understand some of the concerns that might have led to this decision, I am disturbed by the tone of the announcement, in which the State Department claims that "very little has changed [at Unesco] since the United States withdrew at the end of 1984." Mr. President, there may be some legitimate question as to whether Unesco has changed enough but it is inaccurate, unwise and counterproductive to suggest that "very little has changed" within that institution.

The new Director-General, Frederico Mayor, a respected biochemist from Spain, has labored mightly and with great success to expunge from Unesco the inappropriate anti-Western rhetoric which had come to denigrate the very freedoms which Unesco was created to protect. Expert analysis of the recent General Conference has identified dramatic changes in Unesco's program since the days of Director-General M'Bow. Our Former colleague, the esteemed Robert Stafford, chaired a panel on Unesco for the United Nations Association of the U.S.A. and concluded that Unesco has made "remarkable progress in recent years." Leonard Sussman of Freedom House, a man with great experience in Unesco matters, has called the communications plan adopted at the recent General Conference "the best 6-year plan supporting the free-flow-of-information ever produced by Unesco.

It is especially disturbing to read that the State Department believes that this is not even the right time to "reopen the question" of U.S. membership in Unesco. Senator Stafford's panel called this a "crucial moment for the director of the organization". Six years have elapsed since the United States withdrew from Unesco. When the State Department issues its formal April 17 report on Unesco I will be very interested to see what facts are marshalled to support the argument that the United States can do more to improve Unesco by staying out of the organization than it could do by rejoining and helping our allies continue the progress which has already been made.

Mr. President, I ask that an article from today's Washington Post concerning the State Department's decision be printed in the RECORD.

The article follows:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 4, 1990]

U.S. DECIDES TO REMAIN OUT OF UNESCO

The United States has decided not to rejoin UNESCO because of a continuing dispute over its management and what the Bush administration considers its political bias, U.S. officials said yesterday.

The United States withdrew from the U.N. Educational, Scientific and Cultural Organization in 1984, accusing the Paris-based agency of politicization and anti-Western bias.

"The time is not right for the United States to reopen the question of renewing its membership in UNESCO," said State Department spokesman Margaret Tutwiler.

The department will submit a full report to Congress April 17 explaining its reasons, she said.

After reviewing UNESCO's actions at its recent general conference and analyzing the restructuring proposals raised there, the United States concluded that "very little has changed since the United States withdrew at the end of 1984," Tutwiler said.

The United States and Britain, which also withdrew from UNESCO, accounted for some 30 percent of the organization's budget. Britain too reportedly has decided to stay out of UNESCO.

There had been some speculation the United States would resume its membership after UNESCO got a new director general, Federico Mayor of Spain. Mayor visited Washington several months ago to lobby for the United States' return, meeting with administration officials and members of Congress.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations

which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 1:50 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 299. Concurrent resolution providing for an adjournment of the House from April 4, 1990 to April 18, 1990, and a recess or adjournment of the Senate from April 5 or April 6, 1990.

At 3:11 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the House:

H.R. 3968. An act to further delay the applicability of certain amendments to the Public Health Service Act that relate to organ procurement organizations; and

H.R. 4009. An act to authorize appropriations for fiscal year 1991 for the Federal Maritime Commission, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 275. Concurrent resolution providing for preparation of a volume entitled "Columbus in the Capital", and for other purposes.

ENROLLED BILL SIGNED

The message further announced that the Speaker has signed the following enrolled bill:

S. 1813. An act to ensure that funds provided under section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 may be used to acquire land for emergency shelters.

MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 4009. An act to authorize appropriations for fiscal year 1991 for the Federal Maritime Commission, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Labor and Human Resources:

Charles J. Chamberlain, of Illinois, to be a Member of the Railroad Retirement Board for the term of five years from August 29, 1989;

Glen J. Bower, of Illinois, to be a Member of the Railroad Retirement Board for the remainder of the term expiring August 28, 1992; and

Lynne Vincent Cheney, of Wyoming, to be Chairperson of the National Endowment for the Humanities for a term of four years.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HOLLINGS (for himself, Mr. THURMOND, Mr. MITCHELL, Mr. DOLE, Mr. SANFORD, Mr. HELMS, Mr. FORD, Mr. LOTT, Ms. MIKULSKI, Mr. HEINZ, Mr. HEFLIN, Mr. BREAUX, Mr. COCHRAN, Mr. BUMPERS, Mr. COHEN, Mr. BYRD, Mr. D'AMATO, Mr. DECONCINI, Mr. HATCH, Mr. DIXON, Mr. KASTEN, Mr. DODD, Mr. BURNS, Mr. FOWLER, Mr. ROTH, Mr. GORE, Mr. INOUYE, Mr. RUDMAN, Mr. JOHNSTON, Mr. SPECTER, Mr. LEAHY, Mr. WARNER, Mr. METZENBAUM, Mr. MURKOWSKI, Mr. JEFFORDS, Mr. NUNN, Mr. MCCONNELL, Mr. PRYOR, Mr. REID, Mr. RIEGLE, Mr. ROCKEFELLER, Mr. SASSER, Mr. SHELBY, Mr. SIMON, Mr. MOYNIHAN, Mr. SARBANES, Mr. PELL, Mr. BURDICK, Mr. KENNEDY, Mr. LEVIN, Mr. LAUTENBERG, Mr. BRYAN, Mr. DASCHLE, Mr. KERRY, and Mr. LIEBERMAN):

S. 2411. A bill to provide for orderly imports of textiles, apparel, and footwear; to the Committee on Finance.

By Mr. PACKWOOD:

S. 2412. A bill for the relief of Carmen Victoria Parini, Felix Juan Parini, and Sergio Manuel Parini; to the Committee on the Judiciary.

By Mr. KERRY:

S. 2413. A bill to make eligibility standards for the award of the Purple Heart currently in effect applicable to members of the Armed Forces of the United States who were taken prisoner or taken captive by a hostile foreign government or its agents or a hostile force before April 15, 1962, and for other purposes; to the Committee on Armed Services.

By Mr. WILSON (for himself, Mr. DOMENICI, and Mr. GRAHAM):

S. 2414. A bill to amend the Public Health Service Act to establish a program of formula grants for compensating certain trauma care centers for unreimbursed costs incurred with respect to undocumented aliens; to the Committee on Labor and Human Resources.

By Mr. DOMENICI (for himself, Mr. MCCLURE, Mr. WIRTH, Mr. REID, Mr. MCCAIN, and Mr. BRYAN):

S. 2415. A bill to encourage solar and geothermal power production by removing the size limitations contained in the Public Utility Regulatory Act of 1978; to the Committee on Energy and Natural Resources.

By Mr. DURENBERGER:

S. 2416. A bill to include photoreceptors and assemblies containing photoreceptors within the temporary suspension of duty on parts of certain electrostatic copying machines, and to extend the suspension until January 1, 1993; to the Committee on Finance.

S. 2417. A bill to extend until January 1, 1993, the existing temporary suspension of duty on cyclosporine; to the Committee on Finance.

S. 2418. A bill to correct the tariff treatment of certain articles covered by the Nairobi protocol; to the Committee on Finance.

By Mr. MCCONNELL (for himself, Mr. LUGAR, Mr. PRYOR, and Mr. FOWLER):

S. 2419. A bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101); to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. JOHNSTON (by request):

S. 2420. A bill to withdraw certain lands in Eddy County, NM, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. THURMOND:

S.J. Res. 285. Joint resolution to designate the period commencing September 9, 1990, and ending on September 15, 1990, as "National Historically Black Colleges Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. RIEGLE (for Mr. MITCHELL (for himself and Mr. DOLE)):

S. Con. Res. 117. Concurrent resolution expressing the appreciation of Congress for the contributions of the Friends of the National Arboretum in providing for the preservation and public display of 22 of the original columns of the east front portico of the U.S. Capitol Building; considered and agreed to.

S. Con. Res. 118. Concurrent resolution to authorize the printing of a brochure describing the history, design, and functions of the U.S. Capitol as the seat of the legislative branch of the Government; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HOLLINGS (for himself, Mr. THURMOND, Mr. MITCHELL, Mr. DOLE, Mr. SANFORD, Mr. HELMS, Mr. FORD, Mr. LOTT, Ms. MIKULSKI, Mr. HEINZ, Mr. HEFLIN, Mr. BREAUX, Mr. COCHRAN, Mr. BUMPERS, Mr. COHEN, Mr. BYRD, Mr. D'AMATO, Mr. DECONCINI, Mr. HATCH, Mr. DIXON, Mr. KASTEN, Mr. DODD, Mr. BURNS, Mr. FOWLER, Mr. ROTH, Mr. GORE, Mr. INOUYE, Mr. RUDMAN, Mr. JOHNSTON, Mr. SPECTER, Mr. LEAHY, Mr. WARNER, Mr. METZENBAUM, Mr. MURKOWSKI, Mr. JEFFORDS, Mr. NUNN, Mr. MCCONNELL, Mr. PRYOR, Mr. REID, Mr. RIEGLE, Mr. ROCKEFELLER, Mr. SASSER, Mr. SHELBY, Mr. SIMON, Mr. MOYNIHAN, Mr. SARBANES, Mr. PELL, Mr. BURDICK, Mr. KENNEDY, Mr. LEVIN, Mr. LAUTENBERG, Mr. BRYAN, Mr. DASCHLE, Mr. KERRY, and Mr. LIEBERMAN):

S. 2411. A bill to provide for orderly imports of textiles, apparel, and footwear; to the Committee on Finance.

(The remarks of Mr. HOLLINGS, Mr. THURMOND, Mr. HELMS, and Mr. WARNER and the text of the bill are printed earlier in today's RECORD.)

By Mr. PACKWOOD:

S. 2412. A bill for the relief of Carmen Victoria Parini, Felix Juan Parini, and Sergio Manuel Parini; to the Committee on the Judiciary.

RELIEF OF PARINI FAMILY

● Mr. PACKWOOD. Mr. President, today I am introducing legislation which would allow three of my constituents to become U.S. citizens. Felix Juan Parini, Sergio Manuel Parini, and Carmen Victoria Parini all believed they were U.S. citizens by virtue of their father's citizenship. However, in 1987, when Felix Juan Parini applied for a passport renewal, it was discovered that his father had not met the residency requirements to pass citizenship on to Felix, Sergio, or Carmen. Before this time, all three had believed in good faith that they were U.S. citizens. The misunderstanding was due not to any fault on the part of the Parini's, but to apparent agency errors. Both the State Department and the Immigration and Naturalization Service have concluded that private legislation is the only way to remedy this unfortunate situation. I am pleased to introduce legislation today that will allow Felix, Sergio, and Carmen Parini to become U.S. citizens.●

By Mr. KERRY:

S. 2413. A bill to make eligibility standards for the award of the Purple Heart currently in effect applicable to members of the Armed Forces of the United States who were taken prisoner or taken captive by a hostile foreign government or its agents or a hostile force before April 15, 1962, and for other purposes; to the Committee on Armed Services.

ELIGIBILITY FOR AWARD OF PURPLE HEART

Mr. KERRY. Mr. President, today I am proud to introduce legislation to extend eligibility for the award of the Purple Heart to U.S. service personnel captured and held as prisoner-of-war during World Wars I and II and the Korean conflict.

U.S. prisoners-of-war have suffered greatly as a result of their dedication and service to our Nation. While in captivity, they were often times subjected to treatment at the hands of the enemy that was nothing short of inhumane. Cases of brutality beyond description including physical and psychological torture, starvation, and execution have all been documented. Although they endured this suffering in defense of the United States, the sacrifices made by many prisoners-of-war held during World Wars I and II and the Korean conflict have gone unrewarded. Their numbers are not insignificant. There were 4,120 U.S. prisoners-of-war in World War I, 130,201 in World War II, and 7,140 in the Korean conflict.

On April 25, 1962, by signing Executive Order 11016, President John F. Kennedy ensured the right of future U.S. prisoners-of-war to be eligible to receive the Purple Heart as a result of injuries received while in captivity, or if the horrors of their ill-treatment culminated in death. Prior to this, our prisoners-of-war were eligible for the medal if they had been injured in action before or during capture, or in an attempted escape.

This change in policy only applied to prisoners-of-war captured after the date of signing. The Purple Heart was not awarded retroactively to former prisoners-of-war captured during World Wars I and II and the Korean conflict because, among other reasons, it was felt this action would contradict the decisions made by past military leaders who thought that injuries incurred while a prisoners-of-war were the result of war crimes, not the result of a legal act of war.

Although I respect this judgment, I feel that bestowing the much deserved recognition to those individuals who have suffered in so many ways as a result of their willingness to work in defense of all we hold sacred, must take precedence.

There can be no question that the experience of prisoners-of-war injured or killed during captivity prior to April 25, 1962, is easily recognizable as deserving of the honor of the Purple Heart. The sacrifices they made in service to our country are no less valuable than those of the brave individuals serving our interests after that date. I strongly urge my colleagues to join me in affirming that this noble distinction should belong to all prisoners-of-war, regardless of their date of capture.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2413

Be in enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ELIGIBILITY FOR AWARD OF THE PURPLE HEART

(a) REQUIREMENT TO MAKE AWARD.—(1) Subject to paragraph (2), the President may award the Purple Heart to a person described in subsection (b) who was taken prisoner and held captive before April 25, 1962.

(2) An award of the Purple Heart under paragraph (1) may be made only in accordance with the standards in effect on the date of the enactment of this Act for the award of the Purple Heart to a person described in subsection (b) who has been taken prisoner and held captive on or after April 25, 1962.

(b) ELIGIBLE PERSON.—A person referred to in subsection (a) is an individual who, while a member of the Armed Forces of the United States or a civilian national of the United States serving in any capacity with the Armed Forces of the United States, is taken prisoner and held captive—

(1) while engaged in an action against an enemy of the United States;

(2) while engaged in military operations involving conflict with an opposing foreign force; or

(3) while serving with friendly forces engaged in an armed conflict against an opposing armed force in which the United States is not a belligerent party.

(c) RELATIONSHIP TO OTHER AUTHORITY TO AWARD THE PURPLE HEART.—The authority under this section is in addition to any other authority of the President to award the Purple Heart.

By Mr. WILSON (for himself, Mr. DOMENICI, and Mr. GRAHAM):

S. 2414. A bill to amend the Public Health Service Act to establish a program of formula grants for compensating certain trauma care centers for unreimbursed costs incurred with respect to undocumented aliens; to the Committee on Labor and Human Resources.

TRAUMA CARE CENTER ALIEN COMPENSATION ACT

Mr. WILSON. Mr. President, I am pleased to announce today the introduction of legislation to help prevent further closings of trauma care centers, those centers that provide emergency care for trauma victims along the Nation's southern border.

Mr. President, for very little money this proposal will help save certain trauma care centers from certain closure without this needed Federal assistance.

This legislation addresses the real live crisis that now faces trauma care centers along the United States-Mexican border. These facilities—already struggling with a burden of uncompensated losses resulting from increasing numbers of uninsured patients, inadequate reimbursement numbers, and tremendously increased drug and crime related injuries—now face the additional financial challenge of caring for undocumented trauma victims; that is to say, undocumented, not U.S. citizens but people who are in dire need of emergency assistance having suffered trauma.

Despite our best efforts under the Immigration Reform and Control Act of 1986 the flow of undocumented aliens continues into the United States virtually unchecked. One of the costly implications of our failed immigration policy is the financially strained trauma centers along the United States-Mexican border. These centers care for thousands of undocumented patients each year.

Many trauma centers in the border counties of Texas, Arizona, New Mexico, and in Florida as well as in

California are at the financial breaking point.

In Los Angeles County 10 of what were the original trauma centers in a network established in 1983 have shut their doors. Of course, as each one closes the burden resulting upon the remaining centers is increased proportionately. An 11th trauma facility is due to close in Los Angeles County on May 1 of this year. In San Diego County, the six county trauma centers are threatened by losses of $9 million a year.

Mr. President, similar situations exist in Texas, in Arizona, New Mexico, and in Florida. In Florida, for example, 10 of these centers have closed since 1985. It may well be that any State which has trauma centers serving a significant number of undocumented persons has or shortly will have the identical problem.

These trauma centers are struggling, and some have succumbed to the struggle and closed through no fault of their own but rather they are simply the victims of the Federal Government's inability to control the Nation's border.

Mr. President, without financial relief these trauma centers along the border will not survive. The deterioration of the trauma care network creates problems for the needed trauma care for all individuals, the U.S. residents in the area of the border as well as undocumented aliens. It makes no difference whether we are talking about people who are insured or uninsured, rich or poor, U.S. citizens or not.

This legislation entitled "The Trauma Care Alien Compensation Act of 1990" has been introduced as well on the House side by my colleague, Congressman LOWERY, and is designed to provide the financial relief to trauma care facilities which are treating a disproportionate number of undocumented aliens. The bill provides $20 million to qualified trauma centers that demonstrate that at least 15 percent of their unreimbursed trauma care costs arise from the treatment of undocumented patients.

Clearly $20 million will not provide full reimbursement to all the trauma centers in all the States that require assistance. Further, my legislation does not solve the full range of trauma care centers uncompensated care problems. But the Trauma Care Alien Compensation Act can help keep open the doors of some of the trauma centers hardest hit by this continuing flow of undocumented aliens into the country until such time as Congress, the Federal Government, can come up with an approach that is effective in stopping that flow.

Trauma care centers take their responsibility to save lives and to provide the best care possible to their patients, legal and illegal, very seriously. By supporting this proposal Congress can show those hospitals that we take them and the critical life and death care that they provide just as seriously.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2414

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Trauma Care Center Alien Compensation Act of 1990".

SEC. 2. FORMULA GRANTS FOR COMPENSATING CERTAIN TRAUMA CARE CENTERS FOR UNREIMBURSED COSTS WITH RESPECT TO UNDOCUMENTED ALIENS.

Subpart I of part D of title III of the Public Health Service Act (42 U.S.C. 254b et seq.) is amended by adding at the end the following new section:

"SEC. 330A. GRANTS TO COMPENSATE TRAUMA CARE CENTERS FOR UNREIMBURSED COSTS ASSOCIATED WITH UNDOCUMENTED ALIENS.

"(a) REQUIREMENT OF ALLOTMENTS.—For the purpose described in subsection (b)(1), the Secretary shall make an allotment each fiscal year for each trauma care center described in subsection (c)(1). The allotment shall be made in an amount determined in accordance with subsection (d). The Secretary shall make payments to each such trauma care center from the allotment for the center if the Secretary approves an application submitted by the center pursuant to subsection (f).

"(b) PURPOSE OF ALLOTMENTS.—

"(1) IN GENERAL.—The purpose referred to in subsection (a) is compensating, partially or fully, each trauma care center described in subsection (c)(1) for the portion of its unreimbursed costs described in paragraph (2) that are attributable to the provision of trauma care to undocumented aliens.

"(2) UNREIMBURSED TRAUMA CARE.—The unreimbursed costs referred to in paragraph (1) are costs—

"(A) that are incurred by a trauma care center in providing trauma care; and

"(B) for which the center, after reasonable effort, is unable to obtain reimbursement—

"(i) from the patient involved, from any guardian of the patient, or from any individual liable for the debts of the patient;

"(ii) from any State compensation program, from any insurance policy, or from any Federal, State, or local health benefits program; or

"(iii) from an entity that provides health services on a prepaid basis.

"(c) ELIGIBLE TRAUMA CARE CENTERS.—

"(1) MINIMUM PERCENTAGE WITH RESPECT TO UNDOCUMENTED ALIENS.—The trauma care center described in this subsection is any trauma care center that, of its total unreimbursed costs as described in subsection (b)(2) that were incurred for the fiscal year described in paragraph (2), incurred such costs with respect to undocumented aliens in an amount constituting not less than 15 percent.

"(2) RELEVANT FISCAL YEAR.—The fiscal year referred to in paragraph (1) is the fiscal year immediately preceding the fiscal year for which the trauma care center involved is applying to receive payments under subsection (a).

"(3) REGULATIONS.—To be eligible to receive assistance under this section, a trauma care center shall be considered as a trauma care center under regulations promulgated by the Secretary under this section.

"(d) DETERMINATION OF AMOUNT OF ALLOTMENT.—

"(1) FORMULA.—Subject to the extent of amounts made available in appropriations Acts, and subject to paragraph (2), the allotment under subsection (a) for a trauma care center for a fiscal year shall be the product of—

"(A) the amount appropriated under subsection (h) for the fiscal year; and

"(B) a pecentage equal to the quotient of—

"(i) the unreimbursed costs described in subsection (b)(2) that were incurred with respect to undocumented aliens by the trauma care center for the immediately preceding fiscal year; divided by

"(ii) the total such costs that were incurred with respect to undocumented aliens by trauma care centers in the United States for such fiscal year.

"(2) LIMITATION.—An allotment for a trauma care center under subsection (a) for a fiscal year may not exceed the amount of its unreimbursed costs described in paragraph (1)(B)(i).

"(e) DETERMINATION OF COSTS OF TRAUMA CARE.—

"(1) IN GENERAL.—For purposes of this section, the costs incurred by a trauma care center for the provision of trauma care shall be determined by the Secretary, acting through the Administrator of the Health Care Financing Administration. Such costs shall be determined on the basis of charges levied by the trauma care center for the provision of such care, as adjusted to cost through the most recent applicable cost-to-charge ratio computed in accordance with regulations issued under title XVIII of the Social Security Act.

"(2) SUBMISSION OF CHARGE DATA TO SECRETARY.—The Secretary shall not make payments under subsection (a) unless the trauma care center involved submits to the Secretary such data relating to charges levied by the center as the Secretary determines to be necessary to carry out this section.

"(f) REQUIREMENT OF APPLICATION.—The Secretary shall not make payments under subsection (a) unless an application for such payment is submitted to the Secretary and the application is in such form, is made in such manner, and contains such agreements, assurances, and information as the Secretary determines to be necessary to carry out this section.

"(g) DEFINITION.—For purposes of this section, the term 'undocumented alien' means—

"(I) any low-income individual who is not a citizen or national of the United States and who is in the United States in violation of the Immigration and Nationality Act; and

"(2) any individual whom the trauma care center involved reasonably believes to be an individual described in paragraph (1).

"(h) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of carrying out this section, there are authorized to be appropriated $20,000,000 for each of the fiscal years 1991 through 1994.".

SEC. 3. STUDY.

(a) IN GENERAL.—The Secretary of Health and Human Services shall conduct a study to—

(1) determine the total amount of uncompensated health care provided by border area trauma centers and the percentage of uncompensated care associated with trauma services provided to undocumented aliens;

(2) evaluate the effect of the Federal assistance provided under the amendment made by section 2 to eligible trauma care centers on the provision of uncompensated care provided by such centers;

(3) develop recommendations for improving the effectiveness of the grants program established under the amendment made by section 2; and

(4) develop recommendations for methodology to accurately identify undocumented aliens served by trauma centers and to estimate the associated costs.

(b) COORDINATION.—In conducting the study under subsection (a), the Secretary of Health and Human Services shall coordinate with the Southwest Border Rural Health Research Center. The department of health (or the designee of such department) of each State that is affected by the study conducted under subsection (a) shall serve as the liaison to assist the Center in conducting research in such State.

(c) REPORT.—

(1) INTERIM REPORT.—Not later than September 31, 1992, the Secretary of Health and Human Services shall prepare and submit, to the appropriate Committees of Congress, an interim report concerning the study conducted under this section.

(2) FINAL REPORT.—Not later than September 31, 1994, the Secretary of Health and Human Services shall prepare and submit, to the appropriate Committees of Congress, a final report concerning the study conducted under this section.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for fiscal years 1991 through 1992, $500,000 to carry out this section.

By Mr. DOMENICI (for himself, Mr. MCCLURE, Mr. WIRTH, Mr. REID, Mr. MCCAIN, and Mr. BRYAN):

S. 2415. A bill to encourage solar and geothermal power production by removing the size limitations contained in the Public Utility Regulatory Policies Act of 1978; to the Committee on Energy and Natural Resources.

SOLAR AND GEOTHERMAL POWER PRODUCTION INCENTIVES ACT

● Mr. DOMENICI. Mr. President, along with Senators MCCLURE, WIRTH, REID, MCCAIN, and BRYAN, I am introducing legislation to remove the size restrictions contained in the Public Utility Regulatory Policies Act of 1978 [PURPA] for solar and geothermal powerplants. Under PURPA, a new solar facility larger than 30 megawatts, or a new geothermal facility larger than 80 megawatts, cannot be built without losing its PURPA regulatory benefits; and, for all practical purposes, without those benefits solar and geothermal powerplants cannot be built.

PURPA's size limitations of solar and geothermal powerplants are no longer necessary or appropriate, and they unduly limit the development of these facilities. It is time they be removed, which is what this legislation proposes to do.

It had originally been my intention to offer this legislation as an amendment to the Clean Air Act amendments, but at the request of the chairman of the Committee on Energy and Natural Resources, I am instead introducing this as a freestanding bill. Senator JOHNSTON has assured me that this legislation will be brought before the committee in a timely manner, and that hearings and committee action can be expected.

Mr. President, this is not the first time the Congress has addressed this issue. Since its enactment in 1978, on several occassions it has been necessary to relax PURPA's size restrictions to reflect the increased capabilities of maturing technologies. PURPA was amended in 1980 to increase from 30 to 80 megawatts the size limitation for geothermal facilities, and 2½ years ago there was temporary legislation enacted to allow QF solar facilites to increase in size from 30 to 80 megawatts without losing their PURPA benefits. Without those changes, economies of scale would not have been available for solar and geothermal projects and the power would have been unnecessarily expensive, or projects might not have been economically feasible. Obviously, neither of those results would have been in the public interest.

For solar energy projects it is particularly necessary to revisit the size limitation. Legislation enacted in 1987 increased the size limitation to 80 megawatts for QF solar facilities, but that was limited to facilities which made certain filings to the Federal Energy Regulatory Commission within 2 years of enactment. With the passage of time, the window of opportunity created by that legislation is now closed, and it is, therefore, again necessary for us to take action if cost-effective solar projects are to be built.

Solar and geothermal electric generating facilities offer clear and dramatic air quality benefits and therefore should be encouraged. Geothermal facilities have no combustion related emissions, and even with the use of a limited amount of natural gas as a back-up source of energy, solar facilities offer very signficant emission reductions even when compared to the cleanest conventional alternative, that of natural gas. Carbon dioxide emissions are 0.27 pound per kilowatt hour for a solar facility, as compared to 1.1 pounds for a natural gas fired powerplant; and NO_x emissions are 0.07 pound per megawatt hour for a solar facility, as compared to 1.4 pounds at a gas fired powerplant.

Solar technology has evolved rapidly since the first utility-scale electric generating facility was placed in service in 1984. Nearly 300 megawatts of solar electric capacity have since been placed in service, and these plants have won high praise from the utility which purchases power from them; praise for both the design and the reliability of solar powerplants.

Similarly, geothermal technology has demonstrated both cost effectiveness and reliability. Over 2,000 megawatts of goethermal generating capacity are currently in service in the United States, and more can be put on line if we adopt the legislation I am introducing today.

At this point in time, PURPA size limitations are the principal barriers limiting solar and geothermal technology. Solar powerplant must gain economies of scale associated with larger facilities in order to compete with fossil fuel alternatives. For geothermal powerplants to fully utilize geothermal reservoirs, it is necessary for facilities in excess of 80 megawatts to be located in close proximity. But in a recent order, the Federal Energy Regulatory Commission indicated the need for congressional action if such colocation were to be allowed.

In contrast, fossil fuel-fired cogenerators are today eligible for qualifying status under PURPA with no size limit. In addition, conventional gas plants are increasingly entering the power supply market as independent power producers, also with no size limit.

Competition in the power supply market is intense and growing. Today, power purchase contract rates are determined either through formal bidding or highly competitive negotiations, and PURPA QF facilities now have little, if any, advantage in competition with other power producers. In short, the power sold under future contracts will be at truly competitive rates without subsidy.

In order for renewable facilities to remain competitive at a time of low fossil fuel prices and persistent high interest rates, it has been essential to drastically improve the cost and performance of these technologies over a very short period of time. For example, solar facilities built in 1984 generate electricity at a lifecycle cost of 24 cents per kilowatt hour. In contrast, the most recent solar powerplant, an 80 megawatt facility placed in service at the end of 1989, has a lifecycle cost of only 8 cents per kilowatt hour; and if this legislation is signed into law, even lower costs of generation can be expected.

To participate in today's highly competitive electric power generation market, it is essential that the cost of solar power production drop even further, to roughly 6 cents per kilowatt hour. By removing the size limit applicable to solar facilities, this amendment will permit solar powerplants to

take advantage of the best opportunity to achieve these additional savings, and at 6 cents, solar energy will be fully competitive with conventional powerplants.

It only takes a moment to describe the legislation: it removes the statutory size limitations applicable to solar and geothermal facilities under PURPA. In all other regards, a qualifying solar or geothermal facility will be treated the same under PURPA and other applicable law.

Although this legislation would take effect immediately upon enactment, in order to insure that there will be no disruption while new regulations are issued, the bill would expand the scope of existing FERC regulations to encompass larger solar and geothermal facilities—except that limitations contained in existing regulations related to size will not apply. In particular, 18 CFR 292.204(a), which addresses size limitations for qualifying status, and 18 CFR 292.601(b), which addresses size limitations for the purpose of exemption from utility-type regulation, will not apply. And in order to give the solar and geothermal industries and potential project investors clear and consistent guidance and regulatory certainty, the bill also calls for an expedited rulemaking by FERC to make such modifications to its regulations as may be needed.

In terms of our national energy policy, it is important that we take reasonable steps to encourage a wide variety of options to help meet this Nation's energy needs in the future. We will never find a single or simple answer to our dependency on imported oil, but incremental steps to promote domestic energy production are very important. This legislation will make several such steps possible. For example, over 30 years, each 80 megawatts of solar generating capacity backs out the equivalent of 13.9 million barrels of foreign oil, and geothermal facilities will contribute likewise to reducing our foreign oil dependency.

This legislation will allow market and technological forces, rather than government regulations, to determine the economically optimal size for renewable energy facilities, thereby enabling these technologies to realize significant additional cost reductions. Improved economic performance will increase our utilization of renewable resources, benefit our air quality and enhance our energy security.

As a Senator from sunny New Mexico, I look forward to the day when my State will more fully utilize its abundant solar resources to generate electricity. This proposal has broad support on both sides of the aisle and I am confident that committee and Senate action will be favorable.

Mr. President, it is for these reasons I am today introducing this legislation and I urge my colleagues to cosponsor it. I ask unanimous consent that the bill be printed in the CONGRESSIONAL RECORD following my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2415

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as "The Solar and Geothermal Power Production Incentives Act of 1990".

SEC. 2. Section 210 of the Public Utility Regulatory Policies Act of 1978 is amended as follows:

(a) In subsection (a), by striking out ", and to encourage geothermal small power production facilities of not more than 80 megwatts capacity,".

(b) In subsection (e)(2), by inserting "(other than a qualifying small power production facility which is a solar or geothermal facility as defined in section 3(17)(E) of the Federal Power Act)" after "facility" where it first appears, and by striking out ", or 80 megawatts for a qualifying small power production facility using geothermal energy as its primary energy source,".

SEC. 3. (a) Section 3(17)(A) of the Federal Power Act is amended by inserting "a facility which is a solar or geothermal facility, or" after " 'small power production facility' means".

(b) Section 3(17) of such Act is further amended by inserting at the end thereof the following new subparagraph:

"(E) 'solar or geothermal facility' means a facility which produces electric energy solely by the use, as a primary energy source, of solar energy or geothermal resources;".

SEC. 4. (a) Within 30 days of the date of enactment of this Act, the Federal Energy Regulatory Commission shall issue such proposed modifications to its regulations as may be necessary to implement the amendments made by this section, and within 90 days of such date, the Commission shall issue final regulations.

(b) Until regulations described in subsection (a) are final and effective, any solar or geothermal facility (as defined in section 3(17)(E) of the Federal Power Act), which is a qualifying small power production facility as defined in subparagraph (C) of section 3(17) of the Federal Power Act (as such section 3(17) is amended by this Act), (A) shall be considered a qualifying small power production facility under part 292 of title 18 of the Code of Federal Regulations, notwithstanding any size limitations contained in such part, and (B) shall not be subject to the size limitation contained in section 292.601(b) of such part.●

By Mr. DURENBERGER:

S. 2417. A bill to extend until January 1, 1993, the existing temporary suspension of duty on cyclosporine; to the Committee on Finance.

EXTENSION OF DUTY SUSPENSION

● Mr. DURENBERGER. Mr. President, I rise to introduce legislation that would extend until January 1, 1993, the current duty suspension on the drug cyclosporine that is due to expire at the end of this year.

Cyclosporine is an immunosuppressant drug that has proven to be very important in helping patients survive an organ transplant operation. Cyclosporine appears to suppress the bodies' natural immune system, and in so doing, helps the patient fight organ rejection. The drug is manufactured by a company in Switzerland and is not manufactured in the United States. Two years ago, I introduced legislation that suspended the duty on this drug until the end of this year. The legislation I am introducing today merely extends that duty suspension another 2 years.●

By Mr. DURENBERGER:

S. 2418. A bill to correct the tariff treatment of certain articles covered by the Nairobi protocol; to the Committee on Finance.

TARIFF TREATMENT OF CERTAIN ARTICLES UNDER THE NAIROBI PROTOCOL

● Mr. DURENBERGER. Mr. President, I rise to introduce legislation that would clarify that parts used in the manufacture of hearing aids qualify under the Nairobi protocol for duty free entry into the United States.

In August 1985, the Nairobi protocol expired and was not extended until Congress adopted the Omnibus Trade Act. Between the time the protocol expired and implementation of the Trade Act, the Customs Service charged duty on all imports of hearing aids and hearing aid parts. Importers of hearing aids and parts were under the impression that duties paid would be refunded when the protocol was extended. However, the importers have now learned that the Customs Service has reinterpreted the Nairobi protocol and concluded that hearing aid parts are no longer eligible for duty free treatment.

Mr. President, I believe it is inappropriate to impose duties on hearing aid parts. The Nairobi protocol covers articles "specifically designed or adopted for the use or benefit * * * of physically * * * handicapped persons." I think there should be no question but that hearings aids, and the parts that are necessary for their manufacture, fall into the category of products that should be eligible under the protocol. The legislation I am introducing today makes certain that these parts are so treated, and allows for a refund of the duties that have been paid since the Customs Service's erroneous misinterpretation of the protocol.●

By Mr. McCONNELL (for himself, Mr. LUGAR, Mr. PRYOR, and Mr. FOWLER):

S. 2419. A bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101); to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURAL PRODUCTS DEVELOPMENT ACT

● Mr. McCONNELL. Mr. President, today I introduce legislation to expand

programs to enhance development of new uses for existing commodities, new crops, and enchancement of industrial uses of our renewable resources. The Agricultural Products Development Act of 1990 is designed to bridge the gap between public research and private sector development to commercial production.

Diversification into new and varied agricultural products will provide tremendous benefits to both farmers and consumers. A U.S. Department of Agriculture report in 1987 estimated that $30 billion could be added to farm income and $100 billion to national economic activity annually through the development and commercialization of new farm and forest products.

This legislation would offer more options at planting time. Some of these crops may be adaptable to following a rotation that could give producers two or three crops from the same field in 1 year. Different uses of traditional crops could increase demand for those crops thus bolstering market prices and farm income. Rural communities would not only benefit from additional farm income, but also from expanded economic development associated with new industry. The USDA report projected the creation of 750,000 new jobs because of agricultural product development.

Aside from these economic rewards, society in general would benefit from a greater variety of products. More importantly, our country's dependence on foreign sources of strategic materials would be reduced. The Native Latex Commercialization and Economic Development Act of 1978 provided the example for some of the earliest new crop research. The act was aimed at reducing the Nation's dependence on foreign sources of rubber for defense purposes.

In 1984, Congress broadened its language to include the development of raw materials from existing new and existing crops. And from new crops and now is the time to concentrate our efforts on further development. For more than 50 years, publicly funded agricultural research has discovered and patented hundreds of new products or processes in this area and there are thousands more yet to be discovered. This legislation is designed to facilitate that process of discovery, development and eventually application.

Agricultural production capacity in the United States is vastly underutilized. Facilitating the process will allow better utilization and stewardship of resources. With this bill we need to establish a new national priority in agricultural diversification with new crops and new uses of existing crops. We should not limit ourselves only to the progress we have made in the past. Instead, we must seize the opportunity to provide insight for the future.

Congress must provide sustained, long-term financial commitment among public and private agencies and the agricultural community. We must increase support for State and Federal research programs including a more efficient flow of information. A national institute must be established to implement and carry out a program for applied research and development. With these goals in mind we must formulate a plan to reach these goals. I believe this legislation along with the commitment of the Secretary of Agriculture will set a strategy for better utilization of both research and resources.●

By Mr. JOHNSTON (by request):

S. 2420. A bill to withdraw certain public lands in Eddy County, NM, and for other purposes; to the Committee on Energy and Natural Resources.

WASTE ISOLATION PILOT PLANT LAND WITHDRAWAL ACT

● Mr. JOHNSTON. Mr. President, today I am introducing legislation at the request of the Department of Energy to withdraw the public land surrounding the Waste Isolation Pilot Plant in Carlsbad, NM. This land withdrawal is necessary to allow opening of the WIPP facility to demonstrate the storage and eventual disposal of transuranic waste from our Nation's nuclear weapons production. The opening of the WIPP facility is a very important part of the weapons production cycle because it will demonstrate that we have the technology necessary to store and dispose the byproducts of these weapons safely.

The Waste Isolation Pilot Plant is a research and development facility of the Department of Energy that was authorized by Public Law 96-164 for the purpose of demonstrating the safe disposal of radioactive waste generated by the Department of Energy's nuclear weapons production activities. The WIPP facility, built 2,000 feet below the surface in the Delaware salt basin in New Mexico, has been under construction since 1981. Construction of the facility is now completed, and the facility will soon be ready to begin the demonstration phase. During that phase, the Department of Energy will conduct a series of experiments to evaluate the facility's ability to comply with environmental laws governing the safe storage and disposal of nuclear waste.

The WIPP site consists of 10,240 acres in Eddy County, NM, all of which is public land administered by the Bureau of Land Management. Currently, the land is utilized under an administrative land withdrawal issued by the the Department of Interior in June 1983. This administrative withdrawal is for a period of 8 years; however, it does not authorize use of the land for transportation, storage, or burial of any radioactive waste at the site.

The legislation I am introducing today would permanently withdraw this land from the public domain and transfer it to control by the Department of Energy. It would be possible to continue use of the land under another administrative land withdrawal—at least for the demonstration phase. However, both the Department of Energy and the State of New Mexico have indicated a preference to withdraw the land permanently through legislation. The Department of Energy is seeking a permanent land withdrawal for several reasons. The environmental standards of the Environmental Protection Agency [EPA] for disposal of radioactive waste require that the Department of Energy exercise active institutional control over the disposal site for up to 100 years and passive control thereafter. Since the Department of Energy has statutory responsibility for managing radioactive waste, the Agency should have permanent jurisdiction and control over the site. In addition, because the period of active use and institutional controls will exceed the maximum 20-year period for administrative land withdrawals, a statutory, permanent land withdrawal is desirable.

The target date for the opening of WIPP is October 1990. The Department has prepared a draft decision plan on WIPP, identifying the activities that need to be completed prior to its opening. I am encouraged that we seem to be moving quickly toward completion of many of these activities. Earlier this week, for example, the Environmental Protection Agency issued its draft ruling on the Department's petition for a no migration variance under the Resource Conservation and Recovery Act. There are still a number of items to be resolved, but I am optimistic that they can be completed in a reasonable timeframe.

The WIPP decision plan envisions a decision on operational readiness of the facility in June 1990. If all items are completed on schedule, WIPP would be ready to begin the demonstration phase by this fall. Earlier this week, Energy Secretary James Watkins testified before the Committee on Energy and Natural Resources on the status of these activities. Admiral Watkins told the committee that all prerequisites for emplacement of waste in WIPP could be met as early as October 1, 1990.

I am pleased that the Department of Energy has now forwarded to the Congress draft land withdrawal legislation. It is important that we get started working on this legislation now so that the opening of this facility will not be delayed by the failure of the Congress to enact legislation.

Transuranic waste from our Nation's defense production activities is generated and stored at 10 Department of Energy sites around the country. At some of these sites, we are running out of the limited temporary storage space. Therefore, opening of this facility will be an extremely important step in demonstrating that the defense waste cleanup is underway at Department of Energy sites around the country.

Time ran out in the 100th Congress before we were able to complete action on land withdrawal legislation for WIPP. The Committee on Energy and Natural Resources reported legislation in the last Congress, and we worked hard with our colleagues from New Mexico, Senators BINGAMAN and DOMENICI, to complete this action in 1988. But time ran out, and unfortunately we must start all over again.

Mr. President, I ask unanimous consent that the transmittal letter from the Department of Energy, a section-by-section analysis, and the text of the bill be printed in the RECORD following my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2420

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Waste Isolation Pilot Plant Land Withdrawal Act."

SEC. 2. DEFINITIONS.

As used in this Act—

(1) "Administrator" means the Administrator of the Environmental Protection Agency.

(2) "Agreement" or "Agreement for Consultation and Cooperation" means the July 1, 1981, Agreement for Consultation and Cooperation, as amended by the November 30, 1984 "First Modification" and the August 4, 1987 "Second Modification," or as it is amended after the date of enactment of this Act, between the State of New Mexico and the United States Department of Energy as authorized by section 213(b) of the Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1980 (Public Law 96-164).

(3) "EEG" means the Environment Evaluation Group for the Waste Isolation Pilot Plant referred to in section 1433 of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456).

(4) "Secretary" means the Secretary of Energy.

(5) "WIPP" means the Waste Isolation Pilot Plant project authorized under section 213 of the Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1980 (Public Law 96-164).

SEC. 3. LAND WITHDRAWAL AND RESERVATION FOR THE WIPP.

(a) WITHDRAWAL, JURISDICTION, AND RESERVATION.—(1) Subject to valid existing rights and except as otherwise provided in this Act, the lands described in subsection (c) are withdrawn from all forms of entry, appropriation, and disposal under the public land laws (including the mineral leasing laws, the geothermal leasing laws, and the material sale laws, except as provided in section 4(b)(2)(D) of this Act), and from location, entry, and patent under the mining laws. These lands shall be known as the "Waste Isolation Pilot Plant Withdrawal" (referred to in this Act as the "Withdrawal").

(2) Jurisdiction over the Withdrawal is transferred permanently from the Secretary of the Interior to the Secretary of Energy. The Withdrawal is permanently reserved for the use of the Secretary of Energy for the construction, operation, repair and maintenance, shutdown, monitoring, decommissioning, post-decommissioning control, and other authorized activities associated with, and limited by, the mission of the WIPP.

(3) The Withdrawal provided in this section takes effect on the date that the Secretary of Energy notifies the Congress of the Secretary's determination that the following activities have been completed:

(A) a Final Safety Analysis Report for the WIPP that addresses performance assessment test phase activities and that is—

(i) prepared by the Department of Energy under its safety analysis procedures and reviewed by the Department of Energy's Advisory Committee on Nuclear Facility Safety;

(ii) submitted to the State of New Mexico and the EEG; and,

(iii) approved by the Secretary.

(B) a Record of Decision on the Supplemental Environmental Impact Statement that applies to test-phase activities; and

(C) a No-Migration Variance that, at a minimum, applies to test-phase activities and has been granted by the Environmental Protection Agency under section 3004 of the Solid Waste Disposal Act (42 U.S.C. 6921, 6924).

The Secretary shall arrange for the notification to be published in the Federal Register.

(b) REVOCATION OF PUBLIC LAND ORDERS.—Public Land Order 6403, of June 29, 1983, and the memorandum of understanding accompanying that order, are revoked on the effective date of the Withdrawal under section 3(a)(3) of this Act.

(c) LAND DESCRIPTION.—

(1) The boundaries depicted on the map issued by the Bureau of Land Management of the Department of the Interior, entitled "Current Boundaries of the Waste Isolation Pilot Plant Site," dated March 1990 and on file in the State of New Mexico Office of the Bureau of Land Management, are established as the boundaries of the Withdrawal.

(2) Within 30 days after the withdrawal takes effect under the terms of this Act, the Secretary of the Interior shall:

(A) publish in the Federal Register a notice containing a legal description of the lands withdrawn and reserved by this Act; and

(B) file copies of the map and the legal description of the lands with the Committee on Energy and Natural Resources of the United States Senate and with the Committee on Interior and Insular Affairs of the United States House of Representatives, the Secretary of Energy, and Governor of the State of New Mexico.

(d) TECHNICAL CORRECTIONS.—The map and legal description referred to in subsection (c) have the same force and effect as if they were included in this Act, except that the Secretary of the Interior may correct clerical and typographical errors in the map and legal description.

(e) WATER RIGHTS.—This Act does not establish a reservation to the United States with respect to any water or water rights on the Withdrawal. This Act does not authorize the appropriation of water on the Withdrawal by the United States after the date of enactment of this Act, except in accordance with the laws of the State of New Mexico. This Act does not affect water rights acquired by the United States before the date of enactment of this Act.

SEC. 4. ESTABLISHMENT OF MANAGEMENT RESPONSIBILITIES.

(a) GENERAL AUTHORITY.—The Secretary shall be responsible for the management of the Withdrawal and the WIPP and shall consult with the State of New Mexico in discharging those responsibilities as well as any other responsibility required by this Act.

(b) MANAGEMENT PLAN.—

(1)(A) Within one year after the date of enactment of this Act, the Secretary, in consultation with the State of New Mexico, shall develop a management plan for the use of the Withdrawal.

(B) Any use of the Withdrawal for activities not associated with the WIPP shall be subject to conditions and restrictions that may be necessary to permit the conduct of WIPP activities.

(2) The management plan shall address other uses of the Withdrawal, including, but not limited to, domestic livestock grazing, hunting and trapping, maintenance of wildlife habitat, the disposal of salt tailings remaining on the surface, and mining, in accordance with the following—

(A) GRAZING.—The Secretary shall permit grazing to continue where established before the date of enactment of this Act subject to regulations, policies, and practices that the Secretary determines necessary or appropriate. The management of grazing shall be conducted in accord with—

(i) title IV of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1751 et seq.);

(ii) the Act entitled "An Act to stop injury to public grazing lands by preventing overgrazing and soil deterioration, to provide for their orderly use, improvement, and development, to stabilize the livestock industry dependent upon the public range, and for other purposes," approved June 28, 1934 (43 U.S.C. 315 et seq., commonly referred to as the "Taylor Grazing Act"); and

(iii) Executive Order 12548 (51 Fed. Reg. 5985).

(B) HUNTING AND TRAPPING.—The Secretary shall permit hunting and trapping within the Withdrawal in accordance with applicable laws and regulations of the United States and the State of New Mexico, except that the Secretary of Energy, after consultation with the New Mexico Department of Game and Fish, may issue regulations designating zones where, and establishing periods when, no hunting or trapping is permitted for reasons of public safety, administration, or public use and enjoyment.

(C) WILDLIFE HABITAT.—In order to preserve the wildlife of the Withdrawal, the Secretary shall manage the Withdrawal so as to maintain the wildlife habitat.

(D) SALT TAILINGS.—Notwithstanding any other law, the Secretary shall dispose of salt tailings that are extracted from the Withdrawal and that are not needed for backfill at the WIPP. Disposition shall be made under sections two and three of the Act of July 31, 1947, as amended (30 U.S.C. 602, 603; commonly referred to as the "Materials Act of 1947").

(E) MINING.—Surface or subsurface mining unrelated to the mission of the WIPP, including slant drilling under the Withdrawal from within or without the Withdrawal, shall not be permitted on or under the Withdrawal, before or after decommissioning.

(c) CLOSURE TO THE PUBLIC.—If the Secretary determines that the health and safety of the public or the common defense and security require the closure to public use of any road, trail, or other portion of the Withdrawal, the Secretary may take whatever action the Secretary determines to be necessary or desirable to effect and maintain closure.

(d) COOPERATIVE AGREEMENTS.—The Secretary may enter into cooperative agreements—

(1) with the Secretary of the Interior and the State of New Mexico for the administration of grazing within the Withdrawal; and

(2) with the State of New Mexico for the maintenance of the wildlife habitat of the Withdrawal.

(e) SUBMISSION OF PLAN.—Within one year after the date of enactment of this Act, the Secretary shall submit the management plan developed under subsection (b) to the Committee on Interior and Insular Affairs of the United States House of Representatives, the Committee on Energy and Natural Resources of the United States Senate, and the State of New Mexico. Any amendments to the plan shall be submitted promptly to those Committees and the State of New Mexico.

SEC. 5. PERFORMANCE ASSESSMENT TEST PLAN.

The Secretary shall develop a WIPP performance assessment test plan in consultation with the National Academy of Sciences, the Administrator, the Governor of the State of New Mexico, and the EEG, that addresses experiments to demonstrate compliance with applicable Environmental Protection Agency standards for disposal of transuranic waste, other experiments that the Secretary considers to be necessary to assure the protection of the health and safety of the public, the timing of experiments, an estimate of the quantities and types of waste required for any of these experiments, and the data required to make a performance assessment.

SEC. 6. OPERATIONS PERFORMANCE DEMONSTRATION.

Prior to the time the Secretary submits a statement to the Congress and the Environmental Protection Agency that the Secretary has complied with Environmental Protection Agency standards for the disposal of transuranic wastes pursuant to section 7(a)(2), if the Secretary determines that an operations performance demonstration is needed to support the demonstration and evaluation of the WIPP, the Secretary shall develop an operations performance plan in consultation with the Governor of the State of New Mexico, and the EEG. The operations performance plan shall specify the amount of waste needed to perform the operations demonstration and shall include procedures for the review of equipment and personnel performance, waste receipt and handling, and the application of quality assurance and quality control requirements.

SEC. 7. COMPLIANCE WITH EPA STANDARDS.

(a) COMPLIANCE WITH EPA STANDARDS.—(1) From the date of enactment of this Act, the Secretary, with respect to the WIPP, shall be subject to Environmental Protection Agency management and storage standards that apply to transuranic waste, as those standards are in effect on the date of the enactment of this Act, or as amended after that date.

(2)(A) Prior to the permanent disposal of transuranic waste at the WIPP—

(1) the Secretary, with respect to the WIPP, shall comply with the Environmental Protection Agency standards for disposal of transuranic wastes established pursuant to section eight; and

(2) the Secretary shall submit a statement of compliance with Environmental Protection Agency standards for disposal of transuranic wastes and necessary supporting documents to the Congress and the Environmental Protection Agency.

(b) LIMITATION ON TRANSURANIC WASTE.—Until the Secretary submits a statement to the Congress and the Environmental Protection Agency that the Secretary has complied with Environmental Protection Agency standards for disposal of transuranic wastes, the Secretary is limited in the amount of transuranic waste that can be emplaced in the WIPP facility to no more than that amount specified in the plans prepared under sections five and six.

(c) ENGINEERED BARRIERS REQUIRED.—The WIPP shall use both engineered and natural barriers to isolate transuranic waste after disposal to the extent necessary to comply with Environmental Protection Agency standards for the disposal of the waste.

SEC. 8. ESTABLISHMENT OF EPA STANDARDS.

(a) PROMULGATION AND ISSUANCE OF EPA STANDARDS.—The Administrator, pursuant to authority under other provisions of law, shall—

(1) issue revised proposed environmental standards for disposal of transuranic wastes no later than 12 months after the date of enactment of this Act; and

(2) issue final environmental standards for disposal of transuranic wastes not later than two years after the date of enactment of this Act.

(b) COMPLIANCE WITH FUTURE STANDARDS.—If the Administrator is ordered by a court of law to repromulgate or reissue the standards required under subsection (a) or is enjoined from implementing the standards or is otherwise prevented from giving the standards full force and effect by a court of law, the Secretary shall demonstrate compliance with the standards required under subsection (a) notwithstanding any court order to the contrary, unless the court order expressly finds and orders that its injunction relates to substantive health and safety aspects of the standards directly applicable to the WIPP.

(c) FAILURE TO PROMULGATE OR ISSUE.—If the Administrator fails to issue environmental standards for disposal of transuranic wastes pursuant to subsection (a), the Secretary shall demonstrate compliance with the environmental standards for the disposal of transuranic wastes as these regulations were in effect on November 18, 1985.

(d) COMPLIANCE WITH RCRA.—The Administrator, with respect to the WIPP, shall regulate as hazardous waste under subtitle C of the Solid Waste Disposal Act (42 U.S.C. 6921 et seq.) (commonly referred to as the Resource Conservation and Recovery Act) the hazardous component of all waste that is both hazardous and transuranic until the Administrator approves amendments to the State of New Mexico's hazardous waste program that authorize the State to regulate the hazardous component of waste that is both hazardous and transuranic.

SEC. 9. ECONOMIC ASSISTANCE.

(a) WIPP-RELATED BUSINESS AND EMPLOYMENT OPPORTUNITIES.—To the maximum extent practicable, the Secretary shall continue to encourage business and employment opportunities related to the WIPP that may be conducive to the economy of the State of New Mexico, especially Lea and Eddy Counties, and report annually to the State of New Mexico on these activities.

(b) PAYMENTS EQUIVALENT TO TAXES.—There is authorized to be appropriated to the Secretary of Energy such sums as are necessary to provide a payment each fiscal year to the State of New Mexico and each unit of local government in which the Withdrawal is located. The payments shall be equal to the amount the State of New Mexico and the unit of local government would receive were they authorized to tax the development and operation of the WIPP, as the State of New Mexico and unit of local government tax the other real property and industrial activities occurring within the State of New Mexico and the unit of local government. The payments shall continue until all activities related to the development and operation of the WIPP are terminated at the WIPP site.

(c) POTASH LEASE.—The Secretary shall enter into negotiations relating to the mineral tract particularly described as Federal Potash Lease No. NM0384584, 1,600 acres of which lie within the Withdrawal, to arrive at a just compensation for the holder of the lease of that tract. There is authorized to be appropriated to the Secretary such sums as are necessry to acquire these interests. Nothing in this section shall be construed to be a waiver of any judicial remedies available to the owners of these interests or to the Secretary if an agreement cannot be reached on just compensation.

SEC. 10. DECOMMISSIONING OF THE WIPP.

(a) PLAN FOR WIPP DECOMMISSIONING.—Within five years after the date of enactment of this Act, the Secretary shall submit to the Committees on Armed Services and Energy and Natural Resources of the United States Senate, the Committees on Armed Services, Energy and Commerce, and Interior and Insular Affairs of the United States House of Representatives, the State of New Mexico, the EEG, and the Administrator a plan for managing the WIPP after decommissioning. In addition to activities required under the Agreement for Consultation and Cooperation between the Department of Energy and the State of New Mexico, the plan shall be consistent with the standards for disposal of radioactive waste established by the Administrator that apply to the WIPP at the time the plan is prepared. The Secretary shall consult with the State of New Mexico and the EEG in the preparation of this plan.

(b) MANAGEMENT PLAN FOR THE WITHDRAWAL AFTER DECOMMISSIONING.—Within five years after the date of enactment of this Act, the Secretary shall publish in the Federal Register a plan for the management and use of the Withdrawal following the decommissioning of the WIPP. The Secretary shall consult with the State of New Mexico and the EEG in the preparation of this plan.

WASTE ISOLATION PILOT PLANT LAND WITHDRAWAL ACT SECTION-BY-SECTION ANALYSIS

SECTION 1—SHORT TITLE

Provides that the Act may be cited as the "Waste Isolation Pilot Plant Land Withdrawal Act."

SEC. 2—DEFINITIONS

Provides definitions relevant to the Act.

SEC. 3—LAND WITHDRAWAL AND RESERVATION FOR THE WIPP

This section authorizes the withdrawal of the land within the current boundaries of the WIPP site (the "Withdrawal") from all forms of entry, appropriation and disposal under the public land laws and the permanent transfer of jurisdiction over the Withdrawal to the Secretary of Energy. The Withdrawal is to take effect upon the date that the Secretary notifies Congress of the completion of a Final Safety Analysis Report, the completion of a Record of Decision on the Supplemental Environmental Impact Statement that applies to test-phase activities, and the granting of a No-Migration Variance by EPA.

SEC. 4—ESTABLISHMENT OF MANAGEMENT RESPONSIBILITIES

The Secretary must manage the WIPP and develop a management plan, in consultation with the State of New Mexico, within one year of the enactment of the Act. The Secretary must permit grazing, hunting and trapping within the Withdrawal subject to necessary or appropriate regulation. Surface or subsurface mining is prohibited. The Secretary may close any or all of the Withdrawal to the public.

SEC. 5—PERFORMANCE ASSESSMENT TEST PLAN

This section requires the Secretary, in consultation with the National Academy of Sciences, EPA, the State of New Mexico, and the EEG, to develop a WIPP performance assessment test plan that describes experiments demonstrating compliance with EPA standards for disposal of transuranic waste and any other experiments that the Secretary deems necessary.

SEC. 6—OPERATIONS PERFORMANCE DEMONSTRATION

Before the Secretary's submittal of a statement of compliance with EPA standards for the disposal of transuranic waste, the Secretary must develop an operations performance demonstration if he determines that one is needed to evaluate the WIPP.

SEC. 7—COMPLIANCE WITH EPA STANDARDS

The WIPP will be subject to EPA management and storage standards applicable to transuranic waste. Before disposal of transuranic wastes at WIPP, the Secretary must comply with EPA standards for disposal, and submit a statement of compliance to the Congress and EPA. Until the statement of compliance has been submitted, the Secretary may only place the amount of waste specified in the Performance Assessment Test Plan and the Operations Performance Demonstration Plan in the WIPP facility. This section further provides that the WIPP shall use both engineered and natural barriers to isolate the transuranic waste to the extent necessary to comply with EPA disposal standards.

SEC. 8—ESTABLISHMENT OF EPA STANDARDS

EPA is required to issue proposed and final standards for disposal of transuranic waters within two years after the date of enactment. The Secretary must demonstrate compliance with the standards notwithstanding any court order requiring the repromulgation or reissuance of the standards or any injunction preventing their enforcement, unless the court finds that its injunction relates to health and safety aspects of the standards applicable to the WIPP. If EPA fails to issue the above standards for waste disposal, the Secretary must demonstrate compliance with the environmental standards for transuranic waste disposal in effect on November 18, 1985.

SEC. 9—ECONOMIC ASSISTANCE

The Secretary must continue to encourage business and employment opportunities related to the WIPP that will be conducive to the economy of the State of New Mexico, to the extent feasible. This section authorizes to be appropriated to the Secretary such sums as are necessary to provide to the State of New Mexico, and each unit of local government in which the WIPP is located, payments equal to the amount those governments would have received were they authorized to tax the WIPP. These payments are to continue until all development and operational activities are terminated at the WIPP site. This section also authorizes to be appropriated such sums as are necessary to compensate the holder of a Federal Potash Lease within the Withdrawal.

SEC. 10—DECOMMISSIONING OF THE WIPP

Within five years of enactment, the Secretary must submit to designated Senate and House committees, the State of New Mexico, the EEG, and the EPA a plan for managing the WIPP after decommissioning. The plan must be consistent with EPA standards for disposal of radioactive waste that apply to the WIPP at the time the plan is prepared. Within five years of enactment, the Secretary is required to publish a plan in the Federal Register for the management and use of the Withdrawal following the decommissioning of the WIPP. The Secretary must consult with the State of New Mexico and the EEG in the preparation of the plans.

THE SECRETARY OF ENERGY,
Washington, DC.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: Enclosed is proposed legislation entitled the "Waste Isolation Pilot Plant Land Withdrawal Act." I strongly urge the Congress to enact this legislation as quickly as possible. Its enactment would preclude the need for extension and modification of the current administrative land withdrawal covering this project and allow important test programs to be conducted at the Waste Isolation Pilot Plant (WIPP).

The Congress authorized the WIPP project in 1980 to demonstrate the safe disposal of radioactive waste generated by the Department's defense activities. The WIPP's development has proceeded in a phased manner, from site characterization and validation through facility construction. The disposal facility is located deep underground in thick salt formations on public lands near Carlsbad, New Mexico.

The next step—a vital one—is the test phase during which experiments must be conducted on site to allow an assessment of the facility's safe performance and to obtain operational experience. Upon completion of the test phase, a determination will be made as to whether to store wastes at the site permanently.

To promote safe operations at the facility and to ensure the protection of public health and safety, it is necessary to withdraw the lands around the WIPP site from public use. The current administrative land withdrawal for the WIPP expires in 1991 and does not authorize the transportation, storage, and burial of radioactive materials at the site. Although the Department is seeking to modify and extend the administrative land withdrawal, permanent land withdrawal through legislative means is the option preferred by the Department to allow the test phase to move forward expeditiously.

In my testimony before the Congress and in numerous public statements, I have said that I will not permit the WIPP to open for testing until I am certain that it is safe and has met all prerequisites specified in the Department's "WIPP Decision Plan;" the plan is regularly updated and released for public review and comment. To further emphasize this point, I have included in this legislative proposal specific conditions that the Department must meet before the land withdrawal could take effect. These conditions are completion of a final safety analysis report; completion of a record of decision on a supplemental environmental impact statement that applies to test phase activities; and the issuance of a "No-Migration Variance" by the Environmental Protection Agency (EPA) under the Resource Conservation and Recovery Act. The legislative proposal also requires compliance with EPA standards for the management, storage, and disposal of transuranic waste.

In addition, the proposal includes economic assistance provisions. Under those provisions, the Department would continue to encourage business and employment activities in the State of New Mexico. The Department also would provide payments to the State and units of local government in which the land withdrawal is located. Those payments would be equal to taxes that these jurisdictions would receive were they authorized to tax the WIPP as an industrial facility. (The amount of those payments has not yet been determined.) Finally, the Department would be required to enter into negotiations related to a potash lease in the vicinity of the WIPP.

It should be noted that when the land withdrawal takes effect, the Department will be in a position to provide to the State of New Mexico additional funds in the amount of $42,451,750.00. The funds are being held by the Department in a special reserve account.

We must demonstrate in this country the ability to manage and dispose of nuclear waste safely. I consider the WIPP test phase to be a vital step in that process. The enactment of land withdrawal legislation, with its conditions, would allow WIPP test programs to be conducted in a timely manner and assure the protection of public health and safety.

The Office of Management and Budget advises that there is no objection to presentation of this legislative proposal to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

JAMES D. WATKINS,
Admiral, U.S. Navy (Retired).●

By Mr. THURMOND:

S.J. Res. 285. Joint resolution to designate the period commencing September 9, 1990, and ending on September 15, 1990, as "National Historically Black Colleges Week"; to the Committee on the Judiciary.

NATIONAL HISTORICALLY BLACK COLLEGES WEEK

Mr. THURMOND. Mr. President, I rise today to introduce a joint resolution which authorizes and requests the President to designate the week of

September 9, 1990, through September 15, 1990, as "National Historically Black Colleges Week."

This is the 8th consecutive year that I have authorized this legislation.

Six of the 107 historically black colleges, namely Allen University, Benedict College, Claflin College, South Carolina State College, Morris College, and Vorhees College, are located in my home State. These colleges are vital to the higher education system of South Carolina. They have provided thousands of economically disadvantaged young people with opportunity to obtain a college education.

Mr. President, hundreds of thousands of young Americans have received quality educations at these 17 schools. These institutions have a long and distinguished history of providing the training necessary for participation in a rapidly changing society. Historically black colleges offer to our citizens a variety of curriculums and programs through which young people develop skills and talents, thereby expanding opportunities for continued social progress.

Recent statistics show that historically black colleges and universities have graduated 60 percent of the black pharmacists in the Nation, 40 percent of the black attorneys, 50 percent of the black engineers, 75 percent of the black military officers, and 80 percent of the black members of the judiciary.

Mr. President, through passage of this joint resolution, Congress can reaffirm its support for historically black colleges, and appropriately recognize their important contributions to our Nation. I look forward to the speedy passage of this joint resolution, and I ask unanimous consent that a copy of the joint resolution appear in the CONGRESSIONAL RECORD following my remarks.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. Res. 285

Whereas there are 107 Historically Black Colleges and Universities in the United States;

Whereas such colleges and universities provide the quality education so essential to full participation in a complex, highly technological society;

Whereas such institutions have allowed many underprivileged students to attain their full potential through higher education; and

Whereas the achievements and goals of the Historically Black Colleges are deserving of national recognition: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the period commencing September 9, 1990, and ending on September 15, 1990, is designated as "National Historically Black Colleges Week" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States and interested groups to observe such week with appropriate ceremonies, activities, and programs, thereby demonstrating support for Historically Black Colleges and Universities in the United States.

ADDITIONAL COSPONSORS

S. 176

At the request of Mr. HEINZ, the names of the Senator from Mississippi [Mr. LOTT], the Senator from New York [Mr. D'AMATO], and the Senator from Maryland [Ms. MIKULSKI] were added as cosponsors of S. 176, a bill to amend the Foreign Agents Registration Act of 1938 to strengthen the registration and enforcement requirements of that act.

S. 185

At the request of Mr. DIXON, the name of the Senator from Massachusetts [Mr. KERRY] was added as cosponsor of S. 185, a bill to amend title 18 of the United States Code to punish as a Federal criminal offense the crimes of international parental child abduction.

S. 216

At the request of Mr. MOYNIHAN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 216, a bill to establish the Social Security Administration as an independent agency, which shall be headed by a Social Security Board, and which shall be responsible for the administration of the Old-Age, Survivors, and Disability Insurance Program under title II of the Social Security Act and the Supplemental Security Income Program under title XVI of such act.

S. 416

At the request of Mr. DOMENICI, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of S. 416, a bill to provide that all Federal civilian and military retirees shall receive the full cost-of-living adjustment in annuities payable under Federal retirement systems for fiscal years 1990 and 1991, and for other purposes.

S. 513

At the request of Mrs. MIKULSKI, the names of the Senator from Texas [Mr. BENTSEN], the Senator from Nebraska [Mr. EXON], and the Senator from Massachusetts [Mr. KENNEDY] were added as cosponsors of S. 513, a bill to amend chapters 83 and 84 of title 5, United States Code, to extend certain retirement provisions of such chapters which are applicable to law enforcement officers to inspectors of the Immigration and Naturalization Service, inspectors and canine enforcement officers of the U.S. Customs Service, and revenue officers of the Internal Revenue Service.

S. 563

At the request of Mr. MATSUNAGA, the name of the Senator from Wisconsin [Mr. KASTEN] was added as a cosponsor of S. 563, a bill to amend section 3104 of title 38, United States Code, to permit certain service-connected disabled veterans who are retired members of the Armed Forces to receive retired pay concurrently with disability compensation after a reduction in the amount of retired pay.

S. 1673

At the request of Mr. MOYNIHAN, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 1673, a bill to amend title XIX of the Social Security Act to provide for substance abuse treatment services on request for individuals desiring to rid themselves of substance abuse problems, and for other purposes.

S. 1766

At the request of Mr. DANFORTH, the name of the Senator from Alabama [Mr. SHELBY] was added as a cosponsor of S. 1766, a bill to amend titles XVIII and XIX of the Social Security Act to require providers of services under such titles to enter into agreements assuring that individuals receiving services from such providers will be provided an opportunity to participate in and direct health care decisions affecting such individuals.

S. 1890

At the request of Mr. THURMOND, the name of the Senator from Arizona [Mr. MCCAIN] was added as a cosponsor of S. 1890, a bill to amend title 5, United States Code, to provide relief from certain inequities remaining in the crediting of National Guard technician service in connection with civil service retirement, and for other purposes.

S. 2048

At the request of Mr. SARBANES, the name of the Senator from Montana [Mr. BAUCUS] was added as a cosponsor of S. 2048, a bill to provide for cost-of-living adjustments in 1991 under certain Government retirement programs.

S. 2051

At the request of Mr. HEFLIN, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 2051, a bill to amend the Social Security Act to provide for more flexible billing arrangements in situations where physicians in the solo practice of medicine or in another group practice have arrangements with colleagues to "cover" their practice on an occasional basis.

S. 2054

At the request of Mr. DODD, the names of the Senator from California [Mr. CRANSTON], the Senator from Tennessee [Mr. GORE], the Senator from Indiana [Mr. COATS], and the Senator from Oregon [Mr. HATFIELD] were added as cosponsors of S. 2054, a bill to amend the Public Health Service Act to authorize grants and con-

tracts for projects providing primary pediatric care to disadvantaged children, and for other purposes.

S. 2056

At the request of Mr. HARKIN, the name of the Senator from Wisconsin [Mr. KOHL] was added as a cosponsor of S. 2056, a bill to amend title XIX of the Public Health Service Act to provide grants to States and implement State health objectives plans, and for other purposes.

S. 2159

At the request of Mr. BOSCHWITZ, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 2159, a bill to amend title II of the Social Security Act to eliminate the earnings test for individuals who have attained retirement age.

S. 2214

At the request of Mr. PACKWOOD, the names of the Senator from Mississippi [Mr. LOTT] and the Senator from Washington [Mr. GORTON] were added as cosponsors of S. 2214, a bill to provide incentives to health care providers serving rural areas, to eliminate the Medicare reimbursement differential between hospitals located in rural and urban areas, and for other purposes.

S. 2222

At the request of Mr. BRADLEY, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of S. 2222, a bill to amend the Internal Revenue Code of 1986 with respect to the tax treatment of payments under life insurance contracts for terminally ill individuals.

S. 2229

At the request of Mr. DODD, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 2229, a bill to reauthorize the Head Start Act for fiscal years 1991 through 1994, and for other purposes.

S. 2250

At the request of Mr. DECONCINI, the name of the Senator from New Mexico [Mr. DOMENICI] was added as a cosponsor of S. 2250, a bill to amend title 5, United States Code, with respect to setting rates of basic pay for law enforcement officers, and for other purposes.

S. 2252

At the request of Mr. SIMON, the names of the Senator from Massachusetts [Mr. KERRY] and the Senator from Maine [Mr. MITCHELL] were added as cosponsors of S. 2252, a bill to encourage and facilitate entry into the teaching profession, and for other purposes.

S. 2304

At the request of Mr. RIEGLE, the names of the Senator from Minnesota [Mr. BOSCHWITZ] and the Senator from Mississippi [Mr. LOTT] were added as cosponsors of S. 2304, a bill to amend Federal laws to reform housing, community and neighborhood development, and related programs, and for other purposes.

S. 2337

At the request of Mr. LEVIN, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 2337, a bill to amend the Trade Act of 1974 to provide for review by the Trade Representative of compliance by foreign countries with trade agreements.

S. 2369

At the request of Mr. BAUCUS, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 2369, a bill to initiate actions under section 310 of the Trade Act of 1974 with respect to the trade barriers of Japan that are the subject of the structural impediments initiative.

SENATE JOINT RESOLUTION 230

At the request of Mr. DECONCINI, the name of the Senator from West Virginia [Mr. BYRD] was added as a cosponsor of Senate Joint Resolution 230, a joint resolution to designate the period commencing on May 6, 1990, and ending on May 12, 1990, as "National Drinking Water Week."

SENATE JOINT RESOLUTION 242

At the request of Mr. THURMOND, the names of the Senator from Illinois [Mr. DIXON], the Senator from North Carolina [Mr. HELMS], the Senator from Wyoming [Mr. Simpson], the Senator from Illinois [Mr. SIMON], the Senator from Idaho [Mr. SYMMS], the Senator from Idaho [Mr. MCCLURE], the Senator from Colorado [Mr. WIRTH], the Senator from Washington [Mr. ADAMS], the Senator from New York [Mr. D'AMATO], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Nebraska [Mr. EXON] were added as cosponsors of Senate Joint Resolution 242, a joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims' Rights Week."

SENATE JOINT RESOLUTION 246

At the request of Mr. BOSCHWITZ, the name of the Senator from Kansas [Mrs. KASSEBAUM] was added as a cosponsor of the Senate Joint Resolution 246, a joint resolution calling upon the United Nations to repeal General Assembly Resolution 3379.

SENATE JOINT RESOLUTION 265

At the request of Mr. DODD, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of Senate Joint Resolution 265, a joint resolution commemorating May 18, 1990, as the 25th anniversary of Head Start.

SENATE JOINT RESOLUTION 275

At the request of Mr. LEVIN, his name was added as a cosponsor of Senate Joint Resolution 275, a joint resolution designating May 13, 1990, as the "National Day in Support of Freedom and Human Rights in China and Tibet."

SENATE JOINT RESOLUTION 279

At the request of Mr. SPECTER, the names of the Senator from Virginia [Mr. WARNER], the Senator from California [Mr. WILSON], the Senator from Kansas [Mr. DOLE], and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of Senate Joint Resolution 279, a joint resolution to designate the week of September 16, 1990, through September 22, 1990, as "National Rehabilitation Week."

SENATE JOINT RESOLUTION 281

At the request of Mr. LEVIN, his name was added as a cosponsor of Senate Joint Resolution 281, a joint resolution to designate September 13, 1990, as "National D.A.R.E. Day."

SENATE JOINT RESOLUTION 97

At the request of Mr. GORE, the names of the Senator from New Jersey [Mr. LAUTENBERG] and the Senator from Texas [Mr. GRAMM] were added as cosponsors of Senate Joint Resolution 97, a concurrent resolution expressing the sense of the Congress with respect to popular anti-Semitism in the Soviet Union.

At the request of Mr. PRESSLER, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of Senate Joint Resolution 97, supra.

SENATE JOINT RESOLUTION 102

At the request of Mr. DIXON, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of Senate Joint Resolution 102, a concurrent resolution expressing the sense of the Congress regarding the existing borders between Germany and Poland.

SENATE CONCURRENT RESOLUTION 112

At the request of Mr. MOYNIHAN, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Concurrent Resolution 112, a concurrent resolution expressing the sense of the Congress that the United States should seek to obtain an Advisory Opinion for the International Court of Justice concerning the right of self-determination of the people of Lithuania.

SENATE CONCURRENT RESOLUTION 115

At the request of Mr. LAUTENBERG, the names of the Senator from Illinois [Mr. DIXON], the Senator from North Dakota [Mr. BURDICK], the Senator from Maryland [Mr. SARBANES], and the Senator from Vermont [Mr. JEFFORDS] were added as cosponsors of Senate Concurrent Resolution 115, a concurrent resolution to express the sense of the Congress regarding future funding of Amtrak.

SENATE CONCURRENT RESOLUTION 116

At the request of Mr. D'AMATO, the name of the Senator from Arizona [Mr. MCCAIN] was added as a cosponsor of Senate Concurrent Resolution 116, a concurrent resolution commend-

ing Poland and Prime Minister Mazowiecki for their courageous and resolute stand in permitting charter flights to carry Soviet Jews to Israel.

SENATE RESOLUTION 231

At the request of Mr. BRADLEY, the names of the Senator from Louisiana [Mr. BREAUX], the Senator from Maryland [Ms. MIKULSKI], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of Senate Resolution 231, a resolution urging the submission of the Convention on the Rights of the Child to the Senate for its advice and consent to ratification.

SENATE RESOLUTION 263

At the request of Mr. LAUTENBERG, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of Senate Resolution 263, a resolution to express the sense of the Senate regarding the need to establish a sound national transportation policy integrating all modes of transportation and maintaining a significant Federal role.

SENATE CONCURRENT RESOLUTION 117—RELATIVE TO CONTRIBUTIONS OF THE FRIENDS OF THE NATIONAL ARBORETUM

Mr. RIEGLE (for Mr. MITCHELL, for himself and Mr. DOLE) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 117

Whereas the Capitol Building of the United States symbolizes the enduring success of the American system of representative democracy;

Whereas on-going construction of this magnificent building, which began nearly two centuries ago and continued until recently, has mirrored the geographic expansion of the United States;

Whereas the original Corinthian sandstone columns that stood for more than 130 years on the East Front Portico of the Capitol Building were replaced during the extension of the East Front of the Capitol Building in the late 1950's;

Whereas 22 of those columns have been preserved and made available for public display at the National Arboretum in the Nation's Capital through the initiative and determined efforts of the Friends of the National Arboretum, a non-profit, volunteer organization that supports the efforts of the National Arboretum; and

Whereas these historically significant columns will be dedicated at the National Arboretum on Flag Day, June 14, 1990: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress extends its deep appreciation to the Friends of the National Arboretum and those individuals whose financial contributions have helped ensure that 22 of the original sandstone Corinthian columns which were removed from the East Front Portico of the Capitol Building during the extension of the East Front of the Capitol Building in the late 1950's will be permanently preserved and publicly displayed at the National Arboretum.

SENATE CONCURRENT RESOLUTION 118—AUTHORIZING THE PRINTING OF A BROCHURE

Mr. RIEGLE (for Mr. MITCHELL, for himself and Mr. DOLE) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 118

Resolved by the Senate (the House of Representatives concurring), That a brochure describing the history, design, and functions of the United States Capitol as the seat of the legislative branch of the Government shall be printed as a Senate document, with appropriate illustrations and diagrams. In addition to the usual number, 250,000 copies of the brochure shall be printed for the use of the Senate and the House of Representatives, to be allocated as determined jointly by the Secretary of the Senate and the Clerk of the House of Representatives.

AMENDMENTS SUBMITTED

TRADE AND COMPETITIVENESS ACT

ROTH AMENDMENT NO. 1463

(Ordered to lie on the table.)

Mr. ROTH submitted an amendment intended to be proposed by him to the bill (H.R. 1594) to extend nondiscriminatory treatment to the products of the People's Republic of Hungary for 3 years, as follows:

On page 271, after line 12, insert the following new section:

SEC. . AGGLOMERATE MARBLE FLOOR TILES.

(a) RECLASSIFICATION.—Chapter 68 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by striking out subheading 6810.19.10 and inserting the following new subheadings with the article descriptions for such subheadings having the same degree of indentation as the article description for subheading 6804.22.60:

"	Floor and wall tiles:				
6810.19.12	Agglomerate marble tiles	4.9%	Free (A, E, IL) 4.7% (CA).	40%	
6810.19.14	Other	21%	Free (A, E, IL) 16.8% (CA).	55%".	

(b) EFFECTIVE DATE.—

(1) GENERAL RULE.—The amendments made by subsection (a) shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after October 1, 1990.

(2) RELIQUIDATION.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law to the contrary, upon a request filed with the appropriate customs officer after September 30, 1990 and before April 1, 1991, any entry or withdrawal from warehouse for consumption of goods to which the amendment made by this section applies and that was made—

(A) after December 31, 1988; and

(B) before October 1, 1990;

and with respect to which there would have been a lower duty if the amendment made by this section had applied to such entry or withdrawal, shall be liquidated or reliquidated as though such entry or withdrawal had occurred on October 1, 1990.

ROTH (AND OTHERS) AMENDMENT NO. 1464

(Ordered to lie on the table.)

Mr. ROTH (for himself, Mr. BRADLEY, Mr. LAUTENBERG, and Mr. LOTT) submitted an amendment intended to be proposed by them to the bill H.R. 1594, supra, as follows:

At the end of the bill, insert the following new title:

TITLE V—ADMINISTRATIVE PROCEDURES FOR NONCONTROVERSIAL TARIFF SUSPENSIONS

SEC. 5001. INITIATION OF INVESTIGATIONS.

(a) PETITIONS.—

(1) any person who—

(A) uses an article in the production of a product in the United States,

(B) imports an article into the United States, or

(C) distributes an article in the United States,

may file with the United States International Trade Commission (hereafter referred to in this Act as the "Commission") a petition requesting the President to issue a proclamation under section 5003(a) that suspends the duty imposed on such article by any chapter of the Harmonized Tariff Schedule of the United States other than chapter 98 or 99, if the rate of duty applicable to such article is provided in rate of duty column 1.

(2) Any person who—

(A) produces in the United States—

(i) any article for which a duty is suspended by reason of a proclamation issued under section 5003(a),

(ii) any other article like, or directly competitive with, such article, or

(iii) any other article which is like, or directly competitive with, a product that is produced in the United States by means of a process which uses such article as a significant raw material or component,

(B) has—

(i) the capacity, and

(ii) the bona fide intent,

to produce such article, or any other article like, or directly competitive with, such article in the United States in significant quantities,

may file with the Commission a petition requesting the President to issue a proclamation under section 5003(b) that reinstates such duty.

(3) The Commission shall not accept a petition under paragraph (1) or (2) for the suspension or reinstatement of a duty on an article before the date that is 1 year after the date on which a bill is introduced in the House of Representatives or the Senate that would, if enacted, effect such suspension or reinstatement.

(4) Each petition filed under paragraph (1) or (2) shall contain—

(A) sufficient information (including a precisely defined article description) to enable the Commission to determine whether an investigation into the suspension or reinstatement of the duty is justified;

(B) sufficient information for the Commission to make a determination under section 5002(a); and

(C) such other information as the Commission may require.

(5)(A) Not later than the date that is 15 days after the date on which a petition is

filed with the Commission under paragraph (1) or (2), the Commission shall determine whether the information provided in the petition is sufficient to justify an investigation under section 5002.

(B) If the determination made under subparagraph (A) is affirmative, the Commission shall—

(i) transmit a copy of the petition to the United States Trade Representative,

(ii) initiate an investigation under section 5002 of the suspension or reinstatement of the duty requested in the petition, and

(iii) publish in the Federal Register notice of—

(I) the initiation of such investigation, and

(II) the opportunity for public comment on such suspension or reinstatement of the duty.

(C) If the determination made under subparagraph (A) is negative, the Commission shall dismiss the petition and notify the petitioner of the basis on which such negative determination was made.

(b) PRESIDENTIAL REQUEST OR SELF-INITIATION.—

(1) Upon request of the President, or upon the initiative of the Commission, the Commission shall initiate an investigation under section 5002 of the reinstatement of any duty that has been suspended by any previous proclamation issued under section 5003(a).

(2) Upon initiating an investigation under section 5002 by the authority of paragraph (1), the Commission shall—

(A) transmit to the the United States Trade Representative a written statement describing the article and duty that are the subject of such investigation and all information available to the Commission regarding justification of the reinstatement of such duty on such article, and

(B) publish in the Federal Register notice of—

(i) such investigation, and

(ii) the opportunity for public comment on such suspension or reinstatement of the duty.

SEC. 5002. INVESTIGATIONS BY THE COMMISSION.

(a) IN GENERAL.—If the determination made under section 5001(a)(5)(A) is affirmative or section 5001(b)(1) applies, the Commission shall conduct an investigation to determine—

(1) whether the article that is the subject of the petition filed under section 5001(a), or of the notice published under section 5001(b)(2)(B), is produced in the United States,

(2) whether any other article which is like, or directly competitive with, such article is produced in the United States,

(3) whether any other article is produced in the United States which is like, or directly competitive with, a product that is produced in the United States by means of a process which uses (or could use) such article as a significant raw material or component,

(4) whether any person has—

(A) the capacity, and

(B) the bona fide intent,

to produce such article, or any other article like, or directly competitive with, such article in the United States in significant quantities,

(5) whether any person who—

(A) produces in the United States—

(i) such article,

(ii) any other article like, or directly competitive with, such article, or

(iii) any other article described in paragraph (3), or

(B) is described in paragraph (4),

objects to a suspension of the duty imposed on such article by any chapter of the Harmonized Tariff Schedule of the United States other than chapter 98 or 99,

(6) whether any person not described in paragraph (4) or (5)(A) objects to that suspension of duty on such article,

(7) whether any quotas or other import restrictions are imposed by Federal law on such article,

(8) whether any international agreements to which the United States is party affect trade in such article or in any other article like, or directly competitive with, such article,

(9) whether such article, or any article like, or directly competitive with, such article, is, or has been, the subject of any investigation during the precedings 5 years under—

(A) title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq.) or section 303 of the Tariff Act of 1930 (19 U.S.C. 1303),

(B) section 337 of the Tariff Act of 1930 (19 U.S.C. 1303),

(C) chapter 1 of title II of the Trade Act of 1974 (19 U.S.C. 2251 et seq.),

(D) chapter 1 of title III of the Trade Act of 1974 (19 U.S.C. 2411 et seq.), or

(E) section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862),

(10) the aggregate value of such articles imported into the United States during the calendar year preceding the calendar year in which such determination is made,

(11) the aggregate value of such articles consumed in the United States during the calendar year preceding the calendar year in which such determination is made,

(12) the principal uses of such article in the United States,

(13) the duties that are imposed by Federal law on such article and the rates of such duties, and

(14) the aggregate amount of Federal revenue derived from the duties imposed by Federal law on such article during the fiscal year preceding the fiscal year in which such determination is made.

(b) PUBLIC COMMENTS.—During the course of any investigation conducted under this section, the Commission shall provide an opportunity for any person to submit written statements regarding the subject of the investigation and, upon request and after reasonable public notice, shall hold a hearing for the oral presentation of views on the subject of the investigation.

(c) REPORTS.—

(1) Not later than the date that is 75 days after the date on which an investigation under this section is initiated, the Commission shall—

(A) complete a preliminary report on the investigation conducted under subsection (a),

(B) publish a summary of the preliminary report in the Federal Register,

(C) provide a copy of the preliminary report to the petitioner, and

(D) make the preliminary report available for public inspection.

(2) On the date that is 30 days after the date on which a summary of the preliminary report on the investigation conducted under this section is published in the Federal Register, the Commission shall submit to the President a final report on the investigation. Such report shall include—

(A) the determinations made under subsection (a),

(B) a summary of comments received by the Commission regarding such investigation, including comments on the preliminary report completed under paragraph (1), and

(C) a copy of the transcript of any hearings held in the course of such investigation.

(d) DETERMINATIONS NOT SUBJECT TO JUDICIAL REVIEW.—The determinations made by the Commission under subsection (a) shall not be reviewable in any court.

SEC. 5003. ACTION BY THE PRESIDENT.

(a) SUSPENSION OF DUTIES.—

(1) During the 30-day period beginning on the date on which the Commission submits to the President under section 5002(c)(2) a final report on an investigation concerning the suspension of duties on an article, the President may issue a proclamation that suspends the duty imposed on such article by any chapter of the Harmonized Tariff Schedule of the United States other than chapter 98 or 99 if the President determines that—

(A) no person has a valid objection to such a suspension, and

(B) the sum of—

(i) the aggregate amount of Federal revenue derived from the duty imposed on such article by any chapter of the Harmonized Tariff Schedule of the United States other than chapter 98 or 99 during the fiscal year preceding the fiscal year in which such determination is made, and

(ii) the aggregate amount of Federal revenue derived during such preceding fiscal year from all the duties imposed on all articles that are the subject of a previous proclamation issued under this paragraph during the calendar year in which such determination is made,

does not exceed $100,000,000.

(2) The President may not issue a proclamation under paragraph (1) that suspends the duty imposed by the Harmonized Tariff Schedule of the United States on any article to which the rate of duty provided in rate of duty column 2 applies.

(3) In determining whether to issue a proclamation under paragraph (1), the President may take into account—

(A) the effect such a proclamation would have on the bargaining position of the United States in any continuing, planned, or prospective negotiations with any foreign country,

(B) the effect such a proclamation would have on the revenue of the United States,

(C) foreign policy considerations, and

(D) any other factors the President considers appropriate.

(4) If the President does not issue a proclamation under paragraph (1) with respect to any article that is the subject of a report submitted under section 5002(c)(2) during the 30-day period described in paragraph (1), the President shall publish in the Federal Register the reasons why the President is unable, or has declined, to issue such a proclamation.

(5) The duration of the suspension of duties provided in a proclamation issued under paragraph (1) shall not exceed 3 years. Such suspension may be extended by a proclamation issued under paragraph (1) with respect to subsequent investigations conducted under section 5002 for a period not to exceed 3 years for each such proclamation.

(b) REINSTATEMENT OF DUTIES.—

(1) During the 30-day period beginning on the date on which the Commission submits to the President under section 5002(c)(2) a final report on an investigation concerning the reinstatement of duty on an article that

has been suspended by a proclamation issued under subsection (a), the President shall—

(A) determine whether any person has a valid objection to such suspension, and

(B) if the determination made under subparagraph (A) is affirmative, issue a proclamation that reinstates the duty which would be in effect if such suspension had not been made.

(2) The President shall publish in the Federal Register any negative determination made under paragraph (1)(A).

(c) DETERMINATIONS NOT SUBJECT TO REVIEW.—Any determination made by the President under this section shall be final and shall not be reviewable in any court.

SEC. 5004. ALTERNATIVE SCHEDULES.

The President may, by proclamation, establish—

(1) an annual deadline for the filing of petitions under section 5001(a) with respect to which—

(A) the Commission will be required to make determinations under sections 5001(a)(5) and 5002 during the calendar year, and

(B) the President will be required to make determinations under section 5003 during the calendar year, and

(2) a schedule for taking other actions under sections 5001, 5002, and 5003 that may differ from any time requirements set forth in such sections.

SEC. 5005. EFFECTIVE DATE.

The provisions of this Act shall take effect on October 1, 1991.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be allowed to meet during the session of the Senate on Wednesday, April 4, 1990, at 8:30 a.m. to hold a hearing business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate Wednesday, April 4, 1990, at 10 a.m. to hold hearings on modernizing the financial services industry.

SUBCOMMITTEE ON PATENTS, TRADEMARKS, AND COPYRIGHTS

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Subcommittee on Patents, Trademarks, and Copyrights of the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, April 4, 1990, at 2 p.m., on S. 626, a bill to amend the Lanham Trademark Act regarding gray market goods.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERANS' AFFAIRS

Mr. RIEGLE. Mr. President, the Committee on Veterans' Affairs would like to request unanimous consent to hold a hearing on S. 1398, the administration-proposed Department of Veterans Affairs Health Care Quality Assistance and Cost Effectiveness Act of 1989, S. 1332 by Senator MURKOWSKI, and the Secretary's plan to establish administratively the Commission on the Future Structure of Veterans Health Care on Wednesday, April 4, 1990, at 9:15 a.m. in SR-418.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON SMALL BUSINESS

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Small Business Committee be authorized to meet during the session of the Senate on Wednesday, April 4, 1990, at 2 p.m. The committee will hold a hearing on the President's proposed budget proposal for the Small Business Administration and on the reauthorization of the Agency's programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, April 4, 1990, at 2:30 p.m. on the nomination of Lawrence M. McKenna to be U.S. district judge for the Southern District of New York; James F. McClure, Jr., to be U.S. district judge for the Middle District of Pennsylvania; David H. Souter, to be U.S. circuit judge for the First Circuit; and Samuel A. Alito, Jr., to the U.S. circuit judge for the Third Circuit.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CLEAN AIR BILL

● Mr. SIMON. Mr. President, there are many parts of this bill that I support, and I am proud to have been either a sponsor or cosponsor of amendments that make it a better bill.

Some of the amendments that I either sponsored or cosponsored will mean cleaner air for this country because they call for more use of ethanol, a clean-burning fuel. This bill has the most significant boost for ethanol in its history and will mean a great deal for farmers and for the corn industry, calling for about 1 billion bushels of corn for ethanol production by the end of the decade. That 1 billion bushels does not include the study that an amendment I offered calls for, that could result in a substantial increase above that figure. The amendment I offered requires the EPA to make a study of whether or not we should require the 3.1-oxygen level on fuels in communities of 100,000 or more, just as we are requiring them in

large metropolitan areas where there is a severe problem

I will work to make sure these provisions are in the final bill that is sent to the President for signing. I am confident they will be in the final bill.

I will also do everything I can to encourage my House colleagues to see that the burden that now falls on the Midwest unfairly is shifted in the bill that passes the House, and then I hope we can work in conference between the two Houses to make a fair bill on that score.

There were also amendments several of my colleagues and I brought before the Senate which I felt were necessary in order to provide some economic fairness for Illinois and other Midwestern States. They were opposed by President Bush and a bipartisan coalition, and they failed.

In fairness to those who support this legislation, it does call for cleaner air, and that is one of the positives about this legislation. And, as one who has fought for cleaner air, both in my years in the Illinois Legislature and my years in Congress, I regret to find myself in this very difficult situation. When I was in the State legislature, I was the chief sponsor of the legislation that put the teeth in the Illinois Air Pollution Control Act.

However, I oppose this bill in its present form.

Because I am so strongly for clean air, and because this bill does help Illinois farmers, I was weighing this measure carefully; frankly, leaning toward voting for it, despite the negatives that it also has for Illinois.

But the crowning blow came with the defeat of the amendment sponsored by my colleagues from Idaho, Senator MCCLURE, which would have banned the import of electricity from Canada after January 1, 1994, unless they also established clean air requirements similar to our own. Without such an amendment, Canadian coal miners have a tremendous edge over United States coal miners, and the Canadian utilities have a tremendous edge over United States utilities. I want competitive fairness. When that amendment was defeated, it tipped the scales against the bill for me.

Further, the failure to pass that amendment was a signal to encourage air pollution in Canada when we ought to be encouraging clean air initiatives in our neighboring country. One of the things that we have learned is that air pollution does not know the restrictions of national boundaries.

This measure, as now structured, will have a devastating effect on Illinois coal miners and the communities in which they live.

And, it could raise the rates of Illinois utility rate payers by as much as 25 percent.

If, in order to attain clean air, Illinois, along with every State, was being asked to shoulder this kind of a burden, I would support the act. But that is not the case. Illinois and the Midwest States are being asked to shoulder an unfair share of the burden.

I must also address the section of this bill that deals with the problem of acid rain. Essentially, it is President Bush's proposal on acid rain.

Long before President Bush announced he would be the environmental President, I was supporting legislation that would stop acid rain. When I served in the House from a district that produced more coal than any other district in Illinois, I supported acid rain legislation that would have resulted in cost-sharing throughout the Nation, since the whole Nation benefits from the legislation. I did that when, at that point, it was not popular with the United Mine Workers, and the coal industry. I'm pleased to say that in recent years, the United Mine Workers have taken a much more enlightened attitude on this whole problem. So, this is not a new subject for me, and I was glad to hear President Bush acknowledge that acid rain was a problem that had to be dealt with.

What I was not prepared for, and what the people of Illinois were not prepared for, was a proposal from the administration which could lead to the loss of 18,000 jobs in Illinois that are coal-related. What we were also not prepared for was a proposal from President Bush which could lead to utility rates in Illinois increasing by as much as 25 percent.

But the truth about President Bush's proposal on acid rain is that it will lead to economic devastation in some parts of Illinois, and it will increase utility rates, as well. When utility rates in Illinois go up, that means it is even more difficult for our State to attract and keep industry. We are already a State that has been devastated by industrial losses.

I am not against a clean air bill. I want a strong bill. My votes on strengthening amendments show that. I support the environmental goals of President Bush's proposal on acid rain. But I cannot support the economic sledgehammer the administration's acid rain proposal will bring down on the people of Illinois.

The people of Illinois are for a clean air bill. They want a strong bill. All we ask is fairness.

It is clear that the administration does not provide Illinois or the Midwest fairness in this case.

The proposal calls for electric utility power plants in Illinois and other Midwestern States to reduce sulfur dioxide emissions more than other regions of the country.

The Midwest generates roughly 51 percent of the sulfur dioxide in this country. The President's proposal, however, calls for the Midwest to account for 90 percent of this country's sulfur dioxide emissions reductions in the first phase of the bill.

I supported amendments that said, "Mr. President, the Midwest will reduce 90 percent of this country's sulfur dioxide emissions, even through other States will be allowed to increase their sulfur dioxide emissions, but those other States should help us pay for it."

The amendments that I cosponsored were opposed by the President and a bipartisan coalition. Those amendments failed, and the people in the Midwest lost.

I fought for a fair bill that would lessen the impact of job losses in the coal mining communities of Illinois—areas that have already suffered greatly. The administration opposed this effort. The administration won, but the people of Illinois lost.

I fought for a fair bill that would lessen increases in Illinois utility rates—because they are already some of the highest in the country. The administration opposed this effort. The administration won, but the people of Illinois lost.

One of the great injustices is that the number one sulfur dioxide polluter in the Nation today is Texas. You would assume, perhaps, that because Texas is the number one polluter, it would be required to reduce that pollution emission. Yet its utilities will be permitted to add 333,000 more tons of sulfur dioxide into the air than they did in 1980. The increased emissions in Texas account for almost half of the cutback that the State of Illinois has to make. And because of wind patterns, a great deal of the Texas pollution will hit the State of Illinois.

I recognize that the administration has strong roots in Texas, but to permit this kind of an increase in pollution from Texas while cutting back in the Midwest States is grossly unfair.

It does not have to be this way. The administration can win on clean air without being unfair. The people of Illinois do not have to be on the losing end. There are examples of the President's willingness to be fair.

When a hurricane recently devastated part of South Carolina, President Bush sought help for the people of that State. When an earthquake recently hit California, President Bush sought help for the people of that State.

But in this case, not only is President Bush denying fairness for Illinois and the Midwest, his proposal will be the direct cause of the economic earthquake that will hit Illinois and the Midwest.

Even though I am voting against this Senate bill, I will continue to take my battle for fairness to other fronts. I will work with my colleagues in the

House of Representatives while they shape their clean air bill. And I will also work with my colleagues when the House and Senate meet at conference in order to shape the final bill that will be presented to President Bush.

President Bush said he would veto any clean air bill, if it had the amendments I supported, which would assure the coal mining communities of Illinois would not be devastated, and Illinois utility ratepayers would not have to pay more than their fair share to clean up this country's air.

The President got his wish with the Senate bill. He won this battle, but because it is clear the people of Illinois lose economically, I cannot vote for this bill.

I am hopeful that the final bill we vote on, after conference between the House and Senate, will be a better environmental bill for the people of Illinois and this country, and a fairer bill for the people of Illinois and the Midwest.●

SUMMARY OF SENATE CONCURRENT RESOLUTION 110, CONGRESSIONAL BUDGET FOR 1991

● Mr. DOMENICI. Mr. President, last Thursday, March 29, the distinguished chairman of the Senate Budget Committee introduced a budget resolution in the Senate. That resolution (S. Con. Res. 110) was referred to the Budget Committee.

When the Budget Committee failed to report its own budget resolution on April 1, as required by the Congressional Budget and Impoundment Control Act, Senate Concurrent Resolution 110 was automatically discharged from the committee. It is now on the Senate calendar and since it is a privileged matter we could proceed to it immediately.

I do not believe that is likely. I understand that the chairman wants to have the committee work its will.

But I also understand why the chairman may have introduced Senate Concurrent Resolution 110. Both in 1983 and 1984 when I was chairman of the committee, I similarly introduced "place holder" resolutions. In both years the committee followed with reported resolutions effectively mooting the place holder.

But since Senate Concurrent Resolution 110 is a real budget resolution, I think it deserves a little analysis. I asked the Republican staff of the Budget Committee to briefly review the resolution, and I ask that the analysis appear in the RECORD at this point.

The summary follows:

SUMMARY OF SENATE CONCURRENT RESOLUTION 110, CONGRESSIONAL BUDGET FOR 1991

BACKGROUND

On March 29, Chairman Sasser introduced a Senate Concurrent Resolution setting forth a possible budget blueprint for fiscal years 1991, 1992, and 1993. Following the procedures of the Budget Act, the resolution (S. Con. Res. 110) was referred to the Senate Budget Committee. The Senate Budget Committee failed to report a budget resolution for the forthcoming fiscal year by the statutory deadline of April 1. The Committee was, therefore, discharged of S. Con. Res. 110 on April 2 and it was placed on the Senate Calendar (Order No. 499).

S. Con. Res. 110 is available for immediate consideration by the full Senate. The resolution is privileged and the Senate may move to consideration at any time. The resolution may be called up in one of two ways: by unanimous consent or by a nondebateable motion to proceed.

The Senate Budget Committee has twice in the past been discharged of budget resolutions, in 1983 and 1984. In both cases, the Committee later reported a budget in making the discharged resolutions effectively moot. A similar situation could occur this year.

SUMMARY OF RESOLUTION

S. Con. Res. 110 is a three-year budget resolution, including reconciliation instructions to 11 Committees of the Senate. The resolution meets the Gramm-Rudman deficit targets by assuming the Administration's January 1990 economic and technical assumptions.

As is the case with budget resolutions in general, assumptions underlying the resolution are not usually available. This is particularly important as it relates to funding assumptions for discretionary programs. Nonetheless, based on the specific numbers included in S. Con. Res. 110 when compared to the Administration's request, analysts can determine the programmatic assumptions that probably underlie the resolution.

The following table summarizes the major components of S. Con. Res. 110. The resolution reduces the 1991 deficit by $37.2 billion, $367.8 billion over the next five years. Nearly two-thirds of the five-year deficit reduction ($232.4 billion) is achieved through constraints in the defense budget. Twenty percent of the deficit reduction ($73 billion) is achieved from increased revenues.

The resolution, if fully implemented, could:

Reduce defense budget authority $35 billion in 1991, $26 billion more than the President's request.

Bring down defense spending to 3.7 percent of GNP in 1995, the lowest level since 1948.

Cut military personnel 30 percent.

Freeze international affairs programs at their 1990 appropriated levels, possibly precluding initiatives to assist developing democracies.

Reduce the President's science and space initiatives.

Reduce the President's requested increase for law enforcement, litigative, judicial, and correctional activities, which would hamper drug interdiction efforts.

Significantly expand the President's request for education, housing, and income security programs.

Reject the President's proposals to reduce or eliminate programs such as AMTRAK, mass transit, and low-income home energy assistance.

Maintain all other domestic programs at current levels adjusted for inflation.

Reject the President's proposals to freeze civil service and military retirement COLAs and reduce non-needy child nutrition subsidies.

Reduce entitlement programs by $7.8 billion in 1991 but significantly less than that proposed by the President. Agriculture, medicare, federal employees health benefits and lump-sum retirement payments would be modified along with veterans compensation benefits.

Generally assume that the President's requested level of revenues ($14.5 billion in 1991) is achieved, though not necessarily in the specifics. Over the next five years the resolution proposes $31.3 billion more in revenues than the President. Since the CBO estimate of the President's revenues falls short of his request by $4.5 billion in 1991, calls for the President to submit additional proposals to Congress.

SUMMARY OF SENATE CONCURRENT RESOLUTION 110

[In billions of dollars]

	1991	1992	1993	1994	1995	Total 1991–5

Percent of GNP		−2.1		−1.1		−0.9

Note: Excludes adjustment for OMB economics and technicals.

SBC MINORITY STAFF ANALYSIS OF SENATE CONCURRENT RESOLUTION 110

Function 050—National Defense

Relative to the CBO baseline, S. Con. Res. 110, would reduce defense BA by $35 billion and outlays by $15 billion in 1991. This would cut defense by $26 billion in BA and $12 billion in outlays more than the President's request. In the outyears, defense BA would be frozen at the 1991 level of $281 billion. Over the 1991-93 period, this freeze would reduce BA by $143 billion and outlays by $93 billion. This represents a cut of $94 billion in BA and $66 billion in outlays from the President's request. S. Con. Res. 110 would reduce defense spending from its current 5.2 percent of GNP to 3.7 percent by 1995, the lowest since 1948. The President, on the other hand, would reduce defense spending to 4.2 percent of GNP by 1995.

Under S. Con. Res. 110, military personnel reductions in 1991 would total 140,000—100,000 more than the President's request. Force structure reductions would include 3 active divisions (one more than the President), 2 tactical fighter wings, and 22 ships—including one carrier battle group (17 ships and one carrier battle group more than the President). This level could eventually result in a 1995 force structure of 1.5 million, a 30 percent reduction from current levels. Such a force structure would mean the elimination of 8 active and 3 reserve divisions, 10 active and 5 reserve fighter wings, and 100 ships, including 4 carrier battle groups.

DISTRIBUTION OF 1991 DEFENSE REDUCTIONS IN SENATE CONCURRENT RESOLUTION 110

[CBO estimates, in billions of dollars]

	SCR 110		SCR 110 compared to—			
			CBO		President	
	BA	OT	BA	OT	BA	OT
Department of Defense:						
Military personnel	77.4	77.3	−4.2	−4.0	−1.6	−1.5
Operations and maintenance	83.6	83.6	−7.4	−5.7	−6.5	−4.7
Procurement	68.4	78.0	−17.5	−2.7	−9.5	−1.8
RDT&E	33.1	34.6	−5.2	−2.7	−4.8	−2.4
Military construction	4.1	5.1	−1.4	−.3	−1.5	−.4
Family housing	3.2	3.3	−.2	−.1	−.3	−.2

DISTRIBUTION OF 1991 DEFENSE REDUCTIONS IN SENATE CONCURRENT RESOLUTION 110—Continued

[CBO estimates, in billions of dollars]

	SCR 110		SCR 110 compared to—			
			CBO		President	
	BA	OT	BA	OT	BA	OT
Revolving funds, allowances and trust funds	.9	−.3	1.5	.6	−.2	0
Atomic energy defense activities	9.6	9.5	−.4	−.3	−1.3	−.9
Defense-related activities	.6	.6	0	0	−.1	−.1
Function 050 total	281.0	291.7	−34.8	−15.2	−25.9	−12.0

Function 150—International Affairs

S. Con. Res. 110 would freeze discretionary programs at 1990 appropriation levels. Among the Administration initiatives that could be precluded under a freeze would be construction of a new embassy chancery in Moscow, and payment of more than $0.4 billion in United Nations arrears. If the pending supplemental for Panama and Nicaragua is enacted, $0.1 billion in associated outlays would occur in 1991, displacing an equal amount of outlays from existing programs.

Function 250—General Science, Space and Technology

Science and space programs would be cut $1.3 billion in BA and $0.7 billion in outlays from the President's budget in 1991. Funding would still increase over the CBO baseline of $1.4 billion in BA (9 percent) and $0.8 billion in outlays.

To reach the resolution totals, there would likely be cuts across the board on Function 250 programs. Real growth in the National Science Foundation budget would be limited to about 5 percent—a $100 million cut from the 10 percent real growth in the President's budget. The Superconducting Super Collider (SSC) would either be cancelled (saving $0.2 billion in BA) or frozen to allow further R&D.

For NASA programs, this budget would require a sharp cutback in the $0.7 billion increase earmarked for the space station. The budget would also likely force the cancellation of the moon/Mars human exploration initiative (saving $0.2 billion in BA) and a space science start (saving from $0.2 billion in BA).

Function 270—Energy

S. Con. Res. 110 assumes energy programs would be cut by $400 million in BA and outlays in 1991. This represents a 6.3 percent cut in BA and an 8.9 percent cut in outlays from the CBO baseline. While specifics are unavailable, Chairman Sasser has proposed to reduce funding for the clean coal program, the strategic petroleum reserve, and to increase Nuclear Regulatory Commission (NRC) fees in the past. His previous budgets have also included increases for renewable energy research and development.

Function 300—Natural Resources and Environment

S. Con. Res. 110 would reduce BA by $0.6 billion and outlays by $0.4 billion in 1991 compared to the CBO alternative baseline.

Based on past Democratic budget plans, it is expected that this would include a freeze on discretionary spending, reductions in certain western agency programs, and increases in certain fees. In addition, this plan probably includes increases for the Environmental Protection Agency's budget, particularly for the cleanup of abandoned hazardous waste sites and the implementation of the clean air act.

Function 350—Agriculture

S. Con. Res. 110 rejects the President's proposals for agriculture and related programs. Agriculture outlays under the resolution would be $800 million greater than that proposed by the President for 1991, while the plan provides for $8.5 billion in outlays above the President's request for the years 1991 through 1993.

Relative to the CBO baseline, the resolution would reduce agriculture BA and outlays in the next three fiscal years by $1.2 billion, $1.3 billion, and $1.3 billion, respectively. Savings in 1991 under this plan are virtually identical to the savings which would be achieved by a 13.1 percent sequester.

Proposed conciliation savings under S. Con. Res. 110 for both BA and outlays would be $1.2 billion in 1991, and $1.3 billion and $1.3 billion in each of the next two years. Because there is very little variation in the proposed annual reconciliation sav-

ings, one could assume that no fundamental changes to agriculture programs are proposed.

Function 370—Commerce and Housing Credit

For function 370, S. Con. Res. 110 assumes decreases in outlays of $600 million below the CBO alternative baseline for 1991, while it assumes a $100 million increase in BA. This plan assumes increases above the President's budget of $1.4 billion in BA and $700 million in outlays for 1991.

The reduction in outlays may partially be explained by: $112 million cut in the Postal Service's revenue forgone appropriation, $310 million in FHA reforms, $50 million in SBA fee increases, $75 million cut in SBA direct loan programs, and $50 million in Commerce Department fees.

These specific Presidential proposals total $597 million in 1991 which can explain the $600 million in outlay savings assumed in S. Con. Res. 110. This assumes that the budget resolution does not adopt any of the President's budget proposals for rural housing and housing for the elderly and handicapped.

S. Con. Res. 110 assumes the Banking Committee will achieve $554 million in outlay savings and $90 million in revenue through unspecified reconciliation instructions. Savings may be partially explained by $200 million in premium income from increasing the Federal Housing Administration (FHA) mortgage ceiling from $101,000 to $125,000. Another $110 million would be achieved by allowing FHA to offer incentive packages to lenders and prohibit HUD from assuming multi-family mortgages.

S. Con. Res. 110 assumes the Small Business Committee can achieve $50 million in outlay savings from unspecified reconciliation instructions. The President's budget proposes to increase SBA's loan guarantee program fee from 2 to 5 percent to generate $100 million in outlay savings in 1991. One option to explain the $50 million is to increase the same fee to 3 or 4 percent, not 5 percent as proposed in the President's budget.

The $90 million in revenue reconciled to the Banking Committee could be achieved by adopting the President's budget proposal to increase the Securities and Exchange Commissions stock transaction fees.

Function 400—Transportation

For transportation programs, the resolution would add to the President's budget $1.6 billion in BA and $1.2 billion in outlays. This represents an increase above the baseline of $0.6 billion in BA and $0.1 billion in outlays.

Most of the $1.6 billion BA increase is due to the restoration of two programs terminated in the President's budget: $0.6 billion for AMTRAK and $0.5 billion for transit operating assistance to large cities. This resolution could also provide some additional highway and transit capital funds which were assumed to be reduced in the President's budget. Both this resolution and the President's budget provide increases above the baseline for aviation and Coast Guard programs. Commerce-Science-Transportation Committee reconciliation probably assumes $100 million in Coast Guard user fees.

Function 450—Community and Regional Development

For function 450, S. Con. Res. 110 assumes decreases compared to the CBO alternative baseline of $200 million in BA and outlays for 1991. This plan assumes increases above the President's budget of $800 million in BA and $100 in outlays for 1991.

The reduction in outlays may partially be explained by: $43 million increase in premium income from National Flood Insurance; and $115 million in BA and $5 million in outlays savings from freezing Community Development Block Grants at their 1990 level.

Function 500—Education, Training, Employment and Social Services

S. Con. Res. 110 calls for $46.7 billion in BA and $42.3 billion in outlays for 1991 for this function. This is above the CBO baseline by $3.9 billion in BA and $1.1 billion in outlays. It is also above the President's request by $3.8 billion in BA and $1.4 billion in outlays.

This plan would accommodate a majority of the increases recommended by the Majority Members of the Committee on Labor and Human Resources in their 1991 "views and estimates" report submitted to the Senate Budget Committee. The Labor Committee recommends increases of $4.9 billion in BA above the baseline for Function 500 programs within their jurisdiction. For currently authorized programs, the Committee recommends increases of $1.0 billion for Head Start, $500 million for Chapter 1 (Compensatory Education for the Disadvantaged), $200 million for Vocational Education, $500 million for Pell Grants, $118 million for worker readjustment activities, and $100 million for Math-Science Grants. For new initiatives, the Committee recommends increases of $50 million for Youth Opportunities Unlimited, $125 million for national community service, $1.2 billion for Child Care, and $100 million for a teacher initiative.

This plan reconciles the Committee on Labor and Human Resources for $65 million in 1991 outlays and $108 million in revenues. It is assumed that these savings could be achieved by implementing penalties for OSHA, MSHA, ERISA and pension protection reform.

Function 550—Health

Savings from baseline ($0.4 billion in BA and $0.6 billion in outlays) appear to result primarily from increased contributions from the Postal Service and the District of Columbia to Federal Employees Health Benefits. The President proposed $730 million (BA and outlays) in such savings, but lesser amounts are also possible. Some modest savings may also be assumed for FDA user fees. S. Con. Res. 110 includes reserve language for Medicaid (similar to that of previous years) which would allow a change to the finance Committee 302(a) allocation provided the Finance Committee reports Medicaid changes in a budget neutral fashion.

Under the above assumptions, discretionary spending is funded at just about baseline, which would require trimming back on some of the President's initiatives in minority health, AIDS research and education, FDA funding, and/or drug abuse treatment funds, or accepting some of the President's proposed reductions (e.g., nearly eliminating health professions subsidies).

Function 570—Medicare

S. Con. Res. 110 reduces spending growth in Medicare by $2.8 billion in 1991. Estimated savings from a sequester would be $2.0 billion in 1991. S. Con. Res. 110 savings in 1992 and 1993 are $4.7 and $6.4 billion, respectively. This would represent about 55 percent of the President's proposed savings in 1991, and 70 percent of the President's proposed savings by 1993.

About $1 billion in Medicare savings may be achieved by extending current law provisions that expire at the end of 1990. Added savings could be achieved by reducing inflation updates to providers, or otherwise reducing payments to providers.

Function 600—Income Security

S. Con. Res. 110 reduces 1991 outlays an estimated $0.9 billion below the CBO baseline, while it increases 1991 BA an estimated $3.5 billion. Overall, this resolution proposes changes totaling $2.9 billion in outlays and $4.3 billion in BA and $2.9 billion in outlays. It appears to reject the Administration's COLA freeze, child nutrition savings, and LIHEAP reduction. The following would be consistent with this plan: (1) The lump-sum provision is extended producing the bulk of 1991 reduction, (2) additional funding is provided for low-income housing assistance, producing a large increase in BA in 1991 and significant outlay increases in the outyears.

Among the options that could explain the assumed outlay savings is a continuation of the current lump-sum schedule (50/50). Preliminary CBO estimates indicate that this provision would save $0.7 billion in 1991 outlays. Other lump-sum options would produce savings ranging from $580 to $960 million in 1991. Changes in low-income housing assistance is the most likely explanation for the higher BA in 1991 and the higher outlays in the outyears (due to the need for an increase in BA for expiring subsidized housing contracts and the Administration's HOPE legislation).

Function 650—Social Security

S. Con. Res. 110 increases Social Security spending modestly ($0.2 billion above baseline) in 1991. The proposed increase may reflect increased administrative funding and/or modest benefit expansions.

Function 700—Veterans Benefits and Services

S. Con. Res. 110 provides $31.9 billion in BA and $31.3 billion in outlays for 1991 for this function. This is the same as the CBO baseline in BA but below the baseline by $0.2 billion in outlays. This is also above the President's request by $0.1 billion in BA for 1991; there is no difference in outlays. While most discretionary programs within this function would be frozen at the 1990 levels, this plan maintains VA medical care and construction activities at the 1991 baseline levels and increases them by the amounts recommended in the President's budget.

This plan assumes reconciled savings of $0.4 billion in both BA and outlays for the Committee on Veterans' Affairs. These savings could be achieved by limiting compensation payments made to veterans with no dependents (savings of $150 million in BA and $138 million in outlays), allowing the Department of Veterans' Affairs (DVA) to verify income for the purpose of pension benefits (savings of $46 million in BA and $37 million in outlays), authorizing the recovery of cost of medical care from third party insurers for the treatment of nonservice-connected disabilities of insured service-connected-disabled veterans (savings of $88 million in both BA and outlays), and revisions to the current DVA housing "no-bid" formula used to calculate the cost of acquiring foreclosed properties (savings of $111 million in both BA and outlays). All of these proposals were assumed in the President's budget.

Function 750—Administration of Justice

Compared to the President's budget, administration of justice programs would increase by $0.5 billion in both BA and outlays. Compared to the baseline, the resolution would reduce this function by $0.5 billion in BA but increase outlays by $0.4 billion. The $0.5 billion BA reduction is due to an over $1.0 billion reduction in prison construction, reflecting the one-time nature of the 1990 funding level of $1.4 billion.

When the resolution is adjusted to reflect a change from the President's budget in a mandatory customs user fee account, the resolution is below ($0.1 to $0.2 billion) the President's budget in both BA and outlays. These small reductions would likely be spread among law enforcement, litigative, judicial, and correctional activities. Compared to the baseline, these activities would still generally receive increases over baseline levels.

Function 800—General Government

The resolution appears to be based on three assumptions in this function: (1) freeze on all discretionary programs; (2) inclusion of President's GSA budget amendment $1.4 billion in BA and less than $50 million in outlays), which would fund construction of 22 Federal buildings; and (3) a proposal to change the revenue-sharing formula from gross to net receipt basis. The outyear numbers are simply inflated from the 1991 base. Implicit in the resolution is the expectation that approximately 25 new Federal buildings would be constructed every year for the next five years. This proposal rejects the President's IRS initiative, the Legislative Branch increase, and GSE user fees.

Revenues

S. Con. Res. 110 recommends a revenue increase of $14.5 billion in 1991, $14.6 billion in 1992, and $14.7 billion in 1993. Of this amount, the Finance Committee in the Senate and the Ways and Means Committee in the House are instructed to increase revenues by $14.3 billion in 1991, $14.3 billion in 1992, and $14.3 billion in 1993. Small amounts of revenue increases are also reconciled to the Education and Labor and Banking Committees in both the Senate and the House.

In his statement, Senator Sasser justifies the level of revenue increase by saying that it exactly matches the level recommended in the President's budget. In fact, S. Con. Res. 110 recommends $600 million more revenues in 1991, $3.2 billion more revenues in 1992, and $10.6 billion more revenues in 1993.

Senator Sasser recommends raising income taxes to meet some of the revenue goal. He suggests eliminating the "bubble;" that is, creating an explicit 33 percent marginal tax bracket that would apply to all taxable income in and above the current 28 percent marginal tax bracket. This option would increase revenues by $3.8 billion in 1991, $7.6 billion in 1992 and $8.7 billion in 1993.

There is language in the resolution which recognizes the difference between the Administration's and CBO's estimate of the President's recommended revenue increases. CBO's reestimate of the President's revenue options show a net increase of $9.4 billion in 1991, $4.5 billion less than the President estimated. The language expresses that it is the sense of the Congress that the President should propose revenue sources which result in the amount of revenue increases proposed in his budget. If agreed to, this language would suggest that the Congress gives the President a revenue number, then the President fills in the policy options to reach that target, subject to the approval of the Congress. The language further states that once the President does this, the reconciled level of revenues rises proportionately.

CUT THE SOCIAL SECURITY PAYROLL TAX

● Mr. KASTEN. Mr. President, in 1988, then-Representative Jack Kemp and I introduced legislation to repeal the 1990 increase in the Social Security payroll tax. I am pleased that Senator PAT MOYNIHAN has now joined us in recognizing that the payroll tax is an excessive burden on American families—and an impediment to economic growth and job creation.

I have introduced a new proposal S. 2052—the Social Security Integrity and Tax Reduction Act of 1990—which unlike Senator MOYNIHAN's proposal, would phase-in the tax reduction, maintain a healthy cushion in the Social Security reserve, and mitigate the budget impact of this change by altering the Gramm-Rudman deficit targets to ensure against tax increases elsewhere.

Members from both sides of the aisle including Democrats like Senator JIM SASSER, Senator ERNEST HOLLINGS, Representative TIM PENNY, Representative PAT WILLIAMS—and Republicans like Representative HANK BROWN, Representative JOHN PORTER, Senator STEVE SYMMS have introduced separate plans that would provide payroll tax relief for American workers and businesses.

While we may have different approaches, the end result of any payroll tax relief will be the same: More economic growth and more job opportunities. I call to the attention of my colleagues to a recent economic study by Daniel J. Mitchell which examines the many positive economic benefits of reducing the payroll tax.

I ask that Mr. Mitchell's study be printed in the RECORD at this point.

The study follows:

CUT THE SOCIAL SECURITY PAYROLL TAX

(By Daniel J. Mitchell)

Sen. Daniel Patrick Moynihan (D-N.Y.) has dropped a bomb into the fiscal debate with his recent proposal to reduce Social Security payroll taxes. The immediate support he has received from individuals and groups representing all shades of the political spectrum is well deserved testimony to the merit of his idea. Social Security taxes have skyrocketed in recent years. Tax increases signed into law by former presidents Jimmy Carter and Ronald Reagan raised the total combined employee/employer payroll tax rate by more than 30 percent, from 11.70 percent in 1977 to 15.30 percent today. Moynihan's legislation would immediately repeal the 0.28 percent tax rate increase that went into effect January 1, 1990, and reduce it further, to 13.10 percent, on January 1, 1991.

Senators Robert W. Kasten, Jr. (R-Wis.) and Steven D. Symms (R-Idaho) have also introduced separate pieces of legislation that would provide payroll tax relief to working Americans. While the publicity is new, cutting payroll taxes is an idea that has been discussed for several years. Peter Ferrara, one of the Nation's foremost experts on Social Security, urged a payroll tax reduction in "An American Vision", published in January 1989. The Heritage Foundation has also been in favor of lowering the payroll tax for quite some time.

Opponents of lower payroll taxes have branded the idea as irresponsible. They assert that discussing tax cuts while the Government is still running yearly deficits is wrong. Furthermore, they argue that a large tax cut would wreak havoc with the Balanced Budget and Emergency Deficit Reduction Act of 1985 (commonly known as Gramm-Rudman) and undermine the only legislation that has had a positive impact on controlling Federal spending. Critics also attack the idea of returning to a "pay-as-you-go" basis for Social Security. To them, the main reason for the large tax increases contained in the 1983 Social Security Reform Amendments was to build a reserve in the Social Security Trust Fund that could be used to pay benefits when the baby-boom generation retires early next century. They may agree that high payroll taxes are a burden on the economy, but they believe a payroll tax cut would inevitably result in a reduction in Social Security benefits. Others worry that cutting Social Security taxes this year would simply set the stage for economically destructive tax increases next year.

Although some of those concerns are legitimate, the tangible benefits of lower payroll taxes strongly outweigh the potential drawbacks of the proposal.

THE SOCIAL SECURITY TAX BURDEN

Rapidly rising payroll taxes are a burden on the productive sector of our economy. Even more so than the income tax, the payroll tax is a direct tax on jobs. At current levels, the payroll tax drives a 15.30 percent wedge between the cost of an additional worker to a business and the take-home pay the worker receives. For some workers, that means less income to spend on housing, clothing, education, food, and other consumer goods. For others, however, especially those with few skills and limited job experience, it means unemployment. The 15.30 percent wedge may be enough to price them out of the job market.

Unlike income taxes, payroll taxes are levied on the first dollar of income. The government extracts 15.30 percent of every dollar of income up to $51,300. (Since there is a relationship, however loose, between taxes paid and benefits received, there is a cap on both the amount of taxes one must pay and the retirement benefits one can receive.) For a worker making $51,300 or more, the total payroll tax this year will be more than $7,800, theoretically split between employer and employee. Total payroll taxes now exceed income taxes for nearly three-quarters of the workforce.

The division of payroll taxes between the employer and the worker is essentially an accounting gimmick designed to hide the true burden of payroll taxes from the individual taxpayer. The average employee is usually unaware that his employer is paying additional payroll taxes above and beyond the amount he sees deducted from his paycheck. Since the direct cost of an employee to a business includes wages, fringe benefits, and total taxes, a worker will not be hired unless the firm expects that his output will be at least equal to his direct cost. As a result, although half of the payroll tax is directly paid by the business, the full 15.30 percent is a tax on the employee's income (as Congress unofficially acknowledged when legislators raised payroll taxes for self-employed individuals to equal the combined employee/employer total of 15.30 percent).

Social Security Taxes Are Too High

The increasing burden of Social Security taxes is dramatically illustrated by the growth in Social Security tax receipts. As

recently as 1977, total payroll tax receipts for Old-Age, Survivors, Disability, and Hospital Insurance amounted to $106.5 billion. This year payroll tax collections are projected to total $385.4 billion, nearly four times the level of just 13 years ago. Some growth in payroll tax revenue was the natural result of a growing economy; the 20 million new jobs generated by the current economic expansion have swelled the government's coffers.

Much of the increase in payroll tax revenues, however, is the result of deliberate tax increases by the federal government. There are three major ways the government can increase payroll receipts, and all three have been used since the Social Security system was created. The most obvious way to increase revenue is to increase the tax rate. Figure 1 illustrates the dramatic climb in the payroll tax rate since the Social Security system was created in the 1930s.

As Figure 1 indicates, payroll tax rates have increased approximately every other year since 1966, including seven times in the "tax-cutting" 1980s. The current level of 15.30 percent is more than double the level that was in effect less than 25 years ago.

[Figure 1 not reproducible in the RECORD.]

The government increases payroll tax revenue in other ways as well. Increasing the cap on income subject to the tax can raise significant amounts of money. As recently as 1977, payroll taxes were assessed against only the first $16,500 of income. Just 13 years later, however, payroll taxes are levied on the first $51,300 of income, more than three times the 1977 level.

The final method the government uses to increase payroll tax revenue is to tax previously exempt forms of income. A recent increase of that type occurred when the law was changed to make the income of federal judges subject to the payroll tax. The amount of money that can be generated from that type of change in the future is quite limited compared with the amounts that can be raised by increasing tax rates or the maximum level of taxable income. The inclusion of employees of state and local governments as well as employees of nonprofit organizations in the 1980s brought the last significant sources of tax revenue into the government's social insurance net.

Payroll Taxes Have Become a Prominent Source of Tax Revenue

Another way of demonstrating the dramatic rise in payroll taxes is to examine how payroll taxes have increased as a percentage of total government tax receipts. For much of America's history, the bulk of government revenues came from excise taxes and customs duties, mostly because income taxes were not a permanent part of the tax structure until the Sixteenth Amendment was ratified in 1913. Payroll taxes, of course, were trivial or nonexistent until the Social Security system was created in the 1930s.

In the 10-year period between 1945 and 1955, social insurance taxes (primarily Social Security but also other items, the largest of which was unemployment insurance taxes) averaged 9.48 percent of total government receipts. Between 1955 and 1965, that figure rose to 15.44 percent, and between 1965 and 1975, it climbed further to 23.3 percent. Between 1975 and 1985, social insurance taxes climbed to 31.48 percent of tax revenue, and in the last five years, social insurance taxes have risen to an all-time high of 36.53 percent of total tax revenue (see Figure 2).

[Figure 2 not reproducible in the RECORD.]

Recognizing that social insurance taxes have climbed as a percentage of total tax revenue, of course, says little about the solution, if any, to that shift. Some would suggest that payroll taxes are not a significant issue and that the real problem is that corporate and personal income taxes have been allowed to decline as a percentage of total revenue, primarily because of the 1981 Economic Recovery Tax Act. The latter assertion is factually and analytically wrong. Personal income tax collections have stayed fairly constant, while corporate income tax collections have fallen as a percentage of total tax collections, as have excise taxes. That does not suggest, however, that the answer is higher excise and corporate taxes. The real problem is the rise in the overall tax burden, as measured by both actual tax collections and tax collections as a percentage of gross national product.

Total Taxation at Record High

Notwithstanding a public perception that President Reagan cut taxes, total federal tax collections as a percentage of GNP during the 1980s were the highest in U.S. history, averaging 19 percent of GNP. Much of that increase was due to greater payroll taxes, which, as is shown in Figure 3, have climbed steadily since World War II.

[Figure 3 not reproducible in the RECORD.]

Some would argue that the increase in payroll taxes was necessary to fund the rising level of benefits and that any talk of cutting the payroll tax is irresponsible. Although payroll tax revenues are used to fund Social Security and Medicare spending, and Social Security and Medicare spending have been two of the fastest growing parts of the budget, revenues from payroll taxes have grown even faster, which raises the issue of how to dispose of the "surplus." If the revenues flowing into the system were less than, equal to, or only slightly greater than the outlays, there would be an argument against reducing payroll taxes without a commensurate reduction in annual benefit increases.

That is not a relevant issue, however. Annual Social Security tax collections (OASDI) are considerably higher than needed to fund annual outlays. This year alone, the trust fund into which OASDI tax moneys flow will amass about $65 billion more in revenues than will be expended. That $65 billion "surplus" will rise to approximately $100 billion in 1993 and to more than $100 billion for several years thereafter.

LOWER PAYROLL TAXES WOULD SPUR ECONOMIC GROWTH

The Social Security surplus, as it is popularly known, offers a unique opportunity to lower the burden of payroll taxes. A reduction in payroll taxes would inevitably result in a stronger economy and creation of more jobs. Those are the major benefits of the Moynihan proposal or any other legislation to reduce Social Security taxes.

Predicting the exact magnitude of the economic growth associated with lower payroll taxes is difficult since there are many other factors—interest rates, other taxes, the level of regulation, and trade policy, to name but a few—that also affect economic growth. Scholarly studies differ on the burden payroll taxes impose upon the economy, but it is clear that higher taxes, all other things being equal, mean a weaker economy.

According to Aldona and Gary Robbins, both of whom served in the Treasury Department and are among the nations' leading experts on the economic effects of payroll taxes, the combined 1.0 percent increase in the payroll tax rate in 1988 and 1990 will cost workers one-half million jobs, reduce GNP by $320 billion by the year 2000, and reduce the nation's capital stock by $100 billion over the same period.[11]

If a 1.0 percent increase in the payroll tax rate can be expected to cost 500,000 jobs, what would be the economic impact of a payroll tax reduction of the magnitude Moynihan proposes? According to the model developed by the Robbinses, a 2.2 percent reduction in the payroll tax rate would lead to the creation of more than 1 million additional jobs. As employers hired additional workers and expanded their output of goods and services proportionately, the nation's GNP would grow by about $35 billion more than it would otherwise, adding more than one-half of 1 percent of the economy's growth next year.

THE SOCIAL SECURITY SURPLUS DOES NOT MASK THE TRUE SIZE OF THE DEFICIT

The current debate over reducing payroll taxes has its origins in the growing perception that the Social Security surplus is being used to mask the true size of the deficit. Indeed, Senator Moynihan was just one of several senators who introduced legislation in the first session of the 101st Congress to remove Social Security from the budget calculations. Supporters of taking Social Security off-budget argue that the system's annual surpluses are being used to fund spending in what is called the "operating budget." The reason surplus Social Security revenues should not be included in the operating budget, according to proponents of the proposed legislation, is that those revenues are supposed to be saved to pay benefits to future retirees.

Unified Budget Is Proper Way to Measure Deficit

Economists and budget experts generally agree that Social Security revenues and outlays should be included when calculating the budget deficit. In other words, the fact that Social Security revenues exceed Social Security outlays really does mean that the deficit is smaller. The "surplus" is not masking the true size of the deficit. The deficit is the amount of money the government borrows from private credit markets in a given year, period. If the deficit is to be measured accurately, total federal government spending, including Social Security outlays, should be subtracted from total federal government revenue, including Social Security revenues. Table 1 shows major sources of revenue and major spending categories for the current fiscal year.

That approach, traditionally known as the unified budget approach, presents the most accurate picture of the economic impact of the government's fiscal policy. Taking part of the government off-budget, whether it be the savings-and-loan bailout or the Social Security system, simply hides the truth from the American people and creates uncertainty in financial markets.

Social Security Trust Fund Is Not a Cash Reserve

A large number of people believe that taking Social Security off-budget would prevent politicians from spending the surplus on other government programs. Presumably, the money would be saved in the trust fund and be used to pay future retirement benefits. Taking the Social Security system off-budget, however, would not accomplish those goals. Since the Social Security system is required to purchase U.S. government debt from the Treasury if there is an annual surplus, the system does not build up a cash reserve. The trust fund reserve is effectively nothing more than a collection of IOUs.

The large and growing balance in the Social Security Trust Fund has been the source of considerable confusion. Reports that the trust fund will have a maximum balance of $12 trillion in 40 years have led some to believe the fund is a pot of money that can be spent. First of all, that $12 trillion is not "current" dollars. Adjusted for projections of future inflation, the maximum value of the trust fund will be $2.8 trillion in today's dollars, not the $12 trillion commonly cited. Table 2 compares the trust fund's year-end assets in current and constant (inflation-adjusted) dollars under the most commonly used set of economic assumptions.

TABLE 2.—CURRENT AND CONSTANT TRUST FUND ASSETS

[In billions of dollars]

Year	Current dollars	Constant dollars
1989	168.3	168.8
1990	237.3	227.2
1991	314.2	287.9
1992	400.7	351.8
1993	498.4	420.0
1994	609.4	493.5
1995	733.6	571.5
1996	872.3	653.4
1997	1,025.4	738.6
1998	1,194.3	827.1
2000	1,581.8	1,012.9
2005	2,892.5	1,522.3
2010	4,815.6	2,083.1
2015	7,196.1	2,558.5
2020	9,575.6	2,798.3
2025	11,355.6	2,727.5
2030	11,929.8	2,355.2
2035	10,832.4	1,757.7
2040	7,641.8	1,019.2
2045	1,446.1	158.5
2046	(1)	(1)

[1] The trust fund will be exhausted in 2046.

The fact that $12 trillion shrinks to $2.8 trillion in constant dollars is not the biggest reason for concern. Even more important, the $2.8 trillion is not money in the bank. The trust fund's assets will be U.S. government bonds, or debt, issued by the Treasury Department. In order to spend any of that money, the trust fund will have to cash the bonds. The relevant question, of course, is where will the Treasury get the money to redeem the bonds? The money will have to come from either that year's tax revenue or additional government borrowing.

Legislators could also reduce the amount of bonds the trust fund needs to cash in future years by reducing retirement benefits. Regardless of which option future policymakers choose, future years' benefits will be paid for by revenues raised in future years. The Social Security taxes paid today will not prevent that from happening. The Social Security Trust Funds are nothing more than a statement of the legal authority Social Security has to draw funds from general revenues.

Allowing the Trust Funds to Invest in the Private Sector Is Not the Answer

Since requiring that the trust fund invest in government bonds does not provide real savings for the baby boom's retirement, some have proposed that the answer is to allow the trust fund to invest in the productive sector of the economy. They are partially right. If some, or all, of the money that is currently going into the Social Security system were instead invested privately, the increase in the nation's capital stock would create additional wealth and generate a flow of income that could provide for the retirement needs of the population. This is the principle by which people are able to invest for their own retirement, a by-product of which would be future economic growth.

It is highly unlikely, however, that the present trust fund could achieve that goal. To secure an adequate rate of return, the trust fund would need the freedom to make investments on the basis of expected profit. A system under the control of politicians, such as the Social Security Trust Fund, is unlikely to have that freedom. Proposals have already surfaced that would require the trust fund to invest in roads, education, infrastructure, environmental cleanup, bank bailouts, and other politically favored undertakings.

Those causes may or may not require additional financial resources. Whatever their merit, however, they are not investments that would yield a profitable rate of return to the trust fund. There would also be a danger that politicians would force the trust fund to invest in certain politically favored industries, creating a back door industrial policy under which political power, rather than market forces, determined what investments were made. Because of the sheer magnitude of the Social Security surpluses, the trust fund would eventually wind up owning a large portion of the private sector.

Proposals that would solve the problem of political control over private investment by giving individuals varying degrees of control over their retirement funds have also been made. Those proposals will be addressed later.

Proper Measures of Social Security and the Budget Deficit

Not everyone has greeted Senator Moynihan's tax cut proposal with enthusiasm. An important concern in the minds of many is the legislation's effect on the deficit. Although the bill would save taxpayers $7 billion this calendar year and an additional $55 billion next year, in the absence of other changes, the savings to taxpayers would be matched by higher deficits.[2]

Moynihan's legislation does not address the deficit issue. Since it is not expected that a payroll tax cut would be matched by increases in other taxes (though that may be what the senator has in mind), reducing payroll taxes would mean higher deficits in the short run. That has led some budget analysts to oppose lower payroll taxes. They argue that progress has been made on the deficit and that we should concentrate on balancing the budget before considering new tax cuts. A tax cut, they believe, would send the wrong signal to financial markets and result in higher interest rates.

Although a temporarily higher deficit would almost certainly put some upward pressure on interest rates, that increase is not likely to be significant. Economic theory supports the assertion that a higher deficit will cause interest rates to be higher than they would otherwise be, but scholarly studies have not found any evidence of a significant correlation between lower deficits and lower interest rates. A comparison of interest rates and the deficit in the 1980s (Table 3) indicates that there is not a strong relationship between interest rates and the deficit.

TABLE 3.—INTEREST RATES AND THE DEFICIT

Year	Prime rate	Change	Deficit as percent of GNP	Change
1981	18.87		2.6	
1982	14.86	Down	4.1	Up.
1983	10.79	Down	6.3	Up.
1984	12.04	Up	5.0	Down.
1985	9.93	Down	5.4	Up.
1986	8.33	Down	5.3	Down.
1987	8.22	Down	3.4	Down.
1988	9.32	Up	3.2	Down.
1989	10.50	Up	2.9	Down.

Source: "Budget of the United States, FY 1991," historical tables; Joint Economic Committee, "Economic Indicators," January 1990.

As the numbers clearly indicate, interest rates and the deficit do not always move in the same direction. Indeed, they moved in opposite directions in six of the past eight years. That trend is mainly due to the fact that interest rates are primarily influenced by short-run monetary policy. Increasing deficits probably resulted in interest rates being higher than they otherwise would have been, but the effect of the deficit is overwhelmed by other factors.

A $55 Billion Tax Cut Would Not Necessarily Undermine Deficit Reduction

Even if they agree that interest rates are influenced by other economic variables in addition to the deficit, critics of Senator Moynihan's legislation contend that the loss of $55 billion of revenue in 1991 would be enough to force interest rates higher. They are probably right. The question is whether the economic benefits of lower taxes would be sufficient to more than balance the economic costs of temporarily higher interest rates.

[2] The commonly cited savings to taxpayers of $7 billion for 1990 and $55 billion for 1991 refer to calendar year savings. Since fiscal years begin on October 1 of the previous calendar year and end September 30, the taxpayer savings will be different. Translated into fiscal years, the government would collect about $5 billion less revenue in 1990 and $42 billion less revenue in 1991 under the Moynihan proposal.

One way of estimating the impact of a $55 billion tax cut on interest rates is to assess what a tax cut of that size would do to the deficit. That assessment, however, requires that the calendar year revenue loss estimates ($7 billion and $55 billion for 1990 and 1991, respectively) be replaced with fiscal year estimates. As noted earlier, the fiscal year revenue loss from Senator Moynihan's legislation would be $5 billion in 1990 and $42 billion in 1991, according to the Congressional Budget Office. Assuming that the revenue projections are accurate, a $42 billion tax cut would mean that the deficit would be that much higher than it would have otherwise been, assuming no dynamic effects.

The Gramm-Rudman target for 1991 is $64 billion. Since the conventional wisdom suggests that Congress will not be able to produce a budget that meets that target (unless the President permits sequestration, Gramm-Rudman's automatic budget control mechanism), it may not be realistic to simply add $42 billion and $64 billion to arrive at an estimate for the 1991 budget if Moynihan's rate reduction passes. Under a more pessimistic scenario, assume that the actual deficit will be over $100 billion and that a payroll tax cut would raise the deficit to approximately $150 billion. What would that mean for interest rates?

Because GNP in 1991 is expected to be about $6 trillion, interest rates will probably not be greatly affected. A $150 billion deficit will only be about 2.5 percent of GNP that year, which will probably mean a slight increase compared with the deficit as a percentage of GNP in 1990, which is estimated at 2.3 percent. However, the deficit will be smaller, relative to the economy's size, than it was every year during the 1980s (Table 3).

Dynamic Effects of Tax Cut Would Generate Some Offsetting Revenues

Finally, the economic models used to estimate revenue gains and losses from changes in the tax code are unable to capture dynamic changes. Thus, while Senator Moynihan's legislation would "lose" $42 billion under a static model that does not incorporate changes in incentives, the actual revenue loss is likely to be considerably less because of the supply-side effect.

As discussed above, reputable estimates indicate that a 2.2 percent reduction in the payroll tax rate would result in an additional 1 million jobs and a six-tenths of 1 percent increase in GNP. Since federal tax revenues are projected to total 19.5 percent of GNP in 1991, a significant increase in total GNP (representing an additional $35 billion of output) would result in about $7 billion of additional tax revenue. As a result, the total revenue loss to the government would probably be closer to $35 billion than $42 billion.

GRAMM-RUDMAN SHOULD BE PRESERVED

Though the law has its critics, the Gramm-Rudman Deficit Reduction Act has been a success. The deficit was $230 billion when Gramm-Rudman was enacted in 1985; just five years later it is only about half that level. In the five years before passage of the law, federal spending was increasing by an average of 9.9 percent annually. In the five years since Gramm-Rudman was enacted, annual spending growth has fallen to an average of about 4.5 percent. Government spending as a percentage of GNP, which rose in four of the five years before passage of the Gramm-Rudman Act, has fallen every year since its passage.

Some would argue that government spending slowed down for reasons other than Gramm-Rudman. Others believe Gramm-Rudman is responsible for the slowdown in federal spending growth and oppose the law because they favor more government. Even the law's most ardent supporters admit Gramm-Rudman is imperfect, but until something better comes along, it should remain part of the budget process.

A significant tax cut would almost certainly necessitate some alteration of the law's deficit targets. Fortunately, that should not be a difficult exercise. Simply stated, federal revenues are now increasing by more than $80 billion annually. Gramm-Rudman requires that about half of that revenue be applied to deficit reduction with the rest going to increased spending, primarily for entitlements. Even after a significant tax cut, the basic structure of Gramm-Rudman can be preserved by modifying and extending the deficit targets.

That approach is unlikely to satisfy those who believe in eliminating the deficit as quickly as possible regardless of the alternatives. Many supporters of a payroll tax cut, however, believe that it would be acceptable if the new deficit targets required a balanced budget sometime between 1995 and 2000, depending on how much deficit reduction was required each year. Indeed, many in Congress have proposed moving Social Security off-budget, which would increase the reported deficit even more than the Moynihan payroll tax cut. They would then extend the Gramm-Rudman targets, requiring a balanced budget in the late 1990s. Congress could just as easily adopt the payroll tax cut and adjust the targets in a similar fashion.

The important goal is the preservation of Gramm-Rudman. Many of the economic benefits associated with lower payroll taxes will not be realized if politicians are permitted to simply substitute deficit spending for spending that has been financed by taxes. To maximize the economy's long-term performance, policymakers need to minimize the amount of resources the government extracts from the productive sector of the economy, whether through taxes or borrowing.

COMPARING ECONOMIC BENEFITS OF UNIFIED BUDGET SURPLUS AND TAX CUTS IS NOT REALISTIC

Many opponents of lower payroll taxes not only wish to preserve the current target of balancing the budget in 1993, they would also like to mandate budget surplus targets beginning in 1994. The most commonly cited method for accomplishing that goal is to take Social Security off-budget and require that the deficit in the remaining portion of the budget be eliminated. The actual effect of such legislation would be a growing unified budget surplus.

Supporters of that approach argue that a unified budget surplus would increase the amount of savings available for private-sector investment, which would lead to an increase in future economic growth. The additional wealth and income that would result from more investment in the productive sector of the economy would then make it possible to meet the retirement needs of future generations without having to resort to excessive levels of taxation. That approach, they argue, not payroll tax cuts, is the key to a stronger economy.

How a budget surplus is to be achieved is an important but unanswered question. If it is accomplished by restraining the growth of federal spending, the economy will be in stronger shape than it is today. On the other hand, if a surplus is achieved by increasing the tax burden, there is little chance that the economy will benefit. Regardless of how a surplus is achieved, however, the question remains whether it would be better to reduce taxes and run a balanced budget. If there were some way to guarantee that Congress would enact budgets with real surpluses (and without higher taxes), an approach presently favored by the Bush administration, the economic benefits would be significant. Whether or not the benefits of a budget surplus are greater or less than the benefits that would follow a tax cut is a matter over which reasonable people can disagree. In both cases, as long as the president maintains his no-tax-increase pledge and Gramm-Rudman continues to exist, government spending as a percentage of GNP should decline.

Comparing the economic benefits of tax cuts and budget surpluses, however, is a theoretical exercise with little practical value. Simply stated, given the various demands of special interest groups, Congress is unlikely to have the fiscal discipline needed to maintain continuous and growing budget surpluses. Even today, years before a budget surplus might exist, politicians regularly call for additional spending on programs they believe were "neglected" during the 1980s. Those incentives are unlikely to change in the near future. At no time in the last 60 years has Congress demonstrated a consistent capacity to use tax revenue to reduce the national debt.

As a result, it seems more prudent for Congress to enact a tax cut, balance the budget as required by the newly modified Gramm-Rudman deficit targets, and then examine how realistic it would be to run budget surpluses. If Congress is genuinely willing to exercise the restraint needed to achieve a surplus, a delay of a few years will not matter. However, if it turns out that Congress is not capable of running a budget surplus, taking the tax cut first will preclude politicians from spending the money.

WOULD PAYROLL TAX RELIEF UNDERMINE THE SOCIAL SECURITY SYSTEM?

Some representatives of the Bush administration have charged that a reduction in payroll taxes would threaten future retirement benefits. The basis for that claim is that a payroll tax cut would limit the build-up of reserves in the trust fund. Since those reserves will theoretically be the source of revenue from which future retirement benefits are paid, any reduction in the trust fund could mean the Social Security system will run out of money.

As explained previously, however, the so-called trust fund is not a cash reserve. The assets in the fund are gfveiedent boeds. The only way those bonds can be used tf y benefits is by cashing them at the Treasury Department. Since the Treasury can only redeem the bonds by raising cash from some other source, the money to pay for future years' retirement benefits will have to come from taxpayers in those years. That is true regardless of the balance in the trust fund. The payroll tax cut in no way diminishes the government's ability to pay retirement benefits.

Indeed, a strong case can be made that the payroll tax cut might actually make it easier to pay future retirement benefits. We know that future benefit payments will be borne by future taxpayers. If the economy is strong, funding retirement benefits will not be as heavy a burden for future taxpayers as it will be if the economy is sluggish. Therefore, it is increasingly important that

legislators adopt policies that will enhance and maximize long-term economic growth in order to strengthen the Social Security system.

PAYROLL TAX REDUCTION: OPPORTUNITY FOR REFORM?

The evidence strongly supports a reduction in the payroll tax. Several Social Security experts, however, have raised the question of whether it would be best to combine a cut in the payroll tax rate with Social Security reform proposals that would increase the retirement security of America's workers. Those proposals, such as the one by Rep. John Porter (R-Ill.), generally would institute some form of alternative private savings plan whereby each individual taxpayer would be able to put his portion of the Social Security surplus into a nongovernmental retirement account. Individuals who chose that option would forgo a portion of future Social Security retirement benefits, but the interest income they would earn from their private savings accounts would more than offset the loss.

The advantage of such an approach is that individuals would be able to develop alternative sources of retirement income. The burden on taxpayers in general would be lowered, especially after the baby boom retired. Moreover, compared with the results of the present formula for determining how much is received in Social Security retirement benefits, money put into private retirement accounts would earn a much higher rate of return for today's young workers. Not only would individuals be better off with the private retirement account option, the economy as a whole would benefit. Although some people assert that Social Security is a retirement savings plan, money paid into Social Security is not saved. It is instead spent on other government programs. Private retirement accounts, however, would unambiguously increase the pool of private savings in the economy.

Given the political volatility of the Social Security issue, policymakers will undoubtedly wish to examine their options carefully before proceeding. To the extent that their decisions are based on what is best for the economy and the retirement security of America's workers, legislators should consider some of the carefully researched alternative private savings proposals that have been developed. However, payroll taxes could be cut now and a private alternative to part of Social Security could be phased in at some point in the future.[3] That would probably be the most attractive option politically.

CONCLUSION

Senator Moynihan has performed a valuable service by focusing attention on the excessively high level of Social Security payroll taxes. Reducing the payroll tax burden would provide the economy a shot in the arm, and if combined with an adjustment of the Gramm-Rudman deficit targets, could be done without sacrificing long-term deficit reduction.

Despite the scare tactics that have been employed in opposition to Senator Moynihan's legislation, a Social Security tax cut would threaten future retirement benefits. Returning to an explicit pay-as-you-go system (as opposed to the pay-as-you-go system we have now) would prevent the government from taxing the economy twice to pay for future benefits.

Finally, a payroll tax reduction gives policymakers a rare opportunity to explore the possibilities for reforming the Social Security system and creating alternative and more financially secure sources of retirement income for workers.●

UNITED STATES SHOULD NOT SUBSIDIZE MR. GORBACHEV

● Mr. KASTEN. Mr. President, an excellent article by George Melloan in today's Wall Street Journal entitled "Who Will Pay the Bill for Russia's Decline?" puts into perspective the debate over whether or not the West should provide loans and credits to the Soviet Union at this time.

Our Western European Allies have called for the creation of a new multilateral development bank for the emerging democracies of Eastern Europe which would also provide loans to the Soviets.

At a time when the Soviets can come up with plenty of money to finance the intimidation of Lithuania, it is simply unconscionable that Western credits should be shoring up the Soviet economy. If economic reconstruction is that important to Mr. Gorbachev, he can pay for it by reducing the 15 to 20 percent of Soviet GNP that still goes to his military.

Mr. President, America should support moves toward democracy and capitalism all over the world—even in the Soviet Union. But I think most Americans would agree that the Soviets must put an end to their destabilizing activities at home and abroad before we send them any taxpayer dollars.

And even then, I think we ought to make sure that it is money well spent on efforts that promote the private sector and free markets in the Soviet Union.

I ask that Mr. Melloan's article be printed in the RECORD at this point.

The article follows:

[From the Wall Street Journal, Apr. 2, 1990]

WHO WILL PAY THE BILL FOR RUSSIA'S DECLINE?

(By George Melloan)

Russia's money needs are becoming more desperate, and therein lies a tricky problem for the West. So long as the Soviets need—and are able to get—Western financing, they are more apt to show forbearance in dealing with sensitive political problems, such as Lithuanian secession. They will be reluctant to endanger their ties with the West. But if their Western financing dries up, their behavior becomes more problematic.

On the other hand, if the West continues to finance the Soviet economy, its needs could become a serious drain on world capital markets. Pouring money into non-productive enterprises is bad banking, and the Soviet command economy is sinking ever lower from an already low level of production.

If the Soviets are unable to pay their debts to Western banks they will add to an already sizable pile of troubled debt—that run up by less developed countries and the U.S. savings and loan industry, for example. Bad debt is economic waste, and thus a drag on the world economy. Such waste feeds inflation and inhibits economic growth. Use of tax money by Western governments to finance the Soviets also makes little sense. By raising tax burdens, that too would slow productive growth.

In short, the Soviets, always a military threat, now are becoming an economic threat as well. A nation stretching around nearly half of the northern part of the globe is sinking into an economic abyss. Its 280 million people are not producing enough to provide themselves with adequate necessities, let alone contribute anything to the world's supply of capital and wealth. Rising discontent further diminishes productivity.

Soviet Deputy Prime Minister Leonid Albalkin said last week that there is no sign of an easing of the decline in energy and industrial output caused by strikes and political turmoil. In the first two months of this year, oil production was off 4% from a year earlier and coal production off 6%. Earlier it had been reported that man-days lost to strikes and conflicts rose to 9.1 in the first two months from 7.3 a year before. It is not entirely clear what that statistic means but it seems to indicate that the U.S.S.R. lost some 20% to 25% of its labor capacity, obviously a serious matter.

The Soviets have had a continuing debate over whether they should borrow more in the West to finance purchases of consumer goods. As Keith Bush of Radio Liberty wrote on these pages recently, Prime Minister Nikolai Ryzhkov last year appeared to exaggerate the size of the Soviet external debt, perhaps to discourage further borrowing to fill store shelves. But he now appears to have lost the debate.

Nikolai Petrakov, Mikhail Gorbachev's chief economic advisor and the lead designer of yet another planned economic reform, dropped a hint about foreign borrowing in a recent interview with Interfax, a semi-official Soviet news agency. He stressed how important it will be for President Gorbachev and his new cabinet to "retain the confidence of the population" as the new reform inflicts economic pain. He was presumably referring to layoffs and maybe higher prices.

"It would be good, of course, if to achieve this we could make use of foreign credits offered to us on easy terms," said Mr. Petrakov, adding that the Soviet Union "ought to enter all the international economic organizations." In other words, the Soviets would like to get into any organization that has money to lend.

That hint is being confirmed by other reliable sources in Western Europe. They say the Soviets are gearing up for a borrowing offensive. The question will be whether to finance or not finance their consumption needs.

At least one Westerner of some note may already have made up his mind on that question. U.S. Treasury Under Secretary David Mulford told a Senate hearing a few days ago that the U.S. would not join the proposed European Bank for Reconstruction and Development (EBRD) if the Soviets are given full borrowing access. Western private banks also are taking a more jaundiced view of Soviet credits, mainly because of mounting Soviet debt payment arrears,

which are said to be approaching $1 billion. A 500 Deutsche mark ($300 million) Soviet bond issue met with a cool reception on the London market in January. Keith Bush quoted a West German banker as saying that the Soviet credit rating had deteriorated more in a few weeks than it had in the previous 20 years.

The Soviets insist that their credit problem is simply caused by too many Soviet enterprises and banks having been turned loose to borrow in the West. Many did so without adequate means to service their debts. The cure, according to this argument, is a recentralization of Soviet borrowing. But that doesn't sound much like economic reform. Central management is the primary source of Soviet problems.

Mr. Mulford obviously has a good point. If the EBRD is to be set up primarily to finance redevelopment of the newly liberated countries of Eastern Europe, why on earth should it finance Soviet consumption? Development financing presumes that there will be a return on the investment. But the connection between putting goods on Soviet shelves and achieving economic reform in that country is a tenuous one at best.

Some use humanitarian arguments for feeding the Soviets. Undernourishment clearly has become serious at the lowest income levels of Soviet society. It worsens as shortages and inflation grow. At the first meeting of his new cabinet, President Gorbachev stressed that the food situation was the biggest problem facing his government.

But why should the West shed tears for a regime that still is spending huge amounts of money to build weapons and to run a world-wide empire? Merely cutting off Fidel Castro from the Soviet dole or closing down the huge Soviet base at Cam Ranh Bay, Vietnam, or scrapping one of the aircraft carriers under construction, could feed a lot of Russians.

Soviet militarism is part of the equation. If the Soviets no longer have anything to lose in the way of Western financing, will they become more aggressive toward the West? That argument suggests, however, that the West should simply bribe the Soviets to become good guys, a doubtful enterprise even if it had a chance of succeeding. What in fact will probably happen is that markets will make the decision. As the Soviets begin to look more like bad risks, they will get less financing. From that, maybe their badly underdeveloped knowledge of how markets work will be improved.●

OLDER AMERICANS' FREEDOM TO WORK ACT

● Mr. D'AMATO. Mr. President, I rise today to lend my full support to S. 2159, the Older Americans' Freedom to Work Act. This bill will repeal once and for all the Social Security retirement earnings limit that so unfairly penalizes working Americans between the ages of 65 and 70.

Effective January 1, 1990, the earnings limit denies our older workers $1 in Social Security benefits for every $3 they earn over $9,360 per year. This benefit reduction is a 33-percent effective tax, plain and simple, that when combined with Federal, State, and Social Security taxes, makes senior citizens the most heavily taxed group in our population.

Not only is this blatantly discriminatory against senior citizens; it also threatens our economy by discouraging vast numbers of senior citizens from remaining in the work force. At a time when our Nation faces a growing labor shortage, we cannot afford to let such an enormous pool of experienced and productive citizens simply fall by the wayside. We should be encouraging our seniors, not penalizing them.

This body has already taken some tentative first steps toward the elimination of the earnings limit. Just last year, by a vote of 86 to 11, we agreed to an amendment to the minimum wage bill that would have begun to phase out the limit. Unfortunately, this provision was dropped from the final version of the minimum wage bill.

I think our Nation's senior citizens have waited more than long enough for Congress to address the unfairness inherent in the earnings limit. Seniors expect, and deserve, more from Congress than just a tentative commitment to gradually phase out the limit. The time has come for us to do away with the earnings limit completely.

This bill would do just that. Under S. 2159, the earnings limit would be eliminated altogether for seniors aged 65 and older effective January 1, 1991. I commend my colleague from Minnesota for his leadership in introducing this important legislation, and I urge my colleagues to join me in working to ensure its prompt passage.●

WE CAN'T AFFORD NOT TO HELP EAST EUROPE

● Mr. SIMON. Mr. President, our colleague, Senator BILL BRADLEY, who is one of the more thoughtful members of this body, recently had an op-ed piece in the Washington Post title "We Can't Afford Not To Help East Europe."

Sometimes we get things out of perspective, and Senator BRADLEY's article puts them in perspective and does it in a very practical way.

It is sound advice, at a time when we have an opportunity to really make gains for the cause of democracy and freedom.

I urge my colleagues and staff members who have not seen the original article to read it.

I ask to insert it in the RECORD at this point.

The article follows:

[From the Washington Post, Mar. 28, 1990]

WE CAN'T AFFORD NOT TO HELP EAST EUROPE

(By Bill Bradley)

The Bush administration's unfair attack on House Majority Leader Dick Gephardt's speech at the Center for National Policy was a blatant attempt to cover up a major inadequacy of the president's policy toward Eastern Europe. The $380 million the president proposed to bolster economic growth and democracy in the region is barely enough to bail out a single major failed S&L, much less jumpstart national economies that have been dead for decades. Congress should seize the initiative and set aside an amount of up to one percent of the defense budget as a catalyst for East European reconstruction.

For almost half a century, the Soviet threat rested on troops stationed in the client regimes Stalin set up in Central Europe. Our security efforts focused on deterring Soviet assaults on Western Europe. Last year that defense cost about $125 billion.

Now new democratic governments have begun to insist that Soviet forces go home. The political and economic success of these East European democracies would significantly enhance our own security. Instead of a band of hostile armies, we could face a line of healthy, prosperous economic anchored in the West.

Although Eastern Europe's movement toward reform seems irreversible, success is unfortunately far from guaranteed. Even those countries, that have made the most progress—Poland, Hungary, Czechoslovakia—face enormous problems because of the legacy of Stalinist controls imposed on them by the Soviet Union. Yet each has already faced to the fact that success means submitting to the rigors of international competition and shedding rigid price controls. This is a revoluntionary change.

The potential investment needs of Eastern Europe are enormous. According to a leading Western bank, Eastern Germany could absorb $500 billion in the next 10 years, and Poland's needs are even greater. With such massive needs, the question is how best to get momentum quickly into the process of development.

After World War II, the genius of the Marshall Plan lay in its premises: self-help, free trade and European economic integration. The United States provided some material resources and an open market, while Europe provided domestic political leadership and private initiative. For the most part, the salvation of Eastern Europe likewise has to come from within. The member states understand that, which is why they have already embarked on radical economic and political reform. But they need our help to sustain their revolution.

This doesn't only mean more money. Training and know-how are also important. There's an enormous requirement for private sector initiatives in filling in these gaps, and efforts are already under way, especially by West Europeans. But the U.S. government can also make a major contribution, as Sen. Joe Biden's effort in the Foreign Relations Committee recognizes.

Aside from supporting East European economic stabilization programs, our government should provide firm assurances that our markets will be open to the goods and services these countries produce. Unless people believe this, they simply won't invest anywhere near the sums required for real prosperity. This means granting Most Favored Nation status and extending membership in international economic and financial institutions as soon as these countries are ready.

We must also facilitate access to up-to-date technology and equipment. The U.S. government should take the lead in revamping strategic-trade controls so that East European nations can buy the robots, computers and other items they will need in a modern economy. This can be done without touching sensitive military issues.

In addition, the U.S. government should provide technical assistance to build the institutions critical to the pluralistic market-based economies: tax, banking and accounting systems, a judicial system to enforce contracts and protect private property, an educational system to instill new attitudes and skills that are indispensable in a democratic entrepreneurial society, viable political parties and an independent press. The U.S. government can mobilize Americans—especially those with East European roots and language skills—to help.

Our government can advise on converting military resources to meet pressing needs such as roads, telecommunications and pollution controls. We should also cooperate with Western Europe and Japan in providing seed capital to modernize production systems and promote competitive small businesses.

In Poland, we must take the lead in marshaling support for the new government's urgent request for a comprehensive reduction of its huge foreign debt and debt service. This debt—some $40 billion, mostly owed to West Germany—is one of the world's highest and least payable debt burdens. It clouds prospects for desperately needed investment by Poles and foreigners alike. Without a solution, Poland has little choice but to abandon hope of achieving the prosperity its people's sacrifice and courage have surely earned.

Ironically, Germany is the example of why debt relief is a strategic opportunity. At the end of World War I, the victors turned their backs on the need to lower the burden of Germany's debt and reparations—with disastrous results. After World War II, the allied powers avoided a repeat of their earlier mistake and granted Germany deep debt relief in the 1953 London Agreement on German Debt. Such enlightened self-interest should guide us in dealing with Poland in the 1990s.

These initiatives are not costly. We could do them all for less than one percent of the defense budget. But unless we contribute these resources, we will be missing the opportunity to collect a security dividend—both military and economic—of our own.

At the same time, we should recognize that the Soviet Union is in a different circumstance. We should stand ready to respond forthrightly to the transition from a centrally planned to a market-based economy. But as leading Soviet reformers themselves recognize, reconstruction aid and guaranteed investment would be a mistake, at least for now. Mikhail Gorbachev's impressive strides in liberalizing Soviet society have yet to extend to the economic front. A nation that has an economy larger than Japan's, that is burdened with a 60-year history of collectivism, that unlike Eastern Europe has yet to bite the bullet of price decontrol and other crucial reforms, that still spends huge sums on military forces it does not need and cannot get food from field to shelf without much of it rotting: such a country simply cannot use foreign aid efficiently enough now to justify asking American taxpayers to foot the bill for it. I'd rather spend that money at home.

Finally, we should remember that if Eastern Europe succeeds, the patterns of economic and political relations and the perceptions of mutual interest that evolve during the transition will endure long into the future. That's the lesson of the Marshall Plan. If we give help, we can forge lasting bonds based on common democratic values, cultural ties and economic interests. If we fail to provide sufficient support, we cannot realistically expect that Western Europe, Japan and the other nations we leave to pay the costs will look after our interests.

Nor should we be surprised if the future of Eastern Europe has a major impact on Western Europe's economic evolution. Americans are unlikely to be pleased with the outcome unless our contribution is commensurate with our interests. And our contribution will not be big enough unless our ambition for our values is bold enough. This is the time to seize the initiative for democracy. If President Bush fails to do so, Democrats in the Congress have an obligation to try, now.●

THE VIRGINIA AGRIBUSINESS COUNCIL BREAKFAST

● Mr. WARNER. Mr. President, I rise today to recognize the members of the Virginia congressional delegation and of the Virginia Agribusiness Council who participated in this morning's congressional breakfast sponsored by the council.

The Virginia Agribusiness Council, like so many valuable and respected agricultural organizations in the Commonwealth, hold an annual breakfast here in the Nation's Capital for members of the Virginia congressional delegation. I make a point of being there each year. It is at events such as this one that Members of Congress have an opportunity to sit down with their constituents and hear directly from them.

This morning Senator ROBB and I, together with Representatives BATEMAN, OLIN, PAYNE, PICKETT, SISISKY, and SLAUGHTER met with council members to discuss several issues that will likely be addressed in the current session of Congress, particularly during consideration of the 1990 farm bill.

The Virginia Agribusiness Council represents the interests of most sectors of Virginia's diverse agricultural industry including over 90,000 farmers, foresters, suppliers, processors, and marketers. They take great pride in their ability to develop a consensus among their diverse membership for a reasonable, pragmatic approach to the problems and opportunities that face the Commonwealth's largest industry: agriculture.

This reasonable and pragmatic approach was aptly demonstrated in the remarks made this morning by Mr. Frank H. Johns, Jr., before the council and the Virginia delegation. Mr. President, I now ask unanimous consent that the keynote speech delivered by Mr. Johns be included in the RECORD in its entirety at the conclusion of my remarks.

Mr. President, I will conclude my remarks by stating that I hope as Congress continues with its work on the 1990 farm bill that the views expressed by the Virginia Agribusiness Council be given full consideration and hopefully be reflected in the bill's final passage.

SPEECH BEFORE THE VIRGINIA AGRIBUSINESS COUNCIL

(By Frank H. Johns, Jr.)

Good morning ladies and gentlemen. We are again pleased to have the opportunity to visit with you, the fine Congressional Delegation from the fine Commonwealth of Virginia. We come to share with you today the views of the Virginia Agribusiness Council on several issues that may be addressed in the current session of Congress.

The Virginia Agribusiness Council encompasses all sectors of Virginia's diverse agricultural industry, representing over 90,000 farmers, foresters, suppliers, processors, and marketers. The Council takes a great deal of pride in the ability to develop a consensus among our membership for a reasonable, pragmatic approach to the problems and opportunities that face the Commonwealth's largest industry: agriculture.

As has been the case for the past several years, our major concern is the budget crisis. Deficit spending and its effects on interest rates, inflation, and the value of the dollar has had tremendous impact on agriculture in the last decade. Please, let's enter the decade of the nineties with the resolve to truly address this problem with a real dollar and cents approach—not just "smoke and mirrors." We encourage you to approach this problem by reducing Federal spending and not increasing or introducing new taxes.

We in agriculture feel we have shown the way to the solution of the budget deficit problem. Federal expenditures on farm programs have been reduced almost 50 percent in 3 years. We are extremely proud of our contributions. While we realize it would be difficult or impossible to reduce all Federal spending by this huge amount, we feel that all of the budget must be carefully scrutinized for possible cuts. No respect to Federal spending should be exempt from reductions. The total solution must include all segments of the economy.

As you know, several pieces of legislation have been introduced that may become a part of the "1990 farm bill." The Virginia Agribusiness Council generally supports the philosophy and direction of the 1985 farm bill, and urges that those principals be continued in the new legislation.

There are a few farm bill issues we would like to address more specifically.

We favor the peanut program as we now know it and ask you to support legislation proposed by Congressman ROSE on the issue.

We ask you to support Senator LEAHY's legislation to expand the lending authority of the Farm Credit System in the area of rural development. This change would allow Farm Credit to use its resources in a more realistic fashion to address the credit needs of agriculture producers and rural areas.

We request that you support amendments to the "Proprietary Seed Act" to prevent bootlegging of second generation seed on protected varieties.

Efforts to have a positive impact on the environment are also a part of this session's farm legislation. To that end we urge you to support the "America the Beautiful" tree planting initiative proposed by the administration.

In the world trade arena, the Council recognizes the critical importance of exports to American agriculture. In Virginia, two out of every five acres of the Commonwealth's

major crops go to exports. Exports of value-added agricultural and forestry products is also of critical importance to Virginia. As GATT negotiations continue, it becomes clear that programs such as the Export Enhancement Program [EEP] and the Targeted Export Assistance Program [TEA] are crucial to our efforts in the Commonwealth. We hope you will see fit to support increased emphasis on programs of this nature.

Restoration of a lower tax rate on capitol gains is an important issue to the members of the Virginia Agribusiness Council. This restoration would provide the needed incentive for the everyday small businessman—such as the foresters, farmers and agribusiness men and women in this room—to provide risk capital—risk capital that is needed to insure the steady flow of goods and services that is so vital to our U.S. economy. This effects all Americans. Eight percent of American families will utilize capital gains treatment at some point in their life. We strongly agree with the prediction that a restoration of a lower capital gains tax rate would generate sufficient economic activity to be at least revenue neutral and very likely revenue positive.

Rural electric distribution systems have been extremely important of Virtinia's agricultural economy. Now these user-owned systems are showing great leadership in the area of generation. Old Dominion Electric Cooperative, which supplies power to ten Virginia cooperatives has applied for an REA guaranteed loan to build a generation facility in Clover, Virginia. The cost savings to consumers will be approximately $260 million over the life of the loan. In addition to these savings this plant will utilize clean technology and allow closing of older, less environmentally friendly projects. We request that you support this REA lending at levels sufficient to meet the needs of Virginia's electric cooperative consumers.

As we deliberated yesterday, it became very clear that this is a very frustrated group of business men and women—frustrated at the unreasonable, uneconomical, and unnecessary approach that is being taken by regulators to the production and consumption of agricultural and forestry products. Something must be done to add some sensibility to regulations or we will put American Agriculture, as we know it, out of business. American consumers now spend less than 12 percent of their disposable income on food. This low-cost food supply will be seriously jeoparidized if this overzealous approach to regulation and legislation continues. We will spend the remainder of our time today discussing just a few of these issues.

There is increasing public perception that the American food supply is unsafe or that certain production techniques are automatically better just because they carry the organic or natural label. The fact is the American food supply is the safest in the world and is becoming constantly safer as new production and processing technology is rapidly adopted by the industry. We urge you to take a reasonable cost-effective approach to legislating and guiding the regulators on food safety issues.

There are at least three Federal agencies clamoring to be the leader in the food and nutrition labeling arena. There are many conflicting regulations coming out of these agencies. If nutrition labeling is something that must be mandated by the Federal Government—at least let's have a coordinated nonconflicting regulatory program.

We in production agriculture have always felt that we have had animal welfare at heart—because well cared for animals are more productive—therefore more profitable.

The current animal welfare/animal rights movement is quickly moving toward a "no use of animals for food" movement. Please be aware of his hidden agenda.

We also have great concern regarding the interpretaton of Federal agencies of efforts to protect so-called nontidal wetlands. We are not opposed to efforts to protect true wetlands, but we have a serious problem with the broad interpretation now being applied. The zeal in which Federal agencies have interpreted nontidal wetlands regulation has resulted in de facto condemnation of vast holdings of private lands by the Federal Government. Here again we have conflicts among agencies. We had one case in Virginia in which a ditching plan was approved by the Soil Conservation Service only to have the Army Corps of Engineers insist the land be returned to its natural state. We must have relief in this area. We respectfully request you support efforts now going on to bring forth a more reasonable approach to nontidal wetlands preservation. We thank Congressman Pickett for his cosponsorship of H.R. 4133 and urge each of you to support this legislation.

There is another effort to eliminate timber sales from our national forest based on a so-called below cost timber sale restriction. When the extraordinary expense of complying with excessive restrictions, presale studies and roads built to outrageous standards are counted as cost of sale, these may appear as below cost sales when that is simply not the case. Please oppose the Office of Management and Budget's initiative to restrict these sales.

Labor availability and regulation are also forefront in our minds. Please support efforts to exempt temporary farm labor from the Federal tax withholding requirements. We also see a critical labor shortage on the horizon, due in large measure to burdensome Federal labor regulations.

Senator Kennedy's Senate Bill 1883 appears on the surface to be very innocent—but is in reality a serious attack on one of Virginia's most important agricultural crops—tobacco. Please oppose this poorly conceived legislation.

Finally, solid waste disposal is a real concern in all rural areas. The EPA regulations on the handling of solid waste has the potential to create a severe financial strain on rural localities. Please be aware of this important emerging issue.

We could talk forever on the issues that are important to Virginia agriculture and forestry. We spent quite a bit of time yesterday condensing our thoughts into this brief abridged statement. We urge you to review the complete list of Virginia Agribusiness Council policies on national issues.

Thank you for your strong support of the industries of agriculture and forestry and a special thank you for joining us this morning to discuss these issues.●

LEGALIZING DRUGS

● Mr. SIMON. Mr. President, one of the people who has contributed to this Nation in a variety of ways is Eleanor Holmes Norton, now a professor of law at Georgetown University Law Center.

Recently, she wrote a brief statement in response to the suggestion that drugs be legalized.

It is an absolutely sound analysis.

The one point she does not make in her statement, and the analogy to alcohol is always being made, is that alcohol consumption increased tremendously following the repeal of prohibition.

I do not suggest that we go back to prohibition, but I do suggest that anyone who wants to legalize drugs in this country should accept a substantial increase in their consumption and all the problems that go with it.

Mr. President, I ask to insert the Eleanor Holmes Norton statement in the RECORD at this point.

The statement follows:

SAY NO TO DRUGS LEGISLATION

(By Eleanor Holmes Norton)

What a fitting finale to the 1980's. Now that everything else has been deregulated, why not drugs? Exhausted intellectually, a tiny but vocal assortment of proponents of legalization has hoisted white flags and declared that the enemy is not substance abuse but faulty strategy. Just when drug use among all groups, including black students, is diminishing, reverse the signals and legalize the stuff.

The arguments shimmer with overpromise. Legalize drugs and release countless dollars for every unsatisfied domestic need. Treat addition as a medical problem as if that required legalizing the drug trade. And, of course, the facile analogy to alcohol is offered up.

But except for age restrictions, we totally deregulated alcohol. No one suggests the same for crack, PCP, or even heroin. Press proponents and the exceptions swallow the rule. The tight regulation that would be required would leave almost everyone on drugs today to the illicit drug market. Drug dispensing clinics or tightly controlled prescriptions would eliminate everyone except long-term, hopeless addicts. Otherwise, the program would be consumed with criticism for sustaining addiction in people who, with help, might defeat the habit. Thus legalization would leave us with the worst of both worlds—the illegal drug trade and a new sanctioned drug ethos.

Are we prepared for the changes such an ethos could bring? In a society where work is now prized, unproductivity would gain a foothold and purpose. In a country still trying to erase the visible effects of bigotry, people of color would be those most likely abandoned to addiction. Even during this decade the inner cities have been maimed by the simultaneous escalation in drug sales and the deliberate collapse of social programs.

No—this is no time to give in to the drug culture. Drugs have only just become a major national and citizen priority. Mass drug prevention education is in its infancy. The medical establishment and the National Institutes of Health have yet to mount a major effort in search of preventatives and cures for addiction comparable to efforts like those against cancer and AIDS. When all of this and more remains to be done, now is the time to fight, not surrender to drugs.●

HONORING THE 1990 STATE "A" BASKETBALL CHAMPIONS, THE CUSTER WILDCATS OF CUSTER, SD

● Mr. DASCHLE. Mr. President, I rise to pay tribute to South Dakota's new State "A" boys basketball champions, the Custer Wildcats of Custer, SD.

The Custer Wildcats recently finished a perfect season with a record of 25–0 on their way to their first State championship. The road to any State championship is a formidable undertaking, and the Wildcats' success is an accomplishment in which the entire school and community of Custer can take great pride.

Many elements go into winning a championship, including personal sacrifice, dedication and teamwork. The 1989–90 Custer Wildcats exemplify these qualities, and their hard work and ability has been rewarded with victory.

Mr. President, I salute the Custer High School basketball team and coaching staff. They serve as an example and inspiration to us all.●

THE DREAM IS ALIVE

● Mr. ROBB. Mr. President, all of us in this body receive a great many letters each day on a variety of issues, and the clean air bill, which we have just passed, is no exception.

But I would like to submit for the RECORD a special letter sent by a constituent of mine, Gregory Carmichael, a 14-year-old student at Walt Whitman Intermediate School in Alexandria, VA.

Greg, who has cystic fibrosis, sent a letter to our distringuished majority leader and included a speech he wrote on clean air, entitled "The Dream Is Alive." I ask that a copy of the letter and speech be printed in the RECORD.

The material follows:

Alexandria, VA, March 5, 1990.

Hon. GEORGE J. MITCHELL,
U.S. Senate, Washington DC.

DEAR SENATOR MITCHELL: My name is Gregory Carmichael, and I am a 14-year-old student at Walt Whitman Intermediate School in Alexandria.

Many of us at my school have become concerned about present day enviromental issues and how they will be affecting our future and the future of our children. We recognize this is a worldwide problem and not just a local one.

I was recently involved in developing a speech on this very subject for a class assignment, following the theme, "The Dream Is Alive." It was received well enough for me to get inivited to present it before the Optimist Club later this month.

Because of this, I have taken the liberty of sending you a copy of my speech to add to the material in support of the on-going discussions on clean air issues. The students at my school and I want to keep our dream of clean air very much alive.

Sincerely,

GREGORY CARMICHAEL.

THE DREAM IS ALIVE

"The dream is alive!" This is a dream we've all shared. It's one we've all experienced—sometime—somewhere—I'm talking about clean air—our atmosphere—the air we breathe!

We were all cursed from the very first day Prometheus stole fire from the gods. You see, fire was probably the original pollutant of our atmosphere.

Of course, the occasional fire of scattered tribes of early man were not concentrated enough to be a concern—even to serious environmentalists. But as populations increased so did the corresponding use of fire in its many forms . . . and the polluting of our atmosphere began to get serious.

From burning wood for heating and cooking to the discovery of fossil fuels for industrial use and, subsequently, the automobile, fire has played a larger and larger role in our lives. Yes, every automobile engine runs by the use of fire: internal combustion . . . but fire, all the same.

For a while, there seemed to be competition between sources of atmospheric pollutants. Were the gases spewed forth from the stacks of manufacturing plants worse than the gases from automobile exhaust pipes? We're a little smarter now. We realize all these sources are culprits in slowing down our dream for clean air.

Now, the scientific community is in mutual agreement with the consequences of burning fossil fuels. Every day, our atmosphere is receiving increased amounts of carbon dioxide from fuels burnt on earth. It doesn't matter whether the sources are industrial chimneys or automobile exhausts, the release of carbon dioxide into the atmosphere has grown exponentially since World War II. It is now estimated our use of fossil fuels releases 5 billion tons of carbon dioxide into the atmosphere annually. About half of this remains airborne. This is the amount that is measured—and what has been found to be increasing.

This buildup of CO_2 is a reality. It has been monitored with increasing precision since 1957—that's over 30 years—and the buildup continues.

Furthermore, carbon dioxide is not our only culprit. Trace gases have been building up in the atmosphere at a geometric rate as well. That reminds me of a cartoon the Tribune Syndicate ran not long ago: A couple of tourists had stopped at a scenic overlook to watch the sunset. There was a sign describing the sunset: "Ingredients," it stated, "carbon dioxide, sulfuric acid, nitric acid, nitrogen oxides, fluorocarbons, sulfur dioxide, soot." CO_2 and trace gases.

You're right. Pollutants from fire—CO_2—are not the only ones contaminating our atmosphere—slowing down our dream. As our methods of measurement improved, it was found that chlorofluorocarbon—CFC—gases also play a role.

What has been happening in the heavens is often referred to as the "greenhouse" effect. That is: What should be a happy balance of water vapor and carbon dioxide, allowing just the right amount of sunlight coming through to warm us and the right amount of infrared—heat—radiation returning to space, is slowly becoming imbalanced. The increase in CO_2 (carbon dioxide) and CFC's (chlorofluorocarbons) are creating a "blanket" around our planet that is trapping the radiation and slowly building up the temperature in our atmosphere—hence, the "greenhouse" effect.

Perhaps nothing illustrates our polluted atmosphere better than the observation made by Paul Weitz, commander of the first flight of the Challenger. He described a heavy pall of pollution, resembling the blue smoke of burning wood, seemed to hang over all the world's land masses, even undeveloped countries. He said, "It was appalling to me to see how dirty our atmosphere is getting."

And that was 1983!

But the dream is still alive!

It's alive, because just as we have improved our methodology for measuring pollutants in the atmosphere, we have discovered ways to reduce or prevent them in the first place.

It's a huge undertaking!

But one well worth taking.

The results are so critical to life as we know it.

An old Indian chief named Seattle, speaking on pollution 140 years ago, said "man did not weave the web of life; he is merely a strand in it. Whatever he does to the web, he does to himself."

The Department of Energy was more stark in a recent statement, saying: "Human effects on atmosphere composition . . . may yet overwhelm the life support systems crafted in nature over billions of years" . . . unless we act.—GREG CARMICHAEL.●

WORD EXPLOSION

● Mr. SIMON. Mr. President, someone gave me a book titled, "Word Explosion," and the subtitle is "Treasures in Poetry & Verse" written by the mentally ill and their family, friends, and professionals.

It is a remarkable small book. It can be purchased through the Alliance for the Mentally Ill, P.O. Box 863, Glenview, IL 60025.

I ask to have printed in the RECORD two of the poems. One is titled, "Peace of Mind," written by Christine Diensberg and the other is, "Autobiography," written by Michele Vickers.

I believe my colleagues should read them to appreciate the tone of the entire volume.

I am grateful to all who played a role in drafting this small volume.

The poems follows:

PEACE OF MIND

They don't seem to mind that my peace of mind
Lies shattered in pieces.
I'd like to give them a piece of my mind,
Disturb their peace of mind.
Which piece?
The one that feared it had frayed beyond repair
Thanks to their "care"?
Or the one that dreamed and danced in the sun,
Death-darkened into ugly oblivion?
The one that believed that to pray and to play
Made this heaven on earth?
Which piece?
From all these pieces,
Let me find one—peace.

—Christine Diensberg.

AUTOBIOGRAPHY

I walk by the ocean on the beach of life
Footprints revealing my path

With the gentle irregularity of a child's unsteady steps.
The tide grows stronger and
The wind begins to howl,
As if it were angry at some unseen being—
Lurking in the darkness of the final sane moments
Before the storm begins.
The confusion has begun.
Then the crack of lightning
And the roar of thunder.
The cry of a helpless child
Lost in the raging fury of the storm.
Confusion takes over
And gentleness is all but forgotten.

—*Michele Vickers.*●

ARIZONA DAILY NEWS-SUN ENDORSES TERM LIMITATION

● Mr. HUMPHREY. Mr. President, I would like to share with my colleagues an editorial supporting congressional term limitation, from the Daily News-Sun of Sun City, AZ. The editorial mentions support for Members of Congress by various special interest groups. So-called campaign finance reform is likely to be the subject of considerable debate in the Senate during the course of the year.

Some would argue that the solution is simple: limit contributions. Mr. President, a significantly greater, farther reaching, fundamental reform is to limit the tenure of office. Then, special interests and members would know from the moment they were sworn in that no matter how much money they gave and received, the scope of influence and the length of tenure would be unavoidably limited. In that way, we would begin to restore Congress to what the Founding Fathers envisioned: a representative body of citizen legislators.

I ask that the editorial from the Arizona Daily News-Sun be inserted in the RECORD immediately following my remarks, and I again urge my colleagues to cosponsor Senate Joint Resolution 235, a proposed constitutional amendment to limit congressional terms.

The editorial follows:

[From the Sun City (AZ) Daily News-Sun, Jan. 26, 1990]

LIMITING THE POWER

Six is the magic number in a new equation proposed by Sen. Gordon Humphrey of New Hampshire for congressional terms in office.

Humphrey, who will not run for a third term, seeks a constitutional amendment that would limit senators to two six-year terms and representatives to six two-year terms. Sen. Dennis DeConcini, D-Ariz., is cosponsor.

The U.S. Constitution mandates six-year-terms for senators, a third to be elected every two years, and two years for representatives, with election of the entire House every two years.

Complaints that long tenures have corrupted the system and built seniority and power for those who are consistently reelected are widespread. Americans perceive that the most powerful chairmanships go to long-time incumbents, who then are the likely recipients of the most support from special interest groups for their reelection. And, although congressmen deny it, Americans believe they may be influenced by those contributions.

Bills to limit or change congressional terms have had no success in Congress, naturally, because too many lawmakers are quite comfortable with the present system. But the Humphrey-DeConcini proposal may do better. Public dissatisfaction with long-term tenure and the demand for ethical reform in government is strong. And an amendment to the Constitution depends on acceptance by the people through their legislatures. If three-fourths of the state legislatures ratify the amendment within seven years after its introduction, it passes; if not, it is dropped.

This proposal should not be dropped. It won't be if enough people write to the Senate (Washington, D.C. 20510) in support of this reform.●

PASSAGE OF THE CLEAN AIR ACT

● Mr. ADAMS. Mr. President, I am pleased to join my colleagues in supporting the passage of a Senate clean air bill. I was a Member of the House of Representatives when the original Clean Air Act was adopted. That act gave us great hope. Unfortunately, it did not live up to our expectations. After many years we have now returned to this issue with revisions to strengthen the act. It has taken us a lot of hard work and many late nights to reach this point. Although the resulting document is a compromise, I believe that it was worth the effort.

The United States has a large number of competing interests to address on the clean air issue. None of these groups or persons was completely satisfied by the clean air bill in its final version. I am one of those people. I wanted a stronger bill and voted for every amendment which would have added to the compromise package. However, in passing this clean air bill I believe that the Senate has taken a giant step toward confronting and solving the problems with manmade air pollution. I recognize that the solutions we require in this legislation involve large economic costs. No doubt, a price must be paid for environmental protection but there are more important questions for us to consider: What are the costs of not cleaning up the environment? How much more will we pay in health care costs, lost productivity, and quality of life degradation without a strong Clean Air Act? My conclusion is that no price is too high to pay in achieving these goals.

In my own State of Washington we are struggling with very difficult pollution problems resulting primarily from auto emissions. The population around the city of Seattle has grown by more than 20 percent over the past decade. And it is expected to continue to grow at an accelerated pace. Many of these new residents have moved to the suburbs and commute long distances. This boom in population has caused a 73-percent increase in vehicle miles traveled in the State. The city of Spokane, in eastern Washington, also suffers from terrible pollution problems caused by automobiles. The pollution in this beautiful part of the State is compounded by temperature inversions. As a result, today we are experiencing smog incidents greater than those ever anticipated. It is my hope that the clean air legislation we have just passed will begin to address some of these pressing problems.

One area in which I have had a personal interest is the air quality in our parks and wilderness areas. I am pleased that the Senate shared my dedication to preserving these areas by approving my clean air in the parks amendment. It was one of the few strengthening amendments to survive the clean air negotiating process and pass on the floor of the Senate.

Maintaining clean air in our parks and wilderness is a very important issue to my State as well as the rest of the United States. In 1977, Congress enacted clean air legislation that directed the Environmental Protection Agency to preserve, protect, and enhance the air quality in our national parks and wilderness areas. Today, 13 years later, the promise of that legislation has yet to be fulfilled. In fact, the air in our parks is far worse then we ever imagined back in 1977.

In my own State, Mount Rainier is suffering from haze problems. There are days when you cannot see the mountain because of the pollution. Another extraordinarily beautiful park in my State, the Olympic National Park, is currently listed as one of the four places in the world with the purest air. Yet even this pristine area has reported plant damage resulting from air pollution.

Mr. President, Congress specifically protected these important areas, their scenery and natural systems from human destruction by drawing boundaries on a map—by designating these areas as parks or wilderness. Unfortunately, Mr. President, dirty air does not respect park boundaries.

My amendment directed the EPA to focus its attention on this problem and provided $8 million a year to the agencies for study purpose. The legislation authorized the EPA to set up regional commissions to assess problems in specific parks and wilderness areas. EPA is required to make regulations based upon the commissions' conclusions. In addition, the amendment specifically sets up a commission for the Grand Canyon, where the air pollution problem is at its worst.

My goal with this amendment, Mr. President, was a simple one, yet of vital importance: to ensure that our national parks and wilderness areas have clean air. We owe future genera-

tions nothing less. I appreciate my colleagues support of that goal.

Mr. President, I would like to conclude by thanking all the Members who worked so hard on developing the clean air package. It was a very long, difficult, and complex process. I am proud to be associated with this bill and trust that we have given our best effort to fulfill the trust of the American people.●

THE JOURNAL

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Journal of proceedings be deemed approved to date.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations:

Calendar 683, Jo Anne B. Barnhart, to be Assistant Secretary for Family Support, Department of Health and Human Services;

Calendar 684, James B. Edwards, to be a member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the Corporation in 1990;

Calendar 685, James B. Edwards, to be member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the Corporation in 1993;

Calendar 686, William D. Phillips, to be an Associate Director of the Office of Science and Technology Policy;

Calendar 687, Eugene Wong, to be an Associate Director of the Office of Science and Technology Policy;

Calendar 688, Donald R. Quartel, Jr., to be a Federal Maritime Commissioner;

Calendar 689, Henry J. Cauthen, to be a member of the Board of Directors of the Corporation for Public Broadcasting;

Calendar 690, Lloyd Kaiser, to be a member of the Board of Directors of the Corporation for Public Broadcasting;

Calendar 691, Robert M. White, to be Under Secretary of Commerce for Technology;

Calendar 692, promotions in the Coast Guard;

Calendar 693, Edward W. Kelley, Jr., to be a member of the Board of Governors of the Federal Reserve System;

Calendar 694, Robert H. Swan, to be a member of the National Credit Union Administration Board; and

Nominations placed on the Secretary's desk in the Coast Guard, National Oceanic and Atmospheric Administration.

I further ask unanimous consent that the nominees be confirmed, en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table, en bloc, that the President be immediately notified of the Senate's action, and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Jo Anne B. Barnhart, of Delaware, to be Assistant Secretary for Family Support, Department of Health and Human Services.

COMMUNICATIONS SATELLITE CORPORATION

James B. Edwards, of South Carolina, to be a member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the Corporation in 1990.

James B. Edwards, of South Carolina, to be a member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the Corporation in 1993.

EXECUTIVE OFFICE OF THE PRESIDENT

The following-named person to be an Associate Director of the Office of Science and Technology Policy: William D. Phillips, of Missouri.

The following-named person to be an Associate Director of the Office of Science and Technology Policy: Eugene Wong, of California.

FEDERAL MARITIME COMMISSION

Donald Robert Quartel, Jr., of Florida, to be a Federal Maritime Commissioner for the term expiring June 30, 1994.

CORPORATION FOR PUBLIC BROADCASTING

Henry J. Cauthen, of South Carolina, to be a member of the Board of Directors of the Corporation for Public Broadcasting for a term expiring March 1, 1994.

Lloyd Kaiser, of Pennsylvania, to be a member of the Board of Directors of the Corporation for Public Broadcasting for a term expiring March 1, 1994.

DEPARTMENT OF COMMERCE

Robert Marshall White, of Minnesota, to be Under Secretary of Commerce for Technology.

COAST GUARD

The following officers of the U.S. Coast Guard for appointment to the grade of rear admiral:

Robert E. Kramek.
Ronald M. Polant.
William P. Leahy, Jr.
Joel D. Sipes.
Richard D. Appelbaum.

The following officers of the U.S. Coast Guard for appointment to the grade of rear admiral (lower half):

Gregory A. Penington.
Paul E. Versaw.
William C. Donnell.
Kent H. Williams.
James M. Loy.

FEDERAL RESERVE SYSTEM

Edward W. Kelley, Jr., of Texas, to be a member of the Board of Governors of the Federal Reserve System for a term of 14 years from February 1, 1990.

NATIONAL CREDIT UNION ADMINISTRATION

Robert H. Swan, of Utah, to be a member of the National Credit Union Administration Board for the term of 6 years expiring August 2, 1995.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE COAST GUARD, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Coast Guard nominations beginning Aubrey W. Bogle, and ending David P. D'angelo, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of March 5, 1990.

National Oceanic and Atmospheric Administration nominations beginning James A. Yeager, and ending James L. Yeatts, Jr. which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 23, 1990.

NOMINATION OF JO ANNE BARNHART FOR ASSISTANT SECRETARY FOR FAMILY SUPPORT

Mr. ROTH. Mr. President, there is a rare breed of person who exudes confidence, intelligence, savvy, compassion, and warmth. I was lucky enough to have such a person serve on my staff not once, but twice—Jo Anne Barnhart. Now, Jo Anne has been nominated for the position of Assistant Secretary for Family Support. It is with both pride and pleasure that I can say without hesitation that Jo Anne is an excellent choice for this new position at HHS. Her long list of accomplishments is a clear indication that she has the skill, the drive, and the administrative experience to oversee our Nation's largest welfare and family support programs.

Having known Jo Anne for many years and enjoyed the benefit of her knowledge and insight as a staff person, I believe I am in an excellent position to strongly recommend her nomination.

Most recently Jo Anne has served as staff director of the Governmental Affairs Committee, first as majority staff director, more recently as minority. During her 4-year tenure as staff director, Jo Anne has done an outstanding job of overseeing committee hearings, legislative activities, and general operation, dealing with such issues as IGS' offices, Government organization, and the budget process. Jo Anne also served on my staff from 1977 to 1981 as a legislative assistant handling health, welfare, Social Security, and labor issues.

Jo Anne also has a great deal of experience and expertise pertinent to the specific responsibilites she would assume at HHS. Prior to joining my staff, Jo Anne worked for the Reagan administration on a study of the welfare system. In addition, Jo Anne served as Associate Commissioner and Deputy Associate Commissioner for Family Assistance at HHS from 1981 to 1986. In this capacity, she ran the Nation's welfare program, AFDC, and low-income energy assistance. Her strong accomplishments at HHS did not go unrecognized—she was honored

with the Secretary's Distinguished Service Award in 1985 and the Commissioner's Citation in 1984.

On a more personal note, through my years of professional experience with Jo Anne, I have come to respect her as a woman of strong character and great ability. And, I have come to value her as a friend.

In my opinion, the President has made an excellent choice in nominating Jo Anne for this new position which was created under the welfare reform bill. While I wholeheartedly support her nomination, I will certainly miss her significant and valued contribution to my staff. I am, however, proud to see her advance to this position and confident that she will serve with distinction.

I strongly urge my colleagues to approve her nomination.

NOMINATION OF DR. JAMES B. EDWARDS TO THE COMSAT BOARD OF DIRECTORS

Mr. THURMOND. Mr. President, today, I rise in strong support of the confirmation of former South Carolina Governor and U.S. Secretary of Energy, Dr. James B. Edwards to the Comsat Board of Directors. Dr. Edwards was unanimously approved by the Commerce, Science, and Transportation Committee for this appointment on April 3, 1990.

Dr. Edwards has extensive and wide-ranging experience in government and medicine. He was a Senator in the South Carolina Senate from 1973 until his election to the governorship in 1975. He was the first Republican Governor to be elected in South Carolina in 100 years. In 1978, he chaired the Southern Governor's Conference. He was named U.S. Secretary of Energy by President Reagan in 1981.

Dr. Edwards, in addition to serving his State as a highly regarded legislator, is the president of the Medical University of South Carolina. He has served in this post since 1982, when he left the Department of Energy. He is a dentist, having received his professional training at the University of Louisville and the University of Pennsylvania. He has practiced oral and maxillofacial surgery in South Carolina for 17 years.

Dr. Edwards is the recipient of numerous awards, including 10 honorary degrees from institutions of higher learning. In 1989, he published an article entitled "No Tritium: How the U.S. Could Lose Its Nuclear Deterrent." It was published in 12 newspapers, including the Atlanta Constitution, the Chicago Tribune, and the Columbia, (SC) State.

In closing, Dr. Edwards' legislative experience on both the State and national levels, along with his administrative talents as the president of a medical school and his professional acumen as a practicing dentist, combine to give us a man well-suited to meet the challenges of participation on the Comsat Board of Directors. He is a man of great ability, proven dedication and unquestioned integrity. I urge the Senate to speedily confirm his nomination.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will return to legislative session.

HOUSE CONCURRENT RESOLUTION 275—PROVIDING FOR PREPARATION OF A VOLUME ENTITLED "COLUMBUS IN THE CAPITOL"

Mr. RIEGLE. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of House Concurrent Resolution 275, providing for the preparation of a volume on "Columbus in the Capitol" just received from House of Representatives.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 275) providing for preparation of a volume entitled "Columbus in the Capitol" and for other purposes.

The concurrent resolution (H. Con. Res. 275) was considered and agreed to.

The preamble was agreed to.

Mr. RIEGLE. Mr. President, I move to reconsider the vote.

Mr. HUMPHREY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL CRIME VICTIMS' RIGHTS WEEK

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 242 designating "National Crime Victims' Rights Week," and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 242) designating the week of April 22 through April 28, 1990, as "National Crime Victims' Rights Week."

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. THURMOND. Mr. President, I am pleased the Senate is acting today on my joint resolution, Senate Joint Resolution 242, which designates the week of April 22-28, 1990, as "National Crime Victims' Rights Week."

It is a sad legacy that over the past few years, nearly 35 million Americans were victimized annually by criminal acts; 6 million individuals per year are raped, robbed, beaten, or murdered. The impact of crime is devastating to innocent victims and their families. In addition to the physical injuries and the financial losses, the victim is further scarred with the emotional loss of one's sense of dignity, security, and trust in other human beings. It is disturbing that the likelihood of becoming a victim of violent crime is now greater than that of being injured in an automobile accident.

Further compounding the pain and anguish victims must endure has been an historical insensitivity to their plight. The criminal justice system has often times ignored the rights of victims before making crucial decisions regarding their cases or failed to notify them that a defendant had been released on bail. While the system offered legal representation and other forms of aid to the accused, it offered minimal assistance to the victim in recovering from the tremendous burden resulting from victimization.

Seven years ago, the President's Task Force on Victims of Crime presented an agenda to correct these injustices and restore balance to the criminal justice system. At the Department of Justice, an Office for Victims of Crime was established within the Office of Justice Programs for the purpose of helping States implement the task force's recommendations. The Federal Government began awarding fines collected from convicted Federal offenders to the States to aid victims of crime. In addition, the National Victims Resource Center within the Office for Victims of Crime was established to provide information on victim assistance programs and laws. Largely as a result of these efforts, community programs for victims have grown in number and now every State has a designated agency responsible for victim services.

Much progress is being made to help the victims adjust, but much more needs to be done. Through the continued efforts of State and local governments and private organizations and concerned citizens, the trauma suffered by the innocent victims of crime will be eased.

Mr. President, I urge my colleagues to join with me and support passage of this joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

S.J. RES. 242

Whereas thirty-five million individuals in the United States are victimized by crime each year, with six million falling prey to violence;

Whereas the Department of Justice estimates that five out of six individuals will be the victim or intended victim of crime during their lifetimes;

Whereas many victims suffer severe psychological, physical, and emotional hardships as a result of victimizations;

Whereas the Nation must commit its collective energies to improving the criminal justice and social services response to victims;

Whereas injustice to crime victims must be redressed by implementing the recommendations proposed by the President's Task Force on Victims of Crime; and

Whereas as a Nation committed to justice and liberty for all, efforts must be continued to remove the inequities victims face and to protect and restore individual rights: Now, therefore, be it

Resolved, That April 22 through April 28, 1990, is designated as "National Crime Victims' Rights Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate ceremonies and activities.

Mr. RIEGLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. HUMPHREY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXPRESSING THE APPRECIATION OF CONGRESS FOR THE CONTRIBUTIONS OF THE FRIENDS OF THE NATIONAL ARBORETUM

Mr. RIEGLE. Mr. President, on behalf of Senator MITCHELL and Senator DOLE, I send to the desk a concurrent resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 117) expressing the appreciation of Congress for the contributions of the Friends of the National Arboretum in providing for the preservation and public display of 22 of the original columns of the United States Capitol Building.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 117) was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, is as follows:

S. CON. RES. 117

Whereas the Captiol Building of the United States symbolizes the enduring success of the American system of representative democracy;

Whereas on-going construction of this magnificent building, which began nearly two centuries ago and continued until recently, has mirrored the geographic expansion of the United States;

Whereas the original Corinthian sandstone columns that stood for more than 130 years on the East Front Portico of the Capitol Building were replaced during the extension of the East Front of the Capitol Building in the late 1950's;

Whereas 22 of those columns have been preserved and made available for public display at the National Arboretum in the Nation's Capital through the initiative and determined efforts of the Friends of the National Arboretum, a nonprofit, volunteer organization that supports the efforts of the National Aboretum; and

Whereas these historically significant columns will be dedicated at the National Arboretum on Flag Day, June 14, 1990: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress extends its deep appreciation to the Friends of the National Arboretum and those individuals whose financial contributions have helped ensure that 22 of the original sandstone Corinthian columns which were removed from the East Front Portico of the Capitol Building during the extension of the East Front of the Capitol Building in the late 1950's will be permanently preserved and publicly displayed at the National Arboretum.

Mr. RIEGLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. HUMPHREY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING THE PRINTING OF A BROCHURE DESCRIBING THE HISTORY, DESIGN, AND FUNCTIONS OF THE U.S. CAPITOL AS THE SEAT OF THE LEGISLATIVE BRANCH OF GOVERNMENT

Mr. RIEGLE. Mr. President, on behalf of Senators MITCHELL and DOLE, I send to the desk a concurrent resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 118) to authorize the printing of a brochure describing the history, design, and functions of the United States Capitol as the seat of the legislative branch of the Government.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 118) was agreed to, as follows:

S. CON. RES. 118

Resolved by the Senate (the House of Representatives concurring), That a brochure describing the history, design, and functions of the United States Capitol as the seat of the legislative branch of the Government shall be printed as a Senate document, with appropriate illustrations and diagrams. In addition to the usual number, 250,000 copies of the brochure shall be printed for the use of the Senate and the House of Representatives, to be allocated as determined jointly by the Secretary of the Senate and the Clerk of the House of Representatives.

Mr. RIEGLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. HUMPHREY. I move to lay that motin on the table.

The motion to lay on the table was agreed to.

ORDER FOR STAR PRINT—S. 2235

Mr. HUMPHREY. Mr. President, on behalf of Senator BURNS, I ask unanimous consent that S. 2235 be star printed to reflect the following changes, which I send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

FURTHER DELAYING THE APPLICABILITY OF CERTAIN AMENDMENTS TO THE PUBLIC HEALTH SERVICE ACT

Mr. RIEGLE. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 3968, the organ transplant amendments, just received from the House.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3968) to further delay the applicability of certain amendments to the Public Health Service Act that relate to organ procurement organizations.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question in on the third reading and passage of the bill.

The bill (H.R. 3968) was ordered to a third reading, was read the third time, and passed.

Mr. RIEGLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HUMPHREY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CLEAN AIR ACT AMENDMENTS

Mr. RIEGLE. Mr. President, I ask unanimous consent amendment No. 1459 be modfied to reflect the change I now send to the desk.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

On page 227, line 2, strike out "or" and insert after "(k)": ", or (l) of this section or under paragraph (a)(5), (a)(9), or (a)(11) or subsection (e) of section 212".

SCHEDULE

Mr. MITCHELL. As in legislative session, Mr. President, I note the presence of the distinguished Republican leader on the Senate floor and would like now to discuss with him for the benefit of Senators the schedule for the remainder of today and the remainder of the week.

First let me say for the information of Senators, there will be no further rollcall votes today.

Mr. President, it is my hope that on tomorrow the Senate can take up as many of the three pending matters which the distinguished Republican leader and I have previously discussed and which I have previously announced publicly. The first is the authorization bill on the President's request for aid to Panama and Nicaragua. That is, of course, an essential first step toward providing that aid.

We have been seeking approval of an agreement under which that authorization bill, reported out by the Foreign Relations Committee last week, could be taken up in a short time limit without amendments. We have been able to clear that on the Democratic side. I understand that the distinguished Republican leader is working to get that cleared on the Republican side and has not been able to do so finally yet. It is my hope that we will be able to do that tomorrow early if he is able to gain the appropriate clearance from his colleagues.

I would yield to the distinguished Republican leader. Perhaps he might comment on that.

Mr. DOLE. Just on the authorization?

Mr. MITCHELL. Yes, on the authorization.

Mr. DOLE. I believe we are making progress. I know we are making progress on the authorization for Panama and Nicaragua and other items. It is our hope that we can have an agreement to provide for no amendments. Perhaps, if that were the case, there probably would not be a great deal of debate and that could be disposed of rather quickly. I think it is down to one problem right now and we are working on that.

Mr. MITCHELL. I thank the distinguished Republican leader for his usual cooperation and courtesy.

I hope, Mr. President, to enable us to begin the process of moving forward on the President's request in this area, that we will be able to act on the authorization bill tomorrow.

In addition, as both the distinguished Republican leader and I previously discussed, it is our hope to proceed to and complete action on the vocational education bill tomorrow. I understand from staff on both sides that good progress is being made there and that there is now some hope that we can take it up and perhaps dispose of it in a relatively short period of time tomorrow. Even if we do not reach agreement, my hope is that we could take it up and simply proceed until such time as we complete action on it.

Mr. DOLE. On that particular matter, it is my understanding from talking to staff on our side that it is about to be or could become an unanimous-consent agreement. So they have made a lot of progress. Apparently they have agreed to take and modify some of the proposed amendments. In checking wtih everyone on our side who has an interest, I think they have all, in effect, signed off, so that could be disposed of rather quickly.

Mr. CHAFEE. Mr. President, I wonder if I might ask the distinguished leaders a question, and I see the distinguished chairman of the Foreign Relations Committee here. On the legislation dealing with the authorization for Panama and Nicaragua, which I believe is $500 million for Panama and $300 million for Nicaragua, is there also an authorization in there for Israel and a guarantee for construction of housing?

Mr. PELL. My recollection is that there is $400 million for a housing guarantee program.

Mr. CHAFEE. The only reason I am asking these questions, I heard the suggestion being made that nothing would be subject to amendment. My question is: Am I correct that AID policies would ensure that the housing guarantee money spent on the West Bank?

Mr. PELL. Yes. That is correct.

Mr. DOLE. If the Senator would yield on that point, I discussed this yesterday with Secretary Baker, and I think he would prefer not to have any assurances written into the legislation. They would prefer to have flexibility. Because if we write in some assurance on this, it tends to limit their options. I think that may be the reason there are no written restrictions or assurances in the legislation.

Mr. MITCHELL. May I add an additional point so that the Senator from Rhode Island could understand the nature of the request. It is twofold. First, the President is anxious that we move forward on his Panama-Nicaragua aid request. As recently as this afternoon, he invited Senator DOLE and I and others to meet with him on that subject and repeated his interest in prompt action.

The first step in that process is, of course, the authorization bill. It is my expectation that in the near future we will be taking up the appropriations bill that would provide appropriations for some of the measures authorized in this bill. Everyone anticipates that there are a significant number of amendments that Senators intend to offer on the various subjects contained in those bills and, as we all know from experience here, perhaps many others unrelated to the substance of the measure.

So as not to require the Senate to do the same thing twice in such a short period of time and and so as to accommodate the President to get this process moving, the distinguished Republican leader and I have agreed to and are trying to get an agreement that would enable us to do the authorization bill in a short period of time without amendment so that when the appropriations bill comes up, which everyone expects to be in the near future, there will be opportunity for people to offer such amendments as they want.

It is bad enough that we do things in a repetitious manner, but ordinarily we do not do them in a repetitious manner so close together. So it is not an effort to prevent anyone from offering amendments—that is obviously going to occur—but merely to minimize the time spent on the subject when we are doing the authorization and appropriations bills so close together.

Mr. CHAFEE. I do not want to delay this, but I am not quite clear of the schedule. We will do the authorization tomorrow, presumably, and let us say that would pass. Then when would the appropriation come? We are going off for recess for 8 or 10 days. Then we come back. Then would it be the distinguished majority leader's view that probably the appropriation would come relatively soon after that?

Mr. MITCHELL. That decision will be made by the Appropriations Committee, of course, as to when they act. When they do act, then we would be prepared to proceed.

Mr. CHAFEE. Mr. President, I know that it is the policy of the United States, as I understand it, to discourage settlements in the West Bank. It would seem very hard for us to be, in effect, subsidizing housing. I guess it is a guarantee, but knowing the way life

is, I would not be surprised if we do not end up paying the money, that we will be constructing that very housing in the area where we say housing should not be built, a settlement should not occur.

But the distinguished Republican leader has indicated that the Secretary of State, who certainly is going forward with our policy, indicates he does not want restrictive language in there, at least in the authorization.

Mr. MITCHELL. I believe there will be ample opportunity for the distinguished Senator from Rhode Island and others to consult with the Secretary of State and the President on their wishes with regard to this, long prior to the time we deal with the appropriation.

Mr. CHAFEE. Could I ask another question? The reason I am asking these questions is I understand once we get rolling tomorrow, as I just was hearing the discussion while watching the TV on this, that the leader is asking a unanimous consent there be no amendments.

Mr. MITCHELL. That is correct.

Mr. CHAFEE. This $400 million, is that a rolling guarantee that goes on? How does this work?

Mr. MITCHELL. I have to leave for just a moment. Why do I not permit the Senator from Rhode Island to engage in this colloquy with the chairman of the committee, because I think he is the proper person to discuss the substance of the authorization.

Mr. CHAFEE. But meanwhile, the Senator is seeking this unanimous consent.

Mr. MITCHELL. Not at this time. We are trying to get it for tomorrow.

Mr. DOLE. If the majority leader will yield, on the JPTA bill, we have just checked on our side, we do not think it will be possible to take that up before the recess. There are negotiations going on with Senator SIMON, Senator HATCH, and Senator KENNEDY, and we are advised by Senator HATCH's office they do not think they are going to be able to complete it by Thursday.

Mr. MITCHELL. I appreciate that. It had been my hope we could take it up. As I indicated to those interested in that legislation, if we do not take it up tomorrow, I do not know when we are going to get to it because we have a very crowded schedule when we return after Easter.

I thank my colleague, and I now leave the Senator to any discussion on the substance.

The PRESIDING OFFICER (Mr. BINGAMAN). The Senator from Rhode Island.

Mr. PELL. In answer to the question of my colleague, my understanding that the $400 million is an allowed rolling total and is not tied to any particular fiscal year.

Mr. CHAFEE. I appreciate the Senator's clarification. I have one further question. We have had a lot of experience with guarantees in this country and they frequently do fail, and the Federal Government ends up picking up the tab. I'm not saying this would happen in this case, but I wonder whether it could.

Mr. PELL. The Senator raises a valid point. I am sure neither of us would expect a default and trust that the investment is safe. However, the United States would be providing that guarantee. That is the basic point.

Mr. CHAFEE. I thank the Senator.

ORDERS FOR TOMORROW

RECESS UNTIL 10:30 A.M.; MORNING BUSINESS AND CONSIDERATION OF S. 1109

Mr. RIEGLE. Mr. President, on behalf of the majority leader, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10:30 a.m., Thursday April 5; that following the time for the two leaders, there be a period for morning business not to extend beyond 12 noon, with Senators permitted to speak therein for up to 5 minutes each.

I further ask unanimous consent that at 12 noon, the Senate begin consideration of Calendar No. 414, S. 1109 the Vocational Education Act reauthorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

RECESS UNTIL TOMORROW AT 10:30 A.M.

Mr. RIEGLE. If the distinguished acting Republican leader has no further business, and I am told he does not, and if no Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess, under the previous order, until 10:30 a.m., Thursday, April 5.

There being no objection, the Senate, at 7:44 p.m., recessed until Thursday, April 5, 1990, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate April 4, 1990:

COMMODITY FUTURES TRADING COMMISSION

WENDY LEE GRAMM, OF TEXAS, TO BE A COMMISSIONER OF THE COMMODITY FUTURES TRADING COMMISSION FOR THE TERM EXPIRING APRIL 13, 1995 (REAPPOINTMENT).

WENDY LEE GRAMM, OF TEXAS, TO BE CHAIRMAN OF THE COMMODITY FUTURES TRADING COMMISSION (REAPPOINTMENT).

IN THE NAVY

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT AS VICE CHIEF OF NAVAL OPERATIONS AND APPOINTMENT TO THE GRADE OF ADMIRAL WHILE SERVING IN THAT POSITION UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTIONS 601 AND 5035:

To be vice chief of naval operations

VICE ADM. JEROME L. JOHNSON, U.S. NAVY, 435-44-5217.
